It is true that the local companies would like contracts which would aggregate in excess of $258,000 a year. The committee endeavored to ascertain whether such an arrangement could be made with the local companies as would make it more desirable to obtain the service from them rather than put in this central plant and discard the separate isolated plants in each one of the buildings.

Anyone who will investigate the matter with an impartial mind will come to the conclusion that the only sensible, proper course to pursue is for the Government to have a plant that will provide light, heat, and power for the twenty-odd buildings within an area that can properly be supplied from one plant.

Mr. COX. Will it be made large enough for future needs?

Mr. FITZGERALD. The proposed plant, with a limit of cost of $1,500,000, will not only supply the 20 buildings named, but will have a sufficient capacity to provide the heat and light necessary for the three proposed buildings—for the Department of State, for the Department of Justice, the Department of Commerce and Labor, and the proposed building for the Geological Survey—and at the same time afford a reasonable reserve to supply the buildings served by the Capitol power plant in case of a breakdown or an emergency. It is proposed by a cross connection to connect this plant with the Capitol power and lighting plant and have the Government itself furnish at rates for which the local companies can not compete the great amount of light, power, and heat required in these particular buildings.

The committee recommended this investigation because the matter is peculiarly within its control.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. FITZGERALD. Mr. Chairman, I ask for 5 minutes more.

The CHAIRMAN. The gentleman from New York asks that his time be extended 5 minutes. Is there objection?

There was no objection.

Mr. AUSTIN. Will the gentleman yield?

Mr. FITZGERALD. Certainly.

Mr. AUSTIN. I think I am for the gentleman's proposition, but I want information as to how this will affect the proposition to develop the electrical power on the Potomac above the city of Washington?

Mr. FITZGERALD. The statement is made that even if the report of the engineers demonstrates that there is sufficient capacity at Great Falls to develop the power adequate to furnish light and power to the city, that it would be necessary to have a steam plant for reserve purposes, and a plant of this character would be necessary for the Government service.

Mr. AUSTIN. In other words, this would not in any way interfere with the project at Great Falls, on the Potomac River?

Mr. FITZGERALD. It would not. This matter was pressed particularly on the committee at this time because the committee was faced with the great necessity of making some provision for the heating, light, and power required in the Bureau of Engraving and Printing Building, which is now in course of erection.

Mr. HOWARD. If the gentleman will yield, has the committee any estimate of the operating expenses per annum of this plant after it is completed? It will be $286,000 per annum, will it not?

Mr. FITZGERALD. No; it is $211,000.

Mr. HOWARD. What proposition was made by the local electric light and power company to enter into a contract to furnish the Government the same service as is contemplated by this plant?

Mr. FITZGERALD. They said they would furnish light at 2 cents a kilowatt hour and steam at 24 cents a thousand pounds. At the present time we have with them, however, a sliding contract, and I defy anyone in Washington to figure out the rate the Government is paying for electric light under these contracts.

Mr. LANGLEY. How does the gentleman know that this will be an economical proposition if he can not figure that out?

Mr. FITZGERALD. It is based on the report and statements of the three engineers who prepared the report and which was checked up by the engineer in charge of the Capitol power plant. We did not rely upon the theories either of the engineers representing the Government or the engineer representing the local lighting company. We base our judgment upon the experience had in the operation of the Capitol power plant by which this building and the two Office Buildings and the Library of Congress are heated and lighted. The proposed plant will be practically of the same capacity. We know we are furnishing light and heat much more cheaply than we could purchase it before we erected the Capitol power plant.

Mr. COX. Mr. Chairman, I would like to ask the gentleman one question.

Mr. FITZGERALD. Mr. Chairman, if the gentleman will permit, I recollect a few years ago the local company made a proposition which the Committee on Appropriations submitted to the House. It was sent back for further investigation. We investigated further. The company, as I recall, asked for a contract to furnish 6,000,000 kilowatt hours at 6 cents a kilowatt hour, and for all beyond that the rate was reduced; but the cost of it, when the average cost of supplying the light was ascertained, made it about three times what it is costing us to furnish light with one of the many small plants that we have.

Mr. COX. I would like to ask the gentleman a question in connection with what he stated a moment ago as to the proposition which the local company proposed to furnish light at, namely, 2 cents per kilowatt hour. Was that price any lower than what they have been furnishing it at heretofore?

Mr. FITZGERALD. Oh, yes. This is the first time anybody suggested any such terms to the Government, and those terms would not have been suggested if the local company had not ascertained that the Committee on Appropriations was investigating and considering this proposition.

Mr. COX. Does not the gentleman believe that they would never have submitted that reduced price if it had not been for the committee's proposition which it then had under consideration?

Mr. FITZGERALD. That is true; and not only that, but there is a more serious matter than that, as pointed out by the engineers.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. FITZGERALD. Mr. Chairman, I ask unanimous consent that my time be extended for five minutes.

Mr. LANGLEY. Mr. Chairman, I understood that I had the floor on the reservation of a point of order.

The CHAIRMAN. But the gentleman's time expired, and the gentleman from New York took the floor.

Mr. FITZGERALD. I have no disposition to deprive the gentleman of the floor.

The CHAIRMAN. Is there objection to the request of the gentleman from New York to proceed for five minutes?

There was no objection.

Mr. FITZGERALD. If we are furnished heat and light and power by the local company, it would be necessary to build certain conduits connecting the Government buildings with the local company plant and whatever additional plants it will be necessary to obtain to furnish the heat and light and power. The Government engineers have pointed out that after the first contract expires or any renewals, the company will own the conduits and the Government will then be at the mercy of the company, unless the Government itself wishes to go to the expense of supplying the conduits.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. HOWARD. Mr. Chairman, I understand that the public utility bill was passed at the other end of the Capitol to-day. Should that bill pass this House, what effect would that have upon contracts made by the Government with certain corporations for public utility service?

Mr. FITZGERALD. I do not think any bill that we pass can affect any contracts now in existence or that have already been made.

Mr. HOWARD. I understand this is a new contract, the proposal to furnish heat and light and power for $256,000 per annum.

Mr. FITZGERALD. Mr. Chairman, I am not familiar with the terms of that bill, but this proposed contract is much more favorable to the consumer, which in this case is the Government, than any contract which now exists either with the Government or with any private party, and it would not have been submitted or suggested had it not been for the fact that it was known that this was to be proposed. At present the local company is furnishing $70,000 worth of current and light for some of these buildings.

The Government is furnishing a greater portion both of the light, heat, and power from isolated plants in these buildings. If this plant is erected these other plants will be scrapped, and it is estimated that the salvage will be worth $250,000. Instead of having a separate plant for the National Museum, a separate plant for the State, War, and Navy Departments, a separate plant for the Treasury building, a separate plant in these various buildings, we will have what any business concern would have, a central plant where economies from modern inventions and up-to-date methods can be adopted and their advantages derived by the Government. The striking out of this item does not enlarge the possibilities of obtaining service from the local companies because I assume that Congress will do what it has done heretofore, it will continue to authorize these small plants because it has found it economical to operate these small plants in isolated buildings rather than to purchase power, light, and heat from the local companies.

Mr. HOWARD. I would like to ask the gentleman a question.

Mr. FITZGERALD. I yield.

Mr. HOWARD. The gentleman mentioned the fact that the report shows that if the Potomac Electric Light & Power Co. is allowed, or any other power company, to lay conduits or pipes, or whatever may be necessary to conduct this steam and electric current to these buildings, we would be at the mercy of this corporation after the expiration of the term of contract. Upon what theory does the gentleman base that? Could not the Government make a contract conditional upon the granting of a franchise? We could retain the franchise. If the Government of the United States made such a contract and did not retain the right to the franchise, and this company went into its own buildings with its conduits, it would certainly be a very unbusinesslike proposition on the part of the Government.

Mr. FITZGERALD. Well, the fact is that under all the contracts under which we are now operating with the local company, the Government is paying more for the service than it would have to pay if it were furnishing all the power, light, and heat it uses.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. SISSON. Mr. Chairman, I would like to call the attention of the gentleman from Kentucky [Mr. LANGLEY] and say that the engineers' report, on an investigation of this matter, states that the cost of the Capitol plant, with all changes in the various buildings incident to being served by said plant, was approximately $1,500,000, while the estimated cost of the proposed plant is $1,494,104, or practically the same amount of money. Now, the plant which supplies light for the four buildings—the Capitol, the two Office Buildings, and the Library—saves the Government annually—and I would like the gentleman from Kentucky to notice this—since being placed in operation the Capitol plant has effected an annual saving of approximately $140,005.89. Now, that is annually. That has been the average saving to the Government in lighting those four buildings.

Mr. LANGLEY. Will the gentleman permit a question there? This is new legislation, is it not?

Mr. SISSON. This is new legislation.

Mr. LANGLEY. Why is not this proposition brought in here in the regular way?

Mr. PAGE. This is the regular way.

Mr. FITZGERALD. This is the way the Capitol plant got in.

Mr. LANGLEY. Then, if this is the regular way, the point of order could not be sustained on it.

Mr. PAGE. It is in the regular way in that the committee from which it comes has jurisdiction over the light and heating apparatus of all these buildings.

Mr. SISSON. One further proposition I desire to submit to the gentleman from Kentucky. Now, the proposed proposition by the engineers will save to the Government from $167,345 to $189,445 annually. Now, I will state to the gentleman from Kentucky that originally I was opposed to this proposition, but I am from Missouri and can be shown——

Mr. LANGLEY. So am I; I am from Pike County, Ky., and it is practically the same thing.

Mr. SISSON. But when I realized that the proposition is a good one for the taxpayers of the United States Government and is saving them money, and it will not prevent the Government in the future from using the water power at Great Falls, there can be no objection in the world to this legislation going on this bill for the heating and lighting of all these Government buildings. The heating and lighting of all the Government buildings has always been carried on the sundry civil bill.

Mr. LANGLEY. If the gentleman will permit me, my observation has been, and it is based upon a connection with the departmental service here for a good many years, that when a proposition of this kind is advanced, while it is estimated at the time it will only cost a certain amount of money, it ultimately results in a good deal larger expenditure than at the time it was thought it would result in.

It may be true that the estimate may be a little too low, but even if the plant should cost $2,000,000—and nobody believes it will cost that—you will make money for the Government by establishing it.

There is a matter which has not been called to the attention of the committee, and that is this: When you have all these different plants all over the city, your managerial or directing expenses are multiplied by the number of plants which you have. Therefore, with this one plant, the high-salaried men can be reduced down to where you have one man managing this dangerous machinery.

The CHAIRMAN. The time of the gentleman from Mississippi [Mr. SISSON] has expired.

Mr. HOWARD. Mr. Chairman, it is not my purpose to delay the progress of this bill. However, this is quite a large item, and as I have heard so very much in the last few days from my colleagues on this side of the Chamber in relation to economy, I thought the probability was it might be well for us to obtain some substantial facts.

I want to call the attention of the committee to a certain fact, and I can give a concrete illustration of the position the Government is in here by relating a circumstance in my own city of Atlanta. The Georgia Railway & Electric Co., furnishing heat and light to the city of Atlanta—and now I have reference only to the lighting—were conducting a steam power plant at the beginning of their operations in that city. A little later they harnessed the Chattahoochee River. Immediately upon the harnessing of that river, to obtain water power for the production of this other power, there was a decrease in the contracts of the system amounting to about 20 per cent. About two years ago the Georgia Railway & Electric Co. purchased Tallalah Falls, which can develop about 60,000 horsepower, one of the greatest water powers in the South. The city of Atlanta in the last three months made a new contract with this company for a reduction of over 30 per cent of what their original contract was upon the establishment of the plant at Bull Sluice.

As all members of this committee know, there is not any one thing on earth in which there has been more development than in electrical appliances for the carrying of voltage. Why, only 10 years ago the proposition of carrying electrical current without a transformer station on an electric railroad of 20 miles was an unheard-of proposition. To-day they are carrying electricity in my own State over 180 miles by means of the new inventions for carrying electrical voltage.

Now, is it not the businesslike thing to do, when we are called upon to appropriate $1,494,000, in view of the fact that we have just spent $20,000 to have the engineers investigate the harnessing of Great Falls up on the Potomac River—and I understand from the press that this engineer will make a favorable report and that you can get all the light and all the power and adequate supply of water for this great city from that particular location—to delay matters a little bit?

Mr. PAGE. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Georgia [Mr. HOWARD] yield to the gentleman from North Carolina [Mr. PAGE]?

Mr. HOWARD. Certainly.

Mr. PAGE. The gentleman will admit, of course, that even in the event of the harnessing of the Great Falls of the Potomac, and the utilization of the water in the city of Washington, we will get no heat from that proposition?

Mr. HOWARD. That is true.

Mr. PAGE. When the testimony of the engineers in the division of the requirements of this plant, as divided between the quantity of heat and the quantity of light, is that two-thirds of the energy of this plant will be required for the heating of these buildings, and two-thirds of the construction of these buildings will be for the heating of these buildings, how is the gentleman going to heat them when the power of Great Falls is developed 50 years from now and transmitted to Washington?

Mr. HOWARD. In 50 years, so far as the gentleman from North Carolina and myself are concerned, we may be cooking our breakfast on an electric stove. I make my coffee now on an electric plate, and they may be heating these buildings by electricity in less than 10 years.

Mr. PAGE. They may be heating some other buildings, but not these.

The CHAIRMAN. The time of the gentleman from Georgia [Mr. HOWARD] has expired.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Georgia [Mr. HOWARD] asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. HOWARD. Now I have figured this on a business basis. These people have agreed, now, to enter into a contract to the effect that if, by virtue of any new invention, they can reduce the contract price of this light and heat and power to the Government they will do it, and their contract price now is $256,000, or they agreed to furnish this service for $256,000.

Mr. FITZGERALD. Their contract now is $270,000, but they furnish light and heat and power to certain buildings only.

Mr. HOWARD. I am talking about every function that this plant proposes to perform. These people say they will perform those functions for $256,000. Your own experts say, in the hearings of February 13 and 14, that the cost of the upkeep of this plant will be at least $280,000 a year, or else I have read the figures wrong.

Mr. FITZGERALD. The gentleman is mistaken about that.

Mr. HOWARD. I would be delighted to have the gentleman from New York correct me if I am in error. The hearings are put in here without regard to the calendar days. I refer to the hearing on the 11th day of February. I can not put my hand on that particular portion of it, but the amount was over $200,000.

Mr. RODDENBERY. It is $211,000.

Mr. HOWARD. Yes; $211,000. Now, take the investment of $1,494,104 at 3 per cent. Take the natural wear and tear of the machinery—and in passing it may be said that electrical machinery, as every man on the floor of this House knows, is more susceptible to atmospheric conditions, more susceptible to deterioration and the burning out of the armatures and generators, than perhaps any other kind of machinery.

Mr. SHERLEY. Mr. Chairman, will the gentleman permit me to interrupt him?

The CHAIRMAN. Does the gentleman yield?

Mr. HOWARD. Yes.

Mr. SHERLEY. Every one of those items of interest and maintenance was figured in; they were all figured in with the experts of the local company present; and in each instance he was asked to check, and we were unable to get from him any refutation of the accuracy of the statements made by these gentlemen. There are one or two items that were omitted that he stated should be included, but even then he was unable to give a justification for his proposal.

Mr. HOWARD. Mr. Chairman, I think my record in the House in the last two or three years will show that I am just as much in favor of economy as other gentlemen are. I want to be with the gentlemen of the committee if they think this is the proper course to pursue at this time; but I say that this contract with this local company is not a matter to be lightly treated. It has a right to receive the Government's patronage, if it will take it on a reasonable and fair basis. The Government of the United States holds within its bosom the right to regulate these contracts. It is within the power of the Government to obtain all necessary information about Great Falls. The Government retains the control of its streets and holds a control over the easement on the lines of this company, and I think that at this time, as the hearing shows, when a special and separate bill was drawn to provide for this very thing, this is not the opportune time to legislate on this bill on a matter of such great importance to the people of the District and to the Government of the United States, especially in view of the fact that we are $120,000,000 over any appropriation bill in the history of the Nation, which is not entirely chargeable to the majority in this House.

Mr. COX and Mr. LANGLEY rose.

Mr. LANGLEY. Mr. Chairman, if the gentleman from Indiana [Mr. Cox] desires to make a statement I can wait.

The CHAIRMAN. The gentleman from Indiana [Mr. Cox] is recognized.

Mr. COX. Mr. Chairman, I took this bill home with me last night and studied the item, and at first my impression was that it was a bad proposition; but the more I studied it and the more deeply I delved into the subject the more I became convinced that this is one of the most important and meritorious propositions in the entire bill. I believe that this House and Congress and the country are under obligations to this committee for bringing this proposition before the Congress in the way it has.

The testimony taken before the committee discloses the fact, indisputably so, that the bare mention of this proposition by the committee compelled the Potomac Electric Light & Power Co. to lower its contracts and to lower its cost of light and heat to the Government. I believe it has been known for years that this lighting company in the city of Washington has been practically holding up the Government, has been overcharging for its light; and if this be the only remedy—and it looks to me that it is the only remedy—in my judgment it is money well spent. Never until this proposition was advanced in the Committee on Appropriations did this lighting company come to the conclusion that it could afford to lower its price of light and heat to the Government; but at the first mention of the matter it was eager and anxious to reduce its price of heat and light—dead anxious to get to cover. It is peculiar it only woke up to the situation after the committee had begun this investigation.

Mr. CARY. Is it not a fact that the Potomac Electric Light & Power Co. has been charging the Government 6 cents per kilowatt hour, while the Capitol plant has been making it for less than 1¾ cents?

Mr. COX. I think so.

Mr. CARY. And it is about time it reduced that 6 cents per kilowatt hour.

Mr. HOWARD. Has not the Interstate Commerce Commission the right to regulate the rates of these public-utility corporations?

Mr. COX. I do not think so.

Mr. PAGE. No.

Mr. COX. I think the result of this will be the same as with reference to a number of other things. For years we were at the mercy of the Powder Trust, paying, if I recollect, as high as $1 and $1.14 per pound. Eventually the Government went into the manufacture of powder, and to-day we are getting our powder, I presume, practically as cheap as any nation on the face of the earth, getting it for 53 or 54 cents a pound. I doubt we would be getting powder to-day at that reduced price if the Government had not entered upon the manufacture of powder, but I think it is a fair assumption that if the Government had not gone into the manufacture of powder we would not be getting it to-day at the low price of 53 or 54 cents a pound.

I could name other things. I recollect that some few years ago the Committee of the Whole passed an amendment to the Post Office appropriation bill, prohibiting the Government from printing return cards upon envelopes. At that time a Dayton (Ohio) concern had the contract. That work was costing $1,500,000 a year. Between the time that the House passed the amendment to the Post Office appropriation bill and the time when it was pending in the Senate the Post Office Department entered into a contract with the same concern for the same kind of work in the same quantity at a reduced figure, which amounted to $400,000. In my judgment we would never have gotten the benefit of that reduction of $400,000 if the Dayton people had not come to the conclusion that Congress was going to cut them out of the chance of renewing their contract.

Now, I do not know whether this is a monopoly or not, and I do not care, because I believe it is agreed by everybody that it has been overcharging for its light and heat, and if the only remedy is for the Government to embark upon this business, I say, embark upon it; erect this plant, and let it eventually inure to the benefit of the people of the country. I am sure the gentleman from Kentucky [Mr. LANGLEY] is sincere in reserving this point of order, but I hope he will not press it. For once we have a chance to get back at a monopoly that for years has been overcharging for the service it has rendered the Government. It is in line with progress; the various municipalities of the Nation are endeavoring to buy, own, and operate their own lighting and heating plants.

Mr. MANN. Mr. Chairman, for a number of years after I came into the House the Capitol Building itself was heated and lighted from a plant in the basement of this building. After awhile we provided what is known as the Capitol power plant, to heat and light this building, the two office buildings, the Library Building, and, I believe, afterwards the Census Building. Last summer, in company with my colleague [Mr. CANNON], I made a visit to this Capitol power plant, to see what they were doing down there. I do not believe any gentleman in this House can go down to that power plant and observe the methods carried on there, the cheapness with which power

and light are produced, and then oppose the provisions for a central heating, lighting, and power plant for the Government buildings as provided in this item. Certainly no Member can oppose this proposition in the interests of the Government, because the service rendered through a central plant is so much cheaper and so much better than the service rendered through a separate plant, or through the purchase of light from an outside company, that there can be hardly any comparison. We have now here connected with the Capitol Building the best, or one of the best, heating and lighting plants anywhere in the United States. All over the country they are putting in these central plants where there are a number of Government buildings or university buildings congregated; and for the Government to be behind in providing good power, heat, and light cheaply in its own central plant in the Capital of the country is no credit to the gentleman who objects to this proposition.

Mr. OLMSTED. Mr. Chairman, I do not suppose there is any set of buildings as extensive as the public buildings proposed to be supplied from the proposed central power plant anywhere in the United States but what have their own power plant for lighting and heating purposes. I know the capitol at Harrisburg has one, and that it is making electricity and furnishing heat cheaper than it could be had from the local company. The public buildings in Philadelphia supply themselves with light and heat, and a great many of the largest hotels have their own plants. They find it cheaper. Our great manufacturing establishments have their own plants for supplying light and heat.

It is almost always the case that where the local company is supplying public buildings it puts up the price much higher than it ought to. Even if we had a public-utilities commission to regulate the rates and make them reasonable, still a reasonable rate would, of course, include a profit to the local company, and that profit we can save if we could not save anything else by having our own plant for these public buildings. I was at first rather startled by the size of this proposition, but after listening to the gentleman who explained its operation and the saving that would ensue, I became thoroughly convinced that it was a matter of wise economy to make the expenditure. I believe that every Member who will give it careful consideration will arrive at the same conclusion.

Mr. LANGLEY. Will the gentleman yield?

Mr. OLMSTED. I will.

Mr. LANGLEY. Why not extend the power plant in the Capitol to these Government buildings instead of installing a new one?

Mr. OLMSTED. Because it is not large enough.

Mr. LANGLEY. Why would it not be more economical to make it large enough?

Mr. OLMSTED. It would be more economical to erect this central plant, and it may be more economical to furnish the heat and light from this larger plant for the Capitol buildings after it is constructed.

Mr. LANGLEY. I hope it is not necessary, Mr. Chairman, to state, after the record I have made during my service of six years in this House, that I am in favor always of an economical administration of the affairs of the Government. I will be perfectly frank in stating why I reserved a point of order on these paragraphs. In the first place, I believe there is too much legislation on appropriation bills. I think too many propositions of magnitude like this are brought forward in this manner when they ought to be considered by the regular committees which have jurisdiction of the subject matter.

This bill was reported day before yesterday, a bill carrying many millions of dollars, and now we must consider it under the whip and spur of the gentleman from New York.

Mr. FITZGERALD. I beg the gentleman's pardon; not under the whip and spur; I have been very liberal.

Mr. LANGLEY. Oh, the gentleman has been very liberal on this proposition because he knows it is subject to a point of order.

Mr. CANNON. I do not agree with the gentleman from Kentucky that it is subject to a point of order.

Mr. LANGLEY. Well, that is a matter of opinion. I believe it is, and that the Chair would so hold. I know very little about the government of the District of Columbia. I have not had time to study it. I have been too busy with things more directly affecting my own district and State. I have not had a chance to read the hearings on it. I was told late this afternoon that this proposition, involving a million and a half or two million dollars, was coming up to-night, and I concluded that I would endeavor to get some insight into the matter if I could.

We have just passed a public buildings bill through this House. I represent a district that has not a Government building of any kind in it, a district of magnificent resources, a district which is destined to become the richest and the most populous section in Kentucky. [Applause.] And yet when I asked for the small sum of a few thousand dollars to purchase sites for some public buildings subsequently to be constructed, and the Lord only knows when we will get enough money to build them if we acquiesce in all these propositions involving millions, my efforts were criticized.

The gentleman from New York and others spoke disparagingly of the effort. Naturally, being a loyal Representative of my district, I felt a little bit incensed at that, knowing that the district has not had the recognition it should have from the Federal Government in the way of public improvements, as compared with other sections of the country. Too many gentlemen indulge in cheeseparing on small matters like the ones I was advocating and yet they handle millions as if they were pennies when it comes to questions like this one. I am not objecting to economy, but I want a square deal.

Feeling as I did about this matter and hearing that there was a proposition of this kind to be considered to-night, I decided to reserve the point of order, not because I was convinced that the recommendation of the committee was wrong, but because I wanted to hear what the facts were. I have listened to the statements and the arguments of gentlemen who ought to know the situation and I am still in doubt as to whether it will save anything for the Government in the end; but this debate has convinced me of one thing, and that is that there are several gentlemen on the floor who know a great deal more about the question than I do, and I therefore shall not insist on the point of order, but leave it to those who are better posted on the subject than I am to do it. I hope that I have, at least, been instrumental in shedding some light upon the situation.

Mr. CANNON. I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. CANNON. I merely make this motion for the purpose of saying that I have——

Mr. RODDENBERY. Mr. Chairman, do I understand——

The CHAIRMAN. For what purpose does the gentleman from Georgia rise?

Mr. RODDENBERY. Mr. Chairman, the gentleman from Kentucky [Mr. LANGLEY] and I have both reserved points of order on the several paragraphs.

The CHAIRMAN. The gentleman from Kentucky reserved the point of order, and the gentleman from Kentucky stated that he would not make the point of order, and the Chair recognized the gentleman from Illinois, Mr. CANNON, to move to strike out the last word. The Chair did not hear the gentleman from Georgia reserve the point of order.

Mr. OLMSTED. Mr. Chairman, I make the point of order that it is too late to reserve the point of order.

Mr. RODDENBERY. Of course, it is entirely up to the Chair.

The CHAIRMAN. The Chair did not hear the gentleman from Georgia reserve the point of order, and having recognized the gentleman from Illinois to offer an amendment, the gentleman from Illinois is now entitled to the floor, and it is too late to make the point of order.

Mr. CANNON. Mr. Chairman, I merely desire to state, without consuming much time, that there was an investigation touching this power plant 12 months ago, entered into very fully. Then the proper reference was made for further investigation. A very searching hearing was then had, not only upon the part of those who represented the Government but upon the part of those who were seeking to get a contract for lighting and heating. After that hearing I have no hesitation in saying that in my judgment this bill ought to pass with this provision in it.

The Clerk read as follows:

Readjustment of boundaries: For acquiring, by condemnation, all the lots, pieces, or parcels of land, other than the one hereinafter excepted, that lie between the present western boundary of the National Zoological Park and Connecticut Avenue, from Cathedral Avenue to Klingle Road, $107,200, or such portion thereof as may be necessary, said land when acquired, together with the included highways, to be added to and become a part of the National Zoological Park. The proceeding for the condemnation of said land shall be instituted by the Secretary of the Treasury under and in accordance with the terms and provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia: *Provided*, That the tract of land hereinafter described, containing 5,820 square feet, shall be excepted from such condemnation, namely, parcel recorded on the books of the assessor of the District of Columbia as [illegible], and now assessed in the names of Thomas R. and Martha G. Harney: *And provided further*, That in determining the amounts to be assessed against the lots, pieces, or parcels of land in the neighborhood of the land to be condemned for the extension or enlargement of said park, the jury shall take into consideration the respective situations and topographical conditions of said lots, pieces, or parcels of land and the benefits and advantages they may severally re-

ceive from the extension or enlargement of said park by the adding thereto of said land to be condemned, and shall assess such benefits against said lots, pieces, or parcels of land and against any and all other lots, pieces, or parcels of land the jury may find benefited by the said extension or enlargement of said park, as aforesaid, as the jury may find said lots, pieces, or parcels of land will be benefited: *And provided further*, That as the several assessments authorized to be made are made by the jury they shall severally be a lien upon the land assessed and shall be collected as special improvement taxes in the District of Columbia, and shall be payable as provided in subchapter 1 of chapter 15 of the Code of Law for the District of Columbia; such assessments, when collected, to be deposited in the Treasury of the United States to the credit of the United States.

Mr. LANGLEY rose.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph.

The CHAIRMAN. Does the gentleman reserve the point of order?

Mr. LANGLEY. I make the point of order.

The CHAIRMAN. The Chair will hear the gentleman from Illinois. What is the point of order that the gentleman makes?

Mr. FOWLER. Mr. Chairman, I make the point of order. This is legislation without authority of law. It is not a limitation, and it can not come under any provision of the Holman rule.

The CHAIRMAN. The Chair will ask the gentleman if he does not understand that this land is adjoining other land belonging to the Government, belonging to this park; and, if that is true, whether he then thinks this is subject to a point of order?

Mr. FOWLER. Mr. Chairman, I am not advised as to whether there is any intervening land between the proposed tract of land and the Zoological Park.

Mr. FITZGERALD. Mr. Chairman, this land which it is proposed to acquire adjoins the present Zoo Park.

The CHAIRMAN. That is what the bill practically says. The Chair will state to the gentleman from Illinois that it has been held on several occasions that the purchase of adjoining land for a work already established is considered the continuation of a public work, and is therefore not obnoxious to the rule. Unless the gentleman has some other authority, the Chair will be compelled to overrule the point of order.

Mr. FOWLER. Mr. Chairman, I do no desire to offer any authorities upon the question at all. It appeared to me upon its face to be subject to a point of order, because it was for the condemnation of property which was not authorized by law.

The CHAIRMAN. The Chair will call the attention of the gentleman to a decision rendered some time ago, to be found in Hinds' Precedents, volume 4, section 3766, where it was held that the purchase of adjoining land for a work already established was in continuation of a public work and therefore not obnoxious to the rule. The Chair will say that in that case the point of order was made by the present occupant of the chair, and therefore that ruling was very much impressed upon him.

Mr. MANN. Mr. Chairman, may I ask the Chair whether that was in the case of the Government Hospital for the Insane?

The CHAIRMAN. Yes.

Mr. MANN. I remember that case.

The CHAIRMAN. The Chair overrules the point of order.

Mr. COX. Mr. Chairman, I move to strike out the last word. I want to get some information. I have not had time to read these hearings upon this point. How much land is proposed to be taken?

Mr. PAGE. Ten and sixty-three one hundredths acres.

Mr. FITZGERALD. I can describe the property.

Mr. LANGLEY. It is a little over $10,000 an acre.

Mr. FITZGERALD. The gentleman is familiar with the Zoo Park. There is an entrance from Connecticut Avenue into the park. This is land between the two streets, the park and Connecticut Avenue. The committee provides that one-third of the cost shall be assessed on the abutting property owners. I have here a diagram. This is Connecticut Avenue, and this is where it crosses, and right here is the entrance of the park. At that entrance there is a little stand for peanuts, crackers, and things like that, and the proposition is to acquire land between that street and this and bring the park out here.

Mr. COX. Is it for the purpose of enlarging the park?

Mr. FITZGERALD. It is. The price that is fixed in the bill is fixed by taking the assessed valuation—that is, two-thirds of the value under the law—and adding one-half and providing for the assessing of one-third of that cost——

Mr. COX. What is it assessed at now; does the gentleman know?

Mr. FITZGERALD. It is $71,080, and in order to get the price the committee took——

Mr. COX. Is it owned by private individuals or some real estate company?

Mr. FITZGERALD. It is owned by parties who are prepared and have arranged to subdivide and build houses upon it during this season, and if it is added to this park it must be done at this time. A representative came before the committee—was present before the committee when Dr. Walcott, Secretary of the Smithsonian Institution, and other officials of the Zoo were there—and he showed the plans to the committee providing for building upon the property, and I am quite certain that the owners of this property have no desire to sell it.

Mr. COX. Is it laid out now in lots, this land which the committee proposes to buy; is it platted?

Mr. FITZGERALD. It is not exactly laid out in lots, but they are prepared to build a number of houses on the entire plat.

Mr. HELM. How near is that to the concrete bridge that leads to Chevy Chase?

Mr. FITZGERALD. If the gentleman has gone to the Zoo by way of Connecticut Avenue he will understand this is property on both sides of the entrance to the boundary street. Here is the diagram which shows it.

Mr. LOBECK. There is one house built on that land.

Mr. FITZGERALD. It was suggested that that house be taken, and I think it was suggested it could be obtained for $14,000, but the committee did not recommend it.

Mr. COX. It excepted the house?

Mr. FITZGERALD. Yes; only one house is in there. Perhaps this will explain the situation. The Zoo Park and the Rock Creek Park are familiar to all. I come from a large city and I know from the development that has taken place in Washington that everybody will regret 10 or 15 years from now if residences are permitted to be built on that portion of this property. I think it will be a great mistake.

Mr. COX. Is the whole amount included in the condemnation proceedings?

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. I ask for two minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. COX. Is the entire land to be paid for out of this $107,200; does that include the cost of the condemnation proceedings?

Mr. FITZGERALD. Yes.

Mr. COX. It is way within the limit?

Mr. FITZGERALD. It is.

Mr. COX. I withdraw my pro forma amendment.

Mr. SISSON. Mr. Chairman, I move to strike out the last two words, if that is necessary. I want to call the attention of the committee to the fact that there were three propositions before the committee—one involving the purchase of 3.17 acres of land, the other involving the purchase of 10.63 acres of land, and one involving the purchase of 4.21 acres of land, and another proposition of simply 0.48 acre. I do not notice the last. Now, it seems one Mr. Doyle, who represented Fisher & Co., stated in reference to this matter that the real estate interests that he represented there—when asked by Mr. PAGE about whether this land could be condemned under the condemnation proceedings at anything like the assessed value plus one-third, his answer was that he could not state exactly; that that would depend, of course, upon the condemnation proceedings.

Mr. FITZGERALD. He told us it would cost a good deal more.

Mr. SISSON. He told us it would cost more than that. Now, my opinion was that if it is like land heretofore purchased that it would cost nearly six times the assessed value.

Mr. COX. I understood the gentleman from New York [Mr. FITZGERALD] to say that that whole thing was to be cleaned up within the limit of $107,000.

Mr. FITZGERALD. If they condemn, and the award is in excess of this money, they can not take it unless Congress——

Mr. SISSON. It does this, Mr. Chairman: It commits the Government, after this authorization is allowed, absolutely to the purchase, and to take it at the price——

Mr. COX. Has the gentleman any doubt whether or not this tract of land we propose to buy will eventually cost more than $107,000?

Mr. SISSON. I have not a doubt of it, and the real estate representative who was before the committee, when asked by the gentleman from North Carolina [Mr. PAGE], who was a member of the subcommittee, about the value of it, declined, as the hearing will show, to state that it could be bought for its assessed value, which is two-thirds of its value plus one-third, and yet that $107,000 is for the purpose of purchasing

this 10.63 acres of land. My judgment is that you will not get the land for anything like that.

Mr. COX. What will be the proceeding then? We will pay $107,000 and afterwards Congress will be asked to appropriate more?

Mr. SISSON. Only $107,000 has been appropriated. A judgment can be obtained by condemning this land and under the peculiar laws of the District that land can not be sold to another. It is absolutely so that a man can not dispose of it after condemnation, although the Government has no money to pay for it.

Mr. FITZGERALD. I think the gentleman is mistaken. The lodgment of the Capitol buildings and grounds is under a peculiar provision enacted in reference to that. There was an instance where Congress authorized the condemnation of Indian Head, and the appropriation was not sufficient. If it had not been that the money had been obtained from private sources to secure the land for that purpose, the condemnation would have failed.

Mr. SISSON. Now, Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Mississippi [Mr. SISSON] asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. SISSON. Now, the point I wanted to call the attention of the committee to was this——

Mr. PAGE. Will the gentleman allow a question?

Mr. SISSON. Yes.

Mr. PAGE. There is evidence before the committee in this testimony, and I have no doubt the gentleman has read it, that there was an assessment against the abutting property to the amount of at least one-third of the cost of this land.

Mr. SISSON. Now, Mr. Chairman, since I have only five minutes, I wish to say that there is testimony here in which one of the witnesses states that there would be some enhancement of the value of the land not taken, and that that assessment could be made against the land and credited on the amount that might be awarded. But he did not undertake to tell anything about how much the value would be, and there is no evidence to show how much it would be.

Mr. COX. That is, the assessment?

Mr. SISSON. No; the assessment of benefits. There is absolutely nothing in the record to show what the assessment of benefits will be.

Mr. MANN. Will the gentleman yield?

Mr. SISSON. Certainly.

Mr. MANN. Suppose the condemnation judgment amounted to $150,000, and they go ahead and assess benefits against the adjoining property to the extent of $43,000, would they not acquire the land then?

Mr. SISSON. I think so.

Mr. MANN. Is not the limit of cost that can come against the Government practically $107,000?

Mr. SISSON. The limit of the cost of the land would be of course the benefits that might be assessed over and above that.

Mr. MANN. Of course, if the land costs more and the benefits are assessed against the adjoining property——

Mr. FITZGERALD. That was not the intention of the committee.

Mr. MANN. That might not have been the intention, but I think that is the result.

Mr. FITZGERALD. I think, as to what the gentleman points out, the intention was that the Government should contribute two-thirds of the value, and that the property would be obtained within the $107,000.

Mr. MANN. That is very well, but the bill provides that the property shall be assessed any benefit it enjoys. Now, if the Government pays $107,000 and it does not go over that, and they give awards for a greater amount and assess it on the adjacent property because it is benefited, I do not see that we have any objection to that.

Mr. SISSON. I do not. I have no objection to that except this, that if my information is correct as to the peculiar condemnation laws of the Federal Government in the District of Columbia, you give the commissioners the absolute right to condemn the property, and thereby commit Congress to the purchase of the property in the future, irrespective of the price at which it is condemned.

Mr. MANN. I think it is subject to be dismissed at any time if there is not the money to make the purchase.

Mr. SISSON. It would be subject to be dismissed at any time by the property owners themselves, but the gentleman knows the experience of this body in the purchase of real estate.

Mr. MANN. There is nobody to pay it to except the owners of the real estate.

Mr. COX. Suppose we put our $107,000 into it, and that, plus the assessed benefits, does not equal the condemned value. Then what shape is it in?

Mr. MANN. You can not disburse the $107,000 until the Attorney General or some one else representing the Government passes on the title.

Mr. SISSON. They will simply come in and say they have been deprived of the use of the property, or have been deprived of the sale of it, by this condemnation, and that we have created at least a moral obligation to purchase that property; and they will come in and ask for an additional appropriation. So far as I know, there has never been one of these park propositions where you have not been able, as a rule, to put it through this House, except it goes out on a point of order.

Mr. MANN. On the theory of the gentleman from Mississippi we could not condemn any property; that is, we would not be safe in doing it. Now, where we say we will appropriate so much money, we are quite safe; we need not to go beyond that no matter what they say. We condemn property for post-office buildings and property for other purposes. We do not have to pay unless we want to.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. MANN. Will the gentleman yield?

Mr. SISSON. I want to say, Mr. Chairman, in reply, before I yield to the gentleman from Illinois, that what he says is quite true, that you ought not to complain of the condemnation law, because it is absolutely essential in many instances, where we can not agree on the price, that the Government should have the power of eminent domain and exercise that power, and then require the party to wait until the award is made, and then afterwards pay the money by legislation.

Mr. COX. What does the gentleman say as to the necessity of the Government buying this property for a park?

Mr. SISSON. My judgment is different from other members of the committee.

Mr. COX. Let us hear what the gentleman's judgment is.

Mr. SISSON. The gentleman will recollect that there was considered here some time ago a proposition to buy property on the Klingle Ford Road, which went out on a point of order. This is near that property, as the witnesses testify.

Mr. COX. Does it adjoin the Klingle Ford property?

Mr. SISSON. The evidence does not show that, but my belief is that it is near to it.

Mr. PAGE. There is no evidence to that effect. It goes to the Klingle Ford Road.

Mr. COX. If it goes to the Klingle Ford Road, does it not adjoin the Klingle Ford land?

Mr. MANN. The other Klingle Ford proposition is on the other side of the park.

Mr. PAGE. That is true.

Mr. SISSON. Mr. Doyle's testimony shows that that proposition was before the subcommittee of which the gentleman from Texas [Mr. BURLESON] is the chairman.

Mr. MANN. That is the one that runs across Sixteenth Street.

Mr. SISSON. If Mr. Doyle's testimony is correct—and of that I am not absolutely sure—it is across the park from the other property. Now, this road runs between the property adjoining the park and Connecticut Avenue. The property next to the park, according to the testimony here, is reasonably level property, but there is also some testimony here that shows that the property owners desired to fill it in some time ago, but they did not do it, so that from that evidence, not having seen the property with my own eyes, I gathered that it must be one of these fringes of timber; it must be one of these pieces of property which Mr. Doyle or Mr. Fisher, representing the real-estate people, desires to furnish to the Government; property which can not be divided into lots.

Mr. FITZGERALD. The gentleman is not speaking of this tract, is he?

Mr. SISSON. A portion of it.

Mr. FITZGERALD. Oh, no; this tract abuts on Connecticut Avenue.

Mr. SISSON. Does the portion that adjoins the park front on Connecticut Avenue?

Mr. FITZGERALD. It runs right to the park. Here is a diagram which shows exactly what it is proposed to purchase.

Mr. SISSON. By the diagram I see that this line adjoins the park. Now, just how much of this is broken and not level I do not know. I gathered from the testimony that there is a portion of it which is broken. Now, the testimony shows that some of this can be subdivided into lots. The testimony does not show how much of it can be, but with all the land we have in the District of Columbia I do not believe it is necessary at this particular time to purchase this land. For that reason I have raised the question here now.

Mr. COX. Is the park overcrowded in any way so as to bring about an absolute necessity for the purchase of this land?

Mr. SISSON. I do not think so.

Mr. PAGE. Unless this land is acquired by the park the result will be that houses will be built between the present line of the park and Connecticut Avenue, absolutely obscuring the park from that public highway, except an entrance to it about 30 feet wide leading out to Connecticut Avenue.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. I desire to extend my remarks by printing in the RECORD the portion of the testimony that bears upon this particular case.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The testimony referred to is as follows:

Mr. WALCOTT. Yes, sir. That is one plan, and another plan is to reduce the cost by taking in that area [indicating] on Connecticut Avenue to a distance beyond Jewett Street to give a broad entrance there. That takes in 4.20 acres, and the value of that ground based on the assessment is $66,570. Another plan is to take an entrance 400 feet wide on Connecticut Avenue and make an adjustment with the owners of the property outside of the park boundary between Connecticut Avenue and the park boundary, so as to give them parts of this area [indicating] and receive back in return from them the other section indicated here [indicating]. That is scheme No. 4, and the value of the ground that would be taken is $5,357.

Mr. PAGE. Could the ground be obtained at anything like its assessed value?

Mr. BAKER. We are not quite certain. This is based on the assessment.

The CHAIRMAN. And that is supposed to be two-thirds of the real value.

Mr. BAKER. That is the assessed value; and these figures, which are one and one-half times the assessment, are what might be called the market value of the property.

Mr. WALCOTT. The assessed value is two-thirds of the actual value of the property, and this is the actual value of the property based upon the assessed two-thirds value.

The CHAIRMAN. The assessed value is only two-thirds of these figures?

Mr. WALCOTT. Yes, sir.

* * * * * * *

Mr. BAKER. The owner of that property resides in Paris, and she has given orders to her agent, Fisher & Co., to go ahead and grade down this property.

Mr. DOYLE. From the owner's point of view, from what has been stated, this property would have been graded a long time ago on that subdivision, but Col. Judson wanted the Klingle Road built. That was before another committee, and this is before Mr. BURLESON'S committee now. There is a bill in Congress now, and has been for four years, to buy that low ground from here [indicating] to Rock Creek Park. We have been opposing it, because we want to get rid of this grade and fill up this low ground. The real estate interests that I represent——

The CHAIRMAN (interposing). I thought you were here as a representative of the Museum.

Mr. WALCOTT. He is speaking now about another bill. This is the land over here [indicating] that we need. This is simply a question of trying to arrange the boundary so as to bring the park out to Connecticut Avenue.

Mr. DOYLE. I am trying to give a reason why this property is available. We have had a map prepared by Mr. Olmsted which shows just what our suggestion is. Now, instead of having that street [indicating] circular around there it should be straight, because no one in the world requires it that way. It goes nowhere. Olmsted proposes that this street be made straight, and take in a part of the Zoo Park here [indicating], which could possibly be exchanged for property here [indicating], as shown on this plat. If the line were established here [indicating], it would leave us a tier of lots fronting on Connecticut Avenue with the backs to the park, which would be objectionable, but if they made the exchange we would have two tiers of lots, one fronting Connecticut Avenue and one fronting the park. This would give them ground of practically equal value, and they would require practically no appropriation, unless they wanted to enlarge their entrance to 400 feet wide.

Mr. WALCOTT. If I owned that land, I would be willing to give a 400-foot entrance there, because that would bring this property to the park boundary. I should say that they could well afford to do that.

Mr. DOYLE. I know only the real estate side of it. That could be worked out by a condemnation commission, and if my testimony was not good it would not be accepted.

Mr. WALCOTT. As a commercial proposition, if I owned that ground I would be willing to do that.

Mr. DOYLE. All of that would have to be taken up in detail and every lot valued. We would have a double tier of lots here [indicating]; one fronting Connecticut Avenue and the other the park.

Mr. BAKER. Mr. Chairman, it is not satisfactory to have houses there which will back upon the park. We are already suffering, as you are aware, at the eastern part of the park in that way.

The CHAIRMAN. Which scheme does this $18,650 contemplate?

Mr. BAKER. That is for the land extending only to the connecting highway from Cathedral Avenue to Klingle Road.

Mr. PAGE. The land between the present boundary and the road?

Mr. BAKER. Between the present boundary and that small, insignificant road.

The CHAIRMAN. How much will be required to take the land between Connecticut Avenue and the boundary?

Mr. BAKER. $106,620. There are four plans for extension of the park which are submitted for your consideration and which may be summarized as follows:

	Amount of land added to park.	Cost, estimated at one-half more than assessed value.
Plan 1, as per estimates submitted: Extends the park to a narrow unsatisfactory road	*Acres.* 3.17	$18,066
Plan 2: Extends the park to Connecticut Avenue between Cathedral Avenue and Klingle Road	10.633	106,620
Plan 3: Extends the park to Connecticut Avenue for a part of this distance only	4.20	66,570
Plan 4: Extends the park to Connecticut Avenue along either side of Jewett Street, making, including that street, a strip 400 feet wide and allowing an adjustment of the boundary, which would provide a straight continuation of Twenty-third Street. It adds 1.303 acres of privately owned land and takes away 0.817 acre, being a net addition of	.486	5,357

The cost stated for this is estimated from the average assessment.

Some of the area proposed to be included within the boundary of the park is at present public streets. The transfer of the jurisdiction of these should be made to the National Zoological Park.

Of these plans, No. 2 is by far the best and the one which would secure a permanent satisfactory boundary. It seems probable that the cost could be reduced by assessing a proper amount of benefits upon the neighboring property. If one-third were so distributed, the amount required would be $71,080, assuming, of course, that a jury of condemnation would agree with what the board of assessors have reported as the value.

Plan No. 3 is the next in order of worth and advantage to the park and would assure a good frontage upon Connecticut Avenue. Plan No. 4, while apparently the cheapest, would involve a deep cut for the road (Twenty-third Street) along the boundary of the park and necessitate a large amount of expensive grading within the park to adjust the topography. Afterwards the graded area would have to be planted and improved. The total expense would probably be well toward the sum required for plan No. 3, which would not require any such adjustment.

Mr. PAGE. Mr. Chairman, this proposition to purchase 10.63 acres of land lying between the present boundary of the Zoo and Connecticut Avenue was brought to the attention of the committee by Mr. Walcott, and the committee, after investigating the matter thoroughly, found out that unless this land is acquired by the Government a local real-estate company intend to subdivide it into lots and place it on the market, which will result in cutting off the most popular entrance to the park from the public highway, with the exception of a narrow roadway in the center of the land that is now proposed to be purchased. The committee did not think it was desirable that this great park, belonging to the city, should be thus cut off from a public highway and from accessibility.

Mr. SHERWOOD. How wide is that roadway?

Mr. PAGE. I can not answer exactly, but I should guess 30 or 40 feet.

Mr. SHERWOOD. That is a pretty good roadway.

Mr. COX. It strikes me this is a pretty high price—practically $10,000 an acre. Is there no other land that could be used just as well to enlarge the Zoo Park which can be purchased for a cheaper price?

Mr. PAGE. There is absolutely no other land that can be bought. It is not particularly for the enlargement of the Zoo so much as it is to acquire this particular ground for the purpose of preventing houses being constructed between the park and Connecticut Avenue at this particular place.

Now, as to whether this land would cost the amount that we have allowed in this bill, I will call attention to the fact that the sundry civil bill a year ago carried an appropriation of $85,000 for acquiring some land at the Bureau of Standards. That $85,000 was fixed upon the assessed value of the land, plus one-third. That condemnation has now been made, and the land has been priced, not at $85,000, but at $68,000, and I think the probability is that instead of the cost of this piece of land exceeding the $106,000 here appropriated it will be less than that amount, and that there is no possible contingency by which the Government will have to pay more than the amount that is written in the bill for the acquirement of this land.

Mr. COX. What does the gentleman think about that property? Does he think we can actually buy this land and get title to it, including the cost of condemnation proceedings, for $107,000?

Mr. PAGE. I do; when you take into consideration the assessment against the benefits.

Mr. FOWLER. I desire to ask the gentleman how many acres there are in the Zoological Park?

Mr. PAGE. About 190 acres, I am informed.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. CULLOP. Mr. Chairman, I ask that the gentleman's time be extended five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana. [After a pause.] The Chair hears none.

Mr. FOWLER. I understand the Government owns Rock Creek Park.

Mr. PAGE. That is my understanding.

Mr. FOWLER. How many acres are there in Rock Creek Park?

Mr. PAGE. About 1,200 acres.

Mr. FOWLER. Why not add Rock Creek Park to the Zoological Park, making a magnificent park, instead of going out here and buying land at $10,000 an acre lying up in the mouth of a gulch?

Mr. PAGE. I see no necessity of that since the Zoological Park and Rock Creek Park adjoin each other. You could hardly tell now where one begins and the other ends.

Mr. FOWLER. If you put the two parks together——

Mr. PAGE. They are together, you do not have to put them together.

Mr. FOWLER. If you convert Rock Creek Park to the same use that is now made of the Zoological Park, what need have you for any more land?

Mr. PAGE. The only additional use is to acquire this land that is now lying between the park and a great public highway, to keep it from being built upon by private owners and probably back yards creating nuisances on the edge of a public park.

Mr. COX. Mr. Chairman, I move to strike out the paragraph. A great deal of evidence and a great many facts have been detailed by gentlemen in charge of this bill, all of them sincere, but it strikes me that they do not agree among themselves. One member of the committee sincerely doubts whether we will ever get through the proposition after paying for the land, because of the condemnation plus the assessed benefits, for $107,000.

Mr. PAGE. Which gentleman of the committee?

Mr. COX. The gentleman from Mississippi, Mr. SISSON.

Mr. PAGE. He is a member of the Appropriation Committee, but not a member of the subcommittee.

Mr. COX. Other members of the Appropriation Committee state that the Government will get through with it, but can not state it as a fact, but give it as their judgment that we can eventually acquire this tract of land, including the cost of condemnation, for $107,000. Mr. Chairman, I am a little leery of this proposition. Of course reasons have been assigned that it is necessary for the Government to acquire it before it is finally platted and buildings put thereon. I am rather afraid, Mr. Chairman, that this proposition is in the hands of certain real estate agents, who are holding that before Congress as a scarecrow to compel Congress to buy it, and buy it now, to the end that if they do not buy it, later on in the future when Congress desires to have it buildings will have been erected thereon and they will have to be paid for.

I do not believe anything has been elicited in the numerous answers made by gentlemen in charge of the bill showing the necessity of the purchase of this land at this time, and therefore I move to strike it out.

The CHAIRMAN. The gentleman from Indiana moves to strike out the paragraph.

The question was taken, and the amendment was lost.

The Clerk read as follows:

INTERSTATE COMMERCE COMMISSION.

For salaries of seven commissioners, at $10,000 each, $70,000.
For salary of secretary, $5,000.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the provision of $5,000 for the secretary. That is in excess of the provision of the statute which provides by act of March 2, 1889, that the salary of the secretary shall be $3,500. I therefore make the point of order on it.

Mr. FITZGERALD. Mr. Chairman, I desire to call the attention of the gentleman from Illinois to the fact that since the passage of that act not only has the commission been enlarged and the compensation increased from $7,000 to $10,000, but the work of the Interstate Commerce Commission has been added to enormously, and this salary has been paid to the secretary for a number of years. Nobody believes that there is any possibility of obtaining a man competent to be secretary to that commission and to handle the work of it at $3,500. Not only that, but this commission is the only one, I think, in the governmental service that this year submitted for this bill estimates requesting less money to conduct the service than is appropriated during the current year.

This secretary, whom I have seen in connection with the work of the committee, I believe to be one of the most efficient men in the Government service, and while the act of 1889, to which the gentleman calls attention, fixes the salary of the secretary at $3,000——

Mr. FOWLER. $3,500 a year.

Mr. FITZGERALD. $3,500—the commission has been completely reorganized, and I was under the impression that at the time the commission was enlarged, when the compensation of the commissioners was increased, the salary of the secretary had also been increased. If it was not, it should have been.

Mr. FOWLER. Mr. Chairman, the Hepburn bill, which passed Congress on July 1, 1910, did increase the number and the salaries of the members of the Interstate Commerce Commission, but it did not increase the salary of the secretary.

Mr. CANNON. Mr. Chairman, will the gentleman permit an interruption?

Mr. FOWLER. Certainly.

Mr. CANNON. Mr. Chairman, I do not know whether there has been any law changing the salary since the commission was first organized, but the Interstate Commerce Commission reaches more people in its administration of the law than any other commission in the Government, or that ever existed in the Government, and the secretary is to that commission what the clerk of the Committee on Appropriations is to the Committee on Appropriations. I feel quite sure, whether it is subject to a point of order or not, that my colleague will not make the point of order, but rather I would sooner increase to $7,500 in order that we may keep a competent man in charge of it.

Mr. MANN. Mr. Chairman, will my colleague yield?

Mr. FOWLER. Yes.

Mr. MANN. Mr. Chairman, the title of secretary to the Interstate Commerce Commission is on the whole rather misleading. Our popular conception of the Interstate Commerce Commission, of course, is that it is dealing with railroad rates and matters of that sort, and that the secretary——

Mr. FOWLER. Mr. Chairman, I yielded for a question.

Mr. MANN. I beg the gentleman's pardon. I thought he was yielding when reserving the point of order.

The CHAIRMAN. The gentleman from Illinois made the point of order. Does the gentleman reserve it?

Mr. FOWLER. Mr. Chairman, I made the point of order at the time and I desire to press the point of order.

The CHAIRMAN. Will the gentleman from New York give his attention for a moment?

Mr. FITZGERALD. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FITZGERALD. Mr. Chairman, I move to insert, in line 23, page 60, after the word "secretary," the figures "$3,500."

The Clerk read as follows:

Page 60, line 23, amend by inserting after the word "secretary" the figures "$3,500."

Mr. FOWLER. Mr. Chairman, I suggest to the gentleman that he also insert the words "salary of the secretary."

Mr. MANN. Mr. Chairman——

The CHAIRMAN. The gentleman from Illinois [Mr. MANN].

Mr. FOWLER. Mr. Chairman, I thought I had the recognition of the Chair.

Mr. FITZGERALD. Mr. Chairman, I think I have the floor. I have offered an amendment.

The CHAIRMAN. The gentleman from New York is entitled to the floor.

Mr. FITZGERALD. If these gentlemen will make their application, I will decide to which one I will yield.

Mr. FOWLER. Mr. Chairman, will the gentleman from New York yield?

Mr. MANN. I do not make any application. I want the floor in my own right.

The CHAIRMAN. To whom does the gentleman from New York yield?

Mr. FITZGERALD. I yield to the gentleman from Illinois.

Mr. MANN. I do not ask the gentleman to yield to me.

Mr. FOWLER. Mr. Chairman, I suggest to the gentleman that he also include in his amendment the words "for salary of secretary," as that part went out along with figures denominated in the lines.

The CHAIRMAN. Without objection, the amendment will be so modified. The question is on the amendment offered by the gentleman from New York.

Mr. MANN. Mr. Chairman, is it permissible for anyone else to ask for recognition while the gentleman from New York is on his feet?

Mr. FITZGERALD. Mr. Chairman, I yield the floor.

Mr. MANN. I thank the gentleman. Mr. Chairman, my colleague from Illinois [Mr. FOWLER] a moment ago struck out the provision "salary of the secretary, $5,000," and declined to reserve the point of order for an explanation of the item. As I was saying when he cut me off, we get a popular misconception of the duties of the secretary of the Interstate Commerce Commission. He is, in fact, the administrative head of the enforcement of the safety-appliance law. He is the man who has charge of the laws to enforce the various safety appliances, covering the railroads all over the United States. He is the man in whom the railway employees are more interested than any other man in the United States, the one who has charge of that work, the one who supervises it. The Interstate Commerce Commission nominally has jurisdiction of the enforcement over these safety-appliance laws, but the Interstate Commerce Commissioners give very little attention to it, except when there is a hearing before them. The secretary is the administrative head of that work, and instead of the salary being $3,500 or $5,000, the Government might well afford to pay $7,500.

My colleague, who always claims that he is a friend of the laboring man, that he is the special friend of the man who works, strikes down the man who protects every railway employee in the United States by enforcing the safety-appliance laws, by requiring the railroad companies to equip their cars with all of the old safety appliances and all of the new safety appliances, and can no longer pretend that he is the friend of the railroad man as against the railroad owner.

Mr. COX. Equally as responsible a position as the Secretary to the President.

Mr. CANNON. More so.

Mr. FOWLER. Mr. Chairman, I desire to say that my amendment is in harmony with the statute as it exists to-day.

Mr. PAGE. Will the gentleman yield?

Mr. FOWLER. In a moment. The appropriation of any amount without authority of law is an unwarranted invasion of the rights of the people of this country. [Applause.] The gentleman who has served in this body for 16 years and claims to be perfect was chairman for four years of the Committee on Interstate and Foreign Commerce and had ample opportunity to report a bill to increase the salary of this secretary whom he claims presides over such an important duty to the laboring people of this country, and yet he has stood all these years here on the floor of this House, and I presume he monopolized the floor in previous Congresses as he has in this one, and has never done anything to raise the salary of this man to what he says would be a decent salary. [Applause.] Now, because of the dereliction of duty on his part and on his side of the House he comes here as a rebuker of men who ask that legislation conform to the statutes and the laws of this country. [Applause.] Consistency, thou art a jewel! "The serpent that did sting my father now wears his crown." [Applause.] Mr. Chairman, I know the importance of the duty of the Interstate Commerce Commissioners and the secretary of this great bureau, but I am compelled to make the point of order against this item because it has no authority under the law, and he who stands and defends it stands against the rights of the people in the face of the law. The gentleman stands upon the floor of this House always in a scolding tone [laughter] and administers a lecture to every man who does not agree with him. [Applause.] And he holds up a red flag and shakes it in the face for the purpose of trying to overawe and disquiet any man who will stand against his ideas.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PAGE. Mr. Chairman, I move to strike out the last word. I have no desire, Mr. Chairman, to consume time or prolong a controversy over an item that has already been settled by the making of a point of order and which goes out of the bill. But I do not think it is fair or right that we should proceed without one or two statements going in the RECORD that I feel like putting there. I am inclined to agree with the gentleman from Illinois [Mr. FOWLER] in his arraignment of his colleague from Illinois [Mr. MANN] for not having before this time increased the salary of this very important official, since he was the man who was chairman of the committee having jurisdiction over this legislation for several years in this House. But, as a matter of fact, this salary of $5,000 has been carried in the bill for five or six years without a question being raised about it. It remained for the distinguished gentleman from Illinois [Mr. FOWLER] to come into this House and find out that this man was getting more than was provided in the statute, but it ought to go in the RECORD that when this salary of $3,500 was fixed by the statute in 1888, in the original legislation creating the Interstate Commerce Commission, at that time there were only five of these commissioners, and there was only a limited force at work in this office, and they had only limited jurisdiction.

Mr. FOWLER. Mr. Chairman——

Mr. PAGE. I will yield in a moment. That salary now of $5,000 is less commensurate with the amount of work done by the man who now holds this position than $3,500 was when the statute was enacted. I want to say in this connection, it having been brought to my attention, that this gentleman who occupies this position to-day as secretary of the Interstate Commerce Commission was induced to surrender a place carrying a salary larger than that he now receives in order to accept the place as secretary to the commission, and if any action ought to be taken in connection with his salary I agree entirely with the other gentleman from Illinois [Mr. CANNON], who made the remark a little while ago that instead of being reduced down to what the statute which was enacted in 1888 requires, it ought to be increased to at least $7,000. He is of more value, in my judgment, in the administration of the laws we have placed upon the statute books, the laws regulating the great corporations of this country, and in the enforcement of those laws than is any member of this commission who draws $10,000 a year.

I think, while he has the law upon his side, he has neither equity nor justice in getting this man's salary reduced who is performing so valuable a service.

Mr. FOWLER. Will the gentleman yield?

Mr. PAGE. I yield.

Mr. FOWLER. If this salary is inadequate, why did not the gentleman offer an amendment to the Hepburn bill—while it was being considered in 1910—to increase the salary of this secretary?

Mr. PAGE. If the gentleman will allow me, I confess my ignorance. It having been carried in the law so many years, I never took the trouble to look up what the statute was, knowing that the gentleman was earning his money.

Mr. FITZGERALD. Mr. Chairman, I move that all debate on this amendment be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment of the gentleman from New York [Mr. FITZGERALD].

The amendment was agreed to.

The Clerk read as follows:

For the payment of all authorized expenditures under the provisions of the act of February 17, 1911, "to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," including such stenographic and clerical help to the chief inspector and his two assistants as the Interstate Commerce Commission may deem necessary and allowances in lieu of subsistence while away from official headquarters to persons whose traveling expenses are authorized by said act to be paid at not to exceed $4 per day, $210,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I notice this item is reduced from $225,000 in the current law to $210,000 in the present law.

Mr. FITZGERALD. The estimate was $225,000. The information brought to the committee was such that it did not appear as if more than $210,000 could be expended.

Mr. COX. Mr. Chairman, I see the per diem rate here is fixed at $4 per day. This item is called for under what is known as the "safety-appliance act."

Mr. FITZGERALD. I think that is the "boiler-inspection act."

Mr. COX. Now, what I would like to be informed upon is, if the gentleman can tell me, whether or not the per diem is fixed uniformly at $4 per day? I see the language of the statute is "not to exceed $4 per day." Is it fixed uniformly at $4 per day?

Mr. FITZGERALD. In some instances it is $3.

Mr. COX. In some instances it is $3 and in some instances it is $4.

Mr. FITZGERALD. Perhaps I misunderstood the gentleman.

Mr. COX. This is my query: The per-diem limit is fixed at $4 per day. Now, I want to ask the gentleman whether or not that is the uniform per diem allowed, to wit, $4 per day. In other words, have we given him the maximum amount all the time?

Mr. FITZGERALD. I am not certain. They are authorized to be paid not to exceed $4 per day in lieu of subsistence. A man traveling away from home and doing this work is supposed to be in larger cities, in most instances, where the cost of accommodations is a little higher, to pay more for subsistence.

Mr. COX. Does not the gentleman feel they could get along very easily on $3 per day?

Mr. FITZGERALD. If they were compelled to do so, they could. I have gotten along on less money because I have been compelled to do so. After all, it is desirable to make some fair, reasonable, decent allowance to Government employees. The compensation is not very great.

Mr. COX. These men get a salary of from $1,800 to $2,400 a year, do they not? I know it is a position that is greatly sought.

Mr. FITZGERALD. They get $1,800.

Mr. COX. The employees are generally locomotive engineers, are they not?

Mr. MANN. Most of them.

Mr. FITZGERALD. They are high-grade mechanics; high-grade men.

Mr. COX. I quite agree with the gentleman that they are high-grade men.

Mr. Chairman, I move to strike out "4" and insert "3" in line 10, page 62.

The CHAIRMAN. The gentleman from Indiana [Mr. Cox] offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 62, line 10, strike out the figure "4," after the word "exceed," and insert in lieu thereof the figure "3."

Mr. FITZGERALD. I hope the amendment will not be agreed to.

Mr. COX. I want to make just one statement: I think $3 a day, Mr. Chairman, is plenty for this item. I do not desire to be parsimonious with these employees, but $3 per day is what the post-office inspectors get, traveling substantially all over the country exactly as this class of men travel, in the same cities, through the same sections of the country, and it looks to me that this class of people are no higher class than the post-office inspectors.

Mr. FITZGERALD. What do the post-office inspectors receive?

Mr. COX. They receive from $1,600 to $2,400.

Mr. PAGE. What per diem do they receive?

Mr. COX. They receive $3 per diem. For years and years they drew $4 per day, but Congress two or three years ago reduced it to $3 per day.

Mr. FITZGERALD. The post-office inspector goes to small communities as well as the large ones, and, averaging it up, he gets much the best of it. This work, however, is usually done in the larger centers of population.

Mr. COX. I think that these inspectors go to all the railroad divisions throughout the United States, do they not? Many of those divisions are located in small places. I know they are out in my country, where there are considerable railroad centers—small towns of 5,000, and so on—where they get along well on $3 per day at a hotel.

Mr. EDWARDS. This language merely authorizes the expenditure of not to exceed $4 a day. Where the money is not expended the balance is turned in.

Mr. COX. I understand they expend the maximum amount, $4 per diem. I think the amendment ought to obtain—ought to carry.

Mr. PAGE. Mr. Chairman, I merely want to call the attention of the committee to the fact that there is a difference between the expenses of these employees and those of the post-office inspectors. These men, by the testimony had before the committee and from my own observation, are called almost altogether to the large centers of population, where the cost of subsistence is greater, of course, than it is in the small places in the country, and the fact that the maximum is written down here, $4 per diem, is not conclusive evidence that the maximum is always allowed. That is a mere assumption. There is no evidence offered here or offered before the committee to show that it is always allowed.

Mr. COX. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. PAGE. Yes.

Mr. COX. Can the gentleman inform the committee if the $4 per diem is paid to them in a lump sum, whether they use it or not?

Mr. PAGE. I can not say so. I say there is a lack of information on either side of the question, and the statement that they are paid the full amount of $4 a day is simply a presumption, because there is no evidence to show that they are paid the maximum.

Mr. BARTLETT. This is the per diem for the men who are engaged in the inspection of boilers?

Mr. PAGE. Yes; they are the boiler inspectors.

Mr. BARTLETT. Can the gentleman from North Carolina conceive of a more important service to the traveling public than that which is performed by these men who are provided for in the bill?

Mr. PAGE. I can not. The statement was made by the gentleman from Indiana [Mr. Cox] a moment ago that these men are ex-locomotive engineers. Possibly some of them are, but I think more of them were appointed from the class of boiler makers than from the ranks of locomotive engineers. But at any rate they are skilled men.

Mr. BARTLETT. I want to say to the gentleman that according to my information they were appointed, after a thorough examination, on account of their efficiency and experience.

Mr. PAGE. That is true; decidedly true.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. Mr. Chairman, I ask for one more minute.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. COX. I thoroughly agree, Mr. Chairman, with the statement of the gentleman that these are skilled men, but so far as the examination is concerned I have looked into that and I find it is not a serious examination at all. Up until three years ago $4 a day was allowed to the post-office inspectors. Finally Congress reduced the amount to $3 per diem. That effected a saving, Mr. Chairman, of sixty-odd thousand dollars a year, and I have heard no complaint from the post-office inspectors from that day to this that they are not able to get along with it, and there is no evidence here this evening showing that this entire sum of $4 a day is actually used or consumed by these inspectors or showing whether or not it goes to increase their salary. In my judgment they can get along very easily and very nicely on $3 per diem in any city in the United States.

Mr. EDWARDS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. COX. Yes.

Mr. EDWARDS. Would not this language reach the point that the gentleman is making—insert on page 62, in line 9, after the word "whose" the word "actual," so that the language would read, "whose actual traveling expenses are authorized by said act to be paid at not to exceed $4 per day"?

Mr. COX. It would.

Mr. EDWARDS. I suggest that, then, in lieu of the gentleman's amendment, if he will accept it.

Mr. COX. The gentleman can prepare his amendment and have a vote on it, but let us have a vote on my amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana [Mr. Cox].

The question was taken, and the amendment was rejected.

Mr. EDWARDS. Mr. Chairman, I offer the amendment that I just a moment ago suggested to the gentleman from Indiana, to insert, on page 62, line 9, the word "actual" after the word "whose," so that that language will read, "whose actual traveling expenses are authorized by said act to be paid at not to exceed $4 per day."

The CHAIRMAN. The gentleman from Georgia [Mr. EDWARDS] offers an amendment, which the Clerk will report.

The Clerk read as follows:

After the word "whose," on line 9, page 62, insert the word "actual."

Mr. MANN. I was not opposed to the amendment offered by the gentleman from Indiana [Mr. Cox], but I think this proposition is not a feasible one. These locomotive boiler inspectors are sent out in a hurry frequently to make examinations in case of explosions, and to examine locomotive boilers in various places. It would be a very great inconvenience to require them to report their actual traveling expenses. The amount involved is not sufficient. The Interstate Commerce Commission can easily reach what are about the actual traveling expenses, but to require a sworn statement, or even a certificate, or proof by affidavit, which this would require, would involve much trouble, and has never been found to be feasible in the Government. I do not believe we wish to try it on these men.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Georgia [Mr. EDWARDS].

The amendment was rejected.

The Clerk read as follows:

Rock Island Arsenal, Rock Island, Ill.

Mr. MOORE of Pennsylvania. I move to strike out the last word. Can the gentleman from New York tell us what became of the estimated item for dredging for the Frankford Arsenal?

Mr. FITZGERALD. It remains where is has been for several years. [Laughter.]

Mr. MOORE of Pennsylvania. Was it not considered by the committee at all?

Mr. FITZGERALD. It was carefully considered, but the committee did not recommend it.

Mr. MOORE of Pennsylvania. Was it not very earnestly recommended by the department?

Mr. FITZGERALD. It was, but the committee did not believe it was an item which was properly chargeable to the Government.

Mr. MOORE of Pennsylvania. The committee did not care to enter upon the project of dredging Frankford Creek in order to reach the arsenal.

Mr. FITZGERALD. For several years it was contended that it was necessary to dredge Frankford Creek for the purpose of doing away with certain offensive odors, for the benefit of the neighboring population, as well as for the improvement of navigation. The committee having expressed its opinion very forcibly that such purposes were purely local and were properly chargeable to the local authorities, refused to make the appropriation. This year the department based its request for the money, not upon the reasons formerly assigned, but they asserted that it would be very desirable to fill in certain low lands belonging to the arsenal, and that the easiest, best, and cheapest way would be to dredge the channel and take the material from the channel and put it on the lowlands belonging to the arsenal.

Mr. MOORE of Pennsylvania. How much was asked for that purpose?

Mr. FITZGERALD. The amount asked was $11,300.

Mr. MOORE of Pennsylvania. The department certainly did not ask $11,300 for the benefit of the inhabitants residing in the neighborhood. It asked it for the benefit of the Government, did it not?

Mr. FITZGERALD. No; the smell was offensive to the population, not to the Government. [Laughter.]

Mr. MOORE of Pennsylvania. Did the War Department seek to make that appropriation in order to benefit the people of the vicinity? I think the gentleman is mistaken. What did the department want the $11,300 for?

Mr. FITZGERALD. They wanted to dredge that channel.

Mr. MOORE of Pennsylvania. For the benefit of the Government.

Mr. FITZGERALD. I have stated my recollection of the situation.

Mr. MOORE of Pennsylvania. After the committee carefully considered it they decided to recommend $4,000, did they not?

Mr. FITZGERALD. That is for an entirely different matter. That is for a concrete sewer through the arsenal to take the place of an open sewer which now runs through it. It is to improve the sanitary conditions of the arsenal. It is an entirely different item than the dredging of the creek.

Mr. MOORE of Pennsylvania. And for that purpose the committee recommended $4,000.

Mr. FITZGERALD. Yes; and that was the amount requested.

The Clerk read as follows:

For increasing the capacity of the plant at the Rock Island Arsenal for the production of field artillery matériel, $250,000:

Mr. MOORE of Pennsylvania. I move to strike out the last word. Rock Island Arsenal gets $250,000 under this item. I should like to know whether any of that amount, which is for an increase in the size of the plant, is intended to be used for the manufacture of small arms and ammunition?

Mr. SHERLEY. No. They have very nearly completed the supply of small arms necessary. As a result of the lessening of that work it will be possible to perform a larger proportion of work in connection with mobile artillery matériel by making the changes here suggested. As a result it is expected that a very great saving will be made to the Government in the cost of the work.

Mr. MOORE of Pennsylvania. What becomes of the appliances for the manufacture of small arms and ammunition?

Mr. SHERLEY. There will be some small-arms ammunition still made, but much of the machinery there will still be available. What this is particularly for is to supply the additional room that is necessary at the arsenal in order to undertake the work in connection with the mobile artillery matériel.

Mr. MOORE of Pennsylvania. It increases the capacity of the plant to the extent of $250,000?

Mr. SHERLEY. It increases it in one sense, but it changes the character of the capacity rather more than increasing it.

Mr. MOORE of Pennsylvania. I notice that the total appropriation for Rock Island is $280,520. That is a fair appropriation, and I am glad to see Rock Island Arsenal advance; but I call attention to the fact that the committee could not grant $11,000 to the Frankford Arsenal.

Mr. SHERLEY. The answer to that is that the purposes were entirely different and had entirely distinct reasons back of them. In one instance we thought the reason good and in the other we did not.

Mr. FITZGERALD. And the result of the expenditure of the $250,000 will be a saving to the Government of over $2,000,000.

Mr. MOORE of Pennsylvania. I do not object to it at all, but I wanted to know if there was any shifting of the center of manufacture.

Mr. FITZGERALD. Yes; some of the work done at Rock Island will be discontinued and concentrated at the Springfield Arsenal, where a part is now done, but it will not affect in any respect the work done at the Frankford Arsenal.

The Clerk read as follows:

Under Quartermaster's Department.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 63, strike out line 21 and insert in lieu thereof the following: "Under quartermaster corps."

The Clerk read as follows:

Barracks and quarters, seacoast defenses: For the construction and enlargement of barracks and quarters for the Coast Artillery and of other buildings in connection with the adopted project for seacoast defenses, including the installation therein of plumbing and of heating and lighting apparatus, to be expended as in the judgment of the Secretary of War may be necessary, $115,078: *Provided*, That no part of this sum shall be used for the construction of officers' quarters to cost in excess of the limits established in the sundry civil appropriation act approved May 27, 1908.

Mr. TILSON. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee what part of the appropriation is for the erection of buildings at Fort Wadsworth.

Mr. FITZGERALD. No part of it at any post about New York.

Mr. TILSON. Is not there necessity really for some permanent building at Fort Wadsworth?

Mr. FITZGERALD. From complaints I have received from that place I imagine that there is very great necessity.

Mr. MANN. But the modesty of the chairman would not allow him to ask for it. [Laughter.]

Mr. FITZGERALD. But from the estimates submitted by the department there appears to be no necessity.

Mr. TILSON. From my own knowledge there is a necessity and the chairman would have been justified in asking for a considerable appropriation.

Mr. FITZGERALD. I hope in the near future, with the change in the administration, that imperative improvements near my district will not be overlooked when the estimates are made. Unfortunately they seem to have been up to this time.

The Clerk read as follows:

QUARTERMASTER CORPS.

Mr. FITZGERALD. Mr. Chairman, I submit the following amendment.

The Clerk read as follows:

Page 64, strike out line 15, "Quartermaster Corps."

The amendment was agreed to.

The Clerk read as follows:

For continuing the construction of the necessary accommodations for the Seacoast Artillery in the Philippine Islands, $200,000.

Mr. SISSON. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the committee if he took into consideration the fact that the islands might be abandoned?

Mr. FITZGERALD. Regardless of the policy of the United States as to the retention of the Philippine Islands, these particular quarters will be necessary if we are to maintain a permanent base for military operations.

Mr. SISSON. It will be a part of what we retain even though we surrender the islands?

Mr. FITZGERALD. That seems to be the opinion of all the military authorities. They are establishing a very strongly fortified place, which controls the entrance to Manila Bay.

Mr. GARRETT. This is in the territory that is retained by the United States under the Jones bill?

Mr. FITZGERALD. I am not sure. They are the islands at the entrance of Manila Bay. They are Corregidor, Cabella, and El Frailey, a group of islands at the mouth of Manila Bay. It is the place where all of our guns have been erected and where provision has been made for making a final stand for a great many months. These buildings are now in the course of construction, and it seems to be essential that they be completed.

The Clerk read as follows:

Cavalry post, Hawaii Territory: For completing the construction of officers' quarters, barracks, storehouses, etc., necessary for the accommodations of headquarters and two squadrons of Cavalry, $350,000, to be immediately available.

Mr. ANTHONY. Mr. Chairman, I move to strike out the paragraph. I would like to ask the chairman of the committee if this is an appropriation for new construction in Hawaii?

Mr. FITZGERALD. It is construction that is now under way—headquarters and accommodations for two squadrons of Cavalry at Schofield Barracks.

Mr. ANTHONY. Has the work of building a Cavalry post already been commenced there?

Mr. FITZGERALD. Yes.

Mr. ANTHONY. In other words, has the committee given its approval to the idea of maintaining a regiment of Cavalry in the Hawaiian Islands?

Mr. FITZGERALD. Four years ago the first appropriation was made for the accommodation of two squadrons of Cavalry. Since that time the War Department has determined that it is essential to station six regiments of Infantry, a regiment of Cavalry, and a number of other troops there.

Four years ago the committee was under the impression that it would cost about $700,000 or $800,000 to accommodate the garrison that was to be placed in the Hawaiian Islands. As nearly as can be ascertained it appears now it will cost between eight and nine millions of dollars. This money is for the purpose of finishing the work now in progress. Later in the bill there is a provision requiring complete plans and detailed estimates of all the accommodations required for the Coast Artillery at the Hawaiian Islands to be submitted to Congress at the next session so that Congress may determine what program it will adopt before proceeding further.

Mr. ANTHONY. The reason I asked the question is that I have heard this idea of stationing a regiment of Cavalry in an island in the middle of the ocean severely criticized. I have heard that from a military standpoint it is absurd.

Mr. FITZGERALD. Mr. Chairman, it is due, I think, to a peculiar condition on the island of Oahu. There are fifty or sixty thousand persons there of a certain race, all supposed, so far as we are able to ascertain, to be men who have been trained in military schools and in the armies of their country. If there is ever any trouble between the United States and the only nation that is likely to take the Hawaiian Islands, our base of supplies in the Pacific, it is essential to have such a force on the islands as will make it impossible for an uprising to take place and the mobilizing of these men into an effective force.

Mr. ANTHONY. Is it not a fact that a regiment of Infantry would do that police work just as efficiently?

Mr. FITZGERALD. All of the professors in the War College and the members of the Board of Strategy and the representatives of the General Staff have advanced the other view.

Mr. ANTHONY. The answer that an official at the department gave me for wanting to keep cavalry on that island was that it was 30 miles from coast to coast, and cavalry could be moved faster to resist a landing force from an imaginary enemy, or something of that kind.

Mr. FITZGERALD. I do not believe it is intended for the purpose of resisting landing parties. I think the placing of these men is to utilize them for the purpose of preventing any effective mobilization of individuals who are supposed to constitute an effective fighting force if they can be drawn together.

Mr. ANTHONY. My own opinion is that it would be a very wise procedure if the committee would wipe out any appropriation for a Cavalry garrison there.

Mr. FITZGERALD. Four years ago the entire General Staff appeared before the committee, and in order to permit them to sleep of nights that post was authorized.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Headstones for graves of soldiers: For continuing the work of furnishing headstones of durable stone or other durable material for unmarked graves of Union and Confederate soldiers, sailors, and marines in national, post, city, town, and village cemeteries, naval cemeteries, at navy yards and stations of the United States, and other burial places, under the acts of March 3, 1873, February 3, 1879, and March 9, 1906, also for continuing the work of furnishing headstones for unmarked graves of civilians interred in post cemeteries under the acts of April 28, 1904, and June 30, 1906, also for furnishing headstones for the unmarked graves of Confederate soldiers, sailors, and marines in national cemeteries, $30,000.

Mr. WILLIS. Mr. Chairman, I move to strike out the last word. It will be remembered that when this item was up a year ago there was some discussion concerning it. I do not wish to raise the same point I did then, except to get some information. This is the item that provides an appropriation to purchase headstones for graves of soldiers. In the current law the amount provided is $75,000, and that is the amount for which the estimates were sent in. I notice the provision in this item is $30,000, and I wondered what the reason was.

Mr. FITZGERALD. I will state to the gentleman this is all that was requested.

Mr. WILLIS. Seventy-five thousand dollars is provided for in the estimates. Do the hearings show there was——

Mr. FITZGERALD. Yes; they said that is all that was required, and the committee gave it.

Mr. WILLIS. There is another question I desire to ask the gentleman. The language in lines 21, 22, and 23 is new. It seems to me that is already provided for in lines 9, 10, 11, and 12.

Mr. FITZGERALD. The Committee of the Whole last year attempted to make provision for furnishing headstones for unmarked graves of Confederate soldiers, sailors, and marines in national cemeteries, and the Judge Advocate General held that the committee did not succeed in so doing.

Mr. WILLIS. Without the additional language is not the intention perfectly clear, as set forth in lines 9, 10, and 11?

Mr. FITZGERALD. I have a letter prepared by the Judge Advocate General to the Chief of the Quartermaster Corps. I will put the letter in the RECORD. This language is inserted to include what is the intention of Congress. I will print this letter in the RECORD.

Mr. WILLIS. All right, I will withdraw the pro forma amendment.

The letter is as follows:

WAR DEPARTMENT,
OFFICE OF THE JUDGE ADVOCATE GENERAL,
Washington, January 25, 1911.

From: Judge Advocate General.
To: Chief of the Quartermaster Corps.
Subject: Item in sundry civil bill for headstones for unmarked graves of Confederate soldiers.

1. The views of this office are desired as to whether the item in the sundry civil bill (H. R. 25069, 62d Cong., 2d sess.) for headstones for graves of soldiers (lines 22 to 25, p. 56, and lines 1 to 9, p. 57) would permit of furnishing headstones for the unmarked graves of Confederate soldiers, sailors, and marines in national cemeteries. In other words, the question is whether the use of the word "Confederate" (line 24, p. 56) would broaden the authority beyond the limits specified in the acts providing for the marking of graves for Confederate dead of northern prisons. The appropriation provides for "continuing the work of furnishing headstones * * * for unmarked graves of Union and Confederate soldiers, sailors, and marines in national, post, city, town, and village cemeteries, national cemeteries at navy yards and stations in the United States, and other burial places" under the several acts referred to, including the act of March 9, 1906 (34 Stat., 56), which provided for the marking of graves of Confederate dead of northern prisons. In the opinion of this office, the word "Confederate" refers to the act of March 9, 1906, supra, and the use of the word in the appropriation would not permit of the marking of graves of Confederate soldiers, etc., in established national cemeteries, etc.

2. If it is desired to broaden the authority to include such graves, it is suggested that after the words "nineteen hundred and six" (line 5, p. 57) there be inserted the following words: "Also for furnishing headstones for the unmarked graves of civilians and Confederate soldiers, sailors, and marines in national cemeteries."

E. H. CROWDER,
Judge Advocate General.

Mr. OLMSTED. I will state to the gentleman from Ohio the words in lines 11 and 12 apply only to graves of Union and Confederate soldiers——

Mr. WILLIS. No; the gentleman does not read all of it. It says, "Union and Confederate soldiers, sailors, and marines," which is the same as in the lines referred to, 21, 22, and 23. The language is identically the language in lines 9, 10, and 11.

Mr. OLMSTED. In lines 18 and 19 the gentleman will notice it refers to civilians.

Mr. MANN. The gentleman will notice commencing with line 14 this is all under the acts of March 3, 1873, February 3, 1879, and March 9, 1906, and so forth. Probably these acts would provide for Confederate graves, and if they do not, why, you could not furnish them under this appropriation.

The Clerk read as follows:

Vicksburg National Military Park: For continuing the work of establishing the Vicksburg National Military Park; for the compensation of three civilian commissioners; for clerical and other services, labor, iron gun carriages, the mounting of siege guns, monuments, markers, and historical tablets giving historical facts, compiled without praise and without censure; maps, surveys; roads, bridges, restoration of earthworks, purchase of lands, purchase and transportation of supplies and materials; and other necessary expenses, $44,000.

Mr. CAMPBELL. Mr. Chairman, I move to strike out the last word, for the purpose of asking a question. I notice in all these national military parks that provision is made for making roadways and maps and tablets and marking places. I have been through many of these cemeteries and find that work has already been done. What is the purpose of providing for making roads where roads have already been made, and providing marks where marks are, apparently, established at this time?

Mr. FITZGERALD. There are maintenance items—upkeep. Some of these military parks are still working along the original plans, but these items are mostly for upkeep.

Mr. MANN. Will the gentleman permit a question? Is it not also true that if there was nothing of this sort estimated and provided for there would be no necessity for the civilian commissioners now drawing salaries?

Mr. CAMPBELL. Getting warm.

Mr. FITZGERALD. A provision was carried last year which prevented the filling of any more vacancies.

Mr. MANN. Yes; I understand; but I notice these gentlemen seldom resign, and, I think, never die.

Mr. FITZGERALD. Does the gentleman ask that an amendment be made to abolish them?

Mr. MANN. No; I say I notice they seldom resign and, I am glad to say, never die.

Mr. FITZGERALD. I have very great pleasure in saying they seem to be all in fairly good health.

Mr. CAMPBELL. I withdraw the pro forma amendment.

The Clerk read as follows:

For improvement and maintenance of Judiciary Park, $2,500.

Mr. EDWARDS. Mr. Chairman, I move to strike out the last word for the purpose of asking a question and getting some information. In the last item read, page 74, line 23, "For improvement and maintenance of Judiciary Park, $2,500," I notice on page 73, for all parks, for instance, "For ordinary care of Lafayette Park, $2,000." Why are the words "ordinary care" used there?

Mr. FITZGERALD. It was inserted in there at some time when there was a special appropriation for some extraordinary improvement.

Mr. EDWARDS. In other words, the point I want to get information on as to the care of these various parks is that the care of one is not to be different from the care of another, notwithstanding this language?

Mr. FITZGERALD. The language was probably put in there some time when there was a special appropriation for some special improvements.

Mr. EDWARDS. Thank you.

The Clerk read as follows:

For extraordinary repairs and refurnishing of the Executive Mansion, to be expended by contract or otherwise, as the President may determine, and to be immediately available, $15,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I presume this item is necessary in the bill. What is intended to be done with this $15,000 item?

Mr. FITZGERALD. To redecorate and refurnish and resupply the White House. It is a customary item at the beginning or at the end of each administration.

Mr. MANN. How much does it take to furnish the White House?

Mr. FITZGERALD. I do not know. This is for decorations, furniture, and such matters.

Mr. MANN. There is $35,000 that is already carried in the law. That looks like a very good amount to refurnish a moderate building. I do not object to the item. I will be greatly surprised if the Democratic President, believing in Democratic simplicity, will use the money.

Mr. FITZGERALD. The President of the United States sent for me, and said he had been a tenant of the White House for four years, and was going out, and that, knowing the condition of the White House, and the tremendous wear and tear upon it during the last four years, he hoped Congress would deal liberally with his successor as it had with him. But that was not necessary. Four years ago $53,500, a special appropriation, was required. The White House has been somewhat generally overhauled at the end of every four years.

Mr. SAMUEL W. SMITH. Will the gentleman yield? Can the gentleman say how often the White House is refurnished and redecorated?

Mr. FITZGERALD. When Congress appropriates the money. If we do not appropriate it, they can not do it.

Mr. MANN. Four years ago I believe there was $53,000 provided. This year $59,000 is provided. Unless they are going to finish an additional portion of the White House, I doubt whether it is needed. The White House is in very good shape now—in such good shape that it could obtain a tenant from any portion of the country without any difficulty at all. [Laughter.]

Mr. FITZGERALD. I must confess if it were open for occupancy by myself I would not have much fault to find with its present condition. After all, it is the home of the President of the United States.

Mr. MANN. I have not any objections to having it as nice as it can be furnished.

Mr. FITZGERALD. Congress has always insisted that it be kept in as good condition as possible, and when furniture becomes frayed and worn and the walls soiled——

Mr. MANN. I have been in the White House sufficiently to know that the furniture is not frayed and worn nor the walls soiled.

Mr. FITZGERALD. Well, the gentleman from Illinois has had the advantage of me. I have not had the same opportunities during the last four years to observe the condition of the White House as I hope I shall during the next four years.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. MANN] has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. I am quite willing to give to the President the authority to spend such money as he may desire; but then, I was quite willing to give to the Speaker of the House an automobile. We had an automobile for a while with a Republican Speaker, but with Democratic simplicity the Speaker is required to hike along with his legs or take a street car to get here and lose a good deal of time in coming. I would give the Speaker an automobile and I would give the President an automobile.

Mr. FITZGERALD. I would give one to the chairman of the Committee on Appropriations.

Mr. MANN. I know, but you would be the only one in the House who would do it. [Laughter.]

Mr. FITZGERALD. If nobody would make a point of order against it, I would be perfectly willing to offer such an amendment. I know we could save the cost of it many times over in a year.

Mr. MANN. Here is a President elect who has been able to determine two things, so far as I have been able to ascertain from the press, as they have been given out to the world. One is, that, because of Democratic simplicity, he did not want to have an inaugural ball. The other was an announcement flashed all over the country that he had finally selected a secretary who, by the way, because of Democratic simplicity, will draw $6,000 a year salary after the 4th of March, while the present secretary draws $7,500 before the 4th of March. And I dare say that no one on the Democratic side of the House, after insisting a year ago, against our protest, that the salary should be reduced, will have the gall now to propose to increase it. I do not believe that the new President, believing, as he does, in Democratic simplicity, will undertake to expend $50,000 in refurnishing the White House when it does not need refurnishing to the extent of more than the ordinary appropriation.

Mr. CAMPBELL. Mr. Chairman, I think the gentleman from Illinois [Mr. MANN] could have stated that the incoming President had reached three conclusions instead of two. He has also decided to wear a silk hat on inauguration day, and has given that intelligence to the country. [Laughter.]

Mr. MANN. Well, I had not learned that. [Laughter.] I commend him for all his decisions thus far, and I hope he will keep up making righteous opinions, although I think it will gall some gentlemen on that side if he does.

Mr. GARRETT. It is natural for the gentleman from Illinois to pay attention to those things.

Mr. FITZGERALD. Mr. Chairman, the President elect may not thus far have made many decisions, but he will make them so quickly after the 4th of March that the gentleman from Illinois [Mr. MANN] will regret that he should be making them at all. I have no doubt that when made they will be made for the benefit and the welfare of the country. [Applause.]

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. FITZGERALD].

The Clerk read as follows:

On page 77, line 22, insert the following:

"For making alterations in the attic of the Executive Mansion, to provide additional room, and for additional furniture, to be expended by contract or otherwise, as the President may determine, and to be immediately available, $9,500."

Mr. FITZGERALD. Mr. Chairman, I may say that at the beginning of the present administration an appropriation of $53,500 was made for the alteration of the Executive offices, and extraordinary repairs to the White House, so that the additional appropriation asked for now, to make these changes in the attic and changes in the terrace, and for extraordinary repairs, is less than half of what was given for the changing of the Executive offices and for extraordinary repairs at the beginning of the present administration.

Now, that does not mean that there is to be any such conduct of the public affairs or in the maintenance of the White House as will make anyone regret the situation. The President himself has submitted these matters in connection with placing the White House in that condition in which it is essential and desirable that it should be continued for the occupancy of the President and his family.

The pending amendment proposes to make certain alterations in the attic, on the third floor of the White House, so that the rooms there can be used for sleeping apartments. The President stated that even with his present family during the past four

years he has at times been embarrassed for want of accommodations for persons whom it was desirable to entertain overnight at the White House. The President elect's family is considerably larger than that of the President. The President had these plans prepared and the estimates submitted to the committee, and urged that the committee recommend the appropriation of this sum in order to make the necessary alterations. It was inadvertently omitted from the bill in reporting it, although it was believed to be in the bill.

Mr. SAMUEL W. SMITH. Mr. Chairman, I would like to ask the gentleman from New York [Mr. FITZGERALD] one further question for information. When Congress makes an appropriation shall the President, whoever he may be, have the sole say of the changes that are made in the White House?

Mr. FITZGERALD. That has been the practice. In the refurnishing and repairing and keeping the White House in condition it has been customary to place the money at the disposal of the President and provide for its expenditure upon his certificate. I know of no instance where there has ever been any justification for the belief that there was any betrayal of the trust placed in the President as to the propriety of the expenditure.

Mr. MANN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. MANN. Has the gentleman the items of the appropriation of four years ago, to which he refers?

Mr. FITZGERALD. Part of it was for the refurnishing of the White House. Part of it was for the enlargement of the Executive offices, if I recall correctly.

Mr. MANN. The gentleman's statement to the House was not quite frank.

Mr. FITZGERALD. I read Col. Cosby's statement.

Mr. MANN. The gentleman's statement was that the items in reference to the President's house, and so forth, four years ago were nearly twice what they are now. The fact is that four years ago there was an appropriation to double the size of the Executive offices, which was not chargeable to the incoming administration or to the White House at all.

Mr. FITZGERALD. I read Col. Cosby's statement that it included the enlargement of the Executive offices.

Mr. MANN. I did not hear the gentleman.

Mr. FITZGERALD. I read the statement, or stated exactly what it was, and I based what I said entirely upon that statement.

Mr. OLMSTED. Does the gentleman think the Executive office should be enlarged to make room for the hungry office seekers who are coming?

Mr. GRAHAM. Four years ago that was necessary.

Mr. MANN. Mr. Chairman, I remember when the White House proper was not only the home of the President and his family, but also contained the Executive offices. That was true in the McKinley administration and in the Cleveland administrations; and there was a good deal of business transacted up there, and there were a great many callers during the last Cleveland administration and during the beginning of the McKinley administration. They all went up to the White House proper and had plenty of room, for a time at least, to transact their business.

Subsequently we remodeled the White House proper and provided the Executive offices. Ever since that time, when we moved the offices out of the White House proper and increased the amount of living room in the White House, it seems to me there has been a cramping of the space up there. Before that there was not very much difficulty. Some families lived in the White House with quite a number of children, and they did not have any difficulty. I never heard that President Lincoln, who had some family, had any difficulty at all in providing sleeping quarters for his children or his guests in the White House proper.

Yet I am quite willing to provide, in the modern spirit of large houses and expensive establishments, plenty of room for all the family of the President of the United States, regardless of his politics.

Mr. FITZGERALD. The gentleman from Illinois is not quite as well qualified to discuss ample quarters for families as I am. I am willing to submit my judgment as to what is necessary for a reasonably fair-sized family against the judgment of the gentleman from Illinois.

Mr. MANN. I will say right now, Mr. Chairman, that if I ever have the honor and the pleasure of seeing the gentleman from New York occupy the White House I will be quite content to build an addition nearly as large as the present White House in order to accommodate his family. [Laughter.]

Mr. FITZGERALD. I hope that will not be quite necessary.

Mr. MANN. I think it will be needed.

Mr. CANNON. Absolutely. I met the gentleman a year or two ago one Sunday morning, when he was taking a walk with his children, and I counted seven of the handsomest little children you ever saw. [Applause.]

Mr. MANN. And they looked like their mother. [Laughter.]

Mr. FITZGERALD. Yes; they are all good looking.

Mr. MANN. They are all good looking. I am not surprised that the gentleman from New York should offer the amendment. What surprises me is that some of our Democratic economists, after all this talk about Democratic simplicity, wish to add to the expensiveness and the size of the rooms in the White House. On our side of the House we are willing to do that, and I congratulate some of the gentlemen on the other side of the House, because now they are afraid to peep. [Laughter.]

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment.

Mr. OLMSTED. Mr. Chairman, as I sat at my desk during a little lull in the proceedings to-day, studying the Scriptures, as is my wont, I came across a little quotation or phrase which seemed to me to fit the present condition of the President elect.

Mr. Chairman, I am in favor of enlarging the Executive office as proposed in order to make room for the horde of those who, having been out for 16 years, are anxious to get their feet in the trough; and I am in favor of improving the attic, as is suggested, or such other parts of the Executive Mansion as may be desired, so that the President may have a safe place of retreat from the hungry crowd which will press upon him. [Laughter.] When I think of the great pressure which will be put upon him to remove fourth-class postmasters and assistant postmasters all over the country from the civil-service order so that new men may get in; when I think of the rush for the 2,000 positions to be secured because of the refusal, contrary to all precedent, to confirm appointments made in due course by the President about to retire; when I think of the ten disappointed for every one who gets a job; when I think of the factional troubles already existing in his own party in both branches of Congress; when I think of the struggles and discussions they will have in trying to agree upon tariff bills, and of what will happen to them if they do pass the tariff bills that some of them now contemplate; when I consider all these things I am reminded of the saying of the Prophet Isaiah:

> Hell from beneath is moved for thee to meet thee at thy coming.

[Laughter.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

> Improvements, birthplace of Washington, Wakefield, Va.: For repairs to fences and cleaning up and maintaining grounds about the monument, $100.

Mr. EDWARDS. Mr. Chairman, I move to strike out the last word for the purpose of getting some information. I am not opposed to the appropriation, but I want to ask the chairman of the committee who owns this property for which this item is inserted, improving the birthplace of Washington, at Wakefield, Va.?

Mr. FITZGERALD. There is a monument erected there by the Government.

Mr. EDWARDS. Now, as to the other item for the building where Abraham Lincoln died?

Mr. FITZGERALD. That is owned by the Government.

The Clerk read as follows:

> Commission of Fine Arts: To meet the expenses made necessary by the act approved May 17, 1910, entitled "An act establishing a Commission of Fine Arts," including the purchase of periodicals, maps, and books of reference, to be disbursed, on vouchers approved by the commission, by the officer in charge of public buildings and grounds, who shall be the secretary and shall act as the executive officer of said commission, $5,000.

Mr. PAGE. Mr. Chairman, I move to strike out the paragraph. This commission known as the Fine Arts Commission was brought into existence a few years ago by appointment at the hands of the President of the United States without any authority of law. The sundry civil appropriation bill for the fiscal year 1910, approved March 4, 1909, made the provision to stop the payment of any money whatever for compensation or expenses of any commission, council, board, or other similar body unless the same should have been authorized by law.

In consequence of this paragraph in that appropriation bill the Committee on the Library reported a bill for the creation of this Commission of Fine Arts, and the same was approved March, 1910. The act at that time authorized an annual expense not to exceed $10,000.

In pursuance of this law appropriations have been made for the fiscal year of 1911 of $10,000; for the fiscal year of 1912, $8,800; for the fiscal year of 1913, $5,000; and the item which is carried for the fiscal year of 1914 carries $5,000.

The purpose of this commission, composed, I will say, of eminent architects—and I have no criticism of these gentlemen—is supposed to be a supervision of the construction of the public buildings of the United States and to bring about an architectural situation, or aspect, or prospect, that is an improvement on some of the public buildings that have been erected in the city of Washington.

I am ready to admit that there is room for improvement, and I have been somewhat reconciled to the existence of this commission until I was informed a little while ago that they were responsible for the erection of the three tall poles between the Union Station and the statue of Columbus, with the eagles on top. When I learned that they were responsible for this monstrosity I made up my mind that I would renew the fight I had formerly started on this commission to discontinue the appropriation.

Mr. FITZGERALD. Where did the gentleman get his information that they were responsible?

Mr. PAGE. That was general information not specific enough for me to reveal. I think the gentleman from New York was my informant. [Laughter.]

Mr. FITZGERALD. I must decline any responsibility for that information.

Mr. SHERLEY. I knew that it was inaccurate. [Laughter.]

Mr. PAGE. In addition to this piece of art, which many of us have to look on every day as we pass on the street cars going and coming from our homes, I find in the Canal Record, under date of February 5, an item giving the names of the commission who are on a trip to the Canal Zone to investigate prospective buildings.

I suppose part of this appropriation of $5,000 is being used to send these gentlemen of the Commission of Fine Arts on a winter vacation down to the climate of the Canal Zone.

Mr. SHERLEY. If the gentleman from North Carolina will read the hearings had before the committee, he will find that, instead of this being a matter of surprise, Col. Cosby stated that it was expected some members of the commission would go to Panama for this purpose.

Mr. PAGE. That was equally as great a surprise as the item I found in the Canal Record.

Mr. SHERLEY. That was an item that also escaped my friend's attention.

Mr. CULLOP. The provisions of this bill are not available until the 1st of July.

Mr. PAGE. Out of the present appropriation for the current year of $5,000. But what amazes me is what structures——

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. PAGE. Mr. Chairman, I ask the indulgence of the committee for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PAGE. Mr. Chairman, my curiosity is somewhat excited, having had the pleasure of going to the Canal Zone and seeing some of the construction, as to what particular structure there will most appeal to the æsthetic taste of the general public, or even of the Commission of Fine Arts. There are great piles of concrete that form the locks and great masonry that makes the dam, but in a few years the jungle of the Tropics will have covered the dam and the water will have covered up most of the concrete that has gone into the construction of the locks for the canal. I can not understand why they should pass upon any structure that is to be erected upon the Canal Zone, unless they have gone down to inspect and see that the extensive barracks and quarters for military occupation are to be along artistic lines.

Mr. Chairman, it is a small item, but in my judgment an unnecessary expenditure of just this much money without results for the taxpayers. [Applause.]

Mr. SHERLEY. Mr. Chairman, I always enjoy the speeches of my friend from North Carolina [Mr. PAGE], and I can appreciate the opportunity for a little wit at the expense of a commission on fine arts. It has always been more or less the habit of a legislative body to have fun with what they are pleased to call the highfaluting notions of art commissions. There are times when I have felt a little out of patience with particular commissions because of particular recommendations, and yet when I realize that this commission is composed, and has been composed from the beginning, of men who are of the first rank in their professions; when I realize that they give their services to the Government without compensation; that it is to them a labor of love; and when I look not simply at some poles in front of the Union Station but at some of the monstrosities of public buildings that were erected in a period of democracy in this country, when to consider the question of art was looked upon as beneath any real, true inhabitant of a republic, I am more or less reconciled to the existence of this commission.

If gentlemen will read the hearings, they will find the commission has rendered very valuable service to the Government of the United States, and except for a very limited cost of travel and of a few employees, they have done it without expense. They have, among other things, recently passed upon the Lincoln memorial, the competition for the Perry memorial at Put-in-Bay, the German memorial at Germantown, the Fort Recovery Monument, the Guilford Court House Monument, the monuments in Washington to John Paul Jones, Gen. Grant, and Commodore Barry, and so forth, and I could recite other instances of their activities.

Mr. PAGE. Mr. Chairman, will the gentleman permit an interruption?

Mr. SHERLEY. Certainly.

Mr. PAGE. They have passed upon these structures that the gentleman names, but is there any evidence that they changed or made any suggestion of change in the plans?

Mr. SHERLEY. Mr. Chairman, I am quite sure that they have repeatedly made suggestions, and as a result of these suggestions there have been changes of plans, and I am sure that the excellency of many of these works of art and monuments is the result of the intelligent criticism of these men.

The gentleman wonders what they could possibly do at Panama. These hearings show that they have gone there, at least part of them, for the purpose of looking over plans touching a permanent town that will be built there, and I suspect that, notwithstanding the gentleman's suggestion, the jungle will not cover these buildings, as they are to be permanent. Among other things, for instance, we are building there a great hall for the storage of the records of the canal. It is perfectly proper that in the designing of that some attention should be paid to its artistic appearance.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. SHERLEY. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SHERLEY. I insist that when you consider that these men are all eminent in their professions, that their work is voluntary, that something more than a laugh at their expense ought to be produced to warrant us in dispensing with their services. If there has been any one thing in which we have improved as a Nation, it has been in our appreciation of the artistic and the beautiful. The Chicago Fair was a revelation to the people of America, and when for the first time we saw gathered together such magic buildings that had sprung up overnight we had presented to our entranced eyes a new conception of art and architecture.

As a result of that experience the people of America have taken an increasing interest in the beauty of their public buildings, and we no longer have the hideous monstrosities of the War and Navy Building, of the Pension Office, of the Post Office, repeated in modern public buildings in America; and largely this has come about through the intelligent criticism of patriotic men willing to give their time, because of the love of their profession, in helping to educate the American people in a better appreciation of art and beauty. [Applause.]

Mr. CANNON. Mr. Chairman, I make the pro forma amendment for the purpose of saying that my colleagues upon this committee in the majority have proved their interest in their remarks, and the gentleman from North Carolina [Mr. PAGE], with whom I am acquainted, I am quite sure has a better artistic eye than I have, but after all at the hour of half past 10 o'clock at night, as we have made much of progress upon this bill, and I hope we will continue to make progress, there comes a little time for humor, and I am quite sure my friend from North Carolina in making this motion did it for the purpose of getting a rise out of the gentleman from Kentucky [Mr. SHERLEY], and he got it, and it was worth the time that we have had. That is all I want to say. [Laughter and applause.]

Mr. SISSON. Mr. Chairman, I want to support the motion of the gentleman from North Carolina [Mr. PAGE]. In the first place, I do not believe that the expenses of the art commission can be summed up in this $5,000 of salary. This is a very expensive luxury we are having, this art commission. The numerous and sundry suggestions they make are along expensive and ornate lines. Now, I have no objection to my friend from Kentucky [Mr. SHERLEY] speaking of the old-fashioned Democratic ideas and the gentleman from Illinois [Mr. MANN] twitting us for our Democratic simplicity. I still believe in that doctrine. I have not changed my views at all, nor shall an art commission change them. The great trouble is that whatever

utility a building may have, when you begin to put the art commission's ornamentations on it is always an expensive luxury. I do not believe in a hideous building, and I do not know that I am a judge at all, but I do not think that the State, War, and Navy Building is a hideous building. I have never taken much stock in the artistic design of the Post Office Building, but still the Post Office Building is serving every purpose and is a good and substantial building so far as I know; and if the expense of the art commission was limited to $5,000 then it might do, but you will find that you can not get five art commissioners who will agree on one plan of beauty that will not be severely criticized by any other five men of equal talent throughout the country, because the question of architectural design is not a settled one; it is rather in a chaotic condition now. The chances are we will never be able to improve any over the old Greek models, and I do not believe you will ever improve over the architectural design of the present Treasury Building. In my humble judgment I think it is one of the prettiest buildings in the city, artistic in its every proportion, and we had no art commission when that building was designed.

Mr. CULLOP. Will the gentleman consider the Library Building over here?

Mr. SISSON. The Library Building is not, in my judgment, a bad building. The interior of it is a beautiful building; but we had no art commission——

Mr. SHERLEY. Does the gentleman know about the employment of experts in connection with the Library in order that it might be made a beautiful building?

Mr. SISSON. I know in the interior decorations that was true.

Mr. SHERLEY. It is true of its outside appearance as well.

Mr. SISSON. But so far as the outside appearance was concerned, there was no art commission to pass upon it.

Mr. SHERLEY. There was expert advice.

Mr. SISSON. Various plans were submitted to a very distinguished body of men who passed upon the plan, but at last it all depends upon the legislation and the appropriation end or the commission or body selected that is building the building as to whether it would be good or bad.

Mr. MANN. Is it not a fact that the new columns for the Treasury Building, the beauty of which the gentleman admired, were put there at the suggestion of the Fine Arts Commission?

Mr. SISSON. That may be true; and the only difference is that the other columns that they had were divided into sections. The same number of columns were there that are there now, and the only difference is you now have solid pieces of granite top and bottom, whereas before they were divided into sections. The appearance of the building is the same now as it was before, and the additional expense of a vast amount was occasioned by this art commission, which is my objection to it. It is too expensive in its advice.

Mr. MANN. Mr. Chairman, some of our friends over on the other side of the aisle were so in the habit of kicking when the Republicans were in control of the Government that they can not get over that habit. Last year about this time in the consideration of the bill the distinguished gentlemen who are now fighting this item were just having agony over another item of the bill for traveling expenses for the President of the United States, $25,000. That item went through to-night without a murmur or a wink from our friends over there, but a year ago they agonized because the President was to have $25,000 in addition to his salary. They let that item go by and now attack the Fine Arts Commission.

Mr. SISSON. Will the gentleman yield? I ask unanimous consent to return to the item of traveling expenses, and move to strike it out.

Mr. MANN. I shall not object. I shall be glad to do that. The gentleman was here in the Hall of the House when the item was read. He knew then was the time to strike it out, and he knows now that if anybody seriously believed he could strike it out, objection would be made. The gentleman ought to have been Johnny-on-the-spot then instead of now.

Mr. SISSON. I want to say to the gentleman from Illinois that, as a matter of fact, they did slip the item by me, because I gave notice in the committee I was going to strike it out.

Mr. MANN. I saw the gentleman sitting in his seat watching the bill.

Mr. SISSON. But the gentleman is not stating the fact now, because I was not reading the bill. I became so interested in my own remarks that I let them get by the point. [Laughter.]

Mr. MANN. That is the trouble with the gentleman. He is very often more interested in his own remarks than the rest of us are. [Laughter.]

Now, Mr. Chairman, the Fine Arts Commission is a commission created by act of Congress, and the departments of the Government are required, under the law, to ask the Fine Arts Commission for advice before they can do a great many things. To strike this item out of the bill, how will it be done?

The Fine Arts Commission does not draw a salary. My distinguished friend from North Carolina [Mr. PAGE] takes exception—and I wondered he would say what he did—saying that these gentlemen were enjoying a winter trip to Panama at the expense of the Government. How many here have been to Panama at the expense of the Government? The gentleman from North Carolina and myself have been there at the expense of the Government. These gentlemen do not go any more or as much at the expense of the Government as we did, and I expect they will do just as much good on the Isthmus as we did.

Mr. PAGE. Mr. Chairman——

Mr. MANN. And I think it was well worth while sending the gentleman from North Carolina [Mr. PAGE] to Panama at the expense of the Government, and it will be again. I think it is well worth while to send the Fine Arts Commission down there to give some advice, so that when we have finished the greatest waterway in the world the things that appear above the surface, as far as we can control them, will appear beautiful to those who go by. [Applause.]

The CHAIRMAN. Without objection, the pro forma amendment of the gentleman from Illinois will be withdrawn.

The question is on the amendment of the gentleman from North Carolina [Mr. PAGE].

The question was taken, and the amendment was rejected.

Mr. SISSON. Mr. Chairman, I ask unanimous consent to return to the item of the President's traveling expenses, so that I may make a motion to strike that item out of the bill.

Mr. FITZGERALD. I object. I have always been in favor of the item.

Mr. SHERLEY. I object, Mr. Chairman.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Improving harbor at San Francisco, Cal.: For continuing improvement by the removal of Centissima Rock, $110,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word. If it were necessary, I would be quite willing to stay here all night, but we have now been in session for 12 hours and have made very good progress.

Mr. FITZGERALD. We can run through these river and harbor items, and then we will quit.

Mr. MANN. Very well.

Mr. FITZGERALD. There probably will be no discussion.

The Clerk read as follows:

Improving Houston Ship Channel, Tex.: For continuing improvement of the channel formerly designated as Galveston Ship Channel and Buffalo Bayou, $950,000.

Mr. FITZGERALD. Mr. Chairman, I offer an amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 82, in line 9, after the word "Bayou," insert the words "in completion of contract authorization."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Improving Snohomish River, Wash.: For continuing improvement, $105,000.

Mr. FITZGERALD. Mr. Chairman, I offer an amendment which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. FITZGERALD].

The Clerk read as follows:

On page 86, in line 2, after the word "improvement," insert the words "in completion of contract authorization."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Improving Willapa River and Harbor, Wash.: For continuing improvement, in completion of contract authorization, $23,132.

Mr. SHERLEY. Mr. Chairman, I offer the following amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Kentucky [Mr. SHERLEY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 82, in lines 6 and 7, strike out the words "in completion of the contract authorization."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MANN. We are at the end of those items that the gentleman from New York [Mr. FITZGERALD] referred to.

Mr. FITZGERALD. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, and had come to no resolution thereon.

EXTENSION OF REMARKS.

Mr. ANDERSON. I ask unanimous consent to extend my remarks in the RECORD on the construction of a national railroad in Alaska.

The SPEAKER. The gentleman asks to extend his remarks in the RECORD. Is there objection?

There was no objection.

COPIES OF CONFERENCE REPORTS.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the following concurrent resolution.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That all conference reports shall hereafter be made in triplicate, and triplicate copies be delivered as soon as prepared to the enrolling clerk of the House in which the bills originated.

The SPEAKER. The gentleman asks unanimous consent for the present consideration of this resolution. Is there objection?

Mr. MANN. Reserving the right to object, as I understand, this resolution would require all conference reports hereafter to be made in triplicate, whether on Senate bills or House bills. This is a House resolution.

Mr. FITZGERALD. A concurrent resolution.

Mr. MANN. It does not seem to me that there is any occasion for requiring a copy of every conference report to be delivered to the enrolling clerk unless it be on appropriation bills. That might be desirable. Many of the Members of the House who go on conference committees do not have clerks who are thoroughly familiar with requirements of this sort, and I do not see any necessity of it. I suppose the purpose of it is to have copies of the appropriation bills. Why not confine it to that?

Mr. FITZGERALD. The object is to facilitate the work of the enrolling room during the remaining days of the session.

Mr. MANN. Yes.

Mr. FITZGERALD. The practice of the Committee on Appropriations has been to prepare three copies of their conference reports. That has been of such great advantage that the enrolling clerks have requested that it be extended to all conference reports. Perhaps it would carry out the purpose of the matter if it were restricted to appropriation bills.

Mr. MANN. I am not at all certain that it will work successfully, although I am willing to try it on appropriation bills. Copies of conference reports are not always the same, but when a conference report is presented to the Senate it is printed, and when it is presented to the House it is printed at some time or other. If there are errors they are discovered. Here is a proposition to deliver another conference report to the enrolling room which never is presented to either body. If there is an error in it, of course the error will be copied into the enrolled bill.

Mr. FITZGERALD. The purpose of this is to enable the enrolling clerks to start their work. The comparison will be made with the original.

Mr. MANN. But this is an original. The enrolling clerks are not going to compare an enrolled bill with two original conference reports. When you deliver a paper in triplicate each one is an original. I have no objection, if you confine this to the appropriation bills.

Mr. FITZGERALD. I will ask to amend the resolution by inserting, after the words "conference reports," the words "on general appropriation bills."

Mr. GARRETT. I ask unanimous consent that the matter may go over until morning.

Mr. FITZGERALD. I will ask that the matter go over.

The SPEAKER. The matter will go over until to-morrow morning.

OLEOMARGARINE.

Mr. HAUGEN. Mr. Speaker, I ask unanimous consent to have certain resolutions of the Minnesota State Dairyman's Association relative to the manufacture and sale of oleomargarine printed in the RECORD.

The SPEAKER. The gentleman asks unanimous consent to have certain resolutions of the Minnesota State Dairyman's Association printed in the RECORD. Is there objection?

There was no objection.

The matter referred to is as follows:

MINNESOTA STATE DAIRYMAN'S ASSOCIATION,
Nicollet, Minn., February 12, 1913.

Hon. G. N. HAUGEN,
Washington, D. C.:

DEAR SIR: We desire to call your attention to the following resolution, passed at the annual convention of the Minnesota State Dairyman's Association, held at Northfield, January 21–24, 1913:

"Whereas there are now before the Committee on Agriculture of our National Congress two bills for enactment into laws governing the manufacture and sale of oleomargarine, one known as the Lever bill, which is being supported by the oleomargarine interests, and one known as the Haugen bill, which is indorsed by the National Dairy Union; and

"Whereas we believe the Haugen bill, if enacted into law, will best protect the producer and consumer of pure butter from fraud and deceit and at the same time not hamper the manufacturers of oleomargarine in the distribution of their product at a minimum expense for revenue tax: Now therefore be it

"*Resolved*, That the Minnesota State Dairyman's Association in convention assembled at Northfield, Minn., this 23d day of January, 1913, do indorse the Haugen bill and urge our Senators and Representatives in Congress to use all honorable means to secure the passage of the said Haugen bill; and be it further

"*Resolved*, That the secretary of this association is hereby instructed to forward a copy of this resolution to Hon. G. N. HAUGEN and request him to introduce it as a resolution in Congress to the end that it shall appear printed in the CONGRESSIONAL RECORD; and be it further

"*Resolved*, That the secretary of this association is instructed to forward a copy of this resolution to N. P. Hull, secretary of the National Dairy Union, and to our Senators and Representatives in Congress."

Respectfully, F. D. CURRIER, *Secretary.*

ADJOURNMENT.

Mr. FITZGERALD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 48 minutes p. m.) the House adjourned until Thursday, February 20, 1913, at 10.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Chesapeake Bay, Md., off Pooles Island (H. Doc. No. 1406); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of employment of civilian engineers on river and harbor work (H. Doc. No. 1407); to the Committee on Rivers and Harbors and ordered to be printed.

3. A letter from the Postmaster General, transmitting, on behalf of the board of trustees of the postal savings system, report for the fiscal year ended June 30, 1912 (H. Doc. No. 1408); to the Committee on the Post Office and Post Roads and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HUMPHREYS of Mississippi, from the Committee on the Territories, to which was referred the bill (H. R. 28731) to extend the time for the completion of the Alaska Northern Railway, and for other purposes, reported the same with amendment, accompanied by a report (No. 1547), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. LOBECK, from the Committee on the District of Columbia, to which was referred the bill (H. R. 18013) fixing the price of gas and regulating the quantity of carbon monoxide in gas in the District of Columbia, reported the same with amendment, accompanied by a report (No. 1550), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BROWNING, from the Committee on Naval Affairs, to which was referred the bill (S. 7169) to transfer Capt. Frank E. Evans from the retired to the active list of the Marine Corps, reported the same without amendment, accompanied by a report (No. 1548), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. RUSSELL: A bill (H. R. 28803) for the acquisition of a site for the erection of a building at Caruthersville, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. O'SHAUNESSY: A bill (H. R. 28804) to amend an act entitled "An act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes," approved August 5, 1909; to the Committee on Ways and Means.

By Mr. CLAYTON: A bill (H. R. 28809) to provide for the punishment of certain crimes against the United States; to the Committee on the Judiciary.

By Mr. CANTRILL: Resolution (H. Res. 851) authorizing the payment of $1,200 to G. D. Ellis for expert services rendered during the first, second, and third sessions of the Sixty-second Congress; to the Committee on Accounts.

By Mr. WEBB: Resolution (H. Res. 853) directing the Attorney General to furnish the House with certain information; to the Committee on the Judiciary.

By Mr. CURLEY: Memorial from the Legislature of the State of Massachusetts, favoring the establishment of an international commission on the high cost of living; to the Committee on Foreign Affairs.

By Mr. ASHBROOK: Memorial adopted by the General Assembly of the State of Ohio, asking for the enactment of a Federal law regulating the exportation of food products; to the Committee on Interstate and Foreign Commerce.

By Mr. WEEKS: Memorial of the General Court of the Commonwealth of Massachusetts, in favor of the establishment of an international commission on the cost of living; to the Committee on Foreign Affairs.

By the SPEAKER: Resolutions of the General Court of the Commonwealth of Massachusetts, in favor of the establishment of an international commission on the cost of living; to the Committee on Foreign Affairs.

By Mr. KNOWLAND: Resolutions passed by the Assembly of the State of California, urging the passage of Senate bill 122 (the Newlands bill) to create a board of river regulation, etc.; to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LEE of Georgia: A bill (H. R. 28805) for the relief of the legal representatives of Elijah Lumpkin, deceased; to the Committee on War Claims.

By Mr. MADDEN: A bill (H. R. 28806) granting an increase of pension to John F. Thomas; to the Committee on Invalid Pensions.

By Mr. RAINEY: A bill (H. R. 28807) granting a pension to Samantha Buvinger; to the Committee on Invalid Pensions.

By Mr. WITHERSPOON: A bill (H. R. 28808) for the relief of the Methodist Episcopal Church South, of Decatur, Miss.; to the Committee on War Claims.

By Mr. LEE of Georgia: Resolution (H. Res. 850) referring certain claims to the Court of Claims for finding of facts and conclusions of law under section 151 of the act of March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to the judiciary" (Public act No. 475, 61st Cong., 2d sess., p. 1138); to the Committee on War Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of citizens of Portage, Wis., favoring the passage of the McLean bill, for the Federal protection of migratory birds; to the Committee on Agriculture.

Also (by request), petition of the American Society of Zoologists, favoring the passage of the McLean bill, for the Federal protection of migratory birds; to the Committee on Agriculture.

Also (by request), petition of Gus Boltz, asking the impeachment and removal of the present judge, Cornelius D. Murane, and the acting district attorney, N. Castle, of the District of Alaska; to the Committee on the Judiciary.

By Mr. ANSBERRY: Petition of W. S. Watson and others, of Payne, Ohio, favoring the passage of legislation reducing the tariff on sugar; to the Committee on Ways and Means.

By Mr. ASHBROOK: Petition of the State of Indiana Sealers' Association, favoring the passage of legislation for a standard barrel and more uniform weights and measures for fruits, vegetables, etc.; to the Committee on Coinage, Weights, and Measures.

By Mr. BATES: Petition of the Consumers' League of Meadville, Pa., favoring the passage of House bill 27821, limiting the hours of labor of women in the District of Columbia; to the Committee on the District of Columbia.

By Mr. CALDER: Petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, preventing discrimination in the Panama tolls; to the Committee on Interstate and Foreign Commerce.

By Mr. COPLEY: Petition of the College Church of Wheaton, Pa., favoring the passage of the Kenyon "red light" injunction bill for the cleaning up of Washington for the inauguration; to the Committee on the District of Columbia.

By Mr. DIFENDERFER: Petition of the First Presbyterian Church of Conshohocken, Pa., favoring the passage of the Kenyon-Sheppard bill to prevent the shipment of liquors into dry territory; to the Committee on the Judiciary.

By Mr. DYER: Petition of Jewish citizens of St. Louis, Mo.; I. L. Schoen, St. Louis, Mo.; Scandinavian citizens of New York City; Italian Club and others, of St. Louis, Mo.; and Beth Israel Lodge and Lodge No. 234, Independent Order B'rith Sholom, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of organized labor of Boston, Mass.; State Council of Missouri, Junior Order United American Mechanics; Lion Council, Junior Order United American Mechanics, St. Louis, Mo.; and H. E. Willis, Washington, D. C., favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of the board of directors of the American Association of Foreign Language Newspapers, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. ESCH: Petition of citizens of Philadelphia, Pa., favoring the passage of legislation to submit to arbitration the clause relative to the tolls at the Panama Canal; to the Committee on Interstate and Foreign Commerce.

By Mr. FITZGERALD: Petition of the District Branch of the National Woman's River and Harbor Congress, favoring the passage of legislation making appropriations to cover expenses for analyzing the water of the Potomac; to the Committee on Appropriations.

By Mr. FORNES: Petition of the Lackawanna Steel Co., New York, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. FULLER: Petition of Charles H. Stees, secretary of the Patriotic Order Sons of America, Philadelphia, Pa.; James Duncan and Henry Abraham, Boston, Mass., favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of the American Association of Foreign Language Newspapers, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. GREGG of Pennsylvania: Petition of John F. Miklosky, Latrobe, Pa.; Tony Roy, Greensburg, Pa.; Bruno Floro, Jacobs Creek; Morris Pollak, Butler; the First National Bank, New Kensington; F. L. Demay, Johnstown; John L. Lengyel and other citizens of Greensburg and Trauger; Italian-American citizens, Mount Pleasant; Tony Testa and Anglo Testa, Queensburg; Leonard Difoggi and others, of Butler, Pa.; and George Slaine, Mount Pleasant, Mich., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of O. T. Porter, Wick Haven, Pa., favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. LAFEAN: Papers to accompany bill (H. R. 28516) granting an increase of pension to John H. Hector; to the Committee on Invalid Pensions.

By Mr. LINDSAY: Petition of the Lackawanna Steel Co., New York, N. Y., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of the Retail Dry Goods Association, New York, N. Y., protesting against the passage of the amendment to House bill 27148, transferring the classification of books from the third class to the fourth class; to the Committee on the Post Office and Post Roads.

Also, petition of H. E. Willis, assistant grand chief and national legislative representative of the Brotherhood of Locomotive Engineers, Washington, D. C., favoring the passage of the workmen's compensation bill; to the Committee on the Judiciary.

By Mr. MOTT: Petition of the governor of the State of New York and others, protesting against the passage of the proposed bill to regulate and control the waters of the Niagara River; to the Committee on Foreign Affairs.

Also, petition of the Patriotic Order Sons of America, Philadelphia, Pa., wage earners of Boston, Mass., and W. B. Griffith, New York, favoring the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Local Union No. 8, United Hatters of America, Brooklyn, N. Y., protesting against the passage of legislation for a reduction of duty on hats; to the Committee on Ways and Means.

Also, petition of the Lackawanna Steel Co., New York; the American Association of Foreign Language Papers, New York; and the German American State Alliance, New York, protesting against the passage of Senate bill 3175, for the restriction of immigration over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. O'SHAUNESSY: Petition of the Polish National Alliance Branches, Woonsocket, R. I.; Providence Immigration Society; Adams R. Aiello and Carlo Constantio, Providence, R. I.; and Joseph M. Tally, protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Local Union 534, Brotherhood of Painters, Decorators, and Paperhangers of America, Newport, R. I., protesting against the passage of Senate bill 8141, for placing the State militia on the national pay roll; to the Committee on Military Affairs.

Also, petition of the Modern Political Club, Providence, R. I., protesting against the passage of Senate bill 3175, for the restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of Maraget N. Goodwin, Providence, R. I.; Sarah J. Eddy and M. S. Hall, Bristol Ferry, R. I., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

Also, petition of Alice Hall Walter, Providence, R. I.; Aulem Dalmey and 3 others, of Boston, Mass.; Audubon Society of Rhode Island, Providence, R. I., and Thomas William R. Trowbridge, Providence, favoring the passage of the McLean bill, granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. REILLY: Petition of the American Association of Foreign Newspapers, protesting against the passage of Senate bill 3175, for restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of member of Division No. 348, Brotherhood of Locomotive Enginemen, favoring the passage of the workman's compensation bill as amended by the House; to the Committee on the Judiciary.

Also, petition of the Waterbury Central Labor Union, Waterbury, Conn., favoring an amendment to the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

By Mr. SCULLY: Petition of Charles K. Johanson, publisher North Star, New York, and the Polish Alma Mater of America, protesting against the passage of Senate bill 3175, for restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

Also, petition of 200 voters of Seabright, N. J., and Washington Camp, No. 85, Patriotic Order Sons of America, Red Banks, N. J., favoring the passage of Senate bill 3175, for restriction of immigration, over the President's veto; to the Committee on Immigration and Naturalization.

By Mr. SPEER: Petition of pupils of the public schools of Sharpsville, favoring the passage of the McLean Bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. STEVENS of Minnesota: Petition of the Minnesota State Dairymen's Association, favoring the passage of the Haugen bill to protect the producer and consumer of pure butter from fraud; to the Committee on Agriculture.

By Mr. STEPHENS of California: Petition of the Senate of the State of California, favoring the reestablishment of the fourth revenue collection district of the State of California; to the Committee on Ways and Means.

Also, petition of residents of San Francisco, Cal., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. TILSON: Petition of the New Haven Pomona County Grange, No. 5, of Connecticut, favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. WILSON of New York: Petition of the Central Federated Union of Greater New York and vicinity, protesting against the passage of House bill 8141, placing the State militia on the national pay roll; to the Committee on Military Affairs.

Also, petition of the Merchants' Association of New York, favoring the passage of legislation for the adoption of a national budget for changing the laws and practices now regulating Federal expenditures; to the Committee on Ways and Means.

SENATE.

THURSDAY, *February 20, 1913.*

Prayer by the Chaplain, Rev. Ulysses G. B. Pierce, D. D.

Mr. GALLINGER took the chair as President pro tempore under the previous order of the Senate.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

COLUMBIA HOSPITAL FOR WOMEN.

The PRESIDENT pro tempore laid before the Senate a communication from the president of the board of directors of the Columbia Hospital and from the Superintendent of the United States Capitol Building and Grounds, transmitting, pursuant to law, plans and specifications for a new building for the Columbia Hospital for Women and Lying-in Asylum in the District of Columbia, which, with the accompanying papers and illustrations, was referred to the Committee on the District of Columbia.

REPORT ON POSTAL SAVINGS (H. DOC. NO. 1408).

The PRESIDENT pro tempore laid before the Senate a communication from the Postmaster General, transmitting, pursuant to law, the annual report of the operations of the Postal Savings System for the fiscal year ended June 30, 1912, which, with the accompanying paper, was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

DISPOSITION OF USELESS PAPERS (H. DOC. NO. 1409).

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the Secretary of Commerce and Labor, transmitting, pursuant to law, a list of papers accumulated in the Bureau of Lighthouses which are no longer needed or useful in the transaction of public business and which have no historical value, and recommending that the papers be disposed of. The communication and accompanying papers will be referred to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments, and the Chair appoints the Senator from Arkansas [Mr. CLARKE] and the Senator from New Hampshire [Mr. BURNHAM] as the committee on the part of the Senate. The Secretary will notify the House of Representatives of the appointment of the committee on the part of the Senate.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented a petition of the Builders' Exchange of Pittsburgh, Pa., praying for the enactment of legislation providing for the protection of migratory birds, which was ordered to lie on the table.

Mr. CLARK of Wyoming. I present a joint memorial, adopted by the Legislature of Wyoming, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

There being no objection, the joint memorial was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following and hereto attached copy of enrolled joint memorial No. 1, House of Representatives, State of Wyoming, has been carefully compared with the original, filed in this office on the 15th day of February, A. D. 1913, and is a full, true, and correct copy of the same and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 17th day of February, A. D. 1913.

[SEAL.] FRANK L. HOUX,
Secretary of State.
By F. H. WESCOTT,
Deputy.

(Original house joint memorial No. 1. Twelfth Legislature of the State of Wyoming.)

Enrolled joint memorial No. 1, House of Representatives, State of Wyoming.

Memorial to the Senate and House of Representatives of the United States relative to the administration of the public-land laws.

Be it resolved by the House of Representatives of the State of Wyoming (the Senate concurring), That the Congress of the United States be memorialized as follows:

Whereas the State of Wyoming has been, and is being, discriminated against by the unjustifiable rulings of the Department of the Interior in the administration of the land laws; and

Whereas the Department of the Interior has particularly discriminated against this State in the rulings it has made concerning irrigation projects under the Carey Act, thereby retarding the development of the State; and

Whereas the major portion of the special agents of the department are men from the extreme East and not familiar with conditions in the West; and

Whereas these same special agents act more as persecutors of settlers than prosecutors of fraudulent entries; and

Whereas the rules and regulations laid down by the Forestry Department have become so burdensome and costly that it has and is forcing men and companies out of business and depriving many of our local men of employment: Now therefore be it

Resolved, That we protest against the administration of the land laws which prevents the irrigation, reclamation, and settlement of our public lands; that we favor an enlarged and additional homestead law; that if we must have special agents, that they be Western men, familiar with conditions; that we demand that the regulations relative to the cutting of timber for local use be altered so that residents may secure timber and lumber at reasonable instead of prohibitive prices: Be it further

Resolved, That the secretary of state be instructed to send a copy of this memorial to the United States Senators and Representatives in Congress from Wyoming.

MARTIN L. PRATT,
Speaker of the House.
BIRNEY H. SAGE,
President of the Senate.

Approved February 15, 1913, at 3.30 p. m.
JOSEPH M. CAREY, *Governor.*

Mr. CULLOM presented a memorial of members of the Negro Fellowship League of Chicago, Ill., remonstrating against the enactment of legislation prohibiting intermarriage between races in the District of Columbia, which was referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Springfield and Rock Falls, in the State of Illinois, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. TOWNSEND presented memorials of sundry citizens of Sumner, Leslie, and Charlotte, all in the State of Michigan, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. WARREN presented a joint memorial passed by the Legislature of the State of Wyoming, praying for the enactment of legislation providing for an enlarged and additional homestead, which was referred to the Committee on Public Lands.

Mr. CHAMBERLAIN. I present a joint memorial of the Legislature of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the memorial was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Ben W. Olcott, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of house joint memorial No. 2 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 22d day of January, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 7th day of February, A. D. 1913.

[SEAL.] BEN W. OLCOTT,
Secretary of State.

House joint memorial 2.

To the honorable the Senate and the House of Representatives of the United States of America in Congress assembled:

Your memorialists, the Legislative Assembly of the State of Oregon, respectfully represents that—

Whereas the city of Portland, in the county of Multnomah, State of Oregon, is divided by the Willamette River, a navigable stream; and

Whereas the east and west side districts of said city of Portland are connected by five drawbridges, over which are operated electric street car lines and across which wagons, automobiles, and other vehicles and foot pedestrians are compelled to pass daily; and

Whereas more than two-thirds of the business population of said city of Portland residing on the east side of said Willamette River is compelled to cross said bridge during the morning hours in order to reach their respective places of business, and across said bridge during the evening hours in order to reach their homes; and

Whereas the draws of said bridges are constantly open for the passage of boats, ships, steamers, and other craft; and

Whereas the opening of said draws tends to delay traffic and causes great annoyance to those who have occasion to cross and recross said bridges: Therefore be it

Resolved, That your memorialists favor the enactment of a Federal law providing for the closing of the draws of all said bridges between the hours of 7 a. m. and 9 a. m., and 5 p. m. and 7 p. m., and for the passage of such a law your memorialists will ever pray.

Adopted by the house January 16, 1913.

C. N. MCARTHUR,
Speaker of the House.

Adopted by the Senate January 17, 1913.

DAN J. MALARKEY,
President of the Senate.

(Indorsed: House joint memorial No. 2. Adopted by the house January 16, 1913. Adopted by the senate January 17, 1913. W. F. Drager, chief clerk. Filed January 22, 1913. Ben W. Olcott, secretary of state.)

Mr. CHAMBERLAIN. I present a joint memorial of the Legislature of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the memorial was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Ben W. Olcott, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 5 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 27th day of January, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 7th day of February, A. D. 1913.

[SEAL.] BEN W. OLCOTT,
Secretary of State.

Senate joint memorial 5.

Whereas the opening of the Panama Canal will bring to the Pacific seaboard a largely increased volume of waterway traffic, necessitating the thorough improvement of our waterways and the enlargement of our harbor and dockage facilities; and

Whereas the Columbia River and its tributaries constitute the greatest inland waterways system of the Pacific coast of America and the second greatest of the Nation; and

Whereas the preeminent importance of this waterway has been recognized by the National Government hitherto by large appropriations covering its improvement from its mouth inland; and

Whereas one of the great steamship lines of the world, namely, the Hamburg-American Line, has selected the Columbia River as the Pacific coast terminal for its trans-Pacific-oriental service; and

Whereas the volume of traffic tributary to the Columbia gateway virtually embraces in actual freight carried or directly affected by its water craft the entire coast business, inward and outward, of the Columbia and Snake River basins (a territory almost 250,000 square miles in extent); and

Whereas the full benefits to be obtained from the operation of this waterway can only be secured by its complete and adequate improvement: Therefore be it

Resolved by the senate (the house concurring), That we hereby memorialize the Congress of the United States at its present session to appropriate the sum of $1,400,000, to be immediately available, for the completion of the Celilo Canal and the opening of the Columbia and Snake Rivers to free navigation, this sum being in reality only an increase of $800,000 over the amount necessary to carry on this work on the continuous-contract basis already in operation.

Resolved, That we urge upon Congress the importance of this appropriation in order to save the net sum of $100,000, according to the estimate of the United States engineers in charge of this work.

Resolved, That the opening of the Celilo Canal and the Columbia and Snake Rivers to free navigation during the year 1915 will stimulate the building of municipal docks, the extension of feeder lines of railway, and the construction of steamboats, barges, etc., essential to the development of a vast traffic territory.

Resolved further, That the completion of these improvements at the time indicated will enable the people of the Pacific Northwest, both American and Canadian, to fittingly celebrate the opening of the Celilo Canal and the Columbia River in conjunction with the international ceremonies in honor of the Panama Canal in 1915, thus giving notice to the world of an all-water route from the ports of the world to the interior of western America and British Columbia.

Adopted by the house January 23, 1913.

C. N. MCARTHUR,
Speaker of the House.

Passed by the senate January 21, 1913.

DAN J. MALARKEY,
President of the Senate.

(Indorsed: Senate joint memorial No. 5, by Senator Joseph. J. W. Cochran, chief clerk. Filed January 27, 1913. Ben W. Olcott, secretary of state.)

Mr. CHAMBERLAIN. I present a joint resolution passed by the Legislature of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the joint resolution was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Ben W. Olcott, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint resolution No. 5 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 27th day of January, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 7th day of February, A. D. 1913.

[SEAL.] BEN W. OLCOTT,
Secretary of State.

Senate joint resolution 5.

Whereas the completion of the Panama Canal emphasizes the importance of the improvement of every harbor on our coast line from the northern boundary of the State of California to the Columbia River; and

Whereas there are many bays along the Pacific coast capable of becoming splendid harbors, particularly those of Tillamook Bay, Yaquina Bay, Coos Bay, Coquille River, and Port Orford, and others, each of which, with a comparatively small cost to the Federal Government, could be made ports of entry for all coastwise vessels, as well as those of deeper draft; and

Whereas tributary to these harbors are millions of feet of lumber in our matchless forests, as well as large sections of agricultural land capable of producing great harvests, to say nothing of the products of our mines and our streams, all of which must reach the markets of the world through these channels; and

Whereas each of these harbors are now in direct rail communication with other parts of the world, whereby a proper distribution of commerce and the assembling of the products may be maintained: Therefore be it

Resolved, That the senate, the house concurring, memorialize our Representatives in Washington and request them to earnestly urge Congress to improve these ports and waterways and secure necessary and ample appropriations for the immediate improvement of these harbors that will open them for at least all coastwise vessels, so that the products of our forests, our mines, and our soil may thereby reach the world's markets.

Adopted by the house January 23, 1913.

C. N. MCARTHUR,
Speaker of the House.

Adopted by the senate January 17, 1913.

DAN J. MALARKEY,
President of the Senate.

(Indorsed: Senate joint resolution No. 5, by Senator Hollis. J. W. Cochran, chief clerk. Filed January 27, 1913. B. W. Olcott, secretary of state.)

Mr. CHAMBERLAIN. I present a joint memorial of the Legislature of Oregon, which I ask may be printed in the RECORD and referred to the Committee on the Judiciary.

There being no objection, the joint memorial was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Ben W. Olcott, secretary of state of the State of Oregon and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 3 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 27th day of January, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 7th day of February, A. D. 1913.

[SEAL.] BEN W. OLCOTT,
Secretary of State.

Senate joint memorial 3.

Whereas the number of divorces throughout the United States has been increasing during the past 50 years at an alarming rate and under the present system there is no uniform law covering this subject in the several States; and

Whereas at the present time the several States are operating under laws so entirely divergent that the legitimacy of children is often made a serious question and property rights are frequently uncertain; and

Whereas the question is one that strikes at the very foundation of our social organization and we deem it necessary and proper that the law in relation thereto should be uniform throughout the United States, and that such law should be so safeguarded that fraudulent divorces can not be secured: Now therefore be it

Resolved, That we instruct our Senators in Congress and request our Representatives at Washington to use their best endeavors to have Congress propose an amendment to the Constitution of the United States whereby the Congress may pass laws regulating the subject of marriage and divorce throughout the United States.

Concurred in by the house January 23, 1913.

C. N. MCARTHUR,
Speaker of the House.

Adopted by the senate January 16, 1913.

DAN J. MALARKEY,
President of the Senate.

(Indorsed: Senate joint memorial No. 3, by committee on Federal relations. J. W. Cochran, chief clerk. Filed January 27, 1913. B. W. Olcott, secretary of state.)

BOARD OF RIVER REGULATION.

Mr. NEWLANDS. Mr. President, I present a resolution adopted by the Legislature of the State of California, memorializing Congress to pass the bill to create a board of river regulation, which I had the honor to introduce early in this session.

I also present a joint resolution adopted by the Legislature of the State of South Dakota to the same effect, which I should like to have printed in the RECORD.

The PRESIDENT pro tempore. Without objection, that order will be made.

Mr. NEWLANDS. I also present a memorial from the Philadelphia Board of Trade, favoring the passage of the bill to create a board of river regulation, and so forth. I should like to have that also printed in the RECORD.

Mr. CRAWFORD. If the Senator from Nevada will permit——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from South Dakota?

Mr. NEWLANDS. I do.

Mr. CRAWFORD. I think the resolution from the State of South Dakota, which the Senator has just presented, has already been printed in the RECORD.

Mr. NEWLANDS. I have that resolution here amongst the papers that were sent to the committee, and I was about to inquire of the Senator whether it had been printed in the RECORD.

Mr. CRAWFORD. I presented the resolution and two or three others from the Legislature of South Dakota some days ago, and they were all printed in the RECORD.

Mr. NEWLANDS. Did all those resolutions relate to the river regulation bill?

Mr. CRAWFORD. The resolution is so important, and relates to a question so important to the country, that I do not object to it being again printed in the RECORD in connection with the Senator's proposed legislation.

Mr. SMOOT. I hope the Senator will not ask that the resolution be again printed in the RECORD if it has already been so printed.

Mr. NEWLANDS. After receiving the assurance from the Senator from South Dakota [Mr. CRAWFORD] that the resolution has heretofore been printed in the RECORD I shall not, of course, ask that it be again printed.

The PRESIDENT pro tempore. The Senator from Nevada withdraws his request?

Mr. NEWLANDS. Yes, as to the printing of the resolution from the Legislature of the State of South Dakota. I should, however, like to have the other resolutions printed in the RECORD.

The PRESIDENT pro tempore. Without objection, the resolutions will be printed in the RECORD.

The resolutions are as follows:

CALIFORNIA LEGISLATURE, ASSEMBLY,
Sacramento, February 6, 1913.

HON. FRANCIS G. NEWLANDS,
United States Senate, Washington, D. C.

DEAR SIR: I have the honor to hand you herewith a copy of a resolution adopted by the Assembly of the State of California on the 4th day of February, 1913.

Very truly, yours, L. B. MALLORY,
Chief Clerk.

The following resolution was offered by Mr. Gulberson:

"Whereas a bill has been introduced in the Senate of the United States by Hon. FRANCIS G. NEWLANDS, of Nevada, which, according to its title, proposes 'to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies'; and

"Whereas it has been proposed by the leading supporters of said bill that it be amended so as to provide for an appropriation of $5,000,000 annually for 10 years for the control of the Sacramento and San Joaquin Rivers and their tributaries and for a like appropriation for the control of the Colorado River; and

"Whereas this legislature is in hearty accord with the principles embodied in said bill and believes that the money proposed to be expended under it and the cooperation provided for in it will promote the general welfare; and

"Whereas the vastness and variety of the interests that will be benefited by the expenditures contemplated in the proposed amendments fully justify such participation by the National Government in the work of making the navigable streams of California as useful as possible to the public: Therefore be it

"*Resolved by the Assembly of the State of California*, That the Congress of the United States be, and both branches of said body hereby are, requested to pass said bill, with the amendments aforesaid, and that the Representatives of California in the Senate and the House of Representatives be requested to use their best efforts to that end; and be it further

"*Resolved*, That the chief clerk of the assembly be, and he hereby is, directed to send a copy of this resolution to each Senator and Representative in Congress from this State, to Hon. FRANCIS G. NEWLANDS,

to the Vice President of the United States, and to the Speaker of the House of Representatives."

Adopted this 4th day of February, 1913.

L. B. MALLOREY, *Chief Clerk.*

PHILADELPHIA BOARD OF TRADE,
ORGANIZED 1833,
Bourse Building, Philadelphia.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

This memorial of the Philadelphia Board of Trade respectfully represents:

That through its committee on inland transportation it has examined the provisions of Senate bill No. 122, introduced by Senator NEWLANDS, having for its purpose the creation of a board of river regulation with the view of securing the maintenance by the Federal Government of an adequate levee and bank-revetment system in the low States bordering the Ohio and Mississippi Rivers, and for the ultimate adoption of a policy of stream control which shall check and minimize the formation of floods, which have proved so disastrous in the loss of life and property;

That the yearly damage caused by preventable floods in the drainage basin of the Ohio River, and the damage caused by the great flood of 1912 in the Mississippi Valley, certainly justify the most liberal appropriations and the most careful study for their causes, with the view of securing remedial measures for their prevention;

That Philadelphia, while far removed from the territory affected by these floods, sympathizes with the sufferers therefrom, and believes that in the last analysis the great losses affect unfavorably every business interest, and the General Government is called upon to aid by legislation in securing for the afflicted sections of the country immunity from the recurrence of these devastating floods: Therefore

Your memorialist, the Philadelphia Board of Trade, petitions your honorable bodies to favorably consider and pass Senate bill No. 122, known as the "Newlands river regulation bill."

And your memorialist will ever pray.

PHILADELPHIA BOARD OF TRADE,
WILLIAM M. COATES, *President.*

[SEAL.]

Attest:

W. R. TUCKER, *Secretary.*

REPORTS OF COMMITTEES.

Mr. LODGE, from the Committee on Finance, to which was referred the bill (S. 276) to create a tariff board, reported it with amendments.

He also, from the same committee, to which was referred the bill (S. 279) providing for the refund of certain duties incorrectly collected on cutch, reported it without amendment.

Mr. WORKS, from the Committee on Public Lands, to which was referred the bill (S. 7319) to authorize the sale and issuance of patent for certain land to H. W. O'Melveny, reported it without amendment and submitted a report (No. 1272) thereon.

Mr. SMOOT, from the Committee on Public Lands, to which was referred the bill (S. 8130) granting to the town of Nevadaville, Colo., the right to purchase certain lands for the protection of water supply, reported it with amendments.

He also, from the same committee, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 8389. A bill to provide for an enlarged homestead (Rept. No. 1275); and

H. R. 27875. An act authorizing the President to convey certain land to the State of Texas (Rept. No. 1274).

Mr. SMOOT, from the Committee on Public Lands, to which was referred the joint resolution (H. J. Res. 326) providing for extending provisions of the act authorizing extension of payments to homesteaders on the Coeur d'Alene Indian Reservation, Idaho, reported it without amendment and submitted a report (No. 1273) thereon.

He also, from the same committee, to which was referred the bill (H. R. 26812) to provide for the selection by the State of Idaho of phosphate and oil lands, reported it without amendment and submitted a report (No. 1269) thereon.

He also, from the Committee on Finance, to which was referred the bill (H. R. 24703) to extend the authority to receive certified checks drawn on national and State banks and trust companies in payment for duties on imports and internal taxes and all public dues, reported it without amendment and submitted a report (No. 1276) thereon.

Mr. CURTIS, from the Committee on the District of Columbia, to which was referred the bill (S. 7640) to incorporate the Virginia Terminal Co., reported it with an amendment and submitted a report (No. 1277) thereon.

Mr. OLIVER, from the Committee on Commerce, to which was referred the bill (S. 8324) to appoint James W. Keen as master's mate in the Revenue-Cutter Service and to place him as such upon the retired list, reported it without amendment and submitted a report (No. 1278) thereon.

Mr. JONES, from the Committee on Claims, to which was referred the bill (S. 7060) for the relief of Samuel H. Walker, reported it with an amendment and submitted a report (No. 1279) thereon.

He also, from the Committee on Military Affairs, to which was referred the bill (H. R. 24061) for the relief of James Parsons, reported it without an amendment and submitted a report (No. 1280) thereon.

Mr. SIMMONS, from the Committee on Finance, to which was referred the bill (H. R. 12339) to refund certain taxes paid by the Louisiana Distillery Co. (Ltd.), of New Orleans, La., reported it without amendment and submitted a report (No. 1281) thereon.

Mr. WILLIAMS, from the Committee on Finance, to which was referred the bill (H. R. 18213) to refund to the Sparrow Gravely Tobacco Co. the sum of $173.52, with penalty and interest, the same having been erroneously paid by them to the Government of the United States, reported it with an amendment and submitted a report (No. 1282) thereon.

PORT OF LOS ANGELES, CAL.

Mr. PERKINS. From the Committee on Commerce I report back favorably without amendment the bill (S. 8429) to create a board of local inspectors, Steamboat-Inspection Service, for the port of Los Angeles, Cal., and I submit a report (No. 1268) thereon. I call the attention of my colleague [Mr. WORKS] to the bill.

Mr. WORKS. I ask for the present consideration of the bill reported by my colleague.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to amend section 4414 of the Revised Statutes of the United States by inserting in the first paragraph thereof, after the words "New Orleans, La.," and before the words "Juneau, Alaska," the words "Los Angeles, Cal."; and also by inserting in the fifth paragraph thereof, after the words "Portland, Me.," and before the words "Juneau, Alaska," the words "Los Angeles, Cal."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

NATIONAL ACADEMY OF SCIENCES.

Mr. LODGE. From the Committee on Finance I report back favorably without amendment the joint resolution (S. J. Res. 162) to exempt the National Academy of Sciences from the payment of duty on medals imported for presentation by it in recognition of research work, and I ask for its present consideration.

The PRESIDENT pro tempore. The joint resolution will be read in full for information.

The Secretary read the joint resolution; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It exempts the National Academy of Sciences from the payment of duty on medals which it may import for presentation in recognition of researches undertaken for the benefit of science and mankind.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LEGISLATIVE DEPARTMENT OF CONGRESSIONAL LIBRARY.

Mr. ROOT. From the Committee on the Library I submit a report to accompany the bill (S. 8337) to create a legislative drafting bureau and to establish a legislative reference division of the Library of Congress (S. Rept. 1271). The bill has already been favorably reported. I ask to have the report printed. With the report I submit a copy of the hearings before the committee, which need not be reprinted.

The PRESIDENT pro tempore. The report will be received and printed.

Mr. ROOT. I give notice that on the 24th, at the first opportunity after the completion of the routine morning business, I shall ask the Senate to consider and act upon the bill, subject, of course, to conference reports and appropriation bills.

PHOSPHATE AND OIL LANDS IN IDAHO.

Mr. BORAH. I wish to ask unanimous consent to have a bill passed which was reported this morning favorably by the Committee on Public Lands. It is the bill (H. R. 26812) to provide for selection by the State of Idaho of phosphate and oil lands. I do not think any possible discussion will arise on the bill.

Mr. SMOOT. I will state that I just reported the bill from the Committee on Public Lands, and its provisions are exactly the same as those that have already been passed relative to a number of other States. I do not think the bill will lead to any discussion whatever.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM HOMMELSBERG.

Mr. JONES. From the Committee on Military Affairs, to which was referred the bill (H. R. 2839) for the relief of William Hommelsberg, I report the bill favorably without amendment, and I submit a report (No. 1270) thereon. I call the attention of the junior Senator from Michigan [Mr. TOWNSEND] to the report.

Mr. TOWNSEND. I ask unanimous consent for the present consideration of the bill. It is a short measure.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that in the administration of the pension laws William Hommelsberg shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of Company B, First Regiment United States Cavalry, on the 30th day of November, 1865, and that no pension, bounty, or allowances shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COL. WILLIAM C. GORGAS AND OTHERS.

Mr. DU PONT. From the Committee on Military Affairs I report favorably, without amendment, the joint resolution (H. J. Res. 365) to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador, and I ask unanimous consent for its present consideration.

Mr. OLIVER. I should like to hear again read the second proviso of the joint resolution with regard to the compensation.

The PRESIDENT pro tempore. The Secretary will read as requested.

The Secretary read as follows:

Provided, That the rate of compensation paid to said officers shall not exceed the rate paid to them or similar officers on the Isthmus of Panama in connection with the construction of the Panama Canal.

Mr. OLIVER. I move to strike out that proviso.

The PRESIDENT pro tempore. The Senator from Pennsylvania moves to amend the joint resolution in the manner which will be stated by the Secretary.

The SECRETARY. On page 1, line 11, it is proposed to strike out the following proviso:

Provided, That the rate of compensation paid to said officers shall not exceed the rate paid to them or similar officers on the Isthmus of Panama in connection with the construction of the Panama Canal.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time and passed.

ISAAC THOMPSON.

Mr. DIXON. From the Committee on Military Affairs I report back favorably, without amendment, the bill (H. R. 3957) for the relief of Isaac Thompson, and I submit a report (No. 1283) thereon. I call the attention of the Senator from New York [Mr. O'GORMAN] to the bill.

Mr. O'GORMAN. I ask unanimous consent for the present consideration of the bill

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that in the administration of the pension laws and the laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, Isaac Thompson, now a resident of Columbus, Franklin County, Ohio, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private in Company F, First Regiment Ohio Volunteer Cavalry, on the 26th day of February, 1865, and that no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISTRICT COURTS OF PENNSYLVANIA.

Mr. CLARK of Wyoming. From the Committee on the Judiciary I report back favorably, without amendment, the bill (S. 7802) to amend section 103 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, to which I ask the attention of the Senator from Pennsylvania.

Mr. PENROSE. This bill merely permits the district court of the middle district of Pennsylvania to sit in the town of Sunbury in addition to the other cities specified where the court shall sit. I ask unanimous consent for its present consideration.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 8556) to provide for the purchase of a site and the erection of a public building thereon at Honey Grove, Tex.;

A bill (S. 8557) for a public building and site at Orange, Tex.;

A bill (S. 8558) for a public building and site at Denton, Tex.;

A bill (S. 8559) for a public building site at Sweetwater, Tex.; and

A bill (S. 8560) to provide for a public building site at Memphis, Tex.; to the Committee on Public Buildings and Grounds.

By Mr. OLIVER:

A bill (S. 8561) for the relief of Mary L. Adair and others; to the Committee on Claims.

By Mr. CHAMBERLAIN:

A bill (S. 8562) granting an increase of pension to Sarah J. Burke; to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. MARTIN of Virginia submitted an amendment proposing to appropriate $5,000,000 for the construction of a memorial bridge across the Potomac River from Washington to the Arlington estate, Va., etc., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. McCUMBER submitted an amendment proposing to appropriate $1,200 to pay Robert W. Farrar for indexing and extra services as clerk to the Committee on Pensions, Sixty-second Congress, third session, and $1,200 to pay Dennis M. Kerr for services as assistant clerk by detail to the Committee on Pensions, Sixty-second Congress, third session, intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. POMERENE submitted an amendment proposing to appropriate $6,000 to enable the Interstate Commerce Commission to print and furnish to the States report form blanks and to reprint the proceedings of the National Association of Railway Commissioners in annual convention, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BROWN submitted an amendment proposing to appropriate $2,000 for grading, seeding, sodding, and the construction of new walks and curbing in and about the United States public building and grounds in the city of Beatrice, Nebr., intended to be proposed by him to the omnibus public buildings bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Public Buildings and Grounds.

Mr. CULLOM submitted an amendment proposing to appropriate $25,000 for the continuation of aeronautical investigations under the direction of the Smithsonian Institution, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. JONES submitted an amendment proposing to appropriate $100,000 for protecting the seal fisheries of Alaska, and so forth, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $225,000 for the purchase or construction of a steam vessel for use in connection with the fur-seal, salmon, and other fisheries of the Pacific coast, and equipment of the same, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CURTIS submitted an amendment providing that hereafter section 7 of the act of August 26, 1912, shall not apply to the payment, out of moneys appropriated or which may be hereafter appropriated in lump sum for the Department of Agriculture, for personal services of employees engaged in sci-

entific or technical work, and so forth, intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. PENROSE submitted an amendment relative to leaves of absence for employees of the postal service, and so forth, intended to be proposed by him to the Post Office appropriation bill, which was ordered to lie on the table and be printed.

Mr. JONES submitted an amendment proposing to appropriate $500,000 for the purchase of a site and the erection thereon of a public building to care for immigrants arriving at the city of Seattle, State of Washington, intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. NELSON submitted an amendment authorizing the Supreme Court of the District of Columbia to inquire into, hear, and determine the issues of law and fact pending between the Secretary of the Interior and the National Automatic Fire Alarm Co., of Washington, D. C., etc., intended to be proposed by him to the omnibus public buildings bill, which was referred to the Committee on Public Buildings and Grounds and ordered to be printed.

Mr. CURTIS submitted an amendment providing that after June 30, 1913, the first grade for clerks in first and second class post offices and carriers in the city-delivery service shall be abolished and that appointments shall be made to the second grade, etc., intended to be proposed by him to the Post Office appropriation bill, which was ordered to lie on the table and be printed.

PRESIDENT LINCOLN'S GETTYSBURG SPEECH.

Mr. ROOT submitted the following resolution (S. Res. 468), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Committee on the Library be, and it is hereby, directed to ascertain and determine upon the correct version of President Lincoln's Gettysburg speech and to report the same to the Senate.

JENNIE M. ALDRICH.

Mr. BURNHAM submitted the following resolution (S. Res. 469), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay out of the contingent fund of the Senate to Jennie M. Aldrich, widow of L. W. Aldrich, late a messenger of the Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

BUREAU OF MINES.

Mr. POINDEXTER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17260) to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, and 8, and agree to the same.

That the Senate recede from its amendment numbered 9.

MILES POINDEXTER,
GEORGE SUTHERLAND,
Managers on the part of the Senate.

M. D. FOSTER,
W. B. WILSON,
JOSEPH HOWELL,
Managers on the part of the House.

The report was agreed to.

SNAKE RIVER BRIDGE, WYOMING.

Mr. JONES submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3947) to provide for a bridge across Snake River, in Jackson Hole, Wyo., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"That the Secretary of the Interior is hereby authorized to use such portion of the reclamation fund, not to exceed $27,000, and in no event more than three-fourths of the sum that may be necessary for the construction of a bridge across Snake River, at a point in township 41 or 42 north, range 116 or 117 west, Wyoming, to be determined by the Reclamation Service, with the view of best serving the people of Jackson Hole and adjacent territory in Wyoming: *Provided*, That no part of the funds herein authorized to be used, except such as may be necessary for the making of examinations and estimates, shall be expended until the Secretary of the Interior shall have obtained, from the proper local authorities, satisfactory guaranties of the payment, by the said local authorities, of one-fourth of the cost of said bridge; and that the said local authorities assume full responsibility for and will at all times maintain and repair the said bridge and approaches thereto: *Provided further*, That the amount of the reclamation fund so used shall be charged as a part of the cost of the reclamation project or projects the construction and development of which have caused the necessity of such bridge."

And the House agree to the same.

W. L. JONES,
F. E. WARREN,
FRANCIS G. NEWLANDS,
Managers on the part of the Senate.

W. R. SMITH,
A. W. RUCKER,
M. P. KINKAID,
Managers on the part of the House.

The report was agreed to.

INDIANS OCCUPYING RAILROAD LANDS.

Mr. CURTIS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 5674) for the relief of Indians occupying railroad lands, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows: In lieu of the amendment proposed by the House insert the following: "Situated within the States of Arizona, New Mexico, or California"; and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 3, and agree to the same with an amendment as follows: In lieu of the amendment proposed by the House insert the following: "Within a period of three years after the approval of this act"; and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 4, and agree to the same with an amendment as follows: In lieu of the amendment proposed by the House insert the following: "And have patented to it other vacant nonmineral, nontimbered, surveyed public lands of equal area and value situated in the same State, as may be agreed upon by the Secretary of the Interior, provided that the total area of land that may be exchanged under the provisions of this act shall not exceed 3,000 acres in Arizona, 16,000 acres in New Mexico, and 5,000 acres in California"; and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 5, and agree to the same with an amendment as follows: Amend the title so as to read: "An act for the relief of Indians occupying railroad lands in Arizona, New Mexico, and California"; and the House agree to the same.

ROBERT J. GAMBLE,
CHARLES CURTIS,
W. J. STONE,
Managers on the part of the Senate.

JOHN H. STEPHENS,
CARL HAYDEN,
CHARLES H. BURKE,
Managers on the part of the House.

The report was agreed to.

Mr. CURTIS. I ask that the letter of the Secretary of the Interior explaining the amendments may be printed in the RECORD without reading.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The letter is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, January 29, 1913.

Hon. JOHN H. STEPHENS,
Chairman Committee on Indian Affairs,
House of Representatives.

SIR: The Indian Office has just brought to my attention the CONGRESSIONAL RECORD of January 6, page 1072, at which time Senate bill 5674, Sixty-second Congress, second session, which passed the Senate May 7, 1912, was under discussion by the House. Certain amendments were suggested to the bill as passed by the Senate, but a copy of the bill with the amendments suggested by the House is not now before me. It is noted, however, from the RECORD that the following was offered as an amendment, which was agreed to, the amendment being inserted in line 2, page 2, of the bill:

"And have patented to it other vacant nonmineral, nontimbered, surveyed public lands of equal area and value, situated in the same State, as may be agreed upon by the Secretary of the Interior: *Provided*, That the total area of the land that may be exchanged under provisions of this act shall not exceed 4,000 acres."

Field men of the Indian Office now in the city and those conversant with conditions affecting Indians living on lands granted to railroad companies within Arizona and New Mexico have pointed out that the limitation of 4,000 acres as fixed by the bill in its amended form is entirely inadequate.

By letter dated October 16, 1912, in a communication addressed to Hon. CARL HAYDEN, now a member of the Committee on Indian Affairs in the House, the department advised him that judging from the number of cases heretofore presented involving the railroad lands occupied by Indians the area affected by the bill under consideration would probably not exceed 1,500 or 2,000 acres. This information was based solely on the number of concrete cases which had been up to that time brought to the attention of the Indian Office, and was offered as a suggestion without first-hand knowledge of conditions in the field, and it was not presumed that the information therein contained would be used as a basis for fixing in the act any limitation on the area to be affected thereby should it become a law. As originally submitted to your committee by departmental letter dated February 24, 1912, the draft of a bill along the lines of that found in Senate bill 5674 did not specify any limited number of acres to be governed by its provisions, but left the matter open with a view of handling all cases where it could be shown that Indians have continuously, for a period of five years or longer, occupied lands granted to a railroad company so as to enable the Indians to receive the lands in allotment and satisfy the claims of the railroad company by relinquishment with selection of lieu lands elsewhere.

Under date of January 17, 1913, the supervisor in charge of unallotted Indians in northern California and western Oregon addressed the Indian Office as follows:

"SIR: I have the honor to inclose herewith copy of the bill S. 5674, as printed on page 1072 of the CONGRESSIONAL RECORD of January 6, 1913. Upon debate of this bill committee amendment was offered as follows:

"'Situated within the States of Arizona or New Mexico.'

"If not too late, I would request that this bill be amended to apply to lands situated within the State of California. There are Indians in that State who have resided for much longer than five years upon lands covered by the Central Pacific land grant. If something is not done in this line I fear that action may be taken to jeopardize the rights of Indians who have occupied these lands for many years, and in some cases made valuable improvements thereon.

"Very respectfully,

"HORACE G. WILSON, *Supervisor.*"

The original draft submitted to the Committees on Indian Affairs by this department did not limit the application of the bill to the States of Arizona and New Mexico, but after its passage by the Senate the bill was amended in the House so as to limit its application to the two States named, the amendment being inserted on page 1, line 6, after the word "lands." The Indian Office and the department would prefer to see the words "situated within the States of Arizona or New Mexico" eliminated from the bill, as it would make the legislation general and would enable this department to handle any case involving railroad lands occupied by Indians, regardless of the particular State in which such land might be located. Should your committee deem it essential, however, to limit the application of the bill to specific States, it is respectfully recommended that the bill be further amended by including therein the State of California.

It is not known at this time just how many Indians living within the States now known to be affected may be benefited by legislation authorizing allotment to them of lands granted to railroad companies which the Indians may have occupied for a period of five years or longer, but present information indicates that not more than 4,000 acres will be required for exchange in Arizona, while 20,000 acres each in New Mexico and California is suggested as an area that will probably meet the needs in those States. It would be preferable to have the bill fix no limitation on the number of acres, as it is impossible at this time to say with definiteness just what area may be involved, but if your committee feels it essential to place some limitation on the quantity of land to be governed by the provisions of the bill it should at least be changed to accord with the areas above named.

This department will be pleased if the matter, including the amendments suggested herein, can be given favorable consideration at an early date, as it is of great importance to a large number of Indians living on railroad lands in the Southwest.

Respectfully,

SAMUEL ADAMS,
Acting Secretary.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had, on February 20, 1913, approved and signed the following acts:

S. 186. An act for the relief of Francis Grinstead, alias Francis M. Grinstead;

S. 3873. An act for the relief of Lewis F. Walsh;

S. 4030. An act for the relief of Sylvester W. Barnes; and

S. 5262. An act for the relief of Sylvester G. Parker.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed without amendment the bill (S. 4681) to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 21220) to extend the power of the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23293) for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17260) to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

S. 1589. An act to authorize the exchange of conveyances between the Florida East Coast Railway Co. and the United States;

S. 8089. An act permitting the building of a railroad bridge across the Yellowstone River from a point on the east bank in section 15 to a point on the west bank in section 16, township 151 north, range 104 west of the fifth principal meridian, in McKenzie County, N. Dak.;

S. 8090. An act permitting the building of a railroad bridge across the Missouri River from a point on the east bank in section 14, Mountrail County, N. Dak., to a point on the west bank of said river in section 15, in McKenzie County, N. Dak., in township 152 north, range 93 west of the fifth principal meridian; and

H. R. 18787. An act relating to the limitation of the hours of daily service of laborers and mechanics employed upon public work of the United States and of the District of Columbia, and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia.

RIVER AND HARBOR BILL.

Mr. NELSON. Mr. President, I move that the Senate proceed to the consideration of House bill 28180, the river and harbor bill, on which I understand the Senator from Ohio [Mr. BURTON] desires to address the Senate.

Mr. BRADLEY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Kentucky?

Mr. NELSON. Certainly.

Mr. BRADLEY. By reason of the extreme necessities of the case I move that the Senate proceed to the consideration of Senate bill 3201.

The PRESIDENT pro tempore. The Senator from Kentucky asks unanimous consent for the present consideration of a bill, which will be read by title for the information of the Senate.

The SECRETARY. A bill (S. 3201) for the relief of Marion B. Patterson.

Mr. BRISTOW. Mr. President, I object to the consideration of that bill.

The PRESIDENT pro tempore. Objection is made. The Senator from Minnesota [Mr. NELSON] moves that the Senate proceed to the consideration of the river and harbor bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed consideration of the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other puposes.

Mr. BURTON. Mr. President, I desire to present some general considerations on this bill.

The PRESIDENT pro tempore. The Senator from Ohio will suspend a moment. The Chair has found it extremely difficult during the last two days to preserve order in the Senate, and he appeals this morning to Senators to observe the rules and to refrain from audible conversation in the Chamber.

Mr. STONE. Mr. President, I should like to ask the Senator from Minnesota whether he thinks he will conclude this bill to-day.

Mr. NELSON. I want to go on with the bill, and it is my intention to do so. I feel that it is important that I should go ahead with it because other appropriation bills are awaiting the passage of this bill.

Mr. STONE. I have no wish——

Mr. NELSON. But, of course, if Senators desire to speak I can not prevent them from doing so.

Mr. STONE. No; of course not.

Mr. NELSON. The Senator from Ohio [Mr. BURTON] desires to discuss the bill in general, but he waived his right yesterday and allowed the bill to proceed and the most of it to be disposed of, stating that he would make his remarks subsequently.

Mr. BURTON. Mr. President——

Mr. STONE. Mr. President, if the Senator from Ohio will allow me——

Mr. BURTON. I yield to the Senator from Missouri.

Mr. STONE. I wish to say that there are two items in this bill in which I feel a very special interest and upon which I desire to be heard by the Senate. For two days I have been suffering from a bronchial affection, among other things, which has made me so hoarse that I am scarcely able to speak. I wish to ask the Senator in charge of the bill whether he would consent to allow the provision upon page 52, from line 5 to line 23, inclusive, and the provision on page 55, from line 9 to line 23, inclusive, to go over until immediately after the morning business to-morrow.

Mr. NELSON. I do not feel warranted in putting the bill over for another day. Of course, the debate to-day may consume most of the day, and there will be no evening session, but other appropriation bills are waiting to be proceeded with, the Senators in charge of them having kindly given way to the river and harbor bill. Under those circumstances I do not feel that, in justice to those appropriation bills, I can consent to allowing the pending bill to go over until to-morrow.

Mr. CLARKE of Arkansas. I hope the Senator from Minnesota——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Arkansas?

Mr. BURTON. I yield to the Senator from Arkansas.

Mr. CLARKE of Arkansas. I hope the Senator from Minnesota will comply with the request of the Senator from Missouri. There is a disputed matter in the bill, which will be discussed more or less at length, and I believe, with the disposition that is manifested on both sides, that an arrangement can be made which will really shorten the time that will be devoted to that particular feature of the bill. It is rather fundamental in character, and one which, I think, is required to be thoroughly understood by the Senate before it can be intelligently passed upon. I really believe we shall make progress by complying with the request of the Senator from Missouri, since I know that it is made in good faith because of a disability with the character of which I am entirely familiar, and I believe that the liberal and fair character of the procedure here will justify the Senator from Minnesota in granting the request.

Mr. NELSON. I wish to say to the Senator that I understand the Senator from Ohio is going to make some extended remarks.

Mr. BURTON. I do not think I shall occupy more than an hour.

Mr. NELSON. The Senator from Nevada [Mr. NEWLANDS] is also anxious to make some remarks. I also intend to speak for a short time. Those speeches will probably take up most of the day, and before the day is over we shall know better where we are.

Mr. CLARKE of Arkansas. Even under that statement of the case, the Senator does not make much sacrifice in letting the matter in which the Senator from Missouri is interested go over until to-morrow morning.

Mr. NELSON. Can we get an agreement as to a time for voting on the bill to-morrow?

Mr. STONE. Oh, I am sure of that.

Mr. NELSON. At what time?

Mr. CLARKE of Arkansas. What time does the Senator from Missouri indicate?

Mr. NELSON. Can we take a vote by 2 o'clock?

Mr. STONE. Mr. President, of course, if the Senator is not disposed to accept the suggestion I am making in the kindest spirit, we shall have to go on and do the best we can. There is no disposition to procrastinate.

Mr. NELSON. I will say to the Senator that I have no disposition to crowd this matter. Let us go on with the bill and see what we can accomplish to-day, and then we shall know better what to do.

Mr. STONE. I should like to know as to this before we proceed, if I can know it. Senators must see that at the moment I am suffering from a rather severe disability, and I should like to go and receive some treatment; but if the matter is to go on I will stay, if the Senator is not disposed to be kindly or generous about it, which would be foreign to his usual course in such matters. I merely make the request. The Senator can turn it down if he wishes.

Mr. MARTIN of Virginia. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Virginia?

Mr. BURTON. Certainly; I yield to the Senator from Virginia.

Mr. MARTIN of Virginia. Mr. President, it seems to me that this matter ought to be disposed of, and disposed of now. There are just two items in this bill about which the Senator from Missouri is very much concerned. The Senator from Missouri is ill; his physician says he is not in condition, owing to a throat trouble for which he is receiving treatment, safely to proceed wth the discussion to-day, and I think it would be unprecedented in this body, or in any other body, to refuse to postpone the matter about which he wishes to be heard for a single day, in order to enable him to present his views to the Senate. Such action can not possibly retard the final disposition of the bill. The bill can be taken up, and consent might be obtained now that those two items be taken up to-morrow morning immediately after the completion of the morning business. I hope the Senator from Minnesota will see the real necessity for postponing those two items until to-morrow. As I have said, such action will not retard the bill, and it is a proper courtesy to be extended to the Senator from Missouri when he is not physically able to present his views to the Senate to-day. I hope that the Senator from Minnesota will consent that those two items may go over and be taken up immediately after the completion of the routine morning business to-morrow. The remainder of the bill can be completed to-day and all general remarks on the bill can be made to-day, and we can simply reserve these two items until the Senator from Missouri is able to present his views to the Senate.

Mr. STONE. Mr. President, I am going to make a request that the items I have indicated will not be considered to-day, but that they and the bill so far as not completed to-day will be taken up to-morrow morning, immediately after the routine morning business, and disposed of to-morrow.

Mr. CLARKE of Arkansas. By 5 o'clock.

Mr. BURTON. Mr. President, I wish to say, about fixing any specific hour, that, as regards those items, there will be discussion, and both sides will desire to be heard. I am adverse to having any specific hour named. If the whole bill is to be disposed of to-morrow——

Mr. STONE. Before adjournment to-morrow.

Mr. BURTON. "Before adjournment to-morrow" would be better.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Iowa?

Mr. BURTON. I yield to the Senator from Iowa.

Mr. CUMMINS. Mr. President, I am interested in the first subject suggested by the Senator from Missouri. It has not been debated at all. I would be perfectly willing that the vote should be fixed for the legislative day, but not for a particular hour, because I do not know—and no one can tell—to what the debate may lead. It has not yet been opened up.

Mr. SIMMONS. Does the Senator mean the legislative or the calendar day? He said "the legislative day."

Mr. CUMMINS. The legislative day.

Mr. SIMMONS. That might last for several days.

Mr. CUMMINS. I do not want to delay the disposition of this bill a minute. I have something to say about it. I will be as brief as possible in my observations, but I do not want to make them until after the Senator from Missouri has spoken, because he is vastly more familiar with the details of that particular subject than am I. I therefore hope that the unanimous-consent agreement, if one is asked, will not involve voting at a particular hour or during the calendar day, although I do not believe that the debate will go over the calendar day. I think it ought to be the legislative day.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. The Chair understands that the Senator from Missouri [Mr. STONE] has made a request for a unanimous-consent agreement, which the Secretary will read.

The SECRETARY. The Senator from Missouri [Mr. STONE] asks unanimous consent that the two items relative to Mississippi River improvements, one on page 52, beginning with line 5, which proposes to strike out all of lines 5 to 13 and insert the matter that is printed in the bill on the same page, in lines

14 to 23, both inclusive, and also the item, on page 55, relating to the Missouri River, be passed over, and that to-morrow they be taken up, after the routine morning business, and be disposed of to-morrow.

Mr. CUMMINS. May I ask, in a parliamentary way, whether that would not be the calendar day?

Mr. CULLOM. Of course.

The PRESIDENT pro tempore. Undoubtedly it would be.

Mr. CUMMINS. I ask the Senator from Missouri to change it so that it will be the legislative day.

Mr. STONE. I am perfectly willing.

Mr. WILLIAMS. I hope we shall not make any more unanimous-consent agreements about legislative days. We can drag on two or three days under such agreements. I should feel very much disposed to object to a request involving the legislative day.

Mr. CUMMINS. Of course, I am not making the request, and I believe we would get to a vote very much sooner without any agreement than with an agreement. I think a very few hours would finish the debate on this particular subject. But when you fix a set hour, one who wants to speak upon the subject does not know whether or not he will have an opportunity to do it; and until we have proceeded far enough with the debate to know that those who desire to speak upon it will have the opportunity to do so, I do not want a particular hour fixed for the votes.

The PRESIDENT pro tempore. Objection is made.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Nevada?

Mr. BURTON. Certainly.

Mr. NEWLANDS. I would suggest to the Senator from Minnesota that it is entirely safe to postpone until to-morrow the consideration of the items in which the Senator from Missouri is interested, because the general debate and the consideration of other amendments will doubtless take all of to-day. It seems to me we can easily adjust this matter by postponing the consideration of these items until to-morrow, without putting any limit whatever upon their disposition.

There is no disposition on the part of anyone, as I understand, to delay the bill; but there is a desire, particularly upon the part of those who are interested in the items presented by the Senator from Missouri, to have a full discussion regarding them.

Mr. WARREN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Wyoming?

Mr. BURTON. I yield to the Senator from Wyoming.

Mr. WARREN. I have only this to say: If we are going to conclude the business of this session, it is impossible to make any more unanimous-consent agreements for legislative days. I have no objection, if the chairman of the committee in charge of this bill has not, to its lying over; but the moment the floor is vacated we must follow it up with other important matters. We have half a dozen appropriation bills lying here now, any one of which can be taken up and proceeded with. We have, on an average, an appropriation bill for every day of the remainder of the session. There are other important matters. The Senator from Idaho has an important one. We can not give up the time necessary for unanimous-consent agreements to be continued a full week, like the last agreement for a legislative day.

Mr. WILLIAMS. Mr. President, I wish to submit a request for unanimous consent, with the permission of the Senator from Ohio.

Mr. BURTON. Certainly.

Mr. WILLIAMS. First, in explanation of it, I am certain that most if not all of to-day will be taken up with debate upon other matters. I ask unanimous consent that the two items referred to by the Senator from Missouri [Mr. STONE], when they are reached, be passed over and be taken up and proceeded with to-morrow immediately after the morning hour.

Mr. NELSON. Mr. President, I will agree to that.

Mr. CRAWFORD. That is fair.

Mr. NELSON. I will agree to it, with the understanding that we go on and consider the bill to-day and have remarks made upon it by those who desire to speak.

The PRESIDENT pro tempore. Is there objection to the request made by the Senator from Mississippi [Mr. WILLIAMS]? The Chair hears none, and it is so ordered. The Senator from Ohio has the floor.

Mr. NELSON. I should like to have the request read.

The PRESIDENT pro tempore. The unanimous-consent agreement will be read by the Secretary.

The SECRETARY. It is agreed, by unanimous consent, that as the amendments recommended by the committee on pages 52 and 55 (H. R. 28180), relative to Mississippi and Missouri River improvements are reached to-day (Thursday, February 20, 1913), they will be passed over, and that on Friday, February 21, 1913, immediately upon the conclusion of the routine morning business, the amendments indicated will be taken up and disposed of on that day.

Mr. BORAH. Mr. President——

Mr. CUMMINS and other Senators. That was not the unanimous-consent agreement.

Mr. WILLIAMS. That was not my request.

Mr. CUMMINS. That was a former request.

Mr. WILLIAMS. The request is right down to a point which I will indicate if it may be handed to me.

Mr. BURTON. If I may suggest, it is right down to the words "disposed of on that day."

Mr. WILLIAMS. I did not say anything about being "disposed of on that day." What I said was, "and shall then be proceeded with," so as to make it the special business.

Mr. NELSON. That is satisfactory; and we will go on with the rest of the bill and the speeches to-day. That is satisfactory.

The PRESIDENT pro tempore. The unanimous-consent agreement will be again stated.

The SECRETARY. Change the end of the agreement, as before given, to read "and their consideration proceeded with."

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. BURTON. Mr. President, I desire to present some general observations upon this bill and to criticize some of the specific items contained in it. The criticism rests especially upon the methods exemplified in this measure and upon some objectionable projects for which appropriations are made.

I may say in the beginning that it is very difficult to trace to anyone the blame for these conditions. I recognize the very patient work performed by the Committee on Rivers and Harbors of the House. Its chairman, especially, was untiring and faithful in the performance of his duties. The Senate committee also gave to this measure painstaking attention. But there is a pressure for river and harbor appropriations which it is almost impossible to resist. It is a part of the general extravagance in national, State, and municipal affairs which is now prevalent and which has been prevalent for many years.

The American people have been complaining of the high cost of living, and the pinch of that high cost is being felt in many if not nearly all homes. They fail to recognize that one reason for this added cost is the greater cost of government and the smaller degree of care and supervision which is given to public enterprises.

In a way we who are Senators and Representatives are compelled to yield to the demands of the people. It has been a matter of experience that if any project is brought here, however wasteful, however objectionable it may be, is sought to be included in a river and harbor bill, eventually it is almost certain that an appropriation will be secured. If delegations from chambers of commerce, if resolutions of State legislatures, can not accomplish what is desired, telegrams sent in at the last moment are sufficient to cause Members to yield.

So this evil, like every other one, must be traced to the ideals and demands of the people, to the fact that there is no general public opinion which supports economy in expenditures. Thus, while we have not unduly enlarged the amount appropriated for rivers and harbors, there has been a lack of care in methods and a more grievous lack of care in the selection of projects for which we appropriate.

I will repeat, briefly, the objections which I have made to prior river and harbor bills. In the first place, the policy of dribbling appropriations, which was noticeable in 1910, still survives in this bill, and it is a glaring objection to it. The very first item in the measure before us is an appropriation for Portland Harbor. It is a necessary and important improvement. It was strongly recommended by the Engineer Corps. The cost was estimated at $360,000, with a recommendation that the whole amount should be made available in one bill. What has been done? One hundred and fifty thousand dollars is appropriated; the remaining $210,000 is left to future Congresses.

If a single contract could be made for that work not only would there be a very great saving in expense—a saving which has been estimated to range from 10 to 30 per cent in continuing contracts—but the community would know that the work would be done, and those who intend to build docks and wharves or provide shipping would know precisely what to depend upon.

There is a still worse evil in these dribbling appropriations. A small amount is apportioned in a bill to a project and is adopted without scrutiny, when if the question were placed before us of appropriating the whole amount Congress very likely would reject it. Why, in a bill a couple of years ago

there was authorized an improvement to cost $1,050,000, made up of three locks and dams, each costing $350,000. Congress appropriated $100,000—not a sufficient amount to construct either one of those locks and dams; not sufficient even to begin the work properly. I believe if we had discussed here on the floor the question of appropriating a million and fifty thousand dollars for that project, it would have been rejected by a decided vote. This is but one illustration of the general method pursued in this and other bills. We can hardly claim that we are candid with the country or fair to each other when an improvement of considerable magnitude is presented here, and we appropriate but a fraction of the total amount required for it. If that project will cost $1,050,000, to use this illustration again, why not publish to the country what we are doing? Why not provide for the whole amount at one time, instead of allowing it to go forth that we have made an appropriation of $100,000, knowing that $950,000 must follow?

So, Mr. President, for these reasons, for economy, to secure assured results, to secure that degree of scrutiny and care which is necessary, it is desirable that the continuing contract system should be adopted. I do not know how many items there are in this bill. There are, perhaps, three or four hundred. I aver with the greatest of confidence that it would be far better to pick out half of the projects and finish them. Indeed, if there are two projects of equal merit, instead of having them going on side by side and scattering appropriations over years, why not complete one, and when you are through with that take up the other, and pursue the methods which are adopted in the business world, and which every consideration of good policy suggests we should pursue here?

I will call attention to an item which came to us from the House—a little improvement in the State of Maine, one of the first half dozen. The estimate to do the work was $17,000, and it was recommended by the Engineer Corps that the whole amount be made available at one time. There was no other practical way to do the necessary work. The bill comes to us with an item of $8,500, half the amount necessary for the proposed improvement. That satisfies the community; that gives gratification, perhaps, to the Congressman from the district; but it does not accomplish what is sought. It is not in line with the policy that the Government of the United States should approve or follow.

Still another item a little further on—a proposed improvement of the Bronx River, near to the city of New York, to cost $930,000—comes to us with a recommendation that the work be done under one appropriation or authorization, so that the contractors may get their plant together and prosecute it from start to finish. What is done in this bill? One hundred and thirty thousand dollars is appropriated, without any mention whatever of the remaining $800,000, leaving that to the uncertain action of future Congresses, and compelling a very large additional cost because of this partial provision. I might set forth similar illustrations everywhere in the bill.

There is one feature of this measure which I heartily commend. In the appropriations for maintenance, for the taking care of public works, in almost every instance the recommendation of the engineers has been followed. Indeed, as regards perhaps nineteen-twentieths of the bill it might just as well have been framed at the War Department and sent here. This leads to the conclusion that perhaps at some future time Congress may see fit to appropriate a lump sum of some millions, giving that to the control of the Corps of Engineers, and enabling them to spend it where it is necessary for the maintenance of public works.

That certainly has advantages over the presentation of a bill with hundreds of items where the amounts are scattered all over the country.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Nevada?

Mr. BURTON. Yes.

Mr. NEWLANDS. May I call the attention of the Senator from Ohio to the fact that I have an amendment pending providing for exactly what the Senator suggests may be desirable, the creation of an ample fund and the cooperation of the various services that relate to water and the cooperation of the various sovereigns affected, so that the jurisdiction and the powers and the moneys of all are united in a great work of river regulation and its promotion as instrumentalities of transportation? I shall hope to have the help of the Senator from Ohio in my effort to have that amendment put upon this bill.

Mr. BURTON. Mr. President, the reference that I made was to the cost of the maintenance of public works. I would not feel like going so far as to abdicate the functions of Congress relating to the selection of projects or relating to the general policy as to the amount to be expended. Perhaps at a later time I may make a few remarks on the bill of the Senator from Nevada, with which I am quite familiar. I know he has given a great deal of time and labor to it. But the central idea of his bill is to turn the whole subject over to the executive department, appropriating a lump sum for each year, and authorizing a commission or board to expend it as they choose. I should not feel like going so far.

Mr. NEWLANDS. I wish to call the attention of the Senator to the fact that the amendment provides that these plans shall be made through the cooperation of the services that are now working in a detached way in relation to our rivers, but that the plans must be approved by Congress. Of course those plans will involve a complete statement of each project and the amount necessary for the completion of that project and the installment amount that will be required during the session at which the report is made.

Mr. BURTON. I will go as far as anyone in any measure which shall secure the cooperation of the different bureaus and departments of the Government. I may, if I have time, make some reference to that subject later.

Mr. President, in making our appropriation for rivers and harbors we must recognize the changed conditions. A far greater share of the traffic of the country is now carried by the railroads than formerly. Let us take the case of the Mississippi River. Fifty years ago the lines of traffic were along that river. Freight was shipped from as far north as St. Louis, and even above, down to New Orleans, and supplies were obtained from the mouth upstream not only in the Mississippi Valley but along the Ohio River. After a time railways were constructed, which provided a new method by which traffic might be handled, some paralleling the stream and others crossing it at right angles. The general direction of traffic in that neighborhood was changed from north and south to east and west.

Then the proportion carried by the railroads has been constantly increasing. In 1871, 44 per cent of the freight shipped out of the city of St. Louis went by water. In the year 1900 that portion had dropped from 44 per cent to one-half of 1 per cent. So that the proportions in 1871 and 1909 were as 88 to 1.

Mr. President, it is useless to close our eyes to the fact that this shows that the methods of handling the traffic of the country have changed.

It is said that the reason for improving these streams is very largely the regulation of freight rates. I maintain that that is an erroneous policy. Waterways and railways alike are agencies for transportation. The question is which is the better way. The railways, built by private capital, cost money; the improvement of rivers and harbors costs money. In either case the amount expended is a charge upon the resources of the country.

The better way to regulate freight rates is by legislation, by the appointment of commissions, by the exercise of those functions which the different departments of the Government possess. Also, if the improvement of a waterway lowers freight rates in that locality, is it quite just to that greater area which is removed from that waterway? Whatever decrease must be made in charges on the railways paralleling the river or waterway must practically be made up by increased charges where waterway competition does not exist.

There has been much discussion in the German Empire on this subject, and much opposition has developed to the expenditure of the moneys of the Empire for the improvement of the River Rhine. The argument of the opposing party is that the valley of the Rhine already has a great advantage over all the rest of Germany. Eighty or ninety per cent of the manufacturing which requires heavy material is in that valley and near to the river. It is said to those in the valley: You have a great advantage already, and now by making appropriations for the Rhine we are increasing that advantage and increasing it at the expense of all the other portions of Germany.

Mr. President, within certain limits, I think it well to maintain waterways for the sake of regulating freight rates. I can not conceive of a time when the people of the country would be willing to abandon the Mississippi or the Ohio as arteries for the carrying of freight. These rivers are frequently useful also in times of congestion, when the demands upon other agencies for transportation are so great that they can not provide for the unusual demands. It is perfectly manifest, however, that you can not maintain a waterway merely for the sake of providing for emergencies, because no business will be profitable unless it can be comparatively continuous. But when you go beyond a reasonable check on high charges and extortions and make the central and guiding principle the regulation of freight rates you adopt an erroneous policy.

There are illustrations all over the country of appropriations for streams which were once most useful agencies of commerce but where now the commerce is practically nil. I beg the pardon of the Senator from Louisiana [Mr. FOSTER] for referring to one in his State. It is, however, the best illustration of this condition. I refer to the Red River. At the close of the Civil War there was a fleet gathered at Shreveport made up of most magnificent ships and suitable for carrying traffic on any river in the world. It was used for years after that for carrying to market the cotton and other products of the soil. We have expended close to $3,000,000 on that stream. But in the year 1910 what was its traffic? Leaving out timber and logs, which could be floated down the stream without improvement, the total traffic was 62 tons, and the official report gravely puts down one passenger. Sixty-two tons of traffic and one passenger! I will say for the satisfaction of the Senator from Louisiana that in the following year the traffic increased somewhat, so that the general freight, aside from logs and timber, was three or four thousand tons.

Mr. SHEPPARD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Texas?

Mr. BURTON. I do.

Mr. SHEPPARD. As a matter of fact, the Red River is not in a condition to be navigated.

Mr. BURTON. I fear, according to the statement which the Senator from Texas made, that it never can be put in a condition for navigation.

Mr. SHEPPARD. It is an injustice to say that no traffic is carried on the river now and that for that reason it ought not to be improved.

Mr. BURTON. Does the Senator from Texas maintain that it has deteriorated, after the $3,000,000 spent on improvements, from what it was in its natural state?

Mr. SHEPPARD. The $3,000,000 have not been expended in such a way as to improve it materially. It is an instance of the dribbling appropriations the Senator spoke of a while ago. We have appropriated only $100,000 or $200,000 a year, and the money has been almost wasted, so far as any results as to navigable condition are concerned.

Mr. BURTON. I can not agree with that conclusion. The money has been appropriated in a manner to produce the best results. The conclusive fact is that traffic conditions have changed. Before any considerable amount had been expended there was traffic—and great traffic—on this river, but now that $3,000,000 have been expended it has dropped so that it is practically nothing.

Take the Missouri River about the year 1857, before the expenditure of large sums of money on it. The railway trains carried their passengers to Jefferson City, and, I think, at one time, beyond; and from there they were carried by boat to Kansas City. It was the regular medium by which passengers were carried. But to-day, after more than $10,000,000 have been expended, the traffic has almost disappeared; it is mostly sand and gravel, which is carried a mile or so.

I have already referred to the Mississippi River above and below St. Louis, showing that this great city, the largest on the Mississippi River, formerly sent 44 per cent of its traffic by river, but now only one-half of 1 per cent.

It is not necessary for me to go into the question of the advantages of the railways. They have advantages which the waterways do not possess. They can reach any part of the country. Their field is the United States, so far as distribution is concerned. If an article of freight is shipped from New York, it can go by rail to any town of importance anywhere in the country, but if that freight is shipped by water it is limited to the wharfs and landings on that stream or its connecting waters. If you transfer it from water to rail transportation, the cost of transfer is usually so considerable that any saving in expense is entirely offset. Again, in the case of factories and warehouses, it is possible to construct railway switches to the very door. Thus the wider area of distribution, the greater ease of reaching the place where freight is consumed and from which it is shipped, have given an advantage to the railways which is inevitable. On the other hand, there have been means, which you may call artificial in their nature, such as lowering rates when there is water competition, by which the waterways have been driven out of business. So far as legislation can be enacted to prevent discrimination against river transportation, laws should be adopted by Congress.

The commission of which the Senator from North Carolina [Mr. SIMMONS] and myself were members reported a few years ago a bill which provided that where the rate was lowered on railways competing with waterways and was afterwards raised, they should be compelled to show that that lowering and subsequent raising was due to some cause other than an effort to eliminate competition. That bill became a law, and in some localities in the country it has brought very material benefits.

There is one other point in these bills to which I wish to call attention. This is the constant tendency to make them mere vehicles for appropriating money for the benefit of private property. The river and harbor bill every year should be confined most carefully to the one vital object of navigation, nor should any proposition be presented to us under the guise of an improvement for navigation which has as its ulterior purpose the preservation of property.

Perhaps in the discussion which may occur to-morrow I shall wish to say something about the levees on the Mississippi River. There is a dangerous tendency to appropriate large sums of money where the real object is not to benefit navigation but to improve the abutting property.

Mr. President, in this great developing country we must make provision for all uses of water and for its control; we must make provision for protection against floods; we must provide against the washing away of the soil by erosion or otherwise; we must provide for clarifying water so that it may not be a menace to health; we must provide for irrigation, where that is possible. We must take up the subject which I think is of pressing and, I may almost say, of supreme importance—the utilization of water power.

All these must be carried along together under one great comprehensive plan, in which expense shall be apportioned according to benefits. If the improvement benefits a city in its water supply or health conditions, that city should pay its share of the expense. If the improvement benefits navigation, the Federal Government should pay its share of the expense. If it prevents a farm from being washed away or overflowed, the farmer should pay his reasonable share of the expense. We shall never reach a just and rational policy until an apportionment is made in that manner.

People oftentimes complain, "Why have not larger appropriations been made?" Mr. President, it is because of the feeling on the part of so many that these appropriations were injudicious and that they were devoted to purposes which were not national in their scope. Once make this a great problem, in which Nation and State and municipality and private individual shall join, then I will cooperate with anyone in making liberal provision for the development of this country along the line of controlling rivers and utilizing them for beneficial purposes.

The policy prevailed from the year 1896 to 1909, during which time I had the honor of being connected with the Committee on Rivers and Harbors. We recognized that the improvement of many of these rivers would confer benefits which were problematical; that it was a question whether or not they would be beneficial. Numerous plans have been presented for taking up and improving all the rivers of the country under one comprehensive plan.

Mr. President, I fear it will be a long time before Congress will commit itself to this. One of the first things we should do is to adjust the relation of the waterways and the railways so that they may work in cooperation. Another thing is to try out this problem and see whether or not the improvement of a river is going to produce traffic; whether or not it is going to be a profitable expenditure of money.

I am perfectly willing to take the obloquy of having opposed a great many of these projects which I was satisfied could not be profitably undertaken. Congress should select a sufficient number for the purpose of navigation alone and study the results. As I said here three years ago, there are two projects in this country which will determine whether great inland waterways can be profitably improved on a large scale.

One is the barge canal from Lake Erie to the Hudson River and thence by the Hudson to the ocean. That has been undertaken by the State of New York at an expense originally computed to be $101,000,000. I regard that, Mr. President, as by far the most promising project on a large scale in the United States, because it connects the vast area of manufacturing and agricultural territory tributary to the Great Lakes with the eastern seaboard. It also gives a return route for the merchandise of New York City and for all the varied products that are landed on the seacoast to be transported into the interior. If that will not succeed, no great project can succeed. It is nearing completion, and we all feel a natural curiosity to know what measure of success it will attain.

The other most promising project in the country is the Ohio River, extending from Pittsburgh to its mouth, at Cairo, about 960 miles. At the head of that river are enormous supplies of coal, great manufactories of iron; also near its head are great quantities of sand and clay suitable for the manufacture of glass and of brick. Below is a great area, not only on the Ohio

River, but on the Mississippi as well, now only scantily supplied with those articles. On the lower portion farm products are raised, which are consumed on a great scale, and also many raw materials which can be manufactured in the upper portion.

A great deal of skepticism prevailed as to the adoption of this project when it was commenced. I myself shared the doubt whether this would prove a profitable investment. We have now commenced it and promised to finish it at an early day, however, and it is desirable to rush it to completion. Below Cairo, in the Mississippi, there is a depth of 9½ feet at all times, and above the mouth of the Ohio there is a depth of 8 feet up to St. Louis, with a contiguous territory which affords a splendid market for all the varied products of the upper river and its tributaries, the Monongahela and the Allegheny.

Until we have tried those two projects we are groping in the dark in improving other large streams which promise far less. Yet we are going ahead and appropriating money when we are wholly uncertain whether the result will be failure or success. I do not mean to say, however, that a moderate amount of navigation ought not to be provided for on all these larger streams; but if the plan is to improve them on a grand scale at the expense of tens of millions of dollars, I insist that we are taking a leap in the dark, without knowing whether or not our money will be wasted.

We are in the midst of a period of startling changes in our whole industrial life, especially as it relates to methods of transportation; and while I can not expect my voice will always be heard in opposition to these great projects which promise so little, I feel that I should be doing less than my duty to the Senate if I did not say here that adopting these projects at this time is a most dangerous policy until we at least know something more of the results which can be accomplished.

Mr. President, I wish to file as part of my remarks a copy of the report made by me from the Rivers and Harbors Committee of the other House in the year 1907, and to have it printed in the RECORD, as I do not want to detain the Senate by reading it.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Without objection, permission to do so is granted.

The report referred to is as follows:

RIVER AND HARBOR APPROPRIATION BILL.

Mr. BURTON of Ohio, from the Committee on Rivers and Harbors, submitted the following report (to accompany H. R. 24991):

The Committee on Rivers and Harbors, having had under consideration House bill 24991, files the same and respectfully reports thereon, recommending that the bill do pass.

The measure carries in cash appropriations $35,181,612 and in authorizations for expenditures under continuing contract appropriations which may hereafter be made a further sum of $48,634,526.

The following statement gives the amounts of appropriations and authorizations in recent river and harbor bills:

Year.	Cash.	Authorized.	Total.
1896	$12,659,550.00	$59,616,404.91	$72,275,954.91
1899	16,091,841.94	23,866,324.13	39,958,166.07
1902	26,771,442.00	38,336,160.00	65,107,602.00
1905	18,181,873.41	17,184,657.63	35,366,533.04
1907 (as reported by Committee on Rivers and Harbors)	35,181,612.00	48,634,526.00	83,816,138.00

The aggregate of appropriations and authorizations is larger than in any preceding river and harbor bill, although the act of June, 1896, contained a larger amount of authorizations. There are several distinctive features in this bill:

1. Provision is made for completion in a much larger proportion of the projects than in any preceding measure.

2. The total amount necessary to complete the unfinished improvements, which the committee regards as most important, is provided by appropriation or authorization if completion can reasonably be expected within four years from July 1, 1907. Also upon large projects, where the amount required to finish the work is necessarily indeterminate, such as in the three divisions of the Mississippi River, provision is made for an equal time.

3. New projects are not adopted unless provision is made for completion.

4. In the case of rivers and harbors of secondary importance a somewhat larger amount than in former acts is appropriated for a considerable number of the most promising improvements.

In providing for the completion of new projects a radical departure from former methods has been adopted by the committee. It has been thought best to undertake no new improvement unless the whole amount required for its completion, whether the project involves large or small expense, is appropriated or authorized. This policy has been followed with barely an exception. It is believed that the advantages of such a method are sufficiently obvious. Assured results will be obtained at an early date by the completion of the improvement. More substantial benefit will be conferred by selecting the most deserving projects and avoiding the scattering of appropriations. The expense for each improvement will be very much diminished, because work can be more advantageously and economically prosecuted if the whole amount necessary to complete is made available. It is also true as a practical fact that when the total expense is to be provided at one time more careful consideration will be given to a proposed improvement and the question of its adoption more intelligently considered. The rule has been followed that between two projects equally deserving it is better to complete one than to make partial appropriations for both.

Sixty-eight million seven hundred and seventeen thousand three hundred and ninety-eight dollars of the amounts included in the bill are for improvements of considerable magnitude already undertaken by the Government or for further improvements in connection therewith, where increased traffic requires additional facilities.

The following is a list of appropriations and authorizations of this kind in which a division is made into two classes: First, those aggregating $1,000,000 or more; second, those aggregating $200,000 or more, but less than $1,000,000:

First class—$1,000,000 or more.

	Cash.	Authorization continuing contract.
Harbor at Boston, 35-foot channel (to complete)	$500,000	$3,804,000
Harbor of New York, Ambrose channel (to complete)		1,148,510
Black Rock Harbor and Channel	1,000,000	1,000,000
Delaware River below Philadelphia (to complete)	895,000	500,000
Patapsco River and channel to Baltimore (to complete)	500,000	1,715,000
Channel from deep water in Hampton Roads to Norfolk	282,000	850,000
Savannah Harbor	300,000	700,000
Black Warrior, Warrior, and Tombigbee Rivers	350,000	1,842,000
Southwest Pass, Mississippi River, below New Orleans (to complete)	1,000,000	1,500,000
Galveston Harbor	300,000	700,000
Cleveland Harbor	223,000	900,000
Lock and Dam No. 26, Ohio River (to complete)	265,000	800,000
Ohio River, general improvement and completing unfinished work on locks and dams	1,458,966	1,500,000
St. Marys River at the Falls, additional lock and duplicate canal (to complete)	1,200,000	5,000,000
Detroit River, alternative channel (to complete)	2,000,000	4,670,950
Mississippi, from head of passes to mouth of Ohio River	3,000,000	6,000,000
Mississippi River, between Ohio and Missouri Rivers	250,000	750,000
Mississippi River, between the Missouri River and Minneapolis	500,000	1,560,000
Mouth of Columbia River, Wash. and Oreg. (to complete)	750,244	1,700,000
Total	14,774,210	36,670,460

Total of appropriations and authorizations, $51,444,670.

Second class—Appropriations and authorizations aggregating $200,000 or more, but less than $1,000,000.

	Cash.	Authorization continuing contract.
Massachusetts:		
New Bedford	$100,000	$200,000
Sandy Bay, harbor of refuge	100,000	100,000
Rhode Island: Newport (to complete)	85,000	165,900
Connecticut:		
New Haven breakwater	100,000	150,000
Bridgeport Harbor (to complete)	113,000	350,000
New York:		
Oswego Harbor	100,000	100,000
East River and Hell Gate	250,000	
Hudson River	250,000	
Buffalo Harbor	583,436	
New Jersey: Newark Bay and Passaic River to Newark	200,000	650,000
Pennsylvania:		
Monongahela River, Dam No. 5 (to complete)	250,042	500,000
Allegheny River, dam at Springdale, repairs (to complete)	200,000	
Washington, D. C.: Potomac River at Washington	258,000	
North Carolina: Cape Fear River at and below Wilmington	165,000	250,000
Georgia: Brunswick Harbor (to complete)	146,650	350,000
Florida:		
Biscayne Bay (conditional—to complete)	100,000	146,000
Key West	200,000	
Alabama:		
Mobile	200,000	360,000
Alabama River	200,000	
Mississippi: Pascagoula River	200,000	
Louisiana: Red River, Louisiana, Arkansas, Texas, and Oklahoma	250,000	
Texas:		
Sabine Pass	160,000	200,000
Aransas Pass and Bay	200,000	290,000
Galveston ship channel and Buffalo Bayou	200,000	200,000
Brazos River, from Old Washington to Waco	75,000	150,000
Trinity River	75,000	300,000
Arkansas: Ouachita and Black Rivers, Arkansas and Louisiana	140,780	200,000
Tennessee:		
Cumberland River, Tennessee and Kentucky above Nashville (to complete part recommended)	150,000	400,000
Tennessee River, Chattanooga, Tenn., to Riverton, Ala.	467,970	213,000
Kentucky: Kentucky River	100,000	420,000
Michigan:		
Ludington Harbor (to complete)	100,000	739,087
Detroit River (old project)	150,000	150,000
Wisconsin:		
Milwaukee Harbor (to complete)	200,000	392,000
Manitowoc Harbor (to complete)	100,000	276,000
Minnesota: Duluth, Minn., and Superior, Wis	525,000	
Illinois: Chicago Harbor (to complete)	250,000	
Missouri:		
Osage River (to complete)	78,000	160,000
Missouri River (general improvement)	300,000	
California:		
San Luis Obispo Harbor (to complete)	63,660	200,000
Oakland Harbor (to complete)	68,208	300,000

Second class—Appropriations and authorizations aggregating $200,000 or more, but less than $1,000,000—Continued.

	Cash.	Authorization continuing contract.
Oregon:		
Columbia River, between the foot of The Dalles Rapids and the head of Celilo Falls, Oreg. and Wash.	$100,000	$500,000
Columbia and Lower Willamette Rivers below Portland, Oreg.	300,000	
Washington: Grays Harbor and Bar entrance	200,000	400,000
Hawaiian Islands: Honolulu Harbor	200,000	200,000
Total	8,260,741	9,011,987

Total of appropriations and authorizations, $17,272,728.

Total of appropriations and authorizations, pending improvements, $200,000 to $1,000,000, inclusive	$17,272,728
Add total of appropriations or authorizations for pending improvements in amounts of $1,000,000 or more	51,444,670
Total	68,717,398

The following is a list of appropriations made for improvements which may be designated as new projects, although some of them are closely connected with or extensions of projects already adopted. For all of these an amount sufficient for completion has been appropriated or authorized:

Project.	Appropriations, cash.	Expenditures authorized, continuing contracts.
Maine:		
Cape Porpoise Harbor	$46,000	
Penobscot River	130,000	
Kennebec River	75,000	$200,000
Massachusetts:		
Beverly	38,500	
Dorchester Bay and Neponset River	125,233	
Connecticut: Norwalk and East and South Norwalk	63,500	
New York: Coney Island Channel	188,300	
New Jersey:		
Cold Spring Inlet, Cape May	311,000	900,000
Perriwig Bar, Delaware River, between Trenton and Bordentown	50,000	
Salem River	29,000	
Cohansey River	55,800	
Delaware:		
Broadkill River	33,330	
Maryland: Crisfield Harbor	37,707	
North Carolina: Meherrin River, from the mouth thereof to the town of Murfreesboro	6,000	
Florida:		
Fernandina	115,000	
Withlacoochee River	65,400	150,000
Alabama: Conecuh River	31,000	
Mississippi:		
Wolf and Jordan Rivers	30,000	
Big Sunflower	100,000	
Louisiana: Inland waterway	89,292	200,000
Texas:		
Intercoastal waterway	133,829	300,000
Sulphur River	36,000	
Tennessee: Caney Fork River	3,000	
Wisconsin: Two Rivers Harbor	90,000	
Alaska: St. Michael Canal	98,000	150,000
Hawaiian Islands: Hilo Harbor	200,000	200,000
Porto Rico: San Juan	157,500	600,000
Total	2,338,391	2,700,000

Total new projects, $5,038,391.

SUMMARY.

Total appropriations and authorizations for existing projects in amounts of $200,000 or more	$68,717,398
Total appropriations and authorizations for new projects	5,038,391
Total	73,755,789

The balance of $10,060,349 is made up of a variety of items, including $300,000, the usual appropriation for examinations and surveys; an emergency fund of $300,000; an appropriation of $190,000, part of which is conditional, for the survey of a deep waterway from St. Louis to the Gulf. This balance also includes appropriations for the maintenance and extension of various rivers and harbors, the amounts for which are not included in the above lists, including approximately 300 projects already under improvement, and upon which appropriations have heretofore been made.

In the discussion of the river and harbor bill of 1902 attention was called to a popular misapprehension to the effect that a very large amount of money was appropriated for rivers and creeks of trivial importance, and it was shown that the total amount appropriated in the act of that year for streams having a tonnage of less than 100,000 tons, or a traffic of a value less than $1,000,000, was $417,000.

It is impossible to make an accurate comparison of such appropriations in the act of 1902 with those recommended in this bill. Some streams on which no considerable traffic has yet developed are appropriated for, with the expectation that traffic may follow the improvement of these channels. The actual appropriations for the smaller streams already under improvement in which no considerable additions are contemplated are, however, approximately the same as in the bill of 1902, or somewhat less than half a million of dollars.

In many instances a comparison shows that the traffic upon this class of streams has greatly increased since 1902, while in other cases the amount has remained stationary or even diminished.

While doubts have been expressed of the propriety of improving waterways of mere local importance at national expense, it must be conceded that if there is a comparison between appropriations and benefits the provision made for many of them is as beneficial as any appropriations in the bill. In this list may be included, with the amount or value of traffic and the amount herein appropriated, the following:

Project.	Appropriation.	Annual tonnage carried.
Thames River, Conn	$30,000	446,004
Bronx River and East Chester, consolidated	29,000	387,368
Mantua Creek, N. J.	34,450	136,105
Raccoon Creek, N. J.	15,000	263,317
Smyrna River (Duck Creek), Del.	2,000	204,731
Nanticoke River, Del. and Md.	2,000	121,760
Neuse and Trent Rivers, N. C.	30,000	731,554
Waccamaw River, N. C. and S. C.	20,000	297,630
St. Johns River, Fla., above Jacksonville	25,000	269,610
White River, Ark.	30,000	100,083
French Broad and Little Pigeon Rivers, Tenn.	2,000	188,700
Petaluma Creek and Napa River, Cal.	23,239	404,983
Okanogan and Pend Oreille Rivers, Wash.	20,000	55,917

Liberal provision is made for the prosecution or completion of improvements in a considerable number of rivers or harbors of secondary importance, and in cases where satisfactory results are anticipated substantial additions have been made to the average of prior appropriations. Among improvements of this class are:

Project.	Appropriations, cash.	Expenditures authorized, continuing contracts.
Rhode Island: Pawtucket River (conditional)	$138,584	
Connecticut: Thames River	30,000	
New York:		
Bronx River and East Chester Creek	29,000	
Ogdensburg Harbor	75,000	
Delaware: Mispillion River	40,000	
Virginia: Rappahannock River	77,729	$90,000
South Carolina: Santee, Wateree, and Congaree Rivers and Estherville-Minim Creek Canal	150,000	
Georgia:		
Oconee, Altamaha, and Ocmulgee rivers	60,000	
Chattahoochee River, Ga. and Ala., below Columbus	150,000	
Florida:		
East Pass and Carabelle	60,000	
Apalachicola Bay	85,000	
Manatee River	70,710	
Louisiana: Bayou Teche	130,000	
Texas: Brazos River, from Velasco to Old Washington	75,000	
Tennessee: Tennessee River, above Chattanooga, and Little Tennessee River	105,000	
Michigan:		
Holland Harbor	138,452	
Grand River	88,000	
Wisconsin: Two Rivers Harbor	90,000	
Minnesota: Red River of the North, Minn. and N. Dak.	15,000	
California: Sacramento and Feather Rivers	50,000	
Washington: Columbia River and tributaries above the mouth of Snake River	120,000	

Mr. BURTON. I have asked for the insertion of this report, Mr. President, because in my judgment it sets forth the policy which should properly govern our river and harbor work. Several distinctive features marked the bill on which the report was made. In most of the appropriations provision was made for completion, but we could hardly expect to provide for the completion of a great project such as the Mississippi River in one bill. We did, however, provide for the completion of the improvement of New York Harbor, the great channel to the sea; Boston Harbor; Black Rock, the entrance to the barge canal; the Delaware River to Philadelphia; the Patapsco River below Baltimore; the channel to deep water from Hampton Roads for Norfolk; Savannah Harbor; the Southwest Pass of the Mississippi River for all the improvements that were then before us; Galveston Harbor, not entirely, but for substantial progress upon the improvement then contemplated; Cleveland Harbor; the Detroit River; and the locks in the St. Marys River—those were regarded as at the forefront—New York, Boston, New Orleans, Philadelphia, Baltimore, and the larger cities, together with these interior channels. These were selected from among all the improvements in the country.

When it was introduced in the House that bill carried the sum of $83,816,000 in appropriations, and the authorizations contained therein showed that the committee did not hesitate to recommend the expenditure of large amounts. They regarded it as perfectly proper to make the appropriations large, provided results were obtained.

New projects, as a rule, were not commenced unless there was a provision for their completion. Old projects of lesser importance were prosecuted to completion as nearly as that was feasible. I sincerely regret that since that time this policy has been succeeded by more numerous and scattered appropria-

tions, including almost every congressional district where there is a channel or harbor to improve, often commencing with one-tenth of the amount ultimately desired. I trust that, on further consideration of the subject, Congress may yet go back to that plan, which, after 10 years of labor, was judged to be the best method. It was by no means an easy task to stand up against all these varied demands throughout the United States; it was by no means easy to handle all the projects on the lists that had been before commenced and partially completed.

In referring to some injudicious appropriations which have been made from time to time, I have prepared a little statement. Mr. President, in which there is a comparison between the Missouri River on the one hand and the Delaware River on the other, showing that, approximately, an equal amount has been expended on the two rivers. The traffic on the one is 370,011 tons, of the value of $1,082,415; the traffic on the other is 27,260,019 tons, of the value of $1,218,016,813; showing that, with practically equal appropriations, the traffic on the Delaware is 74 times as great as that on the Missouri and its value is approximately 1,200 times as great. I have here also a comparison of the Red River with six other rivers, and I will ask the consent of the Senate to have these two statements printed in the RECORD.

The PRESIDING OFFICER. Without objection, permission to do so is granted.

The statements referred to are as follows:

Missouri River compared with the Delaware River, sea to Trenton, N. J.

MISSOURI RIVER.

To complete (and more)	$17,600,000
Expended	18,691,432
Appropriated	2,325,000
Traffic	370,011
Value	1,082,415

DELAWARE, SEA TO TRENTON.

To complete	8,120,000
Expended	17,188,000
Appropriated	1,884,000
Traffic	27,260,019
Value	1,218,016,813

Perhaps no comparison of the cost and results of improving streams is more surprising than a comparison of the Missouri and Delaware Rivers. The amounts already expended on these two rivers are approximately the same. It is estimated that it will cost about twice as much to finish the improvement of the Missouri as for the Delaware. The appropriation for the Missouri is somewhat in excess of that for the Delaware.

River.	To complete.	Expended.	Appropriated.	Traffic.	Value.
Red	.....	$3,115,377	$177,000	$51,762	$371,090
Penobscot	.....	506,300	.....	655,204	11,000,000
Mystic	.....	292,000	25,000	3,606,670	17,181,500
Pawtucket	.....	546,584	.....	508,025	6,380,722
Anacostia	$518,062	787,000	75,000	345,347	31,567,750
Sacramento and Feather	.....	1,092,000	.....	505,285	32,000,000
Combined	.....	3,223,884	100,000	5,620,531	98,029,972

The futility of trying to create commerce by the improvement of a river where commerce does not exist is nowhere better illustrated than by comparing the results on the Red River with those of six other rivers, the cost of improving which combined is substantially equal to the cost of improving the Red River. These rivers are the Penobscot, Mystic, Pawtucket, Anacostia, and Sacramento and Feather. The cost of the improvement in each instance is somewhat over $3,000,000. The traffic on the Red River, which is practically confined to the region of its mouth, was by the last report 51,762 tons, having a value of $371,190. The combined traffic of the rivers mentioned was 5,620,531 tons, having a value of $98,129,972. It will be seen that the combined traffic on the rivers mentioned was 108 times as great as that on the Red River and its value 264 times as great.

From this it would appear that one cent spent on the rivers named has produced far greater results than a dollar spent on the Red River.

Mr. BURTON. Generally speaking, Mr. President, improvement of harbors has brought far more salutary and profitable results than the improvement of rivers. Indeed, in looking over this bill I can find very little to criticize in the selection of harbors for improvement. Nearly all of them will develop a very considerable traffic and will make it possible to ship more profitably both abroad and to other portions of our country the products of the United States.

It is for the most part in the improvement of the rivers that we notice the waste. I want to call attention to-day to one line of appropriations for rivers where there has been an exceptional waste—that is, in the expenditures for locks and dams. According to the engineers' report the total expenditure on rivers and harbors for 27 years, from 1886 to 1912, inclusive, was $529,583,000. Of that amount there has been expended for the construction of locks and dams $112,349,000. In addition to this $102,870,000 is required to complete locks and dams now under way. Some of these have been extremely helpful, but they are exceptional in their nature. One which stands out in a class by itself is the lock and dam in St. Marys River between Lake Huron and Lake Superior. Through this lock is carried the iron ore from the mines of Minnesota and Wisconsin. A large quantity of grain also goes down, and also a very large quantity of coal is carried on the return trip. The total amount expended on this improvement to date is $12,932,822. A further amount of $4,950,000 is required.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. I do.

Mr. NELSON. The remarks of the Senator are extremely interesting, and I wish to ask him if he has the figures of the tonnage that passes through?

Mr. BURTON. Yes, I have; and I will give them in a moment.

Mr. NELSON. Very well.

Mr. BURTON. The tonnage that passed through that lock or those locks for the last year—for there are more than one—was 26,237,785 tons, a traffic far beyond that of the Suez Canal in volume, though, of course, not as great in value. The Canadian lock on the other or northerly side of the river gave passage, as I recall it, to an almost equal amount.

In order that I may not be misunderstood, I wish to say that it is very difficult to compare the Suez Canal with the St. Marys Canal, because at the latter the actual number of tons carried is counted, while at the Suez Canal it is the net tonnage of the boats going through upon which computation is made; but, after making allowance for any discrepancy or inaccuracy, the traffic through the canal in the St. Marys River is undoubtedly far greater than that through the Suez Canal.

What does this improvement illustrate? It illustrates that the most favorable place for the location of a canal, with or without locks and dams, is between two great bodies of water where there is a natural barrier between them, comparatively short in length or breadth, like an isthmus, by piercing which you can bring two great systems of waterways together. A most notable example is the Suez Canal, connecting the Mediterranean and the Red Seas and, of course, other waters; another example is the Panama Canal and also the canal at Corinth. If a judicious selection is made, that is a profitable kind of a canal to construct. Money expended by the Government in St. Marys River has been as useful as that invested in any river and harbor improvement since the formation of the Government.

There is another exceptional case; that is the Ohio River, which I have already mentioned. There is a traffic of about 12,000,000 tons every year on that river. Before the construction of locks and dams there was navigation for a varying period during the year, and the construction of locks and dams will make it possible to utilize the river during the entire year, except when it is closed by ice, for an average not to exceed two months during the year.

There is another river where locks and dams have been required, and that is the Monongahela. There an exceptional condition exists. That river, with the Allegheny, forms the Ohio River. Pittsburgh, with its environs, is perhaps the greatest center in the world for the manufacture of iron and steel, and for the purposes of that industry it is necessary to have a vast quantity of coal. Coal mines originally existed right down to the very edge of the stream. Now it is necessary to go inland for some distance to obtain coal, but they are able to carry that coal by water from the mines to the mills at Pittsburgh and to those on the Monongahela and near by on the Ohio at a cheaper rate of transportation than prevails for carrying coal anywhere else in the world. In a hearing some years ago before the Rivers and Harbors Committee of the House it was estimated that the total cost of carrying a ton of coal on this river to the mills was not more than 15 cents per ton, and, as a result, a traffic has been built up there which last year amounted to 10,740,040 tons.

The Big Kanawha is another illustration. There an expense of $4,233,000 has been incurred, and a traffic developed amounting to 1,392,000 tons last year. Of course, the results shown here are not nearly so great as in the other cases.

The Alleghany furnishes still another illustration. I think it is somewhat doubtful whether that project will develop such gratifying results as in the other cases. The traffic there is about the same in tonnage as on the Kanawha, or about one million three or four hundred thousand tons.

There is one river or bayou in the South which has been improved at very considerable expense—the Bayou Teche—which shows the effects of canalization. It has been canalized at an expense of about $400,000. There exists on it a traffic of about 800,000 tons of very valuable material.

Mr. President, I have shown thus far the bright side of the picture. But when you go beyond the improvements I have named it is very difficult to find a single case in the United States where in the construction of locks and dams the benefits have been commensurate with the cost. I want to call attention to one project which was, I am inclined to think, a heritage from previous Congresses of the day when most of us here first came to Washington, and that is the Illinois and Mississippi Canal in the State of Illinois.

Mr. NELSON. Mr. President, does the Senator mean what is called the Hennepin Canal?

Mr. BURTON. The Hennepin Canal; yes. Father Hennepin was a great and good man, but his name bears a grave responsibility in that this canal was called after him. When it was first projected Members of Congress were elected in Iowa and Illinois because of their advocacy of it. The men who argued the loudest for the Hennepin Canal won the favor of the people. They came here to Washington even after the canal was under way and showed how the grain of Iowa, the grain of Minnesota, and the grain of Illinois would be carried through the Hennepin Canal to Chicago and shipped out from that city. They did not stop short of saying that the prices of flour and of food would thereby be lowered in many States. We have expended in the original construction of that canal the sum of $7,646,746. The expenses of operation last year were $188,000, and the previous year they were $197,000. In this connection I want to say that the cost of the canals I have mentioned does not include annual maintenance charges. The annual cost of care and maintenance is paid out of the Treasury without any action by Congress under the act of 1884, which makes care and maintenance a charge directly by a warrant on the Treasury.

To revert to the Hennepin Canal, let us see what amount of tonnage they have there. I should almost like to ask the Senator from Iowa if any of the products of his State go through this canal; but whether they do or not, we used to be able——

Mr. KENYON. I will say to the Senator that I am sure they do not.

Mr. BURTON. Thank you. Now, let us see the result. What was the traffic on that whole canal? The original cost was $7,646,000, to which we must add a maintenance charge of about $190,000 a year. The traffic through it last year was 37,641 tons. The annual cost of maintenance, leaving out the interest on the original cost, is $5 a ton; more than enough, probably, to take the freight and ship it to New York City from any part of that region.

There is one illustration here that shows the real amount of freight traffic on that canal. At Lock No. 37 the passage of freight of a commercial nature was 50 tons up and 16 tons down, a total of 66 tons. The Government tonnage for maintenance was 4,286 tons up and 699 tons down. I suppose that was for carrying gravel and other material necessary for revetting and protecting the banks. For 62 tons of commercial traffic it was necessary to carry through that lock 4,985 tons of material, or 65 tons of material to 1 ton of commerce.

Mr. President, I think that is carrying to an extreme the policy of constructing locks and dams. Yet I am not sure that this case is any worse than some of the rest. Even when it required only about half a million dollars to complete the Hennepin Canal, after $7,000,000 had been expended, the Rivers and Harbors Committee of the House hesitated a long while as to whether or not they would finish the project. But it was thought that such a stupendous public work having been undertaken, and over $7,000,000 having been paid out, it would not be businesslike to leave it undone simply for $500,000. If it had come to us as an original proposition, however, I am quite sure we would not have recommended this $500,000.

Mr. KENYON. Is the Senator from Ohio also familiar with what is known as the Fever River project in northern Illinois, where a large sum of money was expended to make the Fever River navigable?

Mr. BURTON. The Fever River?

Mr. KENYON. It never has been navigable for anything except naphtha launches on moonlight evenings, so far as I am aware.

Mr. BURTON. I do not think that stream has been improved by the Government. The Senator does not mean the Galena River?

Mr. KENYON. Possibly it is the Galena River.

Mr. BURTON. Or the Rock River.

Mr. KENYON. I understand, however, it is the Fever River.

Mr. BURTON. Is it a tributary of the Illinois River?

Mr. KENYON. Yes.

Mr. BURTON. That is improved in connection with the Hennepin Canal, I take it.

At the Big Sandy River five locks and dams have been constructed at a cost of $1,700,000. The amount necessary to complete them would be $3,555,000, requiring in all 21 locks and dams. I congratulate the Senate that this item does not appear in this bill, and I believe it was not in the last bill. In the years along from 1899 to 1907 it was almost always the last item in controversy between the House and the Senate. In one or two instances it stood for hours in the way of agreement. Appropriations were demanded, however, until there was a total cost of $1,700,000, and five blocks were completed.

It was argued that this improvement would bring to market one of the finest coal supplies in the world. I may remark incidentally that several members of the Rivers and Harbors Committee received letters telling them that the purchase of coal lands on the Big Sandy or its tributaries would be an exceedingly profitable investment, as the Government was contemplating its improvement. While I am very sure none of the Members purchased, the project was advocated with a great deal of earnestness.

What was the result? Last year 545 tons of coal were carried on that river; and here is an excerpt from the engineers' report:

> So far the improvement is reached by one coal mine, which ships principally by rail. Few, if any, of the coal mines lie in such position that the coal can be readily placed on barges.

A survey was ordered last year; and it is quite likely that this old friend will appear again at some other time, but I trust no appropriation will be made for it.

The amount of traffic was materially greater on this river before a single lock or dam was built.

I might multiply indefinitely these instances of improvements by locks and dams. Several years ago I called attention to the Kentucky River as one of the very best object lessons on the subject. That river has been improved at a cost of $4,113,500, with a cost for operation of $2,204,000, since it was acquired by the Government and work undertaken—an aggregate of $6,317,500 expended on that river. In 1889 there were 5 dams, with a traffic of 435,595 tons. In 1909, with 11 dams, there was a traffic of 422,854 tons—that is, with 11 dams as against 5 dams 20 years before, the traffic dropped off 13,000 tons. In 1911, with 11 dams, there was a traffic of only 254,721 tons—a very large drop from 1909. In 1912 there was a still further decrease in traffic, from 254,721 tons to 209,249 tons.

Thus it would seem that with 12 dams as against 5 the traffic had been more than cut in two or had fallen to less than half; and if we may judge by the past, it is only a question of the construction of a few more dams when the traffic will have entirely disappeared.

Of this amount by far the greater share—in fact, nearly all the tonnage—is logs and timbers, in the handling of which, the Engineer Corps say, locks and dams are a detriment rather than an advantage—a detriment to the logs because the locks interfere with their free course; an injury to the locks and dams because there is constant danger of the logs colliding with them, or in some way injuring the machinery by running against it.

I might mention also the Green River in that State, the Barren River, and others in great variety.

The Black Warrior River has cost the Government about $7,327,795, with a further cost yet to complete it of $1,754,600—a total cost of about $9,000,000. That improvement, the canalizing of that river, has been advocated on the ground that it would bring the coal fields of northern Alabama to the Gulf; that at Mobile there is a great demand for coal, which must be brought by boat from other places, while in the upper reach of the river there are inexhaustible supplies. The improvement has been under way for nearly 20 years.

I regard that, Mr. President, as another experiment that may bring results unless some traffic can be developed in carrying that coal from the northerly end of the improvement to the southerly end. There is no similar small stream in the country the improvement of which will result in benefits anything like commensurate with the cost. As I stated, we have expended, or will expend, this $9,000,000, and I very much question whether this traffic will be developed. In the meantime the railways have been carrying the coal, I believe, for $1.25 from the headwaters of the river to New Orleans.

Another object lesson is to be found in the Tennessee River, in the lock and dam at Muscle Shoals, which is quite impressive. The cost of this improvement, which was under construction between 1875 and 1890, was $3,191,000. The cost of maintenance since that time has been $1,222,000—an aggregate of something over $4,400,000. The traffic going through that canal in 1910 was only 8,782 tons. The maintenance cost during that year was $44,069, or somewhat in excess of $5 for every ton carried. That, Mr. President, is a very violent application of

the theory that it is desirable to build locks and dams and canalize rivers for the regulation of railway freight rates.

In the case of a river and a competing railway, if that competing railway cost, say, $5,000,000, instead of canalizing the river at another expense of $5,000,000 would it not be better for the law-making power to regulate the rail rates and make them fair rather than to resort to that roundabout and wasteful method to accomplish a result that could be attained by a legislative body in a day?

There are two other streams to which I wish to refer. They are the Trinity and the Brazos Rivers, in the State of Texas.

Years ago a report was filed here regarding the canalization of the Trinity River for 511 miles, from the city of Dallas to the sea. The engineer's report—and he is really a very able man—sounded very much like the glowing prospectus of a real-estate dealer. He told of the magnificent resources in the northern part, at the head of the river, and of the timber and the stone along the central and southern portions which could be shipped up stream to northern Texas and Oklahoma. True, there was some scarcity of water, but he thought that could be amply provided for by digging artesian wells!

Congress has appropriated for that project the sum of $1,682,267. The original estimate of the cost was $4,600,000, and the dams were estimated to cost $85,000 apiece.

Mr. NELSON. There were to be 35 dams, if I may make the suggestion.

Mr. BURTON. I had understood it was 37. Was it 35?

Mr. NELSON. Thirty-five.

Mr. BURTON. It was estimated that they would cost $85,000 apiece. Not a single dam has been constructed but what has cost more than twice as much as this estimated figure. So that to complete this improvement, which the most sanguine man must say is a very doubtful experiment, would cost, in the long run, probably $10,000,000—that is, the total cost, including what we have already expended. And yet not a single dam has been put in use. Work has been done upon some six or seven of them. One has been completed; another has been practically completed; but it has been necessary to hold open the upper dam so that sewage from the city of Dallas may go through, and nobody knows whether or not there is going to be sufficient water in the upper portion of the river to supply the needs of navigation. Yet in every Congress pressure is exerted upon us for at least two more locks and dams on that river.

Mr. President, I think we should pause and examine that project. The original survey was but a reconnoissance. There were no sufficient borings. There was no sufficient examination of the quantity of water available. There were no sufficient measurements of the fall of the river. Yet we have gone on thus far with the work.

About the year 1905 the citizens of Dallas came here and said that if two or three locks and dams were built in the upper portion of the river these would make the river navigable to what is called the East Fork, 60 miles below Dallas, where an added supply of water is furnished by a tributary. They said that if we would go ahead and expend the money necessary for building those dams they would contribute to the project, and with a great deal of public spirit they did contribute, thereby showing their confidence in it. I think they contributed about $67,000. It was concluded that we would try that out and see whether with the improvement above the East Fork navigation could be provided. They claimed that with that the river would be navigable four months of the year and they could see whether or not it could be used.

But what has been done? Instead of confining attention to the upper section of 60 miles above the East Fork, dams are being scattered all along below that point, apparently with too much attention to providing one lock and dam for each congressional district.

Mr. NELSON. Mr. President, let me call the Senator's attention to the fact that in one river and harbor bill they skipped from the upper dam, to which the Senator has referred, down to Hurricane Shoals, over 200 miles away, and located a dam there. They had to build a railroad 15 miles from the dam to get material for building it; and that dam is costing, with the construction of that railroad and the other items, over $400,000.

Mr. BURTON. Yes. Mr. President, until we know the precise conditions, I think we might about as well locate these locks and dams on the bank of the river, as to put them in the stream. There never has been any accurate survey of the proposed improvements. Yet the provisions of the bill as they come to us are always "two additional locks and dams." They do not bother about finishing what is under way. One of these dams was 10 years in construction.

Mr. NELSON. Two of them.

Mr. BURTON. I stand corrected; that is right. Two of them have run on for practically 10 years without completion and without utilization. Throw away results, throw away assurance that it will do any good, but in every bill provide for two additional locks and dams on this river.

Mr. President, I most confidently aver that this and other projects should be reviewed. For example, by a Senate amendment we have provided in this bill for an instrumental survey in the Brazos River, which was recommended by the engineer officers years ago.

Again, the Brazos River does not show very much better prospects than the Trinity. I regret to say anything that can in any way be regarded as opposing the wishes of any State of the Union; but the people of the State of Texas know that wherever a project has been suggested that promised results I have stood for the most progressive policy, and for generous appropriations. But when it comes to this attempt to canalize these rivers when no man knows whether or not any good is to be accomplished when one of them stands to cost $10,000,000 before it is finished and the other probably $8,000,000, I must say that I feel like standing in the way, so far as I can, and at least uttering a note of warning that we are wasting public moneys without any prospect of securing adequate result, and without doing them one particle of good.

You can not even regulate freight rates by improving waterways unless you have water. You can not relieve congestion caused by sending unusual quantities of products to market unless you have a waterway through which you can carry those products.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. I do.

Mr. NELSON. The Senator must not forget that the engineer told us that they could pump the water right up from the Gulf of Mexico.

Mr. BURTON. He told us that. I am sure he meant that as an extreme bit of sarcasm such as we hear once in awhile. He said he had grave doubts about the water supply, and then added the engineers were told to make an instrumental survey and see whether this river could be utilized for transportation. They said we can pump water from the Gulf of Mexico. He did not think favorably of the artesian-well problem. He said that if artesian wells could be dug anywhere, the farmers in that locality needed water so much that they probably would put them on their own farms and restrict to a comparatively small area the supply that could be utilized by the Government.

Now, Mr. President, I think I have called the attention of the Senate to the worst forms of extravagance in our river and harbor appropriations. It is but a repetition for me to say what I have said on former occasions, that we should adopt the continuing-contract system in the case of both new and old improvements; that we should not undertake a project until we had the most adequate expert information in regard to it; that we should not undertake more than we can accomplish within a reasonable time. And that means to eliminate this dribbling policy of scattering appropriations all over the United States.

Again I wish to emphasize the statement that when anyone comes here with a great plan for the improvement of rivers, much as I may sympathize with it, we must recognize the experimental nature of many of these improvements.

I repeat what I have said. That does not mean you are going to abandon these great arteries. They can be used for certain purposes. But it does mean that before we go ahead and expend great sums upon them or take up all this great system of rivers we must know whether there is ever going to be any traffic upon them. Even if it is impossible to correct what seems to me to have been an error in the policy of Congress in the last two or three annual bills, I trust that we shall take up this great waterway problem and solve it in a way that will secure us against extravagance and injudicious policies and at the same time secure a maximum of benefit to the whole people.

Mr. NELSON. Mr. President, I desire to ask for a vote on the amendment on page 53. It was one of the amendments passed over last evening. I think there is no objection to it, and it is not included in the amendment that the Senator from Missouri called attention to. It is on page 53, commencing on line 6.

Mr. BURTON. That is the improvement at Minneapolis and St. Paul?

Mr. NELSON. Yes.

Mr. BURTON. I must say that I do not feel like opposing that, though I think it establishes a precedent that will come home to trouble us. It seems to me it is a stretch of Federal

power even for a person who has the most liberal ideas regarding the utilization of water power created in conjunction with works of navigation. It provides that those who rent it shall—

pay in addition an annual sum of 4 per cent upon such amount as the United States shall have invested and expended in the completion of the project by which such water power is developed and maintained over and above the amount actually expended and which would have been expended in completion of the project for navigation only.

I do not know but that I am intruding on the time of the Senator from Minnesota.

Mr. NELSON. Oh, no.

Mr. BURTON. That is virtually saying, then, that the Government shall spend $800,000 for the improvement of navigation and shall then add $400,000 to that.

Mr. NELSON. No; $600,000.

Mr. BURTON. Is $600,000 the last estimate?

Mr. NELSON. I mean the total cost is $640,000. That is what they pay 4 per cent on.

Mr. BURTON. That is, the Government in improving rivers for the purpose of navigation shall construct works sufficient for navigation, and then shall add on another $640,000, which conveys, of course, an indirect benefit to navigation, and then shall lease the power created to a private company for 4 per cent.

Mr. NELSON. It is not a private company. It is a public company.

Mr. BURTON. Well, private or public, in the result I fear it will make little difference, even though it is one of the best companies representing the city of Minneapolis, the city of St. Paul, and the State University of Minnesota. I most distinctly want to say that if the Senate adopts this amendment I do not wish to be bound by it as a precedent. Let it be understood that it rests on very exceptional circumstances, and is not to be accepted as declaring a general policy. I question the Federal power to do this, and it seems to me to be giving away valuable rights of the Government.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 53, after line 5, the Committee on Commerce report to insert:

The Secretary of War is hereby directed to make and enter into an agreement with the Municipal Electric Co., a public corporation organized and existing under the laws of the State of Minnesota, for the purpose of utilizing the hydroelectric power developed by the surplus waters not needed for navigation by the dam described and provided for in House Document No. 741, Sixty-first Congress, second session, as adopted by Congress in the act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 25, 1910. Such agreement shall provide that for the privileges secured thereby said corporation shall pay to the United States the fair and proportional cost of maintenance of said dam, lands, and appurtenant works, and also pay in addition an annual sum of 4 per cent upon such amount as the United States shall have invested and expended in the completion of the project by which such water power is developed and maintained over and above the amount actually expended and which would have been expended in completion of the project for navigation only: *Provided*, That no part of the cost of installation, transmission, or operation of the power plant shall be borne by the United States. Such amount shall be determined by the records in the office of the Chief of Engineers, and the said annual payments for rent and maintenance shall be made on or before the 2d day of January of each year, and the rent shall begin with the use of the power commercially by the said Municipal Electric Co., and not later than one year after said company has been notified by the Secretary of War that the water is available. The right shall be reserved to the United States and included in such contract for the United States to purchase and use such supply of said power as may be required for its own purposes on the same terms and conditions as the said power is sold or distributed to the members of said public corporation of the State of Minnesota: *Provided further*, That said corporation shall furnish free of charge to the United States such power as shall be deemed necessary, in the opinion of the Chief of Engineers, to properly operate and light such lock and dam and appurtenant works for the purposes of navigation. The right to alter, amend, or repeal is hereby expressly reserved.

Mr. KENYON. On agreeing to this amendment I will ask for the yeas and nays, but first I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Iowa makes the point of no quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Bourne	Cullom	Lea	Root
Bradley	Cummins	Lippitt	Sheppard
Brandegee	Curtis	Lodge	Shively
Bristow	Dillingham	McCumber	Simmons
Bryan	Dixon	Martine, N. J.	Smith, Ariz.
Burton	Foster	Myers	Smith, S. C.
Catron	Gallinger	Nelson	Smoot
Chamberlain	Gamble	Newlands	Swanson
Chilton	Gardner	O'Gorman	Thomas
Clapp	Gronna	Oliver	Thornton
Clark, Wyo.	Jackson	Overman	Tillman
Clarke, Ark.	Johnson, Me.	Percy	Warren
Crane	Jones	Perkins	Webb
Crawford	Kenyon	Pittman	Williams
Culberson	Kern	Pomerene	

The PRESIDENT pro tempore. On the call of the roll 59 Senators have answered to their names. A quorum of the Senate is present. The Senator from Iowa demands the yeas and nays on agreeing to the amendment of the committee.

Mr. THOMAS. Mr. President, before the amendment is submitted to a vote I desire to say something in opposition to it, because I think it involves to a very large extent the same conditions which were adopted by a majority of the Senate in the Connecticut River bill.

This amendment occupies two pages of the bill, pages 53 and 54.

The Secretary of War is hereby directed to make and enter into an agreement with the Municipal Electric Co., a public corporation organized and existing under the laws of the State of Minnesota, for the purpose of utilizing the hydroelectric power developed by the surplus waters not needed for navigation by the dam described and provided for in House Document No. 741, Sixty-first Congress, second session, as adopted by Congress in the act entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved June 25, 1910. Such agreement shall provide that for the privileges secured thereby said corporation shall pay to the United States the fair and proportional cost of maintenance of said dam, lands, and appurtenant works, and also pay in addition an annual sum of 4 per cent upon such amount as the United States shall have invested and expended in the completion of the project by which such water power is developed and maintained over and above the amount actually expended and which would have been expended in completion of the project for navigation only.

I have read enough to emphasize the principal objection I have to this amendment, which is that the Government is going to expend money, first, for navigation purposes, and next, for the improvement of the power in the stream for the benefit of the corporation which is mentioned in the amendment. I contended the other day that that was precisely what the Government really was providing for in the expenditure to be made by the corporation in that instance in the bill which we then had up for discussion.

The Senator from Ohio has just called attention and has emphasized the fact that on many of the locks and dams and much of the other improvements in the rivers of this country, which we carry on under the pretense and for the ostensible purpose of improving navigation or making the rivers more navigable, the money is really expended for the purpose of increasing and creating water power, which water power, of course, is intended to be utilized by private concerns for profit. I think that he established his contention most conclusively.

Here there is no pretense, as I read the amendment—and I may read it incorrectly—but that the Government proposes to expend a sum of money for a double purpose, one of which it has no jurisdiction over, no right to expend money for, and the other of which, of course, is within its province and authority. After the expenditure of this extra sum of money, the purpose is to authorize the Secretary of War to make a contract, the conditions of which are largely discretionary, with the Municipal Electric Co. for the use of this power, for which it is claimed the company is to pay the Government of the United States 4 per cent per annum upon the amount actually expended, and which would have been expended in the completion of the project for navigation only.

I think it was established beyond question in the debate over the other bill that the measure and the limit of the national authority over the streams of this country is found in the commerce clause of the Constitution, and that when it has exercised that authority to the extent to which it may do so its control ceases and its ownership of anything which may have been created by virtue of the improvement, whoever it may belong to, does not belong to the Government of the United States.

If the Government can in the case of the Mississippi River, under the guise of improving its navigability, expend $1,000,000 for that purpose, and at the same time expend another million for the purpose of improving water power, to be given or leased or sold to some one else, if you please, why may not that become and why will it not become one of the features of the river and harbor bills of the country? I am opposed to it. I do not think that the Senate should permit a measure of this kind to go upon the statute books. It is a bad precedent. It is one of which advantage will be taken, and, what is more, we have no right to expend public moneys for any such purpose. I therefore oppose this amendment on pages 53 and 54.

Mr. NELSON. Mr. President, it is not my purpose on this occasion, with reference to other measures pending, to enter into any academic discussion of the subject. I simply rise for the purpose of correcting some misapprehensions.

I think when the Senator from Colorado [Mr. THOMAS] understands this question fully he will see no objection to the

amendment. I will undertake to explain it in as brief a manner as possible.

First of all, I will take as my text, before I proceed, a part of a report which was made by me as chairman of a subcommittee to the full Committee on the Judiciary in reference to this water power. I take it as a preliminary text:

If for the purpose of improving the navigability of a stream carrying interstate commerce the Federal Government constructs and maintains a dam, with locks and gates, the Government has the undoubted right to establish and maintain, in connection with such dam, an electric-power plant for the purpose of furnishing motive power to operate such locks and gates. And the Federal Government has the right to sell, lease, or rent, for compensation, any surplus power that may arise from and be an incident to such an improvement of navigation.

In order that the Senate may fully understand this question, I will go on and state that the Mississippi River, after starting in Lake Itasca, flows down through the cities of St. Paul and Minneapolis. Those cities by land are about 10 miles apart, though the suburbs are fast getting close together. By the Mississippi River, from below the falls at Minneapolis down to about the center of St. Paul, the distance is between 12 and 13 miles.

The Mississippi River was originally improved for navigation purposes up to St. Paul, to what is called the Omaha Bridge. The Omaha Bridge is about the center of St. Paul.

The people of Minneapolis were very anxious to get navigation extended to the falls. As Senators well know it is one of the greatest wheat markets in the country and by all odds the greatest flour manufacturing town in the country. They were anxious to get water transportation so that they could ship flour and wheat down the Mississippi and distribute it among the towns along the river, and ship such of it as they might abroad.

The Minnesota River, a smaller stream, comes in from the west. The reach of the river from the Omaha Bridge up to the mouth of the Minnesota had a navigable depth at low-water stages of about 3½ feet and from the Minnesota River up to the falls from 2 to 2½ feet in its natural low-water state. The current above, as Senators know, is very swift and strong.

In 1894, pursuant to a Government survey that had been ordered, provision was made in the river and harbor act of that year for the building of two dams between St. Paul and Minneapolis, one 2 or 3 miles above the junction of the Minnesota River, I think, and the other 2 or 3 miles farther up. Dam No. 1, the lower one, was to have a lift of 13.3 feet. The upper dam, No. 2, was to have a lift of 13.8 feet. It was supposed when they got the two dams completed they would have a navigable channel of between 5 and 6 feet up to what is called the Washington Avenue Bridge in Minneapolis, right below the falls.

They worked under that plan and finally, in 1910, the Government engineers came to the conclusion that instead of having two dams in that reach of the river—only about 12 miles altogether—and two sets of locks, it was better to have only one, and have that higher. Senators will perceive, if you add the lift of each dam, one 13.3 feet and the other 13.8 feet, it makes a total lift of about 27 feet.

The Government in 1910 concluded to abandon one of those dams and complete the other one and make it 30 feet high. They did it for two reasons: First, it was to give a navigable channel of from 8 to 9 feet and raise a pool of water for the permanent purpose of furnishing electric power to run the gates and locks. The two smaller dams that were first planned did not have sufficent power for any purpose, and the Government engineers, after clear and careful deliberation, came to the conclusion, as I said, in 1910, to substitute one dam; that is, to take one of the smaller dams and make it a 30-foot dam. They are at work. That work is pretty nearly finished. It is expected to be finished, I think, during the present year, or nearly so. It is nearly all finished.

Now, a water power is being created incidental to this dam and, while it was built primarily for navigation, the two great cities and our State university were anxious to prevent that water power from falling into the hands of a monopoly.

There was an electric company there. A man by the name of Harries, from this city, is at the head of it. It is a General Electric company. They offered the Government, and the report shows it, $500,000 to get control of this power. Our people at St. Paul and Minneapolis and our State university, which is situated between the two, were anxious that this power plant should not fall into the hands of a monopoly. They came down here two years ago and said, "We would like to rent this surplus water power for the use of the two cities and the State university." I will say, incidentally, that the population of those cities and their suburbs is perhaps to-day over 600,000, a full quarter of the population of the entire State. We have a State university near the banks of the river in the suburbs of Minneapolis on the east side that has between 6,000 and 7,000 students. It has an agricultural school appurtenant to it, with about 1,200 students; it has a medical department and a law department, and is in all respects a full-fledged university.

As I said, two years ago representatives of the cities and the university came down here to see me about this matter. They were afraid that this private electric company would get control over it. I said to them, "There is no authority for your cities to lease this power. Go to work and get authority from your legislature and get incorporated as a municipal corporation for the purpose of getting this benefit for your State university and for the two cities."

So, Mr. President, pursuant to my suggestion and my interest in it, the Government was building the dam, and it was nearly completed. My interest was to get as much benefit as possible for those two large cities and for our State university. In 1911 our State legislature passed the law from which I shall presently read. Before doing so, however, I wish to say that under our State constitution private corporations can not be created by special act, but must be created under a general law. The general law that authorized the creation of this corporation is framed, however, in such a way that it does not fit anything but this particular case. It is not very long, and I will read it to the Senate to show how well the matter is guarded:

CHAPTER 141—S. F. NO. 496.

An act to authorize the formation of public corporations, under certain circumstances, in order to secure and provide electrical energy, at approximate cost, for cities and any State institution—

That refers to the university—

in any such city.

Be it enacted by the Legislature of the State of Minnesota:

FORMATION OF PUBLIC CORPORATIONS FOR DEVELOPMENT OF WATER POWER.

SECTION 1. Any city—

Now, listen to the language, and you who have been in the locus in quo will see how it fits:

Any city situated upon a river where there may be secured a developed water power conveniently near for utilization in the creation and development of electrical energy to supply such city and any State institution therein—

That is, the university—

with such energy at approximate cost, either alone or in conjunction with an adjacent city—

That is, St. Paul—

may do so through a public corporation, formed at its request, as hereinafter provided.

ONE CITY MAY UNITE WITH ANOTHER.

SEC. 2. Any such city which may desire to avail itself of the provisions of this act shall proceed as follows:

If there is another city—

And there are two of them, called the Twin Cities—

If there is another city adjacent thereto, it shall be invited, by resolution of the legislative branch of the city first mentioned, to unite with the latter in securing the organization of such public corporation. If such adjacent city within 30 days thereafter shall, by resolution, accept such invitation, said city shall, by further resolution of their respective legislative bodies, declare their desire to so secure such water power and to have organized under this act a public corporation therefor, and shall, by the same resolution, request the respective mayors or other executive heads (by whatever name known) of said cities and the president or other executive head of the governing or managing board of any State institution—

Referring again to the State university—

(or of the senior State institution, if more than one), in such cities, to proceed to form such corporation under this act.

Then it provides what steps shall be taken by one of the cities. I do not want to go into that.

Section 3 is as follows:

OFFICIALS TO MEET UPON CALL OF MAYOR.

SEC. 3. The officials designated shall meet upon the call of the mayor (of the larger of the cities if more than one) at his office—

That would be at Minneapolis, because it is the larger of the two cities—

and shall proceed to organize themselves into a public corporation under some appropriate name for the objects and purposes stated in section 1, and shall unite in a certificate which shall state the name and objects of the corporation, the fact that it is organized under this act, and that the members of the corporation shall be themselves, during their respective terms of office, and their respective successors in such offices. Such certificate shall be recorded in the office of the secretary of state.

Section 4 provides for the election of officers and the adoption of by-laws for the government of the corporation.

Section 5 reads as follows:

AUTHORIZED TO ACQUIRE AND DEVELOP WATER POWER.

SEC. 5. Such public corporation, when organized, shall be authorized and empowered to acquire by lease or otherwise any developed water power within or near the corporate limits of the cities whose officers are, ex officio, members of such corporation; to acquire all necessary lands, rights, and privileges, and to provide itself with a suitable hydro-electric plant, fully equipped with auxiliary power plant necessary to utilize economically said water power, and with the necessary means of distribution of the electrical energy therefrom.

The next section prescribes how the electrical energy shall be distributed. It is as follows:

DISPOSITION OF ELECTRICAL ENERGY.

SEC. 6. The electrical energy so developed shall be disposed of as follows: First, to the grantor—

That is, the United States—

from whom the water power is acquired if the contract therefor so provides; second, to any State institution in such city—

That would be our State university—

or cities desiring the same; and, third, any surplus then remaining in equal shares, to the cities whose officers are members of the corporation, if more than one, otherwise the whole to the single city.

I call especial attention to section 7, because it shows how the charges which can be made are limited. It contains a limitation, and a very wholesome one, to the end that the people of those cities, the municipalities and the State university, may get into court. Let me read that section:

SAME RATE TO ALL PATRONS.

SEC. 7. The same rate shall be charged by the corporation to all users of electrical energy so supplied, whether the user is the grantor of the water power, a State institution, or a city, and that rate shall be sufficient to pay and cover the cost of operation, maintenance, interest charges, and the retirement of any indebtedness, and to provide for the renewal of the plant and for a reasonable emergency fund, and no more.

There are the emphatic words. The corporation can not charge any more than what is necessary for the purposes stated.

I have here a certified copy of the certificate of incorporation, which I shall read, and I beg Senators to listen to it. As Senators will have perceived from the reading of the act, while on its face it is a general law, and it could not be anything else under our State constitution, yet its phraseology is so framed that it could not very well fit anything but the two cities of St. Paul and Minneapolis and our State university. I will now read the certificate of incorporation:

CERTIFICATE OF INCORPORATION.

The cities of Minneapolis and St. Paul, Minn., having by resolutions of their respective legislative bodies duly expressed and declared their desire and election in accordance with the provisions of chapter 141, laws of 1911—

That is the law I have just read—

to secure for said cities and the University of Minnesota, located in said city of Minneapolis, the benefits of any water power now developed or which may hereafter be developed within or near the corporate limits of said cities, and having by said resolutions expressed their desire and election to have a public corporation organized in accordance with the provisions of said chapter 141, laws of 1911, for the purpose of acquiring any such water power and for the purpose of utilizing said water power in the creation and development of electrical energy to supply said cities and the said University of Minnesota with electrical energy at approximate cost.

Now therefore John Lind—

I presume many Senators know him for he has been governor of our State and a Representative in Congress—

Now therefore John Lind, the president of the board of regents of the University of the State of Minnesota; James C. Haynes, the mayor of the city of Minneapolis, Minn.; and Herbert P. Keller, the mayor of the city of St. Paul, Minn., in accordance with the request of the legislative bodies of said cities and pursuant to chapter 141 of the laws of 1911, being "An act to authorize the formation of public corporations under certain circumstances in order to secure and provide electrical energy at approximate cost for cities and any State institution in any such city," approved April 13, 1911, and for the purpose of forming such corporation, do hereby certify as follows:

1. The name of the corporation—

The name, no doubt, may seem suspicious to some—"the Municipal Electric Co." You would probably have no idea that it was the two cities of Minneapolis and St. Paul and the State university which composed that public corporation. Many of you, no doubt, supposed it was a private corporation—

1. The name of the corporation shall be "Municipal Electric Co.," and its principal place of business shall be at the University of Minnesota.

2. The objects of this corporation and the general nature of its business shall be to acquire by lease or otherwise any developed water power within or near the corporate limits of Minneapolis or St. Paul, or either of them, and from said water power to develop electrical energy, and to distribute the electrical energy so developed to any Federal institution and to any State institution within said cities, or either of them, and to the cities of Minneapolis and St. Paul, and to that end and for that purpose to acquire all necessary lands, rights, and privileges, and to provide itself with the necessary electric plant or plants and with the necessary means of distribution of electrical energy, and to do all things necessary to carry out the purpose and object above expressed and to that end to perform all and singular the powers and duties granted and described in and by chapter 141 of laws 1911.

3. The members of this corporation shall be John Lind, the president of the board of regents of the University of Minnesota; James C. Haynes, the mayor of the city of Minneapolis, Minn.; and Herbert P. Keller, the mayor of the city of St. Paul, Minn., during their respective terms of office as such president of the board of regents of the University of Minnesota, and such mayors of said cities and their respective successors in such offices.

Whoever are the mayors of those two cities for the time being and whoever is the president of the board of regents of our State university constitute the corporation.

I need not read the remainder of the certificate, but I shall ask to have the statutes from which I quoted, together with the certificate of incorporation, printed entire in the RECORD. It is signed by John Lind, president of the board of regents of the University of Minnesota; James C. Haynes, mayor of the city of Minneapolis; and Herbert P. Keller, mayor of the city of St. Paul, Minn.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). Permission to do so will be granted, in the absence of objection.

The papers referred to are as follows:

CHAPTER 141—S. F. NO. 496.

An act to authorize the formation of public corporations, under certain circumstances, in order to secure and provide electrical energy at approximate cost for cities and any State institution in any such city.

Be it enacted by the Legislature of the State of Minnesota:

FORMATION OF PUBLIC CORPORATIONS FOR DEVELOPMENT OF WATER POWER.

SECTION 1. Any city situated upon a river where there may be secured a developed water power conveniently near for utilization in the creation and development of electrical energy to supply such city and any State institution therein with such energy at approximate cost, either alone or in conjunction with an adjacent city, may do so through a public corporation formed at its request as hereinafter provided.

ONE CITY MAY UNITE WITH ANOTHER.

SEC. 2. Any such city which may desire to avail itself of the provisions of this act shall proceed as follows:

If there is another city adjacent thereto, it shall be invited by resolution of the legislative branch of the city first mentioned to unite with the latter in securing the organization of such public corporation. If such adjacent city within 30 days thereafter shall, by resolution, accept such invitation, said city shall, by further resolution of their respective legislative bodies, declare their desire to so secure such water power and to have organized under this act a public corporation therefor, and shall, by the same resolution, request the respective mayors, or other executive heads (by whatever name known) of said cities, and the president or other executive head of the governing or managing board of any State institution (or of the senior State institution if more than one) in such cities to proceed to form such corporation under this act.

If there is no adjacent city, or if there is one and it fails or refuses to unite in the adoption of such resolutions within 30 days, the legislative body of the city which may desire to avail itself of the provisions of this act shall, by resolution, request its mayor or other executive head, its city engineer or the head of its engineering department (if known by any other name), and the president or other executive head of the governing or managing board of any State institution (or of the senior institution if more than one) within such city to proceed to form such a corporation under this act.

OFFICIALS TO MEET UPON CALL OF MAYOR.

SEC. 3. The officials designated shall meet upon the call of the mayor (of the larger of the cities if more than one) at his office, and shall proceed to organize themselves into a public corporation under some appropriate name for the objects and purposes stated in section 1, and shall unite in a certificate which shall state the name and objects of the corporation, the fact that it is organized under this act, and that the members of the corporation shall be themselves during their respective terms of office and their respective successors in such offices. Such certificate shall be recorded in the office of the secretary of state.

CORPORATION TO ELECT OFFICERS AND EMPLOY A MANAGER.

SEC. 4. Such corporation, when organized, shall provide for and elect such officers as it may designate, and may employ a manager and such other agents and servants as may be necessary for the corporate business, and may adopt such rules, regulations, and by-laws for the government of the corporation and of its employees as may seem best; but the members of such corporation shall receive no pay or compensation as such members or as officers, but may have their actual expenses.

AUTHORIZED TO ACQUIRE AND DEVELOP WATER POWER.

SEC. 5. Such public corporation, when organized, shall be authorized and empowered to acquire by lease or otherwise any developed water power within or near the corporate limits of the cities whose officers are ex officio members of such corporation; to acquire all necessary lands, rights, and privileges; and to provide itself with a suitable hydroelectric plant, fully equipped with auxiliary power plant necessary to utilize economically said water power, and with the necessary means of distribution of the electrical energy therefrom.

DISPOSITION OF ELECTRICAL ENERGY.

SEC. 6. The electrical energy, so developed, shall be disposed of as follows: First, to the grantor from whom the water power is acquired, if the contract therefor so provides; second, to any State institution in such city or cities desiring the same; and third, any surplus then remaining, in equal shares, to the cities whose officers are members of the corporation, if more than one, otherwise the whole to the single city.

SAME RATE TO ALL PATRONS.

SEC. 7. The same rate shall be charged by the corporation to all users of electrical energy so supplied, whether the user is the grantor of the water power, a State institution, or a city, and that rate shall be sufficient to pay and cover the cost of operation, maintenance, interest charges, and the retirement of any indebtedness, and to provide for the renewal of the plant and for a reasonable emergency fund, and no more.

ISSUANCE OF BONDS.

SEC. 8. Such corporation shall likewise be authorized to raise money by the sale of its bonds or certificates of indebtedness to carry out the objects and purposes of the corporation, and the indebtedness evidenced thereby shall be a lien upon all the property, rights, and franchises of the corporation.

Approved, April 13, 1911.

CERTIFICATE OF INCORPORATION.

The cities of Minneapolis and St. Paul, Minn., having by resolutions of their respective legislative bodies duly expressed and declared their desire and election in accordance with the provisions of chapter 141, Laws of 1911, to secure for said cities and the University of Minnesota, located in said city of Minneapolis, the benefits of any water power now developed, or which may hereafter be developed within or near the

corporate limits of said cities, and having by said resolutions expressed their desire and election to have a public corporation organized in accordance with the provisions of said chapter 141, Laws of 1911, for the purpose of acquiring any such water power and for the purpose of utilizing said water power in the creation and development of electrical energy to supply said cities and the said University of Minnesota with electrical energy at approximate cost.

Now, therefore, John Lind, the president of the board of regents of the university, of the State of Minnesota; James C. Haynes, the mayor of the city of Minneapolis, Minn.; and Herbert P. Keller, the mayor of the city of St. Paul, Minn., in accordance with the request of the legislative bodies of said cities, and pursuant to chapter 141, laws of 1911, being "An act to authorize the formation of public corporations under certain circumstances in order to secure and provide electrical energy at approximate cost for cities and any State institution in any such city," approved April 13, 1911, and for the purpose of forming such corporation, do hereby certify as follows:

1. The name of the corporation shall be "Municipal Electric Co." and its principal place of business shall be at the University of Minnesota.

2. The objects of this corporation and the general nature of its business shall be to acquire by lease or otherwise any developed water power within or near the corporate limits of Minneapolis or St. Paul, or either of them, and from said water power to develop electrical energy and to distribute the electrical energy so developed to any Federal institution and to any State institution within said cities, or either of them, and to the cities of Minneapolis and St. Paul, and to that end and for that purpose to acquire all necessary lands, rights, and privileges and to provide itself with the necessary electric plant or plants and with the necessary means of distribution of electrical energy, and to do all things necessary to carry out the purpose and object above expressed, and to that end to perform all and singular the powers and duties granted and described in and by chapter 141 of laws of 1911.

3. The members of this corporation shall be John Lind, the president of the board of regents of the University of Minnesota; James C. Haynes, the mayor of the city of Minneapolis, Minn.; and Herbert P. Keller, the mayor of the city of St. Paul, Minn., during their respective terms of office as such president of the board of regents of the University of Minnesota, and such mayors of said cities, and their respective successors in such offices.

4. This corporation shall commence at the time of the execution of this certificate and shall continue thereafter perpetually.

5. The management of the business of this company shall be vested in the aforesaid corporate members so long as they shall respectively hold the offices above named, and in the persons who shall succeed them in said offices from time to time, it being the intent hereof that the chief executive officer of each of said cities and the executive head of the board of regents, or other governing body of said university, shall be the governing body of this corporation.

6. Said corporate members shall annually elect one of their number as president of the corporation, and may appoint a secretary thereof from their own members or otherwise and such other officers, agents, and employees as it may deem necessary for the proper conduct of the business of this corporation, and fix the compensation of such agents and employees, provided only that no members of this corporation shall receive any compensation for services rendered as members or officers of this corporation, and may adopt such by-laws, rules, and regulations for the government of the corporation and its officers, agents, and servants as to said members shall seem best. The first president of this corporation shall be Herbert P. Keller, and the first secretary shall be James C. Haynes, who shall hold office until their respective successors are chosen and qualified.

In witness whereof the parties have hereunto subscribed their names at the city of Minneapolis, Minn., this 24th day of November, 1911.

JOHN LIND,
President of the Board of Regents of the University of Minnesota.
JAMES C. HAYNES,
Mayor of the City of Minneapolis, Minn.
HERBERT P. KELLER,
Mayor of the City of St. Paul, Minn.

In the presence of—
FRANK J. WATEROUS.
WM. P. ROBERTS.

STATE OF MINNESOTA, *County of Hennepin, ss:*

On this 24th day of November, 1911, before me, a notary public within and for said Hennepin County, Minn., personally appeared John Lind, president of the board of regents of the University of Minnesota, James C. Haynes, mayor of the city of Minneapolis, Minn., and Herbert P. Keller, mayor of the city of St. Paul, Minn., to me personally known to be the persons described in and who executed the foregoing instrument, and acknowledged that they executed the same as their free act and deed.

[NOTARIAL SEAL.] WM. P. ROBERTS,
Notary Public, Hennepin County, Minn.

(My commission expires January 7, 1914.)

Filed for record in this office on the 25th day of November, A. D. 1911, at 10.30 o'clock a. m.

JULIUS A. SCHMAHL,
Secretary of State.

—

UNITED STATES OF AMERICA,
STATE OF MINNESOTA,
Department of State.

I, Julius A. Schmahl, secretary of state of the State of Minnesota, do hereby certify that I have compared the annexed copy with record of the original instrument in my office of articles of incorporation of Municipal Electric Co., as recorded in Book U–3 of incorporations on page 704, and that said copy is a true and correct transcript of said instrument and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State at the capitol, in St. Paul, this 30th day of January, A. D. 1913.

[SEAL.] JULIUS A. SCHMAHL,
Secretary of State.

Mr. NELSON. As I have said, this high dam, as we call it for short, is nearly completed, but there must be something else done. It will take perhaps a million dollars for the Twin Cities and the university to establish a power house, with dynamos and other electrical appliances, to create the necessary power. All of these must be put in by this municipal corporation. They are to provide everything; they are to distribute all the power, the Government simply building the dam.

The situation is this: The dam is about completed. There is no use of letting that water power go to waste, and the question is, Will you allow that surplus power to be utilized by these cities for municipal purposes, will you let it be idle, or will you let it go to a private corporation which has offered $500,000 for it? To my mind, this is a very important matter, not only as it relates to this case, but it is an important precedent.

This is a case where the Federal Government and the State of Minnesota concur. There is no question of State rights involved. It is not like the Connecticut River Dam proposition which was before the Senate some days ago. That referred to a dam built by private capital, where the Government did not invest a single penny, but still sought to make charges. This project, when completed, will be all paid for by the Government; it is the property of the Government, built primarily for the purpose of navigation, but, incidentally, it has created this water power.

It seems to me that true conservation is not to let this power lie idle; it is not to auction it off to the highest bidder and let it pass into the hands of a corporation which would hold the people by the throat. True conservation is to let the public utilize these agencies at reasonable and moderate figures, and under the charter of this corporation it is their right and their duty to make the charges reasonable. They must furnish the power at such a rate as will be sufficient to pay the cost of the plant, the cost of distribution, the cost of maintenance, and all that pertains to it, and "no more," as the law says.

I take it, if Senators will reflect, they will come to the conclusion that in such a case as this, where a large city is situated near a Government dam on a water power, it is precisely one where we ought to conserve that power. So I am not ashamed to say that I suggested to those cities the formation of this corporation for this purpose. Although my home is 140 miles from St. Paul and 130 miles from Minneapolis, and I have no personal interest in the matter, yet I am anxious that the people of the Twin Cities shall have the use at cost of that electrical power for public purposes and that our great State university shall have it. That is the object and purpose of this provision in the bill.

I am greatly interested in our State university. While it was not my fortune in my younger days to be able to get a university education and I merely had the advantages of an academy something on the New England plan, yet for more than 15 years I was a member of the board of regents of our State university, and I have taken a great interest in it. We have the finest agricultural school, I think I can fairly say, without exception, in the entire country, situated but a short distance from the main buildings. They have over 1,200 students, daughters and sons of the farmers of the State, and we have the courses so arranged that during the middle of the summer, when they are needed on the farm, the students remain at home, and during the fall and winter they can attend that school. We have a great educational system in Minnesota, and we have two fine cities, but in none of its institutions do I take a deeper interest than in our great university. It is right on the banks of the Mississippi River, within a stone's throw of it, and it should have the privilege of utilizing this power.

What is more, I want to say—and I have nothing to conceal—that the Government has acquired the riparian lands where the dam is being built, and the two cities have been so afraid that some outside corporation would try to gobble up this power that they have secured the riparian rights from the dam up to Minneapolis for the purpose of preventing it passing into private hands; in other words, they have secured the lands that will be flooded by the dam.

Mr. DIXON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Montana?

Mr. NELSON. Certainly; I yield.

Mr. DIXON. I am very much interested in the Senator's statement. May I ask him what is the amount of the capital stock of this company, and to whom will the stock be issued?

Mr. NELSON. The company has no capital stock. They have no right to issue any stock; they only have authority to issue bonds to secure the money to build the electric plant.

Mr. DIXON. Is there any limitation in regard to the right of assignment? Could the rights of this corporation be transferred to outside parties?

Mr. NELSON. I think there is such a limitation, but if there is not I should have no objection to its being inserted. The Senator can very well see that those cities and the university would not want to assign the right to anybody.

Mr. DIXON. This is purely and simply——
Mr. NELSON. For municipal purposes.
Mr. DIXON. For the municipal purposes of Minneapolis and St. Paul and for the State university?
Mr. NELSON. That is all.
Mr. DIXON. And will be controlled——
Mr. NELSON. By them and nobody else.
Mr. DIXON. By the trustees, who will be the mayors of Minneapolis and St. Paul and the president of the State university?
Mr. NELSON. The president of the board of regents of the State university.
Mr. DIXON. The president of the board of regents?
Mr. NELSON. The three officials who hold office for the time being. As I have said, they will issue no stock. I did not read the last section of the law, but it will be printed in the RECORD, and that section of the law shows just what they can do. Here is what they can do:

ISSUANCE OF BONDS.

SEC. 8. Such corporations shall likewise be authorized to raise money by the sale of its bonds or certificates of indebtedness to carry out the objects and purposes of the corporation, and the indebtedness evidenced thereby shall be a lien upon all the property, rights, and franchises of the corporation.

There is no stock, and consequently there can be no dividends. The corporation is authorized simply to issue bonds and certificates to raise the money to construct the power house and purchase the electrical appliances.

I think, if Senators will carefully consider this matter, they will find, first, that this is a case where the State and the Federal Government cooperate. There is no question as to what is the right of the Federal Government and as to what is the right of the State. In the next place, this is a municipal corporation, which desires to secure the power for municipal purposes in order to distribute it to the people of the Twin Cities and to the university at cost.

I want to call attention to the fact that when this matter was first introduced in the House it provided that the chartered corporation should pay a minimum of 3 per cent on the amount of the extra cost. We have increased it to 4 per cent on the extra cost. According to the report of the engineers, the extra cost will be $640,000, so that the cities will pay 4 per cent on $640,000. My opinion, from experience in other matters, is that it will probably be a little higher before the dam is finally finished.

Now I want to call the attention of Senators to another matter, and that is that the Government of the United States can borrow its money at 3 per cent. Three per cent would be a fair rate of interest; but we have inserted here 4 per cent upon this investment. If you count the regular rate at which the Government secures its money at 3 per cent, you will find here 1 per cent in addition, which will be in the nature of a sinking fund to reimburse the Government.

I agree with the Senator from Colorado in his main principles, but I think, upon the facts in this case, the situation, as the Senator will see from what I have said, is entirely unique. This is not, as I have said, like the Connecticut River case. This is a case where the Federal Government with its own money builds the dam and is allowing the electric power to be utilized for municipal purposes.

Mr. OWEN. Mr. President——
The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Oklahoma?
Mr. NELSON. Certainly.
Mr. OWEN. I desire to ask whether the Government, in providing for this water power at Federal expense, will be compensated in any way from the proceeds of the power thus developed?
Mr. NELSON. They get 4 per cent on the extra cost of the dam. As I figure it, taking the present extra cost as it is estimated, it will amount to about $25,000 a year. Undoubtedly it will be more in time. The Government simply builds the dam. Before the Government could secure the power, they would have to build a power house, put in dynamos and all necessary electrical appliances, and provide for the cost of maintenance.
Mr. FLETCHER. Mr. President——
The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Florida?
Mr. NELSON. Yes.
Mr. FLETCHER. I suggest to the Senator from Minnesota that the Government gets another advantage, and that is, the locks are to be operated by the power to be furnished by the municipalities.
Mr. NELSON. Oh, yes; the locks and gates in the dam are to be operated free of charge to the Government by the chartered company.
Mr. DIXON. Mr. President——
The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Montana?
Mr. NELSON. Certainly.
Mr. DIXON. Since my first interruption a Senator has handed me a copy of the articles of incorporation, and I think this provision should be laid before the Senate. What I was asking was whether there was any possibility of there being a transfer of this right to any private corporation.
Mr. NELSON. I do not think they could do that without the consent of the State.
Mr. DIXON. But I think the Senator from Minnesota should state, for the benefit of the Senate, that the articles of incorporation further provide:

That no members of this corporation shall receive any compensation for services rendered as members or officers of this corporation.

Mr. NELSON. I thank the Senator very much.
Mr. DIXON. I think it is very carefully drawn.
Mr. NELSON. Yes; I omitted to read that. The articles of incorporation are very carefully guarded, so that the officials who constitute the corporation can receive no compensation at all for their services.
Mr. DIXON. So it is purely for municipal and public purposes.
Mr. NELSON. Purely and simply for public purposes, and nothing else.
Mr. THOMAS. Mr. President——
The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Colorado?
Mr. NELSON. Certainly.
Mr. THOMAS. Mr. President, I have no doubt whatever, after listening to the Senator's explanation and statement of the character of the enterprise with which the Government proposes to deal in this amendment, that it is a most desirable and beneficent one. I have no question, too, but that the rights of the public have been as thoroughly safeguarded by legislation and by subsequent charter provisions as it is possible to do. If there is or could be any enterprise of any sort that would justify the Government's expenditure which I object to, it certainly would be something which, like this, is designed to contribute to the welfare of two large urban centers of population and a great State university. There can be no question but that the general purpose of the enterprise is one which must redound very largely to the benefit of the immediate community concerned and indirectly to the State in so far as it contributes to the well-being and development of the university. The difficulty, however, is not to be found in the direction which this improvement ultimately takes nor in the objects which may ultimately be accomplished by recognizing the right of the Government to make the expenditure, and therefore I do not think the Senator has met my objection or in any manner explained or defended against the fundamental proposition of power upon the part of the Government to do what it seems from the statement of the Senator has been done very largely, this being an uncompleted project.

I have some general acquaintance with this project through the press, and particularly through the magazines, which have devoted some space to it, and which have not only outlined its purposes as tending to beautify that section of the State, and particularly as an advantage, generally speaking, to the university, but also its prominence as a great work of public improvement. If the Government, however, may expend money for this purpose, then it is difficult, in my judgment, to find any limit upon its right to expend money in the same way for other purposes or for the same purpose, the control of the property created or the power generated not being so closely safeguarded as here seems to be the case.

Of course I was familiar with the report to which the Senator called attention and in which his conclusion was that, under circumstances like this, the Government was entitled to a certain property right in water power when it results from its own expenditure; but I have been unable to coincide with that conclusion. I think that if the Government, by the expenditure of money for the improvement of navigation directly, either by increasing the energy of the water or in some other direction, can create something which theretofore did not exist in the water and which it afterwards owns, then it may delegate to a citizen or a corporation the right to make the improvement and invest itself with the same right as a result of the corporation's expenditure.

In other words, I am unable to draw a distinction between the consequences of a direct and an indirect improvement. I believe they are the same in each instance, and that where the private improvement under the consent of the Government is carried on it is necessarily, in a legal sense and in so far as any legal consequences flow from it, a public improvement and not a private one.

That brings us to this proposition: Can the Government of the United States, directly or indirectly, under its power to improve the navigability of a river, go beyond that purpose and make an expenditure out of the Public Treasury which is not designed for the improvement of navigation, but is designed to create a surplus supply of water or a surplus supply of energy in water not needed for the purpose of navigation and connected with it only in the sense that the improvement which is made is an identical one?

That is the fundamental proposition involved in this amendment. I contend that if we recognize that right, we can not very well place any limitation upon its exercise.

The Senator admits very candidly that the extra expenditure involved in this improvement—and by that I assume he means the expenditure over and above the amount necessary for improving the navigability of the stream—is $640,000, which may fall somewhat below the ultimate expenditure. What is that $640,000 for? To improve navigation? Not at all. To create a surplus supply of water? Yes; if the amendment itself is to be taken as a guide for our information, because the tenth and eleventh lines on page 53 refer to the utilization of the hydro-electric power developed by the surplus waters not needed for navigation. The dam, therefore, was constructed for the purpose of obtaining water needed for navigation and for the purpose of obtaining surplus water not needed for navigation.

Why may not the Government expend $6,400,000 for this purpose as well as $640,000? And if it may expend $640,000 in excess of the amount required for the particular improvement in the Mississippi River at Minneapolis and St. Paul, why may it not make a similar improvement at St. Louis whenever the people of that great city, by some arrangement with the Government, use the Treasury of the United States, under the ostensible purpose of improving the navigability of the river, for the purpose of creating a surplus energy in the river, to be utilized either by the municipality or by some private corporation, or by both? Why may it not repeat the same practice at Pittsburgh, at Cincinnati, at Portland, Oreg., wherever there is a large community upon any of the navigable streams of the country?

If we enter upon that process of expenditure, Mr. President, I contend that we can place no limit whatever upon the amount to be expended, or upon the authority of the Government in that direction. If it may use the money of the Treasury, under the ostensible purpose of improving navigation, for the purpose of creating a surplus amount of water, it may use it for some other purpose. All of this tends to the ultimate conclusion that this great power, given to the Government of the United States as an essential attribute of sovereignty, is to be used as an agency for the creating of property and then for utilizing itself the property so created, selling it or leasing it. Between this instance, which receives the support of the Senator from Minnesota, and the case of the Connecticut River, which last week was opposed by the Senator from Minnesota, the only difference is that in the one case the improvement is made by the Nation directly, and in the other it was to be made by a private corporation, the Connecticut River Co.

The University of Minnesota is one of the greatest educational institutions of the country. The Senator may well be proud of what it has accomplished, and what it certainly will accomplish. I imagine, however, that the university will continue its great work of benefit to the State, and the education of youth, and the extension of its various spheres of influence in their several directions, just as much and just as well, although perhaps at a little greater expense, notwithstanding the fact that this amendment may not be adopted.

If its rejection would result in great injury to that institution, I certainly should be tempted to suppress my objections to the amendment and vote for it, because I believe the cause of public education is one of the most important, if not the most important of all the objects of public concern, both national and State.

Fortunately, however, we are not confronted with any dilemma of that sort. On the contrary, it appears from the statement of the Senator that the two cities own the riparian rights which are here necessarily involved. That being the case, it is the cities that are the owners of this surplus energy, by virtue of the fact that they are riparian owners. Under those circumstances I see no reason why they may not go on with their work of improvement under this arrangement, which has been sanctioned by the State legislature. Hence, in so far as concerns the immediate consequence flowing to the communities interested, it is not, after all, of very great importance.

But, Mr. President, why should not this condition result from the expenditure of this money? It has been expended for the benefit of the riparian owner. If the improvement has already been made, and the money therefor has been expended, why should not the cities of Minneapolis and St. Paul return to the Treasury of the United States this surplus amount of money which the Government had no right and no power to expend for this particular purpose?

The Senator has said that this is an instance of Federal and State cooperation; and so it is. But the cooperation is after the fact of the expenditure instead of before or coincident with the fact. The State comes in here after the Government has expended nearly half a million dollars upon a scheme or for an object which is beyond its power. Hence, it seems to me, there is no cooperation here in the sense that there should be and must be cooperation between the State and Federal Governments in matters of this kind, and which ultimately must come if there is to be conservation in the true sense of the term and our rivers are to be managed and improved as they ought to be.

It is true that the Government has reserved the right to such power as may be necessary to operate the locks free of charge to the United States; but that is not the only reservation that appears in the amendment. I find another, as follows:

> The right shall be reserved to the United States and included in such contract for the United States to purchase and use such supply of said power as may be required for its own purposes on the same terms and conditions as the said power is sold or distributed to the members of said public corporation of the State of Minnesota.

Of course I am ignorant of what governmental demand may exist for power outside of and beyond that necessary to operate the locks; but the reservation, to be effectual, should have been as broad as the demand might be.

We are here confronted, therefore, with this situation: The Government expends $640,000, not to improve navigation, but to create surplus energy in the stream. Then it confers upon the Secretary of War the power to transfer or assign this new property so created; and instead of making a reservation coincident with its own requirements in the future, it limits that merely to the operation of the locks, and then must go into the market and pay such price for any surplus power generated from its own property created through an unlawful expenditure of money as is charged to other consumers of the power to be generated from this new property.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Colorado yield to the Senator from Nevada?

Mr. THOMAS. Certainly.

Mr. NEWLANDS. May I ask the Senator from Colorado whether, in his view, this arrangement of cooperation would be unobjectionable provided the electric company, acting under the authority of the State, should expend upon this structure, in furtherance of its purpose to generate electric power, the extra amount which the United States now proposes to expend on that structure in order to make it suitable for the purposes of the electric company?

Mr. THOMAS. Of course in answering that question some consideration must be taken of the power of the particular State, whose constitution might interfere with the adoption of that course.

Mr. NEWLANDS. I was assuming that this company had the power and the authority from the State to enter into such an arrangement, by which the Nation would expend the amount of money necessary to make a structure in aid of navigation, and the corporation, under the authority of the State would expend in addition to that an amount of money which would make the dam serviceable for its purposes. In that event, would the Senator regard this transaction as unobjectionable?

Mr. THOMAS. Assuming that the State or the corporation, or both, are the owners of the riparian rights, I should think that would be a very desirable method of cooperation.

Mr. NEWLANDS. The Senator, then, does not object to cooperation between the Nation and the State?

Mr. THOMAS. Not at all.

Mr. NEWLANDS. Or between the Nation and a corporation acting under the authority of the State?

Mr. THOMAS. Not at all.

Mr. NEWLANDS. But the Senator simply insists that the National Government can not invest in this enterprise any moneys except those that are required for navigation, and that all additional moneys for a private purpose, and one relating to the State jurisdiction, should be expended either by the State or by a corporation acting under authority of the State?

Mr. THOMAS. Yes; my position is that the——

Mr. CLAPP. Mr. President, will the Senator yield to me for a moment?

Mr. NEWLANDS. Let the Senator answer my question.

Mr. THOMAS. Does the Senator desire to reply to the Senator from Nevada?

Mr. CLAPP. Not exactly to reply; but there is one phase of this question which I think the Senator could answer better if he understood the situation.

Mr. THOMAS. I was about to answer the question asked by the Senator from Nevada.

The PRESIDENT pro tempore. Does the Senator from Colorado yield to the Senator from Minnesota?

Mr. THOMAS. Certainly.

Mr. CLAPP. This dam is on the Mississippi River. It is intimately connected with the reservation system above these cities and the use of the water stored in the reservoirs below the cities. At one time it was suggested that the State and the two cities form this corporation, and that they themselves take the dam at a certain point and build the additional dam themselves. But the Federal authorities, and I think very properly, took the position that there could be no coordinated management or supervision of this work. Hence it was decided to adopt the plan of letting the Federal Government build this dam and absolutely control it, and having the cities and the State for its university pay this revenue, which would meet the cost to the Government, if it should be bonded, of getting the money, and leave an excess of 1 per cent per annum over and above what it would cost the Government. For that reason the project of these cities and the State taking the dam at a certain height and building it higher was abandoned, and this was adopted.

Mr. THOMAS. I have already said, Mr. President, that the project is a most excellent one. No man can find any sort of fault with it, or indulge in any harsh criticism of it, as it was outlined by the Senator's colleague a few moments ago. That part of the discussion which I was endeavoring to carry on when interrupted by the Senator from Nevada was caused by the insistence of the senior Senator from Minnesota that this was a case of Federal and State cooperation. I think he stated, or at least I gathered, that his purpose was thus to differentiate it from the Connecticut River case of last week. My contention was that there was a point where this cooperation began; but, based upon the information supplied by the Senator from Minnesota, that cooperation succeeded instead of preceding the extra surplus expenditure of the Government not needed for purposes of navigation.

I think I have forgotten the question of the Senator from Nevada, or at least I have not it clear in my mind.

Mr. NEWLANDS. My inquiry was whether the transaction would be entirely unobjectionable provided the State, or a corporation acting under the authority of the State, should invest in this dam the extra amount necessary in order to make it serviceable for electric-light purposes?

Mr. THOMAS. I think that is what it ought to do. I think that, in order to place the Government in statu quo, this corporation, so well safeguarded, both by the terms of its charter and by the legislation which authorizes it, ought to go a step further and reimburse the Government for the amount of money that it has expended.

Mr. NEWLANDS. Let me ask the Senator whether this result would not follow, that the Government would own a part of the structure, and the State, or the corporation acting under the State, would own another, and there would be a divided ownership, which would be exceedingly inconvenient, and which would prevent the successful operation of this dam for either national or State purposes? I will ask him, further, whether it would not involve not only a divided ownership, but a divided operation and control of the dam itself that would be exceedingly inconvenient?

If the Nation and the State have a right to cooperate in the construction of an individual structure that is intended to meet the uses of both sovereignties, having that broad right, have not they the right to conduct it in a businesslike way? And if the businesslike way involves either the Nation or the State building the entire structure, why can not a businesslike arrangement be made by which the sovereign which puts no money into the investment may compensate the other, either by a fair rental, or by an interest charge, or by an absolute reimbursement? The Senator will see that an absolute reimbursement means a divided ownership, which may be exceedingly inconvenient.

Mr. THOMAS. On the contrary, I perceive no such difficulty whatever. The Senator supported the Connecticut River bill the other day. That bill expressly provides that all of the improvement shall be made at the private expense of the company, after which that part of the improvement which is absolutely necessary for the Government operation of the improved channel of the stream shall be conveyed to it gratis, which of course means that the dam itself remains the property of the private corporation. At the same time I can perceive no difficulty flowing from a joint ownership of the dam by the State and by the Nation, the General Government, of course, having supervision and absolute control for purposes of navigation, its control arising from that power thus exercised.

It is very easy, if there should be such cooperation, to carry it on under terms and conditions which might be established and provided for by the Corps of Engineers or some other competent national authority. Those are all matters of detail, Mr. President, which seem to me to be of no great consequence.

I have already occupied more time than I intended to occupy upon this subject, and I shall not attempt to discuss the matter further.

Summarizing what I have said, my objection embodies the fundamental proposition that the Government can not and should not, under the guise of carrying out a great work of sovereignty, indulge in expenditures for the making of improvements or acquiring property not necessary to, but wholly or at least in part foreign to, the purposes of the expenditure which it has authority to make.

My attention has been called to section 3 of Rule XVI as bearing upon this amendment, from which I will read:

> No amendment which proposes general legislation shall be received to any general appropriation bill.

This amendment certainly proposes general legislation. I therefore make the point of order that it is obnoxious to section 3 of Rule XVI of the Rules of Procedure of the Senate.

Mr. NELSON. Mr. President, on the point of order, this is a special case that follows the appropriation for the dam. That appropriation of $185,000 is for this dam, and the amendment relates simply to this particular dam. It is not of a general character. It is not general legislation.

Mr. NEWLANDS. Mr. President, I should like to ask the Senator from Ohio [Mr. BURTON] whether it has not been customary to insert legislation of this kind in river and harbor bills? Is not the river and harbor bill regarded not simply as an appropriation bill, but a bill providing authority for surveys, and so forth, and also appropriating money for projects?

Mr. BURTON. Mr. President, I do not think any discussion has arisen on that subject in the Senate. In the House it is regarded as a quasiappropriation bill, and material relating to public works and rivers and harbors is considered in order. That is, it is not regarded as strictly an appropriation bill and governed by the rules which pertain to appropriation bills.

Mr. NEWLANDS. I remember hearing the Senator make that statement at the committee meeting the other day when the question arose.

Mr. BURTON. That is certainly the rule in the House. It is not regarded as absolutely confined within the limits which pertain to an appropriation bill, as it will appear that the modification of projects or provisions relating to associated projects are subjects which could not well be disposed of except in this bill. For that reason the rule has been established that it is not limited by the strict rules pertaining to appropriation bills, at least in the House.

The PRESIDENT pro tempore. Will the Senator from Minnesota kindly restate his observation about the point of order?

Mr. NELSON. The objection is made that this is general legislation. This is not general legislation. It does not relate to dams in general. It relates to this particular dam. The appropriation immediately preceding, of $185,000, is for this very dam. It does not use the word "dam," but it is for that very dam, as the Senator from Ohio can vouch for. This relates to that subject matter. It is special, not general. It is not general in the sense of being general legislation.

Mr. O'GORMAN. Mr. President, I have great sympathy for this legislation; and I should be the last Member to offer any objection to a measure that seems to be so generally desired by the people of Minnesota, particularly the people of St. Paul and Minneapolis. But I have this to remark: If the Senate adopts this amendment, it should reconsider its action respecting the Connecticut dam bill, upon which we voted a few days ago. There can be no distinction in principle between the two matters. If it is necessary, for the purpose of promoting the navigation of the Mississippi River, to make an improvement, the Federal Government should make it, but only for that single and specific purpose. There is not a word in the Constitution that justifies the Federal Government in going into one of the rivers of the country and, either by cooperation with the State

or otherwise, undertaking to make an improvement which, in the case of the legislation proposed, concededly is not necessary for the purpose of navigation, because the amendment distinctly recognizes that the contemplated improvement is not necessary for navigation.

The PRESIDENT pro tempore. If the Senator from New York will pardon the Chair, the question now before the Senate is the point of order raised by the Senator from Colorado, that it is general legislation.

Mr. O'GORMAN. I assumed the Chair had passed on it.

The PRESIDENT pro tempore. The Chair will take occasion to say that there is no more difficult question ever presented to the Chair than to sometimes determine whether or not a given item in an appropriation bill is general legislation. The custom in the Senate has been rather liberal, the Chair thinks, in ruling that matters are of a general nature when sometimes they are of a special or local nature. In turning to some well-established authorities, the Chair will read a few lines.

The Century Dictionary defines general legislation as follows:

General legislation: That legislation which is applicable throughout the State generally, as distinguished from special legislation, which affects only particular persons or localities.

Local legislation, local statute: Such legislation or statute as is in terms applicable not to the State at large but only to some district or locality and to the people therein.

Bouvier, who is a well-known authority, says:

GENERAL LAW (legislation): Laws which apply to and operate uniformly upon all members of any class of persons, places, or things requiring regislation peculiar to themselves in the matters covered by the laws. Statutes which relate to persons and things as a class. Laws that are framed in general terms, restricted to no locality, and operating equally upon all of a group of objects which, having regard to the purpose of the legislation, are distinguished by characteristics sufficiently marked and important to make them a class by themselves. (Bouvier, vol. 1, 877.)

Bouvier further says:

"General," with reference to the subject matter of the statute, is synonymous with "public" and opposed to "private," but with reference to the extent of territory over which it is to operate is opposed to "local." * * * and means that the statute to which it applies operates throughout the whole of the territory subject to the legislative jurisdiction. * * * Further, when used in antithesis to "special," it means relating to all of a class instead of to men only of that class. * * * In deciding whether or not a given law is general, the purpose of the act and the objects on which it operates must be looked to. If these objects possess sufficient characteristics peculiar to themselves and the purposes of the legislation is germane thereto they will be considered as a separate class, and legislation affecting them will be general; but if the distinctive characteristics of the class have no relation to that purpose of the legislature, or if objects which would appropriately belong to the same class have been excluded, the classification is faulty, and the law not "general." The effect, not the form of the law, determines its character.

The present occupant of the chair remembers well that the late President pro tempore, Mr. Frye, decided in more than one instance that a matter which related simply to a locality was not general legislation, and overruled, as the Chair remembers, the point of order on more than one occasion.

In this case the Chair is somewhat troubled as to the point of order raised, and, under his privilege, established by the rules of the Senate, will submit the question to the Senate. Is the amendment in order on this bill? Senators agreeing that it is in order will say "aye." [Putting the question.] The ayes appear to have it. The ayes have it.

Mr. THOMAS. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. O'GORMAN. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from New York suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Bourne	Dillingham	Kern	Poindexter
Bradley	Dixon	Lea	Pomerene
Brandegee	du Pont	Lodge	Richardson
Bristow	Fall	McCumber	Root
Burton	Fletcher	McLean	Sheppard
Catron	Foster	Martin, Va.	Shively
Chamberlain	Gallinger	Martine, N. J.	Simmons
Chilton	Gamble	Myers	Smith, Ariz.
Clapp	Gore	Nelson	Smith, Ga.
Clark, Wyo.	Gronna	Newlands	Smith, S. C.
Clarke, Ark.	Jackson	O'Gorman	Smoot
Crawford	Johnson, Me.	Oliver	Thomas
Cullom	Johnston, Ala.	Page	Thornton
Cummins	Jones	Penrose	Works
Curtis	Kenyon	Percy	

The PRESIDENT pro tempore. On the call of the roll 59 Senators have answered to their names. A quorum of the Senate is present. The question is on agreeing to the amendment.

Mr. THOMAS. May I ask for a submission of the point of order to the Senate?

The PRESIDENT pro tempore. The point of order was dealt with by the Chair. The Chair submitted it to the Senate, and it was decided that it was in order. The question now is upon agreeing to the amendment of the committee.

Mr. BRANDEGEE. Mr. President, I wish to make the announcement that if the Senate approves of this amendment I shall offer the Connecticut River dam bill as an amendment, which is much less objectionable, in my opinion, than the pending amendment. I think there ought to be some principle about the legislation, and we ought to be consistent in our policy.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. NEWLANDS. Mr. President, the debate which has taken place regarding this amendment, taken in connection with the practical admission of the Senator from Ohio [Mr. BURTON] that the system hitherto pursued regarding river and harbor appropriations has broken down, indicates the necessity of some legislation that will enable the treatment of a river in such a way as to make it beneficial for every public use, the necessity of legislation which will bring about cooperation between the sovereigns having jurisdiction over detached uses of our waters, so as to bring about their highest development, with a view to meeting all the demands of civilization.

Mr. President, the Senator from Ohio has been for the last three or four years presenting his indictment not only against the bills providing for rivers and harbors but against the system which has grown up with reference to the development of rivers and harbors, and yet for years, in the House of Representatives, that Senator was chairman of the Rivers and Harbors Committee and was a dominant figure in all legislation relating to the development of rivers and harbors. The bills which were brought in there were in the main satisfactory to him. The bills which were finally passed were in the main satisfactory to him. The system which has thus far prevailed is the system for which the Senator from Ohio, as chairman of the Rivers and Harbors Committee of the House, is and has been largely responsible.

Mr. BURTON. Will the Senator from Nevada yield to me?

Mr. NEWLANDS. Certainly.

Mr. BURTON. I think the Senator did not hear what I said this morning when I pointed out the difference in policy at the time I was chairman of the Rivers and Harbors Committee of the House—a very essential difference—that of not beginning projects unless provision was made for their completion. As a result of that there were many less projects, and I maintain they were very much more carefully selected than has been the case in the recent bills. That policy was not absolutely pursued during the early years, from 1889 to 1902, because it was impossible to remodel or reform the existing system. If the Senator from Nevada will do me the kindness to read the report on the bill of 1907, which will appear in the RECORD tomorrow morning, he will see how very clearly the point was at that time presented.

Mr. NEWLANDS. I wish to say, Mr. President, that the remark I was making did not involve criticism of the Senator from Ohio. I was about to add that the system of river and harbor improvements pursued under his guidance in the House of Representatives was vastly improved. When he took hold of the leadership of this subject there a system prevailed called the "pork-barrel" system, a system with which we are all familiar, and which it is unnecessary to describe.

We had the pork barrel in projects just as we had it in offices, and the aim of thoughtful men was to substitute the merit system, both in projects and offices.

We have made great progress with reference to offices. We have made great progress with reference to projects. Every year has witnessed an advance in the merit system as applied to both. The Senator from Ohio is to be complimented for the great work which he undertook in this direction in the House. The Corps of Engineers through his efforts was made a dominant figure in all the plans with regard to rivers and harbors and their execution. A board of review was established, before which doubtful projects were tested, and without whose approval legislation was rarely initiated; a steady and gradual advance was made, not only in effective planning, but in effective work.

But in the very nature of things the great enterprise of developing a river for navigation can not be successfully pursued unless there is a single power or a combination of the various powers having jurisdiction, and unless the development of the river can be so planned and executed that the various uses of the river, including the works necessary to develop such uses, dovetail into each other.

So river improvement has broken down. It is to-day ineffectual for the purpose which Congress has in view in the exercise of its interstate-commerce power, namely, the promotion of navigation. It has been just as ineffectual in the development of a complete waterway as the action of a railroad company would be in the construction of a railway in detached portions here and there, a stretch of 10 miles here and a stretch

of 10 miles there, without any connection between the various structures.

So far as the question of expenses is concerned, the full development of a river within rational limits of expenditure depends upon every remunerative use of that river and the development of every remunerative use. The Congress of the United States under its jurisdiction can consider only one use of the river, and that is its use for navigation. Yet there are numerous profitable uses. There is the use of the water for irrigation; there is the use of the water for the development of water power and of hydroelectric power; there is the control of the water in such a way as to redeem vast areas of swamp land and make them profitable. Yet the Nation has jurisdiction over only one of these uses, the use for navigation. It is denied the opportunity of entering upon these other uses, which would be largely compensatory of the cost of the projects, though by reason of its ownership of the public domain it has been in a limited degree able to embrace irrigation in its works as a means of preparing its arid domain for settlement.

Now, under what jurisdiction are these other uses? They are under the jurisdiction of the State. Therefore we have the jurisdiction and the control over our rivers divided between the national sovereignty on the one side and 48 different States upon the other.

Correct planning requires that these sovereigns shall get together by some process so that they can cooperate in plans and works, and so that individuals acting as the agents or under the authority of each sovereign can so develop their respective works as to make them dovetail into each other and thus reduce the cost for each separate use.

Can there be any doubt, Mr. President, but that if a private corporation owned the great Mississippi River and all the areas which it traverses, including its tributaries, such a corporation would view that entire river, with all its tributaries and source streams, as a unit, and that in contemplating the development of that river for one useful, beneficial, and profitable use it would consider how far the other uses could be developed in such a way as to be either wholly or partly compensatory? Yet for 100 years we have been moving along this line of individualized effort, and the system has broken down. The question still is, How can we develop our rivers for navigation and make them useful in the transportation of the country?

Of course, the influence of the railways has been against this throughout. For many years our railroads were almost overdeveloped. They were greedy for traffic, greedy for transportation, and wherever they had the opportunity they would run the waterways out of business by unfair methods. The spectacle was presented of the Nation permitting one of its servants to club another public servant out of the opportunity for usefulness. So we find that the influence of the railways has been against the development of waterway transportation. It has not been against the development of our rivers, provided it could be done in an ineffective way. They did not object so much to the expenditure of public moneys for the development of our rivers as they objected to this expenditure in an ineffective way.

So throughout the years we have been going along with this ineffectual method of taking up individual projects here and there as a part of the spoils system, without comprehensive plans involving the union of all the services in the country that relate to water and involving the union of all the sovereignties that have jurisdiction over the subject.

Mr. President, if we will look at the map which hangs upon the wall we will find that, generally speaking, there are about eight or nine great watersheds or drainage areas in this country. Commencing at the Atlantic coast, we find the Atlantic waterways all running into the Atlantic Ocean or into the bays and sounds connected with the Atlantic Ocean. The scientific treatment of that coast involves comprehensive plans which will insure the construction of an inland waterway connecting with all the rivers from Massachusetts Bay, through Cape Cod, down to Florida, stretching through Long Island Sound, Delaware River and Bay, Chesapeake Bay, Pamlico Sound, and then, after passing through Florida by a canal, extending its way to a similar inland waterway upon the coast of the Gulf, and there connecting with the next watershed, the Mississippi watershed, a watershed covering nearly two-thirds of the area of the entire country, embracing not only the Mississippi River but all its tributaries from the Great Lakes down to the Gulf, and from the Appalachian and Allegheny Mountains on the one side to the Rocky Mountains on the other.

All the waters that fall upon that vast area are emptied into the Gulf of Mexico through a narrow pass which you will see depicted upon the map near New Orleans, where the Mississippi River makes it way out through the Passes into the Gulf of Mexico. And so this vast mass of water falling from the heavens in the various seasons of the year, capable of being used everywhere for benefaction, is allowed uncontrolled to drift below, to the destruction of towns and cities and vast cultivable areas.

Now, what purposes of benefaction can it be used for? Above, in that vast semiarid area, the flood waters can be led over the plains and used for purposes of cultivation and production, thus diminishing the flood when it is destructive and feeding the stream later on through the slow processes of percolation when the water is needed for purposes of navigation.

Then, below, what use can the regulation of this water be put to? In the reclamation of a vast area of alluvial soil, stretching all the way down from the Missouri on both sides of the river to and including Louisiana. The productiveness of an area of vast fertility is almost annually arrested by these very waters, when, if arrested above, and either stored artificially for power or led over the lands for the purpose of irrigation, would be most beneficial, in the increase of wealth and prosperity.

Mr. President, what is the problem, then, of the people in Louisiana, and Mississippi, and Tennessee, and Arkansas, and Missouri?

There the difficulty is too much water. What is the difficulty away out in the semiarid regions in the upper reaches of the Missouri and the Platte and other rivers tributary to them? Too little water. What is the difficulty in the Mississippi region? The difficulty there is that these waters are allowed to pursue their course in a period of flood and to wash the banks into the streams, creating obstructions to navigation. Finally, they rush down in the lower reaches of the river and threaten great cities and towns, protected by enormous levees, in some cases extending even to the height of the houses. Substantially all that we have done has been to treat the lower part of that river, to take hold of the floods after they have reached the lower part of the river, and to arrest their spread over the adjoining lands by levee protection, that involving also bank protection through revetment work as a means of preventing the destruction of the levees themselves by bank caving. So we have been spending millions of dollars down there, not in any connected plan relating to navigation, but simply with a view of protecting these areas and these cities and these towns from overflow as a result of floods, which floods, if utilized above, would be turned into beneficial agencies.

So it is to the west. We have the watershed of the Rio Grande depicted upon the map taking its source in the arid region and emptying into the Gulf of Mexico. Then farther on we have the watershed of the Colorado running into the Gulf of California; both of these rivers capable of being navigated, both of them capable of the use of their waters most extensively for irrigation and the development of water power. Further, we have the watershed of San Francisco Bay depicted on the map, with the Sacramento and its tributaries, the San Joaquin River and its rivers, commanding the most fertile valley in the world, emptying into San Francisco Bay, which in turn empties, through a narrow gorge called the Golden Gate, into the Pacific Ocean. There the same problems of irrigation, water power, swamp-land reclamation, and navigation confront us, the solution of each aiding in the solution of all; one half of this vast area thirsty for the waters which fall on the other half, and which can be diverted from their mad race to the ocean and applied to the development of power and the cultivation of the arid soil. Then we have to the north of that drainage area the watersheds of the Columbia and Snake Rivers, the Snake being a tributary of the Columbia. These two rivers traverse the States of Washington, Oregon, Idaho, and western Montana, and are capable of being used both for navigation and irrigation and for the development of water power. Yet our course thus far has been to bring in simply a river and harbor bill one half or more of which is devoted to appropriations for harbors and the other half to appropriations for rivers, the latter made in such a way as to take care of simply detached localities here and there without any comprehensive or collective planning that would result in these rivers, from their sources to their mouths, being used for all the beneficial purposes to which they can be put.

Mr. President, a movement has been going on for the last seven or eight years in the line of the development of natural resources. It was inaugurated during the administration of Mr. Roosevelt, and constitutes one of the most creditable policies of his administration. An Inland Waterways Commission was appointed by him, without statutory authority, about seven or eight years ago. It was appointed under his power of recommendation to Congress relating to legislation. As it served without compensation, it was no burden upon the Public Treasury; in fact, it had no statutory existence.

The Senator from Ohio [Mr. BURTON], then a Member of the other House, was a member and chairman of that commission. The then Senator from Missouri, Gen. Warner, and myself constituted the senatorial representation on that committee. There was also on that commission the present Senator from Alabama [Mr. BANKHEAD], who then was a Member of the other House. In addition to that, the chiefs of the various scientific services were members of the commission—the Chief Forester; the Chief of the Reclamation Service; the Chief of the Bureau of Corporations, at that time engaged in an exhaustive study of water transportation; a representative of the Bureau of Soils of the Agriculture Department; and the Chief of Engineers of the Army. From their report, from which I shall insert extracts in the RECORD, you will find that they recommended the treatment of a river as a unit from source to mouth, with all of its tributaries; cooperation between the Nation and the States in plans; cooperation between the Nation and the States in work, each within its jurisdiction, and with such apportionment of costs and benefits as would properly apportion to each jurisdiction the cost belonging to it and to each jurisdiction the benefits belonging to it. They recommended teamwork upon the part of the sovereigns, and they recommended teamwork upon the part of the services that relate to the use of water.

We found that the Engineer Corps of the Army alone had control of the improvement of our rivers, yet we found numerous other scientific services which were engaged in study or work in some way regarding the waters of the country. The Geological Survey, through its engineers, was engaged in the study throughout the entire country of all of the phenomena relating to water. The Reclamation Service was engaged at the upper reaches of these very navigable rivers, taking out the waters over the arid and semiarid plains in canals and storing them up in enormous structures for the purpose of irrigation. Then the Forest Service was engaged in its study relating to the usefulness of the forests themselves in the conservation of water, the services which the forests perform in absorbing the moisture and letting it out gradually into the small streams through which it finds its way into the navigable rivers, instead of permitting the precipitation to rush hastily to the large rivers, where its destructive force would be injurious both to navigation and to agriculture. All these various scientific services—the Reclamation Service, the Geological Survey, the Weather Bureau, the Forestry Service, the Drainage Service, the Coast and Geodetic Survey, and the Engineer Corps of the Army—engaged in the study of matters relating to waters were working in a detached way, without consultation with each other and without union either of plans or of work, each of them jealous of the jurisdiction of the other, each of them resisting any invasion of its own jurisdiction, and all of them more or less at war with each other, although they were all the servants of the Government.

We concluded that the first thing to do was to bring them into cooperation through a board consisting of the chiefs of these services, who, aided perhaps by a hydro-electric engineer, a hydraulic engineer, and a sanitary engineer, would study in a connected and related way all these questions relating to the use and the control of the water, and present to the National Government a connected plan of works.

That report of the Inland Waterway Commission was signed by all its members. There were some qualifying words on the part of the Chief of the Engineer Corps of the Army; there were some qualifying words by myself, or rather words of enlargement, for I wished to create a commission of large powers, to create a fund of $50,000,000 annually for 10 years for the development of our rivers, and to give this board of regulation a free hand within the limits of our appropriation, simply providing that they should enter upon no work unless the money for its completion was in the Treasury. The other members of the commission believed in a large fund; they believed in the cooperation of the services; they believed in the cooperation of the Nation with the States; but some of them believed that Congress ought not to give and some that Congress would not give such an organization a free hand in plans and works, but that it should present its plan to Congress in detail and that those plans should be approved by Congress.

My recommendation was, in my judgment, in the line of efficiency and of celerity in the work, for we have pursued practically that system in the reclamation works of the country, where we gave the Secretary of the Interior, with the aid of a board of engineers, comparatively a free hand, and also in the construction of the Panama Canal, and both those works, in the general satisfaction which they have given the country, in my judgment attest the wisdom of the plan.

There was no question on the part of any member of that commission that there should be cooperation between the services that relate in any degree to water; that there should be cooperation between the Nation and the States; that there should be an ample fund provided for continuous work stretching over a period of 10 years.

After that report was made the Conservation Congress was called at Washington at the White House. That congress was attended by almost all the governors of the States and by many men of distinction from every State in the Union. By a unanimous voice they declared in favor practically of this policy. Later on the political conventions met. The Republican convention in general terms, in 1908, indorsed this policy. The Democratic convention in express terms indorsed it, declaring specifically for the treatment of a river, with all its tributaries, as a unit; declaring specifically for the cooperation of the scientific services, for the cooperation of the Nation and the States, for a large fund, and for continuous work. Later on that policy in the last campaign was generally indorsed by the Republican Party and specifically indorsed in all its details by the Democratic convention and later by the Progressive Party convention.

During all this time waterway conventions have been held all over the country in which this general policy has been advocated. Boards of trade and chambers of commerce throughout the country have indorsed it, and there has been hardly a dissenting note, so far as the course of legislation is concerned.

Six years ago, in 1907, before the Inland Waterways Commission made its report I presented a tentative bill in the Senate providing for the cooperation of the services, the cooperation of the Nation and States, a large fund, a regulating board, and continuous work. That bill had a hard time in the Committee on Commerce, of which I was a member, but finally, after a struggle, I got out a modified bill, unanimously reported by the Committee on Commerce, providing for an inland waterway commission, which was to make plans for works upon the lines which I have suggested.

Just about that time an unfortunate controversy arose between Mr. Roosevelt and Congress, in which an effort was made by withholding appropriations and forbidding the service of Government officials on these investigating commissions, and in other ways to check him in the lines that he was pursuing of independent investigation regarding the conservation of the natural resources of the country. As a result of that controversy, during the closing days of the session, when I was endeavoring day after day to bring up that modified bill for consideration, with the absolute assurance that if it once got before the Senate it would pass, its pathway was obstructed by two eminent members of the Republican Party of the Senate and by two eminent members of the Democratic Party, who stood on watch to prevent its consideration.

I wish to say that during that time a fuller and more complete bill which I had offered was referred to the then Secretary of War, Mr. Taft, for his report, and while at that time the Corps of Engineers was hardly friendly to this idea, for it involved in some degree, as they regarded it, though I think mistakenly, a trespass upon their jurisdiction, Mr. Taft made a report, extracts from which I shall insert in the RECORD, in which he unqualifiedly indorsed this policy, and said that the time had come for comprehensive plans involving the intelligence and the energies of all the services involved and all the sovereigns involved. That bill was never reported. Since then at every Congress I have introduced a bill of a similar nature, and have sought by amendment to the river and harbor bill to secure action upon this subject. It is only recently that we have seen the dawn of a new light in that committee.

I am sorry the Senator from Minnesota [Mr. NELSON], the chairman of the Commerce Committee, is not in his seat, but I do not think that I do him an injustice when I say that for some time he looked upon this enlarged policy with great caution; and yet the other day, as the result of his experience with reference to these bills, he declared that in the future he would favor enlarged action upon this subject; that he was against the consideration of these questions in the detached way in which they have been considered, and would favor the organization of a board or commission and the creation of a large fund. He went so far as to declare that he would leave the expenditure of that fund to the members of that commission as a means of securing more comprehensive and more effective results than those attained under the present system. The Senator from Minnesota is in his seat now, and I ask him whether I have correctly stated his position upon this question?

Mr. NELSON. Mr. President, in answer to the kindly question of the Senator from Nevada, I beg leave to say that in a general way the Senator has expressed my sentiments. I have come to the conclusion that we could do much better work and should squander less money if we appropriated a gross sum and

placed it in charge of a board of five or seven competent Army engineers with power to determine what improvements should be made, and where, in our rivers and harbors.

While a great many of the improvements we are making are fully justified in the interests of navigation, yet my observation has led me to believe that in a great many instances we really squander money; it is wasted on improvements that never ought to have been made; but what can we do? Representatives and Senators are clamorous; they introduce their bills, and it is utterly impossible to resist them. I think it would require almost supreme power to infuse a new spirit into Representatives and Senators, as well as into the American people, to bring about a reform. I think the work should first be started through our great newspapers and the magazines, from the pulpit, and along educational lines, to infuse people with a new spirit, with less of the spirit of Mammon, so that we would all come to look upon this question just as we would if it were our own business. I am sure that if we were to look upon river and harbor improvements as though it were a matter of our own, and the money came out of our own pockets, we would in many instances refrain from scattering the money as it has been scattered in the case of many improvements.

I owe an apology to the Senator from Nevada for taking up so much time. I should be glad if the Senator would allow me to have a vote on my amendment.

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Connecticut?

Mr. NEWLANDS. Certainly, I yield.

Mr. BRANDEGEE. Mr. President, I desire to send a proposed amendment to the amendment to the desk, which I shall offer at the proper time. I do not care to puncture the address of the Senator from Nevada, but at the conclusion of his remarks I shall ask that the amendment be read to the Senate.

Mr. NEWLANDS. I did not catch the last remark of the Senator.

Mr. BRANDEGEE. I will ask that the amendment be read to the Senate after the Senator from Nevada has finished.

Mr. NEWLANDS. Mr. President, I will state to the Senator from Minnesota that I will not delay him long in the consideration of his amendment. I call attention to the remarks of the Senator from Minnesota, who has long served upon the Commerce Committee of the Senate, who has had a large experience in the development of our rivers, who has served on committees that have made investigations of the Mississippi, the Missouri, and other rivers, and whose experience has probably been as large as that of any Member of this body. He testifies to the ineffectiveness of the present system, and the Senator from Ohio [Mr. BURTON] has also testified to it. I caught a few of the latter's phrases. He said there has been lack of care in the selection of projects and lack of care in methods.

He speaks of the ineffectiveness of expenditures already made, but he also speaks of the experimental side of this question as if we had to go through a further period of experiment before we could agree upon an effective system.

Mr. President, I claim that the period of experiment has expired. We have been experimenting with this question for over 100 years. We know that other nations have dealt with it successfully. We know that in France river transportation and canal transportation and railway transportation all are coordinated and each has a proper place in their system of transportation. We know that in Germany they have pursued their waterway development side by side with their railway development and their ocean transportation development, and they have conducted them all in such a way as to make them dovetail into each other, the waterway transportation cooperating with the railway transportation, and both of them cooperating with ocean transportation in such a way as to diminish the inconvenience and the cost, and in such a way as to make Germany's course absolutely triumphant in the advancement of its commerce.

Waterway transportation is no new thing. Our only difficulty is that we have not improved and developed our waterways in any consecutive method. We have allowed the railways to sandbag the waterways. We have allowed one public servant to destroy another public servant. The result is that these two servants do not cooperate in the service of the country, but the efficiency of the one has been practically destroyed by the monopolistic and destructive efforts of the other.

There is no reason why we should not make the same study in this country that Germany has made of the complete development of waterway, railway, and ocean transportation, and the first step in that direction is the proper development of our inland waterways.

We have to-day the Panama Canal, a connecting link between the waterway systems of the Pacific coast, the Atlantic coast, and the Gulf coast, including the entire valley of the Mississippi River. There is no reason why in the future vessels of standard draft should not start from St. Louis, go down the Mississippi River, through the canal, up to the Pacific coast, up into San Francisco Bay, and up both the Sacramento and the San Joaquin Rivers. There is no reason why they should not pursue the same course regarding the Columbia and the Snake Rivers, connecting as they do four States and reaching far into the interior. There is no reason why this entire system should not be planned in such a way as to secure a contemporaneous development of the reclamation of our swamp lands, the reclamation of our arid lands, the development of our forests, and the development of hydroelectric power, which is daily becoming more and more a factor in our domestic life and entering into domestic activities more than any other force.

When I interjected something of this kind this morning, while the Senator from Ohio [Mr. BURTON] was speaking, and urged the importance of dealing with the subject in a large way through a commission of experts the distinguished Senator said something about "abdicating legislative functions." Is it a legislative function to do executive work?

All this is work of planning and of construction. It is simply a proper exercise of our legislative functions to create an effective organization for doing effective executive work and to give that organization large and comprehensive powers so that there will be not only plans made, but work done. If we allow such an organization to be hamstrung all the way along by the agencies of obstructive legislation, we shall never secure substantial results.

Mr. President, I know the Senator from Minnesota is anxious to have a vote, and I shall not at this time conclude what I have to say. I shall only say, with reference to this particular provision in which the Senator from Minnesota is interested, regarding a cooperative arrangement between the National Government and the State of Minnesota regarding a dam promotive both of navigation and water power, that it illustrates and accentuates everything I have been saying. His amendment proposes practically a cooperation between the Nation and a State in the utilization of a structure to be placed in a river in such a way as to meet the demands of the national jurisdiction in the promotion of navigation and to meet the demands of the State jurisdiction in a matter of proper domestic development.

Why should the Senator from Minnesota be compelled to come here to Congress with this specific project and ask our assent? Why should any Senator or Representative be compelled to come here with reference to every project of this nature when by general legislation we can provide for cooperation between the Nation and the States and provide a fund under which that cooperation may be accomplished? Why should the time of the Congress of the United States be taken up in the constant discussion of individual projects here and there all over the United States, which may be multiplied indefinitely if we once enter upon the question, when by turning the matter over to a competent board, with ample funds, as we did the Panama Canal and the reclamation work, we will secure not only more effective results, but more speedy results?

This very bill shows, by the analysis presented to me by the Corps of Engineers, that nearly $37,000,000 is to be expended, of which over $14,000,000 goes for harbors and about $23,000,000 for rivers. That has been somewhat increased by the amendments of the Senate committee, aggregating some three or four million dollars additional. Twenty-two million dollars is appropriated in this bill for the regulation of rivers, and you will find that, of all that $22,000,000, $15,000,000 is to be spent upon the Mississippi River and its tributaries.

With the consent of the Senate, I will put in the RECORD this analysis of the bill as it passed the House, made at my request by the Corps of Engineers. My idea was to group the appropriations for rivers made in the river and harbor bill, not under the head of States but under the head of the respective drainage areas or river systems, considering every river with its tributaries as a unit.

The matter above referred to is as follows:

List of appropriations for systems of rivers made by H. R. 2880, Sixty-second Congress, third session, the amounts given herein being included in accompanying statements for rivers and for harbors.

Delaware River and Bay system:	
Philadelphia to the sea	$1,750,000
Philadelphia to Trenton	20,000
Above Lalor Street, Trenton	114,000
Alloway Creek	7,000
Cooper River	5,000
Mantua Creek	13,000

Delaware River and Bay system—Continued.	
Maurice River	$30,000
Raccoon Creek	13,000
Salem River	15,000
Woodbury Creek	8,000
St. Jones River	5,000
Appoquinimink, Murderkill, and Mispillion Rivers	27,000
Broadkill River	5,000
Leipsic River	5,000
Little River	1,000
	2,018,000
Chesapeake Bay system:	
Broad Creek	2,000
Nanticoke	3,600
Chester, Choptank, Warwick, Wicomico, Pocomoke, La Trappe, and Manokin Rivers, and Tyaskin Creek	33,510
Susquehanna River	51,230
Anacostia River	75,000
Potomac River	33,000
James River	75,000
Mattaponi and Pamunkey Rivers, and Occoquan Creek	15,000
Pagan River	1,000
Rappahannock River	25,000
Upper Machodoc Creek	3,200
Onancock River	1,000
	318,540
Cape Fear River system:	
At and below Wilmington	352,940
Northeast, Black, and Cape Fear Rivers	12,000
	364,940
Neuse and Trent Rivers system	12,000
Great Pedee River system	15,000
Waccamaw River	30,000
	45,000
Santee, Wateree, and Congaree Rivers system	60,000
Altamaha, Oconee, and Ocmulgee Rivers system	40,000
Apalachicola Bay system	20,000
Apalachicola River and Chipola River	7,000
Flint River	15,000
Chattahoochee River, Ga. and Ala	80,000
Caloosahatchee River	2,000
	124,000
St. Johns River system	611,800
Orange River	1,000
	612,800
Holmes River system	2,500
Chattahoochee River	9,000
	11,500
Mobile Bay system:	
Alabama River	100,000
Black Warrior, Warrior, and Tombigbee Rivers, etc	1,366,000
Coosa River	136,000
	1,602,000
Mississippi River system:	
Southwest Pass	500,000
Head of Passes to mouth of Ohio River	6,000,000
Ohio River to Missouri River	1,000,000
Missouri River to Minneapolis, Minn	1,500,000
St. Paul to Minneapolis, Minn	185,000
Yazoo River and tributaries (Tallahatchie, Coldwater, Tchula Lake, Steele and Washington Bayous, Lake Washington, and Bear Creek)	40,000
Big Sunflower River	120,000
Ohio River	2,350,000
Tennessee River	1,105,000
French Broad and Little Pigeon Rivers	15,000
Cumberland River	10,000
Monongahela River	178,200
Allegheny River	2,000
Illinois River	100,000
Missouri River	2,300,000
Osage River	15,000
Gasconade River	10,000
Arkansas River	48,000
White River	20,000
Cache River	2,000
Black and Current Rivers	25,000
St. Francis and L'Anguille Rivers and Blackfish Bayou	7,000
Red River	117,000
Ouachita River	202,500
Saline River	3,000
Bayous Macon, Bartholomew, D'Arbonne, and Corney, and Boeuf and Tensas Rivers	16,000
Bayou Lafourche, La	2,000
	15,872,700
Sacramento and Feather Rivers system	40,000
Mokelumne River	1,000
Petaluma Creek and Napa River	18,000
San Joaquin River, Fremont Channel, McLeod Lake, and Stockton and Mormon Channels	186,132
Mokelumne River, Cal	1,000
	246,132

Columbia River system:	
Columbia and lower Willamette Rivers	$100,000
At the mouth	1,000,000
At the Cascades	100,000
Between foot of Dalles Rapids and Celilo Falls	600,000
And tributaries above Celilo Falls to Snake River	40,000
Between Bridgeport and Kettle Falls	25,000
Cowlitz and Lewis Rivers	23,500
Snake River	25,000
Willamette and Yamhill Rivers	42,000
Grays River, Wash	500
Total	2,016,000

List of appropriations made by H. R. 28180, Sixty-second Congress, third session, for rivers.

Kennebec, Me	$30,000
Medomak, Me	8,500
Merrimac, Mass	10,000
Housatonic, Conn	20,000
Mystic, Conn	8,160
Thames, Conn	12,000
Saugatuck, N. Y. (See Harbors.)	
Browns Creek, N. Y	10,000
Hudson, N. Y	1,000,000
Wappinger Creek, N. Y	3,500
Matawan Creek, Raritan and South Rivers, Compton and Cheesequake Creeks. (See Harbors.)	
Absecon Creek, N. J	1,600
Alloway Creek, N. J	5,000
Cooper River, N. J	5,000
Elizabeth River, N. J	15,445
Hackensack, N. J	50,000
Mantua Creek, N. J	15,000
Maurice, N. J	30,000
Raccoon Creek, N. J	13,000
Salem, N. J	15,000
Toms, N. J	1,000
Tuckerton Creek, N. J	5,000
Woodbridge Creek, N. J	3,000
Woodbury Creek, N. J	8,000
Allegheny River, Pa. (maintenance)	2,000
Monongahela, Pa	178,200
Appoquinimink, Murderkill, and Mispillion Rivers, Del	27,000
Broad Creek River, Del	$2,000
Broadkill, Del	5,000
Leipsic, Del	5,000
Little, Del	1,000
St. Jones, Del	5,000
Waterway between Rehoboth and Delaware Bays, Del	41,725
Nanticoke River (including Marshyhope Creek), Del. and Md	3,600
Chester, Choptank, Warwick, Wicomico, Pocomoke, La Trappe, and Manokin Rivers, and Tyaskin Creek, Md. (See Harbors.)	
Susquehanna River, Md	51,230
James, Va	75,000
Mattaponi and Pamunkey Rivers and Occoquan Creek, Va	15,000
Onancock River, Va	1,000
Pagan, Va	1,000
Rappahannock, Va	25,000
Upper Machodoc Creek, Va	3,200
Waterway, Norfolk to Beaufort Inlet, Va. and N. C	800,000
Bay River, N. C	1,000
Fishing Creek, N. C	1,500
Neuse and Trent Rivers, N. C	12,000
New River and waterways to Beaufort, N. C	5,000
Northeast, Black, and Cape Fear, N. C	12,000
Shallotte, N. C	9,845
Swift Creek, N. C	500
Waterways connecting Core Sound and Beaufort Harbor, N. C	20,000
Waccamaw, N. C. and S. C	30,000
Great Pedee, S. C	15,000
Santee, Wateree, and Congaree Rivers, S. C	60,000
Flint, Ga	15,000
Satilla River, Ga	10,000
Altamaha, Oconee, and Ocmulgee Rivers, Ga	40,000
Chattahoochee River, Ga. and Ala	80,000
Coosa River:	
At Mayos Bar	30,000
Between Roome and Dam No. 4	25,000
Lock and Dam No. 4 and Dam No. 5	81,000
Waterway, Savannah, Ga., to Fernandina, Fla	100,000
Channel, Apalachicola River to St. Andrews Bay, Fla	130,000
Apalachicola River (cut-off, Lee Slough, lower and upper Chipola Rivers), Fla	7,000
Caloosahatchee River, Fla	2,000
Crystal, Fla	2,000
Holmes, Fla	2,500
Indian, Fla	22,000
Manatee, Fla	5,000
Orange, Fla	1,000
St. Johns River, Fla.:	
Jacksonville to Palatka	19,600
Palatka to Lake Harney	42,200
Withlacoochee, Fla	5,000
Choctawhatchee, Fla. and Ala	9,000
Escambia and Conecuh Rivers, Fla. and Ala	8,000
Alabama, Ala	100,000
Black Warrior, Warrior, and Tombigbee Rivers, Ala	1,338,500
Tombigbee River, Ala. and Miss.:	
Mouth to Demopolis, Ala	12,500
Demopolis to Walkers Bridge, Miss	15,000
Big Sunflower, Miss	120,000
Pascagoula and Leaf, Miss	14,000
Pearl, Miss	37,000
Wolf and Jordan, Miss	5,000
Yazoo River and tributaries, Miss. (Yazoo, Tallahatchie, Big Sunflower, and Coldwater Rivers; Tchula Lake; Steele and Washington Bayous; Lake Washington; Bear Creek)	40,000

Water hyacinth in Mississippi, Louisiana, and Texas		$15,000
Bayous Bartholomew, Macon, D'Arbonne, and Corney; and Boeuf and Tensas Rivers, La		16,000
Bogue Falia, Bayou Manchac, and Amite, Chefuncte and Tickfaw Rivers, La		7,000
Bayou Lafourche, La		2,000
Bayou Queue de Tortue		1,000
Bayou Teche, La		40,000
Bayou Vermilion and Mermentau River, La		16,200
Waterway, Mermentau River to Sabine River, La. and Tex		190,000
Red River, La., Ark., and Tex. and Okla.:		
Below Fulton, Ark		75,000
Fulton, Ark. to mouth Washita River		42,000
West Galveston Bay channel and tributary streams, Texas		25,000
Brazos River, Tex.:		
Old Washington to Waco, locks and dams		250,000
Velasco to Old Washington, maintenance		25,000
Trinity River, Tex.:		
Between mouth and Dallas		255,000
Open-channel work, maintenance		15,000
Waterway on coast of Texas		50,000
Cypress Bayou, La. and Tex		500
Ouachita River, Ark. and La		202,500
Arkansas River, Ark. and Okla		48,000
Cache, Ark		2,000
St. Francis River, including L'Anguille River and Blackfish Bayou, Ark		7,000
Saline River, Ark		3,000
White River, Ark		20,000
Black and Current, Ark. and Mo		25,000
Cumberland, Tenn.:		
Above Nashville	$5,000	
Below Nashville	5,000	
		10,000
French Broad and Little Pigeon, Tenn		15,000
Tennessee River:		
Above Chattanooga	$510,000	
Between Chattanooga and Browns Island	385,000	
Between Florence and Riverton	100,000	
Below Riverton	110,000	
		1,105,000
Ohio River (locks and dams)		1,800,000
Ohio River, maintenance by open-channel work		550,000
Rouge River, Mich		5,000
St. Joseph, Kalamazoo, and Menominee Rivers. (See Harbors.)		
Fox River, Wis		20,000
Red River of the North, Minn. and N. Dak		7,500
Illinois, Ill		100,000
Mississippi River:		
Head of Passes to mouth of Ohio	$6,000,000	
Ohio to Missouri Rivers	1,000,000	
Missouri River to Minneapolis	1,500,000	
St. Paul to Minneapolis	185,000	
		8,685,000
Missouri River, Kansas City to mouth		2,000,000
Missouri River, Kansas City to Sioux City		150,000
Missouri River, Sioux City to Fort Benton		150,000
Gasconade, Mo		10,000
Osage, Mo		15,000
Mokelumne, Cal		1,000
Petaluma Creek and Napa River, Cal		18,000
Sacramento and Feather, Cal		40,000
San Joaquin River, Fremont Channel, McLeod Lake, Stockton and Mormon Channels		186,132
Willamette and Yamhill, Oreg		42,000
Yaquina, Oreg		28,800
Columbia, at Cascades, Oreg		100,000
Columbia, between foot of Dalles Rapids and head of Celilo Falls, Oreg		600,000
Columbia and tributaries, above Celilo Falls to mouth of Snake River		40,000
Columbia, between Bridgeport and Kettle Falls, Wash		25,000
Snake, Oreg., Wash., and Idaho		25,000
Cowlitz and Lewis, Wash		23,500
Grays, Wash		500
Skagit, Wash		10,000
Chehalis, Wash. (See Harbors.)		
Total rivers		22,091,435

List of appropriations made by H. R. 28180, Sixty-second Congress, third session, for harbors.

Portland, Me	$150,000
St. Croix River, Me	75,000
Burlington, Vt	2,000

Mr. NEWLANDS. We are already entering upon this work in a large way, but we are entering upon it in a detached way, in an unscientific way, in a way that will not bring substantial and speedy results. Is it not time for us now to graft upon this very bill an amendment which will create a river regulation board, which will appropriate $5,000,000 annually for the plans and works of that board until the Panama Canal is completed and which will then provide a fund of $50,000,000 annually for 10 years, which will provide for the cooperation of the Nation with the States, which will provide for the cooperation of the scientific services, and which will secure full development, by the cooperation of the Nation and the States, of all the waterways of the country, in every section of the country, giving preference to no section, but providing, as we did with reference to the Reclamation Service, that so far as practicable contemporaneous work shall be conducted in all sections of the country?

We will thus lighten the labors of Congress, which are now becoming so heavy; and, with other reforms, we may hope to see the time when we can transact the public business without remaining in Washington throughout the entire year and transact that business more effectively than we do now.

This is an era of scientific inquiry and of scientific and expert work. All the great agencies of civilization are now employing the experts everywhere. This method lies at the bottom of corporate success. It lies at the bottom of almost every successful enterprise. Why should we, claiming that an American can do everything and upon the plea that we should not abdicate our functions, endeavor to cover by our individual deliberations and individual actions all the expert work that a great Nation can enter upon?

In this great era of industrial advancement can not Congress pursue the methods of the great men in finance and in corporate activities, who utilize to the highest extent the intellects of others—experts in their various capacities—and thus maintain undiminished their strength and their power? Must we always go through our legislative functions overloaded, as we are to-day, by details that can well be intrusted to others, and that ought to be intrusted to others? It is characteristic of great minds to utilize the brains of others, and only in that way can great accomplishment be reached.

The Senator from Minnesota is desirous of securing a vote on his amendment, and I will not at this time detain the Senate further. The proposal of the Senator presented such an object lesson of the necessity of a broad cooperative policy that I could not forbear making some comment, which will, I trust, be instructive in the consideration of the amendment which I will offer to-morrow, and the insertion of which I should like to be made in the RECORD.

The amendment referred to is as follows:

Amendment intended to be proposed by Mr. NEWLANDS to the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, viz: After line 10, page 65, insert the following:

SEC 2½. That for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end for the storage of flood waters in the watershed of such navigable rivers, including the beneficial use and control of such flood waters, in the maintenance so far as practicable of a standard flow for navigation, the reclamation of arid and swamp lands, and the development of water power; and for the protection of watersheds from denudation, erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies in plans and works, having in view such river regulation and control, the sum of $5,000,000 annually for each of the years following the 1st day of July, 1913, and up to the date of the completion and opening to commerce of the Panama Canal, and thereafter the sum of $50,000,000 annually for each of the 10 years following the completion of the Panama Canal, is hereby reserved, set aside, and appropriated and made available until expended, out of any moneys not otherwise appropriated, as a special fund in the Treasury to be known as the river regulation fund.

That of the said river regulation fund, until otherwise directed by law, one-tenth thereof shall be apportioned to the rivers on the Atlantic coast, one-tenth thereof to the rivers on the Gulf coast outside of the Mississippi River, one-fifth thereof to the Mississippi River from St. Louis to the Gulf, one-tenth thereof to the Missouri River and its tributaries, one-tenth thereof to the Ohio River and its tributaries, one-tenth thereof to the upper Mississippi River above St. Louis and its tributaries, one-tenth thereof to the Sacramento and San Joaquin Rivers and their tributaries in California, one-tenth thereof to the Columbia and Snake Rivers and their tributaries in Oregon, Washington, and Idaho, and one-tenth thereof in the connection of the Great Lakes with the Ohio and Mississippi Rivers.

That a board is hereby created, to be known as the board of river regulation, consisting of the Chief of Engineers of the United States Army, the chairman of the Panama Commission, the chairman of the Board of Review of the Engineer Corps of the Army, the chairman of the Mississippi River Commission, the Director of the United States Geological Survey, the Chief of the Weather Bureau, the Forester of the Department of Agriculture, the Director of the Reclamation Service, the Chief of the Drainage Division of the Department of Agriculture, the secretary of the Smithsonian Institution, one hydraulic engineer, one sanitary engineer, and one electrical engineer; the last three to be appointed by the President and to hold office at his pleasure, and each to receive an annual compensation of $7,500, payable out of the river regulation fund.

The Chief of Engineers shall be the chairman of such board, and the secretary shall be annually elected by the board from its members.

That the functions of said board shall be to investigate and obtain full information concerning all matters involved in or specifically related to the objects set forth in this section, and for such purpose is authorized to expend a suitable and necessary proportion of the moneys therein appropriated; but said board shall not expend or incur liability for the expenditure of any money for the construction or execution of plans or projects without the specific approval of Congress, as hereinafter set forth; that said board is hereby authorized and directed to enlist through the President the services of any Federal department or bureau the statutory authority of which may involve investigations or constructive work that is necessary or desirable in the comprehensive performance of the objects set forth in this section, and to bring into cooperation and to harmonize and unify the work of said departments or bureaus as may be necessary to provide against duplication or unwarranted or incomplete work with respect to the objects herein provided; and that said board is authorized to defray the expenses of such investigations or assistance to the extent of the ultimate cost thereof to said departments or bureaus through a transfer of equivalent proportions of the appropriation herein provided.

That the board shall develop, formulate, and prepare plans for the accomplishment of the purposes herein provided, and shall report the same to Congress annually and at such other times as may be required; and whenever the recommendations or any parts thereof in said report shall receive the approval of Congress the said board shall proceed to construct and execute the same in accordance with the plans so approved: *Provided*, That the provisions of this section shall be so administered as in no way to supersede or conflict with any specific provisions which Congress shall from time to time make by way of appropriations other than such as are made by this act for work and improvements to be performed or maintained by the Corps of Engineers, United States Army, but that all work prescribed under this section shall be supplemental to and coordinated with the work as specifically prescribed by Congress in other acts.

That the board shall in all cases where possible and practicable encourage, promote, and endeavor to secure the cooperation of State and local government bodies, public and quasi public corporations, private associations, and persons in carrying out the purposes and objects of this act, including the securing of the financial cooperation of said parties; that it shall negotiate and arrange plans for the apportionment of work, costs, and benefits, and to secure the agreement and consent of said parties, contingent upon the final approval of same by Congress as herein provided, which approval and consent may include the acceptance and use of any funds or property donated or subscribed or in any way provided for cooperative work; but no moneys shall be expended under any arrangement for cooperation approved by Congress until the funds to be provided by the parties to such arrangement shall have been made available for disbursement.

Mr. BRANDEGEE. Mr. President, I offered an amendment to the amendment and announced that I would ask the Secretary to report it to the Senate, which I now do.

Mr. O'GORMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from New York suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Borah	Dillingham	Martin, Va.	Root
Brandegee	Fall	Myers	Sheppard
Bristow	Fletcher	Nelson	Simmons
Bryan	Gallinger	Newlands	Smith, S. C.
Burton	Johnson, Me.	O'Gorman	Smoot
Chilton	Johnston, Ala.	Oliver	Thomas
Clapp	Jones	Page	Thornton
Clark, Wyo.	Kenyon	Penrose	Townsend
Clarke, Ark.	Kern	Percy	Warren
Crane	Lea	Perkins	Webb
Crawford	Lodge	Pittman	Williams
Cummins	McCumber	Pomerene	
Curtis	McLean	Richardson	

The PRESIDENT pro tempore. Fifty Senators have answered to their names. A quorum of the Senate is present.

Mr. KENYON. Mr. President, I do not want to insist upon my demand for the yeas and nays on this amendment and will withdraw the demand.

The PRESIDENT pro tempore. The demand for the yeas and nays on the amendment of the committee is withdrawn. The Senator from Connecticut offers an amendment to the amendment, which will be stated.

The SECRETARY. It is proposed to add at the end of the proposed amendment the following words:

Said agreement shall not be complete and operative until there shall be filed with the Secretary of War an agreement signed by the said Municipal Electric Co. and the proper authorities of the State of Minnesota in which is recognized and acknowledged the full authority of the State of Minnesota to supervise, regulate, and control the rates to be charged by said company, its successors and assigns, for the energy developed and the right of said State from time to time to readjust such rates, and the right of said State to supervise, regulate, and con-

trol said corporation, its successors or assigns, its management, stocks, bonds, or evidences of indebtedness in such manner as may be provided from time to time by the laws of said State, and the right of said State to exact from said corporation, its successors or assigns, such annual charges as may be just and reasonable, taking into account the amount spent and required to be spent by said corporation in improving the navigation of said river, and the right of said corporation to a reasonable return on the fair value of such dam and appurtenances, works, and property, allowing for the cost of construction, maintenance, and renewal.

Mr. BRANDEGEE. Mr. President, that is a sample of one of the amendments with which the Senate burdened the Connecticut River dam bill. There are several of them here, one of them authorizing the Secretary of War to cancel the permit if the company ever in any way, directly or indirectly, should become identified with any "trust" or anything of that kind. I simply had this read to show what the Senate had done in the other case; but I decline to embarrass the Senator's amendment with any such suggestions, and I withdraw the proposed amendment.

The PRESIDENT pro tempore. The amendment to the amendment is withdrawn. The question is upon the amendment of the committee.

Mr. O'GORMAN. Upon that I call for the yeas and nays.

The PRESIDENT pro tempore. The yeas and nays are demanded. Is there a second?

Mr. BORAH. Mr. President, may I ask which amendment is now to be voted upon?

The PRESIDENT pro tempore. It is the part in italics on pages 53 and 54 of the bill.

Mr. BORAH. Before that amendment is voted on I should like to know what is the difference in principle between this amendment and the Connecticut dam bill that was voted on the other day? I have been compelled to be absent for a time.

Mr. BRANDEGEE. I do not know.

Mr. NELSON. Mr. President, the main difference is that this dam is built by the Federal Government and owned by the Federal Government entirely, and this company is created by the State of Minnesota to utilize it for the purpose of furnishing electric power to the two cities of St. Paul and Minneapolis and to the State university.

Mr. BORAH. Mr. President, this amendment reads:

Such agreement shall provide for the privileges secured, thereby said corporation shall pay to the United States the fair and proportional cost of maintenance of said dam.

And so forth.

There is a difference so far as the physical facts are concerned; but there is no difference, to my mind, between the principle which is involved in this amendment and the one which was involved in the Connecticut Dam bill; that is, that the Government of the United States is proposing to impose a burden for the special benefit of navigation, which burden will finally be paid by those who use this power. It is even more objectionable than the Connecticut dam bill—it has all of its vices and none of its virtues. I can not understand how the Senate can disapprove the Connecticut bill and approve of this amendment.

Mr. SMITH of South Carolina. Mr. President, I should like to ask the Senator from Idaho if this difference does not exist: In the Connecticut River project the question in debate was, if the dam was raised sufficiently high to serve the purpose of navigation, did the Government own the power incidentally created or not? This amendment proposes to go to the extent of creating an addition to the dam for the purpose of creating power. The difference between the two is that one is clearly within the function of the Government—that is, to build the dam—and the only question is whether the incidental power created by that dam is Government property or not. This includes that and goes further, and grants to the Government the right to construct, at an additional cost, a dam for the purpose of generating power.

Mr. BORAH. Mr. President, I am not going to delay the vote on this matter. I have expressed myself on the other measure, so that it is not necessary to go into a discussion of it. I do not desire to delay it. But the difference which the Senator states is not a difference except in a very limited way, because the principle which is involved, in my judgment, is just the same.

Mr. SMITH of South Carolina. I should like to call the Senator's attention to this fact, because it seems to me there is such a clearly marked difference that it is not even a subject of argument. The Government has the power delegated to it to construct a dam to improve navigation, and, where the circumstances demand such action, it is obligatory. As to the incidental water power that may be generated by the use of the power of the Government, the question in the case of the Connecticut River dam was, What were the Government's rights in that incidental power? In this measure the Government builds the dam to the extent of creating the necessary depth of water for navigation, and then goes further and builds an addition to that dam for the purpose of creating additional water power for commercial purposes. It not only recognizes the right of the Government in the ownership of waters incidentally generated in the construction of the dam, but it grants it the power to build a dam for the purpose of creating a water power.

Mr. O'GORMAN. Mr. President, I desire to add a few words to what I said earlier this afternoon. In my judgment, in principle this amendment is as objectionable as the Connecticut dam bill, which was before us a few days ago. In some respects it is worse than the Connecticut dam bill. This much is clear: The Senate can not adopt this amendment without stultifying itself, and without giving encouragement to those who advocated the Connecticut dam bill to renew their efforts to have that bill passed by Congress, although this body by a large majority, a few days since, declared that its principles were obnoxious to the Constitution of the United States.

Mr. NEWLANDS. May I ask the Senator from New York whether he regards the amendment as objectionable if the State of Minnesota, or this corporation organized under its authority, will joint with the United States in the construction of the dam, the United States paying that proportion of it that is useful to navigation and the State or its agent, acting under its authority, paying that proportion which creates the power necessary for the development of electricity?

Mr. O'GORMAN. I would consider that proposition absolutely indefensible. The State of Minnesota can not enlarge the power of the Federal Government, and under the restricted and enumerated powers possessed by the Federal Government it has no right to the pretensions recognized by this measure.

Mr. NEWLANDS. The Senator, therefore, contends that in this case, where a structure in the river is necessary for navigation, and that structure can also be made available for the development of water power, it would be incompetent for the Nation to enter into an arrangement with the State by which the Nation would pay that portion of the cost which would promote navigation and the State or its agent would pay that proportion and the cost which would promote the development of electric power.

Mr. O'GORMAN. There is only one way provided by the Constitution of the United States for the reimbursement of expenses incurred by the United States Government, and that is by the taxing clause of the Constitution. The Federal Government, in disregard of the authority and limitation, can not seek to impose a specific tax upon the locality where a necessary improvement is made by the Federal Government under the commerce clause. If the navigability of a river needs improvement, it is the duty of the Government to go into that river and make the improvement, and once it is made the function of the Government is exhausted. The rights and the powers and the authority of the State remain absolutely unimpaired.

Mr. NEWLANDS. I do not think the Senator understood my question. The question that I put did not involve taxation or a charge for the use of the dam, or anything of that kind. It simply involves a case where the Nation desires to promote navigation and a dam is necessary for that purpose; and the State wishes to promote the development of hydroelectric power; and the same dam is useful for that purpose it requiring only a somewhat larger expenditure. I ask the Senator whether he objects to an arrangement by which the Nation and the State can cooperate in that work, each paying the part of the cost of the structure that belongs to its jurisdiction.

Mr. O'GORMAN. I gave, I think, a sufficient answer to that proposition; and beyond that I have to remark that that is not the proposition we are called to vote upon. That is not the proposition involved in the bill affecting the improvement of the Mississippi River.

Mr. NEWLANDS. But I was addressing myself to the question as to what arrangement could be made, in the judgment of the Senator, to promote a very highly desirable end, namely, the promotion of navigation and the development of the hydroelectric power by means of the same structure, the work involving the sovereignty and the jurisdiction of the Nation and the State, and involving a certain degree of cooperation between them. Is it the Senator's view that there can be no cooperation between the Nation and the States in a work of that kind, where each does its part, each contributes to the cost, and each receives the benefit of the use that belongs to its jurisdiction?

Mr. O'GORMAN. Each power, the Federal Government on the one hand and the State on the other, is operating within a sphere altogether its own. There is no need, as was suggested here to-day, to have this very valuable surplus water wasted. If the organization in which the cities of Minneapolis and St.

Paul and the university of the State are interested is the owner of the riparian rights, as has been stated here, I know of no reason why, without this legislation, it can not go in and make use of this surplus water to a point that will not impair the navigability of the river.

Mr. NEWLANDS. Mr. President, I simply wanted to pursue the matter with the view to securing from the Senator some solution of a very desirable object, and that is the utilization from the same structure in the interest of efficiency and economy of two uses, one the national use relating to navigation and the other the State use relating to the promotion of hydroelectric power. I wanted to have the light of the Senator's judgment as to how we could accomplish that desirable purpose within the constitutional powers of both sovereignties.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

Mr. CLARKE of Arkansas. Mr. President, I voted against the insertion in the Connecticut River dam bill of the proposition to allow the National Government to take toll for the right to employ the surplus water created by that dam, but I shall vote for this particular amendment upon a perfectly distinct ground, or rather for a reason that is entirely distinguishable from the principle involved in that bill.

The National Government has the option of improving rivers or withholding certain improvements. All legislative powers are discretionary powers. If the National Government sees proper to make it a condition upon which it will improve a river that any incidental revenues which might be derived from the improved condition shall be devoted in part to the payment of the expense of that improvement, it is well within its rights when it insists that that shall be done.

Where the National Government sees proper to improve a river by the utilization and installation of a dam and it finds in doing so it has created a surplus of waters which can be commercially used by being employed in the creation of electric power, it has a right to sell that surplus to anyone or to harness it itself and sell it in its completed form.

In my judgment, when the National Government is not called upon to improve any particular reach of a river it has no other rights than those of navigation. If it shall be deemed proper to install a dam at a point where the dam is not necessary for the purpose of improving navigation but it is installed there for the single purpose of creating power, the National Government has no authority to deal with that structure further than to see to it that in its construction it does not operate as an obstruction to navigation.

For reasons good or bad the National Government proposes to install this dam at St. Paul and Minneapolis. If in doing so a surplus of water is created that would run to waste if it were not employed for the wholesome purpose of creating this power, it has the right to say that that power shall not run to waste, because no government was ever designed that would compel an idle, vain, foolish, or unremunerative thing to be done.

I find I have no difficulty, therefore, in drawing a distinction between the two propositions, and I shall vote to put this amendment on the bill.

Mr. O'GORMAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from New York?

Mr. CLARKE of Arkansas. With pleasure.

Mr. O'GORMAN. May I ask a question of the Senator from Arkansas? Could not the State of Minnesota provide for the use and consumption of extra water beyond what is needed to improve the navigability of the river?

Mr. CLARKE of Arkansas. It could not; for the reason that there is a proprietary right as well as a governmental involved. When the National Government condemns a site on which to erect a dam and erects the dam, nobody without the consent of the proprietor can enter on that dam for any purpose.

Mr. O'GORMAN. Can it take more water than is necessary for the specific purpose?

Mr. CLARKE of Arkansas. It is not a question of taking water. The Government does not assume to take a drop.

Mr. O'GORMAN. It is appropriating it.

Mr. CLARKE of Arkansas. No; it is not appropriating anything.

Mr. O'GORMAN. Then what is the objection to the State providing for the use of the surplus water?

Mr. CLARKE of Arkansas. It simply has not created it. The locus is there, but it can not enter upon the premises for the purpose of doing anything with it. The dam itself belongs to the National Government. It is put upon a site condemned or seized for that purpose, and the existence of the surplus there is due to the exercise of the governmental power of the United States. The thing that prohibits invasion on the structure at that particular point is the right of proprietorship in the National Government, acquired when the Government expended money there to erect the dam. It is a proprietor as well as a government. It is a proprietor of the dam and has all the rights of possession. It has the right of protecting its possessions like any other proprietor, and you can not enter on the dam and do anything good or bad with it without the consent of the National Government. The distinction is a daylight distinction from my standpoint. I find no difficulty whatever in voting for this amendment.

Mr. BRANDEGEE. Mr. President, before the question is put I wish to make a statement that will not take 30 seconds. I voted in favor of the Connecticut River bill because I had absolutely no doubt of its entire constitutionality, inasmuch as the payment provided for by the company to the Government was to be expended for purposes of improving the navigability of the stream, and for those purposes only.

As to this provision, I have some doubt about its constitutionality; but in order that the question may be adjudicated by the Supreme Court I shall vote in favor of this provision. I consider that it is fairly well adapted to raise the question squarely in the court.

Mr. CLARKE of Arkansas. May I ask the Senator from Connecticut whether he proposes to offer the Connecticut River dam bill as an amendment to this bill?

Mr. BRANDEGEE. The Connecticut River dam bill as it passed the Senate by a very large majority, with the amendments, I expect will be offered later on, at a proper time, when the bill is being considered for amendments by individual Senators.

Mr. CLARKE of Arkansas. I take advantage of the circumstance while I am on my feet at this time to say——

Mr. NELSON. The Senator from Connecticut does not offer it as an amendment at this time?

Mr. BRANDEGEE. Not at all.

Mr. CLARKE of Arkansas. The reason why I think the Minnesota case is distinguished from that is because of the fact of the proprietorship of the National Government of the dam and the right to utilize any incidental value that may be created by it. It is the same as if the National Government owned a military reservation or an Army post and a railroad sought to cross it. If the use by the railroad company would be entirely consistent with its use as an Army post, there would be no reason why the National Government should not be paid for that right.

A Senator near me suggests that as the Connecticut River dam is entirely constructed by a private corporation and at its own expense the National Government has no part in the erection of the dam, and therefore has no proprietary interest to protect.

Mr. JONES. The amendment is open to amendment, is it not?

The PRESIDENT pro tempore. It is open to amendment.

Mr. JONES. I wish to move to strike out all of lines 22, 23, 24, and 25 on page 53, and lines 1 and 2 on page 54.

The PRESIDENT pro tempore. The Senator from Washington moves to strike out certain lines in the amendment, which will be read.

The SECRETARY. On page 53, beginning with line 22, strike out:

> And also pay in addition an annual sum of 4 per cent upon such amount as the United States shall have invested and expended in the completion of the project by which such water power is developed and maintained over and above the amount actually expended and which would have been expended in completion of the project for navigation only.

Mr. JONES. Mr. President, just a word. I understand this dam was built for the purpose of creating and perfecting navigation. If in the building of it the Government has had some property in the water that it has to a certain extent impounded, I do not believe it ought to make any charge for the use of water that is not necessary for navigation purposes.

I understand this is a municipal corporation. Every cent imposed upon this power will have to be paid by the people. Therefore I think the Government ought not to make this charge, but it should let the people of St. Paul and Minneapolis get the benefit of it.

That is the reason why I have moved to strike out the clause which has been read at the desk.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment. [Putting the question.] The nays appear to have it.

Mr. JONES. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BOURNE (when his name was called). I have a temporary pair with the Senator from Alabama [Mr. BANKHEAD]. Consequently I do not feel at liberty to vote. If I were at liberty to vote, I would vote "nay."

Mr. CHILTON (when his name was called). I have a pair with the Senator from Illinois [Mr. CULLOM]. I do not know how he would vote on this question.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. As that Senator is absent because of illness, I withhold my vote.

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. As that Senator is not in the Chamber, I will withhold my vote.

Mr. KERN (when his name was called). I have a general pair with the Senator from Kentucky [Mr. BRADLEY]. Not knowing how he would vote if present, I withhold my vote.

The roll call was concluded.

Mr. CLARK of Wyoming. I will transfer my pair with the Senator from Missouri [Mr. STONE] to the junior Senator from Idaho [Mr. BRADY] and vote. I vote "yea."

Mr. TOWNSEND. I should like to announce that the senior Senator from Michigan [Mr. SMITH] is unavoidably absent and that he is paired with the junior Senator from Missouri [Mr. REED].

Mr. CHILTON. I transfer my pair to the junior Senator from Maine [Mr. GARDNER] and vote. I vote "nay." While I am on my feet I wish to announce the absence, on account of illness, of my colleague [Mr. WATSON], and that he is paired with the senior Senator from New Jersey [Mr. BRIGGS].

The result was announced—yeas 10, nays 54, as follows:

YEAS—10.

Borah	Johnston, Ala.	Smith, Ariz.	Williams
Clark, Wyo.	Jones	Thornton	
Fall	O'Gorman	Tillman	

NAYS—54.

Ashurst	Curtis	Martine, N. J.	Sheppard
Brandegee	Dillingham	Myers	Simmons
Bristow	Dixon	Nelson	Smith, Ga.
Bryan	Fletcher	Newlands	Smith, S. C.
Burnham	Gallinger	Oliver	Smoot
Burton	Gamble	Overman	Stephenson
Catron	Gronna	Page	Sutherland
Chamberlain	Johnson, Me.	Penrose	Swanson
Chilton	Kenyon	Percy	Thomas
Clapp	Lea	Perkins	Townsend
Clarke, Ark.	Lodge	Poindexter	Webb
Crane	McCumber	Pomerene	Wetmore
Crawford	McLean	Richardson	
Cummins	Martin, Va.	Root	

NOT VOTING—31.

Bacon	Cullom	Kavanaugh	Shively
Bankhead	du Pont	Kern	Smith, Md.
Bourne	Foster	La Follette	Smith, Mich.
Bradley	Gardner	Lippitt	Stone
Brady	Gore	Owen	Warren
Briggs	Guggenheim	Paynter	Watson
Brown	Hitchcock	Pittman	Works
Culberson	Jackson	Reed	

So Mr. JONES's amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is now upon the amendment reported by the committee.

Mr. KENYON. On that I demand the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BOURNE (when his name was called). I have a temporary pair with the Senator from Alabama [Mr. BANKHEAD], but I am at liberty to vote "yea" on this question, knowing that, if present, the Senator from Alabama would vote in that way. I therefore vote. I vote "yea."

Mr. CHILTON (when his name was called). I transfer my pair with the senior Senator from Illinois [Mr. CULLOM] to the Senator from Alabama [Mr. BANKHEAD], and vote. I vote "yea."

Mr. DU PONT (when his name was called). I again announce my pair with the senior Senator from Texas [Mr. CULBERSON]. As I do not know how he would vote on this question if present, I withhold my vote.

Mr. KERN (when his name was called). I again announce my pair with the Senator from Kentucky [Mr. BRADLEY], and withhold my vote, not knowing how he would vote if present.

The roll call was concluded.

Mr. CHILTON. I wish again to announce the pair of my colleague [Mr. WATSON] with the Senator from New Jersey [Mr. BRIGGS]. I will let this announcement stand for the remainder of the day.

The result was announced—yeas 46, nays 16, as follows:

YEAS—46.

Ashurst	Cummins	Martin, Va.	Simmons
Bourne	Curtis	Martine, N. J.	Smoot
Brandegee	Dillingham	Nelson	Stephenson
Bristow	Dixon	Newlands	Sutherland
Burnham	Fletcher	Oliver	Swanson
Catron	Gallinger	Page	Tillman
Chamberlain	Gamble	Penrose	Townsend
Chilton	Gronna	Percy	Webb
Clapp	Lea	Perkins	Wetmore
Clarke, Ark.	Lodge	Pomerene	Williams
Crane	McCumber	Richardson	
Crawford	McLean	Root	

NAYS—16.

Borah	Fall	Myers	Smith, Ariz.
Bryan	Johnson, Me.	O'Gorman	Smith, S. C.
Burton	Johnston, Ala.	Poindexter	Thomas
Clark, Wyo.	Kenyon	Sheppard	Thornton

NOT VOTING—33.

Bacon	Foster	La Follette	Smith, Md.
Bankhead	Gardner	Lippitt	Smith, Mich.
Bradley	Gore	Overman	Stone
Brady	Guggenheim	Owen	Warren
Briggs	Hitchcock	Paynter	Watson
Brown	Jackson	Pittman	Works
Culberson	Jones	Reed	
Cullom	Kavanaugh	Shively	
du Pont	Kern	Smith, Ga.	

So the amendment was agreed to.

Mr. McLEAN. Mr. President, in view of the character of the amendment which has just been adopted to the river and harbor bill, I desire to give notice that at the proper time I shall offer as an amendment Senate bill 8033, which is the Connecticut River dam bill, which passed the Senate the other day with several amendments attached. For the information of the Senate, I will say that the amendment which I shall offer is the bill as it passed the Senate; that is, it includes the amendment offered by the Senator from Alabama [Mr. BANKHEAD], the amendment offered by the Senator from Washington [Mr. JONES], and the amendment offered by the Senator from Idaho [Mr. BORAH].

Mr. NELSON. Mr. President, we have now disposed of all the amendments to the pending bill except the two amendments in which the Senator from Missouri [Mr. STONE] is interested, which we have agreed should lie over until to-morrow, and the amendment which the Senator from Connecticut [Mr. MCLEAN] proposes to offer to-morrow. I therefore ask that the bill may be now laid aside.

Mr. THOMAS, Mr. PERCY, and others addressed the Chair.

The PRESIDENT pro tempore. One Senator at a time, please. The Senator from Colorado [Mr. THOMAS] first addressed the Chair, and the Chair will recognize him.

Mr. THOMAS. Mr. President, I want to ask unanimous consent to take up a measure, but I shall do that later.

Mr. NEWLANDS. Mr. President, I wish to make a statement in connection with the statement made by the Senator from Minnesota [Mr. NELSON]. I shall also ask a vote to-morrow upon the amendment which I have offered providing for the creation of a river regulation board.

Mr. NELSON. Certainly; the Senator's amendment will come up to-morrow. I ask now that the bill be laid aside for the day.

Mr. BORAH. Mr. President——

Mr. PERCY. I should like to ask the Senator from Minnesota a question in regard to the bill.

The PRESIDENT pro tempore. The bill, under the agreement made this afternoon, will necessarily go over, as an agreement was reached that committee amendments should first be considered, and there are such amendments which are to be considered to-morrow.

Mr. PERCY. What I wished to ask does not relate to that, Mr. President. I wish to know what disposition was made of the amendment offered proposing to appropriate $250,000 to the city of Memphis? Did that go out, as I understand, on a point of order?

Mr. NELSON. I will state that the Senator from Mississippi made the point of order, and the point was sustained. That is my recollection.

Mr. PERCY. That is my recollection of it.

Mr. NELSON. I ask that the pending bill may be laid aside.

Mr. BORAH. Mr. President, before that is done I want to say that I shall offer some amendments to the bill to-morrow, and I presume that will be in order.

The PRESIDENT pro tempore. That will be in order. Without objection, the bill will be laid aside.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. CURTIS. I move that the Senate proceed to the consideration of House bill 28607, the diplomatic and consular appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, which had been reported from the Committee on Appropriations with amendments.

Mr. CURTIS. I ask unanimous consent that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee amendments be first disposed of.

The PRESIDENT pro tempore. Without objection, that order will be made.

The Secretary proceeded to read the bill.

The first amendment was, under the subhead "Boundary line, Alaska and Canada, and the United States and Canada," on page 12, line 7, after the word "notes," to strike out "$100,000" and insert "$105,000," so as to make the clause read:

To enable the Secretary of State to mark the boundary and make the surveys incidental thereto between the Territory of Alaska and the Dominion of Canada, in conformity with the award of the Alaskan Boundary Tribunal and existing treaties, including employment at the seat of government of such surveyors, computers, draftsmen, and clerks as are necessary to reduce field notes; and for the more effective demarcation and mapping, pursuant to the treaty of April 11, 1908, between the United States and Great Britain, of the land and water boundary line between the United States and the Dominion of Canada, as established under existing treaties, to be expended under the direction of the Secretary of State, including employment at the seat of government of such surveyors, computers, draftsmen, and clerks as are necessary to reduce field notes, $105,000, together with the unexpended balance of previous appropriations for these objects.

The amendment was agreed to.

The next amendment was, on page 16, after line 5, to strike out:

FISHERIES CONVENTION, UNITED STATES AND CANADA.

For the payment of the compensation of a commissioner on the part of the United States under the convention between the United States and Great Britain concerning the fisheries in waters contiguous to the United States and the Dominion of Canada, signed at Washington on April 11, 1908, and of the share of the United States of the expenses that may be incurred in carrying out the convention during the fiscal year ending June 30, 1914, $2,000.

The amendment was agreed to.

The next amendment was, under the subhead "Waterways treaty, United States and Great Britain: International Joint Commission, United States and Great Britain," on page 18, line 22, after the name "District of Columbia," to insert "expense of printing"; and, on page 19, line 16, after the word "purpose," to insert "to be disbursed under the direction of the Secretary of State," so as to make the clause read:

For salaries and expenses, including salaries of commissioners and salaries of clerks and other employees appointed by the commissioners on the part of the United States with the approval solely of the Secretary of State, including rental of offices at Washington, D. C., expense of printing, and necessary traveling and other expenses, and for the one-half of all reasonable and necessary joint expenses of the International Joint Commission incurred under the terms of the treaty between the United States and Great Britain concerning the use of boundary waters between the United States and Canada, and other purposes, signed January 11, 1909; as well as for the payment of necessary expenses incurred and compensation for services rendered under the direction of the Secretary of State in the examination and preparation of cases involving the use, distribution, or diversion of waters and other questions or matters of difference covered by the treaty of January 11, 1909, between the United States and Great Britain, and in representing this Government and the American interests involved in the presentation of such cases before the International Joint Commission constituted under that treaty, the unexpended balance of the appropriation made for this object for the fiscal year 1913 is hereby reappropriated and made available for this purpose, to be disbursed under the direction of the Secretary of State.

The amendment was agreed to.

The next amendment was, on page 19, after line 21, to insert:

Contribution toward the adornment of the Peace Palace at The Hague: To enable the United States to contribute to the adornment of the Palace of Peace at The Hague, by sending some object of art of national production, $30,000.

The amendment was agreed to.

The next amendment was, on page 20, after line 6, to insert:

International conference for the purpose of drawing up international rules and regulations for the assignment of load lines to merchant ships: For the participation of the United States by official technical delegates at the international conference to be called by the British Government to meet in London during the year 1913 for the purpose of drawing up international rules and regulations for the assignment of load lines to merchant ships, $5,000, to be immediately available.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

JEANIE G. LYLES.

Mr. THOMAS. I ask unanimous consent for the present consideration of the bill (S. 8404) for the relief of Jeanie G. Lyles.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. SMOOT. Mr. President, I desire to ask the Senator from what committee the bill is reported?

Mr. THOMAS. It was reported on February 17 from the Committee on Claims by the Senator from South Dakota [Mr. CRAWFORD].

Mr. SMOOT. Is there a printed report accompanying the bill?

Mr. THOMAS. There is a printed report.

Mr. SMOOT. All I wish to say is that, if this bill should become a law, it would be entering upon a policy which I think would lead to the expenditure of a great deal of money. I was not present in the Claims Committee when the bill was passed upon, and I do not like to offer an objection as against the chairman of that committee; but it does seem to me that it is a very dangerous precedent to establish, and that such a bill should not be passed unless there is some real good reason for so doing.

Mr. THOMAS. There is, Mr. President, and I think the report of the committee will disclose the reason. The report is brief, and I ask that it may be read.

The PRESIDENT pro tempore. Without objection, the report will be read.

The Secretary proceeded to read the report submitted by Mr. CRAWFORD on the 17th instant, and read as follows:

The Committee on Claims, to whom was referred the bill (S. 8404) for the relief of Jeanie G. Lyles, having considered the same, report thereon with a recommendation that it do pass.

The right of the claimant to the sum allowed and recommended by this committee is based upon an invention of an attachment to a packsaddle for carrying a rapid-firing gun on horseback, by First Lieut. De Witt C. Lyles, of the Twentieth United States Infantry, who died in the general hospital, Washington Barracks, December 9, 1903, and who was a son of the claimant. This young officer, while serving in the Philippine War, was afterwards required to go into rough and mountainous country to fight the enemy, and was forced to carry his rapid-firing gun on horseback, which was very unhandy. To obviate the difficulty he invented a frame, or attachment to a saddle, which was adopted by the War Department, and has been in general use ever since as a military device for carrying rapid-firing guns overland on horseback.

This invention was patentable, but no patent was taken out by the inventor; and as it does not appear from the evidence that he spent any time from his military duties in working out this invention, and inasmuch as the Government has received as much benefit from its use as it could have done had it been patented, in which case the Government would have been required to pay the inventor a royalty, it is deemed by the committee that it is right and proper for the Government of the United States to pay about what the royalty would be had the invention been patented. In order to arrive at an equitable allowance the whole question has been submitted to the War Department, and we are advised by that department that $2,500 would not be excessive, with a recommendation to pay that amount. The committee did not agree altogether with this recommendation, but in their better judgment they have recommended the payment, in full satisfaction of the claim, of the sum of $1,500.

The committee was further prompted in making this recommendation by the feeling that we ought to encourage inventions useful to the Army by those who are engaged in our military service by paying whatever is reasonable for such inventions. It was estimated in 1910 by the War Department that more than 3,000 of these packsaddle attachments were either in use or ordered to be put in use in the United States Army.

The claimant is shown to be dependent upon the invention for support.

Mr. SMOOT. Mr. President, I will say that that bill will lead to quite a good deal of discussion if it is proceeded with, and therefore I object to its consideration at this time.

The PRESIDENT pro tempore. The Senator from Utah objects.

GREAT KANAWHA RIVER BRIDGE, WEST VIRGINIA.

Mr. CHILTON. I ask unanimous consent for the present consideration of the bill (H. R. 28187) to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes. This bill, and another which I shall also ask to have taken up, are very important to my State and the localities interested. They are both reported favorably from the Committee on Commerce.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MONONGAHELA RIVER BRIDGE, WEST VIRGINIA.

Mr. CHILTON. I now ask the Senate to take up for consideration the bill (H. R. 27837) to authorize the Buckhannon

& Northern Railroad Co. to construct and operate a bridge across the Monongahela River, in the State of West Virginia.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PACKAGES UNDER FOOD AND DRUGS ACT.

Mr. OLIVER. I ask unanimous consent for the present consideration of the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill and, there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Manufactures with amendments, on page 2, line 7, after the words "*Provided, however,*" to strike out "That reasonable variations shall be permitted and tolerances shall be established by rules and regulations made in accordance with provisions of this act" and insert "That the Secretary of Agriculture is authorized to establish rules and regulations permitting reasonable variations where in his judgment exactness is impracticable, and shall keep a record thereof: *Provided further,* That the provisions of this paragraph shall not apply to articles in packages or containers when the retail price of such article is 6 cents or less," and, in line 22, before the word "months," to strike out "twelve" and insert "eighteen," so as to make the bill read:

Be it enacted, etc., That section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, be, and the same is hereby, amended by striking out the words "Third. If in package form, and the contents are stated in terms of weight or measure, they are not plainly and correctly stated on the outside of the package" and inserting in lieu thereof the following:

"Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count: *Provided, however,* That the Secretary of Agriculture is authorized to establish rules and regulations permitting reasonable variations where in his judgment exactness is impracticable, and shall keep a record thereof: *Provided further,* That the provisions of this paragraph shall not apply to articles in packages or containers when the retail price of such article is 6 cents or less."

SEC. 2. That this act shall take effect and be in force from and after its passage: *Provided, however,* That no penalty of fine, imprisonment, or confiscation shall be enforced for any violation of its provisions as to domestic products prepared or foreign products imported prior to 18 months after its passage.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

PUBLIC HEALTH SERVICE.

Mr. FLETCHER. I ask unanimous consent for the present consideration of the bill (S. 7722) to promote the efficiency of the Public Health Service.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. SMOOT. Mr. President, I have not the papers with me, as I did not expect the bill to come up at this time. I desire to offer certain amendments to it, and then I shall have no objection to its consideration. I therefore ask the Senator from Florida to let it go over.

The PRESIDENT pro tempore. Objection is made, and the bill will go over.

WASHINGTON-OREGON CORPORATION.

Mr. JONES. I ask unanimous consent for the present consideration of the bill (S. 8233) authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912. I will state that this is a short bill, and is purely a local one.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SMOOT. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Friday, February 21, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *February 20, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou who didst call us into being and hast endowed us with marvelous faculties of mind and soul, we realize the great responsibility which comes with these precious gifts and we most humbly and devoutly pray for wisdom, strength, and grace that we may use them for the uplift of humanity and the betterment of our individual life, that Thy kingdom may come and Thy will be done in every heart as it was in the heart of the Christ. Amen.

The Clerk began the reading of the Journal of the proceedings of yesterday.

Mr. RODDENBERY. Mr. Speaker, I make the point that no quorum is present.

Mr. HARDWICK. Mr. Speaker, I move a call of the House.

Mr. RODDENBERY. I withdraw the point of order of no quorum, Mr. Speaker.

Mr. HARDWICK. Then I withdraw the motion for a call of the House.

The Clerk completed the reading of the Journal, which was approved.

CALIFORNIA SCHOOL LAND INDEMNITY SELECTIONS.

Mr. RAKER. Mr. Speaker, the bill S. 5068 is on the calendar, and the Committee on the Public Lands will not have an opportunity to get into their report the decision of the Commissioner of the General Land Office, and I ask unanimous consent that that report and decision be printed in the RECORD, so that it may be available when the bill comes up for consideration before the House.

The SPEAKER. The gentleman from California asks unanimous consent to have the document which he refers to printed in the RECORD. Is there objection?

There was no objection.

The document is as follows:

CALIFORNIA SCHOOL LAND INDEMNITY SELECTIONS—LAKE PROTESTS.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, February 18, 1913.

The SECRETARY OF THE INTERIOR.

SIR: I have the honor to submit the following memoranda and recommendations with reference to the "Lake protests" against the certification of certain school land indemnity selections pending on behalf of the State of California in the General Land Office.

These protests attack the validity of selections made under the procedure authorized by the departmental decision found in 28 L. D., 57, in which it was held:

"Where a forest reservation includes within its limits a school section surveyed prior to the establishment of the reservation, the State under the authority of the first proviso to section 2275, Revised Statutes, as amended by the act of February 28, 1891, may be allowed to waive its right to such section and select other land in lieu thereof."

This decision was rendered January 30, 1899, notwithstanding the fact that Judge Wellborn, in the case of Hibberd *v.* Slack (84 Fed. Rep., 571), December 6, 1897, had taken a substantially contrary view of the proper construction of sections 2275 and 2276, Revised Statutes, as amended by the act of February 28, 1891. While no reference was made to the Hibberd case in the departmental decision, it was, however, not because the decision was not known, but rather apparently for the reason it was not regarded as of controlling effect, and it was later so expressly stated (34 L. D., 599). In any event the department adhered to the position taken in this matter of exchange and later followed it in the adjustment of the school grant to other States, notably in the reported cases of Dunn et al. *v.* State of California (30 L. D., 608), Territory of New Mexico (29 L. D., 364, and 34 L. D., 599); also in the case of State of California (34 L. D., 613).

Under these rulings a large number of school indemnity selections, probably aggregating 200,000 acres, were made by the State of California wherein were designated as bases sections 16 and 36 in forest reservations that were established subsequent to the public survey. These selections would doubtless have passed to certification had it not been for other difficulties encountered in the adjustment of the California school grant, which led practically to a suspension of all certificates for a number of years, a condition which only recently has ceased to exist.

The State continued to make selections, using as bases therefor surveyed school sections situated in national reservations, for several years, but as efforts were made to purchase the bases so used, and acting under the advice of the attorney general of the State, the Thompson Act was passed by the California Legislature March 24, 1909. This act made radical changes in the manner of administering the school grant, and, among other things, provided:

"All selections heretofore made by the Surveyor General and which are now pending before the Land Department of the United States based upon surveyed school sections situated within the exterior boundaries of a permanent reservation, shall be, if accepted by the United States Land Department, deemed to be valid bases, and upon the listing of such lands the title of the State to such surveyed school sections shall pass to and vest in the United States."

November 29, 1909, Fred W. Lake, of Oakland, Cal., addressed a letter to the General Land Office, as follows:

"Please be advised that clients of mine claim in place the school lands enumerated in list inclosed, and which lands, I understand, have been offered as bases for lieu selections that are now pending and undetermined in your office.

"These are surveyed lands, the fee whereof vested in the State of California upon survey and before they were offered as bases. While they might be surrendered as bases under the act of Congress of February 28, 1891, amending sections 2275 and 2276 of the Revised Statutes, such surrender and use was legally impossible until authorized by act of the State legislature. Your attention is called to the fact that until the passage of the act of March 24, 1909, no such legislation was ever had in California. It is the claim of my clients that until that date surveyed school sections in place were not legally available for use in California as bases, and that their designation as such by the State land officer was ultra vires and void. In an opinion rendered to the Surveyor General, the State's attorney general so advised in 1907.

"Before March 24, 1909, clients of mine duly claimed and appropriated the land enumerated in list inclosed under the laws of the State of California providing for the sale of school lands. By the proceedings had they instituted between themselves and the State contracts for the purchase and sale of these lands, and these contracts, they contend, are still subsisting and unexecuted. Suits in the courts of the State to enforce these contracts have been brought in some of the cases, and in due course and shortly will be brought in all of them. The purpose of this letter is to put you upon notice of these claims to the school lands in place."

Receipt of this letter was acknowledged, but no formal response was made until April 4, 1910, when Mr. Lake was advised:

"It is well settled that in adjusting congressional grants of land to the State the executive officers of the United States have no jurisdiction to review transactions between the State and the purchaser, nor between the State and its locating agent and determine whether such purchasers or location agents complied with the provisions of the laws relating to the sale of the lands. (Frasher *v.* O'Connor, 115 U. S., 102.)

"Under the general rule of law announced in this case and the section of the Political Code of California, just quoted, the surveyor general of the State is the party with whom the United States must deal in adjusting the school-land grant, and, so far as known to this office at the present time, if the lands to which you refer have, as a matter of fact, been offered in exchange under section 2275, Revised Statutes, they have been offered in accordance with the laws of the State and of the United States. This office, therefore, can not be controlled in the adjustment of said school grant by litigation between the State and would-be purchasers."

And the list accompanying his letter was accordingly returned to him.

By letter of April 14, 1910, Mr. Lake again transmitted the lists of lands in which he alleged that his clients had an adverse interest, again urging their claims and closing with the statement:

"I return again the list of school sections claimed by my clients in place. Perhaps on further consideration of the matter you will think it proper to at least keep this list for reference in your office."

Thereafter Mr. Lake, by letter of May 16, 1910, inclosed to the department copies of the correspondence between the land office and himself on the subject of the claimed rights of his clients. This letter was acknowledged on June 7, 1910, by Secretary Ballinger, but so far as the files disclose no other response was made until after report was received from the State.

By letter of June 11, 1910, the General Land Office submitted to the State surveyor general of California a copy of the list of lands accompanying the protest of Mr. Lake and requested advice in the premises with such statements as might be deemed appropriate or necessary in connection with the adjudication of the State's pending selections. At that time a caveat was put on the status cards in the land office showing the assertion of the claims to the base lands by Lake's clients.

October 19, 1910, the attorney general of the State of California, acknowledging the receipt of the letter of June 11, 1910, to the surveyor general, responded at length, but confined his answer largely to the situation in the school-indemnity question as it existed in California after the passage of the Thompson Act of March 24, 1909, concluding as follows:

"From the foregoing it is apparent:

"First. That as to all selections made subsequently to March 24, 1909, no question can arise as to the authority of the surveyor general to assign surveyed sixteenth and thirty-sixth sections, situated within the exterior boundaries of permanent forest reservations, as bases for indemnity selections.

"Second. All selections made by the surveyor general prior to March 24, 1909, and April 24, 1909, and based upon surveyed sixteenth and thirty-sixth sections are recognized as and declared to be good and valid.

"The applications referred to by Mr. Lake were presented prior to March 24, 1909, and in a number of cases he has commenced mandate proceedings to compel the surveyor general to file the same. In view of this fact I have advised the surveyor general to submit to you a list of those sections for which Mr. Lake presented applications, and also a list of those selections made since March 24, 1909, under the provisions of the Thompson Act.

"As to the latter, as above stated, the surveyor general has full authority to assign surveyed bases, and Mr. Lake's objections would not apply thereto. As to the former I shall notify you of the result of the litigation commenced by him. It is not the desire of the State to have your department list any selection where the validity of the bases assigned may be at all doubtful, but there can be no question in view of the legislation above referred to, as to any such surveyed bases."

The next action in this matter appears to have been taken June 16, 1911, when the following departmental letter was addressed to Mr. Lake.

"I have received your letter of June 9, 1911, inclosing a copy of a letter addressed to the department May 16, 1910, relative to certain surveyed sections 16 and 36 in the State of California, which have been designated by the State surveyor general as bases for indemnity selections. It appears from your letter that the base lands were then and are now claimed by certain citizens of the State adverse to their designation as bases, and that these claims are now in process of litigation in the State court.

"In reply I have to advise you that a list of the school selections claimed by your clients is now on file in the General Land Office, and notation has been made on the records of that office showing that claims have been asserted to said lands under the State laws. No selection will be listed or certified to the State where the validity of the bases is at all doubtful, and until the result of the pending litigation affecting these school sections is announced, the selections based thereon will remain suspended in the General Land Office."

There is now pending before Congress Senate bill No. 5068, which provides:

"That the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to make exchange of lands with the several States for those portions of the lands granted in aid of common schools, whether surveyed or unsurveyed, which lie within the exterior limits of any Indian, military, national forest, or other reservation, * * * and any such exchange, whether heretofore or hereafter approved, shall restore full title in the United States to the base land without formal conveyance thereof by the State."

This act contemplates, on behalf of the United States, the same legislative action in the matter of authorizing the exchange of school lands as that now involved in the Lake protest. In other words, both the State of California and Congress will have legislated favorably upon the procedure adopted in the department in 1899.

At the present time none of the Lake suits has been pressed to a conclusion, and so far as known here, no immediate intention of such action is entertained, either by Lake or the State. It has come to the official knowledge of this office in many instances that parties holding under school indemnity selections that are in all respects ready for action, were it not for the pendency of the Lake protest, have, in order to secure favorable action upon their selections, secured, as to them, the relinquishment and abandonment of the Lake protest for a money consideration paid to him. It thus appears that the continued suspension of action on the selections because of the Lake protest will cause indefinite delay, and has unwittingly brought about a condition that has induced at least some of the purchasers of the selected lands to believe it is necessary, in order to get action on their selections, to procure a waiver or release of Lake's claim or protest.

The beneficiaries of the State selections being the real parties in interest have no available method of expediting or procuring the disposition of the litigation between Lake and the State, or, so long as the suspension continues, of getting action in the department on the selections in which they are interested. They are, therefore, protesting against the suspension and are urging the revocation thereof, and in this have been joined by the State. These things have raised the question of the propriety of longer continuing this order of suspension. The whole matter, including suggestions made by Mr. Lake and others interested with him, has been carefully considered, and after mature deliberation it is recommended:

1. The passage of the pending bill in Congress should be secured, the exclusion of the proposed Idaho amendment first being insisted upon.

There is nothing in Lake's contention as to the contractual rights secured by his clients through a mere rejected application to purchase. This proposition was fully considered in practically a similar case arising in California. The court held:

"Where there is no contract and no vested right in the intending purchaser, the withdrawal of the lands from sale by repeal of the statute authorizing sale, or otherwise, absolutely terminates the power of the officers of the Government to take the steps necessary to transfer the title." (Messenger *v.* Kingsbury, 158 Cal., 611.)

The passage of such an act as the one now in contemplation is no more than a congressional declaration of the principles of exchange found in the statute by the department, and while it is not a legal necessity to give vitality to those sections, it will doubtless serve to inspire confidence in titles now thought by some to be doubtful.

2. Mr. Lake's contention should be ignored, whether Congress enacts this or similar legislation. The order of June 16, 1911, in which Mr. Lake was advised that "until the result of the pending litigation affecting these school selections is announced the selections based thereon will remain suspended in the General Land Office," should be revoked.

The order was issued after apprising the State of Mr. Lake's contentions and receipt of response from the attorney general of the State, in which he reported commencement of mandamus proceedings to compel the surveyor general to file the Lake offers to purchase, it being assumed that the cases would be vigorously prosecuted to a final determination and that no objection to the suspension would be made by the State, in view of the fact that the attorney general reported that he had advised the surveyor general to submit to me a list of these selections for which Mr. Lake presented applications. The State is now urging revocation of the rule of suspension, and as the Lake protests seem to rest alone upon the circuit court decision in the case of Hibberd *v.* Slack, which the department has specifically refused to follow, as many selections have been heretofore approved in contravention of said decision, and as the the department even to-day is approving like selections where not included within the Lake protest, there would seem to be no real justification for longer suspending action merely because of these protests. It is therefore evident that no reason longer exists why the department should not proceed in the orderly administration of the school grant to the State of California and give no further attention to the Lake protest. This action is therefore recommended, due notice to be given to the State officials and also to Mr. Lake.

Respectfully, FRED DENNETT, *Commissioner.*

FEBRUARY 18, 1913.

Recommendation approved. WALTER L. FISHER, *Secretary.*

BUREAU OF MINES.

Mr. FOSTER. Mr. Speaker, I call up the conference report on the bill H. R. 17260, to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines."

The Clerk read the conference report and statement, as follows:

CONFERENCE REPORT (NO. 1552).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17260) to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, and 8, and agree to the same.

That the Senate recede from its amendment numbered 9.

M. D. FOSTER,
W. B. WILSON,
JOSEPH HOWELL,
Managers on the part of the House.

MILES POINDEXTER,
GEO. SUTHERLAND,
Managers on the part of the Senate.

STATEMENT.

The committee of conference on the disagreeing votes of the two Houses begs leave to submit the following statement on Senate amendments to H. R. 17260:

The House conferees receded from its disagreement to Senate amendments as follows:

(1) Page 2, line 10, strike out the word "direction" and insert "approval," as it is thought the word "approval" is in better form than that of "direction," as the Director of the Bureau of Mines directs the work with the approval of the Secretary of the Interior.

(2) Page 2, line 15, after "and," inserting the words "conserving resources through" more clearly defines the scope of the act, and for this reason receded to its disagreement of the amendments.

(3) Page 2, line 18, strike out the comma after "industries" and insert a semicolon.

(4) Page 2, line 18, strike out "the" before the word "peat," as the word is superfluous.

(5) Page 2, line 19, after "peat" insert a semicolon.

(6) Page 2, line 19, after the word "and" insert the words "on behalf of the Government to investigate," as it more clearly defines the intention of the act and it makes it clear that the investigations are to be done on behalf of the Government of the United States.

(7) Page 2, line 21, insert the words "mining, preparation, treatment, and use," as this defines more clearly the intention of the investigation and it is necessary to investigate as to the method of mining and preparation, treatment, and the most efficient use.

(8) Page 3, lines 12 to 20, the Senate struck out all down to the proviso and inserted the following language:

"SEC. 4. In conducting inquiries and investigations authorized by this act neither the director nor any member of the Bureau of Mines shall have any personal or private interest in any mine or the products of any mine under investigation, or shall accept employment from any private party for services in the examination of any mine or private mineral property, or issue any report as to the valuation or the management of any mine or other private mineral property."

The intention of this amendment is that no employee of the Bureau of Mines is to have any interest in any mining property under investigation or accept any employment of any private party for the purpose of examining any mining property of any kind, and it is intended to make this provision plain.

(9) Page 4, line 3, the Senate conferees receded from its disagreement to the amendment inserting the words "of explosives" so as to limit the investigation to that alone, but it is believed that the bureau should be empowered to investigate other safety appliances, such as lamps and mining machinery.

M. D. FOSTER,
W. B. WILSON,
JOSEPH HOWELL,
Managers on the part of the House.

The SPEAKER. The Chair will inquire of the gentleman from Illinois, as a matter of procedure, if this ought not first to be presented to the Senate?

Mr. FOSTER. This is a House bill, and the House has possession of the papers.

The SPEAKER. How did the House get possession of the papers?

Mr. FOSTER. Because they were turned over to us by the conferees. We asked for the conference.

Mr. MANN. If the House asked for the conference, the conference report should first be presented in the Senate.

The SPEAKER. That is the usual procedure. The Chair understands that the gentleman from Illinois has physical possession of the papers?

Mr. FOSTER. Yes.

The SPEAKER. Did the gentleman from Illinois get possession of the papers in the regular way?

Mr. FOSTER. Yes.

Mr. MANN. Where are the papers?

The SPEAKER. The papers are here.

Mr. MANN. If we asked for the conference, the papers ought to be in the other body.

The SPEAKER. They ought to, but if the House has possession of the papers in the legal and regular way it is sufficient. The only trouble about it is that it confuses the enrolling clerk.

Mr. FOSTER. It does not matter to me, Mr. Speaker, except that we have possession of the papers, and I think there is no objection by the Senate conferees.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

WATER SUPPLY, COLORADO SPRINGS AND MANITOU, COLO.

Mr. GRAHAM. Mr. Speaker, I call up the conference report on the bill (H. R. 23293) for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo.

The Clerk read the conference report and statement, as follows:

CONFERENCE REPORT (NO. 1551).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the act (H. R. 23293) for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo., having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

In lieu of the matter proposed in amendments numbered 1 and 2, in line 19, page 6, after the word "Agriculture," strike out all down to and including the word "Manitou," in line 20, page 6, and insert in lieu thereof the following: "at the expense of and in cooperation with the city of Colorado Springs and the town of Manitou, said expense to be borne and paid by said city of Colorado Springs and town of Manitou in proportion to the number of acres reserved for the respective use of each of said municipalities."

Amendments numbered 3, 4, 5, and 6: In lieu of the matter proposed in amendments numbered 3, 4, 5, and 6, strike out all of section 5 of the act and insert in lieu thereof the following:

"SEC. 5. That this act shall be subject to the legal rights of any municipality, person, or persons in or to the above-described premises, or any part thereof, or the water thereof."

JAMES M. GRAHAM,
EDWARD T. TAYLOR,
ANDREW J. VOLSTEAD,
Managers on the part of the House.

REED SMOOT,
S. GUGGENHEIM,
FRANCIS G. NEWLANDS,
Managers on the part of the Senate.

STATEMENT.

The conference agreement is a compromise in the nature of a substitution for the language of about four lines of the bill as it passed the House and the Senate amendments thereto, and the report as adopted only makes one change of substance in the bill as it passed the House.

The first Senate amendment, which is in line 19, page 6, section 3, of the printed bill, strikes out the provision of the bill, as it passed the House, placing the administration of the land in the Secretary of Agriculture in cooperation with the city of Colorado Springs and the town of Manitou, and adds in lieu thereof the provision that such administration shall be by and at the expense of said city and town.

The Senate conferees receded from the first part of that amendment, thereby leaving the administration in the hands of the Secretary of Agriculture as it passed the House, and the House conferees agreed to such administration being at the expense of said city and town in proportion to the number of acres of land reserved for each, respectively.

That is the only important change that the conference makes in the House bill.

The Senate amendments which occur in section 5 in relation to legal rights heretofore "or hereafter" acquired are stricken out and the remainder of the Senate amendments in that section are retained.

With that change the section is rewritten, making it read as follows:

"SEC. 5. That this act shall be subject to the legal rights of any municipality, person, or persons in or to the above-described premises or any part thereof or the water thereof."

The terms of the section as agreed upon are, as the House conferees believe, practically the same in substance as it passed the House; and substantially the same as the law would be even if the section were not in the bill at all. But it was deemed desirable to retain this provision in the bill for the purpose of formally recognizing all existing legal rights.

JAMES M. GRAHAM,
EDWARD T. TAYLOR,
ANDREW J. VOLSTEAD,
Managers on the part of the House.

The conference report was agreed to.

TRANSPORTATION OF ALIENS.

Mr. SABATH. Mr. Speaker, I ask to have the bill (H. R. 21229) to extend the power of the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor, with Senate amendments, taken from the Speaker's table and submitted to the House.

The SPEAKER. The Clerk will report the amendments.

The Senate amendments were read.

Mr. SABATH. I move to concur in the Senate amendments.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were agreed to.

LOAN OF MONEY.

Mr. DYER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Missouri asks unanimouse consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

TWO-CENT LETTER POSTAGE RATE.

Mr. STEENERSON. Mr. Speaker, I desire to call up a privileged resolution, House resolution 809, requesting information of the President as to the practicability of extending a 2-cent letter postage rate similar to that enforced with Great Britain and Germany to Norway, Sweden, Denmark, and the Netherlands.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 809.

Resolved, That the President of the United States be, and he is hereby, requested, if not incompatible with the public interest, to transmit to the House of Representatives all information that may be in his possession or the possession of the Department of State or the Post Office Department as to the practicability of extending a 2-cent letter postage rate, similar to that in force with Great Britain and Germany, to Norway, Sweden, Denmark, and the Netherlands, and whether offers or intimations of a willingness on the part of any of said countries to establish such postal rates have been received, and if received, what action was taken in that behalf and the reason therefor.

Mr. HARDWICK. Mr. Speaker, I reserve the point of order on the resolution.

The SPEAKER. What point of order does the gentleman reserve?

Mr. HARDWICK. Mr. Speaker, I reserve the point of order that it calls upon the executive departments for conclusions and arguments rather than for facts, and it is not privileged for that reason, under the rule.

The SPEAKER. How does the gentleman contend that it calls for conclusions?

Mr. HARDWICK. Because it asks them to report on the practicability of something.

Mr. GARRETT. Mr. Speaker, at the end of the resolution they are requested to report the reason therefor.

Mr. STEENERSON. It simply calls for information as to the reasons.

Mr. MANN. Mr. Speaker, I suggest to the gentleman from Georgia that it is merely asking for some information in the department as to whether we could extend the 2-cent postage rate between this country and Norway and the other countries named.

Mr. HARDWICK. Mr. Speaker, I am not opposed to the resolution, but I do not see the chairman of the Committee on Rules on the floor.

Mr. STEENERSON. It is a unanimous report from the Committee on the Post Office, and the committee desires the information.

Mr. HARDWICK. Mr. Speaker, if that be true, whether the point of order be good or not, I shall not press it.

The SPEAKER. The Chair is rather inclined to think that if the gentleman insists upon the point of order, it is well taken.

Mr. MANN. I think so.

The SPEAKER. The four words "and the reason therefor" would make it obnoxious to the rule.

Mr. HARDWICK. Do I understand the gentleman from Minnesota to say that the chairman and all the members of the Committee on the Post Office and Post Roads favor the passage of this resolution?

Mr. STEENERSON. Yes; it comes with a unanimous report.

Mr. HARDWICK. Mr. Speaker, I shall not make the point of order.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

EXTRA COPY OF CONFERENCE REPORTS.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 854.

Resolved, That the managers on the part of the House shall, during the remainder of this session, present with all conference reports an extra copy for the use of the enrolling clerk.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

STREET RAILWAY EXTENSION, MACOMB STREET.

The SPEAKER laid before the House the bill (S. 4681) to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes, a similar House bill being on the calendar.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Do I understand that a similar bill to this is on the House Calendar?

Mr. JOHNSON of Kentucky. Mr. Speaker, I can state for the information of the gentleman that there is, as I understand it, an exact copy of this bill on the House Calendar.

Mr. MANN. Mr. Speaker, I think the gentleman is mistaken. The House bill is on the Union Calendar.

The SPEAKER. It is on the Union Calendar? Ought it to be on the House Calendar?

Mr. MANN. I do not think it ought to be on the House Calendar. I have no objection to the consideration of the bill by unanimous consent. I think the House bill is properly on the Union Calendar.

Mr. JOHNSON of Kentucky. Then, Mr. Speaker, I ask unanimous consent for its present consideration.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to consider this bill at the present time. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read the bill, as follows:

An act (S. 4681) to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes.

Be it enacted, etc., That the Washington Railway & Electric Co. of the District of Columbia be, and it is hereby, authorized and required to construct an electric street railway beginning where its present tracks on Wisconsin Avenue intersect Macomb Street NW.; thence along Macomb Street to Massachusetts Avenue; and thence along Massachusetts Avenue in a northwesterly direction to the District line: *Provided*, That said railway shall be constructed and operated by overhead electric system.

SEC. 2. That the street railway extension provided for in section 1 hereof shall be begun within 6 months after the approval of this act, and shall be completed, with cars running thereon, within a period of 2 years from said date, and the said Washington Railway & Electric Co. shall, within 60 days from the date of the approval of this act, deposit with the collector of taxes of the District of Columbia the sum of $1,000 to guarantee the construction of said extension within the prescribed time, and if said extension is not so completed, with cars running thereon, within the prescribed time, said $1,000 shall be forfeited to the District of Columbia.

SEC. 3. That in addition to the deposit hereinbefore referred to, the said company shall deposit such further sum or sums as the commissioners may require to cover the cost of inspection and the cost of changes to public constructions or appurtenances in public highways caused by the construction of said extension.

SEC. 4. That all plans of location and construction of said extension shall be subject to the approval of the Commissioners of the District of Columbia, and all excavations in public highways shall be made under permits from said commissioners and subject to regulations prescribed by them. That said extension shall be constructed in a substantial and durable manner, subject to the inspection of said commissioners, and all changes to existing constructions and appurtenances in public space shall be made at the expense of said company.

SEC. 5. That the said Washington Railway & Electric Co. shall have, over and respecting the extension of its line herein provided for, the same rights, powers, and privileges that it has by its charter and amendments or by law over and respecting its other routes, and shall be subject in respect thereto to all the other provisions and requirements, duties, and obligations of its charter and amendments and of law. That in addition to the obligation placed upon said company by its charter and law regarding the maintenance of the space between its rails and tracks and 2 feet adjacent thereto on each side thereof the said company shall, in connection with its track construction and simultaneously therewith, grade the highways through which its tracks shall be extended under the provisions of this act for a distance of 2 feet outside of the outer rails of its tracks to such section and profile as may be approved by the Commissioners of the District of Columbia, and shall bear and defray all of the costs of such grading, which shall be done to the entire satisfaction of said commissioners.

SEC. 6. That Congress reserves the right to alter, amend, or repeal this act.

Mr. AUSTIN. Mr. Speaker, reserving the right to object——

The SPEAKER. Consent has already been granted, and there is no opportunity now to object.

Mr. AUSTIN. Mr. Speaker, then I wish to ask the chairman of the Committee on the District of Columbia if the government of the District of Columbia receives any compensation for these valuable franchises that are granted to street railway companies?

Mr. JOHNSON of Kentucky. None whatever.

Mr. AUSTIN. When are we going to reach a time when the people are going to get something for these valuable concessions?

Mr. JOHNSON of Kentucky. The gentleman is as well informed upon that subject as I am.

Mr. AUSTIN. Has the District of Columbia or the government of the city of Washington ever received anything for a single street railway franchise in this city or the District?

Mr. JOHNSON of Kentucky. I understand not.

Mr. AUSTIN. Then how long do the franchises last?

Mr. JOHNSON of Kentucky. I am not advised. This makes it revocable at any time by an act of Congress.

Mr. AUSTIN. Does the gentleman and his committee intend to ever bring legislation into this House that will compensate the people for the franchises that are given away?

Mr. JOHNSON of Kentucky. The present committee will expire with this session of Congress, and it would be too late to bring in anything of that kind now. I have no information as to who will compose the next District Committee, and, therefore, have no idea as to what they will bring in.

Mr. AUSTIN. What is the position and policy of the present committee on that subject?

Mr. JOHNSON of Kentucky. I am not advised as to the position of the other members of the committee. As to myself I can say I believe there ought to be a franchise tax for all these things.

Mr. AUSTIN. Mr. Speaker, I give notice that as long as I am in this House no franchise shall ever be extended or a new franchise ever granted unless the people receive due compensation for the same.

Mr. CANNON. Will the gentleman allow me just a word?

The SPEAKER. Does the gentleman from Kentucky yield to the gentleman from Illinois?

Mr. JOHNSON of Kentucky. I do.

Mr. CANNON. Mr. Speaker, a companion bill to this I introduced early in the session. I did it at the request of many citizens in the northwest part of the city and at the especial request of Mr. Hamilton, in charge of construction of the great National Methodist University. This institution when complete will be one of the great universities in the United States—yes, in the world. This railway will not only render easy access to this university, but also to the Episcopal Cathedral School for boys and girls and to an important Catholic institution; in addition it will accommodate a large and growing suburban population on the heights overlooking the city. The gentleman from Kentucky [Mr. JOHNSON] tells me, and I have no doubt the statement is correct, that one of the street railways is willing to construct the proposed railway.

Mr. JOHNSON of Kentucky. Everybody is.

Mr. CANNON. That the people are satisfied, that everybody is satisfied. Now, I just want to say a word in reply to the gentleman from Tennessee [Mr. AUSTIN]. A railway franchise for a traction company in the city of Washington proper, the settled part of it, is a very valuable property. There is no franchise tax there, but I happen to know that this extension that I speak of is where there is a development being made and where the franchise might in the end be profitable, but if I was a street railway company I would hesitate a long time, and I have knowledge in Illinois about municipal charters, before on my own motion I would construct this railway.

Mr. JOHNSON of Kentucky. If the gentleman will permit an interruption just there, I may say that the street car companies are taxed in the District of Columbia upon their gross receipts.

Mr. CANNON. Yes.

Mr. JOHNSON of Kentucky. Then this would, I take for granted, augment their gross receipts and in that way it would bring a revenue into the District of Columbia.

Mr. CANNON. The gentleman is correct about that; and I want to say that in my service in Congress when I came here there was nothing but horse railways, one on Pennsylvania Avenue and one on F Street, and very poor railways at that. Congress forced these railways to abandon horsepower and utilize first a cable system and then an electric system, and again there was no tax on these railways. We forced by law upon these railways a tax of 4 per cent on their gross earnings. I do not believe there is anybody in the House now except myself who was here when that legislation was enacted. Congress has plenary power to tax them now; plenary power to repeal or amend their charters. We had to use this plenary power before we could force these roads that had horsepower to keep up with modern improvements. I think, whatever as a matter of theory we might have about it, that with this plenary power of Congress the railways can be looked after and, I have no doubt, will be looked after. I therefore am glad to contribute by voice and vote to the enactment of this legislation. I express the hope it will be enacted. It meets the approval of one of the most industrious chairmen of the Committee on District Affairs that I have ever known in the House.

Mr. DYER. The gentleman forgets that the whole committee is very industrious.

Mr. CANNON. Precisely. I want to compliment the whole committee. It is well guarded, and everybody is satisfied about the matter.

Mr. AUSTIN. Mr. Speaker——

The SPEAKER. The question is——

Mr. CANNON. I believe I have the floor. I yield.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] borrowed the floor. [Laughter.]

Mr. JOHNSON of Kentucky. Mr. Speaker, I yield to the gentleman from Tennessee [Mr. AUSTIN].

Mr. AUSTIN. Mr. Speaker, I have known the ex-Speaker of this House for more than 30 years. When I first came to Washington as a private secretary to a Member of Congress, who represented the District I now represent, the gentleman from Illinois [Mr. CANNON] was then in Congress. I do not question his motives, and I think one of the splendid things in his long and illustrious career in this House is his fidelity to public duty, and that none of his bitterest enemies can point to any public act reflecting upon his character or his honor. I do not know anything about this proposition except what has developed in this short discussion, but I hope it will call attention to the fact that the American Congress owes a duty to the people of this city and District and to the people of the United States to get busy and bring legislation here that will exact fair and just compensation for the valuable franchises that have been given away to private corporations.

Mr. DYER. Will the gentleman yield?

Mr. AUSTIN. In a moment. The people of the United States have an interest in this matter, because our constituents under the present law are required to contribute one-half of the money necessary to conduct the public affairs of the District of Columbia and Washington City. We owe it to our constituents to compel a just return for the valuable franchises that are enjoyed by private corporations in this city. The electric light company, the gas company, and the traction companies, each and every one of them, should be required by law to pay a fair and just annual contribution to the public treasury of this city. And we owe it to the people of this city that are being daily taxed by every one of these private corporations in the charges fixed for gas, electric light, and transportation on the street car lines not only to compel these companies to pay the operating expenses and fixed charges, but also to pay dividends upon watered stock. The American people demand of those intrusted with legislation that they shall be protected in the cost of living from having these exactions imposed upon them by private enterprise and by dividends upon watered stock. And I trust that the District Committee which will represent us in the next Congress will bring legislation in here to compel these corporations to pay for these valuable franchises and privileges, and also to relieve the people of the District of Columbia by compelling the traction companies to furnish sufficient rolling stock that when the people—men, women, and children—are compelled to pay transportation over their lines, they will be given something except a strap to hold on to in order to ride in their cars.

Mr. DYER. Will the gentleman yield?

Mr. AUSTIN. I yield back my time.

Mr. JOHNSON of Kentucky. I will say to the gentleman that I agree with him in the general trend of his remarks, and I will also say in this bill there is a provision requiring the street car companies not only to build, but to forever maintain a roadbed between its tracks and for 2 feet on the outside of the tracks.

Mr. GREEN of Iowa. Will the gentleman yield in that connection?

Mr. JOHNSON of Kentucky. Yes.

Mr. GREEN of Iowa. Why is it that the bill provides especially that the street railway shall be constructed and operated by an overhead electric system?

Mr. JOHNSON of Kentucky. Because it is out in the country, and there is no need for an underground system at the present time.

Mr. GREEN of Iowa. That is quite true, but the railway company would so construe it, without some such provision, that they would carry it in perpetuity.

Mr. JOHNSON of Kentucky. If the gentleman will read the last section of the bill, he will see there is nothing perpetual about it.

Mr. MADDEN. You could not compel them to build an underground system without an underground sewerage system.

Mr. JOHNSON of Kentucky. It does not need this provision to have it operated by an overhead system.

Mr. GREEN of Iowa. It ought to be inserted. It could not be done in any other way.

Mr. JOHNSON of Kentucky. I yield five minutes to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. I want to say, Mr. Speaker, that I have so much confidence in the chairman of this committee that I would be slow to disapprove this bill, although I have never heard the bill read, and do not know the section of the country which it serves. But I wanted to ask the gentleman from Kentucky how many miles of additional track will be built under the provisions of this bill?

Mr. JOHNSON of Kentucky. I have not measured the distance.

Mr. SIMS. But surely the gentleman has some idea about it.

Mr. JOHNSON of Kentucky. It goes from Wisconsin Avenue and Macomb Street to the District line.

Mr. SIMS. Has not the gentleman a general idea of the distance?

Mr. JOHNSON of Kentucky. No; I have no idea of the distance, but I do not think it is important.

Mr. SIMS. It is two or three miles, is it not?

Mr. JOHNSON of Kentucky. Perhaps.

Mr. SIMS. How many people will this new line serve? A number of churches have been mentioned. Is that neighborhood a settled community?

Mr. JOHNSON of Kentucky. I do not know that any churches will be served, but there is a Methodist institution of learning out there that needs the car line very badly, and there is an Episcopalian institution of learning there and also a Catholic one. They are all clamoring for it, and nobody is objecting to it.

Mr. SIMS. The gentleman means institutions of learning that can not be served well without street car facilities?

Mr. JOHNSON of Kentucky. They can not be served at all without them.

Mr. SIMS. When I served on the gentleman's Committee on the District of Columbia, I found that the street car companies usually objected to any extension of their lines unless they were themselves concerned in behalf of the extension. The street car companies have always divided the cost per mile per passenger on their various lines in determining their net receipts per passenger. Now, if you have a considerable mileage in a thinly settled section of the city, the company, of course, loses money in that portion of the service, and then they use that as an argument against reducing the cost of fares on their lines generally. They say, "We have to serve a large and thinly settled portion of the city of Washington, and therefore our revenues from that portion of our mileage have to be supplemented by the additional revenues that we receive from other lines."

Mr. CAMPBELL. Is not that the way any prudent and successful business man would conduct his business?

Mr. SIMS. I am stating to the House the objection that the street car companies usually urge to proposed extensions.

Mr. CAMPBELL. Is not that natural?

Mr. SIMS. I will let the House draw its own conclusions as to whether it is natural or not, but it results in preventing the reduction of the fare even on those portions of their lines where the community is thickly settled. This is an extension by the overhead-trolley system, which is much cheaper in construction than the underground system, and it is proposed to be a single-track line, as I take it.

Mr. JOHNSON of Kentucky. Yes; a single-track line.

Mr. SIMS. Yes; it is a single track; and I want to call the attention of the House to the fact that when we authorize this extension with overhead trolley and single track we do not want them to come in afterwards and say that we forced them to go into a thinly settled country, and have them use that as an estoppel upon us when we attempt to reduce the price of fares in the thickly settled portions of the city.

Mr. JOHNSON of Kentucky. I will say to the gentleman just there that that situation can not possibly arise, because the street car people are on record, in a communication addressed to the Committee on the District of Columbia, to the effect that they are not opposed to this proposition.

Mr. SIMS. I know they are not opposed to this, but they will use this act to show that their cost per passenger has been increased by reason of being obliged to extend their lines into a thinly settled portion of the city. I want to say now that the street car companies, when future efforts are made to reduce the cost of service in the city proper—the car companies will come in and say that by the mandate of Congress they have been obliged to furnish to the people miles and miles of railway in a sparsely settled section of the city which will increase the general cost of operation per passenger, and therefore they can not reduce the rate of fare. But I do not know enough about this particular bill to oppose it or to favor it.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is, Shall the bill pass?

The question was taken; and on a division (demanded by Mr. JOHNSON of Kentucky) there were—ayes 58, noes 6.

So the bill was passed.

On motion of Mr. JOHNSON of Kentucky, a motion to reconsider the vote whereby the bill was passed was laid on the table.

FREE FEDERATION OF LABOR OF PORTO RICO.

Mr. WILSON of Pennsylvania. Mr. Speaker, I ask unanimous consent to have printed as a House document an address by the Free Federation of Labor of Porto Rico, entitled "The Tyranny of the House of Delegates of Porto Rico," dealing with what the Free Federation of Labor deems essential in the interest of legislation in Porto Rico.

The SPEAKER. The gentleman from Pennsylvania [Mr. WILSON] asks unanimous consent to be allowed to print the document that he names. Is there objection?

Mr. HARDWICK. Mr. Speaker, reserving the right to object, I wish to inquire of the gentleman if he has secured the consent of the gentleman from South Carolina [Mr. FINLEY], the chairman of the Committee on Printing.

Mr. WILSON of Pennsylvania. I have not.

Mr. HARDWICK. Then, at his request and for him, I object.

The SPEAKER. The gentleman from Georgia objects.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28775, the sundry civil appropriation bill, with Mr. HAY in the chair.

Mr. SIMS. Mr. Chairman, I do not think I can occupy the time of the committee to better advantage than to read from the Fort Worth Record, of Fort Worth, Tex., in its issue of February 16, 1913, a communication to that paper from a distinguished Member of this House, the Hon. JAMES L. SLAYDEN, under the title of "Ship subsidy undemocratic," and the editorial on said communication in the same issue of said newspaper, which are as follows:

[Hon. JAMES L. SLAYDEN, in the San Antonio Express.]

"SHIP SUBSIDY UNDEMOCRATIC.

"WASHINGTON, D. C., *February 8, 1913.*

"A few days ago I read an editorial in your paper on Panama Canal tolls in which you quoted freely from the masterful argument of Senator ROOT, of New York, and with flattering liberality from an address which I made in Brooklyn, January 12.

"In the quotation from my speech you referred to only one phase of the question as I presented it, to wit, the moral view. That aspect of the case is covered by the treaties and the obliga-

tions growing out of them. I do not believe that any man, certainly any unprejudiced man, can read the treaties and come to any other conclusion than that we are as plainly and strongly obligated as it is possible for language to make a contract. A decent regard for the opinions of other people and our own self-respect both command us to live up to our engagements.

"But I want, very briefly, to discuss another feature of the case.

"When the Panama bill was being considered in the House of Representatives I declared myself against exemption from the payment of tolls for any class of shipping. On that point I said: 'To grant the free use of the canal to the coastwise trade, and only to that trade, will be a discrimination in favor of a branch of shipping that already enjoys a law-made monopoly and does not need this additional favor.'

"In the same speech I stated my opinion to be that as all the taxpayers had built the canal and dedicated it to commerce, its upkeep cost, which will be nearly $30,000,000 a year, should be charged to the traffic that will go through it.

"In my speech on the conference report delivered August 17, after discussing the treaties, I said: 'Furthermore I differ, on purely economic grounds, from some of the suggestions that have been made. This canal has been built at a huge expense to all the people. It will be maintained at a cost of approximately $30,000,000 a year. If ships are permitted to go through without the payment of tolls it will be an annual subsidy to that extent levied upon the taxpayers.'

"A little further along in the same speech I said: 'Now, surely, these people and this trade that first and directly benefit by the canal ought to pay the cost of its maintenance. The taxpayers of the United States as a whole have paid for and will present it to them, and it is not too much, I repeat, to ask that the traffic through the canal shall keep it in repair and pay operating expenses.'

"I also pointed out the fact that foreign shipowners, no matter how willing they may be to carry our produce from one American port to another at reduced rates, are not permitted to share it, thus compelling our producers and consumers to pay more for such service than they would otherwise have to pay and that the proposed exemption would be 'rank, offensive subsidy.'

"Time and reflection have confirmed the views expressed in June and August, 1912.

"Some Democrats who shy at the word 'subsidy' denied the charge I made then and tried to defend their position as Democratic. Now comes the Secretary of State, Mr. Knox, a great lawyer, who says in a document which was deliberately written, with every word weighed and considered, that it is subsidy. He is one of the most distinguished members of a political party which believes in subsidies and is not afraid to say so.

"Under the heading 'Merchant marine' the Baltimore (Democratic) platform says: 'We believe in fostering by constitutional regulation of commerce the growth of a merchant marine * * * but without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury.'

"That is the declaration of a Democratic principle and very properly finds a place in a Democratic platform.

"But under the heading 'Panama Canal' this is also found: 'We favor the exemption from tolls of American ships engaged in coastwise trade passing through the Panama Canal.'

"They are directly and plainly contradictory. One paragraph declares a Democratic principle; the other approves a Republican policy and asks that a needless burden be imposed on the people.

"The lesson we get from it is that conventions that sit in a crowded hall in distressingly hot weather, and amid such scenes of disorder and excitement that clear thinking and deliberate action are quite impossible, are not good places for legislation.

"To which of these contradictory planks in that platform is the Democratic Party bound, that which declares a Democratic principle or that which approves a Republican policy?

"Mr. ADAMSON, of Georgia, chairman of the committee which reported the Panama Canal act, says that he has asked scores of delegates to the Democratic convention if they knew that the last of the two planks was in the platform, and that he has never found one who did. I have myself asked a good many and have only found one who did know it, and that is the author, Mr. NEWLANDS, of Nevada.

"Mr. NEWLANDS was elected Senator from Nevada by a Democratic legislature, and he is an excellent and agreeable gentleman, but he has some views that would make Thomas Jefferson's hair stand on end with horror. He, like the Republican Secretary of State, Mr. Knox, is friendly to the idea of subsidies.

"A bill to repeal this undemocratic measure is now pending in the House of Representatives, and Democrats who believe in the principles of their party would do well to make their views known in Washington.

"DEMOCRATIC DILEMMA.

"In an interesting and informing letter to the San Antonio Express Congressman JAMES L. SLAYDEN makes perfectly plain and incontrovertible two facts which discredit the Democracy of the act exempting American shipping from paying tolls on service through the Panama Canal.

"The first is that Secretary Knox in his controversy with Great Britain defends the exemption on the sole ground that it is a subsidy. Indeed, the discrimination in favor of American vessels must be conceded as a violation of the Hay-Pauncefote treaty except upon the ground that it is a subsidy or grant of aid or remission of tolls. Advocates of the exemption are between two horns of a dilemma, viz, a discrimination contrary to solemn treaty or a subsidy paid to shipowners by taxpayers. We can understand how a Republican can favor the subsidy as one method of taking from the many for the benefit of the few, but we can not understand how a Democrat opposing a subsidy or the taxation of the many for the benefit of the few can favor this rank violation of Democratic principle.

"The other point is that the declaration of the Baltimore platform in favor of the exemption of American shipping was adopted without the knowledge of anyone except its author, Mr. NEWLANDS, of Nevada. It was slipped in covertly and railroaded through while the delegates were thinking of something else. The platform in another plank condemns 'bounties or subsidies,' and thus cancels any obligation which a Democrat might feel himself to be under to support this particular heresy because it happens to be in the party's platform. The contradiction incidentally exhibits the loose and irresponsible manner in which party platforms frequently are constructed as to minor particulars. Such a platform declaration as this, in the face of the declared general principle in opposition to subsidies, is binding upon no Democrat of conscience and intelligence.

"Mr. SLAYDEN shows conclusively that if the United States permits this treaty to go to The Hague for interpretation the award of arbitration is certain to be adverse to the American contention. If the treaty does not go to The Hague the United States will appear in a sorry plight before the nations of the world.

"Therefore the rational course is to repeal the act of exemption. If a subsidy is to be granted to American shipping let it appear in proper form and without disguise, but on that point the position of the Democratic Party is so positive and so consistent that there can be no two views of Democratic policy."

Mr. OLMSTED. Mr. Chairman, I ask unanimous consent to extend my remarks, for the purpose of inserting in the RECORD a letter from the Rev. C. Everett Conant, Ph. D., professor of modern languages in the University of Chattanooga, and certain newspaper clippings.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The documents referred to are as follows:

UNIVERSITY OF CHATTANOOGA,
DEPARTMENT OF MODERN LANGUAGES,
Chattanooga, Tenn., February 14, 1913.

Hon. M. E. OLMSTED, M. C.,
Washington, D. C.

SIR: I have just read in this morning's press reports that you are taking a hand vigorously in the fight against the Jones bill, and am taking the liberty to extend to you my hearty congratulation for lending your aid to the cause of sanity in dealing with the Philippine problem.

Having spent six years in the islands as official translator and interpreter to the Philippine Commission, and having come in close contact with the Filipino people, learning their language and customs, I can say without overstatement that I understand the situation from the standpoint both of the Government and of the people, and I can say without reserve that no greater calamity could befall the illiterate 95 per cent of the Filipino population than to be subjected to the tyrannic domination of the Filipino cacique, or political boss. And it is just this latter class that is raising the whole cry for "electric" independence. To the 95 per cent, the poor fisherman and laborer, it is a matter of indifference whether the country is "independent" or a colony, so long as he is undisturbed in his peaceful occupation of earning a few cents each day for rice and a few more for the Sunday cockfight.

The independence-agitating ilustrado approaches this ignorant and contented class and tells the fisherman that he is in bondage to a foreign Government, and explains that such a state of affairs is not what it should be, and that there would be much more fish and rice for all under independence. He, of course, omits to say that the independence is only for the cacique himself, who will take away from the poor fisherman a good share of the rice he is now getting. But the poor, bewildered analphabet says: "I don't understand this independence matter very well; but you are educated and know, so it must be the thing for us to get, and I will do anything you tell me to and help all I can."

This is the way independence agitation is worked up in the island, and the American Government has been and is there to protect the helpless 95 per cent from the would-be peculations of the sham patriot. I love the cordial, hospitable 95 per cent, and so I protest against any act of our Congress that would subject them to the bondage of the most contemptible variety of bossism of which I have known or read.

Faithfully, yours,

C. EVERETT CONANT, PH. D.

[From the Chicago Record-Herald of February 17, 1913.]

WOULD KEEP THE PHILIPPINES.

CHICAGO, *February 16.*

To the Editor:

Representative OLMSTED, of Pennsylvania, spoke against the Jones Philippine independence bill in Congress February 13.

On our trip around the world two years ago, Mrs. Schwabacher and myself visited the Philippines, stopping at Manila, and meeting a great many prominent people residing there. It appears to me suicidal to allow the Philippines to govern themselves for many years to come.

Although there are intelligent and educated people in Manila, the inhabitants of the various islands are mostly far from understanding what free citizenship would mean. The country has been under the yoke of the Spaniards and other Latin races for the last 200 years. In fact, there are still a good many head hunters and man eaters in various portions of these islands, and to try to give the people freedom after being governed by the United States for one or two decades is useless. We have never had the opportunity to learn what enormous and unlimited resources that country has and what a vast amount of benefit it will become to the United States in time.

The forests of valuable hardwood timbers are almost beyond comprehension and the great mineral wealth of the country has never been explored.

The tropical climate is capable of raising enough cane to supply the United States with almost all the sugar consumed by its people, as there is never any fear of having frosts or freezes, with which our Southern States have to contend.

The United States never has had a fair chance of showing what value the Philippines are to this country, and after having its valiant sons shed their blood for possession, we are not in favor of turning our backs and leaving the country again the prey of foreign dynasties or of its own discontented and aggressive leaders.

M. SCHWABACHER.

[From the Washington Post of February 20, 1913.]

WOULD HOLD ISLANDS—CARDINAL GIBBONS OPPOSED TO FREEING FILIPINOS—UNFIT FOR SELF-GOVERNMENT—HIS EMINENCE STRONGLY AVERSE TO ANY PROMISE OF INDEPENDECE—FOR UNITED STATES TO SURRENDER ITS RESPONSIBILITY FOR ITS ORIENTAL WARDS, HE HOLDS, WOULD BE "AN ACT OF DISHONOR."

BALTIMORE, *February 19.*

Cardinal Gibbons, in an interview printed here this afternoon, announced his firm opposition to any declaration by the Government regarding the independence of the Philippine Islands in the near future. The cardinal asserts that a "scuttle" policy in the islands would be a dishonorable act, and is firm in the belief that the American people will never indorse such a policy.

Before making any change in the Philippine policy of the Government, the cardinal suggests that the President be authorized by Congress to appoint a commission to investigate conditions in the islands at first hand, so that its recommendations with respect to the future be based upon observations on the ground.

RESPONSIBILITY OF AMERICAN PEOPLE.

The cardinal, in the course of the interview, said:

"Those islands were taken as a war measure. Some may think it would have been better for us never to have exercised our jurisdiction over them, but once American sovereignty was established in that archipelago, the responsibility for the welfare and development of the Filipinos devolved upon the American people, and upon their shoulders it rests to-day.

"The Filipinos—the vast majority of them, at any rate—have never been consulted regarding their independence. But even could it be demonstrated that a large number of Filipinos desired that independence, in my judgment, the inhabitants of those islands, as a whole, are utterly unprepared to shoulder the responsibility which independence will place upon them.

"For the United States to reverse its repeatedly declared policy with respect to these islands would, in my earnest belief, be a dishonorable act. It would work great harm to those investors, as well as to the Filipinos themselves, for this country to withdraw and witness a resultant reign of anarchy. It should be borne in mind that the development of those islands is essential to the development of the Filipino.

PRAISE FOR PRESIDENT TAFT.

"I have been in frequent conferences with the President upon this problem, which is so near to his heart. No citizen of the United States is better equipped with information on the conditions in those islands than President Taft. He is a man of close observation, judicial temperament, and entirely disinterested, save as every American should be interested in seeing his country do well the task set before it. In his efforts on behalf of the common welfare of those islands and of the United States, Mr. Taft has shown unselfish courage and patience of a rare order.

"I have also recently conferred with the present Governor General, Mr. Cameron Forbes. In addition, I have conferred with many private citizens who have spent considerable time in those islands, and for many years I have been in constant touch with the Philippine people through correspondence with the bishops and clergy among them.

"All are unanimous in their deprecations of the early autonomy of those islands; all are emphatic in their opposition to the fixing of any definite or indefinite time when the Filipinos might be capable of self-government; all are among the best friends the Filipinos have."

The Clerk read as follows:

For pay of inspectors, deputy inspectors, crews, office force, and expenses of office, $10,200.

Mr. FITZGERALD. I offer the following amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 87, line 4, strike out the word "crews."

The amendment was agreed to.

The Clerk read as follows:

International Waterways Commission: For continuing the work of investigation and report by the International Waterways Commission, authorized by section 4 of the river and harbor act approved June 13, 1902, $15,000, to be immediately available.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I believe last year we made an appropriation for this International Waterways Commission until December 31, 1912. I suppose that was done on the understanding that after December 31, 1912, the commission would be discontinued. I do not know why the Congress should limit the last appropriation until the end of the last calendar year, unless it was intended to end the commission with that. Now, is it intended to revive this commission?

Mr. FITZGERALD. The reason for the insertion of the provision to which the gentleman refers is that for several years a representative of the commission had made the statement that their work would be finished in another year. Each year they came back and said, "another year." Not very much definite information could be obtained. After the passage of the last sundry civil act, which provided that they should report to Congress, and which appropriated for them only until December 31, 1912, Congress then commenced to get information as to what work was actually being done and what remained to be done.

There are other matters upon which the commission is at present engaged, and it is estimated now that it will take from 1 year to 15 months to complete all its work.

Mr. MANN. If this commission continues to be appropriated for, it will be in existence 15 years from now.

Mr. FITZGERALD. Yes.

Mr. MANN. This appropriation is intended to pay the salaries of the commissioners from December 31 last, although Congress in the last appropriation act decided that it would only pay them until the end of the last year. Now we propose to go back and pay them.

I think the main work that this commission has ever done has been to advise the city of Chicago as to how it ought to dispose of its sewage. So far we have not taken that advice very seriously, and certainly have not followed it, and probably will not follow it. Of course, if Congress desires to make an appropriation for a commission to advise Chicago as to how to dispose of its sewage, with the knowledge that that information will be of no especial benefit to the city of Chicago and probably will not be followed, I shall not object.

Mr. GARNER. Are you trying to educate the people of Chicago?

Mr. FITZGERALD. I simply desire to say that I have been endeavoring to end this commission, and I think Congress now has the information upon which it will be justified in holding the commission to its estimate.

Mr. CAMPBELL. Does the gentleman from New York know of any reason that would justify this appropriation and the revival of this commission for another year?

Mr. FITZGERALD. If the committee did not know of any reason, it certainly would not have recommended the item.

Mr. CAMPBELL. I think it would not only be interesting but valuable to have some information that would justify at least one of the many commissions that we are continuing from year to year. I never knew one of them to finish its work.

Mr. FITZGERALD. Under article 4 of the treaty of April 11, 1908, between the United States and Great Britain, there is imposed the obligation of defining a specified portion of the boundary between Canada and the United States.

Mr. GARNER. Mr. Chairman, is not this the commission that we appropriated for in the diplomatic and consular appropriation bill?

Mr. FITZGERALD. This has never been appropriated for in the diplomatic and consular bill.

Mr. GARNER. We consolidated three of these boundary commissions between Canada and the United States at one time. I thought perhaps we had hooked them all up together.

Mr. FITZGERALD. You did not get this one. This commission did not furnish any very definite information as to what it was doing, and we have been trying to get rid of it, and for that purpose refused to appropriate beyond the 31st of December, 1912. Since that time information has come which makes it apparent that to carry out the work involved under the treaty they will require this sum.

Mr. CAMPBELL. Where is this commission located?

Mr. FITZGERALD. Their office is located at Buffalo, N. Y. The personnel of the American members consists of a retired

Army officer, Gen. Ernst, Mr. George Clinton, and Prof. E. E. Haskell, an hydraulic engineer.

Mr. CAMPBELL. How many members are there of the commission?

Mr. FITZGERALD. Three; and the compensation is $3,000 a year.

Mr. GARNER. Mr. Chairman, it is very evident from the language of this paragraph, as well as from the statement of the gentleman from New York, that it does not belong in this bill.

Mr. FITZGERALD. Oh, the gentleman is mistaken.

Mr. GARNER. It is evident that it belongs to the diplomatic and consular bill, because it is an international commission dealing with an international problem with a foreign country, and if any of these commissions belongs under the jurisdiction of the Committee on Foreign Affairs, this does.

Mr. SISSON. Will the gentleman yield?

Mr. GARNER. Certainly.

Mr. SISSON. It looks to me, from the hearings, as if there might be a duplication of the work.

Mr. FITZGERALD. No.

Mr. SISSON. Because other commissions are at work on the boundary and would have a right to fix this boundary.

Mr. FITZGERALD. The gentleman is mistaken. This commission has a specific duty to perform. For a long time there has been a clear line of demarcation between these commissions carried in the sundry civil bill and those carried in the diplomatic bill. It was always the rule that the diplomatic bill should carry the commissions the duties of which were performed outside of the United States, while the sundry civil bill carried all commissions the members of which performed practically all of their duties within the territorial boundaries of the United States and where the disbursements were made in the United States. Mr. Hitt, for a great many years chairman of the Committee on Foreign Affairs, repeatedly insisted that the diplomatic bill should not be burdened with the expense of commissions which were not a part of the diplomatic service and whose services were rendered in the United States and the disbursements of which were made in the United States. Commissions along the line of this commission have always been carried in the sundry civil bill.

Mr. GARNER. May I interrupt the gentleman?

Mr. FITZGERALD. Yes.

Mr. GARNER. The language of this paragraph does not convey the purpose of the commission or the duties it performs. We have now three commissions marking or designating the line between Canada and the United States. Two of them are carried in the diplomatic bill and one is carried here, in addition to the High Joint Waterway Commission that we had some discussion about the other day. I can not understand the necessity for so many waterway commissions.

Mr. FITZGERALD. I agree with the gentleman, and I say that we have been trying to get this commission out of existence.

Mr. GARNER. Suppose we strike out the item and let the gentlemen give some reason.

Mr. FITZGERALD. They have given a reason, and it was only after they demonstrated that there were three matters upon which they were engaged that ought to be completed, and when they were completed there would be no excuse for them to continue further, that the committee agreed on the item.

Mr. GARNER. In other words, this is the final settlement of their matters?

Mr. FITZGERALD. Yes; and the Secretary of War recommended the appropriation.

Mr. MANN. If the gentleman will pardon me, I think it is only fair to the commissioners to state that the high joint commission carried in the diplomatic bill has no jurisdiction over the Great Lakes, and possibly not over the waters running through the St. Lawrence. This commission, by virtue of the treaty, has special jurisdiction over the waters which flow through the St. Lawrence.

The Clerk read as follows:

For household, including the same objects specified under this head for the central branch, $100,000: *Provided*, That no part of this sum shall be used for fuel oil if it shall appear to the board of managers that coal as a fuel can be procured and used more economically.

Mr. ANTHONY. Mr. Chairman, I move to strike out the last word. I notice in this paragraph an appropriation for household expenses, including the fuel at the western branch of a national home located at my home town. I find there has been an increase of $15,000 in this item, and that in the hearings it is explained that this $15,000 increase is to cover the increase in the price of fuel at that institution. Two years ago I called the attention of the House to the fact that there was a grave question as to whether it was not costing the Government more money to burn oil for fuel there than it was to burn coal, which is produced in the mines adjacent thereto. Each year since that time there has been a steady advance in the price of fuel oil. Last year it advanced. The price of coal remained the same. Yet the committee continued the use of fuel oil. This year the price of fuel oil has steadily advanced until it has become prohibitive to the commercial institutions near by, yet this branch of the soldiers' home proposes to continue the use of fuel oil, when the figures show without question of doubt that it will cost the Government from $20,000 to $25,000 more this year to continue the use of oil for fuel than it will to use coal.

There is no question about that. The board of managers claims that it is desirable to continue the use of oil upon the ground solely of its convenience and from the fact that it will cost some money to put the plant into a condition to burn coal; but in spite of the figures they produce there is absolutely no question but that the Government will lose from $10,000 to $25,000 a year from now on in the use of fuel oil at that one institution, and if the imaginary economy that is practiced on this one item at this branch of the soldiers' home be practiced at the other branches, it reflects very badly indeed upon the way in which the business interests of these homes at large are being administered. I happened to notice in the hearings that there is an admission this year that oil will prove the most expensive from the treasurer of the board of managers, who in a telegram to President Wadsworth, of the board, says:

[Telegram.]

MAJ. JAMES W. WADSWORTH,
Washington, D. C.:

Gov. Cooke reports price of fuel oil next fiscal year 2.9 cents per gallon; increase of 0.22 cent per gallon over present contract. At this price use of coal appears required under the law; suggest household appropriation be reduced to $85,000 and an appropriation of $50,000 for installation of coal-handling equipment be secured. If this can not be done the restrictive clause attached to household appropriation should be omitted.

HARRIS, *General Treasurer.*

The telegram of the general treasurer is correct. Instead of its costing the Government $10,000 to $15,000 more this coming year, it will be more nearly $25,000 if oil is continued instead of coal, the cheaper fuel.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. SHERLEY. Mr. Chairman, I ask unanimous consent that his time be continued for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SHERLEY. Will the gentleman now turn to the next page and read the letter of Mr. Wadsworth?

Mr. ANTHONY. I will be glad to, in time.

Mr. SHERLEY. I have just obtained time for the gentleman for that purpose.

Mr. ANTHONY. I thank the gentleman very much. Instead of its going to cost the Government from $10,000 to $15,000 more to continue the use of oil, it is going to cost nearer to $25,000 more for the use of oil. Instead of its going to cost the Government $50,000 to install a proper coal-consuming plant there, I will quote from the letter mentioned by the gentleman from Kentucky——

Mr. SHERLEY. Read all of the letter.

Mr. ANTHONY (continuing). In which the president of the board of managers says:

The increased cost of labor required in handling the coal would amount annually, as estimated, to $2,518, and the increased cost of repairs to the boilers and coal-conveying apparatus incidental to the use of the coal would, at a low estimate, amount to $2,000.

That would be $4,518 necessary to change that plant over for the temporary use of coal.

Mr. SHERLEY. Mr. Chairman, if the gentleman will permit, I do not want the gentleman to seem to be quoting a letter, when he is quoting only part of it and putting a construction upon it.

Mr. ANTHONY. I intend to quote the parts that are pertinent to my argument.

Mr. SHERLEY. But the House wants to know the whole facts.

Mr. ANTHONY. I hope the House will look into all of the facts, because if it does not do it it will deliberately squander $25,000 more for fuel in the coming year than it is necessary to do.

Mr. Chairman, there is a mass of figures bearing on this question that have been placed before the committee. There is a mass of figures from the advocates of the mines and the coal miners favoring the use of coal, and there is a mass of figures by the officials of the home and the board of managers advocat-

ing the use of oil. It is possible that flaws can be found in the figures advanced by both sides, but it is an absolute fact, and I am familiar with the facts, that the figures based on coal consumption date back to five or six years ago. Since that time the radiation of the steam plant at the home has been vastly improved, so that these figures are no criterion of what would be the cost for the use of coal at the institution now. I am going to ask the House only to put a proper proviso in the limitation that is in the bill that will make it absolutely certain that the Government gets the cheapest and most economical fuel at that home, which I take it is what we all should ask for.

Mr. FITZGERALD. Mr. Chairman, it is natural for the gentleman from Kansas [Mr. ANTHONY] to advocate the use of that fuel which is produced in his own district and which must increase the labor and remuneration of those residing in the district.

Mr. ANTHONY. The gentleman is absolutely right.

Mr. FITZGERALD. The only interest of the committee is to do that which is for the best interest of the Government. Since the gentleman from Kansas [Mr. ANTHONY] declined to state to the committee the facts in the letter of the chairman of the board of managers, I shall read that letter to the committee and state that upon the information furnished in that letter the committee acted:

HEADQUARTERS, ROOMS 932-934 NEW YORK LIFE BUILDING,
346 Broadway, New York, N. Y., January 29, 1913.

Hon. JOHN J. FITZGERALD,
Chairman Appropriations Committee,
House of Representatives, Washington, D. C.

MY DEAR SIR: Since filing with you, on Monday last, a brief statement in regard to the fuel question at the Western Branch of the National Home for Disabled Volunteer Soldiers I have received further information on the subject, which I desire to submit for the consideration of the committee.

The governor of the Western Branch was requested to ascertain and report the present contract price of coal on the British thermal unit basis for the Federal prison at Leavenworth, Kans., and the average cost per ton as delivered under that system. On the 27th instant he reported by telegraph as follows:

"Federal penitentiary has contract for coal on British thermal unit basis at $2.86 per long ton, mine run, on track at penitentiary. Penitentiary unloads cars; average price $2.74½ long ton. Mine is same as formerly furnished home, located 1 mile south of home."

The price of fuel oil being quoted at $0.029, the 2,200,000 gallons required for the year's supply would amount to $63,800. Should coal be used 22,000 tons would be required. At the price paid at the Federal prison on its present contract the cost would be $60,280, an apparent saving of $3,520 as compared with the cost of oil.

The increased cost of labor required in handling the coal would amount annually, as estimated, to $2,518, and the increased cost of repairs to the boilers and coal-conveying apparatus incidental to the use of coal would, at a low estimate, amount to $2,000.

The difference between the cost of coal as compared with oil is $3,520 in favor of coal, but as the excess annual cost for labor and repairs amounts to $4,518, the expenditure for fuel, oil being used, would be $1,098 less than would be required for the use of coal.

It must also be understood that in order to use coal with the degree of economy on which the foregoing comparison is based an initial expenditure of at least $50,000 for the installation of a coal and ash conveying apparatus, and the alteration of the boilers to adapt them to the use of coal must be made, and even this amount would not provide a strictly up-to-date equipment.

That is, to put in a modern up-to-date plant will require an expenditure of approximately $75,000. But, to put all the letter in the RECORD:

The estimate under household, Western Branch ($100,000), is based upon the presumption that the use of oil will be continued, the price to be paid for the same not to exceed $0.0290 per gallon.

It is hoped that the amount named in the estimate will be appropriated.

Very truly, yours, J. W. WADSWORTH,
President Board of Managers
National Home for Disabled Volunteer Soldiers.

Mr. Chairman, it appears that if a modern up-to-date plant be installed for the purpose of utilizing coal for fuel instead of oil that even then the present price, based upon the present price for oil and the price for coal now paid by the penitentiary at Leavenworth for coal at the mines, from which it would be purchased for the home, the difference would be $1,098 in favor of oil as against coal. Under these circumstances, not only this committee but no other committee having the interest of the Government at stake will recommend the use of coal requiring an expenditure of $75,000 and then to have an added burden instead of reducing the burden to the Government. A number of figures were submitted and computations were made, but here are the concrete facts that can not be denied or misunderstood. Under these circumstances, Mr. Chairman, it seemed to the committee that the sensible thing to do was to continue this matter in the way in which it had been. The chairman of the board of managers is a former Member of this House, Mr. Wadsworth. I have known him a great many years, and during his service here, and I believe he is one of the most efficient men who administers any part of the public service. I know that since he has been chairman of the Board of Managers of the National Home for Disabled Volunteer Soldiers the cost of maintaining and conducting those homes has been materially lessened, and he has, during the years I have served on this committee, given to the committee information which has enabled it to introduce and to effect economies. Against the recommendations based upon such a record, and the desire of a locality, that is natural, to have utilized the fuel which it produces, we prefer, in the interest of the Government, to follow the recommendation of the gentleman charged with the responsibility of having these homes conducted in the most economical manner possible.

Mr. SAMUEL W. SMITH. Before the gentleman sits down, will he state the number of members of the board and their salaries?

Mr. FITZGERALD. There is only one of them who receives a salary; there are nine members of the board, and this committee recommended last year, and it is recommending this year, that vacancies as they occur be not filled until the board be reduced to five members. It is apparent with a local manager for each home a member of the board the best results in administration can not be obtained because each manager is endeavoring to obtain just what he wants for his particular home, and they do not conduct things on that broad scale necessary to successful administration.

Mr. SAMUEL W. SMITH. Do they get any salary?

Mr. FITZGERALD. The president of the board gets $1,000 and the secretary $500.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. ANTHONY. Mr. Chairman, I move to strike out the last two words. I regret that the gentleman from New York in charge of the bill has allowed himself to be influenced by statements made by his personal friend, President Wadsworth, of the board of managers, in face of facts which I say to this committee are absolutely incontrovertible. Now, I desire to point out to the gentleman from New York just two things in the letter of President Wadsworth which are incorrect and unfair statements, to say the least. In the first place, he bases the probable consumption of coal at 22,000 tons, which was the consumption the last year coal was used. As I said to the committee, since coal was last used there thousands of dollars have been spent in improving the steam-radiation facilities there, and figures have been shown that there has been an increase of efficiency of the plant of at least 20 per cent since coal was used, so you must credit coal with the increased efficiency of steam-radiation plant, and instead of calculating at 22,000 tons you should calculate it at 18,000 tons. Then, again, the chairman of the board of managers has been unfair when he has taken the figure of $2.74 a ton, the price at which coal is delivered at the Federal penitentiary, as the price which the Government will have to pay at the soldiers' home.

The Federal penitentiary is located 3 miles farther away from the mine. It costs 25 cents a ton more for freight to deliver the coal there, and the statement is made by the mine owners that they will furnish this same coal for $2.50 a ton to the soldiers' home. And more than that, they will furnish what is known as slack coal, a steam coal used for commercial institutions thereabouts, at $1.50 a ton, which will cut the figures of the president of the board of managers 50 per cent, and instead of it costing the Government $60,000 for coal it will cost nearer $40,000 a year for coal, if it is burned. In order to get this directly before the House, and in a way I do not believe the gentleman from New York can help but admit is fair, I shall propose this amendment. There is now a limitation on the paragraph that the cheapest fuel shall be used as between coal and oil. The board of managers has decided that oil is the cheapest, because it is "more convenient" to handle. Those were the words which were used in their resolution adopted last year.

Now, I am going to submit an amendment, to be inserted after the word "managers," where the limitation is placed upon the bill, that the cheapest fuel—coal or oil—shall be used "after investigation and report by the Bureau of Mines."

The War Department and other departments of the Government, whenever they make a fuel contract, leave it to the Bureau of Mines to ascertain the comparative efficiency of the various fuels. One of the functions of that bureau is to make an investigation of fuel contracts made by the Government, and I do not believe that so far the soldiers' home board has taken advantage of the existence of the Bureau of Mines to determine whether or not they are using the cheapest fuel, although the law says that that shall be done. I am simply going to ask in this amendment that this whole proposition be referred to the Bureau of Mines, and then let the board of managers act upon exact information. I will ask the gentleman from New York [Mr. FITZGERALD] if he would be willing to accept an amendment of that kind?

Mr. FITZGERALD. No; I would not.

Mr. ANTHONY. Then, Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Kansas [Mr. ANTHONY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Insert after the word "managers," on line 6, page 94, the words: "After investigation and report by the Bureau of Mines."

Mr. SHERLEY. I make a point of order on the amendment.

The CHAIRMAN. What is the gentleman's point of order?

Mr. SHERLEY. It changes existing law and it is legislation on the bill. It requires a decision of the Bureau of Mines before an expenditure of an appropriation which is now in order.

Mr. ANTHONY. I would like to be heard on that.

Mr. BORLAND. Mr. Chairman, I would like to be heard also.

Mr. ANTHONY. I would like to have the Chair take into consideration the organic law which created the Bureau of Mines. If he will refer to page 370, Sixty-first Congress, second session, he will find these words:

That the Secretary of the Interior is hereby authorized to transfer to the Bureau of Mines from the United States Geological Survey the supervision of the investigation of structural materials and the analyzing and testing of coals, lignites, and other mineral fuel substances.

And I will say that it is the common practice of all departments of the Government to take advantage of this provision.

The CHAIRMAN. Can the gentleman show any law that provides these investigations shall be made by the Bureau of Mines?

Mr. ANTHONY. It does not say that all investigations shall be made, but it says that the bureau shall make them—probably when they are asked to do it.

The CHAIRMAN. What the Chair would like to know is, is it imposed as a duty on the Bureau of Mines to investigate coal used by the various departments?

Mr. ANTHONY. Unquestionably it is their duty under the wording of the law.

Mr. SHERLEY. It does not state anything of the kind. It is perfectly clear the law does not require anything like that. There is nothing in the act creating the Bureau of Mines that compels and makes it mandatory that there shall be an examination by the Bureau of Mines before an expenditure of money for the purchase of fuel at a soldiers' home.

Mr. ANTHONY. Undoubtedly. I say it is mandatory that the Bureau of Mines should make such an investigation if requested, and I think it should be so construed.

Mr. MANN. The item in the bill is a limitation on the appropriation. The gentleman from Kansas [Mr. ANTHONY] adds to that a part of a limitation, and the only question which could render it subject to a point of order would be the assumption that this conferred upon the Bureau of Mines authority to make the investigation which it does not now possess. But it does possess the authority to make the investigation now under the organic law creating the Bureau of Mines. This does not confer any new authority upon the Bureau of Mines, because they already have the authority to make the investigation. It is true they are not required to make it unless they are asked to, but they have the authority to make it. This is a pure limitation upon the appropriation, as it seems to me.

The CHAIRMAN. The Chair will hear the gentleman from Kentucky [Mr. SHERLEY].

Mr. SHERLEY. Mr. Chairman, my impression, if the Chair please, was that the provision came in in front of the proviso. Of course there is no law now by which it is mandatory on the Bureau of Mines to make an investigation of the fuel used at this particular home, but it is true that the organic law of the Bureau of Mines warrants that bureau in making investigations. But touching anything affecting their rights, this is not the place in the bill for an instruction to them. If it is in order, it must be in order simply as a limitation upon this appropriation.

The CHAIRMAN. The Chair overrules the point of order.

Mr. SHERLEY. Now, Mr. Chairman, I desire to be heard on the proposition.

There is one member of the Board of Managers that has control of the National Soldiers' Homes who is in a unique position. He comes from a State that has no National Soldiers' Home within its borders, and he has no local personal pressure brought to bear upon him. It is true that the Committee on Appropriations have shown a good deal of respect for the views of the head of this board. He is a man who served in this House for years, and we believed that his service here warranted a high opinion as to the soundness of his judgment. But aside from that, we recognize what familiarity with these homes early brings to the attention of all—that he did not have that local pressure brought to bear upon him that often colors the judgment even of those who try their best to be impartial.

Now, I understand thoroughly how the gentleman from Kansas [Mr. ANTHONY], representing his constituency, should be able to bring himself to the conclusion that a great harm has been done to the coal miners of his district and State because their coal was not being used as fuel in this National Soldiers' Home.

Mr. ANTHONY. The gentleman ought to consider this simply as a question of fact. The gentleman has no right to impugn my motives.

Mr. SHERLEY. I do not impugn the gentleman's motives. Indeed, I say the gentleman would be unworthy of representing his district if he did not have a natural zeal in regard to it. But this committee has no such zeal. It has no reason to discriminate either for or against the fuel produced in any section, and from the evidence that was adduced before the committee we did not believe there was any warrant for making the change suggested, and we submit the hearings now as proof of that fact.

Now, what is the proposition of the gentleman? On the surface it seems to be a very fair proposition to have the Bureau of Mines undertake an investigation.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. SHERLEY. I can not yield now. But the result of this, if it is to be established, is to have put into the hands of this bureau the determination of all manner of questions that it was never contemplated it should determine. I have no objection to the Bureau of Mines making a report to Congress, and then letting Congress determine from that report whether the findings of the bureau warrant one thing or the other. But for us absolutely to delegate our authority over the matter to this bureau is asking what I do not think the Congress ought to grant.

Mr. ANTHONY. Mr. Chairman, will the gentleman permit me to ask him a question there?

Mr. SHERLEY. Certainly.

Mr. ANTHONY. Is not the gentleman aware of the fact that every single fuel contract entered into by the War Department is first submitted to the Bureau of Mines to determine the purity and efficiency of the fuel?

Mr. SHERLEY. I am aware of the fact that the Bureau of Mines makes certain investigations, but I am not aware of the fact that its findings are binding upon the department and that we are to have it as an arbiter as to the expenditure of money. I do not believe it is well for the Bureau of Mines, I do not believe it is well for the people of America, to put that much power in the hands of that bureau. That bureau will continue its value to this country by simply being an investigator of facts and a reporter of facts.

Whenever you put into the hands of the officials of that bureau the absolute power to determine whether a given contract shall or shall not be let to a given concern, or for a given quantity of fuel, you are taking the first step toward undermining the influence and impartiality of that bureau. And I submit to this House that it ought not to be done. I have no objection on earth to a report by the bureau, but its report ought not to control Congress.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word of the amendment.

I do not believe that my colleagues on the Committee on Appropriations will oppose this amendment after they have given a little further attention to the condition of affairs at the Western Branch.

Before any questions are asked about my relation to that branch, or the relation of my district to it, I want to say that the fuel oil which is used at the Western Branch is brought from Sugar Creek, in the outskirts of Kansas City, in my district. That is the great distributing market now in that section of the country for fuel oil for large heating plants and institutions of that kind.

My district also is a coal market of considerable size, the center of a large coal field which lies in Missouri and Kansas. There are coal mines also in Leavenworth, 30 miles from Kansas City. So that the fuel question is as much related to my district as it is to the district of the gentleman from Kansas. There are in the city of Leavenworth a Federal penitentiary, a soldiers' home, the military post, and possibly other institutions that buy coal upon Government contracts. We have been fighting for the last three years to secure an open fuel market for these institutions. There has been a closed fuel market, in my judgment, in the past, due to the fact that these institutions at Leavenworth have been buying coal solely upon the basis of the price per ton, regardless of the heat value of the coal. On that basis of buying coal, solely on the price per ton without regard to the quality of the coal, the coal mines in Leavenworth

can undersell any other fuel, because they pay no railroad transportation and in some cases no switching. It has not been possible to get rates to put in any other class of fuel. But if the coal is bought, as large consumers of fuel now buy it, upon the basis of its heat-producing value, or what is known as the British thermal unit, then the coal market is an open market, and coal from Lexington, Mo., or from any other section, if it is high-grade coal, can be brought in there. Although it is bid at a price a few cents higher per ton, yet in its heat-producing value it is cheaper in the long run than the coal that goes in at a lower price per ton. That is only possible if a scientific investigation is made and a report is made of the British thermal unit value of the coal as it is offered.

We had this fight up in regard to the Federal penitentiary, as I recollect it, about a year ago. The penitentiary is under the control of the Attorney General, and as a result of my fight the Attorney General now submits coal contracts to the Bureau of Mines for report. Now all the coal contracts of the War Department also are submitted first to the Bureau of Mines for a report of the value of the coal under the British thermal unit. The contract is let upon that basis, not by the Bureau of Mines, but by the proper officer having the right to let the contract. He does it upon the advice and after the investigation of this Government department, the Bureau of Mines.

This is not proposed to add to the limitation on this bill. This bill says now that no part of the sum shall be used for fuel oil if it can be made to appear to the managers that coal can be used as a fuel more economically. It gives them the right now to change from fuel oil to coal, and the only addition by this amendment is to give them the advice and assistance of a scientific department of the Government specially organized for that purpose.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. I ask five minutes more.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MANN. Will the gentleman yield for a question?

Mr. BORLAND. In a minute. I want to make one more statement and then I will yield. I believe it is true that fuel oil has been cheaper in the immediate past than coal. I believe that is true because all the great manufacturing establishments, hotels, and apartment houses in my city changed a few years ago from the coal heating apparatus to fuel-oil heating apparatus.

I know it is true that there is less waste in the fuel oil, because you practically burn all of it, whereas in coal there is a waste of slack, and so forth. Then coal involves the handling, and that must be charged against the coal, which is greater than the cost of handling fuel oil.

Mr. SHERLEY. Will the gentleman yield?

Mr. BORLAND. Certainly.

Mr. SHERLEY. Is it the gentleman's understanding of the amendment that it makes the Bureau of Mines an arbiter to determine how the contract shall be let, whether for coal or fuel oil?

Mr. BORLAND. No.

Mr. SHERLEY. Does the gentleman understand that the law now gives the Bureau of Mines the right to investigate as to fuel to be used at any Government institution?

Mr. BORLAND. Yes.

Mr. SHERLEY. Then of what use is the amendment?

Mr. BORLAND. The Bureau of Mines is now charged with investigating contracts let by the Federal penitentiary at Leavenworth, but there is another institution there, the soldiers' home, in which they do not, because the home is under the separate management of this board of managers.

Mr. SHERLEY. The gentleman does not quite get the point. Either the amendment gives the Bureau of Mines control over the decision or it does not. If they already have the power, then the amendment is of no use. If it gives them the control, they ought not to have it. If they have the power now, you need not put it in the bill.

Mr. BORLAND. The gentleman is not quite accurate. The Bureau of Mines is clothed with the general power to conduct investigations, but they must be referred by specific cases. When we had the question up in regard to the Federal penitentiary contract, I claimed that the contract for the Lexington coal was cheaper than the Leavenworth coal, and we had it sent to the Bureau of Mines. Now, I think, that being true in regard to the Federal penitentiary located at Leavenworth, it ought to be true as to the best possible way of handling the matter with reference to the soldiers' home, although the soldiers' home is controlled by the board of managers.

Mr. SHERLEY. Was it not within the power of the Bureau of Mines to make the examinations there?

Mr. BORLAND. At its own instance, I think not.

Mr. SHERLEY. I differ with the gentleman.

Mr. BORLAND. If it was within their power, I think there is no need of the amendment. It is claimed now that there is going to be a shortage of fuel oil for two reasons, first, because of the enormous consumption of fuel oil which has occurred, and, second, because there has been a legal attempt made to put the Standard Oil Co. out of business. Whether that legal attempt will succeed or not I am not here to discuss, but it is claimed that the Standard Oil Co. has got to cease business at a fixed time.

Mr. CAMPBELL. If the gentleman will allow me, has not the order been made, and has not the Standard Oil Co. served notice that it is going to quit on Saturday of this week?

Mr. BORLAND. Yes; I think a former governor of Missouri claims to have put the Standard Oil Co. out of business, and it has got to close down its works at Sugar Creek and other points in Missouri at a certain date which is close at hand. I do not know that that will occur. But it is manifest that there must be some reasonable opportunity for the Government in this use of fuel oil to go back to coal if coal appears to be the cheaper. Now, I am not complaining of the board of managers here for not conscientiously discharging their duty. I am saying that here is the Bureau of Mines which is capable of giving scientific information on the subject to large users of fuel regarding the British thermal unit value of coal, which the board of managers can not determine.

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. BORLAND. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. The gentleman from Missouri asks that his time be extended two minutes. Is there objection?

There was no objection.

Mr. BORLAND. The board of managers of the home could not determine the British thermal unit value of coal from Lexington or Leavenworth or Fort Scott, or any other place, because they do not know. The board of managers can look at the price per ton; they can look at the freight rate; they can look at the cost of handling; they can look at the switching charges and cost of changing the plant, but they can not tell the fuel value of the coal. We have a department specially created for that purpose, and, as I say, we had this matter thoroughly thrashed out when we were letting the contract for the Federal prison. I believe we met the difficulties properly in the case of the Federal prison.

Mr. SHERLEY. Did you have special legislation in order to bring that about in the penitentiary case?

Mr. BORLAND. No; we did it by agreement with the department, just as we may here.

Mr. SHERLEY. That is it exactly.

Mr. FOSTER. Mr. Chairman, it seems to me that the amendment offered ought not to be placed in this bill. The province and duty of the Bureau of Mines is to investigate certain coals offered for sale to the Government. As a matter of fact, we know that the Bureau of Mines does investigate both in the mine and in the laboratory, as to the relative value of coal for steam and heating purposes. This amendment proposes that the Bureau of Mines shall not only investigate that subject but that it shall determine whether it is cheaper in this particular instance to use coal or oil. It occurs to me that we would not want to confer such power as that on the Bureau of Mines, but if Congress determines that coal shall be used in this particular institution, or the board of managers determine that, then it is the duty of the board of managers to call upon the Bureau of Mines for the determination of whether that particular coal is more economical to use than any other kind of coal from a different mine. It seems to me that this amendment ought not to prevail. I do not believe the Bureau of Mines ought to be clothed with that kind of power, and I do not believe it is within the province and duty of that bureau to determine matters of this kind proposed in this amendment.

Mr. ANTHONY. Mr. Chairman, with reference to the amendment, which practically refers this whole question to the Bureau of Mines, I would say to the House that it is only doing in the case of fuel required for soldiers' homes what is done in respect to every other fuel contract for the Government in most of the large departments; and to show the committee that there is abundant ground and reason for this reference I will state that, in order to make sure in my own mind I was right in my contention that coal was cheapest under present conditions, I submitted a proposition to the Bureau of Mines. I submitted a statement to them as to which was the most economical fuel to the Government at the Western Branch—coal at two and a half dollars per ton, the price at which it could be obtained,

or fuel oil at two and nine-tenths cents per gallon, the price the Government will have to pay on its next contract.

Mr. SHERLEY. Mr. Chairman, will the gentleman yield for a moment?

Mr. ANTHONY. Certainly.

Mr. SHERLEY. Did the gentleman include in his statement, in order that the Bureau of Mines might know all of the facts, what cost there would be incident to the use of coal rather than oil?

Mr. ANTHONY. I informed them there would be certain differences, and the bureau stated all of the facts would have to be taken into consideration; but the difference is so much, the range is so wide between the economy of one fuel and the other that it ought to make this House sit up and take notice.

Mr. SHERLEY. Just one other question. The Bureau of Mines is now investigating fuels tendered under bids, to be used at the penitentiary there, and the gentleman obtained that?

Mr. ANTHONY. I do not know that they are now. They did, I believe, at one time.

Mr. SHERLEY. The gentleman from Missouri [Mr. BORLAND] says it is being done. It was done without any special enactment; and I insist now that the gentleman does not need any law to do what he wants.

Mr. ANTHONY. But here is a separate organization authorized by Congress. The board of managers is responsible to no one but Congress. Here is a bureau of the Government which absolutely refuses to take advantage of the information that it can secure from the Bureau of Mines, and they meet down here in a room in the Ebbitt House—four or five exceedingly nice gentlemen—and they decide this scientific question among themselves. I contend that is not a proper way for the Government to handle a problem of this kind.

Mr. SHERLEY. Does the gentleman mean to say that this board of managers has refused any offer or effort on the part of the Bureau of Mines to report on the fuel?

Mr. ANTHONY. They have never referred the question to the Bureau of Mines, although the other departments of the Government follow that practice.

Mr. SHERLEY. Has the gentleman ever requested that the Bureau of Mines make a report on fuel tendered for use?

Mr. ANTHONY. It has not been my province to do so.

Mr. SHERLEY. I think it is; and I do not think the gentleman ought to reflect on men unless he can show all of the facts in regard to the matter.

Mr. ANTHONY. It is the duty of the board to take that step and not my duty.

Mr. SHERLEY. It seems to me if I were criticizing them for their failure, I would, at least, have tried to bring it about.

Mr. ANTHONY. Let me continue the results of this investigation by the Bureau of Mines. The Bureau of Mines states in a letter addressed to me:

DEPARTMENT OF THE INTERIOR,
BUREAU OF MINES,
Washington, February 11, 1913.

Hon. D. R. ANTHONY, Jr.,
House of Representatives, United States,
Washington, D. C.

SIR: In reply to your letter of February 6, the engineers of the Bureau of Mines report as follows:

The records of the bureau show the heating value of Leavenworth lump coal, as delivered on Government contracts, to be 10,950 B. t. u. per pound, as received. The cost of 1,000,000 heat units would be $0.114 with lump coal at $2.50 per ton of 2,000 pounds. The bureau has no record of the value of Leavenworth slack coal, but it can be estimated to be about 9,500 B. t. u. per pound, and the cost of 1,000,000 heat units as $0.079 at the price of $1.50 per ton.

The fuel oil referred to is believed to have a specific gravity of 0.89 and an average heat value of 19,367 B. t. u. per pound, which, at $1.13 per barrel of 42 gallons, would make the cost of a million B. t. u. $0.1873.

The cost of heat in the fuel for slack, lump, and oil would be in the ratio of 1 to 1.44 to 2.37, and this would be the ratio of cost of heat in the steam, provided the cost of handling fuel was the same and the efficiency of the furnace and boiler was the same. The efficiency is, however, lowest with the slack and highest with the oil, and the cost of handling is in the same order. It makes the problem of selection of the cheapest fuel, therefore, dependent upon the construction and management of the particular plant, as well as the unit cost of the fuel. Assuming the evaporation from oil to be one-third more than from slack coal, the oil would cost 78 per cent more than the coal.

This difference would be applied to the added cost of firing coal, handling ash, and adapting furnaces to the use of slack fuel.

Very respectfully,

J. A. HOLMES, *Director.*

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. ANTHONY. Mr. Chairman, I ask unanimous consent for five minutes more.

Mr. FITZGERALD. Mr. Chairman, I desire to inquire how much more time is desired, so that I may move to close debate.

Mr. ANTHONY. I shall try to conclude in five minutes.

Mr. FOSTER. Mr. Chairman, I would like to have five minutes.

Mr. FITZGERALD. Then, I move that all debate on the paragraph and amendments thereto be closed in 10 minutes.

The motion was agreed to.

Mr. ANTHONY. Mr. Chairman, one other statement. The branch of the Standard Oil Co. that furnishes this fuel oil has announced that it will furnish no more contracts for fuel oil for any purpose.

The gentleman from Missouri [Mr. BORLAND] has stated that the Standard Oil monopoly in Missouri may probably go out of business, and there exists a grave doubt——

Mr. BORLAND. Not out of business; but I said that Gov. Hadley said that he would put it out of business.

Mr. ANTHONY. I hope he will put it out. There is grave doubt on and after the next present fiscal year whether fuel oil can be obtained at all, and to show the fact that the other commercial institutions near by have given up their fuel oil, apparently for economical reasons, I had inserted in the hearings letters from seven of the largest steam users in Kansas City—the Armour Packing Co., the Schwarzchild & Sulzberger Co., the Swift Co., the Fowler Co., the Metropolitan Street Railway Co.—and all of those great steam users have made a statement in the committee hearings here that on account of the great increase in the price of fuel oil they have been compelled to change their plants and go back to the use of coal. So I say, gentlemen, that it is high time that the board of managers at this little steam plant of theirs out in Kansas should get some idea of economical business methods, and if it requires $10,000 or $25,000 to change that plant back to the use of coal that they will be amply justified in taking such action. I hope that this committee will adopt the amendment which I have proposed.

Mr. WILSON of Pennsylvania. Mr. Chairman, if this amendment is adopted it will impose additional duties upon the Bureau of Mines, duties which should not be imposed upon that bureau.

Mr. ANTHONY. Will the gentleman yield for an interruption there?

Mr. WILSON of Pennsylvania. In just a moment. The determination of what constitutes the cheaper fuel can only be arrived at by including commercial problems as well as the actual test of the heat units of that fuel. When you impose upon the Bureau of Mines the task of determining the commercial problem involved in arriving at what the cost of the fuel is, then you are taking the bureau into a field where it has no place, and if carried to its fullest conclusion will divert the Bureau of Mines from the problems it ought to deal with to commercial problems. There is not only the question of the heat unit of coal or fuel in the problem, but there is the question of transportation, there is the question of handling, there are a number of similar questions that are purely commercial questions, and the Bureau of Mines should not have that duty imposed upon it. As it is now the Bureau of Mines can determine what heat units are found in different fuels; they have the right under existing law to determine the value based upon heat units, and having determined that value, then it should devolve upon that branch of the Government which has to purchase the fuel to determine which fuel it will use, and I trust that this amendment will not be adopted, and that this additional duty will not be imposed upon the Bureau of Mines, thereby diverting it from its proper function.

Mr. MONDELL. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. MONDELL. I rise to discuss the motion before the House.

The CHAIRMAN. All time has expired.

Mr. MONDELL. I ask unanimous consent that I may discuss it.

The CHAIRMAN. Did the gentleman from Wyoming make a request?

Mr. MONDELL. I ask unanimous consent to discuss the matter for five minutes.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to discuss the matter for five minutes.

Mr. FITZGERALD. Mr. Chairman, debate was closed by motion after a very lengthy discussion, and I do not think, after closing debate by motion——

Mr. MONDELL. If the gentleman wants to object, well and good.

Mr. FITZGERALD. I will object.

The CHAIRMAN. The gentleman objects, and the question is on the amendment offered by the gentleman from Kansas.

The question was taken, and the Chairman announced the noes seemed to have it.

On a division (demanded by Mr. ANTHONY) there were—ayes 27, noes 63.

So the amendment was rejected.

Mr. BORLAND. Mr. Chairman, I offer an amendment, following the word "economically," line 7, page 94.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 94, line 7, after the word "economically," insert the following: "And upon this question it may take the advice of the Bureau of Mines as to the heat value of the fuel."

Mr. MANN. Mr. Chairman, I make the point of order, or I will reserve the point of order. I ask to have the amendment reported again.

The amendment was again reported.

Mr. FITZGERALD. Mr. Chairman, I make the point of order that debate is closed.

Mr. BORLAND. I hope the gentleman will reserve the point of order.

Mr. FITZGERALD. Oh, debate is closed on the paragraph.

Mr. BORLAND. But debate on the point of order is not closed.

The CHAIRMAN. The Chair will ask the gentleman from New York whether the board of managers now has the right under the law to take the advice of the Bureau of Mines?

Mr. FITZGERALD. I think they have.

Mr. MANN. It would still be legislation, Mr. Chairman, whether they have that right or not.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

For hospital, including the same objects specified under this head for the Central Branch, $50,000.

Mr. SAMUEL W. SMITH. Mr. Chairman, in view of the statement that the Standard Oil Co. has been put out of business, I send to the Clerk's desk a short editorial which appeared in the Flint Daily Journal, of January 31, 1912, which I would like to have read in my time.

The CHAIRMAN. Without objection, the Clerk will read the editorial.

The Clerk read as follows:

COMPETITION.

Producers are selling crude oil at $2.33 a barrel. The price has been increased 7 cents a barrel every day this week.

Consumers are paying more for oil than at any time in years. The prospects are that the prices will continue to advance throughout the spring and summer.

The Standard Oil monopoly has been dissolved and competition has been restored.

What is the answer?

President Taft once stated, in effect, that there could not be competition without higher prices. If competition in the oil fields exists at the present time, his statement has been proved and his judgment has been vindicated.

If the dissolution of monopolies in all fields of business enterprise is to be attended by the same results as in the oil business, there is going to be a large number of supporters of monopoly within the next few years.

The Clerk read as follows:

Pacific Branch, Santa Monica, Cal.: For current expenses, including the same objects specified under this head for the Central Branch, $47,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. The gentleman from Michigan [Mr. SAMUEL W. SMITH] sent a clipping to the desk a moment ago relative to the increased price of oil in face of the dissolution or attempted dissolution or supposed dissolution of a certain oil monoply.

I desire to call the attention of the House to the fact that one of the reasons for the present high price of oil is that a large proportion of the oil-producing territory of the country is now withdrawn from exploration and development. In the enthusiasm which some gentlemen have had for what they are pleased to call conservation, the Government agents have hovered on the flanks of the venturesome and courageous "wildcatter," and whenever, after long and arduous toil and great expenditure, he has developed a showing of oil, they have proceeded to withdraw all of the lands surrounding him—everything upon which his foot has not been actually planted at the moment of withdrawal. The result has been that a number of fields—several of great promise in my own State—have been tied up, and development that would have gone on and would have gone on by leaps and bounds, thus meeting partly the increased demand for oil, has been practically prohibited.

Congress has provided no legislation for the disposition of the lands withdrawn, and for an excellent reason, in my opinion, because it would be impossible under the legislation that could be secured at this time to develop new fields. And so we have this situation, namely, an increasing demand for oil, an increasing price for oil, and some of the most promising oil fields in the country withdrawn from development; some of them lands upon which men have spent large sums of money, lands upon which they have endeavored earnestly for many years to secure oil in paying quantities; and at just about the time their hopes seemed possible of realization and the era of development begun the withdrawal act is put into operation and the industry is suspended and property confiscated. Nothing that could be done at this time would have so helpful an effect upon the oil market, be so effective in bringing down the price of oil, as to have the Government restore to appropriate entry some at least of the land now withdrawn. On many of these lands men established claims and made large expenditures of money long before the date of withdrawal. I earnestly hope they may be restored to entry so that development may proceed.

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

The Clerk read as follows:

Battle Mountain Sanitarium, Hot Springs, S. Dak.: For current expenses, including the same objects specified under this head for the Central Branch, $24,000;

For subsistence, including the same objects specified under this head for the Central Branch, $38,000;

For household, including the same objects specified under this head for the Central Branch, $42,000;

For hospital, including the same objects specified under this head for the Central Branch, $35,000;

For transportation of members of the home, $6,000;

For repairs, including the same objects specified under this head for the Central Branch, $14,000;

For farm, including the same objects specified under this head for the Central Branch, $5,000.

Mr. MARTIN of South Dakota. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from South Dakota [Mr. MARTIN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 97, by inserting, after line 19, the following: "For combined chapel and amusement hall, $37,500."

Mr. FITZGERALD. I reserve a point of order, Mr. Chairman.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] reserves a point of order on the amendment.

Mr. MARTIN of South Dakota. Mr. Chairman, the Battle Mountain Sanitarium, at Hot Springs, S. Dak., is the hospital branch of the National Home for Disabled Volunteer Soldiers. The treatment that is given there is especially beneficial to those suffering from rheumatism, bladder troubles, and similar disabilities, and those suffering from those afflictions in the various nine branches of the National Home for Disabled Volunteer Soldiers are sent to Battle Mountain Sanitarium for treatment. Somewhere between 1,200 and 1,500 of such patients have been treated in that institution in the last 12 months. The capacity of the sanitarium was so strained that for a period of three or four months they were unable to take in any new patients. The records of that institution show that 83 per cent of those that are sent there are benefited by the treatment they receive, and only 9 per cent receive no appreciable improvement. The institution is one of the best equipped hospitals on the continent. Indeed, I doubt if there is one anywhere equal to it. It cost to construct about $750,000.

At present there is no chapel or amusement building at that home, although all the other branch homes have such an institution. There is no place where a hall of that character is more needed, because, as is readily seen, these men when they are convalescent should have some means of amusement. Some of those that are sent there never recover, and about 8 per cent of those who arrive die there. Therefore there is a particular demand for an appropriate chapel. The management never asked for an amusement hall or chapel until a year ago. They have used the second story of another building, which was intended for a steam laundry, for chapel and library purposes, and inasmuch as they must have a place in which the patients may be amused during their convalescent period they have used an entire ward, which would accommodate 100 beds, for that purpose.

Now it is proposed by the management to erect a combined chapel and amusement hall, the first story to be used as an amusement hall, the second as a chapel, and the third as an assembly room and library. I will read from the hearings on this subject of one year ago. The item came up by a special estimate a year ago, the board of managers having passed a resolution requesting this amount. Gen. Barry, the local manager of the home, is a member of the National Board of Managers, and I ask the indulgence of the committee while I read this record, because it is short:

Gen. BARRY. This institution has grown to a large membership, because it is peculiarly adapted to the treatment of old men's complaints. It is well adopted to the treatment of bladder troubles, to which old men are subject. This building is really a necessity, and it is believed that it will enable us to accommodate 100 more patients. By removing the amusement hall in the basement we think it will accommodate 100 more patients without any increase of cost. The same medical staff can care for them. At the present time orders for admission are extended by reason of the crowded condition of the sanitarium. If we had this

additional building, we could take care of 100 more men. The library is in the rear of the chapel. We need the room the chapel occupies for a mess room for the civilian employees, numbering about 72, who now dine in the mess hall for members of the home. If we had this room that the chapel occupies now, it would enable us to feed the civilian employees in a mess hall and remove them from the main mess hall. I suppose we will use a part of this building for a library and reading room. The convalescent men should have a quiet place there to read. There is a great deal of reading done there, because these men go there for treatment, and they have to occupy their time in one way or another. Some of them amuse themselves in the amusement hall, but a great percentage of them are readers. The institution has grown a great deal during the last two years, and they cared for in the past year 750 members. The percentage of the improved is 81 and the unimproved is 9 per cent. The sanitarium is a credit to the Government and is doing good work. I think the building asked for is very much needed, and will supply something that is very much required in that institution. At the present time the chapel is unable to accommodate the men who attend divine services there. For that reason we ask this appropriation for the building.

It will thus be seen that this room in the second story of the laundry building, which is now used for a chapel, could be used as a mess hall for the civilian employees, now numbering 73. One hundred beds could be put in this other building, which is really a dormitory, a hospital building, as soon as the amusement-hall provision is made for the convalescents.

Therefore by an expenditure of practically 5 per cent of what this plant has cost to complete for this necessary equipment, the actual accommodations to members could be enlarged 25 per cent. They now accommodate in round figures 400, and sometimes in crowded conditions a little more. By this small expenditure they could accommodate 500, and very well provide for the needs of the patients in that institution.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MARTIN of South Dakota. I ask unanimous consent that I may proceed for three minutes more.

The CHAIRMAN. The gentleman asks unanimous consent that he may proceed for three minutes. Is there objection?

There was no objection.

Mr. MARTIN of South Dakota. Now, the chairman of the committee and the ranking colleague of the gentleman from New York, the gentleman from Kentucky [Mr. SHERLEY] have to-day upon the floor of this House paid very high compliment to Mr. Wadsworth, a former Member of this body, who is the president of the Board of Managers of the National Home for Disabled Volunteer Soldiers. I am able to bring to the attention of the committee the indorsement of Maj. Wadsworth for these important and needed improvements. He said:

This hospital is in the shape of an octagon. Here is the plan [exhibiting it]. We propose to place this building at this point here [indicating] and fill up this space here [indicating]. This will be accessible to the rest of the hospital without going out of doors.

And in another place in his testimony:

The CHAIRMAN. Has there ever been any request for this before?

Mr. WADSWORTH. No, sir; because we thought that there were other things more necessary. Now, however, we have reached the point where we think this addition to the building ought to be made.

I concur in all that the gentleman in charge of this bill has said as to the conservatism and reliability of Mr. Wadsworth, the president of this board of managers. The committee have adopted his recommendation in cutting down some items that were requested by this institution. Will not the committee be equally consistent and adopt his recommendation as to this important improvement?

As I have already stated, it will enable the institution to accommodate 100 more men, at an expense of only $37,500, from the fact that buildings constructed for hospital and other purposes must now be used for these very purposes because of the crowded condition of the institution and because this usual provision for all the homes has not been provided at the Battle Mountain Sanitarium.

I appreciate the attitude of the committee generally toward propositions to enlarge these homes, because this is a disappearing view. The old soldiers are disappearing; but let me remind you that the sanitary branch, or hospital branch, will be the last of the whole series to go out of active business. These men are growing more and more decrepit day by day and year by year, and this institution will be required when some of the others which are used simply for homes will no longer be needed.

Mr. FITZGERALD. I desire to call the attention of the Chair to the sundry civil act approved March 3, 1903:

For completion of said Battle Mountain Sanitarium, and for each and every purpose connected therewith, including all buildings necessary in the discretion of and approved by the Board of Managers, National Home for Disabled Volunteer Soldiers; and said board shall cause to be procured plans for all buildings authorized herein and in the act of May 29, 1902, establishing said sanitarium, based upon accurate estimates, and cause the same to be constructed within said estimates, and cause to be furnished all other needful objects authorized herein or by said act, to the end that said sanitarium shall be completed and ready for occupancy and operation in all of its details within the sums herein and heretofore appropriated for the establishment of said sanitarium.

Maj. Harris, in his statement before the committee last year, said:

The original plan for a sanitarium, as approved, did not provide for a chapel.

The first request or application for money to provide this additional building was submitted to Congress at its last session in a supplemental estimate.

This item is in excess of the authorization in the act of 1903, which fixed the limit of cost on the plant to be established. The building is, therefore, not authorized and is subject to a point of order.

Mr. MARTIN of South Dakota. Mr. Chairman, I did not understand that the gentleman made any point of order.

The CHAIRMAN. The gentleman reserved a point of order.

Mr. MARTIN of South Dakota. I did not hear it. Mr. Chairman, this is certainly a continuing improvement or project already adopted by Congress. The original appropriation fixed the limit of cost of this plant at $150,000 only, but from time to time Congress has appropriated for new buildings in order to complete a public work. I do not understand that at this late date, in the face of that policy adopted by Congress in the various bills to complete this institution, that it is subject to a point of order, as it is plainly a part of the necessary facilities of the institution.

The CHAIRMAN. The Chair thinks it is subject to a point of order, and therefore sustains the point of order.

Mr. SAMUEL W. SMITH. Mr. Chairman, I move to strike out the last word. I see that on page 91, in providing for the home at Dayton, Ohio, there is a provision for the pay of the farmer. How many acres are there in that farm?

Mr. FITZGERALD. I do not recall. All of these homes have a farm upon which considerable quantities of vegetables are raised for the use of the home. I believe they maintain, in some cases, a sufficient number of cows to supply the milk for their use.

Mr. SAMUEL W. SMITH. Does the gentleman know what they pay the farmer at Dayton, Ohio?

Mr. FITZGERALD. No; I do not. At that farm they do not raise any vegetables, but they have about 70 cows, and in answer to the gentleman's former question, I think there are 578 acres in the farm.

Mr. SAMUEL W. SMITH. Has the gentleman any data to show how much they pay the farmer?

Mr. FITZGERALD. I have not at present.

Mr. SAMUEL W. SMITH. I notice, in the case of the Dayton Home, where you appropriate $24,000, you specify the pay of the farmer and other employees, but in the other cases you simply say, for the farm, so many thousand dollars.

Mr. FITZGERALD. There is a provision for the other homes which says "including the same objects specified under this head for the Central Branch." That is to prevent repetition in all the subsequent items.

The Clerk read as follows:

Hereafter vacancies existing or vacancies occurring in the membership of the Board of Managers of the National Home for Disabled Volunteer Soldiers shall not be filled until the whole number of members of such board is reduced to five, and thereafter the number of members constituting said board shall not exceed five.

Mr. FOWLER. Mr. Chairman, I make a point of order against the paragraph.

Mr. FITZGERALD. This item reduces expenditures, Mr. Chairman, and it is in order under the Holman rule.

Mr. FOWLER. I think, Mr. Chairman, it proposes to change existing law. Of course, it might have a tendency to curtail expenditures.

Mr. FITZGERALD. It reduces the number of persons who travel and the number of employees who assist them. It reduces the number of offices created by law. That is exactly within the Holman rule.

Mr. LOBECK. These managers get no salary, do they?

Mr. FITZGERALD. The president is paid a salary.

Mr. LOBECK. But you would not remove him?

Mr. FOWLER. I do not think, Mr. Chairman, on its face, there is a reduction in expenditure, and that is what must appear under the terms of the Holman rule.

The CHAIRMAN. The Chair will ask the gentleman from New York if any salary attaches to the services of this board?

Mr. FITZGERALD. The president is paid, the secretary is paid, and they are allowed traveling expenses and clerk hire.

Mr. LOBECK. Whenever they are doing inspection work.

Mr. FOWLER. The traveling expenses necessary to be incurred in connection with these homes can not be increased by virtue of the number of the board of managers. The work to be done must be done, and whether it is done by one man or by twenty, the traveling expenses must necessarily be the same. I can not see upon the face of this paragraph that it does come

under that provision of the Holman rule where it must appear that it reduces expenses. The able gentleman who is the chairman of this committee says that the president has a salary. If there were no more than the number provided by this paragraph, there would still be a president with a salary, and this paragraph does not upon its face show a reduction of expenditures, and it can not be maintained upon that theory of that rule.

Mr. SHERLEY. Mr. Chairman, I desire to call attention to the fact that these members do travel, that their expenses are paid, that they have clerk hire as an incident to being members of the board, and that a reduction in number necessarily brings about a reduction in expenditures and comes directly under the provision of the Holman rule, which says—

By the reduction of the number and salary of the officers of the United States, etc.

Mr. FOWLER. But it must be the number and salary, not the number alone—the number and salary.

Mr. SHERLEY. The gentleman is mistaken again. The full provision reads:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill, etc.

The word "and" is the same as the word "or" in the phrase:

By the reduction of the number and salary of the officers of the United States.

The CHAIRMAN (Mr. SAUNDERS). The members of this board of managers live at varying distances from the national home. When they are called into session, they receive a travel allowance, or mileage. In addition their expenses are paid for the time when they are sitting to transact business. This being so, it is apparent that if we reduce the membership of this board, we will measurably reduce expenditures. Hence this paragraph is clearly within the benefit of the Holman rule, and is in order. The point of order is overruled.

Mr. FOWLER. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The question is on the motion of the gentleman from Illinois to strike out the paragraph.

Mr. ANTHONY. Mr. Chairman, there must be some reason for bringing in a new paragraph like the one under discussion.

The CHAIRMAN. The gentleman from Illinois was recognized. Does the gentleman desire to speak to his motion?

Mr. FOWLER. Mr. Chairman, if the gentleman from Kansas will permit.

Mr. ANTHONY. Mr. Chairman, I will take the floor after the gentleman from Illinois.

Mr. FOWLER. Mr. Chairman, I desire to say that this board, as I understand, has been created for the purpose of taking care of the various national soldiers' homes in this country. There ought to be an adequate commission for this purpose, and in the wisdom of Congress the number has been placed at nine, as I remember. I can not see any reason now why that number should be reduced. It is proposed by this paragraph to reduce it in a peculiar way; that is, whenever a member of this board dies his place shall not be filled. It is one of the peculiar ways of destroying these public positions.

Mr. Chairman, this Congress can do itself no greater honor than to permit this board to stand as it is, a monument to the men who offered their lives a sacrifice for the good of the country. I have great respect for the man who seeks to make appropriation in harmony with the law and who seeks retrenchment of expenditures, but a retrenchment of expenditures which minimizes only in its terms, in my opinion, is no retrenchment at all. If you limit this board to five now, after a while another bill will be reported in this House reducing the number to three, and then some time in the future some peculiar fit of retrenchment will seize the committee and it will provide that the offices filled here in this board shall not be filled at all upon the death of those holding them.

Mr. FITZGERALD. Mr. Chairman, this board is not maintained, as the gentleman seems to imagine, as a monument, but rather to administer economically and efficiently the national soldiers' home. The enactment of this provision is for the welfare of the men who, unfortunately, are compelled, in their declining years, to live in these homes. The inmates have been dying off gradually, and in order to have the homes administered for their best interest and that of the Government and to take the board out of the surrounding local influences, it has been universally conceded that this is a desirable provision to carry in the bill. It was carried in the bill last year. The gentleman from Illinois did not then discover what a "terrible" provision it was, and I think if he were familiar with the facts he would not now have said anything about it.

Mr. LOBECK. Is not one of the reasons why the gentleman wants to reduce the number here to five that there is a movement on foot—a bill has passed the Senate—to put these homes under the War Department? The home out in California—a bill has passed already in the Senate——

Mr. FITZGERALD. The suggestion has been made, and I know that it has not very much favor. Membership on this board is not limited to veterans of the Civil War; there are nine men, and each one, except the president, is the local manager of a home.

Mr. LOBECK. They are all veterans of the war.

Mr. FITZGERALD. No; I know of a member, not now on the board, but who was a Member of this House, and who was never in the war. This provision is in the interest of efficient and economical administration and the welfare of the men for whom the homes are provided.

Mr. LOBECK. These men who are on these boards now have given their time and their experience and most of them are experienced men in their State in taking care of the local soldiers' homes——

Mr. FITZGERALD. If the gentleman wishes to ask a question, I will answer it, but if he desires to express his views in favor of this amendment I do not care to be interrupted. I have looked into this matter and I know that better results will be obtained by having a board divorced from the local and peculiar surroundings that affect the men located in each home. Men, who are familiar with these homes because of close contact with them, agree, unless there is some peculiar individual interest, that this undoubtedly is a very desirable provision.

Mr. FOWLER. I desire to ask the chairman of the committee if he thinks that a new Member can catch all the tricks in a bill if it is brought in and introduced one day and asked to be considered the next day.

Mr. FITZGERALD. There are no tricks in this bill and any man of ordinary intelligence can take the report on it and in three minutes find every item like this. They are specifically set forth in italics, lest, perchance, some gentleman like the gentleman from Illinois might overlook them if we did not have a sign post provided for them; the committee did not feel it was taking advantage of such Members in reporting the bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANTHONY. Mr. Chairman, there seems to be some other reason than that which has been found for the advancement of this provision in the bill. It is a fact that this House has already passed a resolution filling the vacancies that exist on the board of managers—passed it quite a while ago—and that resolution is now pending in the Senate, but for some reason it is being held up there. I do not quite understand why the House should come along at this stage of the game and endeavor to nullify a resolution filling the vacancies on that board to which it has just given its approval.

Mr. SHERLEY. If the gentleman will permit, the gentleman puts the cart before the horse. Is it not endeavoring to comply with the provisions of the House of last year that they were not to be filled instead of trying to fill these places?

Mr. ANTHONY. Oh, no. I understand that some months ago a resolution was passed by the House, which went to the Senate, filling the vacancies that now exist.

Mr. SHERLEY. Yes; but a year ago a provision was passed which said that these vacancies should not be filled.

Mr. ANTHONY. And defeated in the Senate, as should have been done. There is absolutely, Mr. Chairman, no reason why the membership of this board should be reduced unless it should be to center all power in the hands of a few men who desire to retain control of that board.

Mr. SHERLEY. Want to delocalize it.

Mr. ANTHONY. Yes.

Mr. MANN. What has become of that resolution?

Mr. ANTHONY. It is pending in the Senate; it has been reported favorably by the Senate committee and is pending in the Senate.

Mr. MANN. It has been reported favorably, as far as the gentleman's interests are concerned?

Mr. ANTHONY. I understand so.

Mr. MANN. I understand the Senate already has reported striking out the name of the gentleman in whom the gentleman is interested and has inserted another name.

Mr. ANTHONY. The gentleman is entirely mistaken. There has been one additional vacancy since the bill went to the Senate, and the Senate has stricken out one of the House names and inserted another.

Mr. MANN. Some one else has been stricken out.

Mr. ANTHONY. That is correct. Now, Mr. Chairman, I think it would be extremely unwise for this House to pass legislation of this kind, changing the make-up of the Board of Managers of the Soldiers' Homes, especially under the present conditions under which the board of managers have to do business. Their administration of the homes is under fire. It is being criticized very severely, and I am opposed, as one Member of the House, to the enactment of a provision like this, which would tend further to center the power and control of that board in a few hands instead of in a number.

Mr. GUERNSEY. Mr. Chairman, I move to strike out the last two words.

It seems to me the first duty of the Government toward the inmates of these homes is their proper care. I understand there are now 11 managers for the homes. The reduction of this number of managers to five will not give the proper supervision to the homes that they are now receiving. At the present time the managers are scattered about, so that they are near the homes, and the manager that is nearest a home visits it frequently and is more familiar with its needs than the reduced number of managers could possibly be with the homes scattered as they are all over the country. And, further than that, on the ground of economy it is not clear to me that the plan will result in economy. Certainly with 5 managers it will be necessary for some of them to travel much farther to visit homes than the 11 managers are required to do, with many of them located near the different homes. I hope the motion of the gentleman from Illinois [Mr. FOWLER] will prevail.

Mr. FOWLER. Mr. Chairman, I desire to speak in opposition to the amendment.

Mr. Chairman, I trust I will not be trespassing upon the time of the House when I contend for the preservation of the official channel through which these national homes are maintained and cared for.

I know, as a matter of fact, that there are some men in this House who are not very favorable to pensions of the Union soldiers. Neither are they much in favor of maintaining homes for the unfortunate soldiers who are now poor and unable to take care of themselves. Diseased in body, failing, because of age, in mentality, these men must either become a public charge upon individual localities or be taken care of by the bounty of this Government. I have no disposition to criticize the gentleman from New York [Mr. FITZGERALD] because of his attitude against striking out this provision or his attitude against liberal pensions for soldiers. But it ill becomes the gentleman, who has had long years of experience in this House, mixing and whetting his mind against the minds of such men as Tawney, DALZELL, and PAYNE, schooled under such influences, he has become an adept, not only in legislation but in preparing bills in this House—I say it ill becomes him to say that there is nothing in his bill that is not in harmony with the law——

Mr. FITZGERALD. I did not say that.

Mr. FOWLER (continuing). When there can be numbers of points picked out in his bill that would appear to be jokers. I have all due respect for the wisdom and integrity of the gentleman, but I detest the fat hog who will get to the swill trough first, whip off all of the poor ones, and eat the swill himself. He has fed here in the public crib of this country as a lawmaker for many years and had opportunities that other men have not had, and it ill becomes him to criticize men who seek to make his bill conform to law. Ah, he reported it one evening about dark, and the next day he was in this House asking for its consideration, a bill of——

Mr. FITZGERALD. Of 184 pages.

Mr. FOWLER. Of 190 pages.

Mr. FITZGERALD. We do not count the index.

Mr. FOWLER. Oh, yes; you do not count the index.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOWLER. Mr. Chairman, I hope this section may be stricken out.

Mr. SHERLEY. Mr. Chairman, we do not always count the index, but sometimes some Members "thunder in the index." But coming back to the merits of this proposition, the reason for the recommendation of the committee was simply that we believed you would have a more efficient as well as a more economical administration by a reduction of numbers. Now, those of you who are familiar with the organization of these homes know that the practical management of them is under the charge of a governor, who receives compensation for his labor. The result of having an organization of this kind is not so much to see that the individual needs are taken care of as it is to have individual wants exaggerated. The whole proposition could be well stated in one word—that it is believed that it would be advisable to delocalize some of the conditions that now exist in connection with the management of soldiers' homes; and the need of that is best illustrated by the local speeches that are being made against the proposition.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois [Mr. FOWLER].

Mr. FOWLER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FOWLER. There were two amendments to the amendment, and I do not know that they have been withdrawn yet. One was to strike out the last word.

The CHAIRMAN. The Chair will announce that they are withdrawn. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken, and the Chair announced that the "noes" seemed to have it.

Mr. FOWLER. A division, Mr. Chairman.

The committee divided; and there were—ayes 8, noes 34.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

State or Territorial homes for disabled soldiers and sailors: For continuing aid to State or Territorial homes for the support of disabled volunteer soldiers, in conformity with the act approved August 27, 1888, including all classes of soldiers admissible to the National Home for Disabled Volunteer Soldiers, $1,200,000: *Provided*, That no part of this appropriation shall be apportioned to any State or Territorial home that maintains a bar or canteen where intoxicating liquors are sold: *Provided further*, That for any sum or sums collected in any manner from inmates of such State or Territorial homes to be used for the support of said homes a like amount shall be deducted from the aid herein provided for, but this proviso shall not apply to any State or Territorial home into which the wives or widows of soldiers are admitted and maintained.

Mr. RUCKER of Colorado. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Colorado [Mr. RUCKER] offers an amendment, which the Clerk will report.

Mr. MANN. Mr. Chairman, will the Chair allow a correction to be made in the spelling of the word "eighteen" at the end of line 10, page 99?

The CHAIRMAN. Without objection, the Clerk will make the correction indicated by the gentleman from Illinois [Mr. MANN].

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Colorado [Mr. RUCKER].

The Clerk read as follows:

At the end of line 22, page 99, insert the following: "That all the aforesaid homes shall be available to ex-Confederate regularly and honorably discharged soldiers."

Mr. FITZGERALD. Mr. Chairman, I make a point of order against that amendment.

The CHAIRMAN. A point of order is made against the amendment.

Mr. RUCKER of Colorado. Mr. Chairman, I do not know about its being subject to a point of order. This is a new matter; certainly a new matter in this Congress.

The CHAIRMAN. Does the gentleman desire to speak to the point of order?

Mr. RUCKER of Colorado. Yes; to the point of order.

Mr. FITZGERALD. Mr. Chairman, I will reserve the point of order for five minutes, and then I will insist on it.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] reserves a point of order. The gentleman from Colorado will proceed.

Mr. RUCKER of Colorado. I want to say, Mr. Chairman, that it is well known, not only to the membership of this Congress, but to the country at large, that if there were a bill before the House asking for pensions for ex-Confederate soldiers, there would not be one ex-Confederate soldier upon this floor nor the son of a Confederate soldier who would vote for it. But my amendment seeks to take care of those who are so feebly conditioned, possibly both in mind and in body, that they are not able to take care of themselves.

I want to say in this connection to the managers of this bill that I know of but one State in this Union where in the State home the ex-Confederates are entitled to all of the privileges along with the ex-Union soldiers, and that is the State from which I come. The measure was passed there by a unanimous vote upon the motion of an ex-Union soldier, and I appeal to gentlemen of this House whether it would not be better to follow the example of the State of Colorado and let the Nation give these old and feeble-limbed individuals who served in the "lost cause" admission to the national homes as we have done in our little State soldier's home in Colorado.

Mr. FITZGERALD. Mr. Chairman, there has been no demand for this legislation. Most of the Southern States have very generously taken care of their ex-Confederate soldiers,

and I believe it is not wise to precipitate a discussion on this matter simply upon the suggestion of one Member, and I insist on the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

BACK PAY AND BOUNTY.

For payment of amounts for arrears of pay of two and three year volunteers, for bounty to volunteers and their widows and legal heirs, for bounty under the act of July 28, 1866, and for amounts for commutation of rations to prisoners of war in States of the so-called Confederacy, and to soldiers on furlough, that may be certified to be due by the accounting officers of the Treasury during the fiscal year 1914, $25,000.

Mr. TAYLOR of Ohio. I move to strike out the last word, and I ask leave to extend my remarks on the pro forma amendment by inserting in the RECORD the address of Hon. Jesse B. Roote, of Butte, Mont., before the Washington State Bar Association.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD, and as a part thereof to insert the document indicated. Is there objection?

There was no objection.

Mr. NORRIS. Mr. Chairman, I rise to oppose the formal amendment of the gentleman from Ohio. I want to inquire of the chairman of the committee or of anyone else in regard to this particular paragraph.

Mr. FITZGERALD. Which one?

Mr. NORRIS. The one ending in line 7, page 100. It seems to make an appropriation for arrears of pay, for bounty, and so forth, and permits the widows and legal heirs to obtain the bounty on proper application. I should like to ask the gentleman if either the act of July 28, 1866, or some subsequent act, did not limit the filing of those claims, and if the time for filing them has not expired by virtue of the statute of limitations?

Mr. FITZGERALD. My recollection is that a limitation was fixed several times; but last year——

Mr. MANN. I think perhaps I can give the gentleman some information.

Mr. FITZGERALD. But last year a provision was inserted in the sundry civil act requiring that all the claims should be filed before December 31, 1912.

For the current year the appropriation is $200,000. For 1912 it was $300,000. It is now estimated by the auditor that $25,000 will be sufficient.

Mr. NORRIS. This appropriation can only be used for the payment of such claims as have been filed.

Mr. FITZGERALD. Prior to December 31, 1912.

Mr. NORRIS. Claims that are now pending.

Mr. FITZGERALD. Yes.

Mr. SHERLEY. It is estimated that there are about 4,000 claims, and Mr. Congwer stated that $25,000 would probably take care of them.

Mr. NORRIS. About what proportion of these claims have been allowed in the past?

Mr. SHERLEY. I do not know that all of these claims will be allowed, but Mr. Congwer said:

We have something over 4,000 claims on hand.

Prior to that he had stated:

I think if you will make that about $25,000 it will be ample to meet the claims we have on hand now.

Mr. NORRIS. Can the gentleman give me any information as to whether there will be any claims unprovided for?

Mr. SHERLEY. Only the statement that they consider that this amendment will be sufficient to take care of them.

Mr. NORRIS. Have you any evidence as to whether or not all the claims have been filed that would have any rights if they were filed?

Mr. FITZGERALD. The situation was this: There were a number of agents or attorneys who had been making a business of digging up these claims and filing them after getting retainers from the interested parties. That was practically all the work they did. The rest of it was done in the auditor's office.

Mr. NORRIS. Yes.

Mr. FITZGERALD. Congress provided that all the claims should be filed before December 31, 1912, and also prohibited agents or attorneys from receiving any compensation for presenting or prosecuting these claims. The combination of the two provisions is likely to stop it.

Mr. NORRIS. Can the gentleman state whether the limitation that we have passed is likely to shut out any just claims? Of course, if there are any old soldiers or widows of old soldiers who are entitled to this money, they should be paid.

Mr. FITZGERALD. Fifty years have elapsed since these claims accrued.

Mr. NORRIS. That is true; but I thought the committee might have some information as to how many there were.

Mr. FITZGERALD. I think all the meritorious cases have long since been paid. About $10,000,000 have been paid in the last 20 years.

Mr. NORRIS. Does the gentleman know how many claims have been paid within the last 10 years?

Mr. FITZGERALD. I do not. I can tell the amounts that have been paid in the last 10 years.

Mr. NORRIS. What was paid last year?

Mr. FITZGERALD. For the current year $200,000 was appropriated.

Mr. NORRIS. That was the appropriation.

Mr. FITZGERALD. They use all the appropriation, as a rule. The appropriations have been as follows:

For 1912, $300,000; for 1911, $467,000; for 1910, $400,000; for 1909, $400,000; for 1908, $500,000; for 1907, $200,000; for 1906, $200,000; and so on.

Mr. NORRIS. Can the gentleman tell me whether those amounts were all used up?

Mr. FITZGERALD. My recollection is that the appropriations were practically used up. In some cases these amounts include deficiencies.

The Clerk read as follows:

PUBLIC BUILDINGS.

Repairs of buildings, Interior Department: For repairs of Interior Department and Pension Buildings, and of the old Post Office Department Building, occupied by the Interior Department, including preservation and repair of steam-heating and electric-lighting plants and elevators, $30,000, of which sum not exceeding $7,500 may be expended for day labor, except for work done by contract.

Mr. GREEN of Iowa. Mr. Chairman, I move to strike out the last word. I notice in these paragraphs for the appropriation of the Department of the Interior there is no provision as to under whose direction the money shall be expended.

Mr. FITZGERALD. They are expended under the direction of the chief clerk of the Interior Department.

Mr. GREEN of Iowa. I would like to inquire whether the law makes any provision for the work being done under contract?

Mr. FITZGERALD. Seven thousand five hundred dollars is the amount which may be expended for day labor. The balance must be utilized by contract.

Mr. GREEN of Iowa. That is a general provision that applies to all the items unless otherwise specified in the bill?

Mr. FITZGERALD. The other items are by contract; $7,500 is practically for permanent repairs.

Mr. GREEN of Iowa. I desired to make the inquiry now so as to save time as to the other items of the bill. There is an appropriation of $220,000 for repairs to the Capitol. Will that be made under contract? That is on the following page.

Mr. FITZGERALD. I will discuss that when we come to it.

Mr. GREEN of Iowa. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

For repairs and improvements to the Patent Office Building, as set forth in Senate Document No. 543 of the Sixty-first Congress, to be expended under the direction of the Supervising Architect of the Treasury, and to be immediately available, $220,000.

Mr. MANN. Mr. Chairman, I reserve a point of order to the paragraph.

Mr. SAMUEL W. SMITH. Mr. Chairman, I reserve a point of order. I hold in my hand Senate Document No. 543, a letter from the Secretary of the Treasury submitting an estimate for appropriations for repairs and improvements to the Patent Office Building. I would like first to ask the chairman of the committee if there was any attention given to the proposition to straighten F Street when the committee considered this appropriation?

Mr. FITZGERALD. No; there was not.

Mr. SAMUEL W. SMITH. I would like to read a few lines from the report of the Commissioner of Patents, Mr. Edward B. Moore. It is as follows:

I desire also to call your attention to the accompanying report showing the condition of business in the Patent Office from 1836 down to January 1, 1910, which shows the increase in volume of work, the expenses of the bureau, and the net surplus each year. It can readily be seen that the office is self-supporting, the revenues coming in from fees paid by the inventors. The surplus all told is now within a few dollars of $7,000,000, which is a net surplus, after deducting salaries and charges of every sort against the bureau.

I want to ask the gentleman if the amount of this appropriation comes out of the $7,000,000?

Mr. FITZGERALD. These repairs will provide ample accommodation for the storage of the copies of the patents.

Mr. SAMUEL W. SMITH. That is not what I asked the gentleman.

Mr. FITZGERALD. I did not quite catch the gentleman's question.

Mr. SAMUEL W. SMITH. I understand what these improvements are to be made for, but the commissioner says that the surplus all told is within a few dollars of $7,000,000. Now, what I want to know is if the $220,000 is to come out of this $7,000,000?

Mr. FITZGERALD. That money has all been covered into the Treasury. There is no separate fund which can be said to be to the credit of the Patent Office. That report shows that a certain amount of money has been expended for the maintenance of the Patent Office and that the receipts are so much, and so they say we have a surplus of $7,000,000. You might as well say that there was a surplus to the credit of the Treasury Department in the collection of the total revenues above the cost of the service.

Mr. SAMUEL W. SMITH. Every little while the statement is made that the Patent Office has a surplus of $7,000,000, with which they ought to be able to build any kind of a building they want.

Now, Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting an editorial which appeared in the Washington Post of yesterday.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD by printing an editorial. Is there objection?

There was no objection.

The editorial is as follows:

DEMOCRATS FOR PROTECTION.

The appeal of Mayor Fitzgerald, of Boston, to President Elect Wilson to use his influence against any reduction of the present duty of 12 per cent on boots and shoes merely shows a further disposition on the part of many Democrats to view the tariff as a local issue. Apparently, the only real difference between the rank and file of Democrats and Republicans is that the former believe the tariff a local issue, while the latter believe it to be a national issue. In justice to the leaders of the Democratic Party, it must be said that men like Mr. UNDERWOOD and Mr. CLARK are sincerely in favor of a tariff for revenue only, with application to all the States, but the great majority of their supporters, not only in the House and Senate but throughout the country, take a purely local view.

Time and again during the hearings before the Ways and Means Committee, pleaders for protection revealed themselves as stalwart supporters of the Democratic Party. At the hearing on the lumber schedule George W. Jones, representing the North Carolina Pine Association of Sawmill Manufacturers, took sharp issue with the plank in the Democratic platform favoring free trade, and yet admitted that he was a member of the Democratic State committee of his home State.

At one of the later hearings W. C. Temple, of Tampa, Fla., took the trouble to explain that the first time he ever voted he cast his ballot for Grover Cleveland, while the last time he cast it for Woodrow Wilson. He wanted the present duty on fruits maintained.

There are few Democrats in the United States who do not recognize the necessity of protection. Their position is different from that of Republicans only in degree. The Republican wants all industry, in all parts of the country, to enjoy protection; the Democrat, in each case, wants protection for his own State, but a tariff for revenue only in every other State.

Democratic members of the Florida Citrus Exchange threaten to quit the Democratic Party forever if it carries out its present plans to reduce the duties on fruit. Similar threats come from other Democratic sections. The rank and file of the Democratic Party itself is likely to be converted completely to the doctrine of a protective tariff if the party leaders attempt to put the Democratic theory of tariff revision into destructive practice.

Not only did a majority of the voters declare for protection definitely at the last election, but those who actually voted for Wilson have since been urging it. In the face of such an overwhelming sentiment, the members of the Ways and Means Committee, now engaged in making up the tariff bills, would show wisdom by proceeding along conservative lines.

Mr. MANN. Mr. Chairman, in the public-building bill which we passed the other day we made provision for plans for a new Patent Office. I take it that this is a temporary expedient if the other building should be constructed.

Mr. FITZGERALD. No; even if they move the Patent Office out of this building there will still be a demand for office accommodations which can be provided far cheaper in this way than any other way.

Mr. MANN. But suppose somebody should propose over in the House Office Building to construct a one-story building in the court there, would it not be similar to this proposition?

Mr. FITZGERALD. No; I think not. I think the Patent Office court is a larger one.

Mr. MANN. On the contrary, I should think it was a smaller court. I should be bitterly opposed to the proposition over here.

Mr. FITZGERALD. This runs two squares, from Seventh to Ninth Street.

Mr. MANN. I remember a few years ago I was chairman of a special committee in the House. I found the end of all of the corridors in the Capitol fenced off from the light and air by little cubby-holes, put there for the benefit of some committees or something of that sort, owing to the pressure for room in the Capitol. I succeeded in having all of those removed, so far as the House side was concerned, and have since resisted anything that tends to shut off the light and sunshine from the interior of a building where it properly can come in. I think it is a sin to do anything in the Patent Office Building or any other of the Government buildings in Washington which will tend to prevent the sun shining into the rooms, where it can be done, and the free circulation of air. We are becoming a tuberculosis-stricken people, and it is in the main because we shut light and sunshine out of our rooms. I do not know whether this building will do that or not, but if it will, I will do everything I can to defeat it. That is the reason I ask the gentleman whether it will or not.

Mr. FITZGERALD. The assurances given to the committee were that it would not. The plan originated with those in charge of the building itself. It has been gone into very thoroughly, and I believe it is a very desirable improvement.

Mr. NORRIS. The improvement is set forth in this Senate document?

Mr. FITZGERALD. Yes.

Mr. NORRIS. Could the gentleman explain to us what that provides?

Mr. FITZGERALD. My recollection is that 35 additional well lighted and ventilated rooms are made available in this way.

Mr. NORRIS. Is there any change made in the entrance to the building?

Mr. FITZGERALD. No; this is in the interior court.

Mr. NORRIS. And it does not change the exterior?

Mr. FITZGERALD. No.

Mr. MANN. Mr. Chairman, yesterday I asked the gentleman from Wisconsin [Mr. NELSON], a member of the Committee on Public Buildings and Grounds, which committee has had up the subject of the Patent Office, if he would not look into this matter, and I gave him a copy of the report upon which this item is predicated. After examining it he expressed to me the opinion that it would not interfere with the light and sun in this Patent Office Building. I wanted the statement of the chairman of the committee upon the subject. I will never consent, where I can prevent it, to putting a building on open air spaces in parks when that building does not belong there as a part of the park features, or in any court spaces in public buildings, where it interferes with the air and sunshine.

Mr. HAMILTON of Michigan. Mr. Chairman, may I ask the gentleman the dimensions of this open place in the old Interior Department Building?

Mr. FITZGERALD. If the gentleman will wait, I think I can find it for him.

The CHAIRMAN. Does the gentleman from Illinois withdraw his reservation of the point of order?

Mr. MANN. I will withdraw the point of order.

The CHAIRMAN. The Clerk will read.

Mr. HAMILTON of Michigan. Mr. Chairman, one moment. I move to strike out the last word. I do it for the purpose of pursuing the inquiry that the gentleman from Illinois started. He says he is opposed to the exclusion of light and air. If we know the dimensions of this court and we know the size of the building proposed to be constructed, we can judge for ourselves.

Mr. FITZGERALD. The building runs from Seventh to Ninth Street.

Mr. COOPER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. COOPER. Has the point of order been reserved on the Patent Office item?

The CHAIRMAN. The point of order was reserved by the gentleman from Illinois, and he subsequently withdrew the point of order. The gentleman from Michigan has now moved to strike out the last word.

Mr. COOPER. I was about to renew the point of order.

Mr. FITZGERALD. Mr. Chairman, I make the point of order that it comes too late.

The CHAIRMAN. The gentleman is too late.

Mr. FITZGERALD. Mr. Chairman, the building proposed to be erected is four stories, 80 feet wide, with a corridor 10 feet wide in the center of it.

Mr. HAMILTON of Michigan. Eighty feet square?

Mr. FITZGERALD. Eighty feet wide.

Mr. HAMILTON of Michigan. How long?

Mr. FITZGERALD. I do not know the length of the court across which it goes.

Mr. HAMILTON of Michigan. Will it occupy the whole of the court?

Mr. FITZGERALD. Oh, no; the Commissioner of Patents and the chief clerk of the Interior Department, where this plan originated, have stated that it would not interfere with the lighting and ventilating of the present building, and they are more vitally interested in that than any outsiders would be.

Mr. HAMILTON of Michigan. I am very much in sympathy with the views expressed by the gentleman from Illinois.

Mr. FITZGERALD. I am in sympathy with the same movement. I would not favor the erection of any building which would in any way interfere with the most perfect ventilation and light from natural sources. There is no necessity for having any public building in such a condition that would bring criticism because it was insanitary or ill ventilated.

Mr. HAMILTON of Michigan. I assume the gentleman from New York has made a very careful investigation and satisfied himself, or this bill would not carry this appropriation——

Mr. FITZGERALD. This matter has been urged very vigorously and earnestly for several years by these officials.

Mr. MADDEN. A similar provision was reported in this bill some years ago for an addition to the Congressional Library Building. There has been no serious effect resulting from the construction of that building in that court, has there?

Mr. FITZGERALD. That was a large interior stack.

Mr. MADDEN. That is about the same thing as this.

Mr. FITZGERALD. That is practically the same thing; it was to put a light steel-and-glass structure there.

Mr. MADDEN. There has been no complaint about the construction of that over there, has there?

Mr. FITZGERALD. No; but there was very great criticism of the suggestion.

Mr. MADDEN. That is, at the time?

Mr. FITZGERALD. I have never heard any complaint. That originated with the Librarian, and of course he was thoroughly familiar with the situation.

Mr. COOPER. If the gentleman from New York will permit, do I understand this $220,000 is expended for a construction in the court of the Patent Office?

Mr. FITZGERALD. Across the court. It practically divides the court in two.

Mr. COOPER. Does not the gentleman from New York think that the much wiser course would be to build a new Patent Office, in keeping with the dignity of the office itself, which is really one of the most important institutions in this Government?

Mr. FITZGERALD. Well, the Patent Office Building is one of the most majestic buildings in the city, and the only trouble about it is that they require additional space.

Mr. COOPER. Well, I know; but has it never occurred to the gentleman that the air in the Patent Office is not good; that the building is not ventilated as modern structures are?

Mr. FITZGERALD. The trouble is this: The building is so congested now that it is necessary to utilize space in the corridors and in the rooms for stacks containing copies of patents. Under the law there must be printed 100 copies of every patent issued. They are accumulating at a tremendous rate, and are being put in the corridors and rooms and are crowding out the employees. With this additional space that condition will be relieved.

Mr. MADDEN. Is that for storage space?

Mr. FITZGERALD. Oh, no; it is not for storage space.

Mr. COOPER. Mr. Chairman, I have been in the building many times when the air was noticeably bad. I have heard complaints from employees that when the windows were opened the draft was dangerous, and when they were closed the air became so foul as to be dangerous. Instead of a Government like this putting $220,000 into a structure inside of a court, it would be much better to erect an appropriate, commodious, and entirely new building. Nothing in the history of the Government has been of more lasting benefit to all of the people than has the wonderful work of our inventors. The models of their inventions, with all of the documents relating to them and to the respective patents issued thereon, ought to be housed in one of the finest structures in this city—a building as fine as the Congressional Library.

Mr. PAGE. Mr. Chairman, I want to suggest to the gentleman from Wisconsin and to the committee, that the committee investigated this proposed building across the court in the interior of the Patent Office Building and found that it will not detract from the light or ventilation of the present building, and it will provide office space that is immediately needed for the occupants of the Patent Office, and it does not conflict in the slightest degree with the suggestion offered by the gentleman from Wisconsin that that particular bureau of the Government ought to have a new building. For the purpose of this argument I am willing to grant that, but we can construct the proposed building here within the space of eight months, and it can be utilized almost immediately to relieve the great congestion, and it is to be hoped that some of the bad ventilation and bad air may be gotten out of the old building within a reasonable time, so as to make it more suitable for the purpose of carrying on this bureau of the Government. We would not be able within five years, in my judgment, to erect a new building to give that relief.

Mr. COOPER. Will the gentleman permit a question?

Mr. PAGE. I yield.

Mr. COOPER. Will the construction of the proposed addition in the court tend in any way to improve the ventilation of the old part of the building?

Mr. PAGE. Not in the slightest degree. Neither will it make it worse.

Mr. COOPER. It could not make it worse.

Mr. PAGE. The gentleman will not contend that the Government is going to throw away and put into a scrap heap the building known as the Patent Office?

Mr. COOPER. I would not put it into a scrap heap, but I would leave it as it is to-day and proceed properly with the construction of a new and greatly needed Patent Office. I would not put a quarter of a million dollars into the construction of anything in that court.

Mr. PAGE. Even though there be a building constructed for a Patent Office, there are other bureaus under the Department of the Interior that are now in rented buildings, and this structure will not be thrown away, but can be utilized by the various bureaus that are now paying rents, and, in the opinion of some of us, enormous rents, in the District of Columbia.

Mr. COOPER. Does the gentleman say that other bureaus of the Government will be put into the new building in the court?

Mr. PAGE. No; I say in the event there is a new Patent Office and that bureau moves into the new building, this building that is proposed here can be utilized by some other bureaus under the Interior Department.

Mr. COOPER. Mr. Chairman, it has always been my firm conviction that the courts of buildings in this city, where the heat on the streets in the summer not infrequently runs to more than 100 degrees in the shade, ought not to be filled by structures of any kind. Has the gentleman an idea that there is to-day any court in any building in this city which is too large, in view of the summer heat, under which employees suffer here?

Mr. PAGE. That is a matter of opinion merely, and this committee was convinced this change would not make the rooms in the present building uncomfortable. The construction of it is going to be placed under the supervision of the Superintendent of the Capitol Building and Grounds, and its construction will be along lines that will make it at least comfortable for the people who have to work in it.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 101 strike out all after the word "Congress," in line 9, down to and including the word "Treasury," in line 11, and insert in lieu thereof the following:

"All of the work to be done under the supervision and direction of the Superintendent of the Capitol Building and Grounds."

Mr. FITZGERALD. Mr. Chairman, the object of this is to relieve the Supervising Architect from this burden. He states that his office is so overloaded he can not undertake the work.

The CHAIRMAN. The question is on the amendment of the gentleman from New York [Mr. FITZGERALD].

Mr. MONDELL. Mr. Chairman, I trust the amendment may be adopted. I want to say just a word about this building. It is one of the monumental buildings of this Capital city, and it is a building so constructed that, while it is old, it can be filled with modern plumbing where such is lacking, and it can be well ventilated. I occupied an office in that building for nearly two years. At that time the building was not so crowded as now and the ventilation generally was excellent. The difficulty with this building and many other public buildings is that, as we begin to crowd them and there is increased demand for space, they not only line the corridors with bookracks and files packed away for reference but, what is infinitely more harmful, they often close the ends of the corridors and make rooms of them. The result is that the corridor affords no ventilation, it simply runs against a dead wall and is of no such benefit in the ventilation of the building as it should be. That is the present condition of this building and a number of other public buildings.

I am inclined to the opinion that the improvement contemplated will not only not interfere with the ventilation of this building, but will be an improvement. This is a court between wings running to the street, and it is proposed to place on it a building with sufficient room to afford excellent ventilation between the buildings.

The construction of that building will make it possible to so relieve the congestion in the other building that it can be restored to its former condition as to the corridors, and when so restored the building can be well ventilated. The only trouble with that building now is that it is too crowded. There are

too many people in the building, and some of the plumbing needs renewing. There are many hundreds of tons too much material in the building, and it is important that we should get that material out.

Now, as to whether or no we should use this building permanently for the Patent Office is in no wise involved in this question. It is a building that ought to be valuable for generations for public uses, because it is a well-built structure, calculated to last for a great length of time, and is so built that, if not crowded, it is easily and readily ventilated. Any fault that it may have in that regard now is due to its overcrowded condition.

In my opinion we will beyond all doubt and in the no distant future provide another building for the present Patent Office. That office is not like some of our Government bureaus, a constantly reducing service, but one that will grow to great dimensions, and it is entitled to and will no doubt secure a permanent, new building of its own; but, as I said, we should not settle this question with any reference to that of a permanent building for the Patent Office.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. MONDELL. I yield.

Mr. COOPER. Is the gentleman aware of the fact—it is a fact, I am informed—that there are rooms in the Patent Office in which 20 people are working with only one place for washing facilities and with no running water at that? Talk about that being a modern building, with modern accommodations and systems of ventilation! I do not know where the gentleman gets his idea of modern ventilation. There is no approach to anything like it in that building.

Mr. MONDELL. If the gentleman quoted me correctly, he would not say that I said anything about its being well ventilated and well appointed. I said nothing of the kind. I said it is a building that can be easily and readily ventilated if it is not crowded. It can also be fitted with modern plumbing. The building is now in a tremendously crowded condition and, of course, the ventilation is bad and toilet accommodations are inadequate.

Mr. TOWNER. Mr. Chairman, I will not say that I shall oppose the adoption of this amendment, but I think gentlemen ought to hesitate a long time before committing themselves to this proposition.

Gentlemen will notice that this proposition is based on a report made, embraced in Senate Document No. 543, in the Sixty-first Congress. From an examination of that document I find that it is proposed to excavate the interior of the court of the building to the level of the basement floor, and to erect thereon a one-story structure in which to accommodate photolithographic copies of drawings, and to erect in the center of said court a building 80 feet wide, four stories high, with a central hall, 10 feet wide, connecting with the north and south wings of the present building, which will give 32 rooms 17 by 35 feet, which will accommodate 17 divisions, or nearly 300 employees.

We have it on the testimony of Members of this House that the present building, with the interior court entirely open and available for purposes of furnishing light and ventilation, does not do so; in fact, they assert that the building is not really habitable for work as it is; and yet it is proposed by this proposition to erect in the interior of this court a building four stories high to take up almost all of this room, and these men that are to occupy it are to be accommodated by what space may be left on either side of this court to furnish them light and ventilation.

It is also expected that what space may be thus left will furnish light and ventilation for the remainder of the building. If it were proposed originally to erect in the city of Washington a building that was to cost $220,000 and to establish it in an interior court, where it would be possible that only a very few feet of the space for air and ventilation could be obtained for those who are working therein, would any gentleman here present advocate that kind of a proposition? And yet that is what is here proposed—to erect in this space a large building four stories high, costing $220,000, with no opportunity afforded for adequate light or ventilation.

I might say that when the Commissioner of Patents appeared before the Committee on Public Buildings and Grounds he stated that it would be nearly impossible to so rearrange or rebuild this building as to give them the accommodations that they need, and he therefore advocated before that committee that a new building should be given to them.

I realize the fact that this building, this department, is inadequately furnished, and, as suggested by the gentleman from Wisconsin [Mr. COOPER], it is entitled to a good building. I would have been glad to see it included in the present omnibus building bill, and I hope that some satisfactory arrangement will be made soon to secure for this important department a suitable and adequate building.

But, Mr. Chairman, it would be vastly better now for us to hire and rent the additional space required than to build this addition, which, in my judgment, will have to be abandoned after it is erected. [Applause.]

The CHAIRMAN. The question is on the amendment of the gentleman from New York.

The amendment was agreed to.

The Clerk read as follows:

Enlarging the Capitol Grounds: To continue the acquisition of the land described in the sundry civil appropriation act approved June 25, 1910, and as authorized and prescribed in said act, for enlarging the Capitol Grounds, $500,000.

Mr. SISSON. I move to strike out the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend page 103 by striking out the paragraph from lines 16 to 20, both inclusive.

Mr. SISSON. Mr. Chairman, I ask unanimous consent that I may proceed for 10 minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that he may proceed for 10 minutes. Is there objection?

Mr. MANN. Mr. Chairman, reserving the right to object, may I ask how long this debate is likely to run on this item?

Mr. SISSON. I hope not long; but of course I have no idea.

Mr. MANN. I wondered if we could not arrange in advance as to the length of time.

Mr. SISSON. So far as I am personally concerned, unless several gentlemen want to be heard on the proposition, I am willing to agree to 10 minutes on a side.

Mr. PAGE. I ask unanimous consent that the debate on this paragraph and amendments thereto may be concluded in 20 minutes, 10 minutes to be used on this side of the House by the gentleman from Mississippi [Mr. SISSON] and 10 minutes to be under the control of the gentleman from Illinois [Mr. CANNON].

The CHAIRMAN. Is there objection?

Mr. CULLOP. I object.

Mr. MANN. How much time does the gentleman from Indiana want?

Mr. CULLOP. I do not know yet whether I will want any time. It will depend on the course of the debate; but I think I should like 5 minutes.

Mr. MANN. Make it 15 minutes on a side.

Mr. PAGE. I amend my request in that way.

The CHAIRMAN. The gentleman asks unanimous consent that the debate on this paragraph and all amendments thereto be closed in 30 minutes; that the gentleman from Mississippi [Mr. SISSON] have 10 minutes and the gentleman from Illinois [Mr. CANNON] 15 minutes under his control——

Mr. PAGE. And that the gentleman from Indiana [Mr. CULLOP] have 5 minutes.

The CHAIRMAN. And that the gentleman from Indiana [Mr. CULLOP] have 5 minutes. Is there objection?

There was no objection.

Mr. SISSON. Mr. Chairman, this matter has been in controversy for some time. This item went into the sundry civil bill about three years ago. It is not necessary to go in detail into the history of how it got into the bill, but this is the continuation of a project for the purpose of purchasing all of the property between the Capitol and the Union Station.

I have never felt that the United States Government needed all of that property. A great deal of it is built up with as good buildings as there are in the city. When the original estimate came in as to the expense that it would be to the Government, a little over $3,000,000, I stated that at the very next session of Congress it would cost more than $5,000,000, according to the assessed value; and if they had purchased all the land that was originally contemplated to be purchased it would have cost more than $5,000,000.

This property next to the Union Station was ground which the Union Station Co. ought to have parked for itself, and the turning over of all this property to the Federal Government gives the Union Station Co. the benefit of the park at the expense of the Government of the United States.

The commission that was appointed under the original act has had $1,500,000 at its disposal. About $1,200,000 of that money has been expended. The commission now has to its credit about $300,000. The property which was taken first were the squares next to the Senate Office Building, commonly known as the Babcock property. Then they bought the property of which a portion belonged to the Baltimore Railroad Co., and unless I had a map here I could not indicate the square. The report shows the squares, but, in the absence of a map, you can not

determine the exact location unless you are thoroughly familiar with the property.

Now, I do not believe that it is necessary for the Government to proceed at this time. I do not believe that it was ever necessary for the Government to own this property. We have an opportunity here to cease purchasing any more of this property. If the Government should need the property already purchased in the future for its buildings, or for any other purpose, then the money has not been thrown away.

The last time this matter was up in the House I made a motion to strike this clause out of the bill, but, as gentlemen who are here will recall, there were not more than thirty-odd people—perhaps 40 or 45—in the Chamber. The Baltimore convention was in session, and just prior to that the Chicago convention had been in session, and with the understanding that the Members might attend the Chicago convention and with an understanding that Members might attend the Baltimore convention, there was a gentleman's agreement made that there should be no points of order that no quorum was present. I was bound by that agreement and did not make it, so a very few Members have ever voted on the matter.

At that time it was put in the bill by 4 or 5 votes, according to my recollection. I recall that there was one Republican that voted on that side against it, and the balance of the votes against it were Democratic.

Now, at that time if we could have had a full expression of the membership of the House, and they had determined to continue the purchase of the property, I would not at this time press this matter, but I believe it is a useless expenditure of public money, and I insist that the paragraph go out. In addition to that it means the adding to the care of the Capitol grounds a space about double what it is now, and I do not believe it is necessary; especially do I not believe it necessary when if the Union Station people desired that it should be park property it might park its own property, because the Union Station railroad companies own two squares adjacent to and contiguous to it, and portions of two other squares adjoining that property.

I introduced a resolution, which the Committee on Rules did not report, the committee being divided, a proposition for ascertaining who were the owners of the property. That matter was never gone into because the committee declined to report the resolution.

I do not care now to discuss that matter, but prior to the time the money was expended I would have liked to know who owned the property. I trust that the membership of this House will not now put upon the Treasury the burden and the expense not only of purchasing the balance of this property but of maintaining and caring for it, and tearing down this good property, for it is good property. There are several squares where the property is not in the best of shape, but from Arthur Place up to the Senate Office Building the property will compare favorably with any property in any portion of the city of Washington.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. SISSON. Certainly.

Mr. STEPHENS of Texas. Is the Maltby Building one of the buildings that will be torn down?

Mr. SISSON. Yes.

Mr. STEPHENS of Texas. Is it not a fact that it is contemplated putting 30 or 40 Congressmen in there?

Mr. SISSON. I understand there is such a proposition, but I do not know.

Mr. STEPHENS of Texas. Is it not one of the best buildings in that square?

Mr. SISSON. I have been in it and it is a good building. Whether it is one of the best I do not know. I have been uniformly and earnestly opposed to the purchase of this property. I am willing, if we can get a full expression of the membership of the House, if we can get a full committee to pass upon it, and the committee shall determine this question against me at this time, I am willing to quit the fight. But I am unwilling to do so unless we have a full committee, or a full House, and get a vote on the proposition. Then if it is against me, and we have a quorum of the Committee of the Whole, I am willing to quit. If I have any time, Mr. Chairman, I yield it back.

Mr. CANNON. Mr. Chairman, I want to yield a little time to the chairman of the committee, who is out at just this present moment. Will the gentleman from Indiana use some of his time?

Mr. CULLOP. I prefer that the gentleman from Illinois use his time now.

Mr. CANNON. Mr. Chairman, I ask the chairman to notify me at the end of 10 minutes.

Mr. Chairman, a law was enacted taking, in round numbers, 12 squares between the Capitol Grounds and the Senate Office Building down to, I believe, First Street, and then across, with a view of having roads or avenues angling across to the terminal. That is a law. It was not in its detail a wise law, although it has worked out to the place where we now find ourselves. A commission was appointed, consisting of the Vice President, the then Speaker of the House, and the Superintendent of the Capitol, with directions to purchase if it could be purchased at a fair price, and if not to condemn the property. Five hundred thousand dollars a year under this law was to be appropriated. There have been $1,500,000 appropriated in three years. We first condemned the two blocks between the Capitol and the plaza, where the old Baltimore & Ohio depot stood, and between the Senate Office Building and the western boundary of the plat described. It was supposed that it would cost about $7,000,000 to acquire this property. It was hoped that it might be acquired for less money; that when the Government had declared by law that it was going to take it that the owners of the property would fall over themselves to sell it at a cheap price, as they could not sell it to anybody else. That was the theory. We advertised, when we got the first $500,000, for offers for all of the property.

Mr. SISSON. Mr. Chairman, will the gentleman permit an interruption?

Mr. CANNON. I have but little time.

Mr. SISSON. I think the gentleman is mistaken in his statement. The original estimate when this bill went into effect was $3,200,000, was it not?

Mr. CANNON. I have a copy of a hearing here, held May 31, 1912, before the subcommittee.

Mr. SISSON. But I am speaking of the first estimate.

Mr. CANNON. The gentleman has had his time. I do not recollect nor do I care. I had nothing to do with the enactment of this legislation, directly or indirectly. A year ago, in May, 1912, at a hearing at which this matter was up, what were supposed to be the best judges we could get stated that it would amount to $7,000,000 in the aggregate. We advertised. We obtained bids for nearly all of the property, but it aggregated, according to my recollection, something over $8,000,000. We could not buy a single tract; and then we condemned a part of the land that I have referred to—the two blocks—for $1,100,000, in round numbers.

Mr. TOWNSEND. That is, for those two blocks?

Mr. CANNON. For those two blocks; and they are the most valuable blocks.

Mr. MADDEN. How did that price compare with the offers made by the owners?

Mr. CANNON. Oh, it was, say, 25 per cent less; I would not be certain. I am satisfied, after full inquiry, after the condemnation proceedings, after the report of the commissioners and of everybody else, that it was condemned at a less price than property was ever before condemned at by the Government. That has been paid for, substantially. There are $380,000 left not yet paid, unexpended.

Another half million dollars and then another half million dollars were appropriated, making a million and a half altogether. We found that as we appropriated, appropriating a part of it, the price would spring with the future appropriations. We took the advice of the Attorney General, after full investigation, and he said that it could all be condemned without waiting for the appropriation. It has been appraised, and the values have been found, and it is ready now to be acquired by the Government whenever we make the appropriation.

Mr. MADDEN. How much does it all amount to?

Mr. CANNON. In one moment. In good conscience, as it has all been condemned, it ought to be paid for. The law provided for an appropriation of $500,000 yearly, and the committee, after investigation, has recommended the appropriation for the $500,000. I will now give the gentleman from Illinois the information that he desires. All of this property, save alone Arthur Place—which my friend was very anxious should not be condemned because it has a new expensive hotel built on it—was condemned for $4,323,000, in round numbers. We left Arthur Place out, because we found that from the Peace Monument, on the Avenue, by cutting off a little bit of the present Capitol Grounds, we could dispense with it, and if Congress ever desires that it be condemned in the future it can be condemned.

Mr. TOWNSEND. Is that in addition to the blocks already condemned?

Mr. CANNON. No; that amount, $4,323,000, includes all. From the last condemnation $380,000 appropriated remained, and if this appropriation is made there will be $500,000 to be added to the $1,500,000, making $2,000,000 appropriated. But

it will require in the end, to finish up and for the whole property, $2,823,972.35 yet to be appropriated, which includes the half million dollars recommended by this bill.

Now, the gentleman from Mississippi says the law ought never to have been passed. It was passed. We have acquired these two blocks. They were residences. They have all been condemned and almost entirely paid for. I think Congress acted wisely. The Continental Hotel has been put up. This condemnation does not include that, and around this Plaza and in the Plaza, if Congress had not taken this property and provided that it should be taken by law, hotels and buildings would have been put up. And so it is on the east side of the Plaza, as it appears now.

The CHAIRMAN. The gentleman has used 10 minutes.

Mr. CANNON. Well, I will use two minutes more. Undoubtedly buildings would have been put up and in the end would have been taken. We have got the terminal, we have got the Capitol, and now we have got this property at the lowest possible price, and I want to congratulate the Attorney General and the appraisers and all hands for the price at which this property has been condemned.

Mr. COOPER. Will the gentleman permit an interruption?

Mr. CANNON. Yes.

Mr. COOPER. The gentleman said a little while ago the estimate at one time was $7,000,000. I recall distinctly I heard many men say it would be $10,000,000, and here is the Attorney General's report, testifying before the committee, that members of the committee, even in the last year, thought it would be $7,000,000.

Mr. CANNON. It is an exceedingly advantageous purchase by condemnation, and I believe the appropriation ought to be made, so far as this bill is concerned, which only carries $500,000 that the law provided for yearly. I am glad we condemned the property and that we have got it, whether Congress objects to the condemnation now or not, simply for the reason that if we had condemned $500,000 a year I have no doubt, bidding against ourselves by condemnation piecemeal, that it would have cost at least a million and a half or two million dollars more.

Mr. CULLOP. Will the gentleman yield for a question right there?

Mr. CANNON. My time is short. If I can have unanimous consent for five minutes for the chairman of the committee, I will use the balance.

Mr. CULLOP. I will give the gentleman one minute of my time if the gentleman will answer my question.

Mr. CANNON. Can I have unanimous consent for five minutes more?

Mr. CULLOP. I ask unanimous consent that the gentleman have five minutes.

Mr. SISSON. I shall object, unless I can get five minutes.

Mr. CANNON. Well, that is all right; I would just as soon the gentleman have five minutes more as not.

Mr. CULLOP. I ask that each gentleman may have five minutes, as both seem to be well posted.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana? [After a pause.] The Chair hears none.

Mr. CANNON. Now, I want to say that this is a great Capital. All the people that come from all over the country to it land at that terminal. I was not in favor of the terminal, but now we have got the terminal I am glad we have got it. The Congress was wiser than I was, and when they land there, let me tell you, gentlemen, that, with the multiplied hundreds of thousands who come, they will be glad to see no big building or small building between that landing place and the Capitol. [Applause.] Let me say again that a constituent of mine, a close-fisted farmer, a year or two ago came down here, and I showed him some attention, and, among other places, I took him over to the Library, and he went through it. "Well," he said, "this cost a good deal." "Yes; it is an expensive thing," and he looked at it. He had never seen anything like it. I said, "It is the greatest show building on earth, and they say it costs $1.70 for every book that is removed from a shelf." He looked all around, and he swelled up—he was worth not to exceed $20,000—and he said, "I am glad it does, and I am glad to have the chance of seeing it." [Applause.] One other instance. Two boys enlisted in the Army at the beginning of the war for the Union. They came down here—they had a few days' leave of absence—and they looked about and went about this Capitol, and one of them said, as he looked at the Capitol and climbed the steps and looked about him, "My God! I never realized before what this country meant." And he said, "Let what happen to me that may, it is an object lesson for which I am willing to die." [Applause.] Oh, gentlemen, there is something in sentiment. You know how rich this country is. I am for a sufficient Capital; I am for good buildings; I am for an arts commission. I want to do it and do it well; it is worth a hundred times its cost. [Applause.]

Mr. DICKINSON. Will the gentleman answer just one question?

Mr. CANNON. Yes.

Mr. DICKINSON. Will you please state what will be the aggregate cost of the entire property already taken and to be taken?

Mr. CANNON. Four million three hundred thousand dollars, in round numbers.

I will reserve the balance of the time of the chairman of the committee, who will be in a little later.

Mr. CULLOP. Mr. Chairman, in 1910, when this policy was begun, I thought then the manner in which it was instituted was entering upon a very expensive course, and I am still of that opinion.

I have no objection to the beautifying of the grounds between this Capitol and the Union Station. I believe that it ought to be improved, and I believe all the necessary steps should be taken to make them as attractive as possible. But the part I am objecting to now on this policy is this: I understand that the entire cost of the real estate that is to be acquired will amount to $4,323,491.28, and that this addition, which makes up the difference between that sum and the $7,000,000, is for the cost of removal of the buildings.

Mr. CANNON. Oh, no. There is no $7,000,000 limit on it; and the wreckage will pay a profit for its removal, and more, too.

Mr. CULLOP. That is the question I wanted to ask the gentleman. I see here that on May 31, 1912, the Attorney General reports that the entire cost will amount, as was disclosed at that hearing, to $7,000,000.

Mr. CANNON. That was the best estimate that we could get.

Mr. CULLOP. Now, I believe the gentleman from Illinois [Mr. CANNON] will agree with me that the property to be removed will pay the expense of removing the same?

Mr. CANNON. And a good deal more.

Mr. CULLOP. And a good deal more; and all the Government should be out for the acquirement of this property is the $4,323,471.28.

Mr. CANNON. That is all it will be out.

Mr. CULLOP. Now, I find that it is contended by gentlemen on this floor that the value of the property to be removed—the houses and the material in them—will not pay the cost of the removal, but that the Government will be put to an expense for the removing of the same.

Mr. CANNON. My information, from the best-trained men that I could get at, is that the wreckage will more than pay for the removal of it.

Mr. CULLOP. In my judgment, the wreckage ought not only to pay for the removal of it, but a large part of the expense of improving the grounds.

Mr. CANNON. I think it will in part do so. Just how much, I do not know. I am only dealing with what I know about it, namely, the condemnation of the property.

Mr. CULLOP. Now, there has been already appropriated $1,500,000. The policy is, as I understand it, to appropriate half a million each year until the whole scheme is consummated.

Mr. CANNON. I want to say to my friend that I do not want to deceive anybody. We found that we could condemn this property much cheaper at wholesale than at retail. Now, Congress need not appropriate a cent, need not necessarily take any of it, but I believe it is equitable, and I hope when the matter is fully presented finally, and when it is considered during this session, the $3,200,000 necessary to completely pay for this property will be appropriated. [Applause.]

Mr. CULLOP. It is therefore, Mr. Chairman, the manner in which this affair was instituted that deserves criticism. Of course, the value of these properties soared when the first step taken was to pass a provision through Congress to acquire the same. It served notice on the owners that the Government was going to purchase the properties, and then, naturally, the owners, with this authentic knowledge, would increase the price far above the real values. After telling them the Government was to have their properties they well knew they could dictate the price, and they have done so. This is the feature of the matter which, in my opinion, merits complaint and deserves criticism. They have done, in holding out for an excessive price, just what others would have done under like circumstances. It was their opportunity, and they have embraced it. Prudence in business methods would have suggested a different plan for the acquirement of these properties. Now, it is asserted, and I do not know by what authority, that a large sum will be required to remove the buildings on these grounds. This ought not to be

the case if it is contemplated. The value of the wreckage, if properly handled, will not only pay for the removal of the same but should be sufficient to leave, after paying all such expense, a large surplus. I am opposed to appropriating anything for this purpose, and I hope if any such an appropriation is proposed it will be voted down. Practical business methods should be applied to this matter, and if they are the public will profit thereby.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. CULLOP] has expired.

Mr. CULLOP. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SISSON. Mr. Chairman, I believe I have five and one-half minutes.

Now, this property will cost, if you include the property on which the Driscoll Hotel now stands, the amount which I stated it would cost when I first made the fight against the proposition, to wit, about $5,000,000. When this item was put in in the Senate on the sundry civil bill the estimates then made by those people who advocated the proposition was $3,200,000. Now, after they put the law on the statute books, I find men coming before this commission and saying it is worth $7,000,000. I never said it would be worth $7,000,000. I pointed out at one time on this floor, when I first addressed myself to this, that it would cost $5,000,000, and if they had condemned all the property it would have cost $5,000,000. I had the matter investigated at the time, and, upon the estimates I had, it would have cost that amount.

If they had taken all of the property, it would have cost $5,000,000, notwithstanding the fact that the original estimate when this law was passed was for $3,200,000, and now these witnesses who come before this commission say that a reasonable price was $7,000,000.

Why, that was while they were selling it to Uncle Sam, and property that was assessed at $1 per square foot was condemned on the testimony of the witnesses at a much higher figure. I am not censuring the gentleman from Illinois [Mr. CANNON] or the commission, because under the rules that obtain in the purchase and sale of real estate in this city they could not help themselves, under the testimony, if they wanted to buy property here.

Now, we all believe in beautifying the Capitol Grounds. But how many crimes are committed on the Federal Treasury in the name of beautifying the Capitol Grounds! How many times do we find people giving the opportunity to Congress to buy a fringe of timber for the purpose of enlarging the parks! I did not believe, and I do not believe now, that this property which is being purchased could be purchased for less than $5,000,000, and if they had taken all the property that was included in the original proposition it would have cost $5,000,000. Now they eliminate some of it, and it will cost four million and some odd thousand dollars. Only $1,200,000 has been expended of that amount.

I trust that the committee will vote this section out of the bill, because I do not believe that the condition of the Public Treasury, in view of the expenses of this session of Congress, will warrant us in spending money for things that may wait.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Mr. Chairman, can the gentleman state what the assessed valuation of the property was?

Mr. SISSON. The Chair is evidently mistaken. I was watching the clock carefully, and my belief is that I have some time remaining.

The CHAIRMAN. The time of the gentleman has expired, according to the record kept by observation of the clock here. The gentleman from Illinois [Mr. CANNON] is entitled to four minutes.

Mr. CANNON. How much time did the Chair say I have remaining?

The CHAIRMAN. Four minutes.

Mr. COOPER. Mr. Chairman, will the gentleman yield for a question?

Mr. CANNON. I yield to the gentleman from New York [Mr. FITZGERALD] four minutes, and the gentleman from Wisconsin [Mr. COOPER] asks if I will yield to him 30 seconds.

Mr. COOPER. I simply wish to quote the figures given in the report signed by the gentleman from Illinois [Mr. CANNON] and Elliott Woods as to the condemnation proceedings. They say:

> The commission therefore recommends that the sum of the awards, $3,264,434.78, less the available balance, $380,462.43, of the former appropriations on hand, namely, $2,823,972.35, be appropriated by Congress at the present session to satisfy the awards when confirmed by the court, and thus immediately vest title to the property in the United States.

That shows that the balance to be paid for the land would not be $2,300,000, but $2,823,932.35. The $500,000 in the pending paragraph is to apply on that last amount. Is that correct?

Mr. CANNON. Yes.

Mr. FITZGERALD. Mr. Chairman, four or five years ago Congress determined to buy the property between the Union Station and the Senate Office Building.

Mr. SISSON. I know the gentleman does not want to make a misstatement. It was in June, 1910, three years ago.

Mr. FITZGERALD. Yes; three years ago; and since that time $1,500,000 has been appropriated for that purpose. According to the report of the commission, as the result of the condemnation proceedings, there will be required a little over $2,000,000 in addition to the $500,000 carried in this bill.

I am one of those, Mr. Chairman, who believes that this property should be acquired in order to add it permanently to the Capitol Grounds.

I regret that the gentleman from Mississippi [Mr. SISSON] takes the attitude he does toward this matter. I called attention last year to the fact that to another great Mississippian was due the present Capitol Grounds and the addition of the two wings of this Capitol; and one of the things that is seldom mentioned, but which redounds greatly to the credit of Jefferson Davis, is the fact that under his leadership and by his efforts the two wings of this Capitol were authorized and the Capitol Grounds were extended to their present dimensions. That was half a century ago, and to-day, with the Union Depot constructed and the development of Washington proceeding rapidly, a proper addition to these Capitol Grounds is the land between the two buildings.

Now gentlemen are familiar with the situation. It was stated and variously estimated that it would cost $7,000,000 or more in order to acquire this land, but the report shows that the total cost will be less than $5,000,000. I know of no public improvement more desirable in this city.

Mr. SISSON. I am sure, Mr. Chairman, that the gentleman does not want to make a misstatement.

Mr. FITZGERALD. No; I do not.

Mr. SISSON. I have the record here, and I want to correct a statement I made. The original estimate was that it would cost $3,600,000. I thought it was $3,200,000.

Mr. FITZGERALD. That is true. But the statement has repeatedly been made in the discussion of this item that, based upon previous experiences, the cost of this ground would exceed $7,000,000.

The commission has declined to make any private purchases. I understand the gentleman from Illinois [Mr. CANNON] has repeatedly stated that in view of his connection with the commission, and of the criticisms made of such commissions, he has insisted that this land be taken in condemnation proceedings.

I hope the amendment will not prevail.

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The question is on the amendment offered by the gentleman from Mississippi to strike out the paragraph.

The amendment was rejected.

The Clerk read as follows:

> Restoration of lands in forest reserves: To enable the Secretary of the Interior to meet the expenses of advertising the restoration to the public domain of lands in forest reserves, or of lands temporarily withdrawn for forest-reserve purposes, $16,000.

Mr. RUCKER of Colorado. Mr. Chairman, I move to strike out the last word. I should like to ask the gentleman from New York [Mr. FITZGERALD] if this is the same amount that was appropriated last year.

Mr. FITZGERALD. Last year it was $20,000.

Mr. RUCKER of Colorado. Was it all expended?

Mr. FITZGERALD. It is available this year and we can not tell just yet. But this amount, $16,000, is the estimate of the Commissioner of the General Land Office, and a statement of the amount he believed would be required. We have given all that was requested.

Mr. RUCKER of Colorado. Mr. Chairman, I ask leave to withdraw the pro forma amendment, and I move to strike out "sixteen" and insert in lieu thereof "twenty."

The CHAIRMAN. The gentleman from Colorado offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Amend, page 106, line 10, by striking out "sixteen" and inserting in lieu thereof "twenty."

Mr. RUCKER of Colorado. Mr. Chairman, this sum of money is to be expended all over the country. Some 400,000,000 acres of land are in forest reserves. We have 15,000,000 acres of land in forest reserves in the State of Colorado. This bill is the progeny of an administration favoring the taking up and keeping from the taxing power of these various States where these forest reserves are located the land included in them. We are

now getting into another atmosphere politically, and it is my belief that if $20,000 was needed heretofore, when a small number of acres were eliminated from the forest reserves in the State of Colorado, we ought now to have $20,000, because, in my judgment, the work of that department is going to be materially increased, for I believe the incoming administration is going to eliminate very much more land from our forest reserves than the former administration did.

In this connection I want to say that there has been an infusion of new blood into the legislative hall at the other end of this Capitol from Colorado, and there is going to be an infusion of new blood in the next Congress at both this and the other end of the Capitol, and all of the present and the new Members, except one distinguished gentleman, are against this bureaucratic policy heretofore in vogue with reference to these forests, and bulwarked as they will be by an administration, whose face will be set against such policy, much may be expected.

In this connection, as I see my time is up, I want to include as a part of my remarks a report appearing in a recent issue of the Rocky Mountain News of a lecture delivered by Mr. John F. Shafroth, then governor, now Senator elect, before the students at the University of Michigan about 10 days ago. I ask to have it printed as a part of my remarks upon this question, because it deals directly with this and other kindred questions.

The CHAIRMAN. If there be no objection, the request of the gentleman will be granted.

There was no objection.

The article referred to is as follows:

SHAFROTH SLAPS PINCHOT POLICY—ENTIRE STUDENT BODY OF ANN ARBOR HEARS PROTEST OF COLORADO SENATOR—LIKENED TO BRITISH TAX—STATE IN SAME SITUATION AS WERE THIRTEEN COLONIES, EVEN IN REVENUE'S EXPENDITURE.

Senator John F. Shafroth addressed the entire student body and faculty of Ann Arbor University, his alma mater of the days of seventy-six, last night by special invitation of the faculty tendered him weeks ago. Ann Arbor also is the college home of his son Morrison, a graduate of the class of 1910, and William, who is now attending the college. Senator Shafroth was an honored guest Saturday night at the annual "jay hop" or "prom," the great social event of the year there.

UNDUE BURDEN INTENDED.

Gov. Shafroth in part said:

"Pinchot's policy would not only deprive the States of the means of raising the necessary revenue to establish and maintain good government, but in addition to that injustice the advocates thereof propose to make revenue for the Federal Treasury by taxing the natural resources of the West. By so doing they propose to make the mountain States pay an undue proportion of the burdens of the National Government.

"It has been estimated by the Geological Survey at Washington that there are contained within the boundaries of Colorado 371,000,000 tons of coal. More than three-fourths of this coal is upon the public domain. If a rental of 10 cents a ton is to be imposed upon that natural resource of Colorado, it would mean ultimately that the citizens of our State must contribute $27,000,000,000 to the Federal Treasury. This tax is advocated on the ground that it will prevent waste.

"According to this geological report Colorado alone has sufficient coal to supply the world, at the present rate of consumption—of about 1,250,000,000 tons per annum—for 300 years. Although my State is now mining 11,000,000 tons of coal a year, yet our production for 50 years has exhausted only one-half of 1 per cent of our coal deposit.

RENTAL ON WATER POWER.

"It has been estimated by the authorities at Washington that from 1,000,000 to 2,117,000 horsepower can be generated from falling water in Colorado. If the Government is to charge $1 per horsepower as a rental for a temporary right of way for transmission lines, and conducting that water on Government land until it attains a height sufficient to generate power, it will mean, when this power is fully developed, a rental to the National Government from the inhabitants of Colorado of from $1,000,000 to $2,117,000 a year. It must be remembered that every horsepower generated by falling water saves the burning on the average of 21 tons of coal each year.

"If royalties are to be paid for the extraction of the precious and base metals, other millions will be turned into the Federal Treasury from the natural resources of our State. It may be that it will be proposed, as is done in the forestry department at Washington, that one-fourth of the receipts will be turned over to the State treasury, to be used only for certain purposes to be prescribed by the Federal Government.

BRITISH TAX RECALLED.

"But is it equal or fair treatment to our Commonwealth for the Government to impose any tax whatever upon our natural resources, which it has never imposed upon the older and richer States of the Union? It must be remembered that the act of Parliament of Great Britain, imposing duties upon goods shipped to the thirteen colonies, against which our forefathers rebelled, provided that the revenues derived therefrom should be expended in America for its protection and defense.

"All taxes upon production must ultimately be paid by the consumer—yea, more, such policy means that the people will have to pay additional prices for such products far in excess of the royalties which will be obtained by the National Government. It will put our people at a disadvantage in the struggle for industrial supremacy.

"Of the entire Union, the mountain State of Colorado is the best protected territory from foreign invasion. Even without a navy or fortifications no hostile power could ever devastate our fair Commonwealth. Yet in the form of import duties and internal-revenue taxes we cheerfully contribute to the National Government our fair proportion, even if those revenues are largely spent in building *Dreadnoughts*, in constructing seashore fortifications, and in being prepared for war against a hostile nation. The last Congress appropriated over $200,000,000 for these purposes.

CHEERFULLY AIDS OTHERS.

"We have no navigable streams, yet our Representatives in Congress cheerfully vote appropriations for improving the rivers and harbors of the country for internal and foreign commerce. In the Sixty-first Congress alone these appropriations for rivers and harbors amounted to $88,902,830.

"The State of Colorado pays into the National Treasury more than $5,000,000 a year, which is its fair proportion of the revenues of the Government collected from all the States of the Union. But the Western States object most strenuously to paying additional millions, the effect of which must be to retard the development of their natural resources.

"It is bad enough to be compelled to exempt from taxation, until disposed of, the 15,000,000 acres of forest reserves and 9,000,000 acres of coal lands of the public domain in Colorado, and thereby make us pay an equivalent for these lands every 30 years and yet never own a foot of the same. But we can not, in addition to that, consent to a tax upon our natural resources, to be paid into the Federal Treasury."

Mr. FITZGERALD. Mr. Chairman, I hope the amendment will not be adopted. The bill carries the amount estimated for by the Commissioner of the General Land Office, and it is believed that this sum will be necessary. The work that is done depends upon the lists received from the Department of Agriculture, and, based upon the experience of the Land Office during the past, the commissioner believes that the $16,000 will be sufficient. Under these circumstances there is no reason for appropriating a larger sum.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. RUCKER].

The amendment was rejected.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 8195. An act granting relief to certain American citizens in El Paso, Tex., and Douglas, Ariz.;

S. 8536. An act to authorize the construction of a bridge across the Mississippi River in Beltrami County, in the State of Minnesota;

S. 8538. An act to authorize the St. Louis & Western Traction Co. to construct a bridge across the Missouri River near Weldon Springs Landing, in the State of Missouri; and

S. 8539. An act to authorize the St. Louis Belt, Illinois & Eastern Traction Co. to construct a bridge across the Mississippi River near the mouth of the Missouri River.

The message also announced that the Senate had passed without amendment bills of the following title:

H. R. 11478. An act to quiet title and possession with respect to a certain unconfirmed and located private land claim in Baldwin County, Ala., in so far as the records of the General Land Office show said claim to be free from conflict;

S. 4681. An act to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23293) for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

Opening Indian reservations (reimbursable): To meet the expenses pertaining to the opening to entry and settlement of such Indian reservation lands as may be opened during the fiscal year 1914: *Provided*, That the expenses pertaining to the opening of each of said reservations and paid for out of this appropriation shall be reimbursed to the United States from the money received from the sale of the lands embraced in said reservations, respectively, $20,000.

Mr. BURKE of South Dakota. Mr. Chairman, I move to strike out the last word. I want to ask the chairman of the committee if he can give us any information as to the cost of these reservation openings; if he has any figures that will show what the expense is in connection with any one of the openings, or more than one?

Mr. FITZGERALD. I do not recollect.

Mr. MONDELL. Will the gentleman from New York yield to me? The only expense paid out of this fund, or the principal expenses, are the traveling expenses of the office force here in Washington to attend the opening, and whatever expense is necessary at the point where the openings are had.

Mr. BURKE of South Dakota. Can the gentleman give us information as to how much is required? It seems to me that $20,000 is a large sum. The superintendent who directs the opening is a man already in the service of the Government in the General Land Office.

Mr. MONDELL. And a very careful man.

Mr. BURKE of South Dakota. A very careful man, and a man whom I hope to see promoted in the near future.

Mr. MONDELL. I join with the gentleman in that hope.

Mr. BURKE of South Dakota. But the expense must be largely traveling expenses, except, I presume, in the matter of advertising, maps, circulars containing instruction as to how the opening shall be conducted, and so forth, considerable is expended.

Mr. MONDELL. My understanding is, and I judge from the hearings, that a large portion of this is to be used at one opening, the Fort Peck opening. I think the gentleman knows that the officer of the department who has charge of these openings will not go to any unnecessary expense.

Mr. BURKE of South Dakota. I agree with the gentleman.

Mr. MANN. May I inquire of the gentleman what patronage this officer has?

Mr. MONDELL. None.

Mr. BURKE of South Dakota. None in the world.

Mr. MANN. Then I can not understand the purpose of these complimentary remarks.

Mr. MONDELL. He is a good Democrat and has made a good commissioner.

Mr. BURKE of South Dakota. Not only a good Democrat but a good Missouri Democrat.

The Clerk read as follows:

For the investigation as to the causes of mine explosions, methods of mining, especially in relation to the safety of miners, the appliances best adapted to prevent accidents, the possible improvement of conditions under which mining operations are carried on, the use of explosives and electricity, the prevention of accidents, and other inquiries and technologic investigations pertinent to the mining industry, $347,000.

Mr. WILLIS. Mr. Chairman, I move to strike out the last word. I have just received a telegram and I have not had time to verify the statements contained in it. It is signed by the president and the secretary of the Ohio miners. It is as follows:

COLUMBUS, OHIO, *February 19, 1913.*

Hon. FRANK B. WILLIS,
House of Representatives, Washington, D. C.:

We have just learned the committee has reduced the appropriation asked by Bureau of Mines to $100,000. We believe this is inadequate for the purpose of placing our mines in a safe condition. The mining industry being one of the most important in America, we believe that Congress should appropriate sufficient funds so that the Bureau of Mines can consummate the work nobly commenced by them in devising ways and means of protection for the miners of the United States. Trust that you will give your support in behalf of the appropriation asked by the Bureau of Mines.

JNO. MOORE,
President Ohio Miners.
G. W. SAVAGE,
Secretary-Treasurer Ohio Miners.

Now, I have had no chance to verify that statement, but I desire to know of the gentleman in charge of the bill what the fact is.

Mr. PAGE. Which item is the gentleman referring to?

Mr. WILLIS. The item is at the bottom of page 111, for the investigation as to the cause of mine explosions, the methods of mining, especially in relation to the safety of miners, and so forth.

Mr. MONDELL. I will say that the amount carried in the bill is the amount of the estimate.

Mr. PAGE. The amount carried in the bill is the estimate.

Mr. MONDELL. I think the item which the gentleman's telegram refers to is the next item.

Mr. PAGE. The item to which the gentleman from Ohio calls attention is an increase of $27,500 over the current appropriation and is the amount of the estimate.

Mr. WILLIS. What information has the gentleman about the next item?

Mr. PAGE. That is just the same.

Mr. WILLIS. Then is the telegram based on misinformation?

Mr. PAGE. It has been increased, and the estimate is allowed.

Mr. WILLIS. That increase is satisfactory.

Mr. WILSON of Pennsylvania. If the gentleman will pardon me, I think the telegram of the gentleman from Ohio has reference to the item in the paragraph beginning on line 10, page 112, where the amount appropriated is $100,000, and the estimate was $250,000. That is for the investigation into the mining and treatment of ores and other mineral substances with special reference to safety and waste.

Mr. WILLIS. The gentleman says the estimate was $250,000 on that item.

Mr. PAGE. That is an item in regard to other mining than coal—metalliferous mining. We can take that up when we reach it. Mr. Chairman, I desire to ask unanimous consent to return to page 110, line 14, for the purpose of offering an amendment.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to return to page 110, line 14, for the purpose of offering an amendment.

Mr. MANN. Let us hear the amendment reported.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 110, line 14, after the sum of "$90,000," insert the following: "to be immediately available."

The CHAIRMAN. Is there objection to returning to page 110, line 14?

There was no objection.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. COVINGTON having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 28499. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 26812. An act to provide for selection by the State of Idaho of phosphate and oil lands; and

H. R. 2839. An act for the relief of William Hommelsberg.

The message also announced that the President of the Senate pro tempore appointed Mr. CLARKE of Arkansas and Mr. BURNHAM members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the Department of Commerce and Labor.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

For inquiries and investigations into the mining and treatment of ores and other mineral substances, with special reference to safety and waste, $100,000: *Provided*, That no part thereof may be used for investigation in behalf of any private party, nor shall any part thereof be used for work authorized or required by law to be done by any other branch of the public service.

Mr. WILSON of Pennsylvania. Mr. Chairman, I move to strike out "$100,000," in line 12, page 112, and insert "$250,000."

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 112, line 12, strike out the figures "$100,000" and insert in lieu thereof the figures "$250,000."

Mr. WILSON of Pennsylvania. Mr. Chairman, that is the item dealing with the investigations relative to the safety in metalliferous mines. The bureau has been exceptionally successful in its work in dealing with coal mines. From the time that we first began appropriating for the investigation into the cause of mine disasters growing in a large measure out of the work done by the Federal Government, there has been a gradual reduction in fatal accidents in coal mines. In 1907 the fatal accidents in coal mines were 3,197. In 1912 they were 2,375, a very material decrease, notwithstanding the fact that our production of coal had increased. In 1907 there was one life lost for every 144,000 tons of coal mined. In 1912 there was one life lost for every 232,000 tons of coal mined. A great deal yet remains to be done along that line of work, but very little has been done with regard to carrying on investigations for the purpose of promoting safety in metalliferous mines, and this increase in the appropriation is essential in order that that work may be carried on.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. WILSON of Pennsylvania. Certainly.

Mr. MANN. Does the gentleman think that a comparison of two years of that sort is of any value? Suppose next year there should be a large loss of life, would the gentleman be in favor of abolishing the Bureau of Mines?

Mr. WILSON of Pennsylvania. Mr. Chairman, I have in my hand a comparison for each of the years from 1907 down to and including 1912, and it shows a continuous decrease during that period of time.

Mr. MANN. When was the Bureau of Mines organized?

Mr. WILSON of Pennsylvania. The Bureau of Mines was not organized until 1909, but we made an appropriation of $150,000 which was for the purpose of investigating the causes of mine disasters in 1907.

Mr. MANN. And I suppose the decrease is due to the fact that we made that appropriation?

Mr. WILSON of Pennsylvania. The decrease is due in a great measure to the spirit of cooperation that has been engendered by the officials of the bureau between the coal-mine owners and the coal miners themselves, and the information that the bureau has been able to bring out, necessary for a knowledge of what is responsible for the various accidents, and the application of that information by mine owners and the mine workers themselves.

Mr. POWERS. Mr. Chairman, will the gentleman yield?

Mr. WILSON of Pennsylvania. Certainly.

Mr. POWERS. Is it not true that the Federal Government sends mining rescue cars all over the country, visiting the various coal mines, to teach the miners how to prevent mine accidents?

Mr. WILSON of Pennsylvania. It has sent a number of mine rescue cars to various parts of the country. There are nine, I believe, altogether in the bureau. It has sent them to different points throughout the country and has given information to miners that has been discovered by the bureau or that was available otherwise relative to safety in mines.

Mr. POWERS. There is one in my district now.

Mr. WILSON of Pennsylvania. But there have been other means by which the bureau has been able to convey to the mine owner and the mine worker information relative to the best methods of promoting safety.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. WILSON of Pennsylvania. Mr. Chairman, I ask unanimous consent that I may be permitted to continue for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WILSON of Pennsylvania. Mr. Chairman, they have made a number of experiments relative to the causes of explosions. For instance, they have demonstrated conclusively that there are two or three ways in which the chances of explosions from coal dust may be materially reduced, such as the injection of a steam jet into the intake airway, thereby carrying moisture to lay the dust, making it so that it does not rise or ignite when an explosion takes place, thus reducing the chances of accidents. They have discovered that the sprinkling of a very small amount of fine dust, crushed from the shale underlying or overlying the coal, sprinkled in the airways, working places, and traveling ways, reduces the inflammability of coal to such a point that explosions from coal dust can not occur. That information is being conveyed to the mine owners and workers and to some extent being put into practical operation; all this beside the spirit of cooperation that has been engendered. Having done this magnificent work with regard to coal-mining operations, and still going on with that line of work, there ought to be a sufficient amount appropriated to enable the bureau to go on with a similar line of work in metalliferous mines.

The death rate in metalliferous mining at present is greater from accidental causes than in coal mining. That change has come about because of the reduction in death rate by accidents in coal mining. In copper mining the death rate by accident is 5.33 per thousand. In iron mining it is 4.29 per thousand. In gold, silver, lead, and zinc mining it is 3.84 per thousand, and for coal mining it has finally been reduced to the point of 3.17 per thousand. In addition to that the health conditions in metalliferous mining ought to be taken into consideration. One of the most prominent insurance companies made an investigation recently in the State of Montana preparatory to taking risks there, and they discovered that in copper mining the number of deaths among miners by accident was 17.6 per hundred; from tuberculosis and pneumonia, both trade diseases, 43.45 per hundred; and from all other causes, 39.49 per hundred; showing the necessity of investigating the conditions, not merely for the purpose of promoting safety in our metalliferous mines, but for the purpose of promoting the health of those who are engaged in mining; and I trust, Mr. Chairman, that this amendment will prevail.

Mr. FITZGERALD. Mr. Chairman, I move that all debate on this paragraph and amendments thereto be closed in 30 minutes.

Mr. MILLER. That is satisfactory to me, if I can have 10 minutes. It is a very important item.

Mr. FOSTER. I think the time ought to be limited to five minutes to a Member.

Mr. MILLER. This is a very important item, and one upon which I think it is not improper to spend a few minutes.

Mr. FOSTER. I have given some attention to it, and I would be willing to cut it down——

Mr. MILLER. I certainly have not encroached upon the time of the House.

Mr. FITZGERALD. Mr. Chairman, I move that all debate upon the paragraph and amendments thereto be closed in 30 minutes.

The CHAIRMAN. The gentleman from New York moves that all debate upon the paragraph and amendments thereto be closed in 30 minutes.

The question was taken, and the motion was agreed to.

Mr. MILLER. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. MILLER. For the purpose of speaking on the paragraph.

The CHAIRMAN. The Chair recognized the gentleman from California [Mr. RAKER]. The Chair will later recognize the gentleman.

Mr. RAKER. Mr. Chairman, the full estimated appropriation, $250,000, is needed for safety and waste investigations in metal and mineral mining. The amount carried in the bill is $100,000, which is an increase of $50,000 over the appropriation of last year. The full estimate of $250,000 is needed for the work of this bureau. The work which has been done and is being done by the Bureau of Mines under the current appropriation of $50,000 has been divided into general investigations concerning safety and waste; the generation of noxious productions in smelting operations; miscellaneous mining investigations, with special reference to waste or loss and health conditions; treating methods in mining, with special reference to safety, including especially tunnels opened by the United States Reclamation Service; safety and waste investigations in mining and treatment of lead and zinc. Dr. Holmes, Director of the Bureau of Mines, stated before the Committee on Appropriations that no investigation had been made relative to the waste of gas in connection with the burning of oil and the manufacture of coke, but that there was a large and enormous waste there, and in speaking upon that subject in connection with the mineral-mining industry he made the following statement (hearings for 1904, p. 710):

> On that general work I would like to say that, as a result of the investigations we have conducted during the present year, we have tried to get a clear idea of what work of a similar kind was actually needed, following along the general lines of policy which I outlined in the beginning and which seemed proper for a governmental agency to undertake, and we found that throughout the metal-mining regions the ventilation of the mines and the condition of air in the mines are far worse than those in the coal mines, so far as the health conditions are concerned. In fact, improvement along that line is one of the greatest needs of our metal-mining industry. The majority of these mines have no means of ventilation at all. There are turned loose into the sluggish air in those mines all of the noxious gases that arise from explosives and other sources. Furthermore, in connection with the kinds of explosives used in metal mining, there is great need for investigation because of the fact that it has a direct bearing upon the health conditions in the mines.

Also, on pages 225 and 226, as follows:

> Mr. HOLMES. I would like, Mr. Chairman, if I may, to make a brief general statement in regard to these increases in appropriations for the Bureau of Mines. It may seem that the bureau is asking for pretty large increases, especially this increase from $50,000 to $250,000 for investigations in connection with the safety and waste problems in the mineral industries other than coal. During the past three years, ever since the bureau was established, I have been urged from several different sources to recommend much larger appropriations even than $250,000 for this work; and I have declined to submit any recommendation for a larger appropriation until that field had been gone into pretty thoroughly and I felt we knew just what ought to be done, how it could be done, and whether or not the results which were anticipated could be accomplished. The information gathered during the past two or three years and the experience obtained during the expenditure of the small appropriation during the current year has led me to realize the need of extending to other branches of the mining industry inquiries and investigations similar to those now under way in relation to coal mining, especially researches with reference to safety and waste problems. I believe it is eminently practicable and proper for the Federal Government now to undertake such work in relation to metal mining and the miscellaneous mineral industries. These examinations already made lead me to believe that the appropriation now asked for work of this kind is not only urgently needed and can be expended effectively for accomplishing the purposes for which Congress created the Bureau of Mines, but that it is all needed for that work, and any serious reduction in the amount of the appropriation will mean not only a decrease in the amount we can accomplish, but a reduction in the effectiveness of the entire work.
>
> If it were simply an investigation of resources I should not feel so urgent about it, as such an investigation might wait; but the problems which it is proposed to investigate relate to a large loss of life, preventable maladies among miners from avoidable conditions, and an extensive and preventable waste of resources of national importance—a loss of life and waste of resources which is already in progress to an extent and on a scale which makes it a national discredit.
>
> The CHAIRMAN. The most important work that was considered in connection with the Bureau of Mines was the prevention of accidents and preservation of life.
>
> Mr. HOLMES. Yes.
>
> The CHAIRMAN. In coal mining particularly, was it not?
>
> Mr. HOLMES. For 10 years before the Bureau of Mines was established an agitation for it had been under way all through the West, and bill after bill during each session of Congress was introduced looking to the establishment of a department or a bureau of mines, with a

view to helping to improve the general mining conditions in the western mining regions. These western people were not thinking of coal mining as mining at all. With them metal mining is the industry; but when the Bureau of Mines was established in 1910 the establishment was accomplished through the cooperation of the coal interests, and most of the speeches and debates pending the passage of the bill dwelt upon the big coal-mine disasters.

Mr. PAGE. They were the most striking at that time?

Mr. HOLMES. They were just at that time, yes; but the death rate is now larger and the health conditions are now worse in the metal mines. The situation which I have described in connection with the metal-mining industries is a serious one. Now that we have in hand the necessary preliminary information, and we know what ought to be and what can be accomplished, it would seem that if the General Government is ever to do anything toward the improvement of conditions in the metal-mining industries the work should be inaugurated now on a scale somewhat commensurate with its urgency and importance.

The current appropriation for the mine-accident work under the Bureau of Mines—$320,000—is not only necessary, but is even inadequate for the proper investigation of the different safety problems relating to coal mining alone. Even under this appropriation there are no funds available for the proper investigation into some of the larger causes of coal-mine fatalities, such as falls of roof, accident from equipment, and so forth; and the appropriation is sufficient to operate the 7 existing mine-rescue cars for only 7 months out of the 12.

The $27,000 added by the House committee will be scarcely more than sufficient for operating the mine-rescue cars during the additional three or four months of the year and for the necessary extension of the coal-dust explosion experiments in the experimental mine. There will still be need for additional funds in order to carry on proper investigations into the other large causes of the loss of life in coal mines, such as falls of roof and the handling of mine equipment. (See hearings, 1914, pp. 704, 705, and 707, upper half.)

No part of this appropriation, therefore, can be utilized for investigations in the metal or miscellaneous mineral mining operations, for the reason that all of it, and more, is needed for further work relative to coal-mining conditions and safety.

We ask you to give your support in this effort to secure this increase of the amount of the appropriation provided from $100,000, as approved by the Appropriations Committee, to $250,000, as recommended by the Secretary of the Interior and approved by the President, for investigations looking to safety in the metalliferous mines of the country and the possible improvement of conditions under which mining operations are carried on.

Already experience has demonstrated that coal-mine accidents can be reduced by an investigation and educational work.

The Federal effort looking to safety in coal-mining operations, begun in 1907, has been contemporaneous with a most marvelous and gratifying change, as evidenced by the following figures:

Year.	Men killed per million tons of coal produced in the United States.	Tons of coal produced in the United States per man killed in mining.
1907	6.93	144,000
1908	6.05	165,000
1909	5.79	173,000
1910	5.66	177,000
1911	5.48	183,000
1912	4.29	233,000

The investigations carried on under the small appropriation made for this work last year demonstrated that the loss of life in precious-metal mining operations is greater per thousand men employed than in the coal mines, and the above results justify us in again asking an appropriation for this work sufficient to cover an intelligent effort looking to the safety of the men engaged in underground work.

Safety and efficiency must go hand in hand in our economic development, and the purpose of the appropriation asked for is that the various questions involved in the economy of mineral production and in the safety of the miners shall thus find solution. The problems involved are more varied, more intricate, and require higher scientific knowledge for their solution than the problems presented by the agricultural industry, the cooperation with which, so generously given by the Federal Government, has been productive of such highly beneficial results.

In relation to this matter Dr. Holmes stated before the Committee on Appropriations:

In 1907, the year before we inaugurated this work, the quantity of coal mined for each death was 144,000 tons. During 1912 the amount of coal mined for each death was 234,000 tons.

The memorandum submitted by Dr. Holmes follows:

Production, number of men employed, and number of men killed in and around the coal mines of the United States in the calendar years 1907 to 1912, inclusive.

Calendar year.	Production.	Number employed.	Number killed. Total.	Per 1,000 employed.	Per 1,000,000 short tons of coal mined.	Production per death.
	Short tons.					*Short tons.*
1907	461,406,000	655,418	3,197	4.88	6.93	144,000
1908	404,933,000	672,794	2,449	3.64	6.05	165,000
1909	460,761,000	666,523	2,668	4.00	5.79	173,000
1910	501,596,000	725,030	2,840	3.92	5.66	177,000
1911	496,221,000	728,348	2,719	3.73	5.48	183,000
1912[1]	550,000,000	750,000	2,350	3.13	4.27	234,000
Total			16,223			

[1] Subject to slight revision.

During the six years included in the above tabular record 16,223 able-bodied men engaged in productive industry lost their lives in coal-mine operations in the United States. The figures indicate also that if the death rate of 1907 had continued through the five years following, this loss of life would have been at least 3,000 more than the figures just mentioned. They also indicate that notwithstanding a large increase in coal production during 1912 over 1911 the death list in the coal mines for 1912 was nearly 400 less than that for 1911.

The decrease in fatalities indicated in this table has been more largely in connection with the decrease in mine explosions, to which subject the investigations of the Bureau of Mines have been mainly devoted since 1908. This fact is brought out in the following statement:

As indicating the need for investigations concerning falls of roof and mine equipment, attention may be called to the following tabular statement, which shows that while during the past three years there has been, in fatal coal-mine accidents from mine explosions (concerning which special investigations have been conducted), a decided reduction both in actual numbers killed and in the percentage of the total yearly loss of life, there has been less reduction in actual numbers, and even an increase in the percentage of fatalities from the two other large causes of fatal coal-mine accidents, i. e., falls of roof and mine equipment:

Percentages of the total loss of life in coal mines from the three chief causes during the past 3 years.

	Percentage of total deaths from falls of roof, etc.	Percentage of total deaths from mine equipment.	Percentage of total deaths from explosions.
1910	46.1	17.2	18.2
1911	48.6	17.3	14.0
1912	48.9	19.0	12.5

While the reduction in accidents and the improvements of health conditions are matters of prime importance, the question of reducing the waste in the mining and utilization of metal and general mineral resources of national importance is worthy of special investigation and consideration by the Government. Again quoting from the statement of Dr. Holmes before the Committee on Appropriations, he makes the following lucid statement upon this matter:

I want to say something more with reference to this general mine-safety problem, and that is in connection with ventilation. We know that the explosives being used in some of the metal mines emit poisonous gases that enter the mine air which the men have to breathe. In addition to that we know that in a large number of these mines, where the drills give off a very fine dust, tuberculosis is the prevailing disease among the miners, and we find that that disease is directly attributable to the fine silicious dust which is given off from these rock drills. That is one of the problems that we have not been able to take up, except in a general way, to find out what the situation is. Of course, we can not stop the drilling, because they must drill wherever they mine; but the thing to do is to find some way to prevent the dust, and I believe that is entirely practicable.

The need of investigations looking to greater safety and the improvement of mine conditions in metal and general mineral mining operations is now greater than in coal mining. These facts are clearly brought out from what has been shown from the statements made by Dr. Holmes before the committee. It is a subject of vast importance to the country and one that should be given liberal support by the Government. The situation is one that needs full consideration and investigation by the Bureau of Mines and will bring good results. I trust that the committee will see its way clear to adopt this amendment. I want to call the committee's attention to the fact that in metal mining in the West, many of the men who work there for a short time are subject to these occupational diseases caused by dust from the drills, bad conditions underground, and want

of proper ventilation. Many lives could be saved by proper investigation and methods devised, whereby these present deadly results would be prevented, and new methods can be found to relieve the present deplorable situation.

Quoting again from the hearing, Dr. Holmes states:

I am outlining the work of the Bureau of Mines from this standpoint—i. e., from the standpoint of safety and waste, the general-welfare side of the question.

As to the general mining conditions, there is certainly throughout the metal mining region to-day as great, if not a greater, need of reform than there is in the coal-mining region. We have not, for lack of funds, been able to collect complete statistical data, but we have tried to ascertain the leading causes of fatal accidents in the metal-mining industry; and our investigations show that the death rate per 1,000 men employed is considerably greater in the metal-mining industry than in the coal-mining industry.

More than 4 men out of every 1,000 men employed are killed annually; and last year, as nearly as we can get the records together, there were not less than 27,000 men injured or killed (most of them being injured) in the metal mines alone. In addition to that, so far as I can find out, the number of men whose health was injured in connection with mine operations from breathing poisonous gases or dust, or both, and from other causes has been much larger in the case of metal mines than in coal mines. In the expenditure of the $50,000, while conducting a number of important investigations, we have also endeavored to find out the conditions under which miners labor in the metal mines of the country, and we find the serious need of reforms as indicated. In addition, we have been trying to get together the material for a revision of the mining laws, rules, and regulations relating to mining conditions.

I have compared the record of the United States during the year 1911 in the matter of metal-mine fatalities with that of other countries, with a result which shows that for each 10,000 men employed in metal mines the total deaths were as follows: Great Britain, 16 deaths out of each 10,000 employed; Germany, 14 deaths out of each 10,000 employed; United States, 41 deaths out of each 10,000 employed.

Mr. MONDELL. Will the gentleman yield?

Mr. RAKER. Certainly; I yield to the distinguished gentleman from Wyoming.

Mr. MONDELL. What is the State of California doing to remedy that condition or to prevent its continuance?

Mr. RAKER. She is doing what is done in other States, and more. The State of California is doing all in her power to relieve the condition of the miners in that State.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent that I may revise and extend my remarks in the RECORD on this subject.

The CHAIRMAN. The gentleman from California asks unanimous consent that he may extend and revise his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. MILLER. Mr. Chairman, the gentlemen who have so far spoken upon this amendment have confined their remarks to the conditions of safety in the mining industry. If there were no other considerations that might be brought to mind in connection with this paragraph, those are sufficient and ample to justify an increase of the appropriation, but, Mr. Chairman, there is another branch of the work carried on by the Bureau of Mines under the provisions of this paragraph of equal importance, if anything can be of equal importance to safety in mining.

Gentlemen will observe that the provisions of this paragraph enable the Bureau of Mines to carry on investigations into the methods of mining and into the treatment of ores. We have lately received with much pleasure the last report of the Secretary of Agriculture, in which he shows to the American people that during the period of years he has occupied the position of Secretary of Agriculture the agricultural products of the United States have increased until they now reach in round numbers $9,000,000,000, a magnificent total. It has largely been the result of scientific agriculture, the adaptation of the crop to the soil and to the climate. If we should consider the possible duplications in this total, arising from counting separately such items as cattle and hay and corn and live stock, items that should really be merged in many instances, the grand total would be reduced to perhaps six or seven billions, still a magnificent total. Every dollar expended through the Agricultural Department has returned manyfold increase to the country. We are spending this year in that department some twenty-five millions—a large sum, but a splendid investment of every dollar. The expenditures through this department in the last 16 years have multiplied tenfold, because we have found the expenditure wise and exceedingly profitable.

That which I desire to call to the attention of the membership of the House at this time is the necessity in the mining world for that same scientific treatment of its problems and its features that has been so valuable in the agricultural world. In round numbers the mining industry of the United States last year produced $2,000,000,000 worth of wealth. This is net wealth, Mr. Chairman—absolutely net. The mining industry is to-day the basis of a large part of the art, the science, and the industry of the United States. The whole world leans upon the product of its mines.

The average mind perhaps believes that wherever gold is found it is wealth, wherever iron is found it is wealth, wherever copper is found it is wealth, but those conversant with mining and mining conditions know such is not true in the least. That gold, that iron, that copper is ever mixed with other minerals and other substances, and becomes wealth only when it can be separated and shipped so as to be merchantable. By new mining processes developed or devised, by new methods of treating ores the valueless mass to-day will become the great wealth of to-morrow. The science of metallurgy is the handmaiden of mining, just as the science of engineering is indispensable to it. The Bureau of Mines should have sufficient funds to bring to the mining world the aid of science in both the mining and the treatment of ores. Vast wealth can thus be produced, just as the application of the science of botany, of the science of chemistry, and the science of meteorology has so stimulated and advanced the cause of agriculture. It is the intensified application of brains to industry, and therein always lies the great profit.

I want to call the attention of the committee, if I have time, to two or three items of paramount importance in respect to which I think the Bureau of Mines could well afford, in the interests of the wealth and welfare of the country, to spend some of the additional $150,000 here asked for. And the first I shall mention is the newly discovered element called radium. This is a subject new to all except a few of the very eminent scientists of the world. It is the latest element to be discovered, and by some considered one of the most important of all. Certain it is that its properties are likely to change many of the theories of matter hitherto accepted, and perhaps furnish new methods of treating disease. The possibilities of this element now entertain the close study and attention of the most eminent scientists of Europe. There are found in this world just two places producing the ore from which radium is reduced. One place is in Colorado and the other is in Austria. No man in America knows how to reduce the ore and produce radium. No laboratory in this country has ever been devised to carry on the work. No man in America has yet undertaken it. The undertaking is too great for a private concern or individual. There were shipped from the State of Colorado last year 600 tons of pitchblende, or carnolite, which is the ore from which radium is made. Where was it shipped? It was shipped to Germany. The total production of radium in the world last year was 5 grams, and the 600 tons of ore shipped from Colorado were sufficient, in the minds of well-informed scientists, to produce the entire 5 grams. Thus America probably gave to Europe all the radium produced last year, and not a particle did we produce for ourselves, all because we knew not how to do it. We are to-day letting that wealth leave the United States to enrich other countries. It is not available to the American people. It is not available to the scientists of America. It is a contribution that is sent to the Old World, because, ignorant heathens that we are, we know not how to use the wealth nature has given us.

Now, possibly 5 grams will seem like a small quantum, but 1 ounce of radium is worth $2,500,000.

This is a very respectable sum in itself, and yet the greatest value of this mineral is not its intrinsic or commercial value, as its greatest value lies in the aid it gives to science and scientific investigation. The properties of radium are being utilized in the treatment of disease and in the processes of scientific experimentation. It is one of the forces of nature man is learning to use, vastly to his advantage, and yet its use and its worth and its value are not for Americans, though the mineral itself comes from America.

The application of metallurgy to the treatment of ores is not new, the science is of some antiquity, and yet it is now in a rapidly developing stage. Metallurgy teaches how to treat ores so as to make them useful to and usable by man. If the process is reasonably cheap, wealth is produced. By discovering new metallurgical processes, ascertaining new methods of treating and reducing ores many ores hitherto valueless become exceedingly valuable. Thus many ores are mixed with sulphides and many ores, like copper, are found as sulphides. Admixed with these sulphides also may be the precious metals of gold and silver. Vast areas of such ores are now known which are valueless until some metallurgical process is discovered for treating them.

We are told, Mr. Chairman, that we are living in an iron age. Doubtless we are. Iron is king. Without iron the conveniences

of life would fail and present industrial processes would disappear. Iron ore is found quite generally distributed over the world, and yet but a very small part of the known deposits of ore are to-day merchantable and therefore of value. Metallurgy discovered how to free iron ore of two of its deleterious ingredients, sulphur and phosphorus, when these elements exist in quantities not too great. The greatest iron mines of the world are along the north shore of Lake Superior in the State of Minnesota. Of the known deposits there found only a relatively small part is actually of value. If a process can be found for separating titanium from iron ore there will come to the use and increase the wealth of man areas of iron in Minnesota ten times greater than any now under operation. The resulting wealth would run into the billions. What is true here is also true elsewhere. This is work for the Bureau of Mines. During the past year I understand this bureau has conducted experiments to discover a method to reduce titaniferous ores. Progress has been made. The work should be continued with more ample resources, that they make a more complete effort. Every dollar invested in this work will return a hundred and a thousand fold. We have beheld the marvelous results attending the application of science to agriculture. So excellent have been those results and so favorable has that work impressed Congress that during a recent and relatively brief period Congress increased the appropriation for the Department of Agriculture from two and a half million to twenty-five million dollars. The Bureau of Mines, destined to aid mining as the Department of Agriculture has aided agriculture, has been in existence some three years, and the appropriation here is not three-quarters of a million.

If we respond to the call of humanity and extend every aid to the protection and preservation of human life and limb in this great industry, if we respond to the call of sound business and invest to produce large returns of material wealth, we will grant the increase asked for.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER. I ask, Mr. Chairman, that I may have five minutes more.

Mr. FOSTER. I object, Mr. Chairman.

Mr. MILLER. I hope the gentleman will not object.

Mr. FOSTER. Let me say to the gentleman from Minnesota that my time is all gone. I can not get a minute myself.

Mr. MILLER. There are 20 minutes left. I will say to the gentleman, if it is desired to hasten with the bill, that result may be obtained——

Mr. FOSTER. Make your point of order. I object.

The CHAIRMAN. The gentleman from Colorado [Mr. TAYLOR] is recognized.

[Mr. TAYLOR of Colorado addressed the committee. See Appendix.]

Mr. AUSTIN. Mr. Chairman, I think this amendment ought to receive the approval of the House. It is in line with the recommendation and estimate submitted to the Committee on Appropriations by Prof. Holmes, the chief of this new bureau. He is a very able and conscientious public servant, and I am sure, knowing him as well as I do, that he is not given to extravagance, and in submitting this estimate and urging this additional appropriation he has no motive except the promotion of the public interest and the public walfare.

Congress was certainly derelict in not establishing a Bureau of Mines many, many years ago. When we consider the vast amount of money invested in mining operations and the great army of industrial workers who are engaged in this dangerous and hazardous work, and the great and incalculable benefit that they render to the country, we certainly have not yet gone as far as we should in making appropriations that this worthy cause deserves.

The amount of money that Congress has already appropriated for the maintenance of this bureau has been used largely in connection with the coal-mining operations of the country, and if that industry deserved—and it did deserve—favorable action of Congress, no good or valid reason can be submitted here why the same treatment should not be extended to the other lines of the mining industry in which millions of capital are invested and countless thousands of men are employed, whose lives and health are daily involved in mining operations.

The American Congress has never received, I venture the assertion, a greater return for the money actually voted by Congress than that received for the equipment and work prosecuted by the Bureau of Mines under the direction of Prof. Holmes. I trust that we at this time shall recognize the needs of this service and the justice and fairness of this demand of an efficient bureau chief, so as to give him the means with which to make this bureau what we certainly intended it should be, and what it certainly deserves to be.

I shall vote for this amendment, and I hope my colleagues on this side will do the same.

Mr. RUCKER of Colorado. Mr. Chairman, there is no objection whatever to an appropriation when it is applied to discovering new methods of protecting life and health in the coal mines. This amendment and this appropriation is asked for an entirely new purpose. We have scarcely had time since the first appropriation was made to know what it has availed us. Yet we know that fatalities in mining of metal ores are much greater than in any other and ought to receive commensurate recognition.

We have not been in the harness long enough to determine what such an appropriation would accomplish, but if you will take what has been done under the appropriation for the benefit of the coal miners, you will discover that the death rate has decreased about one-half in the last five years, since the bureau first went into the business, and that the efficiency of the laborers engaged in coal mining has increased in the matter of tonnage about one-half during the same period.

Every one knows that in metalliferous mining the men employed go down into the bowels of the earth some times thousands of feet. Necessarily they are subjected to more inconveniences and more dangers than the coal miners are subjected to, barring the mere question of explosions from coal dust in coal mining.

I ask to include as a part of my remarks a letter received this morning from the secretary of the Bureau of Mines pertaining to this subject.

The letter is as follows:

AMERICAN MINING CONGRESS,
Washington, D. C., February 19, 1913.

Hon. A. W. RUCKER,
Washington, D. C.

DEAR SIR: May we ask your support in an effort to secure an increase of the amount of the appropriation provided in the sundry civil appropriation bill from $100,000, as approved by the Appropriations Committee, to $250,000, as recommended by the Secretary of the Interior and approved by the President, for investigations looking to safety in the metalliferous mines of the country and the possible improvement of conditions under which mining operations are carried on?

The Federal effort looking to safety in coal-mining operations, begun in 1907, has been contemporaneous with a most marvelous and gratifying change, as evidenced by the following figures:

Year.	Men killed per million tons of coal produced in the United States.	Tons of coal produced in the United States per man killed in mining.
1907	6.93	144,000
1908	6.05	165,000
1909	5.79	173,000
1910	5.66	177,000
1911	5.48	183,000
1912	4.29	233,000

The investigations carried on under the small appropriation made for this work last year demonstrated that the loss of life in precious-metal mining operations is greater per thousand men employed than in the coal mines, and the above results justify us in again asking your further cooperation in the effort to secure an appropriation for this work sufficient to cover an intelligent effort looking to the safety of the men engaged in underground work.

Safety and efficiency must go hand in hand in our economic development, and the purpose of the appropriation asked for is that the various questions involved in the economy of mineral production and in the safety of the miners shall thus find solution. The problems involved are more varied, more intricate, and require higher scientific knowledge for their solution than the problems presented by the agricultural industry, the cooperation with which, so generously given by the Federal Government, has been productive of such highly beneficial results.

We earnestly urge you to give support to the movement looking to an increase, by amendment on the floor of the House, of this appropriation to the $250,000 required by the Bureau of Mines for properly carrying on this work.

Very respectfully, yours,

THE AMERICAN MINING CONGRESS.
J. F. CALLBREATH, *Secretary.*

Mr. PRAY. Mr. Chairman, I desire to speak briefly in support of this amendment. It seems to me that it is very important that we should at this time increase the appropriaion in accordance with the esimates submitted by the Secretary of the Interior, for the reason that heretofore most of our efforts in the Bureau of Mines have been directed toward the improvement of conditions in the coal-mining sections of the country.

The total number of men engaged in the mining industry in the United States is about 2,000,000, of whom 750,000 are engaged in coal mining and 1,000,00 in metalliferous mining. The statistics at the present time show that there are nearly as many lives lost in the metal-mining regions of the country and in metalliferous mining as in coal mining; but until last year

no appropriations were made looking to the benefit of the metalliferous miners or the improvement of conditions as to safety in that class of work. Therefore I say that I sincerely believe it behooves us at this time to increase this appropriation so that it will be in accordance with the estimates prepared by the Secretary of the Interior.

The work of the Government looking to the improvement of coal-mining conditions was inaugurated in a small way in 1908–9, and has been continued to the present time.

Nothing was done by the Government in behalf of the improvement of conditions in metal mining and mineral industries other than coal until for the current year (1913) an appropriation of $50,000 was made. The bill as it passed the House last year carried no appropriation for this work. The Senate inserted $100,000. The House committee forced the acceptance of a compromise on $50,000. Even the amount recommended for this year by the department and by the President—$250,000—is small as compared to the real needs of the situation. It ought to be granted by the House in full.

The great majority of the mines in the United States are small mines, working 10 men or less each. In these small mines the hazards are even greater than in the larger ones. In the larger mines, however, there are many new risks, and the conditions are more complicated and difficult to handle.

In regard to the urgent need of extending investigations to the metal-mining industries of the Western States, the director makes the following statement in his second annual report, for the fiscal year ended June 30, 1912:

> Inasmuch as the appropriations for the Bureau of Mines during the past year were not sufficient to permit any extension of the work beyond the investigations relating to the mining and utilization of coal it was not possible to extend these investigations to the metal-mining industries. Meanwhile, however, the ratio of accidents to the number of men employed has been larger in many metal mines of the country than it has been in many of the coal mines, and the average is nearly the same in the two. There is therefore serious need for the extension of the mine-accident work into the metal-mining field.
>
> Moreover, the loss of life in connection with metallurgical operations in different parts of the country deserves special consideration. The serious need of inquiries and investigations looking to the improvement of conditions at metallurgical plants has become more and more apparent as preliminary inquiries have been made.

The Bureau of Mines was established May 16, 1910. This was the first substantial recognition the second greatest industry in the United States had ever received from the Federal Government. It seems almost incredible that this basic industry, with an annual output of over $2,000,000,000, with 40 States interested in mining operations, should have waited so long before receiving aid from the Government, and especially so when we take into account the further fact that, from 1889 to 1909, 30,000 miners lost their lives as a result of their hazardous employment.

The Agricultural Department had been established for many years, also the Department of Commerce and Labor, the Bureau of Corporations, and many other bureaus of the Government, but the prospect of establishing a Bureau of Mines did not become promising until the hearings of the Committee on Mines and Mining in the Sixtieth Congress, instituted shortly after the four coal-mine explosions in December, 1907, in which 700 lives were sacrificed. This series of disasters, with appalling loss of life, aroused the people of the country to a realization of the frightful consequences that had followed in the wake of coal-mining operations in the several States for many years and which, in number of fatalities, was greatly in excess of those incident to mining in other countries where the conditions were not so favorable as in the United States.

It has been evident for some time to members of the Committee on Mines and Mining that the Bureau of Mines is greatly in need of further assistance from Congress. Lack of funds has resulted in a curtailment of important investigations. The metal-mining industries have received practically no consideration.

Mine-rescue and first-aid work is of great importance and should be carried forward in all departments of mining because the efficient maintenance of this branch of the service is more desirable and necessary than any other, but there should be no lack of activity in other branches. The income of the bureau should be increased so that the demands for all classes of work may be properly met. Had it not been for the lateness of the season when the greater activities were begun the mine rescue cars and stations could not have been maintained properly during the first year of their establishment. Instead of an appropriation of $100,000 I am convinced from reports and estimates submitted that for work relating to safety in the metal-mining industries the amount ought to be increased to $250,000. The saving of human life and prevention of accidents in mining operations is, in my judgment, so important and necessary that there can be no question as to the wisdom of appropriating this amount to be economically expended under the able administration of Dr. Holmes. No man in the Government service is more deserving of our unstinted praise for devotion to duty than the present able director of this great bureau. There are to-day in operation under the bureau seven mine rescue cars and six mine rescue and experiment stations. In order that the field of mining operations could be more effectively carried on there should be at least two more mine rescue cars in operation. The director has made it evident to us that the cars and stations have been operated on an economical basis. His reports will, I believe, show that the work has been conducted with the strictest economy consistent with the high degree of efficiency demanded by the public.

The records show that 750,000 men are employed in and about the coal mines of the country and more than 1,000,000 in other mineral industries. This is an important fact in connection with the proposed amendment. The greater part of the work of the bureau in the past has related chiefly to coal mining, but there is no question that the time has come when the metalliferous mines should be given attention, and if this amendment is adopted, as it should be, they will receive great benefit from the educational and experimental work carried on by the bureau. When the bureau was first proposed in the Sixtieth Congress, objections were heard in some quarters on the ground that the creation of such a bureau would mean Federal control of mining operations. But no complaints of that kind are to be heard to-day. It did not take very long to convince even the most skeptical that the work of the bureau would be largely educational in character, like the Agricultural Department.

The expectation often expressed by those familiar with the purposes of the bureau is that mine-rescue and first-aid work will result in the training and equipment of bodies of miners in all sections of the country ready for any emergency. It is conceded by all who have followed the progress of events in this respect that the information imparted by the experts in the bureau is of inestimable benefit to miners and operators alike, not only in rescue work, but in the matter of prevention of accidents and improvement of mining conditions generally.

Mining companies and operators throughout the country have signified a desire to cooperate with the bureau in an effort to provide every possible safeguard for the protection of their men. I know of instances in my own State where operators have purchased the latest equipment and devices known, and have welcomed the experts from the bureau to their mines and have afforded them every facility to carry on their educational and demonstrational work. A spirit of good will and hearty cooperation has been manifested in all departments of mining. The miners and operators have confidence in the men connected with this branch of the Government service. Several times since the creation of this bureau and the inauguration of mine-rescue work have the miners of the country been furnished with evidence in great mine disasters of the skill and heroism of the crews that have been sent out in charge of the rescue cars and from the rescue stations. Some of these men have been killed in an effort to rescue entombed miners and others have been crippled for life. At the beginning of this session we passed a bill, which, I am glad to say, has since become a law, providing compensation for injured employees engaged in these hazardous undertakings. The compensation is, of course, wholly inadequate; no such relief is ever adequate; but it is, at any rate, a slight recognition of their services and will provide some relief, and to that extent it is a step in the right direction.

The amendment now under consideration ought to be adopted by an overwhelming vote.

Mr. FITZGERALD. Mr. Chairman, I hope the amendment will not prevail. Investigation of metallurgical mining was authorized last year, and Congress appropriated $50,000 to enable the bureau to commence the work. In this bill the committee recommends $100,000, or an increase of 100 per cent.

It is a notorious fact that it is a waste of money to expand unusually the functions or work of any service of the Government unless time be given for it to expand properly.

This bureau has been treated more liberally by the Committee on Appropriations in this bill and in the current law than any other bureau in the public service. The increases have averaged each year about 20 per cent over the appropriations for the preceding year. It seems to me the committee has done all that could reasonably be expected.

Congress started the work of protecting those engaged in the coal-mining industry and furnished the rescue cars, the purpose, as stated by the Director of the Bureau of Mines, being to go from place to place and train the miners, to enable the

employers to obtain the equipment, and then have the service carried on by the States and private individuals.

The State of Illinois has taken up this work. It maintains its own equipment, its own cars, and its own mine-rescue stations, and it seems to me many of these gentlemen from other States should take the necessary steps in order that their States shall do this work and not place the burden on the Federal Government.

Some discretion must be exercised in recommending these appropriations. For 1911, exclusive of the cost of removing this bureau from under the Geological Survey and the rent of quarters, $475,000 was appropriated; for 1912, $475,000 was appropriated. For the current year, on the recommendation of the Committee on Appropriations, the sum was enlarged to $583,100, an increase of $107,600 over the appropriation for 1912; and in the present bill the amounts aggregate $662,000, or an increase of $78,900 over current law.

It seems to me that the bureau has been adequately provided for in the bill, and this increased amount can not be justified.

Mr. RUCKER of Colorado. The Secretary of the Interior approved of this appropriation, did he not?

Mr. FITZGERALD. An estimate was submitted for the amount asked for here, but the estimates at this session aggregate $25,000,000 in excess of the amount carried in the bill. If the committee were to accept the recommendations of all the departments as to the various sums estimated as being desirable or necessary for the service under their departments, it would be impossible to supply the money required. The committee has treated this bureau liberally. It has increased the money available for this work 100 per cent, and it seems to me that it is going rapidly enough into the prosecution of this work, which is important and must be developed and extended gradually. I hope the amendment will not prevail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken; and on a division (demanded by Mr. FITZGERALD) there were—ayes 42, noes 43.

Mr. AUSTIN. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed as tellers Mr. WILSON of Pennsylvania and Mr. FITZGERALD.

The committee again divided; and the tellers reported that there were—ayes 47, noes 55.

So the amendment was rejected.

Mr. MILLER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The Clerk read as follows:

Education in Alaska: To enable the Secretary of the Interior, in his discretion and under his direction, to provide for the education and support of the Eskimos, Aleuts, Indians, and other natives of Alaska; for erection, repair, and rental of school buildings; for textbooks and industrial apparatus; for pay and necessary traveling expenses of general agent, assistant agent, superintendents, teachers, physicians, and other employees, and all other necessary miscellaneous expenses which are not included under the above special heads, $200,000; so much of which sum as may be necessary for the purchase of supplies shall be immediately available: *Provided*, That no person employed hereunder as special agent or inspector, or to perform any special or unusual duty in connection herewith, shall receive as compensation exceeding $200 per month, in addition to actual traveling expenses and per diem not exceeding $4 in lieu of subsistence, when absent on duty from his designated and actual post of duty: *Provided*, That of the sum hereby appropriated not exceeding $7,000 may be expended for personal services in the District of Columbia.

Mr. HUMPHREY of Washington. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amend, by striking out after the word "employees," in line 3, page 114, to and including "$200,000," in line 5, page 114, and insert in lieu thereof the following: "And to provide for the medical and sanitary relief of the Eskimos, Aleuts, Indians, and other natives of Alaska; for erection, repair, rental, and equipment of hospital buildings; for books and surgical apparatus; for pay and necessary traveling expenses of physicians, nurses, and other employees, and all other miscellaneous expenses which are not included under the above special heads, $270,000."

Mr. HUMPHREY of Washington. Mr. Chairman, I offer this amendment at the request of the Bureau of Education. I was very glad to present it when the matter was called to my attention. I have no more interest in the people of Alaska than any other Member of this House should have, except that I am perhaps a little more familiar with the conditions that exist there. On my visits to Alaska I have seen what were populous villages a few years ago entirely wiped out, the inhabitants exterminated almost entirely by diseases that had been contracted from the whites. These diseases are tuberculosis, syphilis, and trachoma, principally. There are no well-equipped hospitals in Alaska, and the purpose of this amendment is to appropriate $70,000 for the establishment of hospitals. The physicians report that under the modern treatment by the use of what is known as "6 0 6" syphilis yields readily and the results have been very satisfactory; but this treatment can not be given without a hospital. They have no hospital facilities in Alaska suitable for this purpose.

From personal observation, as well as from reports from the physicians in Alaska, it is evident that the natives of that district will be exterminated within a few years, unless they receive medical relief. In this particular bill, within a few pages—I think on the next page from where this item occurs—we have appropriated some $15,000 to prevent the extermination and to protect the game of Alaska. I am in favor of that. We appropriate some $3,000 to feed the buffalo herd, and the country has been much exercised over the likely extermination of the buffalo. We have appropriated millions of dollars to protect the seal herd in Alaska from extermination, and it does seem to me that it is worth at least $70,000 to this Government to prevent the extermination of the natives of Alaska. I approve all of the appropriations to which I have referred, but it does seem to me that it is little short of a national disgrace that we refuse to appropriate a dollar to establish hospitals in that Territory, and I am appealing to the membership of this House to correct this situation, and I trust that the chairman of the committee will not oppose this amendment.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, will the gentleman from Washington yield for a question?

Mr. HUMPHREY of Washington. Yes.

Mr. HUMPHREYS of Mississippi. Where did the gentleman get his estimate of $70,000?

Mr. HUMPHREY of Washington. I get that estimate from the Bureau of Education.

Mr. HUMPHREYS of Mississippi. How much of that is intended for the erection of hospitals?

Mr. STERLING. Forty thousand dollars. I get that from the hearings. There are two hospitals at $20,000 each.

Mr. HUMPHREY of Washington. And the rest of it is to be expended in the training and education of nurses and such other matters as are incidental to caring for the afflicted. I trust that this committee will favor this amendment, and I again express the hope that the chairman of the committee will not oppose it. I am making the appeal entirely upon the ground of humanity.

The following letter is from the Commissioner of Education:

DEPARTMENT OF THE INTERIOR,
BUREAU OF EDUCATION,
Washington, February 19, 1913.

HON. WILLIAM E. HUMPHREY,
House of Representatives, Washington, D. C.

DEAR SIR: Knowing your interest in all matters relating to Alaska, and your conviction of the need of appropriation for the medical relief of the natives of Alaska, I venture to request your aid in offering the following as an amendment to the present sundry civil bill:

"To enable the Secretary of the Interior, in his discretion and under his direction, to provide for the medical and sanitary relief of the Eskimos, Aleuts, Indians, and other natives of Alaska; for erection, repair, rental, and equipment of hospital buildings; for books and surgical apparatus; for pay and necessary traveling expenses of physicians, nurses, and other employees, and all other necessary miscellaneous expenses which are not included under the above special heads, to be immediately available, $70,000."

This item was included in the Book of Estimates for the fiscal year 1914, but is not included in the sundry civil bill as reported by the House Committee on Appropriations.

A similar amendment to the sundry civil bill was adopted by the Senate last year, but was lost in conference committee.

Your assistance in this matter will be greatly appreciated by this bureau.

Very respectfully,

P. P. CLAXTON,
Commissioner.

Report of health conditions among the natives of Alaska.

DEPARTMENT OF THE INTERIOR,
BUREAU OF EDUCATION, ALASKA DIVISION,
Washington, January 22, 1913.

SIR: I have the honor to submit the following report and recommendations relating to the natives of Alaska:

My detail in the Territory has enabled me to inspect the settlements of the Indians on the southeastern coast and upper Yukon River; of the Aleuts along the southwestern coast and in the vicinity of Cook Inlet; and of the Eskimos on the lower Yukon and on the coast of Bering Sea.

In my inspection I endeavored to examine as many natives as possible, and in these examinations special effort was made to determine the number suffering with tuberculosis, trachoma, and venereal disease. In addition, I made a personal study of the sanitary conditions in the villages, and interviewed physicians and other persons who possessed any knowledge of the conditions that I was interested in.

DISEASES.

Sanitary conditions and the prevalence of disease vary somewhat in different sections of Alaska; syphilis is most prevalent in the southwest, eye diseases in the southeast, while pulmonary tuberculosis I believe to be most common among the Eskimos.

I found the following conditions and diseases present in the native population: Trachoma, keratitis, cataracts, blepharitis, conjunctivitis, corneal opacities, blindness, heart disease, stomach troubles, adenoids,

tonsillitis, hysteria, paralysis, locomotor ataxia, pneumonia, pleurisy, tuberculosis, scabies, impetigo, syphilis, scrofula, rickets, rheumatism, epilepsy, ptomaine poisoning, and gonorrhea. Erysipelas, smallpox, measles, and infantile paralysis have occurred in epidemics.

EYE DISEASES.

Eye diseases are most common in the southeast. About 23 per cent of the natives in this section show evidence of eye trouble, while the Eskimos, the least afflicted, only 6 per cent.

Trachoma is a chronic disease of the eyelids, very contagious, and if neglected causes much suffering and may result in blindness. This disease is most common in the southwest (13 per cent). Trachoma is classified as a dangerous contagious disease by the United States Public Health Service, and immigrants having this trouble are not permitted to enter the United States.

I believe that 80 per cent of the blindness and partial loss of vision among the Alaska natives could have been prevented if these cases had received proper treatment in the early stage of the disease.

All cases of trachoma should be removed to hospitals for treatment, for while at large they are a menace to the community. The eye being a delicate organ, all treatment of eyes should be performed only by physicians and experienced trained nurses, as much harm may result from interference by inexperienced persons.

SYPHILIS.

It is rather difficult to determine accurately the number of natives having syphilis, for the symptoms of this disease are not always manifested externally, even when present within the system. A large percentage of blindness and corneal opacities are due to the inherited type of this disease.

In my opinion the only practical method for treating syphilis in the natives is in hospitals, by the intravenous injection of Salvarsan (606); this treatment has been tried and has given wonderful results. Unfortunately, in southwestern Alaska, where this disease is most common, this treatment can not be administered, because no hospitals are available.

TUBERCULOSIS.

Tuberculosis is the principal disease, and if not eradicated in the near future will exterminate the native population of Alaska in the course of 60 to 70 years. All forms of tuberculosis (pulmonary, osseous, glandular) are present. The percentages of tuberculosis and the type of disease vary in different parts of the Territory; the pulmonary form is most common among the Eskimos, while tuberculosis of bones is most prevalent along the southern coast. I have seen a number of cases of spinal tuberculosis followed by paralysis, which condition could have been prevented by proper and timely treatment.

I am of the opinion that 15 per cent of the native population is infected with tuberculosis, including all forms and both the active and latent type, while in 7 per cent it is present in the active stages.

The home conditions are responsible for this infection, for in the crowded, unventilated rooms all eat from the same dish, drink from the same teapot spout, use the same towel, and expectorate on the same floor. It is there that the principal danger of contagion exists, and it is there that tuberculosis, trachoma, and syphilis are most frequently contracted.

VITAL STATISTICS.

According to the United States census of 1900 the native population of Alaska was 29,536; in 1910 it was only 25,331, a decrease of 4,205, or 14.5 per cent.

Dr. M. H. Foster, in a report to the commissioner of education, dated August 11, 1911, states that at Sitka, where presumably accurate records of births and deaths have been kept by the churches, for a period of 5 years and 7 months the annual birth rate has been 72.3 per 1,000 and the annual death rate 85.4 per 1,000, showing a decrease in population of 13 per 1,000. During the year 1912 the birth rate was 24 and the death rate 29.3 per 1,000, a decrease of only 5.3 per 1,000.

This improvement in the Sitka village, which is an example of the improvement in other sections of Alaska, I attribute chiefly to the influence and efforts of physicians, nurses, teachers, and hospitals now under the Bureau of Education. It demonstrates the fact that the outlook for the general improvement of the native is encouraging and the task feasible. Give the native a white man's chance and I am positive that he will respond equally as well.

RECOMMENDATIONS.

Medical relief for the native is necessary and urgent. The tubercular, syphilitic, and trachomatous should be removed to properly equipped hospitals for treatment. Trained nurses should be employed for field work; a nurse should remain in a village for a sufficient period to treat and cure the minor ailments, discharging ears, infected sores, and inflamed eyes. A portion of her time should be devoted to education—teaching mothers the proper care and feeding of infants, preparation of food, cleanliness in the homes, the necessity of ventilation, the proper collection and disposal of tubercular sputum, etc. This work is just as important and necessary as that performed in hospitals.

PRESENT MEDICAL SERVICE.

The present medical service in Alaska is entirely inadequate to the demand. At present there is no appropriation available for the erection of hospitals, although these institutions are necessary for the proper treatment of the cases. The physicians who are now employed are working at a disadvantage in buildings which are unsuited for the treatment of sick; but even with this equipment good results are being accomplished. The present medical work should therefore be extended and placed upon a firm and permanent basis.

HOSPITALS.

The solution of the medical problem in Alaska is, therefore, the establishment of well-equipped hospitals, the employment of physicians and nurses, the isolation of the infected, and the education of the native in hygiene and sanitation.

The area of the Territory of Alaska is one-fifth of that of the United States, and transportation facilities are inadequate and expensive; the erection of one central hospital is therefore impracticable. I recommend therefore that a chain of small hospitals be established along the coast and on the Yukon River at points most convenient to the greatest number of natives. The sick can then be sent to the nearest hospital at little expense. In my estimate I have indicated the points which, to my mind, would serve the greatest number of people at the least expense.

As a part of these hospitals, the erection of fair living quarters for the physicians and nurses, with as many of the comforts and conveniences as possible, is as essential as the accommodations for patients. Many of these places are isolated, the treatment of the native is not always pleasant, and the persons engaged in this work should receive encouragement and consideration. There is no inducement for competent and reliable persons to enter this service if they are to be underpaid, or if they are to be without comfortable living quarters and compelled to work without the necessary appliances, drugs, and assistants.

Such hospitals may be utilized also for training native girls in nursing. As an experiment, I consider it worth the trial to detail suitable girls to these institutions for this purpose.

EXPENSES.

The estimate of the appropriation required for the erection, equipment, and maintenance of these hospitals, for salaries of physicians, nurses, and attendants, traveling expenses, drugs, and supplies for the first year is $274,600; the cost of maintaining this service in the future, after the buildings have been provided, would be approximately $160,000.

It is very important to meet this medical problem in Alaska immediately, earnestly, and on a permanent basis, while the percentage of contagion and cost of the work are comparatively low and within control; otherwise the situation may become more serious and even equal that of the Indians of the State of Oklahoma, of whom 50 per cent have recently been found to have trachoma.

An appropriation of at least $125,000 is required in order to begin this work with an efficient organization. With this amount the hospitals which are now operated may be improved and continued, two new hospitals may be erected at places where most required, and the entire field may be supplied with physicians, nurses, and drugs.

CONCLUSION.

The native of Alaska, like the Indian of the States, is being gradually deprived of his natural means of support; each succeeding year the old native finds it more difficult to provide for himself. The Government has recognized this fact, and by providing schools and establishing reindeer herds is endeavoring to assist the coming generation to cope with the new situation.

With the advent of the white man into the Territory the native has contracted his diseases, with the result that tuberculosis and venereal and eye diseases are degenerating and depopulating the race. "Health is better than wealth" applies to the native as it does to the whites. Of what value are schools if the pupils they educate may not live to benefit by the education?

It is bad economy for the Government to maintain schools without hospitals. The native of Alaska is as much in need of medical treatment as he is of education; these are inseparable, and both are essential factors to his welfare. Cure him of his ills, teach him to live properly and under sanitary conditions, and he will profit by the education received in schools, become a worthy citizen, and continue to be self-supporting.

In conclusion I desire to express my thanks and appreciation of the hearty cooperation and assistance given to me by the officials of the Bureau of Education and the teachers of the Alaska school service.

Respectfully,

EMIL KRULISH,
Passed Assistant Surgeon, United States Public Health Service.

The COMMISSIONER OF EDUCATION.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I am not fully advised about the amount that is needed for hospitals. They have some hospitals in Alaska.

Mr. HUMPHREY of Washington. They are rented hospitals, what they call temporary structures, and they are not permitted to repair them. There are four of those.

Mr. HUMPHREYS of Mississippi. Under the advice of the governor of Alaska, the Committee on the Territories in the Senate and in the House have passed a bill which will provide about from $17,000 to $20,000 a year for the care of persons in Alaska who are indigent and incapacitated from nonage, old age, sickness, or accident, and provision is made for the administration of that fund by the United States marshal's office instead of through the governor's office, which has proven to be a very cumbersome and inefficient and ineffective method of administration. This fund is to be 10 per cent of the Alaska fund, which is $200,000, and some years $170,000, so that it will be from $17,000 to $20,000 a year. That, according to the best information we have been able to get, is all that is needed for the relief of persons in Alaska who are indigent and incapacitated not only by sickness, but through old age, nonage, or accident. For that reason I asked the gentleman where he got his figures, because this bill is approved by the Delegate from Alaska and the governor of Alaska and contemplates an expenditure of only $17,000. That bill has passed the Senate and it came to the House and was amended and is now in conference, and I feel quite sure that it will become a law in a few days.

Mr. WILLIS. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Certainly.

Mr. WILLIS. Mr. Chairman, I am quite familiar with the legislation to which the chairman of the Committee on the Territories referred, but does he think that the provisions of that bill are sufficient to reach the cases that are contemplated in the amendment offered by the gentleman from Washington? Under that bill could they go ahead and build hospitals? I do not recall any such provision in the legislation at all. It does not seem to me that there is any conflict between that legislation and what is proposed by the gentleman from Washington.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, the gentleman from Washington advises me that $40,000 of this is intended to be used for the construction of two hospitals. I have no information upon that subject. There is no information presented to our committee that these hospitals are needed. So I am not advised, and therefore can not answer that question; but the $30,000, however, is asked for the other purpose of sus-

taining and giving relief and maintenance to those who are sick. Under the bill, which is entirely satisfactory to the Delegate from Alaska and which is recommended by the governor, $17,000 is considered sufficient. So that even if $40,000 was needed—and upon that I express no opinion, because I have no information—only $17,000, or $20,000 at the outside, would be needed, and they have that in this bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILLIS. Mr. Chairman, I ask unanimous consent that the gentleman may have two minutes additional in order that I may ask him some questions.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio? [After a pause.] The Chair hears none.

Mr. WILLIS. I understood the gentleman to say there was no information before our Committee on the Territories that a hospital was desirable.

Mr. HUMPHREYS of Mississippi. Yes; I have no information at all.

Mr. WILLIS. Has the gentleman forgotten the testimony that was given before our committee by a number of gentlemen, and particularly by Bishop Peter T. Rowe, who spoke at great length on this subject and filed voluminous documents before the committee urging that precise thing, namely, the erection of a hospital?

Mr. HUMPHREYS of Mississippi. I am not informed on that; but this amendment contemplates the expenditure of $40,000. Now, the gentleman from Washington asked for $30,000 more, whereas the governor and Delegate advised the committee that this bill (S. 267) carries a sufficient amount, so I submit to the gentleman all the——

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Certainly.

Mr. HUMPHREY of Washington. Last year we spent $32,000 as an emergency fund for the purpose of taking care of the sick. With $40,000 for hospitals and $32,000 for such expenditure, it is $2,000 more than we are asking now.

Mr. HUMPHREYS of Mississippi. Where was the $32,000 spent?

Mr. HUMPHREY of Washington. It was taken from the educational fund and spent for the purpose of taking care of the sick.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. WILLIS. Mr. Chairman, I wish the gentleman from New York would reserve the point of order just for a few minutes. I do not desire to detain the committee, and five minutes will be sufficient. Mr. Chairman, of all the matters that have come before the Committee on Territories none has appealed to me more than this one, and I want to refer particularly to the hearings to which I referred briefly a minute ago. The fact is that the condition that obtains among the natives of Alaska almost beggars description. I have before me here two statements which at this time I ask permission to insert in the RECORD at the close of my remarks if there be no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio? [After a pause.] The Chair hears none.

Mr. WILLIS. One is a statement of Bishop Peter T. Rowe relative to the condition of the natives in Alaska. There is one paragraph in that letter in which he says:

> In a word, the natives of Alaska are fearfully diseased—30 per cent are afflicted with tubercular disease—many are blind. They are a menace to the white population, and as wards of this great Nation, whose country is possessed by the white people, their food and fur places being taken from them, it is only just to do something to relieve their miserable condition now, as we have heretofore failed to do anything for them.

Then in another statement his language bears out what has been already given here. The governor of Alaska, who is certainly conservative in what he says and what he recommends in reference to Alaska—the governor of Alaska in his published report and in his statement before our committee specifically urged a provision such as contemplated by the amendment offered by the gentleman from Washington. The governor of Alaska said, among other things:

> The existence of infectious diseases, alarming in their nature and wide prevalence among the native people, calls for vigorous action. Thirty-six per cent are infected by tuberculosis, 26 per cent by venereal diseases; trachoma and conjunctivitis are prevalent; other cases, strongly suspected to be leprous, were also discovered. The menace of infection extends to the white population.

In other words, he urges, in order that these cases may be properly cared for, there shall be just such a provision as is contemplated by this amendment; and the governor further says:

> If we must make a choice as between the hospitals and schools, in God's name, give us hospitals. We want to save the lives of these people.

What boots it to teach the Indian boy to read the English language if at the same time he is afflicted with a loathsome disease that is to strike him down to his grave? The fact is, gentlemen of the committee, that the natives of Alaska are in such a condition that unless something is done, as is contemplated by this amendment, they will simply be exterminated, and I do not believe that the American people are in a disposition to look with approval upon any such calamity as that.

As the gentleman from Washington [Mr. HUMPHREY] has said, we have made appropriations here to protect the seal herds—and properly so. We make a great appropriation to provide for the propagation of food fishes in Alaska—and properly so. However, as I pointed out to this House last year, very much of that which we are expending for the propagation of food fishes is a loss, because great corporations along the Pacific coast are taking millions upon millions of pounds of edible fish out of the waters of Alaska every year and making them into fertilizer. And yet we go on making these appropriations. But, forsooth, we have not the money to save the lives of men.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. WILLIS] has expired.

Mr. WILLIS. The following are the letters which I obtained unanimous consent to insert:

WASHINGTON, D. C., *January 8, 1912.*

To his excellency the PRESIDENT.

SIR: While traveling through Alaska last winter, on my missionary work, I found the natives everywhere in such conditions of disease, want, and misery that I there and then resolved to come to Congress and plead with you for some remedial help on their behalf. Their condition is most pitiable. As wards of our Government, they must be protected. The time has come for something to be done.

THE CONDITIONS.

1. Diseases are largely prevalent. The governor of Alaska, in his report of 1910, pages 18–20, says: "The existence of infectious diseases, alarming in their nature and wide prevalence among the native people, calls for vigorous action. Thirty-six per cent are infected by tuberculosis, 26 per cent by venereal diseases; trachoma and conjunctivitis are prevalent; other cases, strongly suspected to be leprous, were also discovered. The menace of infection extends to the white population."

In the reports of education in Alaska of 1910–11, published by the Bureau of Education, attention is drawn to this distressing and serious situation. Officers and surgeons of the Revenue-Cutter Service bear similar testimony.

2. The resources of their food supply are being taken by white men, cannery companies, etc., so that actual want is very common among them.

3. Liquor peddling among the natives prevails, in spite of the law against it, to their demoralization and debauchery. Prosecution seems utterly ineffective to check the evil or protect the people.

In a word, the natives of Alaska are in such a condition of helpless misery that only some immediate, strong, merciful action on the part of the Government can save them from a swift extinction. Though they are slowly disappearing, are bound to do so before the advance of the superior race, yet as wards of our Nation, as original occupants of this land, it is but a matter of justice, mercy, that the Government should do its best to shield and save them from conditions that are hastening them to a miserable death.

THE REMEDY.

May I offer some suggestions in the way of relieving the distressing conditions?

1. Reservations should be immediately made. Before all available lands and streams are occupied by the white settlers and fish-canning companies reservations should be made for the natives. This can be done now without expense. It will have to be done some time, but if deferred it will mean much difficulty and expense.

The "Metla Khatla Reserve" is a striking illustration of the benefits of this "reservation" plan. There the natives have been secluded, have supported themselves, have attained a high state of local self-government, of health, happiness, and prosperity.

Last winter I visited the Copper River Indians and their Chief Good-la-Taw. He gave a pot-latch, and in an address said: "My people have always lived here. The bones of my fathers and the bones of their fathers lie in these hills. The white people, many and strong, are taking from us our homes. The Great White Father has so much land in Alaska, and surely will give my people these few acres, so they may die in peace. The white man's ways are not our ways, and the end of the journey is not far. My people are but children, who need the care of a wise father."

2. It will be necessary to pass some law to compel the people living by themselves, here and there, far removed from each other, to come together on the chosen site for reservation.

3. The advantages: They can be better, more economically, cared for. One good school in each reservation will suffice where now six or more schools are carried on, and to an attendance fearfully small. It can be made more useful than as conducted now. As it is, how can children who are diseased, poor, and hungry avail themselves of the schools as at present provided? Then they can be ministered to in a medical way that will be satisfactory, and that is not possible now. They can be trained into self-government, and under wise supervision will be able to support themselves entirely.

These are suggestions, and are the result of 16 years' experience. How to carry them into effect is the question upon which I seek your judgment and guidance.

I am, your obedient servant,

PETER T. ROWE, *Bishop of Alaska.*

—

CORDOVA, ALASKA, *March 17, 1912.*

To the Hon. FRANK B. WILLIS,
Representative from Ohio, Washington, D. C.

MY DEAR MR. WILLIS: In writing you it is necessary that I first introduce myself. I am P. T. Rowe, Bishop of Alaska.

Deeply distressed with the ravages disease is making among the natives of Alaska, I felt compelled to visit Washington this past winter and present to His Excellency the President the facts. I did so, and the President was most interested, sympathetic, and responsive. He told me that he would join in any recommendations toward meeting the situation and referred me to the Secretary of the Interior. I interviewed the Secretary, who also was deeply interested, but felt that it was a question for Congress to deal with. So I applied to Members of Congress and had the honor of being invited to appear before the House Committee on Territories and the Senate committee. The needs of the "natives of Alaska" were presented and are on record. A copy of the statement is inclosed herewith. May I ask you kindly to consider the same? As a result of my report, it was suggested that a bill be prepared asking for remedial relief. This is being done. It will, I hope, be duly presented. May I ask you to give it your favorable consideration and support? It would be a stigma upon our civilization and Government to disregard so just and so needy a cause.

In a word, the natives of Alaska are fearfully diseased—30 per cent are afflicted with tubercular disease—many are blind. They are a menace to the white population, and as wards of this great Nation, whose country is possessed by the white people, their food and fur places being taken from them, it is only just to do something to relieve their miserable condition now, as we have heretofore failed to do anything for them.

The bill will call for an appropriation to provide a home for the blind, a sanitarium for the tuberculosis cases, and that their health and sanitary care be placed under the governmental Health and Quarantine Department.

I think that a commission should be appointed to attend to this whole matter. I believe it would be advisable to put them under the Indian Commission. I also believe that the scattered ones should be grouped in selected places, gradually, where they could support themselves, be looked after economically in hospitals, educated, trained into self-government. Something must be done—done promptly—for their relief, and so I beg you to give, if you can, your kind support toward passing the bill which will be presented and which seems the most advisable one to offer just now.

Faithfully, yours,

P. T. ROWE.

Home address: 945 Twenty-first Avenue N., Seattle, Wash.

Mr. FITZGERALD. Mr. Chairman, it is very interesting to have these gentlemen complain because the Committee on Appropriations does not assume the jurisdiction belonging to the committee of which they are members and legislate on this bill. Whenever the committee does attempt to do it these gentlemen are very critical about the assumption of their authority; yet the Committee on the Territories, of which the gentleman from Ohio [Mr. WILLIS] is a member, have had under consideration a bill dealing with the relief of persons other than natives of Alaska, and this matter impressed that committee so forcibly that they never made the slightest reference to relief of this character in that legislation which is now pending in conference. A request was submitted to the Committee on Appropriations which contemplates a string of hospitals through Alaska not authorized by law. The Bureau of Education, starting in 1906 with an appropriation of $15,000 for Alaska, is now receiving $200,000 a year to furnish relief and to help educate these natives, yet at the same time filling gentlemen with these stories and with criticisms of the Committee on Appropriations. If they would attend to the duties of their own committee and consider the subjects of which they have jurisdiction, provision would have long since been made for the relief, if relief be necessary, in Alaska.

If a number of hospitals are to be established in Alaska, I am inclined to agree with a great many gentlemen that they should not be under the Bureau of Education, but rather under the Public Health Service. This appropriation of $200,000 has been available for physicians, and yet, from all the testimony that can be obtained, we might just as well have been depositing the money in the Bering Sea, so far as the effectiveness of the work done by them is concerned. Until legislation is carefully prepared and enacted providing properly for hospitals and hospital service, I am not prepared to say that this appropriation should carry authority to permit the Bureau of Education to go ahead and establish hospitals where it pleases, under the character of control that they have in connection with the other services. As these hospitals are not authorized by law, I shall insist on the point of order.

Mr. STERLING. Mr. Chairman——

The CHAIRMAN. Does the gentleman desire to be heard on the point of order?

Mr. STERLING. I do.

The CHAIRMAN. Does the gentleman from New York [Mr. FITZGERALD] insist on the point of order?

Mr. FITZGERALD. I insist upon it.

Mr. STERLING. I think I have a right to discuss it, even if the gentleman does insist.

Mr. FITZGERALD. I think not. I am in charge of the bill.

The CHAIRMAN. The Chair will hear the gentleman from Illinois [Mr. STERLING] on the point of order.

Mr. STERLING. Certainly. That is what I want to talk about.

Mr. Chairman, there can not be any doubt but that the Appropriations Committee has jurisdiction over this matter. The bill provides for the education and the support of the natives of Alaska—the Indians, the Aleuts, and the Eskimos. The Committee on Appropriations undertakes to appropriate $200,000 for the education and the support of the natives of Alaska. Now, if there is any authority of law for the appropriation of $200,000 for the purpose as specified in the bill, there is authority of law for the appropriation of $70,000 additional.

The bill provides that this $200,000 may be used for the erection of schoolhouses. I do not know of any express authority of law for the building of schoolhouses, but I have no doubt it is perfectly competent for the Government, under the power to educate the Indians, to build schoolhouses, and just as sensibly they have the right to build hospitals for the support of the natives of Alaska. What is there more essential to the support of those natives than medical aid, and hospital service, and surgical service?

The Chair will note that at the bottom of page 113 the bill as it is now provides:

To enable the Secretary of the Interior, in his discretion and under his direction, to provide for the education and support of the Eskimos, Aleuts, Indians, and other natives of Alaska.

Then it proceeds:

For the erection, repair, and rental of school buildings.

In the amendment offered by the gentleman from Washington [Mr. HUMPHREY] the very same language is used—"for the erection, repair, and rental of" hospitals. The one goes to the education of the natives of Alaska. The other goes to the support of the natives of Alaska.

The CHAIRMAN. The Chair will ask the gentleman from Illinois if he has any law other than this appropriation bill which authorizes him in stating that there is a law authorizing the erection of hospitals in the Territory of Alaska?

Mr. STERLING. There is no express law providing for the erection of hospitals, neither is there express law for the erection of schoolhouses, but here is the point that I desire to make, if the Chair will listen to me for a minute: It is not subject to a point of order if the provision now contained in the bill relating to the erection of schoolhouses is not subject to a point of order.

The CHAIRMAN. Does the gentleman make the point of order against that?

Mr. STERLING. I do not. I do not want to do that; I want it to remain. It is too late to make the point of order against that section of the bill; and the point of order not having been made against that provision it is proper now to insert this amendment, even if it is not authorized by law. An amendment to a provision in a bill that is subject to a point of order, if it is germane to the bill, is not subject to a point of order unless the point of order is made against the entire paragraph.

The CHAIRMAN. Does the gentleman think that the erection of a hospital is germane to a bill providing for the erection of a schoolhouse?

Mr. STERLING. No, sir; but it is germane to a bill providing for the support of the natives of Alaska. That is the provision in this bill under which hospitals are justified, and just as much so and just as clearly so as the erection of schoolhouses is admissible under the provision providing for the education of the natives of Alaska. There can be no distinction, and if this is subject to a point of order the entire paragraph is subject to a point of order. The provision relating to the erection of schoolhouses is subject to a point of order, because it is no more necessary, no more nearly related to the education of the Alaskans, than is the building of hospitals and the supply of medical service necessary to their support. Therefore, Mr. Chairman, it is wholly immaterial at this point whether the paragraph is subject to the point of order or not. No point was made in apt time against it, and so it will remain—at least it can not go out on a point of order. So the question as to whether the amendment is authorized by existing law does not arise. It is a competent amendment, even though not authorized by law, if it is germane to the subject matter of the paragraph. It must be germane under that provision of the paragraph pertaining to the support of the Alaskan natives. Support necessarily implies medical and surgical aid and the necessary equipment for this service, such as hospital aid and physicians and surgeons.

Mr. Chairman, there can be no doubt, it seems to me, on that question. This amendment is germane to the provision for support, the same as schoolhouses and teachers are germane to the provision for the education of the natives. It being germane, the question as to whether it is authorized by law can not be urged against it because the point was not urged against the paragraph. The amendment for hospitals is authorized for support of natives as plainly as schoolhouses are authorized for their education.

Mr. Chairman, I desire to say a word as to the merits of the amendment. The condition of the Eskimos, Aleuts, and Indians of Alaska is deplorable. They are rapidly diminishing in numbers, due to disease, the most fatal of which are tuberculosis, trachoma, and syphilis. In the last 10 years their numbers have fallen off more than 4,000. This is an awful fatality. In 1900 there were 29,536 native population in Alaska. In 1910 there were only 25,331, a decrease of 4,205, or 14.5 per cent. This great decrease was due to the ravages of these diseases.

Mr. Chairman, I read from the report of the Bureau of Education:

For years the reports of the governor of Alaska, of the teachers of United States public schools in Alaska, of medical officers of the Government serving on revenue cutters in Alaskan waters, and of officers of the Army stationed in Alaska have emphasized the fact that the checking of disease among the natives of Alaska is an urgent national duty. Efforts to obtain congressional appropriations for this purpose have not been successful. Realizing the absolute necessity for action, the Bureau of Education, under a decision from the Comptroller of the Treasury, is using part of the appropriation for the education of natives of Alaska in endeavoring to furnish medical relief in the manner set forth elsewhere in this report. Under the comptroller's decision the Bureau of Education may not erect hospitals in Alaska. The use of part of the appropriation for the education of the natives of Alaska for the suppression of disease is an emergency measure. The entire appropriation for education in Alaska is urgently needed for the work of providing adequate educational facilities and for the industrial development of the native population. It should not be diminished. The appropriating of funds to enable the Bureau of Education to provide adequately for the medical and sanitary relief of the natives of Alaska is urgently recommended.

We ought to heed the admonition of this report. We are derelict if we do not do something to stop these ravages. The white man's civilization brought these diseases to the door of the wigwam and tepee, and it is the duty of the white man's government to take them away. Let me quote from the reports of the governor of Alaska for the years 1910 and 1911. It is so important, in his judgment, that he urged the matter in both reports, as follows:

The existence of infectious diseases, alarming in their nature and wide prevalence among the native people, calls for vigorous action. The menace of infection extends to the white inhabitants, for there are Indian, Eskimo, or Aleut villages in the immediate neighborhood of nearly all the principal towns, and the natives mingle freely among the whites in public places. The conditions have certainly not improved since 1908, when, in southeastern Alaska, a physical examination being made by one of the school physicians of 1,161 natives, 418, or 36 per cent, were found to be affected with tuberculosis, and 308, or 26 per cent, were found to be affected with venereal diseases. Among other diseases prevalent in southeastern Alaska, as well as in several other parts of the Territory, are trachoma and conjunctivitis; and in the Alaska Peninsula are several cases, which, after long and careful examination, are strongly suspected to be leprosy.

There is no law which requires the natives to observe any of the ordinary rules of sanitation, and their unfortunate condition is often traceable directly to the filthy condition of their villages and the dwellings in which they live. Yet these people are generally respectful of the law, and a simple set of statutory requirements imposing a mild penalty for nonobservance would unquestionably cause a great improvement in sanitary conditions. The welfare of the white inhabitants, as well as that of the natives, demands such a law.

This bill appropriates $200,000 for the education of these people. What folly it is to do this and give nothing for their relief from these horrible diseases. It is far better to cure them than to educate them, but we can and ought to do both.

The CHAIRMAN. The Chair is ready to rule. The Chair does not think that the amendment of the gentleman is germane, in the first place, to the paragraph, and, again, the Chair does not think it is authorized by law. It has been ruled over and over again that an appropriation of this character can not be held to be in order as a continuation of a public work. The Chair sustains the point of order.

Mr. HUMPHREY of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks by inserting a letter in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. STERLING. Mr. Chairman, I ask the same privilege.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

All expenditures of money appropriated herein for school purposes in Alaska shall be under the supervision and direction of the Commissioner of Education and in conformity with such conditions, rules, and regulations as to conduct and methods of instruction and expenditure of money as may from time to time be recommended by him and approved by the Secretary of the Interior.

Mr. MANN. Mr. Chairman, I reserve a point of order on this paragraph.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves a point of order on the paragraph.

Mr. MANN. Suppose this paragraph should go out. What would be the effect?

Mr. SHERLEY. I suppose if it went out the effect would probably be the same as if it were in.

Mr. MANN. I think so, too. It will be under the control of the Secretary of the Interior. I make a point of order against the paragraph.

Mr. SHERLEY. If that be so, I do not think it is subject to a point of order.

Mr. MANN. Oh, yes; it is. It is subject to a point of order.

Mr. SHERLEY. It does not change existing law.

Mr. MANN. Oh, yes; it does change existing law.

Mr. SHERLEY. Then its being in must make some difference.

Mr. MANN. No. If it is in, it leaves it under the control of the Commissioner of Education. If it is out, it leaves it under the control of the Secretary of the Interior, who may commit it to the Commissioner of Education.

Mr. SHERLEY. What does the gentleman say to the proposition that it is a limitation on the expenditure, anyway, and not legislation?

Mr. MANN. I do not think that is it. It is legislation, pure and simple.

The CHAIRMAN. The Chair is inclined to sustain the point of order unless the gentleman from Kentucky offers some reasons that are convincing.

Mr. SHERLEY. I do not think it is material enough to argue.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

For the suppression of the traffic in intoxicating liquors among the natives of Alaska, to be expended under the direction of the Secretary of the Interior, $12,000.

Mr. WILLIS. Mr. Chairman, I move to insert, after line 10, page 115, the following language:

To provide for the erection of buildings as is provided in the act approved June 25, 1910, $25,000.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Ohio.

The Clerk read as follows:

Amend, page 115, after line 10, by inserting the following: "To provide for the erection of buildings as provided in the act of June 25, 1910, $25,000."

Mr. FITZGERALD. I reserve a point of order against the amendment.

Mr. WILLIS. I am willing to have the gentleman make the point of order.

Mr. SHERLEY. We should like to know what the act of 1910 is.

Mr. WILLIS. The act approved June 25, 1910, a copy of which I hold in my hand, reads as follows:

Be it enacted, etc., That there is hereby established at Fairbanks, in the Territory of Alaska, and at Nome, in the Territory of Alaska, respectively, a detention hospital for the temporary care and detention of the insane, wherein all insane and other patients in charge of the United States marshal shall be detained until transported to the asylum provided by law for their permanent care and cure, or otherwise disposed of as provided by the laws of the United States; and the sum of $25,000 is hereby appropriated out of any moneys in the United States Treasury not otherwise appropriated, not exceeding one-half thereof to be expended in the erection and equipment of the hospital at Fairbanks, and not exceeding one-half thereof to be expended in the erection and equipment of the hospital at Nome.

I have read the first section of the act.

Mr. SHERLEY. Now, I make the point of order that the power under that act has already been exercised and the money appropriated, and ought not to be reappropriated.

Mr. WILLIS. When was the money appropriated?

Mr. SHERLEY. When the act was passed. The gentleman has just read it.

Mr. WILLIS. As I understand, there has never been any actual appropriation.

Mr. SHERLEY. The act appropriates the money. It may not have been spent.

Mr. MANN. It says:

And the sum of $25,000 is hereby appropriated out of any moneys in the United States Treasury not otherwise appropriated.

Mr. WILLIS. I had not previously read the act of June 25, 1910, and upon examination of it I concede the point of order.

The Clerk read as follows:

Yosemite National Park, Cal.: For protection and improvement, construction and repair of bridges, fences, and trails, and improvement of roads other than toll roads, $100,000.

Mr. RAKER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, in line 21, page 115, by striking out the figures "100,000" and inserting in lieu thereof "233,703."

Mr. RAKER. Mr. Chairman, I want to call the attention of the committee to this amount of $233,703, an increase of $133,-

703 over and above the amount allowed in this bill. Two hundred and thirty-three thousand seven hundred and three dollars is the amount that is estimated by the Secretary of the Interior, which he states, and which the evidence before the committee shows, is absolutely necessary to put this park in shape so it can be properly used. We have there a large piece of property belonging to the Government, and at the present time there is no means by which the people of the United States are able to get in this park by automobiles, the latest means of travel, as they ought to be able to do. There ought to be a sufficient amount expended, as recommended by the department, so that the roads to and in this park coming from the south and from the north, as well as from the end of the railroads, be put in proper shape. We have expended large sums of money for other purposes, and this expenditure will put it in the shape in which it ought to be for its proper use and protection.

In the testimony taken by the Committee on Appropriations, the chief clerk of the Secretary of the Interior and other officials were present, and that testimony showed the need and the necessity for this appropriation as estimated.

I want to call the attention of the committee to the fact that representatives of an association consisting of 86,000 people were in the Yosemite Valley last fall with the Secretary of the Interior, and with all the superintendents of the national parks, and full investigation was made and hearing had, and they desire that this park, with the other parks, be put under a park bureau, to the end that one man, the head of that bureau, can give his entire attention to this large and important matter.

The revenues from the public parks, even with the public roads built and put in proper shape, as they ought to be in the parks, will be practically sufficient to maintain the parks as they ought to be. I trust that the committee at this time will see its way clear to adopt this amendment raising it from $100,000 to $233,703, covering the amounts under the estimate. It is needed. The Government, by a small appropriation, should not prevent this park from being used to its full extent. It is one of the playgrounds of the people of this Nation. The Government should provide for the proper improvement of its great property. Ten times as many people would visit this park if the proper and necessary improvements are made. The entire State of California is anxious for this road improvement. There can be no possible reason why automobiles should not be permitted to enter the park. If roads are provided, they can. The State of California is expending $18,000,000 for good roads. Certainly this Government should meet the same needs for its most wonderful park by providing proper roads over its property.

Mr. KNOWLAND. Mr. Chairman, in supporting this amendment I desire to commend the committee for increasing the appropriation carried in the pending bill by $50,000 over the amount carried in the sundry civil bill when it left the House last year. While the appropriation is increased, the amount should be as large as provided in the amendment just offered by my colleague.

I wish to direct attention to the fact that the Yosemite National Park has received comparatively small appropriations for the improvement of roads. California has authorized a bond issue of $80,000,000 for the improvement of roads throughout that State. We have had appropriated for the roads in the Yosemite National Park since it was taken over by the Government about $113,000. There has been appropriated for the Yellowstone National Park for the improvement of roads over $2,000,000. The roads in that park are in excellent condition, with the result that during recent years appropriations for roads have not been necessary. Of course, I appreciate that the Yellowstone is a larger and older park, but still, even these facts would not fully account for the marked difference in the amounts appropriated.

Mr. WARBURTON. If the gentleman from California will pardon me, the Yellowstone Park has $150,000 appropriated in this bill.

Mr. KNOWLAND. For roads?

Mr. WARBURTON. Yes.

Mr. KNOWLAND. I have a statement from the War Department showing that for the past six years practically no appropriations were made for roads, because they had been placed in such good condition.

Mr. WARBURTON. They are placed under the direction of the War Department. Last year there was $177,000 appropriated for the Yellowstone Park.

Mr. KNOWLAND. I do not think this was for roads. However, I want to call attention to the fact that the Government has been particularly generous with the Yellowstone National Park in the building of roads but that it has not been in reference to the Yosemite National Park. At this particular time we of California are anxious that the roads be placed in a condition so that the visitors whom we expect in California within the next few years will be able to enter the park with comfort. When the roads are placed in condition, automobiles will be allowed within the park.

The following letters from the Secretary of the Interior and from the Chief of Engineers show the amounts appropriated for roads in the Yosemite and Yellowstone National Parks:

AUGUST 17, 1912.

Hon. W. L. FISHER,
Secretary of the Interior.

MY DEAR SIR: If available, will you kindly furnish me with the following data:

Total amount expended in road construction in Yellowstone Park.
Total amount appropriated for road construction in Yellowstone Park.
Total amount expended for road construction in Yellowstone Park during the last six years.
Total amount appropriated for road construction in Yellowstone Park for the last six years.
Total amount expended for road construction in Yosemite Park since the Federal Government took charge.
Total amount appropriated for road construction in Yosemite Park since the Federal Government took charge.

Very truly, yours,

J. R. KNOWLAND.

DEPARTMENT OF THE INTERIOR,
Washington, August 22, 1912.

Hon. J. R. KNOWLAND,
House of Representatives, Washington, D. C.

SIR: I am in receipt of your letter of August 17, 1912, requesting information as to the amount of money appropriated and expended for road work in the Yellowstone National Park, as well as the total amount expended for roads in Yosemite Park since the Federal Government took charge, and the total amount appropriated for road construction in Yosemite Park since the Federal Government took charge.

The expenditure of the appropriations for road construction and other improvements in the Yellowstone National Park being under the supervision of the Secretary of War, your letter has accordingly been forwarded to that officer for consideration.

In relation to the Yosemite National Park, it may be stated that the park was created by the act of October 1, 1890, from which date up to July 1, 1898, no appropriations whatever were made by Congress for this park. Subsequently appropriations were made for the improvement of Yosemite National Park generally, "For protection of Yosemite National Park and the construction of bridges, fencing, and trails, and improvements of roads other than toll roads, to be expended under the supervision of the Secretary of the Interior," to wit:

1899	$4,000
1900	4,000
1901	4,000
1902	4,000
1903	6,000
1904	6,000
1905	25,400
1906	5,400
1907	5,750
1908	30,000
1909	30,000
1910	30,000
1911	62,000
1912	50,000
Total	266,550

From 1899 to 1905 the appropriations for the park, which were small, were expended in the cost of administration, the construction and repair of trails, etc.

After the passage of the joint resolution of June 11, 1906, accepting the recession by the State of California of the Yosemite Valley grant and the Mariposa Big Tree Grove, and including the same within the metes and bounds of the Yosemite National Park, it became evident that the Government would be compelled to take some steps toward the construction of proper roads leading into and on the floor of the Yosemite Valley, and accordingly the following amounts were expended for that purpose, either from the park appropriations or from the park revenues, in each of the following years, to wit:

	From congressional appropriations.	From park revenues.
1906	$8,000.00	
1907		$17,000.00
1908	13,000.60	
1909	12,729.99	
1910	13,440.60	20,329.03
1911	18,997.79	
1912	6,125.63	3,955.38
	72,294.01	41,284.41

Making a total expenditure in all for road work of approximately $113,578.42.

The above totals are approximate only and are taken from the memorandum records in the department. To get at the exact figures would necessitate an examination of the vouchers on file in the auditor's office. This would take up more time than it would be practical to allot from the clerical force engaged in this work in the Secretary's office, considering the demands for current business.

Very respectfully,

CLEMENT S. UCKER, *Chief Clerk.*

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, August 22, 1912.

Hon. J. R. KNOWLAND,
United States House of Representatives.

SIR: 1. I have the honor to inform you that your letter of the 17th instant, addressed to the Secretary of the Interior, making inquiry con-

cerning expenditures in the Yellowstone and Yosemite National Parks, has been referred to this office.

2. The total amount expended in road construction in Yellowstone National Park to June 30, 1912, is about $1,115,383.05 for the permanent work. About $200,000 was expended in early work, which has since been replaced and which does not form a part of the completed system, and maintenance and repairs have cost about $731,001.37, making the total expenditure for construction and maintenance of the roads and bridges to June 30, 1912, $2,046,384.42.

3. The total amount appropriated for roads and bridges to and including March 4, 1911, was $2,046,586.23.

4. The total expenditure for road and bridge work in the park during the six years ending June 30, 1912, was $409,875, but this amount was principally for maintenance and repairs, as the park road system was practically finished during the fiscal year ending June 30, 1906.

5. The total amount appropriated during the six years from and including June 30, 1906, to June 30, 1912, was $405,000, but all of the appropriations during that period were for maintenance and repair of improvements, with the exception that the act approved March 4, 1911, authorized a road extension to properly connect with the new Canyon Hotel. The excess of expenditures over appropriations during that period is explained by the fact that there was on June 30, 1906, a balance available from the appropriation of March 3, 1905, which by the terms of the act was made available until expended.

6. I take pleasure in sending you a copy of Appendix GGG of the Annual Report of the Chief of Engineers for 1911, which contains the latest published annual report on the work in question.

7. It is understood that reply to your inquiries concerning the Yosemite National Park will be made by the Department of the Interior, which has charge of the road work in that park.

Yours, respectfully,

W. H. BIXBY,
Chief of Engineers, United States Army.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was lost.

Mr. FITZGERALD. Mr. Chairman, I move that the committee do now rise. I will state to the Members that it is for the purpose of permitting the Committee on Naval Affairs to report the naval bill and to transact some trifling business, and then the committee will resume its sitting. I move that the committee now rise.

The motion was agreed to; accordingly the committee determined to rise, and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28775, the sundry civil appropriation bill, and had come to no resolution thereon.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 8536. An act to authorize the construction of a bridge across the Mississippi River in Beltrami County, in the State of Minnesota; to the Committee on Interstate and Foreign Commerce.

S. 8538. An act to authorize the St. Louis & Western Traction Co. to construct a bridge across the Missouri River near Weldon Springs Landing, in the State of Missouri; to the Committee on Interstate and Foreign Commerce.

S. 8539. An act to authorize the St. Louis Belt, Illinois & Eastern Traction Co. to construct a bridge across the Mississippi River, near the mouth of the Missouri River; to the Committee on Interstate and Foreign Commerce.

S. 8195. An act granting relief to certain American citizens in El Paso, Tex., and Douglas, Ariz.; to the Committee on Foreign Affairs.

ENROLLED BILLS SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 11478. An act to quiet title and possession with respect to a certain unconfirmed and located private-land claim in Baldwin County, Ala., in so far as the records of the General Land Office show said claim to be free from conflict; and

H. R. 2839. An act for the relief of William Hommelsberg.

NAVAL APPROPRIATION BILL.

Mr. PADGETT, chairman of the Committee on Naval Affairs, by direction of that committee, reported the bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes (H. Rept. 1557), which was read the first and second times and, with accompanying papers, was ordered printed and referred to the Committee of the Whole House on the state of the Union.

Mr. FOSS reserved all points of order on the bill.

Mr. PADGETT. Mr. Speaker, the gentleman from Mississippi [Mr. WITHERSPOON] and other members of the committee desire to submit minority views, and I ask unanimous consent that they have leave to do so, not to delay consideration of the bill.

Mr. FOSS. Within what period of time?

Mr. GARNER. Five days, Mr. Speaker.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the gentleman from Mississippi [Mr. WITHERSPOON] and others, members of the Committee on Naval Affairs, have leave to file minority views within five legislative days, not to interfere with the consideration of the bill. Is there objection?

There was no objection.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. BURLESON. Mr. Speaker, I have a trifling matter I want to present to the House. I ask unanimous consent to take from the Speaker's table the bill H. R. 28499, the District of Columbia appropriation bill, nonconcur in all the Senate amendments, and request a conference.

The SPEAKER. The gentleman from Texas asks unanimous consent to take from the Speaker's table the bill H. R. 28499, the District of Columbia appropriation bill, disagree to all the Senate amendments thereto, and ask for a conference. Is there objection?

Mr. WILLIS. Mr. Speaker, I object.

The SPEAKER. The gentleman from Ohio objects. Under the rule the bill will be referred to the Committee on Appropriations.

Mr. FITZGERALD. Mr. Speaker, I ask that it be printed and the Senate amendments numbered.

The SPEAKER. It will be printed with the Senate amendments numbered when it is referred.

PRINTING OF TARIFF HEARINGS.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

House concurrent resolution 71.

Resolved by the House of Representatives (the Senate concurring), That there be printed and bound 2,500 copies of the tariff hearings before the Committee on Ways and Means of the House of Representatives the 6th day of January last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

The SPEAKER. Is there objection to the present consideration of the resolution? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, I think probably the resolution will be effective, although the law provides that there must be an estimate of the cost submitted by the Committee on Printing before the House can do this. If it does not conflict so that the printing may be done, I have no objection.

Mr. UNDERWOOD. Mr. Speaker, I will state to the gentleman from Illinois that the resolution is absolutely the same in language that was passed four years ago for the printing of the same hearings, and the books were printed at that time under the same action being taken by the House now.

Mr. MANN. Without a report from the Committee on Printing?

Mr. UNDERWOOD. Without a report.

Mr. MANN. It may be that the Public Printer will violate the law, and that he did before. I do not know. The law specifically provides that it must be done before the printing is done.

Mr. HUMPHREYS of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. UNDERWOOD. Yes.

Mr. HUMPHREYS of Mississippi. The resolution, as I caught it, does not provide for distribution through the folding room.

Mr. MANN. This goes through the folding room.

Mr. UNDERWOOD. It will go through the folding room. The purpose of the resolution is to provide the Members of the next House with copies of these hearings before the tariff bill is reported.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28775—the sundry civil appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the sundry civil appropriation bill, with Mr. HAY in the chair.

The CHAIRMAN. The gentleman from California [Mr. NEEDHAM] had offered an amendment, which the Clerk will report.

The Clerk read as follows:

Page 115, line 21, change the period to a colon, and add: "*Provided*, That in the administration of the Yosemite National Park the laws applicable to the Yellowstone National Park now in force relating to the granting of leases are hereby extended to the Yosemite National Park."

Mr. FITZGERALD. Mr. Chairman, on that I make the point of order.

Mr. NEEDHAM. Mr. Chairman, will the gentleman reserve the point of order a few moments?

Mr. FITZGERALD. Mr. Chairman, I intend to make it. If the gentleman wishes to use five minutes, I have no objection.

The CHAIRMAN. The Chair sustains the point of order.

Mr. RAKER. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Add, at the end of line 21, page 115, the following:

"*Provided*, That in the administration of said Yosemite Park the Secretary of the Interior is hereby authorized and empowered to grant leases, for periods of not exceeding 20 years, at annual rentals, and under terms and conditions to be determined by him, to any person, corporation, or company he may authorize to transact business in the Yosemite National Park, for separate tracts of land, not exceeding 20 acres each, at such places, not to exceed 10 in number to any person, corporation, or company in said park, as the comfort and convenience of visitors may require for the construction and maintenance of substantial hotel buildings and buildings for the protection of motor cars, stages, stock and equipment, etc. Such leases may, at the option of the Secretary of the Interior, contain appropriate provisions for the appraisement, at the expiration of the lease, of the value of such hotel and other buildings (or portions thereof) as may be constructed by the lessees, respectively, and the payment of the same to the lessees in case a new lease be made to persons other than the said lessees, such payments to be made by said new lessees, respectively.

"That any person or corporation or company holding a lease or leases within said park for the purposes above described is hereby authorized, with the approval of the Secretary of the Interior, to execute mortgages upon his or its rights and properties, including his or its contract or contracts with the Secretary of the Interior; such mortgages shall be executed in duplicate and delivered to the Secretary of the Interior for his approval, and upon his approval thereof he shall retain one of said duplicates and file the same for record in his office.

"That any mortgage, lien, or encumbrance created under the provisions hereof shall be subject to the rights of the Government to compel the enforcement of the terms of the lease or contract of the mortgagor, and any purchaser under a foreclosure of such encumbrance shall take subject to all the conditions assumed by the original lessee or contractor.

"That all provisions of existing law in relation to said park not in conflict herewith are hereby continued in full force and effect."

Mr. FITZGERALD. Mr. Chairman, I make the point of order on that.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Sequoia National Park, Cal.: For the protection and improvement, construction, and repair of bridges, fences, and trails, and improvement of roads other than toll roads, $15,550.

[Mr. WARBURTON addressed the committee. See Appendix.]

Mr. WARBURTON. Mr. Chairman, I desire to ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington [Mr. WARBURTON].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. WARBURTON. Division, Mr. Chairman.

The committee divided; and there were—ayes 8, noes 35.

So the amendment was rejected.

Mr. WARBURTON. Mr. Chairman, I desire to offer another amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 116, after "$13,400," in line 6, insert:

"That the United States Government cedes to the State of Washington title in fee simple to and jurisdiction over all of the land within Mount Rainier National Park on the condition that the State of Washington shall maintain said park as a national public park; that the State of Washington may sell such timber in the park as the commissioners herein mentioned may find will not injure the scenic beauty of the park, and that the proceeds from the sale of timber shall be used solely for the construction of roads, bridges, and trails within the park and the protection and the beautifying the same; that the proceeds from the sales of timber shall be first used to widen the present roadway in the park to Paradise Valley to the full width of 16 feet and the building of necessary trails; after such road is so improved the said commissioners shall locate and construct a road around the mountain connecting with the road aforesaid as rapidly as funds may become available; that not more than one-tenth of the timber within said park shall be removed within seven years from the date of the passage of this act and not more than one-tenth every recurring seven years thereafter; that no timber shall be sold on land that has once been logged within a period of 50 years after the same has been logged; that no timber shall be sold or land logged within 40 rods of the present Government road or roads to be constructed. That a commission of three men of the highest standing and character within the State of Washington shall be appointed by the governor of the State, who shall have charge of said park, and who shall act without compensation, and whose duties shall be to carry out the provisions of this act and such additional rules and regulations as shall be prescribed by the Legislature of the State of Washington not inconsistent with the conditions herein contained.

Mr. FITZGERALD. Mr. Chairman, I reserve a point of order on that.

[Mr. WARBURTON addressed the committee. See Appendix.]

Mr. FITZGERALD. Mr. Chairman, I simply desire to say this: The department submitted an estimate, which the committee has recommended. Subsequently, after the representatives of the department, the gentleman from Washington [Mr. WARBURTON], and some others appeared before the committee, a belated estimate came in, requesting an appropriation of $175,000 for the improvement of the park, although in the original Book of Estimates the estimate for this purpose was but $13,400.

In attempting to justify the supplemental estimate the Secretary of the Interior made this statement:

The superintendent of the Mount Rainier National Park, in accordance with instructions from this department, transmitted estimates for the park for the fiscal year ending June 30, 1914, in the total sum of $343,400, which estimates were, upon consideration by the department, reduced to $13,400, the amount embodied in the annual Book of Estimates, page 643.

This action was taken in view of the fact that the total estimates for 1914, as submitted by the various bureaus of the department alone, exceeded by $11,200,000 the annual estimates for the fiscal year ending June 30, 1913. This amount was deemed excessive, and it was necessary to require each bureau, park, or other branch to bear a proportion of reduction.

I have, however, concluded from information brought to my attention as to the necessity for the improvement and extension of present roads in the Mount Rainier National Park and for the construction of new trails, that the best interests of the park would be subserved by submitting the herewith further estimate in the sum of $175,000.

Mr. Chairman, it requires more stability than this on the part of the departments regarding their belief as to what is required for the public service to enable Congress to act intelligently. The amount is taken out, before the annual estimates are submitted to Congress, in order to make a good showing. After a time has elapsed items are put back in order to obtain moneys that may or may not be highly desirable or important. It is impossible in a short session of Congress to keep track of the many shifts made by departments regarding estimates, waiting until a bill is practically complete and then shifting their position and expecting committees to be able to determine just what is proper.

I am not at all certain but that the most advisable thing to do would be to turn this park over to the State of Washington. I believe that the park is not of such a character as to justify its maintenance as a national park, although it has features and characteristics that undoubtedly would make it highly desirable to the State to preserve and develop it.

I insist upon this point of order because it is proper that some committee with jurisdiction should have an opportunity to take up the suggestion of the gentleman from Washington and work out a plan, and if it be determined that under proper conditions the park should be transferred to the State I should not oppose it.

It is impossible for the committee under these circumstances to permit the incorporation of such a comprehensive provision in the bill. I insist upon the point of order.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

Crater Lake National Park, Oreg.: For protection and improvement, and repairing and extension of roads, $3,000.

Mr. LAFFERTY. Mr. Chairman, I move to strike out $3,000 and insert $100,000.

The CHAIRMAN. The gentleman from Oregon offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 116, line 15, strike out "$3,000" and insert "$100,000."

Mr. LAFFERTY. Mr. Chairman, the Chief of Engineers of the Army has made a report, which has been adopted by the department, and in the estimate sent to the Committee on Appropriations by the Secretary of the Treasury an appropriation of $100,000 is asked for the purpose of building roads in the Crater National Park, in Oregon. The estimates include $7,540 for the mere purpose of protecting, improving, repairing, and extending the roads of that park, making the total estimate $107,540, whereas the amount given by this bill is only $3,000.

The bill last year gave $3,000 for this purpose and $50,000 for the roads. Last year the same amounts were included in the estimate as this year, to wit, $107,540.

Now, if the Democratic Committee on Appropriations and the Democratic Party, soon to be in complete control of the Government, feel that the Government is so poor that it will be unable to maintain these national parks, then, even though the State of Oregon joined the Democratic procession last winter, in so far that it cast its electoral vote for the Democratic nominee for the Presidency, we people out there feel that we would gladly accept legislation such as has just been proposed by the gentleman from Washington [Mr. WARBURTON]; and if the Crater

Lake National Park should be ceded by the Federal Government to the State of Oregon under such safeguards as would guarantee that none of the lands would ever be alienated, but would be retained for public purposes, and that none of the timber would ever be wasted, and that all of the natural resources inside of the boundary of the park would be preserved and safeguarded further so that the cession to the State would be revoked if any of these conditions should ever be violated, the State of Oregon would be glad to accept it. And while I know that this amendment to increase this appropriation to $100,000 will be voted down, I feel it my duty as a representative of the State to offer this amendment and to make the suggestion that we would accept the same offer that has been made by the gentleman from Washington [Mr. WARBURTON].

Mr. FITZGERALD. The gentleman from Oregon bases his appeal largely upon the ground that the electoral vote of Oregon has been cast for the Democratic Party in the last election. Perhaps if the State had gone further in its election returns it might have appealed more forcibly to the committee.

For the current year $50,000 was given for the improvement and construction of roads in the Crater Lake Park. At the end of this year there will be an unexpended balance of $48,000. Only $2,000 will be spent during this year. More than that, investigation discloses that the construction of the roads in this park, as proposed and in the manner intended, is practically for the benefit of the casual automobile tourist. The committee does not believe that $600,000 should be spent in the Crater Lake Park for roads merely to accommodate the occasional automobilist who happens to stray into that vicinity.

I hope the amendment will not be agreed to.

Mr. LAFFERTY. Is it not a fact that the estimate shows that Gen. Bixby recommended first $150,000, and that it was desired to finish this road construction in time for the Panama Canal Exposition at San Francisco in 1915?

Mr. FITZGERALD. The fact remains that at the end of the current fiscal year $48,000 will remain unexpended of an appropriation of $50,000. The only mistake that seems to have been made was that the committee was overliberal at the last session in giving $48,000 more than could be utilized during the current year, and it was done at a time when the committee was not overanxious to appropriate money unnecessarily.

I hope this amendment will not be agreed to.

The amendment was rejected.

The Clerk read as follows:

Platt National Park, Okla.: Pursuant to the authority conveyed in section 64 of the act approved July 1, 1902 (Stat. L., v. 32, p. 656), all of the land comprising the Platt National Park in the State of Oklahoma is transferred and title thereto vested in the State of Oklahoma.

Mr. MILLER. Mr. Chairman, I make a point of order against the paragraph.

Mr. STEPHENS of Texas. There are three other paragraphs relating to the same subject.

The CHAIRMAN. The gentleman makes a point of order to the first paragraph.

Mr. MILLER. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MILLER. I made the point of order immediately upon the conclusion of the reading of that paragraph by the Clerk. Will not that point of order have to be disposed of before we proceed to the reading of the next paragraph?

The CHAIRMAN. The Chair thinks so.

Mr. MILLER. If the gentleman will consent that the three paragraphs may be grouped and the point of order made as to all I am willing.

Mr. FITZGERALD. No; the gentleman must first prove that this paragraph is subject to a point of order.

Mr. MILLER. Then, Mr. Chairman, I would like briefly to address myself to the point of order. I have no doubt the committee considers it in order, because of the operation of the Holman rule.

Mr. FITZGERALD. No.

Mr. MILLER. It may be that I assume too much, and if I have I will be corrected. Mr. Chairman, I think that this is a matter of great importance and one that should not be disposed of by a moment's thought or a moment's discussion. Unfortunately the hour of the day is such that it will not receive the attention from Members of the House to which I think it is entitled.

Mr. FITZGERALD. It is five hours probably before adjournment.

Mr. MILLER. Well, my staying powers are pretty good, and if the gentleman will permit this to be discussed for some time we may get at the bottom of it.

Mr. COOPER. I want to say to the gentleman that if this is insisted on I shall raise the point of no quorum.

Mr. SHERLEY. If what is insisted upon?

Mr. COOPER. If this item goes through.

Mr. SHERLEY. The gentleman from Wisconsin can make any points that he chooses. The committee put this in in good faith and proposes to keep it in if it can.

Mr. STEPHENS of Texas. Will the gentleman from Minnesota permit a suggestion?

Mr. MILLER. I shall be glad to, but I have hardly got started on my point of order.

Mr. STEPHENS of Texas. This paragraph and the next one ought to be considered together.

Mr. MILLER. I am afraid if we start to read the next one we shall lose our rights.

The CHAIRMAN. The paragraphs will have to be disposed of as they are read.

Mr. MILLER. Mr. Chairman, the provision of law upon which the paragraph is stated to be in order is a chapter in the laws of 1902, signed by the President July 1. This is not only a statute, it is vastly more, it is a treaty. This paragraph proposes, Mr. Chairman, to violate a treaty between the United States and the Choctaw and Chickasaw people. It is not simply repealing a law in the interest of economy, but it is violating the solemn compact known as a treaty made by the United States in its sovereign power with the Choctaw and Chickasaw Tribes of Indians in their sovereign power. Therefore, if by invoking the Holman rule, or any other rule of the House, it is in order on an appropriation bill to violate a treaty obligation with the United States, we can here and now revoke every treaty between the United States and Great Britain or France or Russia or any other country. I do not believe there can be any construction of the rule which will permit a violation of the treaty by a paragraph in an appropriation bill. This is one paragraph in a long treaty, and it is not an unimportant treaty. This provision repeals part of a treaty, and in so doing changes existing law.

Mr. BARTLETT. Will the gentleman yield?

Mr. MILLER. Certainly.

Mr. BARTLETT. Will not the gentleman concede the power of Congress to pass a law revoking the treaty?

Mr. MILLER. Most assuredly Congress has the power, but not to do it in an indirect way on an appropriation bill.

Mr. BARTLETT. If it is in order, we can do it on an appropriation bill.

Mr. MILLER. But the point I am making is that it is new legislation, repealing a statute now on the statute books; also repealing a treaty; therefore not in order, because changing existing law.

Mr. BARTLETT. I did not think the gentleman would take the position that we could not do it if it was in order.

Mr. MILLER. No. The point of order I am making is that it is new legislation and not in the interest of economy. There is no reduction or economy mentioned in the paragraph, and it is a change in existing law and in direct violation of treaty obligations.

Aside from the merits of the case, it seems to me that that statement embraces the vital points to be considered. I started to say a few moments ago that this was not an unimportant treaty. It is the most important treaty, except one, ever made between the United States and the Indians in the Southwest. This is a treaty which the United States wanted the Indians to make. The Indians were exceedingly reluctant to make it. The United States were exceedingly anxious to have it made. It contains many features that have proven of the utmost importance in the administration of the Indian affairs in the Five Civilized Tribes. That which to the Indian mind was dearer than dollars and cents, that which appealed to patriotism as they knew it, above that of anything else, was the spot hallowed to them by tradition, by song, by love, and by utility—the sulphur springs of this park. These are in the heart of the great Chickasaw and Choctaw Indian country.

It is the center of Indian lore, the center of Indian tradition. By the terms of this treaty we propose that there shall be a breaking up of tribal governments, of tribal organizations; that there shall be no longer an Indian reservation; there shall no longer be a communal holding of property; that there shall be a segregation of property and the cutting up of land into allotments, that each Indian might have his proportionate share; and the Indian governments cease, as such, to exist.

The CHAIRMAN. The Chair would ask whether or not this particular park is included in the act referred to in the paragraph in volume 32 of Statutes at Large, at page 656?

Mr. MILLER. It is, I will state to the Chairman, and the Chairman will, of course, be immediately advised that this is but a legislative ratification by Congress of a treaty entered into between the United States and these Indian tribes. It is known

as that of July 1, 1902. It was subject to ratification by the Indians, which ratification was made by an election held subsequent to July 1, but it is a treaty. It is the putting upon the statute books, as far as the United States is concerned, ratification of a treaty that had been negotiated between the representatives of the Indians and the United States, and the fact that it appears upon the statute books here is simply the ratification by the United States Congress. The subsequent ratification by the Indians was made by their election held in September of that year. So that is not simply a statute. This is a ratification of a treaty which the United States had made.

Mr. FITZGERALD. But a treaty is a law.

Mr. MILLER. It is more than a law.

Mr. FITZGERALD. Oh, no; it is not.

Mr. MILLER. I beg the gentleman's pardon. It is a law and more than a law. It has in some respects the same standing as the Constitution.

Mr. SHERLEY. Oh, the gentleman is mistaken as to that.

Mr. MILLER. I am not mistaken in that. The treaty is a law, but it is more than a law.

Mr. FITZGERALD. It is just common law.

Mr. SHERLEY. If the gentleman will read the decision of the Supreme Court in the Chinese exclusion cases he will find that that court expressly held that an act passed at a later date than the treaty could and did, if its terms so indicated, abrogate a treaty.

Mr. MILLER. I have great respect for the legal opinion of the gentleman from Kentucky, but I do not accede to that proposition of law.

Mr. SHERLEY. And that proposition I am sure is accurate.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. MILLER. Certainly. I do not care to be understood as saying that Congress can not repudiate a treaty.

Mr. FITZGERALD. It can amend it.

Mr. BARTLETT. And it can repeal it.

Mr. MILLER. But you can not compel the other party to accept it. We repealed the treaty with Russia a little while ago. We can repeal this treaty and take the consequences, but to do so is repealing existing law.

The CHAIRMAN. The Chair will ask the gentleman from Minnesota whether he contends this treaty was not ratified by the Indians?

Mr. MILLER. It was ratified by the Indians.

The CHAIRMAN. Wherein does this violate the treaty?

Mr. MILLER. It is a repealing of one of the important provisions in the treaty, thereby changing a treaty and existing law.

The CHAIRMAN. The Chair would like the gentleman from Minnesota to call his attention to it.

Mr. MILLER. I should be pleased to do it. In the meantime I yield to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, of course the old method of making a treaty with the Indians was under the Constitution. This is no longer a real treaty. Congress does this by act of Congress. If it were a treaty merely, it would be ratified by the Senate.

Mr. COOPER. Mr. Chairman, the Constitution itself makes a treaty a law, declares it shall be nothing but a law.

Mr. MANN. But this is not a treaty under the Constitution.

Mr. MILLER. The gentleman from Illinois very aptly and properly suggests the peculiar characteristics of a treaty between the United States and the Indian tribes.

Mr. MANN. In the old days a treaty between the United States and the Indians was ratified by the Senate as a treaty. Now it is done by an act of Congress as an act of Congress and not as a treaty.

Mr. MILLER. There is that difference. There is no question about that.

Mr. MANN. Of course it has the same effect. An act of Congress is just as binding as a treaty.

Mr. MILLER. Mr. Chairman, I will read to the Chair that portion of the treaty which is contained in paragraph 64, and the part to which I call especial attention begins about the middle of the paragraph.

I will read the first of the paragraph to have it clear before the House:

> The two tribes hereby absolutely and unqualifiedly relinquish, cede, and convey unto the United States a tract or tracts of land at and in the vicinity of the village of Sulphur, in the Chickasaw Nation, of not exceeding 640 acres, to be selected, under the direction of the Secretary of the Interior, within four months after the final ratification of this agreement, and to embrace all the natural springs in and about said village, and so much of Sulphur Creek, Rock Creek, Buckhorn Creek, and the lands adjacent to said natural springs and creeks as may be deemed necessary by the Secretary of the Interior for the proper utilization and control of said springs and waters of said creeks, which lands shall be so selected as to cause the least interference with the contemplated town site at that place consistent with the purposes for which said cession is made, and when selected the ceded lands shall be held, owned, and controlled by the United States absolutely and without restriction, save that no part thereof shall be platted or disposed of for town-site purposes during the existence of the two tribal governments.

That is the language which conveys by the Indians the cession. Mr. Chairman, it is not an act of Congress except to put upon the statute books a treaty. Now, if we should pass this act we have violated a direct obligation. There is no question about it, and a violation of an obligation, of course, incurs a claim.

The CHAIRMAN. Will the gentleman read the proviso on page 656?

Mr. MILLER. I will be glad to do so, but, Mr. Chairman, for the purposes of this discussion I do not consider the proviso of any importance, and I will state my reason——

Mr. SHERLEY. Read it, so the committee will understand it.

Mr. MILLER. The proviso reads as follows:

> *Provided, however,* That nothing contained in this section shall be construed or held to commit the Government of the United States to any expenditure of money upon said lands or the improvements thereof, except as provided herein, it being the intention of this provision that in the future the lands and improvements herein mentioned shall be conveyed by the United States to such Territorial or State organization as may exist at the time when such conveyance is made.

Unquestionably that expresses a hope or a policy that at some time this park and this land shall be conveyed to the State of Oklahoma, but it does not convey it. It does not provide the machinery of conveyance and it does not say when. One of the things that first must be determined before the Government could convey it manifestly is a disposition upon the part of the State of Oklahoma to receive it and we have nothing of that kind before us. We can not convey a title to some one who can not or will not receive it. We might undertake it, but certainly it would not be a very good policy or be very effective, and the next paragraph but one, as well as the next paragraph, makes a confession that the State of Oklahoma does not want it, is not ready for it, will not receive it, because the astounding thing is conveyed here that it is to be put up to auction and sold to the highest bidder, which is in violation of both the letter and the spirit of the treaty. I will say to the gentleman that I think it is not improper that this should be conveyed at some time to the State of Oklahoma, but not until some provision is made by the State to accept it and care for it in accordance with the provisions of the treaty.

Mr. SHERLEY. Mr. Chairman, if the Chair pleases, the question before the Chair is the particular paragraph read, and not what follows after in the bill; neither is there any question as to whether the State will or will not accept the conveyance. The very act to which the gentleman refers contains in it a proviso indicating the right and the intention in pursuance of the very act to make conveyance of this property, and therefore, on the question of it being in order, we maintain that manifestly the act creating it contemplates its conveyance and it was left to the discretion of Congress when to make such conveyance.

Mr. MILLER. Will the gentleman yield?

Mr. SHERLEY. Certainly.

Mr. MILLER. Of course, Congress has the power to convey, but can it be done on an appropriation bill?

Mr. SHERLEY. That is the question here. If it is authorized by law, it can be on an appropriation bill, and that is the whole question at issue.

Mr. NORRIS. Will the gentleman yield there for a question?

Mr. SHERLEY. Certainly.

Mr. NORRIS. Does the gentleman contend that under the proviso as read the land could be conveyed to the State of Oklahoma without legislation by Congress?

Mr. SHERLEY. No.

Mr. NORRIS. Then, if it takes legislation, does it follow that it could be done on an appropriation bill?

Mr. SHERLEY. Money can not be paid out of the Treasury except by an act, but whenever there is an authorization for a particular purpose it is in order on an appropriation bill to make an appropriation.

Mr. NORRIS. This is not an appropriation. Is it not legislation?

Mr. SHERLEY. But it is legislation authorized.

Mr. NORRIS. Of course, it is legislation authorized. We have the right under the Constitution to provide for the building of another public building, but if you put it in an appropriation bill it would be legislation just the same—legislation that Congress could make, but not under an appropriation bill.

Mr. SHERLEY. But the gentleman is mistaken in his premise that legislation is not in order on an appropriation bill.

Legislation that is authorized is in order, and is carried right in this bill in a number of instances in which we are legislating, but we are legislating in accordance with existing law.

Mr. STEPHENS of Texas. I desire to call your attention to one matter in this item of the bill. This land belonged originally to the Choctaw and Chickasaw Tribes of Indians. In 1892 it was determined to allot this land among these Indians individually. The tribes made a treaty with the United States providing for that purpose. That is the treaty and the law referred to in the bill and in the act cited here. That act required these Indians, after the matter had been submitted to them, to ratify it by an affirmative vote before it became a law. That was done, and the treaty became a law. Now I find this language in this bill, viz:

All of the land comprising the Platt National Park in the State of Oklahoma is transferred and title thereto vested in the State of Oklahoma.

That is in the last lines of this paragraph to which we are objecting. How is it possible in an appropriation bill to divest a title out of the United States and vest it in the State of Oklahoma without violating the rule against legislating on an appropriation bill? How would it be possible, without legislation, to force Oklahoma to take a title to this park? Would it not require legislation to do so? This is clearly legislation on an appropriation bill, and this provision is not germane to anything in the bill, and, on both grounds, the point of order should be sustained.

Mr. MILLER. If the gentleman will just permit me to summarize what I was trying in a disconnected way to present to the Chair, I will say that I agree with the gentleman from Kentucky [Mr. SHERLEY] that the proviso in the paragraph contemplates legislation of this character. I agree with the gentleman if legislation of this character had occurred an appropriation would be in order on the bill. But surely it can not be contended that where there is an existing law that simply contemplates future legislation that legislation can be made on an appropriation bill. It must be brought before the House and treated like any other piece of legislation, as such. Now, Mr. Chairman——

Mr. SHERLEY. Will the gentleman permit an inquiry?

Mr. MILLER. Certainly.

Mr. SHERLEY. What rule can he state, of the rules of the House, that prevents legislation on an appropriation bill that is not changing existing law?

Mr. MILLER. This is changing existing law. There may be at some time some legislation on this subject. There may be legislation on a million subjects. There may be legislation conveying this park to the State of Kentucky. There probably will not be, but there might be, and there might be legislation of a thousand different kinds upon a thousand different subjects, but it would not be in order on an appropriation bill.

Mr. SHERLEY. We pass here bills authorizing the doing of a particular thing in the future, just as this act authorizes the conveyance in the future. Now, does the gentleman contend because the existing law that authorized the thing being done did not at that time do it, that therefore it is not in order in an appropriation bill to do it now?

Mr. MILLER. I will ask the gentleman, in reply, this question: Is this provision anything more than an expression of policy that is reserved for the United States to follow?

Mr. SHERLEY. Yes; it is an authorization.

Mr. MILLER. An authorization from whom?

Mr. SHERLEY. An authorization to the Government to convey.

Mr. MILLER. I do not think it is anything more than a policy, and nothing except this: If the United States Government ever does see proper to pass legislation of this character, the Indians will not have a claim against the Government.

The point I desire to make, Mr. Chairman, if I may summarize it in a few words, is this: While that proviso in a few words is a declaration of policy that legislation can subsequently be had and will not create a claim against the Government, yet to do so here is legislation making a change of existing law. It never did authorize specific legislation disposing of the entire subject on an appropriation bill.

Mr. MANN. Mr. Chairman, the rule is:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order.

Now, what is the existing law? Under the existing law the title to this park is in the United States, with an understanding or agreement provided by law that it may transfer the title to the State of Oklahoma. But under the law now existing the title is in the United States. It requires law to change that title; it requires a change of existing law to change that title, because under the existing law the title is in the United States, with authority under the law, which it would have without regard to the law, to transfer the title. But the very purpose of the provision in the bill is to change existing law, putting the title in the United States, and transferring the title to the State of Oklahoma.

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. Certainly.

Mr. FITZGERALD. A transfer of title is not a change of law.

Mr. MANN. It can only be done by law.

Mr. FITZGERALD. The law provides that the title shall either be in the United States or in the State of Oklahoma.

Mr. MANN. The purpose of this paragraph is to change the title by act of Congress. That is law.

Mr. SHERLEY. You change the title to money when you appropriate it.

Mr. MANN. No; you do not change the title to money by an appropriation. You authorize the expenditure of money in the Treasury by an appropriation.

Mr. SHERLEY. You may or you may not. You may actually give the money to the individual.

Mr. MANN. You said it is a transfer.

Mr. COOPER. Mr. Chairman, will the gentleman permit me to ask him a question that has just occurred to me?

The CHAIRMAN. Does the gentleman yield?

Mr. MANN. Certainly.

Mr. COOPER. In order to transfer the title to land, as between private individuals, there must be an acceptance, either actual or constructive, of the deed, or else there will be no transfer of title. Now, as the gentleman has said, the title to this land was acquired by treaty from Indians and is in the Government of the United States, and it is utterly impossible for the Government of the United States to transfer it to the State of Oklahoma unless there be an acceptance by that State.

Mr. MANN. I quite agree with the gentleman that not only is the purpose of this amendment by law to transfer the title, but if enacted it could not transfer the title unless the State of Oklahoma accepts it, because we have not the power to make the State of Oklahoma accept the title.

Mr. CULLOP. May I interrupt the gentleman there?

Mr. MANN. Certainly.

Mr. CULLOP. Is not the situation this, that now by law the title to this property is in the United States, and in order to divest itself of the title it must pass an act authorizing it to be done?

Mr. MANN. I think that is right.

Mr. CULLOP. And if a Government official should attempt to convey this property without such an act passed by Congress the conveyance would be absolutely void.

Mr. MANN. We have no method that I know of of transferring title to anything except under and in accordance with the provisions of law, either between individuals or between governments.

Mr. SHERLEY. That is true; but it is equally true with respect to any money in the Treasury, and we transfer title to it by an appropriation.

Mr. MANN. We do not transfer the title to the money. We authorize the expenditure of the money.

Mr. SHERLEY. We do more——

Mr. MANN. That is an appropriation. It has always been construed that this provision of the rule with reference to changing law does not affect the question of appropriation. Now, the very purpose of this provision is to change the existing law. There can be no other purpose in it. I wish it were in order. I should like to see the title transferred to the State of Oklahoma, but I do not think it worth while to violate the rules in order to do it.

Mr. COOPER. Mr. Chairman, I desire to say just a word on this. If this provision is enacted into law, it will be an absolute nullity taken alone, because the mere executing of a deed by a grantor does not transfer the title to the grantee. To transfer title requires acceptance, either actual or constructive, by the grantee. In this case there is no acceptance nor any offer to accept.

Mr. SHERLEY. Will the gentleman permit a question?

Mr. COOPER. Please first permit me to finish what I am saying. Here is an attempt by the Government of the United States, the owner of real estate, to transfer title to the State of Oklahoma. The language of the paragraph is—

The title is hereby transferred and vested in the State of Oklahoma.

But the title would not be transferred to nor vested in the State of Oklahoma by merely enacting this paragraph into law. In other words, standing alone and by itself it would accom-

plish absolutely nothing. Therefore we must consider it in conjunction with the next paragraph—as impliedly a part of it—and then it is clearly subject to a point of order.

Mr. SHERLEY. If the gentleman will allow me, is he not confusing the wisdom and the effectiveness of the provision with the parliamentary question? The Chair is not concerned as to whether you are making a good conveyance or not, so far as the point of order is concerned. That may come properly when you consider the merits.

Mr. COOPER. Mr. Chairman, I am simply saying that if nothing is to be done except enact the pending paragraph into law, then nothing will be done. On its face the paragraph is without meaning. There is no way in which the Government of the United States can force this title by this statute upon the State of Oklahoma. The State of Oklahoma has never agreed to accept it, and this paragraph, if made a law by Congress, would be a mere brutum fulmen.

Mr. HAMILTON of Michigan. Perhaps the gentleman from Wisconsin can remove the difficulties that I have in putting a construction on what he is saying. Take the case of the creation of a State out of a Territory. There is a large amount of public lands in the Territory. The Government conveys and gives to the State about to be created out of the Territory a large area of land.

Mr. MANN. We give the title because we have the power to create the State.

Mr. COOPER. The Government has all the title there is.

Mr. HAMILTON of Michigan. We pass an enabling act by virtue of which the Territory may become a State. The gentleman says there must be an acceptance. I have been wondering what must be the equivalent of an acceptance.

Mr. COOPER. It has not been the practice to take the title from an Indian tribe and then by statute arbitrarily give the title to the State, without something from the State in the way of an acceptance.

Mr. HAMILTON of Michigan. I am inclined to agree with the gentleman as to that, but the broad proposition which the gentleman laid down about a conveyance by the Government of public lands, and the suggestion that it could not be done without some acceptance by the State grantee or the Territorial grantee, raised the question in my mind as to what acceptance, constructive or otherwise, there might be in the case suggested.

Mr. MANN. I think the gentleman has in his mind the creation of a State out of a Territory. We create the State, and when we transfer to the State the title to school sections or other land, that is an act of Congress vesting title in the State, because the State is our creature.

Mr. HAMILTON of Michigan. Oh, no.

Mr. MANN. Under the Constitution it is.

Mr. COOPER. But the Territory does not become a State without a ratification by it of the enabling act and the acceptance of the conditions imposed in it.

Mr. HAMILTON of Michigan. We have set aside reservations and given them to a State without any acceptance, express or implied, by the State, as I recall it.

Mr. COOPER. That may be very true, but there was an acceptance afterwards which conveyed the title. What I am saying is that this individual paragraph by itself, if enacted into law, would not convey the title to Oklahoma.

The CHAIRMAN. It seems to the Chair that the point in this case is whether the paragraph changes existing law. The law is not, in the opinion of the Chair, changed by the paragraph. It simply conveys the title, which Congress has the power to do under the law cited in the paragraph, and therefore the Chair overrules the point of order.

Mr. MILLER. Mr. Chairman, I move to strike out the paragraph, and I desire to say a few words on the merits of the proposition. While the Platt National Park is not the most important spot, it is one of the most important spots on the American Continent. I am astonished that the gentlemen should bring in this proposition in the sundry civil bill. I do not care to criticize so great and important a committee, composed of such magnificent Members of the House as it is, and yet I can not but feel that they have usurped their jurisdiction in a very material way. If there is to be considered by this House legislation transferring this park, it should come from the Indian Committee of the House, and yet I will waive that.

Mr. FITZGERALD. What jurisdiction has the Indian Committee over the national parks?

Mr. MILLER. No more jurisdiction over them than the Committee on Appropriations has over this paragraph just read.

Mr. FITZGERALD. But the Chair has held it in order, which demonstrates that it has jurisdiction.

Mr. MILLER. If we are going to proceed on the merits of the case of transferring it from the Government to the State of Oklahoma, it is a question that the Indian Committee should handle. As far as the appropriations are concerned for these parks, while they belong to the United States, that is a matter entirely within the jurisdiction of the Committee on Appropriations.

Mr. FITZGERALD. But that jurisdiction was invaded last year by the Committee on Indian Affairs.

Mr. MILLER. We did not make any appropriation.

Mr. FITZGERALD. The Indian appropriation bill carried an appropriation for a sewer.

Mr. MILLER. But that was in connection with an Indian matter.

Mr. FITZGERALD. Not at all.

Mr. MILLER. The gentleman will understand that there are two phases to that question. I do not think we can conserve any good purpose, however, by quibbling about the details. I want to call the attention of the House to the circumstances surrounding this Platt National Park. It is only 640 acres, but it is 640 acres of the most picturesque, the most healthful, the most interesting, the most delightful, the most valuable spot in the entire Southwest. It cost us to purchase it a round million dollars. We now propose to give it away to somebody who does not want to take it because they are not in a position to handle it. Are we to transfer the title to property for which we paid a great sum of money to somebody or anybody, whether they will take it or not?

Now, the point I would like to have the gentlemen of the House understand with reference to this property is that it is not a park in the general sense of the term, for the pleasure and beauty of its scenery, and so on; it is a famed spot of the Southwest, having the greatest mineral springs, probably, on the American Continent. The sulphur springs of French Lick are of minor consequence in importance and value to the sulphur springs at this spot.

Mr. MANN. The State ought to be glad to get them.

Mr. MILLER. That is so if we turned them over at the right time. In addition the bromide springs have been pronounced by medical and expert scientists to be the finest on earth. The value of these springs is a thousandfold greater than all the other parks, so far as I know, notwithstanding their beautiful scenery, to the American people and the United States. I will agree that the United States Government can well afford to transfer this park to the State of Oklahoma if Oklahoma were in a condition and ready to receive and care for it.

Why, Mr. Chairman, we hear vastly about conservation. Gentlemen are so concerned in conservation that if a poor homesteader wants to get 160 acres on a desert or in the woods we try to circumscribe him by rules and laws that make his life a hardship, and I have heard gentlemen speak of such a one here as almost to call him a pirate and a thief, because he was presuming to get some of Uncle Sam's property. Here you propose to turn around and give away this most valuable possession.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER. Mr. Chairman, I would like a little more time. I ask for five minutes.

The CHAIRMAN. The gentleman from Minnesota asks that his time be extended five minutes. Is there objection?

There was no objection.

Mr. MILLER. If conservation means anything, it means keeping to the Government that which belongs to the Government if it be of commercial or property value. I maintain that the sulphur springs and the bromide springs in this park are commercially valuable beyond any similar property in the United States. Mr. Chairman, if the Government cared to do it, wanted to do it, and could, it might go into the business of bottling up water from this spring and selling it at every drug store and on every train in America, and getting a large revenue from it.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MILLER. Certainly.

Mr. MOORE of Pennsylvania. Will the gentleman tell us why we are asked to dispose of the property? Is there any reason for it?

Mr. MILLER. Mr. Chairman, I have never heard any reason given excepting an indisposition on the part of some of the Members of the House, and perhaps of the Senate also, to bear the burden of maintaining it at present.

Mr. MOORE of Pennsylvania. How much is the burden of maintenance?

Mr. MILLER. I do not know. The chairman of the committee can tell us in a word. There is maintained there at

present a keeper, and I think an assistant or two—probably a very few thousand dollars.

Mr. MANN. Eight thousand dollars for this year.

Mr. MILLER. Eight thousand dollars for this year—an insignificant sum. I want to say one word further in respect to this. Gentlemen know full well that the State of Oklahoma can not and will not accept title to this property at the present time.

Mr. HAMILTON of Michigan. Will the gentleman state why not?

Mr. MILLER. How can the State of Oklahoma have machinery arranged at the present time to forthwith take this? She might be willing to do it if you gave time for a commission to be appointed and proper proceedings to be taken, but forthwith to throw into her lap a park like this without any machinery on her part to take care of it——

Mr. HAMILTON of Michigan. Is not her lap large enough and receptive enough to take a million dollars' worth of property?

Mr. MILLER. If it was immediately remunerative, perhaps it would be.

Mr. HAMILTON of Michigan. But the gentleman suggests something about constructing hotels and resorts in that vicinity.

Mr. MILLER. But it takes time and costs money to build them.

Mr. HAMILTON of Michigan. But it would be forthcoming.

Mr. SAMUEL W. SMITH. If it is so valuable, why does not the Government sell it to somebody?

Mr. MILLER. In the first place, it would be a direct violation of the treaty. My observation is that these springs, to be made valuable, ought to be in the possession of the United States, and they should be handled so that the people of the country can enjoy them and get the beneficial results of them, or else they should be sold to private individuals for proper handling. I understand it has been proposed to construct a sanitarium at this place. The climate is healthful, it is much cooler than the surrounding portions of the Southwest on account of its elevation and the general direction of the wind, and the wind blows hard down there. It has a salubrious climate, and it is a delightful spot. It would make an ideal spot for convalescing patients, such as our soldiers who come from service in the Tropics, and I understand it has been seriously contemplated to establish a sanitarium at this place by the Government for such convalescing patients. I do not urge or ask for that. I am simply stating that that was one of the ways in which it was thought at one time or another this might be used.

But apart and aside from that, it seems to me incredible that gentlemen would propose here to hurl chunks of ice upon the most cherished and loved object of two of the greatest Indian tribes in the United States. We begged of these Indians to make this treaty of 1902. We got on our knees and supplicated them to do it. We went further, we bribed them to do it, and I will not take back the words. One of the things that they tenaciously clung to was this spot, that has been hallowed by their ancestors, that is dear to them on account of its traditions, that is valuable to them on account of its health-giving properties, and it was agreed that this must be preserved in their midst, in order that their children and their children's children might have the benefits of it, and they made us agree that the United States Government shall maintain this spot for that purpose in their midst, sacred and reserved, or that it shall be turned over to the State of Oklahoma, which in turn shall carry on the same work.

Mr. SAMUEL W. SMITH. The gentleman says that it would be a violation of the treaty to sell it. Would it be a violation of the treaty to give it away?

Mr. MILLER. I have tried to so convince the Chair, but was not successful. I sincerely trust that gentlemen will not oppose this amendment. I am serious about this. I will say that if this will receive careful consideration I think there will be no objection on any side to effectuating the object so desired, but it can only be done after a careful investigation and after a conference with the State of Oklahoma, its officials, and provision made by the State of Oklahoma to accept it.

Mr. NYE. I understand it is conceded here that the title to this park property is in the United States Government?

Mr. MILLER. That is true.

Mr. NYE. Now, there is a recitation in the act which my colleague read that it is the intent hereafter to convey to Oklahoma.

Mr. MILLER. Well——

Mr. NYE. Does that create any obligation on Oklahoma, or have we any right to compel conveyance?

Mr. MILLER. I will say to my colleague it simply is an expression of policy that the United States Government shall convey it at some future time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. Mr. Chairman, there are in this alleged national park about 800 acres. The gentleman from Minnesota says it is one of the most desirable places in the Southwest. For some people it is a very remunerative gold mine. It contains certain so-called mineral springs. According to those living in the town of Sulphur Springs, drawing a livelihood from the sick and infirm, these springs have medicinal properties; the waters will cure every ill to which man is heir. Three years ago residents, physicians from the town of Sulphur Springs, appeared before the Committee on Appropriations and described the marvelous properties of these springs; that a woman 80 years of age, having used crutches for 20 years, came to Sulphur Springs one evening, went to the spring, took a draft of water, and the next morning leaped into an automobile and rode away. Persons suffering from insomnia, unable even to take a nap upon a train, however fatigued they might be from travel, would go to Sulphur Springs, take one or two drafts of water, and then fall into sweet and sound slumber from which not even the trumpet of Gabriel would awaken them. It made no difference what the person was afflicted with, one or two drafts of these sulphur waters, as set out in the prospectuses of the residents of Sulphur Springs who are maintaining sanitariums there, would put a person in most perfect health. The fountain of perpetual youth has at last been found, according to these assertions, and those who journey to Sulphur Springs can live on indefinitely. There is a stream running through——

Mr. HAMILTON of Michigan. Are there any graveyards in that vicinity at all?

Mr. FITZGERALD. There are not any graveyards; nobody ever dies who drinks the bromides or sulphur waters of those springs.

A stream of water runs through these 840 acres of land, and the town of Sulphur Springs is located on its borders. Its inhabitants, formerly having their homes within the park and having them bought by the Government under a permit from the Department of the Interior, take water free of cost from this stream and sell it to the people of Sulphur Springs.

The town has emptied its sewage into this so-called national park, and after failing for years to obtain funds from the Committee on Appropriations with which to build a sewer through the park, the Committee on Indian Affairs, in the Indian appropriation act for the current year, carried an appropriation of $17,500 to defray half the cost of building a sewer through this national park for the disposition of the sewage of the town of Sulphur Springs. It now appears, however, that if this sewer is built the Government will find, when it reaches the boundary of the park, that some private individual owns the property on the other side of the line and is insisting that if any attempt is made to build this sewer and empty this filth upon his land he will appeal to the court to protect him against the defamation that will result. Hence it is now asserted that, having arranged to have the Government pay $17,500 for the purpose of paying half the cost of building this sewer, the Government must appropriate about $35,000 to provide septic tanks into which this sewage may be emptied, because it will be——

Mr. MILLER. Will the gentleman yield? As I recall, the gentleman stated a few moments ago the Committee on Indian Affairs assumed jurisdiction of this and appropriated——

Mr. FITZGERALD. Well, it did; it assented to the Senate amendment, which appropriated $17,500 as half the cost of building this sewer.

Mr. MILLER. I will ask the gentleman if that amendment was not offered on the floor of the House when the Indian appropriation bill was up? The Indian Committee never assumed jurisdiction.

Mr. FITZGERALD. If the gentleman had resisted the amendment, it would not have been adopted. But in view of the fact that one of these gentlemen was a Representative from the State of Oklahoma, it is apparent how little chance the House had to be represented as it should have been.

Now, here is the situation. They are taking water that belongs to the United States and making a profit out of it. They are asking the United States to defray the cost of their sewage system. The town is existing on the profit it makes out of the advertisement of these waters and the accommodations of persons coming to be benefited by them.

The CHAIRMAN. The time of the gentleman from New York [Mr. FITZGERALD] has expired.

Mr. FITZGERALD. Mr. Chairman, I ask unanimous consent that my time be extended two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FITZGERALD. In no sense whatever is this a national park, and the committee believed it should be turned over to the State. It was induced to do this because another situation developed. We have the Hot Springs in Arkansas. Great expenditures have been made there, and this year the committee was asked to appropriate $642,000, most of it to provide ample sewage facilities for the town, and the balance to erect new bathhouses to be conducted by the Government. The committee believed that when these sulphur springs are so extensively advertised and developed as the Hot Springs in Arkansas have been, it is most desirable that the United States should as quickly as possible be relieved from the obligation of maintaining these health sanitariums.

Mr. STEPHENS of Texas. Will the gentleman yield?

Mr. FITZGERALD. I yield.

Mr. STEPHENS of Texas. Is it not a fact that the United States has been paying more than half—in fact, all—for the building of the sewer system in the city of Hot Springs, Ark.?

Mr. FITZGERALD. Oh, there is a different system there entirely. They have been appropriating the revenues, which I think amount to about $40,000 a year.

Mr. STEPHENS of Texas. Are we not paying half the expenses of the sewage system of this city?

Mr. SHERLEY. And that is because the sewerage was on Government property, but here we are asked to take care of the sewerage of a town off the reservation.

Mr. FITZGERALD. And contributing this park, without any resultant benefit to the Government or to the park. In 1909 Congress appropriated $14,000 to construct this sewer, and it was utilized for some other purpose.

Mr. NYE. Will the gentleman yield for a question?

Mr. FITZGERALD. I yield to the gentleman.

Mr. NYE. Does the gentleman consider it a pressing necessity for the Government to get rid of this?

Mr. FITZGERALD. I do. The more quickly the Government gets rid of this the better it will be for it.

Mr. NYE. Why was it so anxious to get this from the Indians?

Mr. FITZGERALD. It was not anxious to get it. I served six years on the Committee on Indian Affairs, and I know something about the way in which Indian treaties were formerly negotiated and the way in which they were ratified by Congress. Very frequently the Government was put in the attitude of seeking to obtain certain concessions from the Indians that everybody who had any information about resisted, and knew would be very detrimental to the Government.

Mr. MILLER. Does the gentleman from New York think it would be better procedure and better business to defer this proposed transfer until the State of Oklahoma has manifested its capacity and willingness to accept it?

Mr. FITZGERALD. There is no indication and no evidence that the State of Oklahoma will not take this park. It has taken everything else it could separate the United States Government from in the way of lands and money. And I can not assume that it will refuse public lands or public moneys when tendered to it by the Government.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. MILLER. Mr. Chairman, I ask unanimous consent that the gentleman have two minutes more, so that I may ask him a question.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MILLER. Is there any way by which the State of Oklahoma could accept a title to this, other than by act of its legislature?

Mr. FITZGERALD. None. It is not customary for either States or individuals to accept gifts before they are tendered to them. We propose to tender the gift, and we feel quite certain the State will not only accept it, but will leap at the opportunity to take it.

Mr. MILLER. Can the gentleman advise the House when the Legislature of the State of Oklahoma will next be in session?

Mr. FITZGERALD. No.

Mr. MILLER. Will it not be two years?

Mr. FITZGERALD. The people will have plenty of time to consider this proposal and investigate the wonderful merits of the springs and the remarkable value of the property.

Mr. MILLER. Where is it proposed that the title of this property will be floating in the ensuing two years, pending the action of the State of Oklahoma? Would it go ad coelum—to the heavens?

Mr. FITZGERALD. I will state to the gentleman that that question need not be troublesome, even if the Legislature of the State of Oklahoma is not now in session.

Mr. STEPHENS of Texas. Mr. Chairman, I desire to state that, in my judgment, the motion of the gentleman from Minnesota should prevail.

I do not think this House should incorporate in this bill a provision vesting the title of the Platt National Park in the State of Oklahoma, and at the same time divesting the Government of the United States of the title to this park, investing the State of Oklahoma with it, without the knowledge or consent of the State of Oklahoma. The Representatives of the State of Oklahoma were present last year when this matter was under discussion, and——

Mr. KENDALL. It now seems to be the purpose of the Committee on Appropriations, in passing this park on to the State of Oklahoma, to do it in the absence of the Oklahoma Representatives.

Mr. STEPHENS of Texas. That seems to be true.

Mr. FITZGERALD. But, Mr. Chairman, we can not postpone the consideration of this bill to suit the convenience of Members of Congress. This is public business.

Mr. STEPHENS of Texas. Would it not be necessary to get the consent of the State of Oklahoma before giving the State this park? How do we know that they will accept it?

Mr. FITZGERALD. I think it would be advisable to get it.

Mr. STEPHENS of Texas. This provision forces the State of Oklahoma into an awkward position, and I hope, therefore, that the amendment of the gentleman from Minnesota will be adopted and this unjust provision stricken from the bill.

Mr. Chairman, by act of Congress and with the approval of the Indians this land became the land of the National Government, to be used for the purposes of a public park. It was found to be a very valuable health resort, and many people from the whole southwestern country visited this place to use its mineral waters. The State of Oklahoma is not able to take care of that park as it should be cared for, for the reason that nearly all the land in the territory of the old Five Civilized Tribes is nontaxable. Under a recent decision of the Supreme Court it is declared that not one cent of tax can be collected on much of that land. The State has to build, and is building to the best of its ability, courthouses and jails and schoolhouses and a capitol building. That State is new and in debt, and it has not the money to take care of this national-park burden. Under the present circumstances I am certain it would be impossible for this State to take on this additional burden. The United States now has this property and obtained it under an agreement and solemn treaty with the Indians to maintain it as a national park. Therefore I think that the Government should hold this park until some legislation could be passed that would be satisfactory to the town of Sulphur and the State of Oklahoma. Their Congressmen should be heard on this floor on this important subject before we act.

Mr. SHERLEY. Mr. Chairman, there is some reason why we should proceed with some rapidity in the disposal of this park, and that is we had a somewhat bitter lesson taught us last year on the Indian appropriation bill as to what it will cost to keep it. If it means that we have to construct for the benefit of the municipality of Sulphur a sewerage system because that town is unable or unwilling to perform the duties of a municipality, we should understand that fact and act accordingly.

There has been before the Committee on Appropriations ever since I have been a member of that committee a proposal to get this sewerage system there. It never got any farther than a proposal with either the Democrats or Republicans in that committee, because in my judgment and in the judgment of everybody else that considered it, it had no equity under the sun. And yet all of a sudden it turned up as an amendment to the Indian appropriation bill, put on in the Senate and agreed to by the House conferees.

If this park, under the present circumstances attending the consideration of that bill, is to have constant appropriations made in the Indian appropriation bill, I think we had better get rid of it in some sort or other in a hurry. There is no reason in the world why the treaty with the Indians should not be carried out. The very terms of that treaty, the very terms by which it became in order on this bill to propose this provision, contemplates the giving of that park to the State of Oklahoma.

I hear a great deal of talk on this side of the House about State rights, but I hear precious little about State duties. They are always willing to talk about State rights when they want to prevent something being done, but they are never willing to assume the obligations of State sovereignty. It is a poor rule that does not work both ways. We should give this park to the State of Oklahoma, and if the people of that State have not enough State pride to take it, we ought to be informed of that fact. It ought not to be made the excuse for getting money out of the Treasury of the United States to take care of the municipality of Sulphur.

The CHAIRMAN. The question is on the amendment proposed by the gentleman from Minnesota [Mr. MILLER].

The question was taken; and on a division (demanded by Mr. MILLER) there were—ayes 8, noes 35.

Accordingly the amendment was rejected.

The Clerk read as follows:

If the State of Oklahoma shall fail or refuse to accept the Platt National Park as herein authorized to be conveyed to it from the United States, the same shall be appraised and sold either by sealed proposals for the purchase of the same or by public auction, after advertisement of the sale for such time as in the judgment of the Secretary of the Interior the public interest may require, the proceeds of such sale, after payment therefrom of the expenses of making the same, to be covered into the Treasury as miscellaneous receipts.

Mr. MILLER. I make a point of order against the paragraph as a change in existing law; and if gentlemen have not forgotten the arguments they made in resisting the point of order to the preceding paragraph, I apprehend they will have to concede that this point of order is well taken.

The CHAIRMAN. Does the gentleman from New York care to be heard on the point of order?

Mr. FITZGERALD. I do not.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

The appropriation of $17,500, made in the Indian appropriation act for the fiscal year 1913, for construction of a sanitary sewer system in Platt National Park, Okla., to be expended under the direction of the Secretary of the Interior, is repealed.

Mr. MILLER. I make the point of order against that paragraph as a change of existing law.

Mr. MANN. Is not this good under the Holman rule?

Mr. MILLER. No; this is not to decrease the amount of the bill. This is changing the appropriation of a year ago.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MANN. Just a moment. I believe it is admitted that the Committee on Appropriations has jurisdiction over this park and over appropriations made for the maintenance of the park, and would have jurisdiction over the appropriations for a sewer in the park. Now, the provision of the Holman rule is:

Provided, That it shall be in order further to amend such bill upon the report of the committee or any joint commission authorized by law or the House members of any such commission having jurisdiction of the subject matter of such amendment, which amendment, being germane to the subject matter of the bill, shall retrench expenditures.

The CHAIRMAN. Does the gentleman maintain that the Committee on Appropriations has jurisdiction to legislate on the subject of sewers through a park?

Mr. MANN. Undoubtedly. The Committee on Appropriations has jurisdiction over all the expenditures in the national parks.

Mr. FITZGERALD. Oh, yes; this appropriation belongs to the Committee on Appropriations.

Mr. SHERLEY. There are any number of items in this very bill in regard to things of that kind.

Mr. MILLER. The gentleman has just said this is a sewer, not in the park, but in the city of Sulphur.

Mr. SHERLEY. Oh, no; it is in the park.

Mr. MANN. It is a city sewer through the park for the benefit of the city of Sulphur.

Mr. MILLER. I do not agree with the gentleman's conclusions.

Mr. MANN. It is a sewer through the park, no matter for whose benefit it may be.

Mr. STEPHENS of Texas. It was necessary that the sewer pass through the park.

Mr. MANN. Whatever the reason was, it was a sewer through the park. Now, the Committee on Appropriations is the only committee of the House that has jurisdiction over appropriations for the maintenance of national parks; and while it is true that this item slipped into the Indian appropriation bill by way of a Senate amendment, that does not change the jurisdiction of the House committees. So that it is within the jurisdiction of the Appropriations Committee in reference to appropriations for sewers, that the committee having jurisdiction has reported this item in the bill which does retrench expenditures.

Mr. STEPHENS of Texas. This is a repeal of the act of last year, and I desire to call attention to the hearing before the committee having this matter in charge, in reference to the $17,500 for the sewer in the city of Sulphur. Mr. Ucker, who was before the Committee on Appropriations, said:

In the Indian appropriation bill last year Congress appropriated $17,500 for a sewer when the city should raise a like amount. The city raised the money and deposited it with the disbursing officer of the department and he covered it into the Treasury, so that there is $35,000 available for this sewer.

This act has been carried out in part. I think this item is clearly subject to the point of order.

The CHAIRMAN. The Chair is ready to rule. The gentleman from Illinois makes the point that this is in order under the Holman rule. The Chair will call the attention of the gentleman to the provision which he read. It does not apply to the bill. It applies to the power to amend the bill.

Mr. MANN. I did not discuss that part of the matter because it has been ruled several times by Chairmen on this same subject that that provision covered the item in the bill where the committee reporting the bill had jurisdiction of the subject matter. In other words, if this should be stricken out on the point of order now, and the Committee on Appropriations should immediately offer the item again and it should be held in order, the Chair will readily see that that would be a work of supererogation, and so the various Chairmen in the last few years have ruled that if the Committee on Appropriations, or the Committee on Military Affairs, or any other committee, had jurisdiction of the matter covered by the item in the bill as reported, they would have the same authority in that way as they would have by offering an amendment on the floor.

The CHAIRMAN. It does not seem to the Chair that the Committee on Appropriations has jurisdiction over this subject matter, and therefore the Chair sustains the point of order.

Mr. FITZGERALD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 118, after line 22, insert the following:

"The appropriation of $17,500, made in the Indian appropriation act for the fiscal year 1913, for construction of a sanitary sewer system in Platt National Park, Okla., to be expended under the direction of the Secretary of the Interior, is repealed."

Mr. MILLER. I make a point of order against it. The amendment read is in the identical language, word for word, as the item that went out on the point of order.

Mr. FITZGERALD. I did not catch the ground on which the Chair sustained the point of order. Do I understand the Chair sustained the point of order on the ground that the committee had no jurisdiction?

The CHAIRMAN. The Chair stated that, in his opinion, the committee had no jurisdiction to enact this legislation. It is legislation, and I do not suppose the gentleman will deny that it is. It is repealing a law, which it does not seem to the Chair that the committee has jurisdiction to do.

Mr. FITZGERALD. In order that there may be no confusion in the future, I wanted the Chair to state his ruling. The committee has jurisdiction of the items for the park, but the Chair puts his ruling on the ground that it has no jurisdiction to repeal the statute.

The CHAIRMAN. The gentleman is, of course, familiar with that portion of the rule dealing with change of existing law. It has been held that even for the Committee on Appropriations to construe a law is not in order, and certainly it can not be in order for the committee to repeal the law already enacted. The Chair sustains the point of order.

The Clerk read as follows:

HOWARD UNIVERSITY.

For maintenance of the Howard University, to be used in payment of part of the salaries of the officers, professors, teachers, and other regular employees of the university, and for ice and stationery, the balance of which shall be paid from donations and other sources, of which sum not less than $1,500 shall be used for normal instruction, $60,000.

Mr. MADDEN. Mr. Chairman, I move to amend the item by striking out the figures "$60,000" and inserting the figures "$69,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 119, line 4, strike out the figures "$60,000," at the end of the line, and insert in lieu thereof the figures "$69,000."

Mr. MADDEN. Mr. Chairman, there was an estimate made of $9,025 for additions to the teaching force in Howard University which was not allowed by the committee. The item reads as follows:

Assistant, English	$600
Assistant, mathematics	750
Assistant, chemistry	600

Two assistants, at $300	$600
English teacher	1,000
History teacher	1,500
Instructor in English	500
Latin and French	600
Geography	600
Instructor in bookkeeping	500
Head of Clark Hall	1,000
Cashier	250
Music	525
Total	9,025

No part of this estimate has been allowed. The enrollment is 1,409, and 85 per cent of those are in actual attendance the whole year round. The enormous amount of work which the university is to-day doing can not be done with its present staff, and it seems to me that if we are going to maintain this institution it ought to be maintained at the highest possible standard. [Applause.]

It ought not to be maintained in such a way as to prevent it from doing the work which it was intended it should do. It is doing a first-class work. It is turning out men who are useful citizens of America. They are factors in the communities to which they go after they have received their education here, and the Congress of the United States should encourage in every way within its power the development of the institution and give to those who attend the institution the highest opportunities within its powers to receive the kind of education they ought to receive. The failure to appropriate is a source of great embarrassment to the institution, and I sincerely hope that the committee will agree to the adoption of this amendment.

Mr. COOPER. Mr. Chairman, I would like to ask the gentleman from New York a question. I observe that there is no appropriation relating to Howard University for a new building.

Mr. FITZGERALD. My recollection is they requested a new building.

Mr. COOPER. I was about to ask the gentleman from New York if there was not an urgent appeal for a new building?

Mr. FITZGERALD. There was a request made, as I recall, for a new assembly hall, but the committee did not feel justified in recommending it.

Mr. COOPER. I regret that nothing of the kind has been inserted in the bill, because I have information upon which I rely from competent judges that there is a very great need for a new building.

Mr. FITZGERALD. Mr. Chairman, the committee considered very carefully the request made for this additional money for the teaching force and concluded not to recommend it. In 10 years the appropriations for the teaching have been doubled by Congress. Appropriations are purely gratuitous. I believe this institution is doing a very good work. I was quite instrumental a few years ago in obtaining an appropriation for an additional building known as science hall, but I believe that the appropriation recommended is adequate to enable the institution to continue its development. I have no doubt that from time to time as the necessity becomes greater Congress will give to the institution such sums as will be necessitated by the development of the work. Upon consideration of the request and from a knowledge of the conditions that existed the committee believes that $60,000 will be sufficient, together with the small additional sum available from the endowment, to adequately maintain the teaching force. There is no hostility to the institution. I think everybody feels friendly toward it and is anxious to have it maintained in proper shape.

Mr. MADDEN. Does not the gentleman think that a reduction of estimates from $69,000 to $60,000 is a source of embarrassment to the institution, and does take away the degree of efficiency which should be maintained there?

Mr. FITZGERALD. Not necessarily. Congress has rarely appropriated the amount requested for this purpose.

Mr. SHERLEY. The maximum amount that has ever been appropriated since 1903 is $60,000.

Mr. MADDEN. But after all, the gentleman from Kentucky and the gentleman from New York will not deny the fact that the institution is growing.

Mr. FITZGERALD. I think that it is not growing in numbers of students. I think it is at its capacity now.

Mr. SHERLEY. Mr. Chairman, I think this, and I am perfectly frank in saying to the gentleman that I believe the Congress of the United States can not afford to do other than be fair and liberal with Howard University. Yet I believe that its growth and increase has been infinitely greater in the way of income and appropriations than, for instance, the University of Virginia, where I went and received my education, which institution has been miserably poor and has struggled from year to year, although one of the greatest universities in America. I do think the committee has been liberal in its treatment of the university. There certainly has been no attempt on the part of any of us to discriminate in any degree.

Mr. MADDEN. I have not any doubt but that the committee recommended what was its best judgment. I have given some consideration to this question and have made some considerable investigations as to the needs of the institution. I am sincere in my suggestion that there surely ought to be something more than $60,000 appropriated in this bill, and I hope the committee will do what seems to me to be justice in this case.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. MADDEN) there were—ayes 10, noes 21.

So the amendment was rejected.

Mr. KENDALL. Mr. Chairman, I offer the amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Amend by inserting as a new paragraph, after line 4, page 119, the following:

"For assembly hall for use of university, $75,000."

Mr. FITZGERALD. Mr. Chairman, on that I reserve the point of order. Does the gentleman desire five minutes to discuss it?

Mr. KENDALL. Yes; to discuss the amendment.

Mr. FITZGERALD. I intend to make the point of order.

The CHAIRMAN. Does the gentleman from New York reserve the point of order?

Mr FITZGERALD. I will reserve the point of order.

Mr. KENDALL. I desire to be heard briefly upon the amendment I have offered for the construction of an assembly hall at Howard University. It may possibly be the purpose of the committee to reject the proposition, as it did last year when it was advanced by the gentleman from Illinois [Mr. CANNON], but I impose upon the indulgence of the House to submit a suggestion or two which ought to be accorded serious consideration.

Mr. Chairman, I am persuaded that very few Members on this floor and, indeed, very few people in the country have any proper appreciation of the magnitude or the importance of the work that is being prosecuted at Howard University. The institution has invested in real estate, buildings, and equipment $1,300,000. It has annual revenues approximating $180,000, with annual disbursements aggregating the same amount. It has a faculty consisting of 132 professors and teachers, with an enrollment of 1,500 young men and young women, attracted from all sections of the country. It presents a curriculum as suitable and as comprehensive as that of any university in the country. Since its establishment in 1867 it has conferred diplomas upon about 4,000 graduates, who are now resident in every section of the United States, exerting an influence that can not be overestimated for the enlightenment, the education, the elevation of the colored race. Now, Mr. Chairman, what I have proposed here is the erection of an assembly hall for this institution. The Interior Department recommended this auditorium and submitted an estimate to the Committee on Appropriations. I quote now from page 540 of the Book of Estimates:

The only assembly hall of the university, with 1,500 students, is Rankin Memorial Chapel, which seats only 600. The increase in collegiate, academic, and industrial students so crowded the chapel last year that a large body of students could not be seated, interfering with the best discipline and order. There is no assembly hall for seating the people on special occasions, although Howard University is becoming more and more the center for the broader education of an entire race in educational, civic, and moral life. A plain and commodious assembly hall can be built in the natural amphitheater on the west side of the campus at moderate cost. The board of trustees regard the proposed building as indispensable.

That was the report that was submitted to the Committee on Appropriations by the Department of the Interior. Dr. Newman, the distinguished president; Prof. Parks, the excellent treasurer; and Prof. Cook, the efficient secretary of the university, all appeared and were examined as to the imperative necessity for the construction of this building. I quote from page 845 of the hearings:

The CHAIRMAN. The next item is for an assembly hall for university uses, $75,000.

Dr. NEWMAN. That is an item which is greatly needed because of the fact that the assembly of the students is the only place where we handle them for general purposes of conduct, admonition, rebuke, etc. The general officers of the university, of course, can not do that in the classroom, and at present we can only get about 600 of our students into our chapel, or a little over that; and where it is necessary to speak to them, as the secretary and I have to do constantly, about general conduct, we can not handle the whole body, and you know how, in a body of students, things grow unless they are corrected on the instant; consequently a large hall is deemed by the trustees absolutely necessary.

The CHAIRMAN. What kind of a building is this to be? Have you any plans or designs to submit? Who made this estimate?

Mr. COOK. The estimate was first made last year by the former president. He had some plans and was very well advised about it. You

understand we have no place even to hold a commencement. There is no kind of general meeting we can hold for Howard University unless we leave the campus and go outside. There is no place down town for us, because a good many places will not rent to a colored institution.

The CHAIRMAN. We want to know something about the character of the building you are to have and who made this estimate. What are you going to get for $75,000?

Mr. COOK. We would expect to have a large auditorium, with certain rooms in the front of it.

The CHAIRMAN. Has anything definite been done toward working out the character of building you are to have under this appropriation?

Dr. PARKS. President Thirkield had plans drawn by the architects and estimates made.

The CHAIRMAN. What was the building to be?

Dr. PARKS. An auditorium holding from 1,500 to 2,000 people, with some rooms on the front of it, and a rostrum.

The CHAIRMAN. What are the dimensions of the building to be as planned?

Dr. PARKS. I do not carry that information in my mind. I did not think it would be called for, and I do not know the definite figures.

The CHAIRMAN. You can get that information for us?

Dr. PARKS. Yes.

NOTE.—There is submitted herewith a letter from the architect. The sketch plans for the building have been sent to the committee rooms.

WASHINGTON, D. C., *February 8, 1913.*

HOWARD UNIVERSITY.

GENTLEMEN: Herewith please find sketch plans for assembly hall for the university. The building to be of brick, conforming to the new buildings recently erected at the university, with stone and terra-cotta trimming. The building would be fireproof up to and including the first floor. The interior would be finished in plaster, with wood floors generally, except that the corridors would be of tile; the woodwork to be of birch, the lighting to be with electricity, and the heating from the central plant now in operation.

I would estimate the cost of this building at $75,000.

Yours, very truly,

A. P. CLARK, Jr., *Architect.*

Mr. Chairman, the time has gone by, it seems to me, when the Government can afford to restrain its generosity toward this great institution. It ought to be our policy to extend it the most liberal encouragement, because it has been recognized by men who have had opportunity to inform themselves as a great school, conducted by great men, and rendering a great service. President Cleveland watched the university with much interest and commended it strongly. Here is what he said upon one occasion:

I have had occasion to become familiar with the work being done by the Howard University, and it meets my cordial approval.

The institution had an enthusiastic friend in President McKinley, and in a public address he said:

It would be difficult to exaggerate the excellent influence that is constantly being exerted by Howard University. I hope the people of the country may respond generously for its support.

President Roosevelt always manifested the most intelligent interest in the institution, and in one of his messages to Congress he said:

This institution has been devoted throughout its career to turning out men and women who should be teachers and helpers of their own people toward the higher life. Upon their leading and teaching much depends for their race and for their country.

It is unnecessary to say that since President Taft has been in the White House as Chief Executive he has had a more complete and intimate understanding of the school, of its promise, and of its performance than any of his predecessors, and he has been one of its most devoted adherents. He said:

This university offers to the colored race what it needs and without which it can not make advancement, to wit, colored leaders of thought in every profession, who shall lead the whole race onward and upward. Everything that I can do as an Executive in the way of helping along this university I expect to do. I expect to do it because I believe it is a debt of the people of the United States.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. KENDALL. Now, Mr. Chairman, I had the honor last May to attend a banquet tendered by the alumni as a testimonial to Prof. George W. Cook, whom I am proud to consider my personal friend, upon the completion of the thirty-eighth year of his connection with this university as secretary and business manager. It was a most interesting occasion. I think I was the only white man present. I know I was the only man in that company who in his speech was limited to one language. There were 250 men there, lawyers, doctors, teachers, ministers, merchants, and bankers, from Massachusetts to Colorado, and from Minnesota to Texas, a splendid assemblage of men, and a powerful demonstration of the efficacy of the work that is being done at Howard University. [Applause.]

I was profoundly impressed with the school and with its possibilities. I have no hesitancy in asserting that if the people generally understood the results which are being accomplished in this institution, and the limitations which embarrass it, they would authorize double the appropriations for its support that are included in this measure. I resolved that if I had opportunity I would contribute whatever influence I may have to make possible its development and its prosperity in the great work in which it is engaged.

I have therefore presented this amendment which authorizes the construction of an assembly hall. At present no place is provided where commencement exercises can be held, and from 250 to 300 pupils are graduated each year. There is no hall in which the student body may congregate for any purpose, either for admonition, for instruction, or, as Prof. Cook said before the committee, for rebuke, which is sometimes necessary, I suppose, in educational institutions.

The Department of the Interior recognizes the vital and immediate need of this building, and so it sent to the Committee on Appropriations an estimate, accompanying it with plans, designs, and specifications, prepared by the architect, showing that a suitable and satisfactory structure could be erected for the sum of $75,000. In the circumstances, I earnestly hope that the committee will consent that my amendment may be attached to the bill, so that this splendid institution, a university that is not surpassed by any school on the Western Continent, may not be restricted in the possibilities for usefulness it ought to enjoy. [Applause.]

Mr. PAGE. Mr. Chairman, I do not care to discuss at any length either the institution or the amendment that has been offered by the gentleman from Iowa [Mr. KENDALL]. It has been already stated that the committee has been from time to time liberal with this institution, and there is not, certainly, in the committee or on the part of any Member of this House otherwise than a liberal feeling toward it. In this bill the committee has increased the appropriation $4,000 over the current law. And then it must be remembered, too, Mr. Chairman, that the appropriation carried in this bill for this institution is a gratuity after all, and its benefits are not confined even to the race which is American. The catalogue discloses the fact that there are a number of students from other countries who are receiving the benefits of the appropriation made by the Congress. The appropriation as it has been made, as it is carried in this bill, meets with the approval not only of myself but of everybody else upon the committee and upon the floor, I imagine. But as to the amendment offered by the gentleman from Iowa [Mr. KENDALL], the necessity, even, for this assembly hall was not sufficiently impressed upon the committee to warrant us in recommending it, although there was an estimate made.

Mr. Chairman, I make the point of order that it is not authorized by law.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Penitentiary, Leavenworth, Kans.: For continuing construction, $100,000, to be available immediately and to remain available until expended, all of which sum shall be so expended as to give the maximum amount of employment to the inmates of said penitentiary.

Mr. SISSON. Mr. Chairman, as to this item for the penitentiary at Leavenworth, Kans., how much more, I will ask the chairman of the committee, is supposed to be necessary to complete this work?

Mr. FITZGERALD. Nobody knows. The gentleman will recall that the committee has placed a provision in the bill which prohibits the construction of any additional building at either Leavenworth or Atlanta unless specific authority be granted by Congress. The official in charge stated that the amount of work to be done depended very largely on the amount of fees the architect seemed to desire for the year.

Mr. SISSON. The only reason I called attention to the item was for the purpose of bringing out the fact that it does not seem that we can ever complete these two propositions.

Mr. FITZGERALD. This should be stated, however, that the construction of these buildings has afforded the only means of utilizing the labor of the convicts, and it is regarded as highly essential that some form of labor should be provided for the men confined in prisons.

Mr. COX. The gentleman has touched on the very point that I wanted to inquire about, and that is this: Why that peculiar language, "all of which shall be so expended as to give the maximum amount of employment to the inmates of said penitentiary"?

Mr. FITZGERALD. There are no shops or other means of employment for the Federal prisoners at these penitentiaries, and it is essential to keep them occupied. One of the great problems of prison administration is to furnish employment to the inmates of the prisons, and they have been utilized as far as possible in constructing these buildings.

Mr. COX. To help construct these works?

Mr. FITZGERALD. Yes.

Mr. COX. The Government does not pay them anything while they are working?

Mr. FITZGERALD. No; it does not.

Mr. SISSON. Now, I will state to the gentleman that it is a fact that you have so much better discipline when the men

are employed; but, so far as I am personally concerned, I would like very much to see a system in vogue where these convicts can be used for some useful public works of some kind.

Mr. COX. On the highways?

Mr. SISSON. Either upon the post roads or upon the levee work that the Government is doing, and have the prisoners properly clothed and fed, instead of lying around these penitentiaries and having nothing to do except when they are put on some new addition to the penitentiary.

Mr. COX. At the Government expense.

Mr. SISSON. Yes.

The CHAIRMAN. The pro forma amendment will be considered withdrawn. The Clerk will read.

The Clerk read as follows:

No additional building for any purpose whatever shall hereafter be commenced at any United States penitentiary except after authority or specific appropriation therefor shall have been granted by Congress.

Mr. MANN. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from Illinois reserves a point of order.

Mr. MANN. Apparently, under this provision they could not construct an outbuilding of any kind, even if it were in connection with the building work on the penitentiary. If you wanted to put up a shelter at some place, you could not do that without specific authority.

Mr. FITZGERALD. The object of this is to obtain information in advance. From year to year the Department of Justice requests Congress to appropriate. For instance, as in this case of the penitentiary at Atlanta, the department requests $175,000. The limit of cost of that building was $1,500,000, and we have already expended $1,515,000.

Mr. MANN. You do not need to appropriate for it if you do not want to.

Mr. FITZGERALD. But this is what happens: Each year the department comes to Congress and states that it has in course of construction a building, and it is impossible to tell what the cost will be and impossible to tell when some other building is to be started or where the end is to be.

Mr. MANN. Very well, if they need the building. If they do not, you do not need to recommend an appropriation for it.

Mr. FITZGERALD. Under the contract system with the architects they largely determine the amount of work that is to be done.

Mr. MANN. Well, I do not think the Committee on Appropriations is entirely under the thumb of the architects.

Mr. FITZGERALD. Well, ever since I have been a member of it, nearly eight years now, it has been absolutely helpless in regard to these buildings at the Federal prisons.

Mr. MANN. Here is the situation about it: In the first place, under this language if you should authorize the construction of a main building you could not put up a tool shed unless that was included specifically in the authorization. You could not put up a place to store anything in or a place to put cement in to preserve it from the weather unless it was specifically authorized. But, in the second place, until Congress makes some provision for giving work to the inmates of the penitentiary they had better be allowed to put up stone buildings, even if they have to pull them down after they have put them up, and then rebuild them. It is cruel to confine men without giving them anything to do. I would rather appropriate a little money now and then to give them some work to do, which they claim to be necessary, and which no one denies the necessity of, rather than keep them in confinement with nothing to do.

My recollection is that we have just recently passed a resolution for a commission—passed it in the House the other day—to visit the penitentiaries and make recommendations. There was such a proposition here.

Mr. BEALL of Texas. Mr. Chairman, I will state to the gentleman from Illinois that my understanding is that the gentleman from Tennessee some time ago called up a resolution looking to the formation of a commission; but my recollection is that it was not passed, unless it was called up a second time. I think it was objected to the first time it was called up.

Mr. MANN. It was called up a second time, and I think it was passed. I think we can afford to wait before we determine that these men shall not have anything to do. Therefore I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FITZGERALD. I offer the following amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 121, by adding at the end of line 21 the following:
"No part of any money appropriated in this act under the Department of Justice shall be used for beginning the construction of any new or additional buildings at any Federal penitentiary."

Mr. MANN. I have no objection to that.

Mr. FITZGERALD. This will accomplish what we desire, and will not prevent the other thing.

Mr. MANN. That is true.

Mr. BEALL of Texas. In the preparation of this bill, did the gentleman from New York get any information as to how much had been paid to the architects at Leavenworth during the past year?

Mr. FITZGERALD. No.

Mr. BEALL of Texas. I will state that I was informed by the Department of Justice a month or six weeks ago that the architects who had charge of the improvements at Leavenworth had presented bills to the Department of Justice for approximately $30,000 for their services during the past year. Does the gentleman from New York remember the fact that the bill which passed the House last year contained a provision that not to exceed $3,500 should be paid to the architects for the year ending June 30, 1913? That was stricken out in the Senate and remained out in conference, and the architects for the Leavenworth prison presented bills for their services for the past year of $30,000, when the total appropriation for the buildings at Leavenworth contained in the last sundry civil bill was only $100,000.

Mr. COOPER. What were the "services"? Were they commissions?

Mr. BEALL of Texas. They were commissions. I will state to the gentleman from Wisconsin, if the gentleman from New York [Mr. FITZGERALD] will permit me, that in my judgment the architects for the Leavenworth Penitentiary have been collecting commissions upon work that they did for years while under an annual salary of $3,500. In other words, for years they received a salary of $3,500—from 1897 up to about 1908—and then the contract was changed and they were given a percentage compensation, and that percentage was calculated to a very large extent upon the work that they had already done under the annual salary allowance.

Mr. COOPER. Does the gentleman mean to say that while these gentlemen were Government employees, in receipt of a salary of $3,500 a year, they claimed commissions?

Mr. BEALL of Texas. I mean to say this: That about 1897 they were employed in connection with the Leavenworth Penitentiary, and prepared the preliminary plans and started the construction of that building now being constructed. They continued for 10 years or more upon that annual-salary basis, and then the contract was changed by the Department of Justice, and they were given 5 per cent commission upon the estimated cost of the construction at Leavenworth, but a large part of the architects' work had already been done before the new contract was made.

If the gentleman from New York [Mr. FITZGERALD] will permit me, I think the contract with these architects that the Department of Justice made in connection with the construction work at Leavenworth was absolutely indefensible. I have no doubt that these architects have received double compensation—the compensation at $3,500 a year for 10 years, or about that time—and then, since the contract was changed, they received their percentage commission for much work that they did while they were receiving annual compensation.

Mr. McKENZIE. If the statements that the gentleman from Texas has just made are true, are not these men liable to indictment for a criminal act?

Mr. BEALL of Texas. I do not know about that. The Department of Justice in about 1908 or 1909 changed their contract, and gave them compensation at the rate of 5 per cent upon the cost of all the work in progress at Leavenworth, and for several years they had been working upon that construction out there at an annual salary of $3,500 a year, and under the new contract they received this commission upon the cost of work that had been done while they were receiving a yearly salary.

Mr. FITZGERALD. Mr. Chairman, I do not know how much has been paid to the architects. Last year the committee went into the matter exhaustively, and in order to get control of the situation it is necessary to be in a position to know before the buildings are started what they will cost and what compensation will be paid for architects' services. The amendment now pending will, I think, bring the matter into such shape that the House will have the information and be able to control the situation.

Mr. COOPER. Is it the understanding of the gentleman from New York that this change of contract by which these architects would receive a commission was made retroactive, so that it covered a period when they were under a salary?

Mr. FITZGERALD. I have not looked that matter up.

Mr. COOPER. That seems to be the understanding of the gentleman from Texas.

Mr. FITZGERALD. The gentleman from Texas is chairman of the Committee on Expenditures in the Department of Justice and that committee conducted a very exhaustive investigation and is very familiar with all the facts in connection with the matter.

Mr. COOPER. It is a most remarkable thing if the change in the contract was made retroactive.

Mr. FITZGERALD. Everybody who has looked into it thinks it is a remarkable situation. The firm of architects in St. Louis has been collecting fees for the construction of two penitentiaries—one at Leavenworth, Kans., and the other at Atlanta, Ga.

Mr. COX. I would like to ask the gentleman whether or not the Attorney General allowed the $30,000?

Mr. BEALL of Texas. I have no facts on that subject. I requested the Department of Justice to advise me with respect to the claim presented by the architects in connection with the Leavenworth prison. They sent me a statement that verified what I had been informed of before, that at that time there was pending in the Department of Justice claims of the architects amounting to $30,000, when the entire appropriation for this year for the prison at Leavenworth was $100,000. They asked for $30,000 out of that $100,000 for that compensation for services as architects during this year. At the time this information was furnished the claims had not been paid, and I hope the department will refuse their payment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McKENZIE. Will the gentleman yield to me?

Mr. BEALL of Texas. Mr. Chairman, I move to strike out the last word in order to give the gentleman from Illinois an opportunity to ask a question.

Mr. McKENZIE. I wanted to ask whether the gentleman knows if any part of the $30,000 has been allowed?

Mr. BEALL of Texas. I do not know. At the time the report was made to me it had not been, and I have no later information as to whether the account had been adjusted or whether any part of it had been paid. I will state that in my judgment the most extravagant and most extraordinary allowances have been made to these architects. Prior to this bill of $30,000 they have collected between $80,000 and $100,000 for construction work at Leavenworth and an equal amount on construction work at Atlanta.

Mr. McKENZIE. In my opinion the gentleman from Texas ought to pursue this matter to the final end.

Mr. BEALL of Texas. I intend to. I will state for the information of the gentleman from Wisconsin [Mr. COOPER] that this construction work began at Leavenworth about 1897 and 1898 upon a basis of an annual salary to these architects of $3,500. They began the work of construction there and proceeded for 10 years, and then there was a change in the contract, and under that new contract they were given compensation upon a basis of 5 per cent, I think it was, upon the cost of construction then in progress at Leavenworth, when a large part of their work had been done during the years when they were receiving compensation of $3,500 a year.

I called the attention of the House to it last year and endeavored to correct the situation by an amendment limiting the expenditures during this year to $3,500. I really supposed that, because of payments previously made, there would not be any considerable amount claimed by the architects under the contracts for this year, but I received information from Leavenworth that there was a bill for $30,000 before the Department of Justice in behalf of these architects.

I made inquiry of the department and that information was confirmed by the statement and they gave me the items. The bill that was presented claimed $30,000 out of a total appropriation of $100,000, leaving only $70,000 to be used for actual construction if these excessive fees are paid.

Mr. MANN. The gentleman has the items, and why not put them in the RECORD?

Mr. BEALL of Texas. Mr. Chairman, I have not the items immediately at hand, but, with the permission of the committee, I will be glad to insert them in the RECORD at a later date.

Mr. FOSTER. Mr. Chairman, does the gentleman state that after 10 years under contract at an annual salary they were then given another contract which gave them 5 per cent upon work that was done while the first contract was in force?

Mr. BEALL of Texas. I do state that as a positive fact. They served for $3,500 a year for several years, and yet under a new contract they received $15,000 or $20,000 a year for doing the same work formerly done for $3,500 per year, and a certain portion of their commission was for work that had been done while they were upon the annual salary.

The CHAIRMAN. The time of the gentleman from Texas has expired. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York. The Chair will suggest that inasmuch as the last paragraph went out on a point of order the amendment should come in in line 21.

Mr. FITZGERALD. Mr. Chairman, I will ask that it be inserted at the proper place.

The CHAIRMAN. Without objection, that will be done. The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

The Clerk read as follows:

MISCELLANEOUS OBJECTS, DEPARTMENT OF JUSTICE.

Conduct of customs cases: Assistant Attorney General, $8,000; assistant attorneys—1 $5,000, 1 $4,500, 1 $3,000; special attorneys and counselors at law in the conduct of customs cases, to be employed and their compensation fixed by the Attorney General, as authorized by section 30 of the act of August 5, 1909, $35,000; necessary clerical assistance and other employees at the seat of government and elsewhere, to be employed and their compensation fixed by the Attorney General; supplies, printing, traveling, and other miscellaneous and incidental expenses, to be expended under the direction of the Attorney General, $27,000; in all, $82,500.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph, especially that part of it which reads as follows:

Assistant Attorney General, $8,000.

By the act of February 25, 1871, provision was made for three Assistant Attorneys General, at a salary of $5,000 annually. By the act of March 3, 1891, provision was made for an additional Assistant Attorney General, on a salary of $2,500. By the act of June 13, 1892, an appropriation of $2,500 additional was made to pay for this Fourth Assistant Attorney General, and his salary was fixed by that act at $5,000 a year. So the revised statute as it now stands makes provision for four Assistant Attorneys General, at a salary of $5,000 each. There is no authority for increasing the salary of this Attorney General from $5,000 to $8,000 per annum.

Mr. FITZGERALD. Mr. Chairman, the gentleman has not discovered the law under which these particular officials were created. They were created in what is known as the Payne-Aldrich Tariff Act. I have sent to the Library to get a copy of that act. I ask that the paragraph be passed temporarily.

Mr. FOWLER. Mr. Chairman, I have no disposition to press the point of order until the gentleman can procure that act.

The CHAIRMAN. Without objection, the paragraph will be passed temporarily.

There was no objection.

The Clerk read as follows:

Detection and prosecution of crimes: For the detection and prosecution of crimes against the United States; the investigation of the official acts, records, and accounts of marshals, attorneys, clerks, and referees of the United States courts and the Territorial courts, and United States commissioners, for which purpose all the official papers, records, and dockets of said officers, without exception, shall be examined by the agents of the Attorney General at any time; for the protection of the person of the President of the United States; for such other investigations regarding official matters under the control of the Department of Justice as may be directed by the Attorney General, including not to exceed $10,000 for necessary employees at the seat of government, to be expended under the direction of the Attorney General, $450,000.

Mr. KNOWLAND. Mr. Chairman, I move to strike out the last word. I notice in the hearings that the special commissioner for the suppression of the white-slave traffic asks that appropriation for the suppression of the white-slave traffic be placed under a special head.

Mr. FITZGERALD. Mr. Chairman, it is in this item. The department requested us to segregate the appropriation for the enforcement of the white-slave traffic act, known as the Mann law, but the committee could see no reason for having the appropriation for the enforcement of all other criminal acts in one paragraph and the appropriation for the enforcement of a particular act segregated. The committee declined to separate the items and determined to keep them in one paragraph.

Mr. KNOWLAND. Does not the gentleman think that there is merit in the contention of the commissioner that under the present arrangement they do not know exactly how much money they will receive, and that if a special paragraph was provided some of the other work requiring appropriations might not take the money required for this particular and important work?

Mr. FITZGERALD. In this way the Attorney General allots the amount of money he believes is required for that particular work, and he has available a larger fund for the purpose, if it be deemed necessary, than if the amount were segregated. The gentleman can understand that if we were to segregate the appropriations for the detection and prosecution of crimes under every penal statute this bill would be so long that it could never

be read, and there is no reason why the amount available for the prosecution of offenders under one statute should be segregated any more than under another.

Mr. KNOWLAND. The amount this year is $50,000 more than that of last year.

Mr. FITZGERALD. Yes. The estimate in the two items as submitted by the department was for $500,000 segregated, and the committee, appreciating the money was available and interchangeable, recommended $450,000, which is an increase of $50,000 over the current law.

Mr. KNOWLAND. How much increase will that make for the white-slave bureau?

Mr. FITZGERALD. Whatever the Department of Justice, the Attorney General, determines is necessary of this fund will be expended in that manner.

Mr. KNOWLAND. The additional $50,000 does not go, then, to this bureau?

Mr. FITZGERALD. They are spending at present over $100,000 a year out of the present appropriation.

Mr. KNOWLAND. There was a deficiency for this year, was there not, of $25,000?

Mr. FITZGERALD. I have not examined the deficiency estimates thus far. I believe it is good administration to keep the item in its present shape, and the committee believe that the amount recommended should be sufficient.

Mr. BURKE of South Dakota. Will the gentleman yield? About three years ago, I desire to say to the gentleman from New York, when the Indian appropriation bill was pending, the committee arranged the appropriations that had been previously made separately for certain purposes in the Indian service and reduced the aggregate, maintaining that it was in the interest of good administration; and I recall very distinctly that the gentleman from New York very strenuously objected to what he called lump-sum appropriations.

Mr. MANN. He was on the other side then.

Mr. FITZGERALD. This is an entirely different situation.

Mr. BURKE of South Dakota. Not at all.

Mr. FITZGERALD. I insist it is. I know what I am talking about in this connection.

Mr. BURKE of South Dakota. I want to ask the gentleman if he has changed his views with reference to what are termed "lump-sum appropriations" since that time?

Mr. FITZGERALD. No. The idea here is whether there shall be built up separate independent forces and organizations for the protection and prosecution of offenders under various penal laws or whether the department shall continue with the present organization to be utilized as the necessities require. Nobody can tell what the violations of the various penal statutes will be. That is something nobody can anticipate.

Mr. BURKE of South Dakota. The gentleman has just stated the Attorney General apportions these amounts for the different purposes. My recollection is that we used exactly the same argument at the time the matter I have referred to was under discussion, and the gentleman argued that he thought the House was just as capable of segregating and determining how much should be expended for these various purposes as the head of some department.

Mr. FITZGERALD. The gentleman was attempting a consolidation of items; the committee is not doing that.

Mr. BURKE of South Dakota. No; the appropriation, to be specific, was in reference to farmers, matrons, and persons employed in looking after timber on Indian reservations, and previously bills carried separate items for those purposes. The committee brought in a lump-sum appropriation for these several purposes and reduced the aggregate considerably, and the gentleman from New York, I remember distinctly, was very much opposed to what he termed a lump-sum appropriation.

Mr. FITZGERALD. The difference is this. In that case——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I ask unanimous consent that the gentleman from California be allowed five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FITZGERALD. In that case the committee attempted a consolidation of items, while in this case the Committee on Appropriations is endeavoring to appropriate an additional lump-sum appropriation——

Mr. BURKE of South Dakota. I was wondering whether or not the fact that the gentleman is now in a position of responsibility perhaps had something to do with his change of ideas upon this subject of appropriating money. I want to say I am in accord with the gentleman's view, because it was the position I took three years ago when we had the bill before the House in the Indian appropriation bill, at which time the gentleman took an opposite position.

Mr. KNOWLAND. In further reference to this matter, Mr. Chairman, I would like to read an extract from the testimony of Mr. Finch. He says:

> Because with the growth of the white-slave work there is always the possibility that we might be crowded out on the white-slave work. That is one thing that should be prevented.

I should think that when a man who is as familiar with the work as Mr. Finch fears that something of that kind might occur, every consideration should be shown him.

Mr. FITZGERALD. I believe the committee has recommended ample funds to conduct the work. I am quite in sympathy with the efforts being made to suppress this evil, and I think in the administration of this fund there will be no difficulty. If by any possibility a mistake has been made or additional funds are required, I think there is no objection on the part of Congress to appropriating the moneys necessary to do the work.

Mr. KNOWLAND. If that is the attitude, I am glad to hear it. I think the committee has always showed a disposition to give the full amount asked for. I know they did last year and I assume they have this year also, and the only anxiety I had was there might be a possibility of the appropriation being diverted.

Mr. FITZGERALD. I believe with the items segregated it would have been necessary to have had an increase in each of them, but with them together it is unnecessary to appropriate with the organization as large a sum as otherwise might be necessary.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. I yield.

Mr. MANN. My understanding is that the Committee on Appropriations not only appreciates the value of the work being done under that law, but is in sympathy with the work, and is quite willing to furnish all the needed funds.

Mr. FITZGERALD. In entire sympathy, and has tried to cooperate heartily with the department in the work.

Mr. Chairman, I ask to return now to the item which was passed over temporarily—section 30 of the present tariff law, page 122. The gentleman from Illinois [Mr. FOWLER] makes a point of order against the position of the Assistant Attorney General at $8,000, because it is a violation of law in that it increases the compensation of the position. Under the law, Mr. Chairman, the compensation is fixed at $10,000, and the committee is providing a place at $2,000 less than the law authorized. Section 30 of the so-called Payne tariff law—the act of August 5, 1909—provides:

> That there shall be appointed by the President, by and with the advice and consent of the Senate, an Assistant Attorney General, who shall exercise the functions of his office under the supervision and control of the Attorney General of the United States, and who shall be paid a salary of $10,000 per annum.

This is the position for which the committee appropriated $8,000 a year.

Mr. FOWLER. What is the name given to the position?

Mr. FITZGERALD. Assistant Attorney General.

Mr. FOWLER. In section 30?

Mr. FITZGERALD. In section 30; yes. It is that $10,000 place. The committee has provided only $8,000, and that is all the man receives.

Mr. FOWLER. Mr. Chairman, I desire to let the matter pass until I can make a little further examination.

Mr. FITZGERALD. There is no question about it. I have the law, and I think we should dispose of it. This is a position provided in this bill, at $2,000 less than the law authorizes, and that is not subject to a point of order.

Mr. FOWLER. I have the bill before me now, Mr. Chairman, and in reading that section of the bill that is referred to as section 30, I have not been able to find it yet.

Mr. FITZGERALD. If the gentleman will read section 30——

Mr. FOWLER. All I desire, Mr. Chairman, is that it may stand until I can read that section.

Mr. FITZGERALD. I have just read it to the gentleman.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] asks unanimous consent to pass the paragraph referred to temporarily. Is there objection?

There was no objection.

The Clerk read as follows:

> Inspection of prisons and prisoners and parole: For the inspection of United States prisons and prisoners, and for the collection, classification, and preservation of criminal identification records, and their exchange with the officials of State and other institutions, to be expended under the direction of the Attorney General, $10,000.

Mr. BEALL of Texas. Mr. Chairman, I move to strike out the last word.

I do not desire to consume the time of the committee and delay the consideration of this bill except just long enough to

call the attention of the committee to the fact that in connection with these Federal prisons this Congress will soon have two problems to meet and two problems to solve. The first is in connection with the parole board, that deals with the question of the parole of these Federal prisoners. At present it is composed of the superintendent of prisons and the warden and the physician of each of the penitentiaries. I think I am authorized to say that it is the opinion of the warden of each of these penitentiaries, as well as the opinion of the physician in each of these penitentiaries, that they should not be members of this parole board, but that the parole board should be constituted of three members entirely different from the present constituted officers. The warden of the penitentiary comes in direct and personal contact with the prisoners under his charge, and he ought to be in position not to serve as a member of the parole board, but as an adviser of the parole board, and to give the parole board the benefit of the information which he has secured as warden.

And the same thing is true of the prison physician. As the board is now constituted, the superintendent of prisons very largely dominates the board. He is located here in Washington. He is the superior officer of the wardens and of the prison physicians. The meetings of this board must be adjusted to suit his convenience, and I think that I am within the bounds of truth when I say that the parole board is very largely constituted of just one man.

Mr. SISSON. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Texas [Mr. BEALL] yield to the gentleman from Mississippi [Mr. SISSON]?

Mr. BEALL of Texas. With pleasure.

Mr. SISSON. I would like to ask the gentleman from Texas, because I do not know exactly the facts, as to who constitutes this board?

Mr. BEALL of Texas. The parole board of the Leavenworth Penitentiary is composed of the superintendent of prisons here in Washington, the warden of the Leavenworth Penitentiary, and the physician of the Leavenworth Penitentiary, and the same thing is true at Atlanta.

Mr. SISSON. The superintendent lives here in Washington?

Mr. BEALL of Texas. In Washington. And the same is true of McNeil Island as to the composition of the board.

I think that there was a very serious mistake made in the law creating and constituting this board of parole. It ought to be composed of other than the superintendent of prisons or the warden of the penitentiary or the prison physician.

Now, another problem, Mr. Chairman, that this Congress has got to meet and got to solve within three or four years: At Leavenworth and Atlanta you have something like 2,000 men. You have no employment on earth for them except to look after the affairs of the prison and the construction work that is in progress. It must necessarily follow that in the near future the construction work at Leavenworth and at Atlanta will end, and this Congress will be confronted with a situation where it will have perhaps 3,000 men with no provision of any kind made for their employment.

I think it is one of the problems that Congress ought to begin to grapple with at a very early date, to make provision to give these convicts employment when the construction work ends, as it must end in the near future.

Mr. CULLOP. Are there but two of these prisons?

Mr. BEALL of Texas. There are three prisons, but there are but two big prisons.

Mr. CULLOP. Where are they?

Mr. BEALL of Texas. One is at Leavenworth, and one is at Atlanta, and one at McNeil Island, in the State of Washington; but that is a comparatively small prison.

Mr. CULLOP. Now, are the convicts in the two prisons the gentleman has named not engaged in any other work or business than that of constructing the prisons?

Mr. BEALL of Texas. That is the entire opportunity for the employment of the convicts at those two institutions, except caring for the prison, doing the work in the kitchen and in the dining room and upon the grounds. They have no employment for these convicts except this construction work, which must end in the near future, because these buildings will be completed; and then you will have two or three thousand men on your hands, without any employment for them. It will not be good for the men, and it will not be good for the penitentiary system.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CULLOP. Mr. Chairman, I ask that the gentleman's time be extended for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. CULLOP. Now, has the Government entered upon any policy of furnishing some kind of employment, some kind of public work for the Government, so as to engage and employ these men while they are there?

Mr. BEALL of Texas. Not in the slightest degree. There has not been a single, solitary thing done by Congress looking to the making of any provision for the employment of these men when the construction work ends, and it ought to be done in the very near future.

Mr. SISSON. What does the gentleman think about putting them on the public roads and on the public work of improving rivers and harbors and levees and other work that is being done now by the Federal Government?

Mr. BEALL of Texas. Well, the gentleman from Texas has not gone very far into the subject, but I do not think he needs to go very far into the subject to say that it would not be feasible or practicable to use the prisoners at Leavenworth in road construction throughout the United States or to use the prisoners at Atlanta or elsewhere on similar work.

Mr. SISSON. What does the gentleman think of turning them over for the building work in the States or in river and harbor work where ordinary labor is used?

Mr. BEALL of Texas. I can not solve that problem. A few weeks ago I introduced a resolution here, the purpose of which was to give to the Committee on Expenditures in the Department of Justice an opportunity to look into this question and to investigate it and to take testimony on it and to try to arrive at some sane conclusion as to how these men could be employed. I knew the disposition on the part of the House to look with disfavor upon these propositions to give these committees authority to sit outside of Washington, and therefore I have not pressed the resolution. But sooner or later this Congress has got to solve this problem, because this construction work will end before very long and you will have two or three or four thousand idle men upon your hands. It is not, as I say, good for the men and it is not good for the rights of the Government to have these men idle and unemployed.

I simply wanted to call the attention of the House to the fact that this is a problem you will have to meet and solve in the very near future.

Mr. SHERLEY. Mr. Chairman, I desire to say just a word in connection with what the gentleman from Texas [Mr. BEALL] has said.

I thoroughly agree with him that the time is at hand when the present system of employing these men upon construction work will have to be discontinued, and I wanted to suggest one thought in connection with the solution of that problem. That is that I have always believed that, instead of undertaking to make a profit out of convict labor, either for the benefit of the State or for the benefit of a contractor, what ought to be done in the interest of humanity is to employ these men in various kinds of work, credit them with a fair wage, debiting that credit with their upkeep cost, and then give to any dependent members of their families, or to themselves upon the expiration of their terms, such sums as they have properly earned, in order that they may have an opportunity to start again in life and become useful citizens, instead of the present system, which sends a man out at the end of his term in prison without any opportunity on earth and with practically all society arrayed against him. [Applause.]

There has been much prejudice in America against the sale of convict-made goods, and that prejudice has been warranted where the sale has represented simply a profit to contractors who have used this labor at an unfair price and then have underbid honest labor outside. But if these men were credited with a proper sum as representing the value of their labor, then the goods manufactured by them would not enter into unfair competition with goods made outside, and the work done by the convicts would give them the opportunity that society owes to itself and owes to them.

Mr. BEALL of Texas. Will the gentleman yield?

Mr. SHERLEY. Certainly.

Mr. BEALL of Texas. I will ask the gentleman if he does not believe that every convict at Leavenworth, Atlanta, and McNeil Island, after this construction work ends, should be employed in the manufacture of goods that the Government of the United States needs?

Mr. SHERLEY. I am inclined to think they could be. I am not prepared to undertake to name the particular kind of employment to which they should be put, but I do insist that the principle of crediting them with a reasonable return for their labor, after debiting them as they should be debited with their cost to the State, should be followed, in order that their families, who are sometimes dependent on them, may be taken care of, and that the individual may start life with some chance

to succeed as an honest man and without the certainty which exists to-day of his being driven back into the walks of vice and crime.

Mr. CULLOP. Is it not the policy now of most of the prisons in the different States to give the convict a certain amount for excess work, which sum accumulates, and he has the right to draw it and send it to his family or draw it at the end of his term.

Mr. SHERLEY. I do not think that is universal. It may exist in some States, but in many States it unquestionably does not.

Mr. CULLOP. It does exist in the State of Indiana.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILSON of Pennsylvania. I move to strike out the last two words. I agree with the gentleman from Kentucky [Mr. SHERLEY], so far as he goes. The man who is in prison should be credited with his earnings, less the expense, and the money either used for taking care of his family while he is in prison, or given to him in a lump sum when he leaves, so that he will have something with which to start life anew. But that does not solve the problem. Men are sent to prison primarily for the welfare of society, and being sent there primarily for the welfare of society they should not be so employed as to injure society. Nevertheless, they should be employed. Their own welfare and the welfare of society requires that they should be employed. The great criticism that has been made against convict-made goods has come because of the fact that it has been customary to use the convicts in any given prison or penitentiary in one particular line of industry, thereby placing a large amount, or a comparatively large amount, of the material consumed from that industry into competition with free labor, to the injury of society itself. In my judgment the way to solve that problem, in addition to the suggestion made by the gentleman from Kentucky, is to make your industries in your penitentiaries as thoroughly diversified as it is possible to make them, so that the product of the labor coming from the prison will not materially affect any one industry outside of the prison. When they have diversified that industry and placed the workmen in the prison at work at hand labor, learning the rudiments and fundamental principles of trades, then you will have created a condition where the prisoner is kept busy earning something for himself or his family, at the same time having no injurious effect upon the industries outside of the prison, and having no injurious effect upon free labor. In my judgment that is the ideal condition and the ideal method of handling prison labor.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CULLOP. I should like to ask the gentleman a question.

Mr. MANN. I demand the regular order.

The CHAIRMAN. The regular order is demanded.

Mr. FOWLER. Mr. Chairman, there was a provision passed over on page 122.

Mr. FITZGERALD. I ask now to return to that provision to which the point of order was reserved.

Mr. FOWLER. On examination of the statute of 1909, which created the Court of Customs Appeals, I discover that it provided for an Assistant Attorney General at a salary of $10,000 a year.

I desire to compliment the chairman of this committee and the other members of his committee that in the preparation of this bill they have made a true effort in the direction of retrenchment and reform in this item. I withdraw the point of order.

Mr. MANN. Mr. Chairman, I move to strike out the last word. This salary has never been more than $8,000.

Mr. FOWLER. The statute provides for $10,000.

Mr. MANN. That was a Senate amendment; the House has never made it more than $8,000. May I ask the gentleman why they left out the Deputy Assistant Attorney General in this branch of the service? Is he no longer needed?

Mr. FITZGERALD. The services were discontinued about the first of the year, and the Assistant Attorney General in charge of the work says that there is no necessity for the office.

The Clerk read as follows:

Enforcement of antitrust laws: For the enforcement of antitrust laws, including not exceeding $10,000 for salaries of necessary employees at the seat of government, $300,000.

Mr. HAMILL. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

After line 15, on page 124, insert the following:

"*Provided, however,* That no part of this money shall be expended in the prosecution of any organization or individual for entering into any combination or agreement having in view the increase of wages, the shortening of hours, or bettering the condition of labor, or for any act done in furtherance thereof, not in itself unlawful."

Mr. FITZGERALD. To that, Mr. Chairman, I reserve a point of order.

[Mr. HAMILL addressed the committee. See Appendix.]

Mr. FITZGERALD. Mr. Chairman, I am surprised that the gentleman from New Jersey should offer this amendment. This appropriation becomes available on the 1st of July next. At that time a distinguished citizen of the State of New Jersey will occupy the White House, and the attorney who will be in charge of the Department of Justice will be selected by him. On former occasions I have supported such a provision, because of my lack of confidence, justified by events in Republican administration.

Mr. MANN. The gentleman from New Jersey seems to feel the same way about the next administration. [Laughter.]

Mr. FITZGERALD. I am unwilling to admit or have it intimated that the Democratic administration proposes to utilize an appropriation specifically provided for the purpose of enforcing the antitrust law, to suppress the illegal trusts and combinations that have been oppressing the people, for the purpose of attempting to coerce, or control, or destroy organizations of labor existing for the purpose of advancing the welfare of their members. Under the circumstances I not only am opposed to the amendment, but I hope that this side of the House will unite with me in preventing this reflection upon the incoming Democratic administration by writing this into the law. [Applause.]

Mr. MANN. Mr. Chairman, it is a little beyond my understanding what the falling of the angels has to do with the failures of the Democratic Party. I can not conceive any connection between angels and Democrats. [Laughter.]

Mr. HAMILL. Mr. Chairman, a Republican never could know what an angel is.

Mr. MANN. Mr. Chairman, all over the country those interested in politics and statecraft have endeavored to get some kind of line in their minds upon the incoming President. I have noticed that a great many Democratic Members have been over to New Jersey; and when you talk to them in private after they get back they are able to give you very little information concerning the attitude of the new President, but now we are getting light. Evidently those who are nearest to him distrust him.

The gentleman from the State of New York [Mr. FITZGERALD] has confidence in the President elect, but the gentleman from his own State, who has been in association with him, fears the Attorney General to be appointed by the President elect, and the gentleman from New Jersey [Mr. HAMILL], having more knowledge of the President elect, may be correct. Perhaps we are not justified in trusting him. At least, it is quite certain that the gentleman from New Jersey is not willing to trust the new President or his Attorney General, and seeks to bind his hands in advance, because of intimate knowledge acquired after years of association, and thereby distrust. [Laughter.]

Mr. HAMILL. Mr. Chairman, of course I do not agree, nor does anyone else, with the ingenious but specious argument of the gentleman from Illinois [Mr. MANN], but I am glad to know that, whatever his motive may be, his speech indicates that he will support me in this amendment, and I am willing to take strength even from him and from his side in this meritorious course. This is one of the rare occasions when his party is right.

Mr. SISSON. Mr. Chairman, I want to say just a word. I am in favor of the amendment offered by the gentleman from New Jersey [Mr. HAMILL]. I do not know just what the ruling of the Chair will be in reference to the matter, but the history of this Sherman antitrust act is one which is interesting at least to me. Mr. Sherman, Mr. Edmunds, and Senator George, of my own State, constituted the three men who drafted the Sherman antitrust act, and Senator George, of Mississippi, insisted that an amendment very like that offered by the gentleman from New Jersey ought to have gone on the original act. He was assured in the Senate, he was assured in the debate, that the act could not apply to labor organizations, because every man had the inalienable right to control the price of his own labor and to control the price of the product of his own labor, but the Supreme Court, in construing this act, disagreed with the majority members of the committee, Mr. Sherman and Mr. Edmunds, and agreed with Senator George, from my own State, to wit, that this amendment should have gone on the bill.

There is a right interesting bit of history. When this matter was passed on in the Senate Senator George, of Mississippi, was sick and unable to be present, or he would have offered on the floor of the Senate the amendment in substantially the language that the gentleman from New Jersey has drawn it; and

Senator Sherman and Senator Edmunds were not opposed to the amendment, but simply said it was surplusage; and if they had taken the position of Senator George in the Senate when this legislation was originally passed, the amendment would have gone on in practically the language that the gentleman from New Jersey has offered it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey.

The question was taken; and on a division (demanded by Mr. PAGE) there were—ayes 30, noes 22.

So the amendment was agreed to.

Mr. MANN. Mr. Chairman, I move to strike out the first word of the paragraph. Last year we appropriated $200,000 for this purpose. I tried my best to get the gentlemen in control to increase the amount last year. I congratulate them this year on increasing the amount to $300,000. I suppose, of course, the gentleman from New York [Mr. FITZGERALD] will make the usual, narrow-minded, partisan reply that he could trust the Democratic administration with the expenditure of the money. I venture to say that there never has been an Attorney General and will not ever be again in many years an Attorney General who will do as much toward enforcing the antitrust law as the present Attorney General, Mr. George W. Wickersham. [Applause on the Republican side.]

When he went into the Cabinet, coming from New York City, with, I suppose, corporate connections as a lawyer, many people believed he would be under the influence more or less of, or at least be influenced by, the large combinations. But he has never swerved from what he believed was the right thing in endeavoring to prosecute suits against what people called the "big fellows"—the trusts and combinations. Whether his judgment has always proved right or wrong on one of these things no one can tell. People can criticize, but he has been on the square; and if the next Attorney General, whether he comes from inside this House or outside this House, will do as well, he will reflect great credit upon the incoming administration. [Applause.]

Mr. FITZGERALD. Mr. Chairman, I move to strike out the last word. I do not know what the gentleman from Illinois means by the usual Democratic argument to justify this appropriation. There is a deficiency estimate of $100,000 submitted to Congress by this administration which is to pay debts incurred by the employment of Republican attorneys at very high prices, the Attorney General insisting that the Democratic administration would require a similar sum next year. My familiarity with the items of expenditure under this appropriation makes me doubt exceedingly that such an amount will be needed, but having experimented for several years and finding that the department insists on spending about the sum appropriated and the Republican administration not having succeeded in exterminating all the trusts that are operating in violation of the law——

Mr. MANN. The gentleman evidently misunderstood what I said. I did not criticize the increased amount; on the contrary, I complimented the gentleman on increasing the amount this year, in view of what I endeavored to get him to do last year.

Mr. FITZGERALD. I understand the gentleman did not criticize the increased amount. He was criticizing in advance what he hoped would be the reason given for the increase.

Mr. MANN. I have not criticized; that would have been the reason.

Mr. FITZGERALD. As I was saying, I doubt if the Democratic administration can be conducted in such an extravagant manner as to utilize, even in the enforcement in a much more effective manner than the present administration, this entire sum, but members of the committee and myself do not always agree, and the chairman does not always have his way, and so this amount is recommended for use during the coming fiscal year.

Mr. MORSE of Wisconsin. Will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. MORSE of Wisconsin. How is this money expended—for special assistants, for witness fees, or in what way?

Mr. FITZGERALD. Well, for lawyers and counselors at law and special counsel, and retired officials on the pay rolls at low compensation and paid out of this appropriation much higher sums, clerical services, and for the legal machinery necessary in the conduct of many of the very important suits brought by the department.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WARBURTON. I ask unanimous consent that the gentleman may have two minutes more. I want to ask him a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FITZGERALD. All right; ask it.

Mr. WARBURTON. I understood the gentleman to say the chairman did not always have his way on the committee. I would like to know, if it does not betray the secrets of the committee, when it was the gentleman did not have his own way.

Mr. FITZGERALD. I did not have my own way when the committee struck out the items in which the gentleman was interested. I was very heartily in favor of some of them, but the committee overruled my judgment.

Mr. SLOAN. Mr. Chairman, the gentleman spoke of high-priced attorneys——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HAMILL. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey? [After a pause.] The Chair hears none.

Mr. RODDENBERY. Mr. Chairman, I desire to offer an amendment to come after the amendment of the gentleman from New Jersey, which has been adopted.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend by inserting, after the amendment just adopted, the following: "*Provided further*, That no part of this appropriation shall be expended for the prosecution of producers of farm products or associations of farmers who cooperate or organize in an effort to obtain and maintain a fair and reasonable price for their products."

Mr. RODDENBERY. Mr. Chairman, I should like to discuss fully this amendment and the manifest justice of it, but at this hour of the night I am not physically able to do so. I must, however, make just this remark, that efforts on the part of the agricultural people to maintain fair and reasonable prices and compensation for the products of their toil, their labor and sweat, stand on like footing of reason, of justice, and of right, with the amendment in the interest of fair treatment of labor which we have just adopted and which I cheerfully voted for. This amendment, which I submit to the judgment of the committee, if adopted will accord to the agricultural associations and tillers of the soil an opportunity to organize, cooperate, and standing together without fear of prosecutions in the Federal courts, to maintain the price of their products when the bears on the speculating curbstone and gambling exchanges conspire to run the prices of their products down. These gambling conspirators force prices down when the farmers are ready or compelled to market them, only to run them sky-high when they have sold them. Thus continually the farmer who toils and sweats to support himself and feed and clothe the world gets the minimum price for his labor, while the gambler and speculator, who neither toils nor sweats, craftily reaps the reward of the man who should have it. [Applause.]

Mr. EDWARDS. Mr. Chairman, I regret that my colleague is not physically able to discuss this amendment more at length. I can not let this opportunity pass, however, without submitting a few remarks in support of his amendment. We have just passed, by a vote of this committee, a proposition to prevent the prosecution of labor organizations under certain conditions. I am sure that the principle involved in this amendment is just as worthy of support as the principle involved in the amendment we adopted just a few moments ago. I believe that if this amendment is adopted it will afford great protection to the farmers of this country. The time has come, in my opinion, when the farmers, like other men, in order to protect their interests and advance them, are compelled to stand together in organizations.

As has been pointed out by my colleague, the farmers are dealt with more harshly in the markets of this country and in the markets of the world than any other class of people. I was interested in the remarks of the gentleman from Mississippi [Mr. SISSON] as to why that amendment offered by the gentleman from New Jersey [Mr. HAMILL] should prevail to prevent, in certain cases, the prosecution of labor organizations. I was interested in the history recited by him, in the part that Senator George of Mississippi played in the matter, and the reasons why it should prevail. And the same reasons apply in this case. I think it is high time that, while we are lending this degree of protection to the labor organizations of the country, we should likewise give to the farmers the same degree of protection. I hope that the amendment will prevail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. RODDENBERY].

The question was taken, and the amendment was agreed to.

Mr. FITZGERALD. Mr. Chairman, I move to strike out the amended paragraph and insert in lieu thereof the following.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out the amended paragraph and insert the following:
"Enforcement of antitrust laws: For the enforcement of antitrust laws, including not exceeding $10,000 for salaries of necessary employees at the seat of government, $299,000."

Mr. FITZGERALD. Mr. Chairman, what has transpired demonstrates the necessity of appropriating this money in this way. If random amendments are to be adopted, excluding aggregations or organizations which may or may not be violating the law, it may be just as well to make no appropriations whatever to enforce the law.

I have not the same feeling of doubt or suspicion regarding the incoming administration that some of my colleagues seem to have. If at any time in the administration of public affairs during the next four years abuses arise and improper proceedings are brought and this appropriation is utilized in a manner not contemplated by law, I shall not hesitate to support such provisions as may be necessary to control the administration.

But at the very outset it is inconceivable to me that Members upon this side shall publish to the country their distrust of the incoming administration by intimating or suggesting that the incoming Democratic administration proposes to utilize, in ways not contemplated and never suggested, a fund provided for the purpose of suppressing illegal combinations that have been oppressing the country. I hope that this side of the House will not adopt any such amendment, but that it will make the appropriation in the manner here suggested.

Mr. HAMILL. Mr. Chairman——

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] has the floor.

Mr. HAMILL. I thought the gentleman had finished.

Mr. FITZGERALD. I have.

Mr. ADAMSON. Mr. Chairman, we were very much amused at the bulls gotten off by the distinguished gentleman from New Jersey [Mr. HAMILL] in the course of his eloquent advocacy of a good proposition. We have heard what we have long been familiar with—the taunts and jeers of the Republican Party against the Democratic Party, which is about to come into its own and give the people their own Government for the next four years [applause], and I hope in such a manner as will enable them to hold it for the next quarter of a century. [Applause.]

Mr. MANN. You have a great disappointment in store for you, then. [Laughter.]

Mr. ADAMSON. The distrust expressed by the Republicans has also been answered, I regret to say, by the distinguished chairman of the Committee on Appropriations in the wrong way. The gentleman from New Jersey did not mean distrust. I wish to give to the committee the true version of the motive that prompted those who voted for the two amendments which the gentleman from New York is trying to get rid of now. It is this: The incoming Democratic administration expects honestly to administer the law as it is written. Therefore we wish to do the country and the administration and ourselves the justice to see that that administration has the law in the proper shape to administer. [Applause.]

Mr. HAMILL. Mr. Chairman, I appreciate all the humor that has been injected into this discussion, and I appreciate also just how sound is the view taken by the distinguished gentleman, chairman of the Committee on Appropriations, in opposing the amendment which I have offered.

He puts his opposition to my amendment upon the ground that it expresses distrust of the incoming administration. Mr. Chairman, that is pure buncombe and nonsense, although the distinguished chairman did not mean it to be so.

We are here engaged in the business of legislation, and I would not vest any man with discretion in a case where I, as a legislator, could definitely tell him what to do.

Now, the chairman of the Committee on Appropriations assumes that labor unions will not be investigated by a Democratic Attorney General, because the Attorney General will be so friendly to labor that he would not for a moment think of conducting an investigation into a labor organization. Very well. It can not be any harm for us to express to him definitely, in the terms of a statute, precisely what the chairman indicates he would do if left to his own discretion. And it is no reflection upon anybody for this House to tell an officer of the Government how he shall expend an appropriation of public money which it, in its discretion and in its wisdom, chooses to appropriate. [Applause.] Therefore I hope the substitute will be defeated and that my amendment will be retained in the bill. [Applause.]

Mr. RODDENBERY. Mr. Chairman, I do not desire to question the parliamentary right of the chairman of the committee to offer this amendment——

Mr. FITZGERALD. There is no question about it——

Mr. RODDENBERY. But I do desire to submit to the members of this committee that a rule was adopted yesterday directing that the first and second reading of the bill should be dispensed with, which meant that under the rule the bill would be read paragraph by paragraph; that the Members here, who represent the people of the United States, might perfect this bill. We have now reached a paragraph in this bill. Members on the floor have offered two separate amendments to this paragraph. Those amendments have been discussed. The committee have adopted them. The paragraph is perfected according to the will of the committee. When the paragraph has been adopted according to the will of the committee, the chairman of the Appropriations Committee moves to strike out the paragraph as perfected by the committee, and now submits to you that because the will of the Committee on Appropriations, as expressed in the bill, has been altered, you gentlemen ought to walk up like senseless automatons and destroy the deliberate legislative fabric of which you are the responsible and capable architects. [Applause.]

Mr. SAUNDERS. Mr. Chairman, I submit that it is altogether a mistaken view to say that by engrafting these amendments on the pending bill, we are thereby put in the attitude of distrusting the incoming administration. On the contrary, we, the lawmaking department, are simply prescribing, as we have the right to do, the path in which the Executive shall walk. It is the duty of the executive department to enforce the laws as it finds them, and should it happen that the laws are written so broadly that they fairly cover by their terms subjects which were not within the original intent of the lawmaking department, it is not to be imputed as error to the executive department if it enforces the laws to the extent of those terms. But if it is historically true, as stated by the gentleman from Mississippi [Mr. SISSON] that it was not intended in the inception of the antitrust statute that it should apply to farm associations, or organized labor, it is altogether right that at this time we should except such associations, and organizations from the operations of this bill. In the beginning it was understood they should be excepted, and we are now seeking to make this understanding effective.

We have prescribed by the first amendment in effect that the operation of the antitrust law shall not attach to certain labor organizations. We have prescribed in effect by the second amendment that it shall not attach to certain organizations of farmers.

Mr. McKENZIE. Will the gentleman from Virginia assume to take the position that if a combination of farmers enters into a real, genuine trust, or if a combination of labor unions forms a trust that is injurious to the citizens of the country, the President of the United States and the Department of Justice should not have the power to investigate that matter?

Mr. SAUNDERS. That is the effect of these amendments.

Mr. McKENZIE. Do you think that is good legislation?

Mr. HAMILL. I beg the gentleman's pardon. The gentleman from Illinois [Mr. McKENZIE] assumes a condition that does not exist. Labor unions are not a trust. They do not corner labor, and their door is always open to the entrance of anybody who wants to come in and take advantage of it.

Mr. SAUNDERS. I will not enter into these distinctions. I am not attempting to go into the reasons why labor organizations should be excluded from the operations of the antitrust law, or why organizations of farmers combining to increase the price of the products of their farms should be exempted from the operations of the same law. I am simply seeking to bring out the fact, as stated by the gentleman from Mississippi that it was not intended in the beginning that these classes of our citizens should be included within the operations of this particular statute. Their operations were not to be considered as trusts, or intended to be inhibited. By the amendments adopted to-night by the vote of this body, we have in substance written into the existing law the fair intent of that law, as it was conceived in the beginning. That being so, it is altogether a mistaken attitude to treat this action as an expression of distrust of the incoming administration. Whether these amendments are good, or bad legislation is a matter that this body has disposed of when it wrote them into the pending bill. I do not propose to reopen the discussion on the merits of these amendments. But I am free to say that the arguments which have been advanced in support of the contention that labor organizations should be excepted from the operation of the antitrust laws, apply with far greater force to the second amendment which relates to associations of farmers.

We have adopted these amendments. Should we now with no sufficient reasons advanced undertake to undo the work that

we have done? There is every reason why we should abide by the action which we have taken.

Mr. FITZGERALD. Mr. Chairman, I move to close debate on the pending paragraph and amendments thereto.

Mr. GREEN of Iowa. Will the gentleman allow me two or three minutes?

Mr. FITZGERALD. I move to close the debate in three minutes.

The CHAIRMAN. The gentleman from New York moves that the debate on the paragraph and amendments thereto close in three minutes.

The motion was agreed to.

Mr. GREEN of Iowa. Mr. Chairman, I deny that the gentleman from Georgia [Mr. RODDENBERY] has correctly represented the farmers of this country. It is true that in the past there has been an effort made by some legislatures in some of the States, but so far as I know unsupported by the farmers' organizations, to provide that farmers as a class should not be subject to the same laws, rules, and regulations as other persons. But the proposition of the gentleman from Georgia goes far beyond this. It says, in effect, that the farmers of the country desire to break the laws and then desire not to be prosecuted for so doing. I deny that, as far as my constituents are concerned, and I represent the farming district.

Mr. SAUNDERS. It is not within the operation of the law.

Mr. GREEN of Iowa. Then if it is not within the operation of the law, as the gentleman from Virginia says in an undertone, there would be no necessity for it. My constituents do not ask any favors when it comes to breaking the law. They expect to obey the law, and they expect that those who do not obey the law will be punished.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken, and the amendment was lost.

The Clerk read as follows:

For 15 copies of volume 57 of the Lawyers' Cooperative Edition, $90.

Mr. COOPER. Mr. Chairman, I would like to ask the gentleman from Kentucky in regard to this provision, on page 125, line 15, "to pay the publishers of the Federal Reporter," etc., then, in lines 19 and 20, "for 15 copies of volume 57 of the Lawyers' Cooperative Edition, $90." What are those?

Mr. SHERLEY. Supreme Court's report.

Mr. COOPER. Ought it not to be inserted?

Mr. SHERLEY. That is ample; that language has been carried right along in the bill. There is only one edition of the Lawyers' Cooperative reports.

Mr. COOPER. But it does not say reports. It says Lawyers' Cooperative Edition.

Mr. SHERLEY. I have no objection to the gentleman offering the amendment.

Mr. COOPER. Mr. Chairman, I offer the following amendment: After the word "edition," line 20, insert the word "Supreme Court of the United States."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 125, line 20, after the word "edition," insert the words "Reports of the Supreme Court of the United States."

Mr. CULLOP. Mr. Chairman, these reports carry the decisions from all the different States. They are collected from decisions of different States of the Union. In addition to this, I see the price is fixed at $6 a volume. Is not that rather higher than they are usually sold for?

Mr. MANN. Where does the gentleman get the price of $6 a volume?

Mr. CULLOP. "Fifteen volumes at $90."

Mr. SHERLEY. The testimony before the committee was that would be the price of the new volumes.

Mr. CULLOP. Then, there must have been a change in the price.

Mr. SHERLEY. There has been a change in the price, as they are supposed to contain more decisions than heretofore.

Mr. PAGE. Mr. Chairman, the language in this paragraph has been carried in the bill from time to time, and I see no reason why the language should be changed or why the statute should be burdened with language absolutely unnecessary, and therefore I hope the amendment will be voted down.

Mr. COOPER. Mr. Chairman, the fact that the language has heretofore been carried in the statute is no reason why it should not be changed.

Mr. PAGE. There seems to have been no question about the language. It has been understood by everybody and there has been no confusion about it.

Mr. COOPER. The gentleman, in his anxiety to have the report of this committee and the bill as reported absolutely untouched, fails to acknowledge what is palpable to everybody else. Lines 19 and 20 constitute a paragraph, and there is not a word in the paragraph about reports of the Supreme Court of the United States. The paragraph—lines 19 and 20—is complete in itself, and provides simply for "15 copies of volume 57 of the lawyers' cooperative edition, $90." It is perfectly plain that it needs an amendment to make its meaning understood.

Mr. SHERLEY. If the gentleman will permit, the only edition that is known to the profession as the lawyers' cooperative edition of the Federal reports is the edition of the Supreme Court decisions.

Mr. COOPER. This does not say the lawyers' cooperative edition of the Federal reports, but only the "lawyers' cooperative edition."

Mr. SHERLEY. It does not need to, because there is a subdivision that is supposed to carry down in construction of the language. I have no objection to the gentleman's amendment, but no one, the comptroller or anybody else, has ever misunderstood the language.

Mr. ALEXANDER. Why might it not refer to the cooperative edition of the statutes?

Mr. COOPER. It could, except to the members of the committee.

Mr. SHERLEY. I will tell the gentleman why it could not, because the heading of the paragraph says Federal Court Reports and Digests. All of these are under that caption.

Mr. ALEXANDER. It is very apparent to me that the amendment ought to be made.

Mr. MANN. There is a law that governs it in any event. It does not make any difference.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken; and on a division (demanded by Mr. COOPER) there were—ayes 28, noes 24.

So the amendment was agreed to.

Mr. MANN. Mr. Chairman, I was listening and endeavoring to catch, but could not hear the Clerk when he read down to the paragraph just above. I desire to return to that paragraph for the purpose of moving to strike out the word "twelve," in line 18, and insert the word "thirteen."

Mr. PAGE. Mr. Chairman, the committee will accept that amendment.

The CHAIRMAN. Without objection the committee will return to that paragraph.

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

For supplies, including exchange of typewriting and adding machines for the United States courts and judicial officers, to be expended under the direction of the Attorney General, $35,000.

Mr. WARBURTON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

For support of the National Training School for Boys, District of Columbia: Superintendent, $2,500; assistant superintendent, $1,500; teachers and assistant teachers, $9,120; chief clerk, $1,000; storekeeper and steward, $600; matron of school, $600; parole officer, $900; office clerk, $720; assistant office clerk, $480; 6 matrons of families, at $240 each; foremen of and skilled helpers in industries, $3,800; farmer, $600; assistant farmer, $420; teamster, $360; florist, engineer, and shoemaker, at $540 each; baker, and tailor, at $600 each; cook, $480; assistant engineer, $420; laundress, $360; dining-room attendant, boys', $300; dining-room attendant, officers', $240; housemaid, $216; seamstress, $240; assistant cook, $300; nurse, $600; watchmen, not to exceed 8 in number, $3,360; secretary and treasurer to board of trustees, $900; in all, $34,270.

Mr. PAGE. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 136, line 9, strike out the figures "$34,270" and insert in lieu thereof the figures "$34,276."

Mr. PAGE. It is for the purpose of correcting the total.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

The Clerk read as follows:

In all, for National Training School for Boys, $45,770.

Mr. PAGE. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 136, line 24, strike out the figures "$45,770" and insert in lieu thereof the figures "$45,776."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

The Clerk read as follows:

UNDER THE DEPARTMENT OF COMMERCE AND LABOR.

LIGHTHOUSE SERVICE.

General expenses, Lighthouse Service: For supplies, repairs, maintenance, and incidental expenses of lighthouses and other lights, beacons, buoyage, fog signals, lighting of rivers heretofore authorized to be lighted, light vessels, other aids to navigation, and lighthouse tenders, including the establishment, repair, and improvement of beacons and day marks and purchase of land for same, the establishment of post lights, buoys, submarine signals, and fog signals, the establishment of oil or carbide houses, not to exceed $10,000: *Provided*, That no oil or carbide house erected hereunder shall exceed $550 in cost; the construction of necessary outbuildings at a cost not exceeding $200 at any one light station in any fiscal year, the improvements of grounds and buildings connected with light stations and depots, wages of laborers attending post lights, pay of temporary employees and field force while engaged on works of general repair and maintenance, and pay of laborers and mechanics at lighthouse depots; rations and provisions or commutation thereof for keepers of lighthouses, offices and crews of light vessels and tenders, and officials and other authorized persons of the Lighthouse Service on duty on board of such tenders or vessels, and money accruing from commutation for rations and provisions for the above-named persons on board of tenders and light vessels may be paid on proper vouchers to the person having charge of the mess of such vessels, reimbursement under rules prescribed by the Secretary of Commerce and Labor of keepers of light stations and masters of light vessels and of lighthouse tenders for rations and provisions and clothing furnished shipwrecked persons who may be temporarily provided for by them, not exceeding in all $5,000 in any fiscal year, fuel and rent of quarters where necessary for keepers of lighthouses, the purchase of land sites for fog signals, the rent of necessary ground for all such lights and beacons as are for temporary use or to mark changeable channels and which in consequence can not be made permanent, the rent of offices, depots, and wharves, traveling expenses, including per diem in lieu of subsistence under rules prescribed by the Secretary of Commerce and Labor not to exceed $4 per day, and mileage, library books for light stations and vessels, and technical books and periodicals not exceeding $1,000, and for all other contingent expenses of district offices and depots: *Provided*, That hereafter supplies and equipment for special works of the Lighthouse Service may be furnished from general stock and the appropriation "General expenses, Lighthouse Service," reimbursed therefor from the respective appropriations for special works, and for contingent expenses of the office of the Bureau of Lighthouses in Washington, $2,750,000.

Mr. COVINGTON. Mr. Chairman, I make the point of order against the proviso beginning with the word "*Provided*," in line 21, page 138, down to and including the words "special works," in line 25, it being new legislation.

Mr. SHERLEY. Mr. Chairman, we concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Hereafter when any condemned supplies, materials, equipment, or land can not be profitably used in the work of the Lighthouse Service, the same shall be appraised and sold, either by sealed proposals for the purchase of the same, or by public auction, after advertisement of the sale for such time as in the judgment of the Secretary of Commerce and Labor the public interest may require, the proceeds of such sales, after the payment therefrom of the expenses of making the same, to be deposited and covered into the Treasury as miscellaneous receipts, as now provided by law in like cases.

Mr. COVINGTON. Mr. Chairman, I make the point of order that the paragraph is new legislation.

Mr. SHERLEY. Mr. Chairman, we concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Salaries, Lighthouse Service: For salaries of 17 lighthouse inspectors, and of clerks and other authorized permanent employees in the district offices and depots of the Lighthouse Service, exclusive of those regularly employed in the office of the Bureau of Lighthouses, Washington, D. C., $360,000.

Mr. CALDER. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Page 139, after line 25, add the following:

"*Provided*, That each and every employee of the Lighthouse Service compensated at a per diem rate of pay be, and is hereby, granted 15 working days' leave of absence each year without forfeiture of pay during such absence: *Provided*, That no employee of the class herein mentioned shall be entitled to any leave until he has served 12 consecutive months, when he may be granted 15 days' leave, and that during the second or any subsequent year 15 days' leave at the rate of one and one-fourth days per month, as earned, may be granted from the beginning of the second service year: *Provided further*, That the inspectors of the several lighthouse districts shall have discretion as to the time when the leave can be allowed without detriment to the service, and that absence on account of sickness shall be deducted from the leave hereby granted."

Mr. SHERLEY. I reserve the point of order for five minutes.

Mr. CALDER. Mr. Chairman, this amendment was prepared by the Lighthouse Bureau. Its passage is recommended by that bureau. It puts the mechanics and laborers in the Lighthouse Bureau in exactly the same position as mechanics in the other bureaus of the Department of Commerce and Labor. Congress has from time to time passed provisions putting mechanics and laborers in the different departments of the Government in such position that they might have 15 days' leave of absence each year with pay. In the city of Washington we give the employees of the Bureau of Engraving and Printing and in the Government Printing Office 30 days' leave of absence with pay. Previous to the creation of the Bureau of Lighthouses these same mechanics and laborers were given 15 days' leave of absence with pay, but the Comptroller of the Treasury has so construed the law that they are not allowed any leave of absence under the present arrangement. It seems to me that these men are entitled to the same consideration given men employed in the navy yards and arsenals, and I hope the gentleman from Kentucky will see fit to withdraw his point of order and permit these men to be treated fairly.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. CALDER. Yes.

Mr. MANN. The Committee on Interstate and Foreign Commerce has just had stricken out of the bill two items, which they recently recommended to the House, on the ground that they did not belong in this bill.

Does this amendment, coming from another member of the Committee on Interstate and Foreign Commerce, meet the approval of that committee, and do they desire to have this amendment inserted in this bill, having just stricken out of the bill other provisions they believe in but thought another committee ought not interfere with them?

Mr. CALDER. Mr. Chairman, I have not been authorized by the Committee on Interstate and Foreign Commerce to propose this amendment. Nevertheless the Secretary of Commerce and Labor has recommended this amendment, and the Department of Commerce and Labor drew it and handed it to me.

Mr. SHERLEY. Can the gentleman state the position of his committee, because we would like to know. If they want to protect their jurisdiction, we are glad to help them; if they do not, we would like to know about it.

Mr. CALDER. I presented the amendment, thinking perhaps this would be the only opportunity to have justice done to these men at this session of Congress.

Mr. MANN. The gentleman does not assume that the Committee on Interstate and Foreign Commerce will not do justice to these men?

Mr. CALDER. Oh, no; but the condition of legislation at this time is such that a measure of this kind can not be passed, except in some such manner as this.

Mr. SHERLEY. Is that the reason for making the point of order to the provision which has just gone out?

Mr. CALDER. I am not in the confidence of the gentleman who made the point of order. He did not tell me he intended to do so.

Mr. PAGE. The members of the Appropriations Committee thought as did the gentleman from New York, and for that reason they put this item in the bill.

Mr. MADDEN. The gentleman from New York understands the disposition on the part of the Committee on Appropriations to do justice wherever we——

Mr. CALDER. I trust the point of order will be withdrawn.

Mr. SHERLEY. I will withdraw the point of order.

Mr. PAGE. I make the point of order.

The CHAIRMAN. The gentleman from North Carolina makes the point of order, and the point of order is sustained.

The Clerk read as follows:

For offshore soundings and examination of reported dangers on the coasts of the United States, and of coasts under the jurisdiction of the United States, and to continue the compilation of the Coast Pilot, and to make special hydrographic examinations, and including the employment of such pilots and nautical experts in the field and office as may be necessary for the same, $15,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. Can one of the gentlemen of the committee inform us what the appropriation for this item was last year?

Mr. PAGE. What is the item?

Mr. MOORE of Pennsylvania. For compilation of the Coast Pilot, page 141, beginning with line 8.

Mr. PAGE. It is the same appropriation carried in this bill, $15,000.

Mr. MOORE of Pennsylvania. Well, the bureau has recommended publishing an inland Coast Pilot that is of very great value. I have just seen a copy of it during the last few days. There undoubtedly will be a heavy demand for that publication, and I would like to know to what extent it is to be published, if the gentleman knows.

Mr. PAGE. The department made no recommendation to the committee. There was no estimate made for any other publication.

Mr. MOORE of Pennsylvania. The publication is to be sold, is it?

Mr. PAGE. I believe so.

Mr. MOORE of Pennsylvania. Not allotted to Members of Congress to any large extent?

Mr. PAGE. There is an appropriation for printing, and it is available for printing this document to be put on sale.

Mr. MOORE of Pennsylvania. It is to be put on sale in the regular way?

Mr. PAGE. In the regular way.

Mr. MOORE of Pennsylvania. The copy I have seen is one of the most valuable waterways publications of which I have knowledge.

Mr. MANN. Buy it.

Mr. MOORE of Pennsylvania. I am perfectly willing to buy it for myself, answering the gentleman from Illinois, but there will be a very heavy demand for this publication whether it is for sale or for distribution through Members of Congress, and I do not think that any appropriation heretofore has been spent for the publication of an inland Coast Pilot. Am I right about that?

Mr. FITZGERALD. The proper course to pursue would be to introduce a resolution providing for printing it as a House document and putting at the disposal of Members a number of the documents.

Mr. MOORE of Pennsylvania. It contains diagrams and maps. It is a chart.

Mr. PAGE. I understand there is a provision of law that places 10 copies of this to the credit of each Member of Congress.

Mr. MANN. Ten what?

Mr. PAGE. Ten charts.

Mr. MOORE of Pennsylvania. I withdraw the pro forma amendment.

The Clerk read as follows:

BUREAU OF FISHERIES.

Office of commissioner: Commissioner, $6,000; deputy commissioner, $3,500; chief clerk, $2,400; accountant, $2,100; librarian, $1,500; clerks—1 of class 4, 3 of class 3, 1 to commissioner $1,600, 1 of class 1, 1 $1,000, 10 at $900 each; engineer, $1,080; 3 firemen, at $720 each; 2 watchmen, at $720 each; 5 janitors and messengers, at $720 each; janitress, $480; messenger boy, $360; 4 charwomen, at $240 each; in all, $44,980.

Mr. RAKER. Mr. Chairman——

Mr. FOWLER. Mr. Chairman, I make a point of order against the paragraph. The provision of the statute of January 20, 1888, provides as follows:

There shall be appointed by the President, by and with the advice and consent of the Senate, a person of scientific and practical acquaintance with fish and fisheries, to be a Commissioner of Fish and Fisheries, and he shall receive a salary at the rate of $5,000 a year, and he shall be removable at the pleasure of the President.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FITZGERALD. Mr. Chairman, I move to amend by inserting in lieu of "$6,000," which was stricken out, "$5,000."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FOWLER. I do not desire to press a point of order against the librarian at $1,500.

Mr. RAKER. Mr. Chairman, I would like to ask the gentleman in charge of the bill what is the total amount provided for under the Bureau of Fisheries, including the stations and all. I thought it was in the bill here, but I do not find the total. I would like to know what it is.

Mr. FITZGERALD. It is $989,140.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. I simply want to call the committee's attention to a condition of the fisheries in the Truckee River. I do not suppose the committee would submit to an amendment placing on here an appropriation of $10,000 for putting a fish ladder in the Truckee River at the Derby Dam?

Mr. FITZGERALD. The committee has never carried an appropriation establishing a fish hatchery unless it was authorized by law. It must originate in the Committee on the Merchant Marine and Fisheries.

Mr. RAKER. I want to call the committee's attention to this: Here is something over $9,000 being expended in the propagation and handling of fish. Here is a dam, built by the Government at many millions of dollars' expense, on a stream well supplied with mountain trout and salmon trout from Pyramid Lake, into the recesses of the Truckee River and into Lake Tahoe, and within the last two years there has been a loss in fish of at least $150,000. Upon both sides of the stream during the running season, with this dam there, built by the Government and being maintained by the Government, practically loads upon loads of fish from 1 foot to 2½ feet long go to waste. There has been a slight appropriation of $2,000 for the dam, but the State of California and the State of Nevada, through their legislatures, are urging a proper dam to be built there.

I want to call the committee's attention to the fact of the expenditure of money in a matter of this kind, when there are such conditions as we actually have, a lake 60 miles in length by 22 miles wide, namely, Lake Pyramid, and then the river that flows into it, and having its source in the Sierra Nevada Mountains, a part of it in Lake Tahoe, where thousands, or at least $150,000, worth of property of the Government has been destroyed within the last two years, it does seem as though some provision ought to be made by which it can be prevented.

While we have a bill before the Committee on Irrigation, the matter has come so late it seems there ought to be some provisions made for that when, by the mere expenditure of a reasonable amount at this time, where it is necessitated by the Government work, it could be done. We might go ad libitum into building fish hatcheries, and have more superintendents and architects putting in stations to propagate fish and send them all over the country; and while we are doing that we idly permit the destruction of that property that we actually have and that is worth many hundreds of thousands of dollars to us. I did not know but that the committee might see its way clear to permit an amendment here at this time so as to prevent any possible question as to this matter. The fish commissioner of California and the fish commissioner of Nevada have looked into this matter. I have many affidavits on the subject and photographs showing the actual conditions. Of course, the Department of the Interior is taking some action, but the legislatures of these States and the authorities are persistent in the matter and proper relief should be given. The property of the Nation ought to be provided for, particularly where the Government itself goes in and builds these dams.

Mr. FITZGERALD. I think what the gentleman speaks of is fish ladders. They are not provided for.

Mr. RAKER. There would not be any way to get it in the bill at this time?

Mr. FITZGERALD. Provision is usually made for that in the act erecting the dam. It seems to me the Government engineers in erecting this dam for irrigation purposes should have made provision for the ladder.

Mr. RAKER. There is a small ladder, but it is not sufficient, as claimed by both States. And if a provision was to be made, it would tend to relieve the tension of the States of California and Nevada and bring about splendid results.

The Clerk read as follows:

Afognak (Alaska) Station: Superintendent, $1,500; foreman, $1,200; 2 skilled laborers, at $960 each; 3 laborers, at $900 each; cook, $599; in all, $8,220.

Mr. KNOWLAND. Mr. Chairman, I move to strike out the last word, for the purpose of asking unanimous consent that I may submit, in connection with the remarks I made to-day in regard to the Yosemite Valley, two letters from the department touching those appropriations.

The CHAIRMAN. The gentleman from California [Mr. KNOWLAND] asks unanimous consent to extend his remarks in the RECORD by the insertion of two letters indicated by him. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Division of Alaska Fisheries: Chief of division, $3,500; assistant, $1,800; clerks—1 of class 2, 1 of class 1, 1 $900; 2 agents and caretakers, at $2,000 each; janitor service, fur-seal fisheries, $480; 2 physicians, Pribilof Islands, at $1,500 each; 2 school-teachers, Pribilof Islands, at $1,200 each; storekeeper, Pribilof Islands, $1,800; for the following, to be appointed by the Secretary of Commerce and Labor—agent, Alaska salmon fisheries, $2,500; inspector, Alaska salmon fisheries, $1,800; assistant agent, Alaska salmon fisheries, $2,000; assistant agent, Alaska salmon fisheries, $1,800; warden, Alaska service, $1,200; 4 deputy wardens, Alaska service, $900 each; in all, $33,380.

Mr. PAGE. Mr. Chairman, I ask unanimous consent that the paragraph just read may be passed over for the present because of the fact that two gentlemen who are interested in that paragraph are absent to-night, and one of them is a member of the committee.

Mr. MADDEN. Mr. Chairman, I offer an amendment to the paragraph, which I send to the Clerk's desk.

Mr. PAGE. Let the amendment be considered as pending.

The CHAIRMAN. The gentleman from North Carolina [Mr. PAGE] asks unanimous consent that the paragraph may be passed over for the present, and the gentleman from Illinois [Mr. MADDEN] offers an amendment, which, without objection, will be considered as pending. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. MANN].

The Clerk read as follows:

On page 152, in line 16, strike out the words "two agents and caretakers, at $2,000 each," and insert in lieu thereof "agent, fur-seal fisheries, $3,650; assistant agent, fur-seal fisheries, $2,920; 2 assistant agents, at $2,190 each; naturalist, fur-seal service, $3,000." In line 18 of the same page strike out the word "two" and insert in lieu thereof the word "three." In line 24 of the same page strike out "$1,200" and insert in lieu thereof "$1,500." In line 1 of page 153 strike out "$900" and insert in lieu thereof "$1,200."

Mr. FITZGERALD. Mr. Chairman, I reserve a point of order on the amendment.

Mr. MADDEN. It is not subject to a point of order.

Mr. FITZGERALD. I want to find that out.

Mr. MADDEN. Mr. Chairman, I wish to ask, before consent to pass this paragraph over is given, is it the intention of the committee to finish the bill to-night and then go back to this item before we adjourn?

Mr. FITZGERALD. We can hardly finish the bill to-night, but we will do as much as possible. I doubt if we can finish the bill to-night. There are some matters that will probably take considerable time, and it will be necessary to dispose of them to-morrow.

Mr. MADDEN. I have no objection.

The CHAIRMAN. Without objection, the paragraph will be passed over.

There was no objection.

Mr. BURNETT. Mr. Chairman, I would like to ask the gentleman from New York [Mr. FITZGERALD] how long this will take?

Mr. FITZGERALD. Oh, an hour or two.

Mr. BURNETT. Then I make the point of no quorum.

Mr. FITZGERALD. I hope the gentleman will withhold his point.

Mr. BURNETT. I will withhold it for the present.

Mr. FITZGERALD. There are a number of items in the bill, routine matters, that are not controverted, and the committee can easily run through them.

Mr. BURNETT. I will withhold my point of no quorum for a short time.

The CHAIRMAN. The paragraph will be passed over with the amendment of the gentleman from Illinois [Mr. MADDEN] considered as pending and a point of order reserved on the amendment. The Clerk will read.

The Clerk read as follows:

Propagation of food fishes: For maintenance, equipment, and operations of the fish-cultural stations of the bureau, the general propagation of food fishes and their distribution, including the moving, maintenance, and repairs of cars, purchase of equipment and apparatus, contingent expenses, and temporary labor, $335,000.

Mr. EDWARDS. Mr. Chairman, I wish to offer an amendment. I move to strike out the period after that paragraph, insert a comma, and insert the following language at the place I suggest, on line 15, page 153.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Georgia [Mr. EDWARDS].

The Clerk read as follows:

Amend, page 153, line 15, after the figures "335,000," by inserting the following:

"*Provided*, That not to exceed $25,000 of this amount shall be used for the establishment of a fish-cultural station in the State of Georgia, for the propagation of shad and other fishes, including purchase of site, construction of buildings and ponds, and equipment, at some suitable point, to be selected by the Secretary of Commerce and Labor."

Mr. FITZGERALD. Mr. Chairman, I make a point of order against that.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] makes a point of order against the amendment

Mr. MANN. Mr. Chairman, I call for the regular order.

Mr. EDWARDS. I would like, Mr. Chairman, to discuss the point of order.

Mr. FITZGERALD. I make the point of order that the station is not authorized by law.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] makes a point of order, and the gentleman from Georgia [Mr. EDWARDS] desires to discuss the point of order.

Mr. FITZGERALD. Then I will reserve the point of order.

Mr. MANN. Mr. Chairman, I will reserve a point of order; and, pending that, I make a request for unanimous consent that all Members who have an item which they wish to present as an amendment to any paragraph in this bill may have five minutes in which to advocate its adoption. [Laughter.]

Mr. FITZGERALD. I make the point of order, Mr. Chairman.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Inquiry respecting food fishes: For expenses of the inquiry into the causes of the decrease of food fishes in the waters of the United States, and for investigations and experiments in respect to the aquatic animals, plants, and waters, in the interests of fish culture and the fishery industries, including expenses of travel and preparation of reports, and for all other necessary expenses in connection therewith, $40,000.

Mr. MOORE of Pennsylvania. Mr. Speaker, I move to strike out the last word. I should like to ask to what extent this appropriation for an investigation of the destruction of fish has been used heretofore in relation to what are known as the menhaden fisheries along the coast? This item has been in the bill before——

Mr. FITZGERALD. So far as I am informed, there has been no investigation of the menhaden fisheries.

Mr. MOORE of Pennsylvania. To whom are these reports of investigations of the decrease of fishes made?

Mr. FITZGERALD. To the Secretary of Commerce and Labor.

Mr. MOORE of Pennsylvania. One of the reasons for the decrease of food fish in northern waters is the catches made by those who are known as menhaden fishers, who seek them for fertilizing purposes. It is commonly understood that food fish are very generally destroyed in this way. We have very little information on this subject, and I should like to know whether any reports have been made as the result of these expenditures heretofore.

Mr. FITZGERALD. I am not familiar with the reports that have been made. I know something about the menhaden fisheries. They take those fish for the oil and also utilize what is left for fertilizer.

Mr. MOORE of Pennsylvania. Forty thousand dollars a year is a large sum to spend for investigations of this kind. Where are the investigations made? In what particular waters are they carried on—inland waters or on the coast? The destruction of fish occurs very largely on the coast.

Mr. FITZGERALD. Inland waters, coast waters, lakes, and whatever places are called to the attention of the Commissioner of Fisheries.

Mr. MOORE of Pennsylvania. Forty thousand dollars is spent annually for this purpose. Can the gentleman give the net results of these investigations? The decrease of food fishes is a serious matter, which enters into the food supply and the cost of living. There is a decrease of food fishes in northern inland waters and along the north Atlantic coast. It is due to certain causes. If we spend $40,000 a year to investigate, why can we not ascertain what the causes are?

Mr. EDWARDS. That same condition exists all down the Atlantic coast.

Mr. MOORE of Pennsylvania. There are reasons why the fish disappear, and some of them are not wholly natural. The spreading of oil upon the water is one reason, the catching of food fish for fertilizer is another reason. Are we getting any results from the expenditure of $40,000 a year for this purpose?

Mr. KENDALL. Somebody suggested yesterday that the food fishes on the Pacific coast were being taken by great corporations that were converting them into fertilizer. Is that true or not?

Mr. MOORE of Pennsylvania. I am trying to find out whether we get any results from this expenditure.

Mr. FITZGERALD. The committee went very exhaustively into this matter last year. The Commissioner of Fisheries made this statement:

The scientific investigations of the bureau are directed primarily to the improvement of methods of fish culture, to the determination of the conditions in lakes and streams with respect to the introduction of fishes, and the development of fisheries, such, for instance, as those for oysters, sponges, etc., which, from their nature, are not susceptible of benefit by means of the ordinary methods of fish culture. Some of the recent results obtained are as follows: Inquiries resulting in the improvement of the oyster laws and methods of oyster culture of Delaware, Maryland, North Carolina, South Carolina, Alabama, and Louisiana. In the latter State the oyster fishery has risen from 959,000 bushels to 4,504,000 bushels per annum. Since the adoption of the bureau's recommendations thousands of acres of previously barren bottoms are now productive. The oyster fishery of the United States has an annual value to the fisherman of $16,000,000.

Mr. MOORE of Pennsylvania. If the gentleman will pardon me, I do not care to have him read all that——

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. I ask for two minutes more.

The CHAIRMAN. The gentleman from Pennsylvania asks for two minutes more. Is there objection?

There was no objection.

Mr. FITZGERALD. I am giving the information the gentleman requested as to the value of these investigations and their character.

Mr. MOORE of Pennsylvania. I do not think it answers the question that I put to the gentleman a moment ago. Forty thousand dollars a year is being spent, for what purpose? For an inquiry into the causes of the decrease of food fishes in the waters of the United States. Now, we have no information as to whether we have investigated the cause of the decrease, because apparently the causes are not reported. Even if they were reported, we have nothing to show that the $40,000 expenditure results in any steps taken to prevent the decrease.

Mr. FITZGERALD. The gentleman is mistaken. The reports are published, but I do not have time to read the reports of all of the investigations made by the departments of the Government.

Mr. MOORE of Pennsylvania. I understand that, but there ought to be some justification before the committee of the expenditure of $40,000, and some remedy should be applied.

Mr. FITZGERALD. I was trying to give the gentleman information, but he declines to permit me. These reports are very full and lucid, and I would be very glad to have the gentleman read them himself at his leisure.

Mr. MANN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I will.

Mr. MANN. What makes the gentleman say that there are $40,000 expended for inquiry into the causes of the decrease of food fishes?

Mr. MOORE of Pennsylvania. Because that is what the paragraph states, beginning on line 21 and line 22.

Mr. MANN. Then it says, "And for investigations and experiments in respect to the aquatic animals, plants, and waters in the interests of fish culture," and so forth. That is what the money is expended for.

Mr. MOORE of Pennsylvania. We are inquiring into what everybody knows to be the true reason for the decrease of food-fish supply in the northern waters.

The CHAIRMAN. The time of the gentleman has again expired.

The Clerk read as follows:

Alaska fur-seal fisheries protection and support: For protecting the seal fisheries of Alaska, including the furnishing of food, fuel, clothing, and other necessities of life to the natives of the Pribilof Islands of Alaska, transportation of supplies to and from the islands, traveling expenses and subsistence for caretakers while on said islands, and for all other expenses necessary to carry out the provisions of the act approved August 24, 1912, entitled "An act to give effect to the convention between the Governments of the United States, Great Britain, Japan, and Russia for the preservation and protection of the fur seals and sea otter which frequent the waters of the north Pacific Ocean, concluded at Washington July 7, 1911," and for the protection of the salmon fisheries of Alaska, including travel, hire of boats, employment of temporary labor, and all other necessary expenses connected therewith, $75,000.

Mr. HARRISON of Mississippi. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the committee if this includes an appropriation for the sale of the skins at these islands?

Mr. FITZGERALD. I am not sure out of which particular appropriation the expenses of travel and selling the skins are paid.

Mr. HARRISON of Mississippi. Has the gentleman got any information as to what revenue was derived last year from the sale of the skins?

Mr. FITZGERALD. Three hundred and some odd thousand dollars.

Mr. HARRISON of Mississippi. The reason I ask is that since they have stopped pelagic killing I thought they would get a larger revenue than they did formerly.

Mr. FITZGERALD. Under the recent treaty all killing is stopped for a period of five years except such killing as may be necessary to furnish fresh meat to the natives.

Mr. HARRISON of Mississippi. Does the gentleman know whether the revenue was increased last year?

Mr. FITZGERALD. The last sale was under the former law. I will give the gentleman the exact figures.

Mr. KENDALL. Has there been any previous appropriation under this head?

Mr. FITZGERALD. Yes.

Mr. KENDALL. What was the amount of the appropriation last year?

Mr. FITZGERALD. Ninety thousand dollars.

Mr. KENDALL. Has the gentleman any information as to how the money was disposed of?

Mr. FITZGERALD. Yes.

Mr. KENDALL. For whom?

Mr. FITZGERALD. They expended it largely in the purchase of supplies which are sent up to the Pribilof Islands to be distributed among the natives.

Mr. KENDALL. I think the gentleman is mistaken in saying that the money that went up to support the natives came out of this appropriation.

Mr. FITZGERALD. It does come out of this appropriation.

Mr. KENDALL. I know it is in this bill.

Mr. FITZGERALD. This very item says "including the furnishing of food, fuel, clothing, and other necessities of life to the natives of the Pribilof Islands."

Mr. KENDALL. Has that language been in former appropriations?

Mr. FITZGERALD. Yes. That part of the provision is not changed. This is the item out of which that is paid.

The Clerk read as follows:

For the construction of two steel cars for the distribution of useful food fishes to take the place of cars Nos. 2 and 5, obsolete and unsafe, $30,000.

Mr. SISSON. Mr. Chairman, I will ask the gentleman from New York how many of these cars they have.

Mr. FITZGERALD. I think there are four cars, but they are all of wood. They are very old, and a number of railroads do not permit wooden cars to be put in trains.

Mr. SISSON. My purpose in asking is because in a great many sections of the country, and especially in the section I represent, there has been some little trouble in getting the fish distributed on time, and the complaint has been that it is because of lack of cars.

Mr. FITZGERALD. They need the cars and they should be built of steel to meet modern conditions.

The Clerk read as follows:

For payments to be made to Great Britain and Japan under the terms of article 11 of the convention for protection and preservation of the fur seal and sea otters in lieu of their share of sealskins for the yearly seasons of 1912 and 1913, and in accordance with the act of August 24, 1912, to give effect to the above-named convention, of which amount the sum of $20,000 shall be immediately available, $40,000.

Mr. HELM. Mr. Chairman, it is now about 25 minutes after 10 o'clock. We are starting on a new heading in the bill, and it occurs to me that there is no quorum present.

Mr. FITZGERALD. Mr. Chairman, I suggest to the gentleman that I have to start in at 9 o'clock in the morning. I desire to finish this bill and then prepare the general deficiency bill. I think the gentleman should permit us to work at least as long as the House is willing to stay, so that we may finish what we can that is not controverted. I would like to finish the work, and unless I am permitted to work 17 or 18 hours a day it can not be done.

Mr. HELM. Mr. Chairman, I am afraid the gentleman will overwork himself, and I make the point of no quorum.

The CHAIRMAN. The gentleman from Kentucky makes the point of no quorum. The Chair will count. [After counting.] Eighty-three Members present; not a quorum.

Mr. FITZGERALD. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28775, the sundry civil bill, and had come to no resolution thereon.

ADJOURNMENT.

Mr. FITZGERALD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 26 minutes p. m.) the House adjourned until to-morrow, Friday, February 21, 1913, at 10.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of New River from Radford, Va., to Hinton, W. Va. (H. Doc. No. 1410); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

2. A letter from the Acting Secretary of Commerce and Labor, transmitting a list of useless papers on file in the department, and requesting authority to destroy the same (H. Doc. No. 1409); to the Committee on Disposition of Useless Executive Papers and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HOWLAND, from the Committee on the Judiciary, to which was referred the bill (S. 7385) to relinquish the claim of the United States against the grantees, their legal representatives and assigns, for timber cut on Petaca land grant, reported the same without amendment, accompanied by a report (No. 1554), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. LEE of Georgia, from the Committee on War Claims, to which was referred the resolution (H. Res. 850) referring certain claims to the Court of Claims for finding of facts and conclusions of law under section 151 of the act of March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to the judiciary" (Public act No. 475, 61st Cong., 2d sess., p. 1138), reported the same with amendment, accompanied by a report (No. 1553), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. FARR, from the Committee on Claims, to which was referred the bill (S. 7488) for the relief of George L. Thomas, reported the same without amendment, accompanied by a report (No. 1555), which said bill and report were referred to the Private Calendar.

Mr. DICKINSON, from the Committee on Claims, to which was referred the bill (H. R. 5448) for the relief of Fred A. Emerson, reported the same with amendment, accompanied by a report (No. 1556), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GODWIN of North Carolina: A bill (H. R. 28810) to authorize the Virginia & Carolina Southern Railroad Co. to construct a bridge across the Lumber River at or near the town of Lumberton, N. C.; to the Committee on Interstate and Foreign Commerce.

By Mr. HAY: A bill (H. R. 28811) to reduce the number of officers of the Army; to the Committee on Military Affairs.

By Mr. PADGETT: A bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. HOUSTON: A bill (H. R. 28820) providing for the publication of the Official Register of the United States; to the Committee on the Census.

By Mr. HUMPHREYS of Mississippi: A resolution (H. Res. 855) to extend the jurisdiction of the Committee on Rivers and Harbors; to the Committee on Rules.

By Mr. BURLESON: A Resolution (H. Res. 856) to nonconcur in gross in Senate amendments to H. R. 28499; to the Committee on Rules.

By Mr. WEBB: A resolution (H. Res. 857) directing the Attorney General to furnish the House of Representatives with certain information; to the Committee on the Judiciary.

By Mr. PETERS: Resolutions of the general court of the Commonwealth of Massachusetts, favoring the establishment of an international commission on the cost of living; to the Committee on Foreign Affairs.

By Mr. CALDER: Joint resolution of the Senate and House of Representatives of the Legislature of the State of Wyoming, ratifying an amendment to the Constitution of the United States granting Congress the power to levy a tax on incomes; to the Committee on Ways and Means.

By Mr. LA FOLLETTE: Senate joint memorial of Washington State Legislature, asking Government resurvey of Palouse irrigation project, Franklin County, Wash.; to the Committee on Irrigation of Arid Lands.

Also, senate joint memorial of Washington State Legislature, urging legislation by Congress to restrict immigration of undesirable foreigners; to the Committee on Immigration and Naturalization.

Also, senate joint memorial of Washington State Legislature, urging passage of H. R. 5966, providing monuments to mark the Oregon trail; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HAMLIN: A bill (H. R. 28813) granting an increase of pension to George T. Johnson; to the Committee on Invalid Pensions.

By Mr. MARTIN of Colorado: A bill (H. R. 28814) for the relief of Hannibal E. Peck; to the Committee on War Claims.

Also, a bill (H. R. 28815) granting a pension to Daisy D. Knox; to the Committee on Pensions.

By Mr. RAKER: A bill (H. R. 28816) for the relief of Bert Harris; to the Committee on Claims.

By Mr. VOLSTEAD: A bill (H. R. 28817) granting a pension to Ervin Everson; to the Committee on Pensions.

Also, a bill (H. R. 28818) granting an increase of pension to Rosa C. Barnes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28819) granting an increase of pension to Clara M. McCrady; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Builders' Exchange League, of Pittsbugh, Pa., favoring the passage of the McLean bill providing for the protection of all migratory birds; to the Committee on Agriculture.

By Mr. ALLEN: Petition of the United Mine Workers of America, Columbus, Ohio, favoring the passage of legislation for an investigation of the West Virginia coal strike; to the Committee on Labor.

By Mr. ANDERSON: Petition of business men of Fountain, Minn., favoring the passage of legislation to compel concerns selling direct to the consumer by mail to pay their share in the expenses for building up the local community—county and State; to the Committee on Interstate and Foreign Commerce.

By Mr. CALDER: Petition of Weed & Kennedy, of New York, favoring the passage of Senate bill 6497, introduced by Mr. McLEAN, for the protection of migratory birds; to the Committee on Agriculture.

Also, petition of the Retail Dry Goods Association, New York, protesting against the passage of House bill 27148, for transferring the classification of books from third to fourth class; to the Committee on the Post Office and Post Roads.

Also, petition of Mrs. John B. Salo, Brooklyn, N. Y., favoring the passage of House bill 25685, for the labeling of all goods and articles intended for sale under interstate commerce; to the Committee on Interstate and Foreign Commerce.

Also, petition of Geiger Spring and 5 other citizens of New York, favoring the passage of House joint resolution 393, providing for the giving of gold medals to all the Gettysburg survivors on the occasion of the fiftieth aniversary, July, 1913; to the Committee on Military Affairs.

Also, petition of the Merchants' Association of New York, favoring the passage of legislation for the adoption of the national budget and for changing laws and practices now regulating Federal expenditures; to the Committee on Ways and Means.

Also, petition of members of the Loyal Legion and others, favoring the passage of the bill recommending the adoption of the Star Spangled Banner as the national anthem; to the Committee on the Library.

By Mr. DAVIS of Minnesota: Petition of the Audubon Society of Gaylord, Minn., and the Gohper Campfire Club, of Hutchinson, Minn., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

Also, petition of the Minnesota State Dairymen's Association, favoring the passage of a law defining the percentage of butter fat legal butter should contain; to the Committee on Agriculture.

Also, petition of the Minnesota State Senate, favoring the passage of Federal legislation authorizing national banks to make loans on farm-mortgage securities; to the Committee on Banking and Currency.

Also, petition of the Minnesota Educational Association, favoring the passage of legislation for the establishment of a national university in Washington, D. C.; to the Committee on Education.

Also, petition of the Fergus Falls (Minn.) Scandinavian Temperance Union, favoring the passage of the Kenyon-Sheppard bill, preventing the shipment of intoxicating liquors into dry territory; to the Committee on the Judiciary.

Also, petition of the Dakota County (Minn.) Good Roads Association, favoring the passage of the bill for Federal aid for road construction; to the Committee on Agriculture.

Also, petition of the Minnesota State Dairymen's Association, Nicollet, Minn., favoring the passage of the Haugen bill for preventing any fraud and deceit to be practiced on the producer and consumer of pure butter; to the Committee on Agriculture.

By Mr. DYER: Petition of the Cook County Truck Gardeners' Association, of Riverdale, Ill., protesting against legislation for

the reduction of the present tariff on sugar; to the Committee on Ways and Means.

Also, petition of the National Liquor League of the United States, Chicago, Ill., and Joseph Delabar, St. Louis, Mo., favoring the passage of legislation eliminating the item appropriating $5,500 for sending delegates to the International Congress on Alcoholism; to the Committee on Foreign Affairs.

Also, petition of H. E. Willis, national legislative representative of the Brotherhood of Locomotive Engineers, Washington, D. C., favoring the passage of the workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of the Second Baptist Church, George A. Edgar, Northern Baptist Convention, St. Louis Christian Ministers' Association, and Oak Hill Presbyterian Church, all of St. Louis, Mo., favoring the passage of the Kenyon-Sheppard interstate liquor bill (S. 4043) prohibiting the shipment of intoxicating liquors into dry territory; to the Committee on the Judiciary.

Also, petition of the Missouri Naval Reserves, St. Louis, Mo., favoring early action by Congress on the Naval Militia bill (H. R. 2588) for promoting the efficiency of the Naval Militia, etc.; to the Committee on Naval Affairs.

By Mr. ESCH: Petition of 150 Methodist Episcopalians of Reedsburg, Wis., favoring the passage of the amendment to House bill 27876 providing for the closing of the gates of the Panama-Pacific Exposition on Sundays; to the Committee on Industrial Arts and Expositions.

Also, petition of the Cook County Truck Gardeners and Farmers' Association, Riverdale, Ill., protesting against the passage of legislation for the reduction of the present tariff on sugar; to the Committee on Ways and Means.

By Mr. GARDNER of Massachusetts: Petition of the General Court of Massachusetts, favoring the passage of a bill for the establishment of an international commission on the high cost of living; to the Committee on Foreign Affairs.

By Mr. GOULD: Petition of citizens of Boston, Mass., favoring the passage of the McLean bill (S. 6497), for protection of migratory birds; to the Committee on Agriculture.

By Mr. HAYES: Petition of San Jose Grange, No. 10, Patrons of Husbandry, of San Jose, Cal., and the Audubon Society of San Francisco, Cal., favoring the passage of Senate bill 6497, for protection of migratory birds; to the Committee on Agriculture.

Also, petition of the Woman's Club of Palo Alto, Cal., favoring the passage of legislation making further appropriations for the suppression of the white-slave traffic; to the Committee on Appropriations.

Also, petitions of Flournoy Carter, of Oxnard; Henry D. Hall, of Santa Cruz; George L. Reese, of Ventura; W. C. Werry, of Palo Alto; H. F. Kehworthy, of Salinas; Leslie W. Fritz, of Pacific Grove; Lillian F. Billings, of Santa Clara; George E. Kirby, of San Luis Obispo; L. R. Hunt, of Santa Barbara; Minnie W. Kenney, of Monterey; and Fred W. Suter, of Gilroy, all of the State of California, favoring the passage of the bill placing assistant postmasters in classified service; to the Committee on the Post Office and Post Roads.

By Mr. LANGLEY: Petition of E. A. H. Beyland and others, favoring the passage of House bill 22641, providing that storekeepers, gaugers, and storekeeper-gaugers shall be allowed actual expenses not exceeding $1 while on duty under assignment away from their legal residence; to the Committee on Expenditures in the Treasury Department.

Also, petition of John Bodwell, Paxton, Ill., favoring the passage of House bill 1339, granting an increase of pension to veterans of the Civil War who lost an arm or leg; to the Committee on Invalid Pensions.

By Mr. RAKER: Petition of the school children of Ontario, Cal., favoring the passage of the Weeks bill, for the protection of migratory birds; to the Committee on Agriculture.

By Mr. RUCKER of Colorado: Petition of the Ladies' Auxiliary, No. 27, N. A. L. C., Denver, Colo., favoring the passage of the Hamill bill, providing for the retirement of aged and infirm civil-service employees; to the Committee on Pensions.

By Mr. STEPHENS of Texas: Petition of numerous merchants of the thirteenth congressional district of Texas, favoring the passage of legislation compelling concerns selling direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. UNDERHILL: Petition of the National Civic Federation, New York, N. Y., favoring the passage of the Federal workmen's compensation bill; to the Committee on the Judiciary.

Also, petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, preventing discriminations in the Panama Canal tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of the American Protective Tariff League, favoring the repeal of section 2 of the reciprocity act for the protection of the paper and pulp industry; to the Committee on Ways and Means.

By Mr. VREELAND: Petition of North Otto Grange, No. 990, Otto, N. Y., favoring the passage of the McLean bill, granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. WILSON of New York: Petition of the Electrotypers' Board of Trade of New York, protesting against the passage of House bill 27148, placing books, etc., under the head of fourth-class matter; to the Committee on the Post Office and Post Roads.

By Mr. YOUNG of Texas: Petition of citizens of Tyler, Tex., favoring the passage of the Haugen bill for preventing practices of fraud on the producer and consumer of pure butter; to the Committee on Agriculture.

SENATE.

FRIDAY, *February 21, 1913.*

Rev. William Alexander Major, D. D., of Seattle, Wash., offered the following prayer:

We thank Thee, O God, that we believe that Thou art, and that Thou art a rewarder of those who diligently seek Thee. Thou art the God of Abraham, Isaac, and Jacob. Thou art the God of Abraham Lincoln. Thou art the God of our forefathers. Thou art our God.

We thank Thee, our heavenly Father, for all the good that has come to us. We bless Thee for the good that is coming. We thank Thee that we live in the best day the world has seen. We rejoice that our lawmakers and our ministers of justice are doing for the world to-day a splendid work. We thank Thee, O God, for the broad spirit of brotherhood which is pervading the world and which is constantly, certainly moving us upward. We praise Thee, O God, that each man is coming into his own. We rejoice that a little one is becoming a thousand, and at the promise that every weak nation shall become a great nation.

We pray that the Senate of the United States may more and more have men whose service and sacrifice shall bring glory to Thee and good to every individual. We bless Thee this morning for the inheritance on which we have fallen, and we thank Thee that in the face of the alarmist we to-day look upon conditions the like of which for good, the promise of which for good, the world has never seen. For the inheritance from our fathers we thank Thee to-day. Not unto us, O God, not unto us, but unto Thy name be glory, for Thy mercy and Thy truth's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. BRANDEGEE and by unanimous consent, the further reading was dispensed with and the Journal was approved.

POST OFFICE AT BRISTOL, VA. (S. DOC. NO. 1100).

The PRESIDENT pro tempore (Mr. GALLINGER) laid before the Senate a communication from the Postmaster General, transmitting, in response to a resolution of the 19th instant, the original copies of all petitions both for and against the establishment of the post office at Bristol, Va., and also the original copies of all reports of post-office inspectors detailed to make an investigation thereof, which, with the accompanying papers, was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

CONTINGENT FUND, SECRETARY OF WAR (S. DOC. NO. 1096).

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of War submitting a supplemental estimate of appropriation in the sum of $10,000 for a contingent fund for the Secretary of War, for investigation and experimentation and to secure better methods of administration with a view to increased efficiency and greater economy in the transaction of public business, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

DOROTHY E. BACON V. UNITED STATES (S. DOC. NO. 1099).

The PRESIDENT pro tempore laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed by the court in the cause of Dorothy E. Bacon, widow of Francis H. Bacon, deceased, *v.* The United States, which;

with the accompanying paper, was referred to the Committee on Claims and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had agreed to a concurrent resolution (No. 71) providing for the printing and binding of 2,500 copies of tariff hearings before the Committee on Ways and Means of the House, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House has signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

S. 4681. An act to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes;

H. R. 2839. An act for the relief of William Hommelsberg; and

H. R. 11478. An act to quiet title and possession with respect to a certain unconfirmed and located private-land claim in Baldwin County, Ala., in so far as the records of the General Land Office show said claim to be free from conflict.

SENATOR FROM IOWA.

Mr. CUMMINS. Mr. President, I present the credentials of my colleague [Mr. KENYON], which I ask may be read.

The PRESIDENT pro tempore. The credentials will be read.

The credentials of WILLIAM S. KENYON, chosen by the Legislature of the State of Iowa a Senator from that State for the term beginning March 4, 1913, were read and ordered to be filed.

PETITIONS AND MEMORIALS.

Mr. CULLOM presented a telegram, in the nature of a petition, from the Farmers' Grain Dealers' Association of Illinois, praying for the establishment of standard grades of grain, etc., which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of the Association of Commerce of Chicago, Ill., praying for the adoption of a national budget system tending to provide better business methods for operating the finances of the Government, which was referred to the Committee on Finance.

He also presented a petition of General Joseph Wheeler Camp, No. 38, Department of Illinois, United Spanish War Veterans, of Joliet, Ill., and a petition of George H. Ellis Camp, No. 13, Department of Illinois, United Spanish War Veterans, of Bloomington, Ill., praying for the enactment of legislation granting pensions to widows and orphans of soldiers of the Spanish-American War, which was ordered to lie on the table.

He also presented memorials of sundry citizens of Carterville and Williamson County, in the State of Illinois, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. DILLINGHAM presented memorials of sundry citizens of Jamaica, Bondville, and West Wardsboro, all in the State of Vermont, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. LODGE. I present resolutions adopted by the Commonwealth of Massachusetts in favor of establishing an international commission on the cost of living. I ask that the resolutions be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the resolutions were referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

THE COMMONWEALTH OF MASSACHUSETTS, 1913.

Resolutions in favor of the establishment of an international commission on the cost of living.

Resolved, That the general court of the Commonwealth of Massachusetts, believing that the world-wide increase in the cost of living and the possibility of a continuance of this increase for an indefinite period is a matter of great importance, and believing that an international commission on the cost of living should be appointed to meet the urgent need to find a scientific basis for any reforms in this respect which can be accomplished by legislation, hereby approves of the effort to bring about such an international commission.

Resolved, That certified copies of these resolutions be sent by the secretary of the Commonwealth to the President of the United States, to the presiding officers of both branches of Congress, and to each of the Senators and Representatives from Massachusetts.

In senate adopted January 31, 1913.

In house of representatives adopted in concurrence February 6, 1913.

A true copy.

Attest:

FRANK J. DONAHUE,
Secretary of the Commonwealth.

Mr. LODGE presented memorials of sundry citizens of Williamsburg, Mansfield, and Foxboro, all in the State of Massachusetts, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. JONES. I present a joint memorial of the Legislature of Washington, which I ask may be printed in the RECORD and referred to the Committee on Irrigation and Reclamation of Arid Lands.

There being no objection, the memorial was referred to the Committee on Irrigation and Reclamation of Arid Lands and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
THE STATE OF WASHINGTON,
DEPARTMENT OF STATE.

To all to whom these presents shall come:

I, I. M. Howell, Secretary of State of the State of Washington and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 2, passed January 21 and 23, 1913, relative to the Palouse project for obtaining water from the Snake River by gravity, to irrigate certain lands, with the original copy of said senate joint memorial No. 2 as enrolled, now on file in this office, and find the same to be a full, true, and correct copy of said original, and of the whole thereof, together with all official indorsements thereon.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Washington. Done at the Capitol, at Olympia, this 11th day of February, A. D. 1913.

[SEAL.] I. M. HOWELL,
Secretary of State.

Senate joint memorial 2.

To the honorable Senate and House of Representatives of the United States in Congress assembled:

Your memorialists, the Senate and House of Representatives of the State of Washington in legislative session assembled, being the thirteenth regular session, most respectfully petition and state as follows:

The vast area comprising the great State of Washington is made up in part of arid lands, the agricultural possibilities of which have already been demonstrated, and the most fertile soil lies in Franklin County, bounded on one side by the Snake River and on the other by the Columbia River. The climate is ideal, and adapted to a large variety of crops, both fruit and vegetable, and to agricultural industries.

In addition to the ideal soil and climatic conditions the transportation facilities are the best, both by rail and water, thus providing a sure market and outlet for the produce of the valley at a minimum cost and at the proper time for the producer.

The arid region referred to in Franklin County comprises about 100,000 acres of land north of Pasco and along the coulee between Pasco and Connell.

About eight years ago the United States Reclamation Survey undertook a survey of this land and made what is known as the Palouse project survey. This survey contemplated securing water by a gravity system from the Palouse River, and the report of this survey estimated the cost for a water right to be $31.46 per acre. Upon the board of consulting engineers of the Reclamation Service going over the figures of the estimates made by the engineers in charge of the survey the cost per acre was raised approximately to $63, and the board of consulting engineers advised the abandonment of the project for two reasons—one that the estimated cost of $63 per acre was prohibitive, and, the other, doubts in regard to the Washtucna Coulee—which was to be turned into a reservoir to hold storage waters—retaining the storage waters.

Even admitting that the cost of a water right under the gravity system would be $63 per acre, we think it has been amply demonstrated that these lands would easily bear their cost, as many Government projects have already been undertaken where the cost per acre was more than $63, and in some cases the lands were not as favorably situated.

As the question of the Washtucna Coulee retaining water was never sufficiently tested and the fact that there are many other places along the source of the Palouse River where water can be stored, we believe that the Reclamation Service should make a further survey of this project to determine definitely the question of the Washtucna Reservoir holding water and the determination of what other points would be feasible on the Palouse River for the construction of storage reservoirs.

The Palouse River is the only river from which water can be secured by gravity to irrigate this vast territory, and while this great project is laboring under the handicap of an adverse report from the Reclamation Service, private capital will not go to the expense of making any surveys.

As the final report of the board of consulting engineers did not state that the project was not feasible, we believe that a survey should be made to settle definitely the merits of the project; that the survey determine whether the project is practical or whether it is not.

Wherefore we, your memorialists, most respectfully urge an immediate survey and report upon the Palouse project to determine definitely the feasibility of obtaining water by gravity from the Palouse River to water these lands, and if the project is found feasible that the same be constructed.

Passed the senate January 21, 1913.

LOUIS F. HART,
President of the Senate.

Passed the house January 23, 1913.

HOWARD D. TAYLOR,
Speaker of the House.

(Indorsed.)

STATE OF WASHINGTON, *ss:*

Filed in the office of secretary of state February 11, 1913.

I. M. HOWELL,
Secretary of State.

By J. GRANT HINKLE,
Assistant Secretary of State.

Mr. JONES. I present a joint memorial of the Legislature of Washington, which I ask may be printed in the RECORD and referred to the Committee on the Library.

There being no objection, the memorial was referred to the Committee on the Library and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
THE STATE OF WASHINGTON,
DEPARTMENT OF STATE.

To all to whom these presents shall come:

I, I. M. Howell, secretary of state of the State of Washington and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 5, passed by the senate January 29, 1913, passed by the house February 10, 1913, with the original copy of said senate joint memorial as enrolled now on file in this office, and find the same to be a full, true, and correct copy of said original, and of the whole thereof, together with all official indorsements thereon.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Washington. Done at the capitol, at Olympia, this 15th day of February, A. D. 1913.

[SEAL.] I. M. HOWELL,
Secretary of State.

Senate joint resolution 5.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

Your memorialists, the Senate of the State of Washington, in legislative session assembled, do most respectfully state, represent, and petition as follows:

Whereas on the 19th day of April, 1911, Mr. WILLIAM E. HUMPHREY, Congressman of the first district of the State of Washington, introduced House bill No. 5966, providing for the permanent location, marking, and monumenting the Old Oregon Trail from the Missouri River to Puget Sound as a memorial to the hardy pioneers whose hardships, suffering, and brilliant achievements saved the Oregon country to the Union; and

Whereas the Good Roads Association of the State of Washington, in convention regularly assembled at Tacoma, on the 5th day of November, 1912, did unanimously indorse, urge, and petition for the final passage of said House bill No. 5966, with a liberal appropriation therefor, for the reason that the passage thereof will be a just and proper, although long-delayed, recognition of the achievements of the said pioneers, and be the means of starting the building of national highways: Now, therefore,

Your memorialists, in the name of and for the people of the State of Washington, and speaking in behalf of the State of Washington and of all the people living in the territory traversed by the Old Oregon Trail, earnestly and respectfully petition and urge that said House bill No. 5966 be immediately passed, for the reason and upon the ground that the passage of the bill will tend to increase the patriotism of the present and future generations of our country and make more sacred to those of the future the achievements of our great Nation and its hardy pioneers who enlarged the boundaries of liberty as they extended the frontier of their Nation and who finally made possible the wonderful heritage of a free country from ocean to ocean, with permanent institutions and benefits to endure through all time, and for the further reason that this act will stimulate and eventually guarantee the building of a national highway so much needed by the producing classes of our country.

Passed the senate January 29, 1913.

PLINY L. ALLEN,
President of the Senate.

Passed the house February 10, 1913.

HOWART D. TAYLOR,
Speaker of the House.

I. M. HOWELL,
Secretary of State.
By J. GRANT HINKLE,
Assistant Secretary of State.

Mr. JONES. I present a joint memorial of the Legislature of Washington, which I ask may be printed in the RECORD and referred to the Committee on Immigration.

There being no objection, the memorial was referred to the Committee on Immigration and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF WASHINGTON,
DEPARTMENT OF STATE.

To all to whom these presents shall come:

I, I. M. Howell, secretary of state of the State of Washington and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 6 (passed by the senate January 28, 1913; passed by the house February 10, 1913) with the original copy of said joint memorial as enrolled now on file in this office, and find the same to be a full, true, and correct copy of said original and of the whole thereof, together with all official indorsements thereon.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Washington. Done at the capitol at Olympia this 15th day of February, A. D. 1913.

[SEAL.] I. M. HOWELL,
Secretary of State.

Senate joint memorial No. 6.

To the honorable Senate and House of Representatives of the United States:

Your memorialists, the Senate and House of Representatives of the State of Washington, respectfully petition that—

Whereas the opening of the Panama Canal will, through the establishment of direct steamship lines from the countries of Europe, bring about an immense increase in immigration to the Nacific northwest: Therefore be it

Resolved, That the house and senate of the State of Washington do request the Congress of the United States to pass such restrictive legislation as will stop the influx of undesirable foreigners: And be it further

Resolved, That a copy of this resolution be forthwith transmitted to the Senate and House of Representatives of the United States, at Washington, D. C., and to each Senator and Congressman from the State of Washington, for their use in endeavoring to secure the passage of such restrictive legislation.

Passed the senate January 28, 1913.

PLINY L. ALLEN,
President of the Senate.

Passed the house February 10, 1913.

HOWARD D. TAYLOR,
Speaker of the House.

By J. GRANT HINKLE,
Assistant Secretary of State.

Mr. NELSON presented a memorial of the Council of Jewish Women of St. Paul, Minn., remonstrating against transferring the control of the national forests to the several States, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. PERKINS presented resolutions adopted by Local Branch No. 231, National Association of Letter Carriers, of Fresno, Cal., favoring the enactment of legislation providing for the retirement of civil-service employees, which were referred to the Committee on Civil Service and Retrenchment.

He also presented resolutions adopted by the Epworth League Alliance of San Francisco, Cal., favoring the ratification of treaties of arbitration with the nations of the world, which were referred to the Committee on Foreign Relations.

He also presented resolutions adopted by Roosevelt Camp, No. 9, Department of California, United Spanish War Veterans, of Los Angeles, Cal., praying for the enactment of legislation granting pensions to widows and minor children of officers and enlisted men who served in the War with Spain, which were ordered to lie on the table.

Mr. WILLIAMS presented a memorial of sundry citizens of Monroe County, Miss., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. SMITH of Michigan presented a petition of the Chamber of Commerce of Detroit, Mich., praying for the creation of a United States court of patent appeals, which was referred to the Committee on Patents.

Mr. BRANDEGEE presented a memorial of the Christian Endeavor Union of Danbury, Conn., remonstrating against the repeal of the so-called "canteen" law, which was referred to the Committee on Military Affairs.

Mr. STEPHENSON presented memorials of sundry citizens of Waupaca County, Monroe County, and Richland County, all in the State of Wisconsin, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. McLEAN presented a memorial of the Christian Endeavor Union of Danbury, Conn., remonstrating against the repeal of the so-called canteen law, which was referred to the Committee on Military Affairs.

Mr. GALLINGER presented a memorial of sundry citizens of the District of Columbia, remonstrating against the passage of the so-called Hardwick bill, prohibiting intermarriage between the races in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. O'GORMAN. I present a letter from the chairman of the Commodore Barry Branch of the American Continental League, of Jersey City, N. J., transmitting resolution adopted by a meeting of the league by citizens of that city, which I ask may be read.

There being no objection, the memorial was read, as follows:

JERSEY CITY, N. J., *February 15, 1913.*

The Hon. JAMES A. O'GORMAN,
Senate Chamber, Washington, D. C.

SIR: Inclosed herewith please find copy of a resolution adopted unanimously at a meeting of the Commodore Barry Branch of the American Continental League, held in Arcanum Hall, corner Clinton and Jackson Avenues, Jersey City, on Wednesday evening, February 12.

The resolution was presented and its adoption moved by Mr. Patrick O'Mara, 782 Grand Street, Jersey City. Mr. William P. Cleary, 368 York Street, Jersey City, seconded the motion, and Dr. F. K. McMurrough, 100 Lafayette Street, spoke at length on the matter.

The meeting was representative and very enthusiastic.

Very respectfully,

J. P. LEYDEN, *Chairman.*
R. O'REILLY, *Secretary.*
181 Winfield Avenue, Jersey City, N. J.

We, citizens of Jersey City, assembled to honor the memory of George Washington, proclaim our unwavering allegiance to the principles of government set forth in the Declaration of Independence to the Constitution of the United States;

We affirm our conviction that the warning against entangling alliances with the powers of the Old World conveyed to the American people in Washington's Farewell Address has been fully justified by the progress made by this Republic, largely by strict adherence to that policy during the past century. It is more than ever necessary now, when the conflicting interests of the great powers have turned Europe practically into an armed camp and made the outbreak of war on a colossal scale a strong probability in the near future. In such a war American interests could only be protected by strict neutrality;

We favor the peaceful settlement of all differences that may arise with foreign Governments, but we are unalterably opposed to the arbitration of any question involving the vital interests, the honor, the domestic policy or the territorial integrity of the United States, or the conclusion of an arbitration treaty with any European power that might be interpreted as binding this country by special ties of friendship with that power, or calculated to injure, even incidentally, the interests of any other nation; and we protest in an especial manner against any extension of the provisions of the existing arbitration treaty with Great Britain or of the treaty ratified by the Senate in March, 1912, but not yet put in force;

We oppose the passage of the bill introduced into the Senate by Mr. ROOT to repeal the free tolls portion of the Panama Canal act; we protest against the proposition to submit to arbitration an act of the United States Congress affecting the domestic policy of the country and the regulation of its shipping, and we heartily approve and indorse the attitude on this question of Senator JAMES A. O'GORMAN, of New York, and Representative JAMES R. MANN, of Illinois;

We emphatically protest against the proposed appropriation by Congress of $7,000,000 for the celebration of one hundred years of peace with England, and against the appropriation of any public money whatever, either by State or National authority, for any such purpose. We protest in an especial manner against the proposed joint naval and military reviews in connection with that celebration as a direct menace to the peace of the world and a deliberate attempt to aid England in her quarrel with Germany over questions which involve no American interest, and we brand the whole movement as a thinly disguised attempt to bring about an Anglo-American alliance, fraught with disaster and dishonor to this Republic;

We favor the proper celebration by the Government and people of the United States of the centennial of the Battle of New Orleans, of the writing of the national anthem, "The Star-Spangled Banner," and of the burning down of the Capitol in Washington by the British Army. We are anxious to be at peace with England, as well as with the rest of the world, but we insist that the nation which sought to destroy this Republic during the Civil War and which swept American commerce from the sea with vessels built in English shipyards, armed with English guns and manned by British seamen, while the other nations of Europe, except the French Empire, were friendly, shall not be selected for special marks of friendship when its Government is notoriously preparing for war, and alone, of all the Governments of the world, is contesting our control of the Panama Canal;

We favor the eventual removal of all monarchical authority from the American continent and the acquisition by purchase of Bermuda, Jamaica, the Bahamas, St. Thomas, the Belize, and all other insular or continental territory now held by European Governments and which may be used as bases of operations against the Panama Canal or for attack on the United States, and we assert that such acquisition is absolutely necessary, not only for the safety of the canal but for the adequate protection of the interests of the American people:

Resolved, That copies of this declaration be sent to Senator O'GORMAN for presentation to the Senate, to Representative MANN for presentation to the House of Representatives, to the Members of Congress from this city, to the governor of the State, the members of the State legislature, and the mayor of the city.

The PRESIDENT pro tempore. What disposition does the Senator from New York desire to have made of the memorial?

Mr. O'GORMAN. I ask that it may lie on the table for the present.

The PRESIDENT pro tempore. Without objection, it is so ordered.

BOARD OF RIVER REGULATION.

Mr. NEWLANDS. Mr. President, I understand from the Senator from South Dakota [Mr. CRAWFORD] that he was mistaken in his statement yesterday that the memorial of the Legislature of South Dakota urging the passage of the bill known as the Newlands river-regulation bill was printed. I therefore ask that the memorial be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, that order will be made.

Mr. CRAWFORD. The statement of the Senator from Nevada is correct. I presented some memorials from the legislature of my State and they were printed in the RECORD. It was my recollection that this memorial was included with them, but I discover that it was not. I would be glad to have it printed in the RECORD.

The memorial was ordered to lie on the table and to be printed in the RECORD, as follows:

STATE OF SOUTH DAKOTA,
DEPARTMENT OF STATE.

UNITED STATES OF AMERICA,
State of South Dakota, ss:

I, Frank Glasner, secretary of state of the State of South Dakota, do hereby certify that the annexed bill, to wit, senate joint resolution No. 14, was duly passed by the 1913 session of the Legislature of the State of South Dakota and is now in full force and effect.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of South Dakota this 4th day of February, A. D. 1913.

[SEAL.]

FRANK GLASNER,
Secretary of State.
By J. T. NELSON,
Assistant Secretary of State.

Joint resolution and memorial requesting the Congress of the United States to pass the Newlands bill, relating to river regulation.

Be it enacted by the Senate of the State of South Dakota (the House of Representatives concurring):

SECTION. 1. That the Congress of the United States is hereby memorialized to enact during the present session the Newlands bill, providing for the creation of a board of river regulation and for the control and beneficial use of flood waters, and we urge our Senators and Representatives in Congress to employ their best efforts to accomplish this end.

REPORTS OF COMMITTEES.

Mr. ROOT, from the Committee on Industrial Expositions, to which was referred the bill (S. 7826) to provide for the participation of the United States in the Panama-Pacific International Exposition, reported it with an amendment and submitted a report (No. 1287) thereon.

Mr. ROOT. I report favorably from the Committee on Industrial Expositions, to which it was referred, the amendment submitted by Mr. PERKINS, on the 18th instant, providing for the participation of the United States in the Panama-Pacific International Exposition, intended to be proposed to the sundry civil appropriation bill, and I submit a report (No. 1286) thereon.

The PRESIDENT pro tempore. Does the Senator from New York desire to have the amendment referred to the Committee on Appropriations?

Mr. ROOT. I will ask what is the wish of the Senator from California upon that point.

Mr. PERKINS. I ask that it be referred to the Committee on Appropriations.

The PRESIDENT pro tempore. The amendment will be referred to the Committee on Appropriations and printed.

AGRICULTURE APPROPRIATION BILL.

Mr. BURNHAM. From the Committee on Agriculture and Forestry I report back favorably, with amendments, the bill (H. R. 28283) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1914, and I submit a report (No. 1288) thereon. I give notice that immediately following the disposition of the Indian appropriation bill I shall ask the Senate to take up and consider this appropriation bill.

The PRESIDENT pro tempore. Meanwhile the bill will be placed on the calendar.

PUBLIC BUILDINGS BILL.

Mr. SUTHERLAND. From the Committee on Public Buildings and Grounds I report back favorably, with amendments, the bill (H. R. 28766) to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes, and I submit a report (No. 1291) thereon. I give notice that as soon as the Indian appropriation bill is disposed of, or, if that be found impossible, as soon as the Post Office appropriation bill is disposed of, then I shall ask the Senate to consider this bill.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

AIDS TO NAVIGATION.

Mr. NELSON. From the Committee on Commerce I report back favorably, with an amendment in the nature of a substitute, the bill (S. 8414) to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes, and I submit a report (No. 1285) thereon. The bill ought to receive speedy action, and I ask for its present consideration. There is no need of reading more than the substitute which has been reported by the committee.

The PRESIDENT pro tempore. The amendment reported by the committee will be read.

The SECRETARY. The Committee on Commerce report to strike out all after the enacting clause and insert:

Be it enacted, etc., That the Secretary of Commerce and Labor is hereby authorized to establish, provide, or improve the following aids to navigation and other works in the Lighthouse Service, under the Department of Commerce and Labor, in accordance with the respective limits of cost hereinafter respectively set forth, which shall in no case be exceeded.

To construct and equip a lighthouse tender for general service at cost not exceeding $250,000.

FIRST LIGHTHOUSE DISTRICT.

To establish a light at or near Dog Island, entrance to St. Croix River, Me., at a cost not exceeding $3,500.

To construct and equip a light vessel to be placed near Mohegan Island, off the entrance to Penobscot Bay, Me., at a cost not to exceed $125,000.

THIRD LIGHTHOUSE DISTRICT.

Improvements at Great Salt Pond Light Station, R. I., including moving the fog signal and building a keeper's dwelling, at a cost not to exceed $25,000.

To erect a carpenter shop at the general lighthouse depot, Tompkinsville, Staten Island, N. Y., at a cost not exceeding $23,000.

Improvement of the offices and laboratory at the general lighthouse depot, Tompkinsville, Staten Island, N. Y., at a cost not exceeding $21,000.

Completion of the reestablishment of Passaic Light and Fog-Signal Station, Newark Bay, N. J., including authority to build on a new site, if necessary, at a cost not to exceed $45,000.

FIFTH LIGHTHOUSE DISTRICT.

Aids to navigation in Cambridge Harbor, Md., at a cost not to exceed $4,000.

SIXTH LIGHTHOUSE DISTRICT.

Purchase of a site and construction of a wharf and buildings, and purchase of the necessary equipment, so far as funds may permit, for a depot for the sixth lighthouse district, at a cost not to exceed $125,000.

EIGHTH LIGHTHOUSE DISTRICT.

Aids to navigation in Atchafalaya Entrance Channel, La., at a cost not to exceed $50,000.

To construct and equip light vessels for South Pass and Southwest Pass Entrances to the Mississippi River, La., at a cost not to exceed $250,000.

Improvements of the aids to navigation and establishment of new aids on the Mississippi River below New Orleans, La., at a cost not to exceed $50,000.

NINTH LIGHTHOUSE DISTRICT.

Light station on Navassa Island, in the West Indies, at a cost not to exceed $125,000, of which authorization not exceeding $500 shall be applied to securing and placing in some appropriate place on the lighthouse or the base thereof a durable and ornamental tablet, on which shall be made suitable memorial mention of the researches and contributions of Commander Matthew Fontaine Maury, United States Navy, to the science and cause of navigation.

Purchase for lighthouse purposes of approximately one-half acre of land in the vicinity of the lighthouse reservation at Port Ferro Light Station, P. R., for the purpose of constructing a watershed and cistern, and the appropriation "General expenses, Lighthouse Service," for the fiscal year in which the purchase is effected, is hereby made available for the purchase of said site.

TENTH LIGHTHOUSE DISTRICT.

Rearrangement, rebuilding, and improvement of the aids to navigation at Ashtabula Harbor, Ohio, at a cost not to exceed $45,000.

Removal, reconstruction, and improvement of the fog-signal station at Cleveland, Ohio, at a cost not to exceed $17,600.

Light and fog-signal station and improvement of aids to navigation at Lorain Harbor, Ohio, at a cost not to exceed $35,000.

Establishment of aids to navigation at Huron Harbor, Ohio, at a cost not exceeding $4,500.

ELEVENTH LIGHTHOUSE DISTRICT.

Additional aids to navigation at Ashland, Wis., at a cost not to exceed $25,000.

A pierhead light and lighted buoy at Oconto Harbor, Wis., at a cost not to exceed $5,000.

Improvements at Detroit Lighthouse Depot, Mich., at a cost not to exceed $15,000.

TWELFTH LIGHTHOUSE DISTRICT.

Establishment of aids to navigation in the harbor of Manistique, Mich., at a cost not to exceed $20,000.

Improvement of the fog signal at Manistee Pierhead Range, Mich., at a cost not to exceed $9,000.

Improvement of the fog signal at Poverty Island, Mich., at a cost not to exceed $9,000.

SIXTEENTH LIGHTHOUSE DISTRICT.

Light and fog signal at or near Cape St. Elias, Alaska, at a cost not to exceed $115,000.

SEVENTEENTH LIGHTHOUSE DISTRICT.

Aids to navigation and improvements of existing aids in Puget Sound and adjacent waters, Wash., at a cost not to exceed $30,000.

Improvement of Warrior Rock Light Station, Columbia River, Oreg., including the purchase of additional land, at a cost not to exceed $2,000.

For the construction and equipment of a light vessel to Mark Orford Reef, Oreg., $125,000.

EIGHTEENTH LIGHTHOUSE DISTRICT.

Improvements at Point Pinos Light Station, Cal., at a cost not to exceed $30,000.

To authorize the completion of the unfinished portion of the Government road from Rollerville to the Point Arena Lighthouse, Mendocino County, Cal., at a cost not to exceed $3,000.

For establishing a light and fog-signal station on or near North Farallon Island, Cal., $100,000.

Light and fog-signal station at or near Point Vincente, Cal., at a cost not to exceed $75,000.

NINETEENTH LIGHTHOUSE DISTRICT.

Aids to navigation in Pearl Harbor, Hawaii, at a cost not to exceed $80,000.

Improvements of light station at Kauhola Point, Hawaii, at a cost not to exceed $15,000.

Hereafter the purchase of necessary additional land for light stations and depots is authorized under rules prescribed by the Secretary of Commerce and Labor: *Provided*, That no single acquisition of such additional land shall cost in excess of $500.

Hereafter supplies and equipment for special works of the Lighthouse Service may be furnished from general stock and the appropriation "General expenses, Lighthouse Service," reimbursed therefor from the respective appropriations for special works.

Hereafter when any condemned supplies, materials, equipment, or land can not be profitably used in the work of the Lighthouse Service the same shall be appraised and sold, either by sealed proposals for the purchase of the same, or by public auction after advertisement of the sale for such time as in the judgment of the Secretary of Commerce and Labor the public interests require, the proceeds of such sales, after the payment therefrom of the expenses of making the sales, to be deposited and covered into the Treasury as miscellaneous receipts as now provided for by law in like cases.

Hereafter the salaries of lighthouse inspectors, including one inspector for the general service, and excepting the inspector of the third lighthouse district, shall not exceed $3,000 each, or an average of $2,700 each.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ENLARGED HOMESTEAD ACT—SOUTH DAKOTA.

Mr. CRAWFORD. Mr. President, a report from the Committee on Public Lands was made and printed on yesterday on the bill (S. 8359) to provide for an enlarged homestead. It concerns a matter in which my State is interested, and which, if anything is to be done with it, should pass the Senate without delay. I do not think it will create any discussion whatever.

I will state that a bill passed both Houses and was approved by the President enlarging homesteads of nonirrigable and arid lands in arid regions to 320 acres. Subsequently an act including the State of Idaho containing the same provision passed both Houses. The bill I introduced, which was reported yesterday, simply includes South Dakota in the group of States, and I should like to have unanimous consent to have the bill taken up and acted upon.

The PRESIDENT pro tempore. If the Senator from South Dakota will withhold his request until the morning business is closed, the Chair will then recognize the Senator for that purpose.

Mr. CRAWFORD. Very well.

PHYSICAL VALUATION OF RAILROADS—HOUR OF MEETING.

Mr. LA FOLLETTE. From the Committee on Interstate Commerce I report back favorably with amendments the bill (H. R. 22593) to amend an act entitled "An act to regulate commerce," approved February 4, 1887, and all acts amendatory thereof, by providing for physical valuation of property of common carriers subject thereto and securing information concerning their stocks and bonds and boards of directors, with the recommendation that as amended the bill be passed, and I submit a report (No. 1290) thereon.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

Mr. LA FOLLETTE. Mr. President, I wish to submit at this time, if I may be recognized for that purpose, a request for unanimous consent to take up House bill 22593, just reported by me, for consideration on Monday, the 24th of February.

The PRESIDENT pro tempore. Does the Senator suggest an hour at which he desires the vote shall be taken?

Mr. LA FOLLETTE. I will send the formal request to the desk.

The PRESIDENT pro tempore. The Senator from Wisconsin submits a proposed unanimous-consent agreement which will be read.

The Secretary read as follows:

It is agreed, by unanimous consent, that on Monday, February 24, 1913, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (H. R. 22593) to amend an act entitled "An act to regulate commerce," approved February 4, 1887, and all acts amendatory thereof, by providing for physical valuation of property of common carriers subject thereto and securing information concerning their stocks and bonds and boards of directors, and before adjournment on that calendar day will vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill, through the regular parliamentary stages, to its final disposition.

The PRESIDENT pro tempore. Is there objection to the request?

Mr. SMOOT. Mr. President, I should like the Senator from Wisconsin also to make an exception of the appropriation bills—that the unanimous-consent agreement shall not interfere with appropriation bills. Then I shall not have any objection to the request.

Mr. LA FOLLETTE. Of course, I must accept that suggestion, Mr. President.

Mr. BORAH. Before this subject is disposed of, I should like to suggest whether we can not meet at 10 o'clock after Monday morning?

Mr. SMOOT. I was going to make a motion this morning, and perhaps I had better do it now while the question is up, that the Senate——

The PRESIDENT pro tempore. The Senator will kindly withhold his motion until the pending matter is disposed of.

Mr. SMOOT. Very well.

Mr. LA FOLLETTE. I should be very glad, I will say, if the motion suggested by the Senator from Utah [Mr. SMOOT] is to be made, to have it apply to Monday, rather than to the days following Monday. That would allow a little more time for the consideration of the bill which I have named, if it shall be found that the bill provokes very much debate, though I do not believe it will.

The PRESIDENT pro tempore. It will be noted in the unanimous-consent agreement that appropriation bills are excepted.

Mr. BRANDEGEE. May I suggest to the Senator from Wisconsin that he make it a part of the unanimous-consent agreement that the Senate meet at 10 o'clock on that day?

Mr. LA FOLLETTE. I will include that suggestion in my request, unless it is certain to be covered by the motion to be made by the Senator from Utah [Mr. SMOOT].

Mr. SMOOT. Mr. President, I move that when the Senate adjourns to-day it adjourn to meet to-morrow morning at 11 o'clock; that the eulogies, of which notice has been given for to-morrow, begin at 2 o'clock; and that, beginning on Monday, the 24th instant, the Senate meet at 10 o'clock in the morning.

The PRESIDENT pro tempore. The question is on the motion submitted by the Senator from Utah.

The motion was agreed to.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent agreement as modified by the Senator from Wisconsin [Mr. LA FOLLETTE]? The Chair hears none, and it is agreed to.

ISAAC THOMPSON.

Mr. DIXON. On yesterday I reported from the Committee on Military Affairs the bill (H. R. 3957) for the relief of Isaac Thompson. I ask leave to submit a report (No. 1283) to accompany the bill.

The PRESIDENT pro tempore. The report will be received and printed.

DAVID CROWTHER.

Mr. DIXON. I am directed by the Committee on Military Affairs, to which was referred the bill (H. R. 26648) for the relief of David Crowther, to report it favorably without amendment, and I submit a report (No. 1289) thereon. By mistake a written report was submitted yesterday and printed. I call the attention of the Senator from New York [Mr. O'GORMAN] to the bill.

Mr. O'GORMAN. I ask unanimous consent for the present consideration of the bill reported by the Senator from Montana.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes that in the administration of the pension laws David Crowther shall hereafter be held and considered to have been absent with proper authority and in the line of duty as a soldier while serving as a member of Company I, Sixth Regiment Maine Volunteer Infantry, but no pension, bounty, or allowances shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CATRON:

A bill (S. 8563) granting an increase of pension to Grace A. Overhuls; to the Committee on Pensions.

By Mr. SIMMONS:

A bill (S. 8564) for the relief of the heirs of Elijah D. Guthrie (with accompanying papers); to the Committee on Claims.

A bill (S. 8565) to authorize the Virginia & Carolina Southern Railroad Co. to construct a bridge across the Lumber River at or near the town of Lumberton, N. C.; to the Committee on Commerce.

By Mr. SMITH of Michigan:

A bill (S. 8566) granting an increase of pension to Charles Newton Eddy;

A bill (S. 8567) granting a pension to Martin Malone; and

A bill (S. 8568) granting an increase of pension to Fred E. Williams; to the Committee on Pensions.

By Mr. CHILTON:

A bill (S. 8569) granting a pension to I. M. Conley;

A bill (S. 8570) granting a pension to Samuel O. Johnson;

A bill (S. 8571) granting a pension to Margaret C. Jenkins; and

A bill (S. 8572) granting a pension to Aron Angle; to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. JONES submitted an amendment proposing to appropriate $5,950 for expenses of delegates to the Fourteenth International Congress against alcoholism at Milan, Italy, September, 1913, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. LODGE submitted an amendment providing for the purchase or construction in Government yards, in accordance with plans and specifications to be prepared by the Navy Department, and to have a cargo capacity of 12,000 tons of coal and a speed of at least 14 knots per hour, two colliers to cost not exceeding $1,000,000 each, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. LEA submitted an amendment providing for the participation of the Government of the United States in the National Conservation Exposition to be held at Knoxville, Tenn., during the fall of 1913, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Industrial Expositions and ordered to be printed.

Mr. GALLINGER submitted an amendment proposing to appropriate $101,424 for the maintenance of the office of the Superintendent of Documents, intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed, and, with the accompanying paper, referred to the Committee on Appropriations.

COMMITTEE SERVICE.

Mr. NEWLANDS was, on his own motion, relieved from further service upon the Committee on Industrial Expositions.

Mr. MARTIN of Virginia submitted the following resolution, which was read, considered by unanimous consent, and agreed to:

Resolved, That the following assignment to service on committees be made, namely:

Mr. KEY PITTMAN, of Nevada, to Claims, Pacific Railroads, Coast and Insular Survey, Expenditures in the Department of Justice, and Industrial Expositions.

COMMISSION ON ECONOMY AND EFFICIENCY.

Mr. DILLINGHAM submitted the following resolution (S. Res. 470), which was read, considered by unanimous consent, and agreed to:

Resolved, That the President be requested to send to the Senate any additional information submited by the Commission on Economy and Efficiency relating to the matter of saving in recovery of Government waste paper.

GERTRUDE WILSON.

Mr. CRANE submitted the following resolution (S. Res. 471), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay out of the contingent fund of the Senate to Gertrude Wilson, widow of Washington Wilson, late a laborer of the Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

AFFAIRS AT ELLIS ISLAND (S. DOC. NO. 1098).

Mr. LODGE. I have a copy of the annual report of William Williams, commissioner of immigration at the port of New York, in reference to Ellis Island affairs, for the year ended June 30, 1912. It is a very valuable paper. I ask that it be printed as a public document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE CONSTITUTION, THE COURTS, AND THE PEOPLE (S. DOC. NO. 1095).

Mr. SUTHERLAND. I send to the desk a copy of an article taken from the Yale Law Journal, being an address delivered by Ralph W. Breckenridge, of the Omaha bar, at the annual meeting of the California State Bar Association, at Fresno, November 22, 1912, on "The Constitution, the courts, and the people." I ask that the article be printed as a Senate document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CAREY ACT PROJECTS (S. DOC. NO. 1097).

Mr. SMOOT. I present a report of the committee appointed by the Secretary of the Interior to make an investigation into and report upon the history and present condition of the Carey Act projects. I do this because the Public Lands Committee have the subject in hand and they desire the use of this report. I ask that the report be printed as a public document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

FLOOD CONTROL OF THE MISSISSIPPI RIVER (S. DOC. NO. 1094).

Mr. PERCY. I ask to have printed as a Senate document an address delivered by the president of the Mississippi River Commission, at Memphis, Tenn., September 26, 1912, before the Interstate Levee Association, on the "Lessons of the flood of 1912," together with a short editorial on the same subject taken from the Scientific American of February 15.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TARIFF HEARINGS.

The PRESIDENT pro tempore laid before the Senate the following concurrent resolution (No. 71) of the House of Representatives, which was read and referred to the Committee on Printing:

Resolved by the House of Representatives (the Senate concurring). That there be printed and bound 2,500 copies of tariff hearings before the Committee on Ways and Means of the House of Representatives since the 6th day of January last, 1,700 copies for the use of the House and 800 copies for the use of the Senate.

ENLARGED HOMESTEAD ACT—SOUTH DAKOTA.

The PRESIDENT pro tempore. Are there further concurrent or other resolutions? If not, morning business is closed. The Chair now recognizes the Senator from South Dakota.

Mr. CRAWFORD. I ask unanimous consent for the present consideration of the bill (S. 8389) to provide for an enlarged homestead.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That any person who is a qualified entryman under the homestead laws of the United States may enter, by legal subdivision, under the provisions of this act, in the State of South Dakota, 320 acres, or less, of arid, nonmineral, nonirrigable, unreserved, and unappropriated surveyed public lands which do not contain merchantable timber, located in a reasonably compact body and not over 1½ miles in extreme length: *Provided*, That no lands shall be subject to entry under the provisions of this act until the lands shall have been designated by the Secretary of the Interior as not being, in his opinion, susceptible of successful irrigation, at a reasonable cost, from any known source of water supply.

SEC. 2. That any person applying to enter land under the provisions of this act shall make and subscribe before the proper officer an affidavit as required by section 2290 of the Revised Statutes, and in addition thereto shall make affidavit that the land sought to be entered is of the character described in section 1 of this act, and shall pay the fees now required to be paid under the homestead laws.

SEC. 3. That any homestead entryman of lands of the character herein described, upon which final proof has not been made, shall have the right to enter public lands, subject to the provisions of this act, contiguous to his former entry, which shall not, together with the original entry, exceed 320 acres, and residence upon and cultivation of the original entry shall be deemed as residence upon and cultivation of the additional entry.

SEC. 4. That at the time of making final proofs as provided in section 2291 of the Revised Statutes, the entryman under this act shall, in addition to the proofs and affidavits required under said section prove by two credible witnesses that at least one-eighth of the area embraced in his entry was continuously cultivated to agricultural crops other than native grasses beginning with the second year of the entry, and that at least one-fourth of the area embraced in the entry was so continuously cultivated beginning with the third year of the entry.

SEC. 5. That nothing herein contained shall be held to affect the right of a qualified entryman to make homestead entry in the State of South Dakota under the provisions of section 2289 of the Revised Statutes, but no person who has made entry under this act shall be entitled to make homestead entry under the provisions of said section, and no entry made under this act shall be commuted.

SEC. 6. That whenever the Secretary of the Interior shall find that any tracts of land in the State of South Dakota subject to entry under this act do not have upon them such a sufficient supply of water suitable for domestic purposes as would make continuous residence upon the lands possible, he may, in his discretion, designate such tracts of land, not to exceed in the aggregate 320,000 acres, and thereafter they shall be subject to entry under this act without the necessity of residence upon the land entered: *Provided*, That the entryman shall in good faith cultivate not less than one-eighth of the entire area of the entry during the second year, one-fourth during the third year, and one-half during the fourth and fifth years after the date of said entry, and that after six months from date of entry and until final proof the entryman shall reside not more than 20 miles from said land and be engaged personally in preparing the soil for seed, seeding, cultivating, and harvesting crops upon the land during the usual seasons for such work unless prevented by sickness or other unavoidable cause. Leave of absence from a residence established under this section may, however, be granted upon the same terms and conditions as are required of other homestead entrymen.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RIVER AND HARBOR BILL.

Mr. NELSON. I move that the Senate proceed to the consideration of the river and harbor bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed consideration of the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. NELSON. There are two amendments in the bill that went over until to-day for the convenience of the Senator from Missouri [Mr. STONE]. Before we take up those amendments I desire to offer two amendments to the bill, and preceding action upon them I ask to have read at the desk a letter from Gen. Bixby which explains the necessity for the amendments.

The PRESIDENT pro tempore. The amendments will first be stated, and then the letter will be read.

Mr. NELSON. I should be glad to have the letter first read.

The PRESIDENT pro tempore. Very well. Without objection, the Secretary will read as requested.

The Secretary read as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, February 21, 1913.

Hon. KNUTE NELSON,
United States Senate.

SIR: 1. I have the honor to invite your attention to the accompanying copy of letter reporting the burning of the United States dredge *C. B. Comstock*, at the mouth of the Brazos River on the 17th instant.

2. This dredge has been employed on harbor improvements on the coast of Texas, particularly at the mouth of the Brazos River and at Port Aransas. The Engineer Department has no other dredge which is available and suitable for carrying on the improvements upon which the *Comstock* has been engaged, nor, so far as known, has any contractor.

3. The appropriations carried in the pending river and harbor bill for the improvements upon which this dredge has been engaged are not sufficient to permit the construction of another dredge, and unless a new dredge is available as early as practicable the channels of these ports will unquestionably deteriorate to such an extent that navigation will be seriously interfered with.

4. It is therefore requested that, if practicable, the appropriations carried in the pendng river and harbor bill for the mouth of the Brazos River, Tex., and Port Aransas, Tex., each be increased by $100,000, with authority to construct a dredge.

Very respectfully,
W. H. BIXBY,
Chief of Engineers, United States Army.

The PRESIDENT pro tempore. The first amendment presented by the Senator from Minnesota will be stated.

The SECRETARY. On page 35, line 9, it is proposed to strike out "$500,000" and insert the following:

Six hundred thousand dollars, of which $100,000, or so much as may be necessary, may be expended as part payment for the construction of a dredge to replace the U. S. dredge *C. B. Comstock*, destroyed by fire.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment submitted by the Senator from Minnesota will be stated.

The SECRETARY. On page 36, line 25, it is proposed to strike out "$25,000" and insert in lieu thereof the following:

One hundred and twenty-five thousand dollars, of which $100,000, or so much thereof as may be necessary, may be used as part payment for the construction of a dredge to replace the U. S. dredge *C. B. Comstock*, destroyed by fire.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. NELSON. Mr. President, I desire further to say that I made an error last night in replying to the Senator from Mississippi [Mr. PERCY]. An amendment was offered by me to the Mississippi River item relating to revetment work in front of Memphis. After the amendment had been offered the Senator from Mississippi made a point of order against it. In the meantime the Senator from Ohio [Mr. BURTON] asked that the amendment go over. I supposed yesterday that the point of order had been sustained; but it seems from the RECORD that I was in error and that that amendment, subject to the point of order, is still pending. It went over at the instance of the Senator from Ohio. I shall be glad to have that matter taken up and disposed of now, subject to the point of order.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 52, after the word "navigation," in line 4, it is proposed to insert the following:

Provided further, That of the amount herein appropriated, $250,000, or such sum as may be necessary, shall be expended for revetting, leveeing, and otherwise improving the left bank of said river at and near Memphis, Tenn., for the purpose of preventing damage by floods and promoting the interest of navigation.

Mr. PERCY. Mr. President, the point of order made against the amendment is that it is not in accordance with the report of a standing committee and that it is covered by no estimate.

The PRESIDENT pro tempore. The Chair will be pleased to hear from the Senator presenting the amendment as to the question of order.

Mr. NELSON. Mr. President, I really presented the amendment myself, at the instance of the junior Senator from Tennessee [Mr. WEBB]. It was not strictly a committee amendment. The Senator called my attention to it, and I told him I would offer it on the floor, which I did.

The PRESIDENT pro tempore. The Chair will be pleased to hear from the Senator from Minnesota on the point of order. The point of order is made against the amendment.

Mr. NELSON. I am not clear about the point of order; and, so far as I am concerned, I shall be satisfied with whatever the Chair may deem to be the proper ruling.

The PRESIDENT pro tempore. As the Chair understands the matter, this is a diversion of $250,000 from the $6,000,000 appropriated in the bill.

Mr. NELSON. Yes; and it is not a committee amendment.

The PRESIDENT pro tempore. It appears that the $6,000,000 are to be expended under the direction of the Secretary of War in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers. Do those plans, specifications, and recommendations cover the proposed improvement contemplated in the amendment?

Mr. NELSON. That I am not able to say. I do not know whether they do or not.

Mr. PERCY. They do not, Mr. President.

The PRESIDENT pro tempore. The Senator from Mississippi states that they do not. Under those circumstances the Chair is constrained to sustain the point of order. The question is upon the amendment on page 52 of the bill.

Mr. NELSON. That amendment begins on line 5. I understand the Senator from Missouri [Mr. STONE] desires to address the Senate on that amendment.

The PRESIDENT pro tempore. The amendment is before the Senate, to strike out and insert.

Mr. CUMMINS. Mr. President, before the Senator from Missouri discusses the question, which undoubtedly he will do with a great deal more familiarity with the details than I have, I desire to say a word or two with regard to it.

The Mississippi River Commission was organized under an act of Congress passed June 28, 1879. Its powers were stated in that act. I read briefly from the act in order that the Senate may have in view precisely what the commission was organized to accomplish.

Mr. BURTON. I will ask the Senator from what statute he is about to read?

Mr. CUMMINS. The act of June 28, 1879.

Mr. BURTON. As found in the engineer's report?

Mr. CUMMINS. In the engineer's report, in part 3, at page 3695:

> To direct and complete such surveys of said river between the Head of Passes, near its mouth, to its headwaters—

I particularly desire that the Senate shall notice that its duty was to complete the survey of the river between the Head of Passes and its headwaters—

> as may now be in progress, and to make such additional surveys, examinations, and investigations, topographical, hydrographical, and hydrometrical, of said river and its tributaries as may be deemed necessary by said commission to carry out the objects of this act.

It appears from the extract I have read from the law creating the commission that it has jurisdiction, complete and whole, over the Mississippi River from its headwaters to its mouth, or to the Head of Passes. When, however, appropriations have been made heretofore to be expended by the Mississippi River Commission or under its direction they have been limited to a part of the river. They were first limited to that part of the river between the Head of Passes and the mouth of the Ohio River. That stretch was afterwards increased or enlarged so that it embraced the river between the Head of Passes and Cape Girardeau.

The bill as it came from the House appropriated $6,000,000 for the improvement of the river between the Head of Passes and Cape Girardeau. Among the things that the Mississippi River Commission was authorized to do was to set apart a sum for the building of levees. In that respect the appropriation can be used for a purpose not within the contemplation of the appropriations for other parts of the Mississippi River, and, indeed, other rivers as well.

The House, after making this appropriation, concerning which I make no complaint—if I were to make any change in it, I would increase it rather than to diminish it—further provided:

> Any funds which have been, or may hereafter be, appropriated by Congress for improving the Mississippi River between the Head of Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended, under the direction of the Secretary of War, in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for levees upon any part of said river between the Head of Passes and Rock Island, Ill.

The effect of this provision in the House bill was to authorize the Mississippi River Commission to take some part, if it chose to do so, of the sum allotted to the building of levees, and use it in the construction of that kind of work north of Cape Girardeau, between that point and Rock Island, Ill.

The committee proposes to strike out that part of the House bill and thus confine, as it has been heretofore confined, the expenditure of money for the purpose of constructing levees to a point south of Cape Girardeau, and therefore to exclude all that territory lying along the river north of the cape to the headwaters, or, as the bill provided, to Rock Island, Ill.; and it proposes to substitute for that portion of the House bill a provision which I now read:

> The Mississippi River Commission shall make an examination of the Mississippi River from Cape Girardeau, Mo., to Rock Island, Ill., with a view to such improvements as will at the same time promote navigation, develop water power, and protect property adjacent to said river from damage by floods; and in making such examination consideration shall be given and recommendations made as to plans for cooperation by the localities affected; and for the purpose of such examination the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated.

Mr. President, as we who live north of Cape Girardeau look at the matter, this is simply a polite way of postponing the time at which we can become the beneficiaries of the appropriation, so far as the building of levees is concerned. I do not speak now for the State of Missouri. I have no intimate acquaintance with its geography. I do know, however, that there are large tracts of land bordering the river and north of the cape which are in need of the cooperation of the General Government, or in need of the assistance of the General Government, in order to protect them from floods.

Passing to my own State, while we have no such area of lands subject to overflow as have some of the States lying south of the cape or south of the Ohio River, we have some lands that are just as subject to overflow as any lands in Arkansas or any in Mississippi or any in Louisiana, and we feel that as to those lands we have just as much right to the protection and the help of the Mississippi River Commission as has land lying farther south.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. CUMMINS. I do.

Mr. WILLIAMS. Why does not the Senator, then, couple the provision for the protection of his State with a demand for a sum of money for that purpose, instead of taking it away from the lower river, to which it has been adjusted after careful estimates and consideration? Why does not the Senator add to the proposition which he desires an independent appropriation for his purposes, instead of taking money from a purpose not even sufficiently provided for, by his own confession in the earlier part of his remarks?

Mr. CUMMINS. Mr. President, the House of Representatives is responsible for the provision of the bill which I desire shall be left in it. I assume that the House of Representatives believed that $6,000,000 was sufficient for all that part of the river which the bill actually covered as it left the House.

Mr. WILLIAMS. The Senator, then, supposes something that is not justified by the facts of the case. The estimates were for more, and we got less than the estimates. The point is this: Of course the House of Representatives has passed the bill in this shape. That does not prevent the Senator from amending it here into such shape as shall help his State without hurting ours.

Mr. CUMMINS. No, Mr. President; I have no power to offer an amendment of that kind. It would be subject to a point of order. If the Committee on Commerce had chosen to increase the appropriation of $6,000,000, believing that more than that sum would be required if levee building were attempted north of the mouth of the Ohio, I not only should have made no objection to it, but I should have accepted it, believing that it had done a wise thing. It did not do so, however. On the contrary, it attempted to remove the northern stretch of the river entirely from the jurisdiction of the commission in so far as building levees was concerned.

Mr. PERCY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. CUMMINS. I do.

Mr. PERCY. The Senator is doubtless aware that there was no estimate before the Committee on Commerce as to what would be required to be expended on levee building north of Cape Girardeau. Under the customary way in which appropriations are carried in this bill there was nothing upon which an appropriation for that purpose could be predicated. There was no way to ascertain whether the addition necessary to cover work north of Cape Girardeau commensurate with the extension asked would call for $100,000 or $10,000,000 additional.

Mr. CUMMINS. Mr. President, I will reply to the senior Senator from Mississippi as I did to the junior Senator from that State. The House had before it the estimate of the Board of Engineers.

Mr. PERCY. I beg to differ with the Senator in regard to that.

Mr. CUMMINS. It concluded that $6,000,000 was sufficient for the whole stretch of the river. Mark you, we are not insisting that, for the general improvement of the Mississippi River, any part of the $6,000,000 shall be expended north of the mouth of the Ohio. We are only insisting that so much of the appropriation as is allotted for the building of levees may be extended north of the Ohio. The report of the Board of Engineers, I understand, required a larger sum than $6,000,000, but the House was not convinced that a larger sum was necessary. In connection with granting $6,000,000 it said that if the Mississippi River Commission wanted to do it—it is not mandatory upon the commission, but if it wanted to do it—it could take a part of the sum which was allotted to levee building and use it in the northern part of the river.

I assume that the House was intelligent in its action. I assume that it understood the necessities of the various localities and that it enacted this provision in the light of adequate knowledge.

Mr. PERCY. I will say, Mr. President, that the Senator is in error in supposing that there were any engineers' estimates before the Rivers and Harbors Committee of the House on this subject. So far as the printed hearings before that committee are concerned, it is not disclosed that there was ever given a hearing or that there was any information of an official character before the committee upon which this action was predicated.

Mr. CUMMINS. I have not examined the hearings, and the Senator from Mississippi may be right about that. Nevertheless, I must still insist that the House and the House committee had the information that was necessary to enact a provision of this sort.

Mr. BURTON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. CUMMINS. I do.

Mr. BURTON. I think that is a point of very vital importance. I desire to state to the Senator from Iowa that the Chief of Engineers appeared before the Committee on Commerce and expressly stated that they had no estimate, and indeed on questioning it appeared that he could express no opinion as to what the expense would be of making those levees.

Mr. CUMMINS. Either north or south?

Mr. BURTON. North, not south. There they are very detailed.

Mr. CUMMINS. I understood the Senator from Mississippi to say they had no estimates either north or south.

Mr. PERCY. No; the Senator misunderstood me.

Mr. BURTON. Above Cape Girardeau, no; below Cape Girardeau, yes.

Mr. CUMMINS. I have no doubt that is true, because hitherto the Mississippi River Commission has had no authority to spend any part of the money which is allotted north of Cape Girardeau, and therefore naturally there would be no estimate. The commission already has authority under the original act to make an examination north of the Ohio River. It can expend any part of the $6,000,000 that it pleases in making the survey, if it has not already surveyed it, although I know that certain parts of that territory have been surveyed until there would seem to be no further opportunity for the acquisition of the least information upon the subject. The commission already has that power, but it has no power to spend any part of the sum which it sets aside for levees north of the part I have indicated.

Now, we can not divide the work of the Mississippi River Commission. I am thoroughly convinced that it ought to consider this problem as a whole. It ought to consider what effect levee building in Iowa and in the northern part of Missouri and in Illinois will have upon the current and the flow in the south river. It ought to have gone on long ago to do this thing, at least to acquaint Congress and acquaint the Board of Engineers with the real situation. But it has not done so; and all we ask is that if it desires to do so, it may expend some part of this money in that way. There is no value in giving it authority to survey or examine the north part of the river. The commission has that authority now, and has had it ever since it was organized. The difficulty is that the appropriation to carry out this work is limited to that part of the river which I have described.

I do not suppose that any great part of the money will be taken to build levees at all. We do not get very much of the Government's help in that quarter of the country. That is because we have not needed very much of the Government's help. There is an appropriation for improving the upper Mississippi of a million and a half dollars, I think. But that, of course, is not to be expended, and not one penny of it can be expended there, in the building of levees, for the only authority, as I understand it, for the building of protective banks is with the Mississippi River Commission, and it must be specially authorized to do it before it can proceed with that kind of work.

I am not able to see the justice of it. I think that our people whose lands are annually overflowed have just as much right to have the Mississippi River Commission look over their lands and determine whether it ought to aid the authorities of the State, or the municipal authorities in keeping the water of the Mississippi River away from that land, as to look over the lands of any other State.

If the bill as passed by the House is kept as it is, and it can be shown that the appropriation of $6,000,000 is not sufficient to do the full work, I would be the last man in the world to oppose an increase in that appropriation. But at some time or other we ought to be brought within the jurisdiction and within the scope of the assistance of the Mississippi River Commission, and we will not rest content until we are. We are perfectly willing to see money expended at all points upon the Mississippi River necessary to protect the adjacent lands, but while the Government is doing for one State what undoubtedly it ought to do it seems to me that we can well ask that we shall come next in the distribution of the Government's bounty.

I hope very much that the provision made by the House will be allowed to stand as a part of this appropriation bill. It is in exact harmony with the views that have been so eloquently and so emphatically stated by the Senator from Ohio [Mr. BURTON]. It is in exact harmony with the general plan that is proposed by the Senator from Nevada [Mr. NEWLANDS]. It is taking into account the whole situation and proceeding to deal with it according to the conditions which affect every part of it.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Idaho?

Mr. CUMMINS. I do.

Mr. BORAH. As I understand the Senator, he is speaking to the committee amendment to strike out.

Mr. CUMMINS. Yes; I am speaking against the committee amendment which proposes to strike out lines 5 to 13, inclusive, on page 52.

Mr. BORAH. And the Senator is opposed to the amendment of the committee offered as a substitute?

Mr. CUMMINS. Of course, if the committee amendment proposing to strike the lines out of the bill as passed by the House is adopted, I do not say that then I will be opposed to the committee amendment for survey or examination.

Mr. NELSON. If the Senator will allow me, the amendment in italics is intended as a substitute for what is proposed to be stricken out.

Mr. CUMMINS. I understand that. I am speaking now upon the justice of retaining the House provision as it came to us.

Mr. BORAH. I wanted to ask some one who is familiar with the substitute in regard to a clause in it. Perhaps I should wait until some one speaks in behalf of it. There is one clause I want to know something about before I vote on it.

Mr. CUMMINS. I do not know what part of the proposed substitute the Senator from Idaho refers to——

Mr. BORAH. I will call the Senator's attention to it.

Mr. CUMMINS. But I do want to say, before he calls my attention to it, with regard to the power given there to the Mississippi River Commission, it already has the power of survey and examination as fully as it could be given by any additional statute.

Mr. BORAH. The amendment says "the Mississippi River Commission shall make an examination of the Mississippi River from Cape Girardeau, Mo., to Rock Island, Ill., with a view to such improvements as will at the same time promote navigation, develop water power," and so forth.

Mr. CUMMINS. It does not confer any power to develop water power, because——

Mr. NEWLANDS. Mr. President, it is impossible on this side to hear what the Senator is saying.

The PRESIDENT pro tempore. Complaint is made that the Senator from Iowa is not heard.

Mr. BORAH. A few days ago, when we had the Connecticut River bill up, we seemed to be only feeling our way. Here is a distinct grant of power to develop water power, disregarding the question entirely whether it is connected with navigation.

Mr. CUMMINS. I have been so much impressed with the injustice of striking out the House provision that I have not carefully analyzed the proposed substitute. I might as well say now that I agree to the general view that the United States

has no constitutional authority to develop water power as such. I do not think that it could constitutionally enter the Mississippi River and build a dam across it simply to create the power which the dam would generate. There must, of course, be the primary object of improving the navigation of the river. If this substitute is supposed to give the commission the authority to go along the river and organize dam companies and power companies, without regard to navigation, it is an additional reason why the proposal of the committee ought not to be accepted.

Mr. BRANDEGEE and Mr. NEWLANDS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Iowa yield, and to whom?

Mr. CUMMINS. I yield to the Senator from Connecticut, who first claimed the floor.

Mr. BRANDEGEE. I suppose, then, the Senator would not think that Congress could lawfully appropriate for levees designed simply to protect the land from overflow under the commerce clause.

Mr. CUMMINS. I do not.

Mr. BRANDEGEE. I agree with the Senator.

Mr. CUMMINS. I do not believe that under the Constitution the Government of the United States can build levees simply to enhance the value of lands lying along the streams; but if the levee improves the navigation, increases the facilities of commerce, then the Government can build levees. I do not know of any instance in which levees are built solely for the purpose of enhancing the value of lands. I yield now to the Senator from Nevada.

Mr. NEWLANDS. I am in entire sympathy with the Senator in his objection to striking out the provision that extends the operation of the Mississippi River Commission as far as Rock Island. However, I wish to call his attention to the fact that the substitute contained in the amendment of the committee in the following lines does not endeavor simply to provide for the development of water power, but it provides for the examination of the Mississippi River, "with a view to such improvements as will at the same time promote navigation, develop water power, and protect property adjacent to said river from damage by floods." So I imagine that comes within the exception which the Senator stated——

Mr. CUMMINS. Undoubtedly.

Mr. NEWLANDS. That it is competent for the United States to enter into the construction of works if they aid in navigation.

Mr. CUMMINS. Nominally, at least. I suppose all the levees they have built have been for the promotion of navigation. I have never heard any other reason given for their construction; not any constitutional reason, at least.

Mr. BURTON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. CUMMINS. I do.

Mr. BURTON. I wish to call the attention of the Senator from Idaho and the Senator from Iowa to the fact that the language contained in the proposed substitute, "develop water power," follows the general statute relating to the making of examinations, which is found on pages 77 and 78 of the bill. I will read briefly, with the consent of the Senator from Iowa——

Mr. CUMMINS. I recognize that what the Senator from Ohio has said is true.

Mr. BURTON (reading)—

That every report submitted to Congress, in addition to full information regarding the present and prospective commercial importance of the project covered by the report and the benefit to commerce likely to result from any proposed plan of improvement, shall also contain such data as it may be practicable to secure in regard to the following subjects.

The first subject is the existence and establishment of private terminal and transfer facilities. The next, beginning with line 14, on page 78, is just the same as this provision:

The development and utilization of water power for industrial and commercial purposes.

Then it goes on to say:

Such other subjects as may be properly connected with such project: *Provided*, That in the investigation and study of these questions consideration shall be given only to their bearing upon the improvement of navigation, to the possibility and desirability of their being coordinated in a logical and proper manner with improvements for navigation to lessen the cost of such improvements and to compensate the Government for expenditures made in the interest of navigation, and to their relation to the development and regulation of commerce.

That provision was first inserted in the river and harbor act of 1909, and it has been carried in each river and harbor act since that time.

Mr. CUMMINS. I look upon it as wholly immaterial, because I have no objection to the information being gathered, but I would have very great objection to the Government building a dam that could not by any possibility improve navigation and that could only add to the commercial energy of the country. For instance, I put this case to the Senator from Ohio: Suppose we have a stretch in the Mississippi River in which there is a 40-foot channel, deeper than by any possibility any boat passing along the river requires for navigation; suppose it to be a proper place for a dam 30 or 40 feet high, that would generate a vast amount of power but would not in any wise improve the river for the passage of boats. Does the Senator from Ohio think that the United States could, under its Constitution, proceed to build a dam across the river and sell the power that would be generated by it to those who use it in commerce?

Mr. BURTON. Not if the dam was to be constructed merely for water power.

Mr. CUMMINS. Certainly not.

Mr. BURTON. Of course the object of this provision has been to consider these related subjects; however, not necessarily with a view to their development by the Government, but either by private parties in connection with improvements to navigation or as an incident to Government work. That is the object of the provision, and this proposed amendment would clearly be interpreted as being in the line of the general policy as to examinations adopted after 1909.

Mr. CUMMINS. I think that is very probable, and I make no objection to it whatever, because all that information is useful, or will be useful some time. I am only attempting to state my view with regard to the power of the Government as to water powers.

But to return to the subject, the only objection, as it seems to me, to this provision is that it will take some of the money which it is necessary shall be expended south of the Ohio River and expend it north of the Ohio River. That is true if the sum allotted for levee building by the Mississippi River Commission is no more than sufficient to take care of the situation south; but the Mississippi River Commission has the power to take any part that it likes of the $6,000,000 that is here appropriated for levee building, and it can still leave all that is required for the necessities of the southern part of the river. Moreover, it is not required by this provision to expend any money in the northern part of the river if it believes that the public welfare will be better served by the expenditure of all of it in the southern part of the river. So there can be no validity in that objection unless those who favor the committee provision are afraid that the commission will not deal fairly with the situation; and that, I am sure, they can not justly apprehend.

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. CUMMINS. I do.

Mr. WILLIAMS. I think the Senator from Iowa will agree with me that if the House provision were kept in the bill the Mississippi River Commission would regard it as a direction; but how much money they might spend would be a different thing. The estimates made for what is needed on the lower Mississippi are over $50,000,000, and what is given is given them in driblets, year by year a certain amount. This year the committee has given, of the $50,000,000 or more that is needed, $6,000,000 for immediate expenditure.

If the commission regards it as a direction, as it undoubtedly will, some of that $6,000,000 will be taken and diverted to another purpose. If the Senator did not want to do that, and merely wanted to help his own cause without hurting the other cause, which he admits to be insufficiently provided for, then why not accompany this proposition with a proposition to increase the $6,000,000 to six and a half million dollars, or to whatever sum he thinks is proper? To propose to increase the appropriation would not be subject to any point of order, because it would still fall within the estimates.

Mr. CUMMINS. I am perfectly willing to stand for that proposition.

Mr. WILLIAMS. But the Senator is doing it in such a way as while obviously helping him plainly is taking away from us that which we need.

Mr. CUMMINS. Mr. President, I do not want to take away one penny from the south part of the river if it is needed, but I would very much like to see a broad and comprehensive plan for the improvement of the whole river that would go forward under an annual appropriation, that would not require this debate and this discussion every year in Congress. I believe in that with the Senator from Nevada [Mr. NEWLANDS].

The Senator from Mississippi says that it will require $50,000,000 to build the levees in the southern part of the river;

that is, from the Ohio River south, and he may be right about it. I have no reason to doubt his estimate.

Mr. WILLIAMS. It is not my estimate; it is the estimate of the engineers.

Mr. CUMMINS. If so, we ought to adopt that plan now, and go on with it continuously under contracts that are not intermittent by a change in the temper or disposition of Congress from year to year. I agree to that, and I will join the Senator from Mississippi any time in bringing about that state of affairs; but when that is brought about, of course this improvement ought not to end with the mouth of the Ohio River. This $50,000,000 ought to be added to so that it will embrace the whole Mississippi River, because a levee along certain parts of the Ohio and the northern part of the Missouri will do just as much to promote navigation and to render secure the channel which they help to create as in the south part of the river. The objection I have is, that we are excluded—absolutely excluded—from the protecting care of the commission.

Mr. WILLIAMS. But the Senator seems not to have understood me. The point I was making was that you ought at the same time to increase the appropriation so that what is expended for the upper Mississippi shall not be taken from the lower Mississippi.

Mr. CUMMINS. I have not offered any amendment at all to the bill. I am simply discussing the merit of the amendment proposed by the committee. If the Senate refuses to accept the amendment proposed by the committee, and then there is offered an amendment enlarging the appropriation for the whole river to Rock Island, I certainly shall look upon it with great favor, because I can but admit that the provision made by the other House is a great deal less than the estimate of the Board of Engineers. Let us, however, first settle the matter on the right principle, and then afterwards deal with the amount of the appropriation.

It seems to me reasonably certain that if the Senate will extend the jurisdiction of the commission over to Rock Island, then it can deal intelligently and, as I have no doubt it will deal, impartially, as well as patriotically, with the amount of the appropriation; but to say that the jurisdiction shall not be extended because the appropriation is too small, and to determine that before we reach the amount of the appropriation, is to erect an insuperable obstacle to the consideration of the question that I am discussing. We can not discuss it; we can not decide both these things at the same time, because the committee has proposed an amendment here upon which we must vote. I hope very much that to accomplish the ends of obvious justice the committee amendment will be rejected and that the House provision will be permitted to stand. Then we can deal fairly and properly with the amount of the appropriation when we have first settled the extent over which the work of the commission shall go.

Mr. PERCY rose.

Mr. NELSON. Mr. President, I propose in a few minutes, with the consent of the Senator from Mississippi [Mr. PERCY], to make a brief statement to the Senate, not for any aggressive purpose, but to explain to the Senate the true situation in reference to this amendment.

I think my friend from Iowa [Mr. CUMMINS], as well as my friend from Missouri [Mr. STONE]—and I count them both my friends—are laboring under a misapprehension about this matter. The substitute amendment is really, when considered carefully, in the interests of what those Senators desire. It is a rule with Congress and with the committees of Congress which have charge of river and harbor matters, whenever improvements are desired, to have the Engineer Department, in the first instance, make what is called a preliminary survey, and, if they think the improvement is worthy, then to make a final survey, with a plan and estimate, giving us data by which we can be guided in making the appropriations.

In this case, applying that rule, in 1879 the Mississippi River Commission was created, and, in general terms, the commission was given permission to make a survey of the river; but they have never made a survey of this reach of the river for the purpose of determining where and to what extent levee protection shall be provided. There is not an estimate of any kind on file regarding it.

The bill appropriates $6,000,000 for the improvement of the river from Cape Girardeau—if Senators will turn to the map on the wall they will observe Cape Girardeau is at the top of it—down to the Head of Passes. That is the estimate of the Mississippi River Commission and of the War Department for this year, and we have adopted it.

Even if this paragraph which has been stricken out were in the bill, the Mississippi River Commission could not do anything more than make a survey this year. No plan has been outlined, and they have never examined any reach of that river above Cape Girardeau to ascertain in what sections of the river levees are needed.

From Cape Girardeau up to Rock Island is a distance of between four and five hundred miles. Unlike the river below, the lowlands subject to overflow are here and there in patches. In most instances high banks extend to the shores of the river itself. The condition is a good deal like that on the lower Mississippi or a portion of the west side of that reach of the river.

On the west side of the river, from Cape Girardeau down to the mouth, the whole country needs levee protection. The whole country is divided into what we call basins for levee protection. The basin from Cape Girardeau is called the St. Francis Basin; below that is the White River Basin; and then below that, extending to the mouth of the Red River and the Atchafalaya, is the Tensas Basin. Then, on the east side, as Senators will see on the map, where the blue line extends, is what is called the Yazoo Basin. When you get down to Vicksburg you strike highlands most of the time until you get below Baton Rouge, La. There are some patches on that side of lowlands, as the Senator from Mississippi knows. The Senator came before the committee last year to get an appropriation for that portion of the river, and we treated him just as we are doing now. We said, "Before anything can be done there must be an examination and survey." Is that not correct?

Mr. WILLIAMS. Yes.

Mr. NELSON. He sought to get an appropriation for that reach of the river from Vicksburg down to near Baton Rouge. Now, the point I desire to explain——

Mr. CUMMINS. Is it the Yazoo Basin of which the Senator was just speaking?

Mr. NELSON. No; I refer to the other basin below there.

Mr. CUMMINS. That was already in the hands of the Mississippi River Commission. The commission already had authority to expend any money it wanted to spend for levee purposes along there.

Mr. NELSON. But they have never made an estimate or an examination and survey.

Mr. CUMMINS. And that is just exactly what we want done here.

Mr. WILLIAMS. They refused to build levees for the same reason that they refused above, to wit, that it was not evident that the building of levees in that stretch would improve navigation.

Mr. CUMMINS. And we want the commission to have the same jurisdiction over that part of the river along Iowa, Illinois, and Missouri that it has over that part of the Mississippi to which the Senator from Minnesota last referred. We may not get a single bit of work done, but we want to be within the pale, just as you have been within the pale all these years.

Mr. BURTON. Will the Senator yield to me for a moment?

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Ohio?

Mr. NELSON. I yield to the Senator.

Mr. BURTON. I wish to call the attention of the Senate to the fact that the case of the Senator from Mississippi is a very much stronger one than this, because the area in which we required a report and a survey, on which we refused to make any appropriation or recognize it as a proper place for levees, was one already within the jurisdiction of the Mississippi River Commission, while the area from Cape Girardeau up to Rock Island is not now and never has been under the jurisdiction of the Mississippi River Commission, except for the matter of gauging, and so forth.

Mr. CUMMINS. It is fully within the jurisdiction of the commission so far as everything, except spending money, is concerned.

Mr. CULLOM. That is true.

Mr. CUMMINS. And that part of the lower river, to which the Senator from Ohio has just referred, was within the jurisdiction of the commission. The commission had authority to spend any part of the appropriations which have been made for years on that stretch, if it so desired.

Mr. BURTON. But, Mr. President, we absolutely refused the right to expend money, though it was within their jurisdiction, until an estimate was made.

Mr. CUMMINS. Undoubtedly; and you may refuse to do it now. I am not complaining of that. All that I want is an opportunity to invoke their discretion in the matter.

Mr. NELSON. Mr. President, if Senators will listen to me a little further, I think I can point out why this substitute reported by the committee is directly in the interest of and provides the only way in which they can secure what they want. Simply by granting the authority to the Mississippi River Commission, as proposed in the lines stricken out, you have no

assurance that the commission will expend any money on the reaches of the river above Cape Girardeau, and you can count on it for certain that, under the law, the members of the commission will never spend a dollar until there has been an examination, a survey, and an ascertainment of where and to what extent levees are needed, and what the cost is going to be. We have gone at this in a manner that will help you to get just what you want in a legitimate way; and we have appropriated $100,000 for that purpose. We have adopted the same plan here that we have in every other case of river and harbor improvement. The substitute provision reads:

The Mississippi River Commission shall make an examination of the Mississippi River from Cape Girardeau, Mo., to Rock Island, Ill., with a view to such improvements as will at the same time promote navigation, develop water power, and protect property adjacent to said river from damage by floods; and in making such examination consideration shall be given and recommendations made as to plans for cooperation by the localities affected; and for the purpose of such examination the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from California?

Mr. NELSON. Certainly.

Mr. WORKS. Mr. President, it seems to be conceded here on all sides that the National Government has no power to expend money for the development of water power or for the protection of property along a river. On the other hand, the Senator from Iowa [Mr. CUMMINS] says that he has no objection to the Government spending this money for the purpose of making investigations for that very object. Now, I wonder, if that be so——

Mr. CUMMINS. I hope I have stated no such thing. The objectionable part of the proposed substitute is so allied and connected with proper purposes that I do not intend to object to it.

Mr. WORKS. I listened to the Senator pretty closely when he was discussing that subject because I noticed what seemed to be an inconsistency in his position with respect to it. I may not quote his language exactly, but certainly he conceded that it might be all right for the Government to make these investigations and that he had no objection to it dong so. Now, I should suppose that there should be objection to the Government spending its money for the purpose of investigating matters about which it has no power to act, and money that should go to other purposes, to protect people below and to protect navigation, is being wasted in making investigations about matters as to which the Government has no power to act.

I suggest to the chairman of the committee that from the language of the amendment the words "develop water power and protect property adjacent to said river from damage by floods" ought to be stricken out. I understand perfectly that the work that is done for the improvement of navigation of the river does protect property owners necessarily, but everybody concedes that the Government has no power to expend its money for any such purpose as that.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Nevada?

Mr. NELSON. Certainly.

Mr. NEWLANDS. If the Senator from Minnesota will yield to me for a moment, I should like to have the attention of the Senator from California. I wish to call the attention of the Senator from California to the fact that the investigation called for by this provision is not with a view to the making of such improvements as will develop water power and protect adjacent property, but "with a view to such improvements as will at the same time promote navigation, develop water power, and protect property adjacent to said river from damage by floods."

There are certain kinds of improvement that will be useful for all of these purposes, and you can not take care of one without partially taking care of the others. So this is simply an examination with a view to securing a report upon an improvement that will secure various uses of the waters of the river and various controls of the waters of the river, but with a view, doubtless, to assigning the cost according to the jurisdiction, the National Government assuming only that portion of the cost which belongs to its jurisdiction, and the States and private parties assuming that which belongs to them. I call the Senator's attention to the fact that this is not an examination purely for the development of water power, but for the development of improvements that will at the same time take care of all of these various uses.

Mr. WORKS. Mr. President, it seems to me the explanation of the Senator from Nevada has made the matter a little worse than it was before. According to his construction of the amendment, it does not provide for an investigation for the improvement of the navigation of the stream at all. The language is:

With a view to such improvements as will at the same time promote navigation.

That is to say, the investigation is not for the purpose of improving navigation at all, but it is for the purpose of ascertaining something else that will at the same time improve navigation. That certainly is a singular way of putting a provision of this kind, because all of us know that the only thing the Government can legitimately do is to make an investigation that may result in the improvement of the navigation of the stream. It seems to me, in view of what has been said by the Senator from Nevada, that the whole amendment needs to be rewritten.

Mr. BURTON. Mr. President, will the Senator from California listen to me while I read to him briefly from the statute creating the Mississippi River Commission? This act was passed in 1879. I read it to show the variety of purposes included in these examinations.

Mr. WORKS. Mr. President, if the Senator will allow me, that would not alter the case, so far as the power of the Government is concerned.

Mr. BURTON. It does show, however, under what plan we have been acting for more than 30 years, and I think it is well to have included in the RECORD the language of this statute. First—

To direct and complete such surveys of said river betwen the Head of Passes near its mouth to its headwaters as may now be in progress, and to make such additional surveys, examinations, and investigations, topographical, hydrographical, and hydrometrical, of said river and its tributaries as may be deemed necessary by said commission to carry out the objects of this act.

Now let me read what comes later:

To take into consideration and mature such plan or plans and estimates as will correct, permanently locate, and deepen the channel—

That might all be for navigation—

and protect the banks of the Mississippi River, improve and give safety and ease to the navigation thereof, prevent destructive floods, promote and facilitate commerce, trade, and the postal service.

That shows the variety of objects included.

I beg the pardon of the Senator from Minnesota for taking so much time.

Mr. NELSON. I wish to say something to the Senator from California [Mr. WORKS] that I think will throw some light upon this matter. It seems to me he is unnecessarily critical in regard to it.

My friend here, the Senator from Iowa [Mr. CUMMINS], knows that on the Mississippi River, at Keokuk, there were rapids, and that for the improvement of navigation there the Government built a large dam.

Mr. CUMMINS. It authorized the building of it.

Mr. NELSON. Yes; it authorized the building of it. That dam not only promotes navigation there, but it creates a great water power in connection with it. The making of these surveys and examinations does not commit us to the projects examined. We want information as to whether, in connection with building dams in a river for purposes of navigation, there will be, as an incident to it and in connection with it, a water power. That is the object of it.

As to this matter of protecting lands against floods, we know as a matter of fact that these appropriations which we have made for levees on the Mississippi River, while they are ostensibly and to some extent for navigation, are not altogether for that. They are for the reclamation of lands subject to being flooded. The fact about this matter is that it is a good deal like our oleomargarine legislation. We levy a tax of 10 cents a pound upon oleomargarine, ostensibly to secure revenue, as a revenue measure, but it is really a measure for the protection of the farmers. That is what it is.

In the case under consideration we do not take jurisdiction away from the Mississippi River Commission.

Mr. WORKS rose.

Mr. NELSON. I will yield to the Senator if he wishes.

Mr. WORKS. No; I am entirely patient with the Senator. I desire to say something later.

Mr. NELSON. I have the floor, I think. I will yield if the Senator wishes to ask a question.

Mr. WORKS. If the Senator has the floor, I will yield the floor to the Senator. I understood to the contrary.

Mr. NELSON. No; I had the floor and yielded for questions, and the Senator asked questions of somebody that was interrogating me.

Mr. WORKS. That may be. If the Senator will pardon me just a moment, I will conclude what I have to say, and then I will be out of the way.

Mr. NELSON. Very well.

Mr. WORKS. The effect of what the Senator from Minnesota has said, to be quite plain about it, is that this is an effort to do something that the Government has no power or authority whatever to do, under the guise of doing what the Government may properly do. That is the whole situation. Senators may feel that that is justified under the circumstances. I am not criticizing their position with regard to the matter, except as to the construction that is attempted to be placed upon the language of this amendment.

It seems to be conceded by everybody here, including the Senator from Minnesota, that the Government has no power whatever to engage in the matter of developing power, and therefore it must follow necessarily that it has no power to expend money for the purpose of determining whether or not power can be developed, because that belongs to another government altogether, namely, the government of the States. As I said a while ago, the language that is used here is certainly peculiar, as far as concerns attempting to arrive at what seems to be the purpose of the amendment.

Mr. NELSON. It is the language that has been in the law for a good many years, as the Senator from Ohio reminds me.

When these surveys are made, and a recommendation is made that a dam shall be built at a given place in a navigable stream to promote navigation, what harm is there in ascertaining—on the contrary, is it not of much value to us to ascertain—whether in connection with the building of that dam for navigation purposes a water power can be developed and used in connection with it? It will not do to take such a narrow view of the case. If we build a dam for the purpose of improving navigation, and incidentally a power comes from it, why should that power go to waste? Why should we not utilize it in some form?

Mr. WILLIAMS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Mississippi?

Mr. NELSON. Certainly.

Mr. WILLIAMS. If the Senator from Minnesota will pardon me, the very language of the provision keeps it from being obnoxious to the objection made, for this reason: It is so careful not to confer any power to survey merely with the purpose of developing water power that it says that the survey shall be made so as to show what at the same time can be done to promote navigation and these other purposes.

Mr. NELSON. Certainly.

Mr. WILLIAMS. So if the purpose of navigation does not go along in company with the others, the provision does not apply. The purpose of navigation must be present—all of these purposes must be present at the same time.

Mr. NELSON. I want to say to my friends from Iowa and to my friends from Missouri that I am not hostile to this improvement. I am pointing out here by this substitute the way in which they can secure an appropriation and the only way in which they can secure it.

The Mississippi River Commission has been in existence since 1879. It was created by an act of that year. It was given authority by the act creating the commission to make a survey of the river. It has made a kind of an instrumental survey, but never for the purposes contemplated by the friends of this improvement of the river, from Cape Girardeau up to Rock Island. I have looked through all the reports of the Mississippi River Commission as far as I could find them. I have communicated with the War Department to ascertain whether they had made an examination or survey of this reach of the river above Cape Girardeau up to Rock Island for the purpose of determining where and to what extent levee protection is needed, either in the interest of navigation or otherwise. There are no data on hand, no estimates of what is needed, and there is nothing that we can go by in appropriating money.

If you leave in the bill the paragraph that has been stricken out by the committee, it is like the Pope's bull against the comet. You put that reach of the river under the jurisdiction of the commission, but you do not place the commission in shape to do anything. The commission never will expend a dollar on that reach of the river until there has been an examination and a survey to ascertain in what localities and to what extent levees are needed and what appropriation is needed for that purpose.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from California?

Mr. NELSON. I do.

Mr. WORKS. I am inclined to think the Senator from Minnesota is right upon that proposition. What I said about it was not in the way of objection to the investigation that is provided here for legitimate purposes. My criticism was upon the fact that the investigation is being extended to something over which the Government has no power.

Mr. NELSON. That does not apply to this matter any more than it did to the investigation in California, where they had a great scheme for the expenditure of nineteen or twenty million dollars to protect lands from being flooded by the Sacramento River.

Mr. WORKS. Exactly so, Mr. President. The Senator can not meet what I have to say by contending that something which is wrong has been done in the State of California. California has no more right to appropriations for illegal purposes than the State of Minnesota or the State of Mississippi. It does not depend upon what California has had or what it has not had. It is simply a question of power. I do not think the Senator from Minnesota is justified in attempting to meet the argument I have made by any such reference to what has been done in California. If it has been done, it has not been done at my instance.

Mr. NELSON. I am not saying that; but I say they adopted the same principle. The California Débris Commission, for the purpose of improving the Sacramento River, sought to get an appropriation for protecting the land adjacent to it from the débris that was brought into the river by mining operations. Of course I do not charge my friend from California with it, but a recommendation was made to us to appropriate, I think, eighteen or twenty million dollars in all to protect that land from the débris in the Sacramento River produced by the operations of miners.

Mr. WORKS. Mr. President, did Congress appropriate the $20,000,000?

Mr. NELSON. No.

Mr. WORKS. I thought not.

Mr. NELSON. Certain gentlemen from California, however—I do not care to say whom—appeared before the committee and strenuously advocated that appropriation. But I am wandering from the subject, Mr. President.

Mr. KENYON. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. NELSON. Certainly.

Mr. KENYON. I will not do so, if it will interfere with the Senator's remarks.

Mr. NELSON. Oh, no; I enjoy questions.

Mr. KENYON. The Senator from Minnesota, as I understood him, said that if the House provision remains in the bill nothing can be expected, in any event, but a survey from the Mississippi River Commission next year. That is correct, is it not?

Mr. NELSON. And you have no assurance that they will make the survey you want.

Mr. KENYON. Then, of course, there could be no harm in that provision remaining in, from the standpoint of our southern friends that it will reduce the amount of money that they desire expended in their communities, and very properly——

Mr. NELSON. Let me put a question to my friend from Iowa before he gets deeper into the mud.

Mr. KENYON. This is water, not mud.

Mr. NELSON. I will ask the Senator, in all frankness, whether he wants to give the people of Iowa a scarecrow, and say that he has given them something substantial in the bill when he has not?

Mr. KENYON. No, sir; our scarecrows have all gone north. We have none in our State. I wanted to suggest that that provision remain in, and also the provision that the committee suggests. Then no one could be harmed and the exact purpose would be accomplished. No money would be taken that should be used in the South, and the survey would be made and we would be under the jurisdiction of this commission for the future.

Mr. NELSON. But are we not putting them under the jurisdiction of the commission? We say the commission shall make this survey. We are leaving the jurisdiction under the Mississippi River Commission, and we are telling them, in the substitute we have offered, to do what they have failed to do since 1879—to make surveys, estimates, and plans as to what improvements are needed in this reach of the river. We give them $100,000 for that purpose and tell them to furnish us the data. Then, when they bring the data before Congress, I have no doubt Congress will do the same for this reach of this river that it has done for the lower Mississippi River.

Mr. CULLOM. The law of 1879 authorized that survey. Why was it not made?

Mr. NELSON. That is it, exactly. I can not say. They have never made it; and there is nothing in the bill here as it came from the House and in the language that is sought to be stricken out that makes it mandatory. It is only our substitute that for the first time enjoins upon the Mississippi River Commission the making of this survey.

Mr. MYERS. Mr. President, as the Senator from Minnesota says he enjoys being asked questions, I presume I am free to ask him one in my feeble way.

Mr. NELSON. Certainly.

Mr. MYERS. If the House provision should be left in, would it prevent any survey being made?

Mr. NELSON. It would not prevent it, but they would never do anything. They have not done anything since 1879.

Mr. MYERS. If these people say they want the survey made for them, why not let them have it?

Mr. WILLIAMS. Because they hope to get a little money appropriated for work in Mississippi. That is why.

Mr. NELSON. They have never made a survey heretofore. The Senator from Mississippi has had experience with the Mississippi River Commission. His reach of the country, from the Yazoo Basin down to near Baton Rouge—if you can see that wide strip on each side of the river there [indicating] from a little above Lake Ponchartrain to the foot of the Yazoo Basin—has never been improved by the Mississippi River Commission. They have had the power all these years, but they have never done it.

Mr. WILLIAMS. They never would make the survey and make the estimates until they were directed to do it by a provision identical with the one which the Committee on Commerce is now putting in this bill for the upper reach.

Mr. NELSON. My good friend from Mississippi came in last year and wanted us to give him an appropriation for those reaches of the river down there [indicating], little spots between the bluffs that were flooded. They were meritorious cases. The Mississippi River Commission had not acted, and refused to act; but we put a mandatory provision in the bill last year requiring an examination and survey. When that is made we will have the data by which the citizens of the State of Mississippi, whom the Senator from Mississippi before me so ably represents, will get the relief they desire.

I am quite willing that the people from Cape Girardeau up to Rock Island on both sides of the river should get the relief. I am not hostile to it. It is not like the lower river. It is only little spots here and there for a short distance that require help. I am quite willing that they should get it, but get it as we have to get all other river and harbor improvements. If you simply put it under the jurisdiction of the Mississippi River Commission, they will not expend a dollar until there has been a thorough examination and survey. They will not even do that, judging from past experience, until you put in a mandatory provision, as we have done in this bill.

Now, I want to tell Senators another thing: The Committee on Commerce is a large committee. We have 17 members. There was a difference of opinion on this matter. Finally, by way of compromise, to satisfy all interests and at the same time to do justice to this matter and put it where it could secure the help it wanted, we agreed on this substitute. The substitute is in no manner intended as hostile to securing this relief in due time.

Now, the commission will have to make this survey if this passes. We will have appropriated the money. If they make the survey and furnish us the data during the next long session of Congress, pointing out to us what reaches of the river need levee protection, how much is required and how much should be immediately appropriated, when they give us that data there will be no trouble in securing the appropriation. I take it there will be no objection, if the necessary appropriation is made, to placing it under the Mississippi River Commission.

I am not hostile to this improvement, but it is because I want it done in the manner we are carrying on all river and harbor improvements that I am in favor of this substitute. Without the substitute the people in the section involved from Cape Girardeau up to Rock Island will never get the relief that they have expected. They will be just in the condition then that they have been in all these years. From 1879 down the Mississippi River Commission have had jurisdiction to make a survey, but they have never made it, and they will fail to do it here unless you put this mandatory provision in. We not only order them to do it, but we appropriate the money for it, not taking it out of the other appropriation.

So I say, with all candor, if I represented the State of Iowa as the Senator from Iowa [Mr. CUMMINS] does, or the State of Missouri as the able Senator from Missouri [Mr. STONE] represents it, or the State of Illinois ably as the Senator from Illinois [Mr. CULLOM] has represented that State for this long time, I would want just this substitute, because that is the only way in which you can secure legitimately and rapidly the improvement that you need in this case.

I am not tenacious about this matter at all, Mr. President. I am not making these remarks for aggressive purposes. Personally to me it makes no difference which way this matter goes, whether it is voted up or voted down. But in my innermost heart I believe there are cases in the upper reach of the river where the people are entitled to relief of a similar kind to that which we give on the lower river, and in order to give that relief we require what this substitute proposes to do, a survey and an estimate.

Mr. PERCY. Mr. President, before discussing the committee amendment, in passing, I should like to say a word or two about the bill itself.

The bill as it came from the House carried an appropriation of $37,112,958 cash and for continuing contracts $3,760,000. To that the Commerce Committee of the Senate has added cash appropriation of $4,254,487 and continuing contracts have been increased by $3,235,800, making the bill as it now stands before the Senate carry cash appropriation of $41,367,445 and on continuing contracts $6,995,800. It carries 311 projects calling for appropriations.

It is inevitable that a bill carrying such a large amount and made up of so many different projects must embrace projects of widely varying merit; that there are some projects in it which should never have been undertaken, and that there are some which have been proven to be failures, as shown by the illustration used by the Senator from Ohio [Mr. BURTON] of Trinity River, Tex., in which he stated that notwithstanding the earnest belief in the project of the people there, manifested by their cooperation and large contribution toward the improvement of that river, the improvement has not realized the expectation which had been entertained in regard to it.

The bill has been ably, I might also say mercilessly, criticized. Every defect in it has been held up to public attention and nothing but the defects in it have received consideration or discussion.

The two Senators who probably are as well or better posted than any two in this Chamber on river and harbor improvements, the distinguished senior Senator from Ohio [Mr. BURTON] and the senior Senator from Nevada [Mr. NEWLANDS], have both discussed the demerits and defects of the measure. It is true that these two eminent critics widely differ as to the remedies they propose for those defects. The Senator from Ohio suggests that there should probably be a cessation of all attempts to improve inland navigation until the experiments now being made by the building of the canal in New York and by the improvement of the Ohio River are tried out; that legislation can better control railroad rates than water competition. He even advanced the argument that it might be unfair to improve those waterways in the localities which are favored with waterways, because by such improvements you emphasize the disparity between the favored and the less favored localities. He would rather suggest that no further appropriations be made until we have experimented on the two I have mentioned, whereas the Senator from Nevada, as a remedy for the defects pointed out in the bill, would suggest a $50,000,000 appropriation allotted geographically, to be followed and not preceded by investigation and estimate. It is certain that either of these gentlemen would have criticized a bill advocated by the other on the lines proposed by him with as much earnestness, and probably with more force, than he has criticized the bill now before the Senate. It merely illustrates that it is much easier to point out the defects of a measure than it is to substitute for that measure one not subject to criticism.

Both these distinguished Senators, however, are members of the Commerce Committee, which committee has unanimously reported this bill favorably for the consideration of the Senate. So, notwithstanding their criticism, it is fair to presume that that criticism is directed toward what they may deem to be the illogical construction of the bill, and not toward its genuine merits.

There is no money that is paid out of the United States Treasury the payment of which is more carefully safeguarded than the money that is paid under a river and harbor bill. Every project in it must first have been considered and surveys made, with recommendations from the Board of Engineers as to the feasibility and the desirability of the proposed project, and then the appropriation is made on the basis of the estimate by the engineers as to what should be appropriated for that particular project.

If it be that political influence or activity can inaugurate an unworthy scheme, the Corps of Army Engineers stand between that scheme and the Federal Treasury. As long as the bill is safeguarded in that way the legislation is wise and beneficent, and to the extent that that safeguard is disregarded the legislation becomes vicious and indefensible.

Whatever scheme may be finally agreed upon, whether it be the treatment of the waterways by a commission, or whether it

be additional information to be furnished to, and action by, Congress, at last the appropriations must rest upon the reports, the investigations, the surveys, and the estimates made by the Corps of Army Engineers; and a better safeguard can not be devised.

As to the amendment reported by the committee, it is with the greatest reluctance that I feel forced to support the amendment and to oppose the provision that was contained in the bill as it came from the House. I recognize that the gentlemen who are favoring that provision have been constant in their support of the needs of the lower Mississippi River and have recognized the merit of the claims of the lower river, and I would not willingly do anything to in any way impair that friendship or diminish the zeal with which they have supported such appropriations. But I am profoundly impressed with the conviction that the provision which was contained in the bill as it came from the House is not only unprecedented but its consequences are so far-reaching as almost to be revolutionary.

The Mississippi River Commission now has jurisdiction from Cape Girardeau, a short distance above the mouth of the Ohio River, to the Head of Passes, a distance of nearly 1,000 miles, in which there are embraced about 1,500 miles of levees. It is sought by the House provision to extend that jurisdiction to Rock Island, Ill., a distance of about 454 miles, and not only that, the bill carries with it, in response to the estimates made by the Mississippi River Commission and approved by the Chief of Engineers, an appropriation of $6,000,000, to be expended between Cape Girardeau and the Head of Passes.

The appropriation of $6,000,000 contained in the bill was placed in it in response to the estimate made by the Mississippi River Commission, approved of by the Chief of Engineers, for work to be done on the lower Mississippi River. There is not any claim from any quarter that the amount allotted is in excess of what is needed. All know that the appropriation is pitifully inadequate. How inadequate it is I would illustrate by saying that notwithstanding the appropriation of a similar amount last year for the lower river there are to-day and have been for more than four weeks about 700,000 acres of that lower valley flooded by the Mississippi River. Farms, villages, and meadows have been changed into an icy lake covering 700,000 acres of land.

No one makes the claim that the appropriation is aught but inadequate for the purposes for which it was recommended. But it is sought now to permit the commission to use such part of that as they may see fit on the 450 miles of the upper river, no mile of which is embraced in that estimate. It is sought to reverse the very basis upon which this entire bill is founded, namely, that there shall be an estimate preceding an appropriation to carry out the work for which the estimate is made. There has been no report made to any committee of Congress. There has been no estimate made by any department of Government showing what areas are to be protected in that 454 miles reach, showing their extent or value, showing what kind of levees or how many miles of levees are sought to be built, showing what the cost of the proposed work will be. There is no information before any committee in Congress or in the possession of the Mississippi River Commission or the Chief of Engineers which shows whether that work will cost $100,000 or $10,000,000.

Yet from an appropriation made for a definite purpose it is sought to authorize the commission to expend any or all of it in the prosecution of a project in regard to which Congress is absolutely without data or information. That is the unprecedented nature of this proposition.

It is said that that part of the river is under the jurisdiction of the Mississippi River Commission. It has not been so treated since 1879. Millions of dollars have been expended on the upper river, not through the instrumentality of the Mississippi River Commission but through the Chief of Engineers and the Engineer Corps. This very bill carries in it $2,685,000 for the upper Mississippi River, to be expended under the direction of the Chief of Engineers and not through the Mississippi River Commission. Jurisdiction over that reach of the river has been exercised by the Engineer Corps.

The suggestion is made that this is one treatment for the entire river. That is not even sought here. It is only sought to take a part of whatever the Mississippi River Commission may allot for levee purposes and authorize the use of it by that commission in the upper reach of the river. The lower part of the river still remains under the jurisdiction of the commission, and the upper part for every purpose but levee purposes under the jurisdiction of the Chief of Engineers.

Does not Congress, before it says to the Mississippi River Commission "you are authorized to expend any part of this or any other appropriation on these 454 miles of river," desire from that commission or from the Engineer Corps some data as to the magnitude of the work upon which Congress is entering? If it does not, it contravenes every project for which the Senate has ever made an appropriation in a river and harbor bill.

Again, Mr. President, I apprehend that this provision is revolutionary in its character to this extent. It means either the beginning of the end of levee building on the Mississippi River or it means an extension of that levee building much beyond what Congress has ever yet signified its intention to go.

If the commission is authorized to expend a part of this appropriation on levee building upon the upper Mississippi River, there can be no argument advanced as to why levees should not be built on the Ohio, the Tennessee, the Cumberland, the Atchafalaya, the Red, and the Black River of Louisiana. All have exactly the same basis of contention for governmental aid, because, Mr. President, there is nothing before Congress, no report from any department of this Government, which suggests that levee building on that reach of the river may be for the improvement of navigation as well as for the reclamation of private property. It may be that the report which has been asked for will disclose that the levee building there will be an aid to navigation, but I will say that when the Chief of Engineers was before the Commerce Committee of the Senate, in response to an inquiry if the same reason obtained in regard to navigation on the upper Mississippi as influenced the building of levees on the lower, he said: "So far as I am advised, or know, levee building there will have no influence upon the navigability of the stream." Whether it will or not can only be determined when you have had the proper survey made and a report made upon which Congress can intelligently act.

It may be that the time will come, it may be that the time has come, when Congress will, under certain provisions and safeguards, expend money for the building of levees solely for the protection and reclamation of private property; but when that time does come it is certain that, before going into that kind of work, there are some questions that Congress will require to be answered. What are the areas for which you are seeking protection? Can you secure that protection by any system of fair taxation of the localities themselves? When Congress is prepared to take up the protection of private property by levee building it will certainly require a statement as to the area to be protected, the value of it, the necessity for congressional aid, what efforts have been made to protect the area by local taxation, and what is the cost of the proposed work.

Mr. President, you can not conceive of any scheme calling for congressional aid which would not at the outset furnish to Congress this information. Yet no particle of this information has been furnished as to the work to be done on the 454 miles between Cape Girardeau and Rock Island, Ill.

It may be thought, Mr. President, that possibly it does not come with good grace from representatives of the lower Mississippi River to oppose an appropriation for the benefit of this upper reach. To that I would say that that question is not before the Senate. It is not an appropriation for that reach of the river which is here sought. It is the right to come in and divide and participate in an appropriation made for the specific purpose of improving the lower Mississippi River.

What kind of credentials did the lower Mississippi River come to Congress with when it sought and succeeded in obtaining some congressional aid? More than a quarter of a century ago the representatives of the lower river came to Congress for aid, and when they did they said, first, that there is a vast area needing and demanding this protection; that the great basins of the lower Mississippi River comprise 26,000 square miles, an area greater in extent than the combined area of the States of Maryland, Massachusetts, Delaware, Rhode Island, and Connecticut, and in fertility unsurpassed, capable of producing Connecticut, and in fertility unsurpassed, capable of producing a cotton crop equal to the cotton crop to-day of the United States, with, in dollars and cents, from $800,000,000 to $1,000,000,000.

The Senator from Iowa [Mr. CUMMINS] has suggested that the area protected is not a fair subject for consideration. Undoubtedly, Mr. President, the area protected is not a controlling, but it is a most potential, factor as to whether or not the Government should extend aid. For illustration, if Congress were told to-day that the States I have mentioned—Maryland, Rhode Island, Delaware, Connecticut, and Massachusetts—having a less combined area than the Delta of the lower Mississippi, were threatened with a tidal wave which would submerge the entire country and destroy their property, which could only be averted by congressional action, it would rise to the dignity of a national question almost, regardless of the cost; but if the same statement were made in regard to a thousand acres of land, with an undisclosed cost of protection, it would scarcely be held to merit consideration at the hands of Congress.

Not only, Mr. President, did we show that we had an empire in extent and a mine of wealth in its inexhaustible fertility demanding protection, but we showed that, through their local levee boards, the people of that great valley had expended millions upon millions of dollars, raised by the most onerous system of taxation that a free people ever subjected themselves to, in an effort to secure protection. The system of taxation which had existed when the people of the lower valley came to Congress for aid has been diminished no whit during the period through which that aid has been extended to them. To-day that entire lower valley, through its 18 levee boards, is levying a tax infinitely greater than that borne by the people of any other part of these United States in their efforts, by giving their millions in addition to what the Government will extend to them, to procure protection. There never has been, and there is not to-day, any desire to escape taxation, but only when that taxation has passed the limit of endurance is there a desire that the Government shall aid in securing protection to that great valley.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Missouri?

Mr. PERCY. I do.

Mr. STONE. Can the Senator state approximately how much has been expended by the 18 levee boards of which he speaks?

Mr. PERCY. Since the Government extended its first aid there has been approximately $58,000,000 expended by the local levee boards.

Mr. STONE. Can the Senator also state approximately how much the Government of the United States has contributed to this great work of levee building?

Mr. PERCY. The Government has expended up to the last report made by the president of the Mississippi River Commission, in a statement before the River and Harbor Committee of the other House, within the past two months about $26,000,000. There has been an expenditure of more than $2 by the local levee board to every $1 expended by the Government.

Mr. CLARKE of Arkansas. Mr. President, let me ask the Senator from Mississippi whether or not all that $26,000,000 was spent on levees, or whether most of it, or a great deal of it, was not spent for the revetment of banks and in improving the channel?

Mr. PERCY. No, sir. That $26,000,000 is the estimate of expenditure for levees.

Mr. NEWLANDS. If the Senator from Mississippi will permit me, I desire to ask him a question.

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Nevada?

Mr. PERCY. I do.

Mr. NEWLANDS. Is it not a fact that about $70,000,000 in all has been spent by the National Government on the Mississippi River in the region within the jurisdiction of the Mississippi River Commisson, and that a little less than $30,000,000 of that has been spent upon the levees alone?

Mr. PERCY. I do not think the total expenditure reaches that amount, but the question that I was answering was a question of the Senator from Missouri [Mr. STONE] as to the amount which had been expended for levees, which is about $26,000,000, by the National Government.

During the past year these local levee boards by this system of taxation, notwithstanding the country there had been flooded by the water in 1912, raised and devoted to the purpose of securing protection for themselves more than $4,000,000. But, Mr. President, it was when we realized the futility of our efforts to protect ourselves, no matter how grievous was the taxation, that we came to Congress and showed that, owing to the floods that poured down through the upper Mississippi, the Missouri, and the Ohio Rivers and their great tributaries, the water of more than 26 States passed down the lower Mississippi River. Some idea of the amount of flood water carried down that river may be had by a consideration of the statement made by the president of the Mississippi River Commission before the River and Harbor Committee of the House that during the last flood of 1912, at the crest of that flood and for 48 days during that flood, twelve times as much water went down the lower river as passes over Niagara Falls.

In addition to the immense volume of water which renders protection so difficult, there was the further factor of caving banks which rendered unstable and temporary whatever levees could be built by local effort and required the effort of the National Government to revet those banks.

But, Mr. President, in addition to the magnitude of the task, in addition to the inability of that great country to protect itself by local taxation, the claim was made, and has been verified by the best engineers from that time down to to-day, that it was impossible to make that river navigable without the control of the flood waters by levees and without the revetment of the banks, so as to control the low-water stages of the river.

I know, Mr. President, that it has become somewhat the custom to belittle the idea that these levees are instrumental in benefiting navigation or that navigation itself is beneficial in fixing rates. That subject has been repeatedly and thoroughly considered by the committees of Congress. Just as an illustration—and it is merely taken from a hundred others in the testimony offered during the years before both committees of Congress which go to show the effect of this navigation upon rates—I will read to the Senate a brief statement made before the Commerce Committee of the Senate by Mr. Pillsbury, a very large shipper from Minneapolis and St. Paul. He said:

> We consider the presence of the Mississippi River and the fact that it is kept in a navigable condition the great regulator of railroad rates; that the benefits should not be measured by the tonnage as much as by the possibilities of sending the freight by water.
>
> The amount of flour shipped out of Minneapolis is something enormous—13,000,000 barrels. A great deal of this would go by the Mississippi River unless the railroads maintained the cheapest rate known in the country almost.
>
> Mr. NELSON. And the Mississippi being there keeps the rates down?
>
> Mr. PILLSBURY. The fact of the Mississippi being there prevents them from making any combination to maintain excessive rates. The necessity is not so much the amount carried by the steamers as the amount that can be carried.

Mr. H. G. Wilson, for many years an official in the freight traffic department of the Kansas City, Fort Scott & Memphis Railroad, is recognized as one of our most efficient authorities on the subject of transportation rates. He recently stated in an address before the Rivers and Harbors Committee of Congress that railroad rates from the territory known as "seaboard territory"—lying east of Pittsburgh and Buffalo—to points as far west as Galena, Kans., and Denver, Colo., were all affected by the water transportation of the Mississippi River.

It is the potentiality for transportation more than the tonnage actually carried, although that tonnage is immense for local points, such as Memphis, Vicksburg, and other points up and down the river, but not of through freight, which regulates railroad charges on through freight over an immense scope of country.

Again, as to whether levees are an indispensable adjunct in furnishing navigability to the river, in testifying several years ago before a Senate committee, Lieut. Suter then, now Gen. Suter, retired, a most experienced and able engineer, used this expression while the then Senator Gibson was examining him:

> Senator GIBSON. You stated a moment ago, in reply to a question by the chairman, that if you were improving the Mississippi River, even if it were running through a wilderness, if the country through which it ran were not peopled, you would still build levees on the banks?
>
> Lieut. Col. SUTER. Yes, sir.
>
> Senator GIBSON. Why do you hold that opinion?
>
> Lieut. Col. SUTER. Because I consider that the improvement of the stream for navigable purposes without it is impossible.

And from the very creation of that commission down to to-day, that has been the weight of the best expert engineering opinion of the Army Corps of the United States. So we have a right to base the claim, not only on the reclamation of the vast amount of country protected, but on the fact that the protection of that country is certainly not an argument against levee building, and that the best expert opinion shows that levee building is essential to maintaining the navigability of that great river.

Mr. President, for these reasons, working through the years in waterways conventions, through the public press, by hearings before committees in both Houses of Congress, the project for the protection of the lower valley of the Mississippi has at last won its way to an established place in the legislation of our country. When this fruition has come through 25 years of labor, are we to be asked to divide the insufficient and inadequate appropriation given to us by Congress, with a stretch of the river as to which Congress is without information? Are we to be asked to go into a partnership with a scheme of undisclosed merit? If there be merit, however great, no testimony to that merit is before Congress.

The amendment proposed to this bill by the Senate committee, under which the Mississippi River Commission is directed to make a survey of that 454 miles and to present to Congress a report showing the areas to be protected, showing the necessity for national aid, showing the inability of those districts to protect themselves by taxation, showing the cost of the proposed work on which we are going to embark, surely gives to that 454 miles every advantage, every opportunity to show whether there be merit or lack of merit in the proposition.

Furthermore, by that report Congress will be informed as to whether the question of navigability enters into that protection; it will be informed as to whether that levee building can be justified as an aid to navigation, or whether that levee building is solely for the protection of private property. With that

information before it, if Congress, under the circumstances disclosed, is willing to go into the protection of private property, not as an adjunct to navigation, I am not prepared to say that there will be found aught of an unfriendly attitude on the part of those who come from the lower river; but certainly, in order to act intelligently upon this proposition, Congress is entitled to that information.

Through this kind of work, through the merit of what we have submitted to Congress, we have, if I may use the expression, accumulated here, to be disbursed in that lower river, $6,000,000, and now the upper river comes in and asks for a part of the distribution of that fund, in the accumulation of which it had no part. The most liberal treatment of laborers recorded in sacred or profane history is contained in the parable of the laborers in the vineyard; but even the laborer who came in at the eleventh hour and received the same wage as those who had borne the scorch and burden of the day labored one hour in the vineyard.

This proposition as to the upper river has been discussed in no public convention of which I am advised, in no waterway congress, not in the public press of the day, not in the committee rooms of Congress, not in the Halls of Congress. Is it fair to ask that a system which has won recognition by merit shall, in the absence of all data and information, be forced into a partnership with one of undisclosed merit?

The Senator from Iowa [Mr. CUMMINS], who I see has just come into the Chamber, made the statement that unless the proposed levee work could be justified as a benefit to navigation as well as a protection to private property it could not in reason be justified. That being true, before saying to this commission "You are authorized to spend money in that levee building," is it not proper, first, to acquire the information by a competent survey as to whether the question of navigability enters into the aid to be extended?

My colleague [Mr. WILLIAMS] reminds me that the only evidence on that subject at all, the only official expression on the question as to the levee building there in any way affecting navigation, is the opinion of the Chief of Engineers before the Commerce Committee that so far as he knew or as he could surmise from his knowledge of the small basins flooded in that stretch of the river no levee building would in any wise be of benefit to the navigation of the river in that stretch.

Unless, Mr. President, the Senate is willing to reverse the rule upon which it has always based these appropriations and to enter upon a work without data and without information it will, in my judgment, and it should sustain the action of the Commerce Committee of the Senate in striking out the House provision and inserting in lieu of it the provision which directs the commission to make a survey which will furnish the information upon which we can intelligently act and which carries with it an appropriation of $100,000 for that purpose.

Mr. STONE and Mr. NEWLANDS addressed the Chair.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). The Senator from Missouri is recognized. Does he yield to the Senator from Nevada?

Mr. NEWLANDS. I shall try to secure the floor when the Senator from Missouri concludes.

Mr. MYERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	du Pont	Martine, N. J.	Smith, Ga.
Bourne	Fletcher	Myers	Smith, Md.
Bradley	Foster	Nelson	Smith, Mich.
Brady	Gallinger	Newlands	Smith, S. C.
Brandegee	Gamble	O'Gorman	Smoot
Bristow	Guggenheim	Oliver	Stone
Burnham	Jackson	Overman	Sutherland
Burton	Johnson, Me.	Owen	Swanson
Catron	Johnston, Ala.	Page	Thomas
Chamberlain	Kenyon	Paynter	Thornton
Clapp	Kern	Percy	Tillman
Clarke, Ark.	Lea	Perkins	Townsend
Cullom	Lippitt	Pomerene	Warren
Cummins	Lodge	Richardson	Webb
Curtis	McCumber	Sheppard	Wetmore
Dillingham	McLean	Simmons	Williams

Mr. TOWNSEND. I desire to state that the senior Senator from Washington [Mr. JONES] is absent from the Senate on committee work.

The PRESIDING OFFICER. Sixty-four Senators have answered to their names. A quorum of the Senate is present.

Mr. STONE. Mr. President, I purpose to confine what I have to say within as narrow limits as possible.

The question before the Senate is whether the provision on page 52 of the bill, lines 5 to 13, inclusive, shall be struck out. I take it that that is the first question before the Senate—the first to be voted upon. If the Senate should sustain the action of the committee in striking out the provision alluded to, I understand that then the question would recur upon whether the amendment substituted should be agreed to, that being open to amendments.

The House of Representatives, in framing this bill, appropriated $6,000,000 for continuing the improvement of the Mississippi River under the Mississippi River Commission, for the general purpose of improving the river, for the building of levees, and so forth, and further provided in the same general clause that—

> Any funds which have been, or may hereafter be, appropriated by Congress for improving the Mississippi River between the Head of Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended, under the direction of the Secretary of War, in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for levees upon any part of said river between the Head of Passes and Rock Island, Ill.

All I have read, and other clauses that I have not read, are embraced in one general provision of the House bill. I wish to have that clearly understood. There is $6,000,000 carried in the bill for the general improvement of the river, for the building of levees, and for other purposes recited, followed by the provision I have read, namely, that the Mississippi River Commission, with the approval and under the direction of the Secretary of War, may expend such part of the $6,000,000 as may be set apart for levee building at any point deemed advisable from the Head of Passes to Rock Island, Ill.

I heard something said here to-day, repeated by different Senators, to the effect that the $6,000,000 was appropriated for the improvement of the river from the Head of Passes to Cape Girardeau, a short distance above the mouth of the Ohio. In a sense that is true, but it is not wholly true. We must take the whole provision, not a part of it. This is what the House of Representatives did in making this bill. The House provided that so much of the $6,000,000 appropriation as might be set apart by the commission, under the authority it holds, for levee purposes, might be expended along the entire stretch of the Mississippi from the Gulf of Mexico to Rock Island, Ill.

I do not think, therefore, that the position is correct which has been assumed by some Senators that the $6,000,000 was appropriated for expenditures in improving the river only from the Passes to Cape Girardeau. That is not the language of the bill as it came from the House.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. STONE. Yes.

Mr. PERCY. Is it not true, however, that the House committee had before it an estimate of $6,000,000 for the work from Cape Girardeau to the Passes, and had before it no estimate whatever for the work from Cape Girardeau to Rock Island?

Mr. STONE. The Mississippi River Commission has from year to year made estimates, which have been laid before Congress, for the improvement of the Mississippi River.

Mr. PERCY. Mr. President, just one more interruption.

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). Does the Senator from Missouri yield to the Senator from Mississippi?

Mr. STONE. I yield.

Mr. PERCY. For the improvement of the Mississippi River from Cape Girardeau up, the Mississippi River Commission has made no estimate at any time.

Mr. STONE. Mr. President, I think that is correct. The Mississippi River Commission, at least in recent years, has made no estimates for improvements above Cape Girardeau. But that is due to the fact that hitherto for some years the appropriations in the main have been made for that stretch of the river from Cape Girardeau to the Head of Passes. It is not that the Mississippi River Commission did not have jurisdiction, under the terms of the law creating it, over the stretches of the river north of Cape Girardeau; but in the past the appropriations have been made for the improvement of that part of the river from Cape Girardeau to the Gulf.

Just how that happened I shall not now attempt to explain, except I might venture to say that the Senators and Members representing the States of Arkansas, Mississippi, and Louisiana have been a little smarter and more attentive and urgent in securing limitations on the appropriations than we have been in the territory bordering the river above Cape Girardeau.

The Senator from Mississippi [Mr. PERCY] said that this question had not been discussed anywhere until now; that it had been suddenly thrust upon congressional attention. Why, Mr. President, conventions of people interested in the improvement of the upper Mississippi have been held at different places for years past. The Senator said there had been none, but he is mis-

taken. Upper-river conventions have consistently and continuously urged that the upper Mississippi should be treated on a par with the lower Mississippi.

The mere fact that the advantage in the application of these appropriations has heretofore gone to our brethren in the Southern States should not stand against the justice or the right of the cause we are advocating—that the upper part of the river shall be treated as fairly and generously and in the same way as the lower part of the river. This equality is sure to come, and it had as well come now as later. The people of Illinois, Iowa, and Missouri who live along this stream have just as much right to be fairly treated, and to be treated on exactly the same terms, as the people living along the borders of the river in the States farther to the South.

I was told some days ago that if this provision, put in by the House, remained in the bill, it meant the defeat of this river and harbor bill. That sort of thing has been said. Mr. President, I do not reply to that in a like threatening spirit. For one, I do not wish to defeat this river and harbor bill. The Senate may not do justice to the people I represent, or to the people of Illinois and Iowa, but we will not on that account attempt to defeat an act of justice and of great benefit to the people who live in other States along the river. I am here to appeal briefly for what I believe is a simple act of justice, neither more nor less.

Mr. President, what we ask is only that the Mississippi River Commission be authorized to expend, if deemed necessary and if circumstances and conditions arising make it expedient, some small part of this great appropriation for the benefit of our people in Illinois, Iowa, and Missouri. This river is one stream, and I can not conceive why anyone should contend by word or act—and acts speak louder than words—that the people in the more northerly States should not be placed on a level of absolute equality in treatment with the people of Arkansas, Mississippi, and Louisiana. That is all we ask.

Even if the House provision should be accepted, I do not believe that any considerable part of the appropriation in this bill would be expended this year on the upper Mississippi. The Senator from Minnesota [Mr. NELSON] declared here an hour ago that even if the bill were left as it came from the House, at most only a very small part of this appropriation could be wisely and economically expended in the upper Mississippi during the current fiscal year. He thinks probably none of it could be so expended, but at most only a small part of it. That accords with my own view.

The Senator from Mississippi [Mr. PERCY] said that this was a departure that menaced the whole system of levee building on the southern stretches of the river; that it would endanger the work already done, and that it would enlarge the operations of the commission to such an extent that it might result in the downfall of the whole project of improvement. Therefore, I take it, the Senator thinks we should have no aid for our people in Illinois, Iowa, and Missouri, and that we should not come under the care and jurisdiction of this great commission, for fear the extension of its operations might result in disaster to levee building in the South. That is hardly as generous an argument as I should have expected from my usually broad-minded friend from Mississippi.

Mr. President, I said the fight that we are making will be won. It may be turned down here to-day, and if so, we will make no effort to defeat this bill; but it is well to say that the people of three such States as Illinois, Iowa, and Missouri, knowing that they are entitled to every consideration that is accorded to the people along the more southerly stretches of the river, will come here with an insistence that will not be gainsaid. This thing will have to be done, because it is right and just. The opposition to it is indefensible. It ought to come now.

Mr. CLARKE of Arkansas. Mr. President, does the character of the argument the Senator is making preclude the asking of questions? I will not disturb him if he desires to proceed without interruption.

Mr. STONE. No; I yield to the Senator. I do not know just what he means by "the character of the argument."

Mr. CLARKE of Arkansas. The Senator is proceeding along the line that the Mississippi River from Cape Girardeau up has been very sadly neglected; in fact, that no provision whatever has been made for it. I wish to call his attention to the fact that, on page 53 of the bill, this provision appears:

> Improving Mississippi River from the mouth of the Missouri River to Minneapolis, Minn.: Continuing improvement and for maintenance, $1,500,000.

There, in one item, $1,500,000 is appropriated for the very territory the Senator is talking about.

Mr. STONE. Yes.

Mr. PERCY. Along the line of that remark, let me suggest that the bill carries $2,685,000 for the upper Mississippi, to be disbursed under the direction of the Chief of Engineers.

Mr. STONE. Yes; I know that. The Senators illuminate everything they touch, but it was not necessary to throw light upon that particular subject.

Mr. PERCY. The Senator neglected it so in his argument that it might be thought he had overlooked it. I was satisfied he had not overlooked it.

Mr. STONE. No; I had not overlooked it. But, Mr. President, the clause which is at issue is not for the improvement of the channel of the river, but for the construction of levees in aid of navigation.

The provision is to this effect:

> Any funds which have been, or may hereafter be, appropriated by Congress for improving the Mississippi River between the Head of Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended, under the direction of the Secretary of War, etc.

Mr. CLARKE of Arkansas I will intrude only one more time, to call the Senator's attention again to page 50 of the bill, where an appropriation of $6,000,000 is made, a part of which he proposes to divert by the amendment he has just read—by the use of this language:

> Continuing improvement with a view to securing a permanent channel depth of 9 feet, $6,000,000, which sum shall be expended under the direction of the Secretary of War in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for the general improvement of the river, for the building of levees * * * and for surveys.

Mr. STONE. Yes.

Mr. CLARKE of Arkansas. Every dollar of that money can be expended on the improvement of the river, if so much of it shall be required, without devoting a single dollar of it to the construction of levees, unless it is the more important feature of the improvement contemplated.

Mr. STONE. Of course; everyone knows that. We also know, however, that the Mississippi River Commission has authority to set apart for levee building such portion of this appropriation as may be deemed advisable for levee building.

Mr. CLARKE of Arkansas. Mr. President, that statement is only partially true. The Mississippi River Commission does not set apart a specific sum of money to be devoted to the construction of levees; but it takes up certain defects in the levees, or certain places at which an improvement or the construction of a levee is absolutely required at the time, and an appropriation is made for that particular project. Sometimes they are not able to supply all the places that require them, and this bill will not enable them to do it this time.

Mr. STONE. But the Senator certainly does not deny that the Mississippi River Commission does set apart certain portions of the appropriation for levee building?

Mr. CLARKE of Arkansas. For specific projects, yes; not specific parts of the appropriation, but for specific improvements. For instance, suppose there is a break in the Beulah levee. They set apart a certain sum to repair that. The Senator would not want to take a part of that and carry it up to Iowa and Missouri, would he?

Mr. STONE. What is the meaning of the provision which says that the commission may expend, between the Head of Passes and the mouth of the Ohio River, such funds as may be allotted to levees?

Mr. CLARKE of Arkansas. I will intrude on the Senator once more, and then I will quit. They are not allotted to levees generally as levees, but they are allotted to each specific improvement that the necessities of the river require. When an allotment is made it is made, for instance, for the improvement of the levee at Beulah or for the improvement of the levee at Lake Providence, La. The Senator would not want to take one of those allotments and carry it up to Missouri, would he? That is what the amendment contemplates.

Mr. STONE. No; I should not want to do that.

Mr. CLARKE of Arkansas. We are agreed, then.

Mr. STONE. But I think if they could allot something for Beulah or some other point in that vicinity they could allot something for levees in the States I have mentioned.

Mr CLARKE of Arkansas But that is not what is provided by the amendment the Senator is advocating. It says—

> Any funds * * * which may be allotted to levees.

Mr. STONE. That is the difference between tweedledum and tweedledee—whether they make allotments in a gross sum for levee purposes or whether, exercising a discretional power, they make specific allotments to given points for levee purposes is not important. It seems to me it is wholly immaterial whether allotments are made in the one way or the other.

The last river and harbor appropriation bill, in which $6,000,000 was appropriated for the Mississippi River, did contain a

provision for the general improvement of the river, for the building of levees which shall be considered extraordinary emergency work, and so on—

Provided, That in view of the existing emergency $4,000,000 of the money hereby appropriated is set apart for the repair and construction of levees.

There was a specific levee appropriation. Now, levee-building allotments, under the House bill, would be left to the judgment of the commission.

You gentlemen in the Southern States have been very generously treated in the use of public moneys for the construction of your levees. You have not been more generously treated than you deserved. You have not received a dollar since I have been here that I did not cheerfully vote for. I served eight years on the Committee on Commerce, and there was no better friend of yours on that committee than I. I stood by you on all occasions, I think, without exception. And now, when I ask that a large part of my State, and when the Senator from Illinois and the Senators from Iowa ask that their States be put on terms of equality with yours, you think we are trying to plunder you, that we are trying to rob you. Does this money belong to the people of Arkansas, Mississippi, and Louisiana? No. It belongs to the people of the United States. It is in the Treasury of the United States, and my people contributed to the raising of the fund from which the $6,000,000 will come.

We did as much in that direction as did the people of Arkansas, Mississippi, and Louisiana, and now when the House of Representatives, treating this whole question as one question, appropriates money out of the common Treasury of the United States for this great purpose, sees proper to authorize the commission, if the emergency should arise, to use a part of it in the northern stretch of the river, why do you object?

Mr. PERCY and Mr. WILLIAMS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Missouri yield, and to whom?

Mr. STONE. I will yield in a moment. Mr. President, it is absolutely surprising and disappointing to all of us to have the Senators from the South come here in that spirit. I suppose the sinister thing we call selfishness enters into the bosoms of even Members of Congress, and it may find its way even into the hearts of Senators from sovereign States.

Mr. WILLIAMS. From Southern States?

Mr. STONE. Yes; even from Southern States, unnatural as it may seem.

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Mississippi?

Mr. STONE. I do.

Mr. WILLIAMS. Mr. President, I notice with what earnestness and vigor the Senator from Missouri said upon an equal footing, and all he desired was that the project should be placed upon an equal footing with the lower Mississippi. I wish to ask him if he thinks that he is putting the two projects or the two sections upon an equal footing when he requires of one, to wit, ours, that it shall submit to a previous survey, examination, and report, and shall furnish proof of its merit, and from Missouri—and Missourians always want to be shown—there shall be required neither survey, nor examination, nor report, nor any proof of the merits of the scheme? Is that putting them on an equal footing?

Mr. STONE. Mr. President, I submit that if at Beulah, for example, a levee was endangered by a recent flood, or at any other point——

Mr. WILLIAMS. That was reported on 10 years ago.

Mr. STONE. The Senator from Mississippi must know, he does know, that if there was a point on that river to-day that was suddenly endangered the commission could take such moneys out of the appropriation of $6,000,000 as they thought necessary to protect that levee without having any survey made of it.

Mr. WILLIAMS. That will be simply because the survey has been long ago made and a levee recommended and a levee built, and when the levee broke again no further survey was needed, and, moreover, because on the whole lower stretch of the river the engineers have long since said levees are necessary for navigation. The only evidence in connection with your right is the word of one engineer, who said it could not possibly be of any benefit to navigation.

Mr. STONE. I do not know what engineer, if any, ever made that foolish report. I do know that engineers make many absurd reports.

Mr. President, so far as surveys go, they are made along the whole river, and engineers report that it is advisable to make or support levees at given points. The local people are building levees and the Government, cooperating with them, aids in the construction of levees. That is all there is to that.

Mr. WILLIAMS. No.

Mr. STONE. What else is there to it.

Mr. WILLIAMS. They look upon the area back of the levee, they report upon the condition of the river and ascertain where the levee should be, and they report upon the question whether the erection of the levee will or will not aid navigation. It is a principle of the Commerce Committee of the Senate never to recommend an appropriation for a river and harbor work except when it is based upon a survey and an estimate, and the object is to prevent the public money from being wasted in problematical enterprises.

Mr. STONE. Mr. President, is a survey intended to find the extent of the area that would be protected by a levee or that would be endangered by the absence of a levee? There is not a Mississippi plantation darkey who could not tell the extent of territory in his section that would be flooded by a great overflow of the river. You do not need a survey for that. All that is the merest chaff.

Mr. PERCY. Can the Senator give us any idea of the area which is to be protected by the proposed levees along the 454 miles of extension?

Mr. STONE. Yes; about a million acres.

Mr. PERCY. How is it distributed between the States?

Mr. STONE. The greater part of it will be in Illinois; the next greater part will be in Missouri.

Mr. PERCY. Can the Senator give any idea of the number of levee boards, and what they have contributed to their local protection?

Mr. STONE. Yes; I can. They have 16 levee districts organized on the upper Mississippi, and they have expended altogether approximately $16,000,000 in the construction of levees.

Mr. President, I have a sample statement on that point here before me. It was handed to me by a Member of Congress from East St. Louis, Mr. RODENBERG.

The length of the levee district at East St. Louis is about 22 miles. This levee runs from Alton, Ill., or near there, to some considerable distance below East St. Louis. The total distance is about 22 miles. That levee district has already expended, including a provision for the issuing of bonds for the completion of the levee, a total of about $7,000,000.

Mr. PERCY. What is the taxable value of the area protected by that levee?

Mr. STONE. I can not state that. It is very great, though the levee is not very long.

Mr. PERCY. I was only asking to see if the taxable value was such that it was fair to suppose that the district could protect itself by local taxation rather than by governmental aid.

Mr. STONE. About 10 miles of the 22 miles front East St. Louis. This levee district runs from about 15 miles above East St. Louis to about 7 miles below. About 15 or 20 miles below East St. Louis, in the same congressional district on the Illinois side, is the Harrisonville levee, which cost about $400,000, already expended. This levee is between 5 and 6 miles long.

I have other data of that kind here, showing a very large expenditure, and all by the local people.

Mr. President, the outlying country that would be protected by these particular levees is the great American bottom. That bottom runs out 20 miles from the river, and every foot of it is subject to inundation. There is not a richer or more productive land in this country. It is densely populated. The land is covered with truck farms, with wheat fields, and corn fields. That is an example of what our people are doing and of the danger that menaces them.

Mr. President, the Lord knows I am more than willing to do everything in my power to protect the lowlands of Arkansas, Louisiana, and Mississippi, but I think that the people of Illinois, Missouri, and Iowa are equally entitled to consideration from all the agencies of our Government. We will submit to nothing less.

The Mississippi River Commission is a great commission. It has done a great work. It is doing a great work now. When the commission was created, it was given jurisdiction over the entire river from the Gulf to the headwaters. It is, under the terms of the law, just as much the commission for the upper Mississippi as the lower Mississippi. The Senator from Iowa [Mr. CUMMINS] read and commented upon the law of 1879, the organic act creating the Mississippi River Commission and defining its powers. I need not amplify what he said. In the fourth section of that act I find these words:

It shall be the duty of said commission to take into consideration and mature such plan or plans and estimates as will correct, permanently locate, and deepen the channel and protect the banks of the

Mississippi River; improve and give safety and ease to the navigation thereof; prevent destructive floods; promote and facilitate commerce, trade, and the postal service.

That is the language of the organic act, and that act creating this commission gave to the commission jurisdiction over the river from the Head of Passes to St. Paul.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Iowa?

Mr. STONE. Certainly; I yield.

Mr. CUMMINS. As supplementing what has just been said by the Senator from Missouri, I desire to call his attention to the fact that in the very appropriation bill we are now considering the provision appropriating $6,000,000 for the improvement of the Mississippi River contains a clause authorizing the Mississippi River Commission to survey the whole river, not from the Head of Passes to the mouth of the Ohio, but from the Head of Passes to the headwaters of the Mississippi, and any part of the appropriation of $6,000,000 can be used for the purpose of surveys. It has long been the duty of, or within the authority of, the commission to survey. I read on page 51, after reciting the appropriation of $6,000,000 "for the general improvement of the river, for the building of levees," and so forth—

Between the Head of Passes and Cape Girardeau, Mo., and for surveys, including the survey from the Head of Passes to the headwaters of the river.

So we only want for the appropriation for levees just what is already authorized for surveys.

Mr. STONE. Mr. President, we do not need authority for a survey. The Mississippi River Commission has made surveys for the Mississippi River. The Senator from Minnesota [Mr. NELSON] stated this morning just what I am stating. There have been numerous surveys made of the upper and lower Mississippi River.

Mr. President, I served for eight or nine years on the Committee on Commerce, and I discovered long ago that when you had a Missouri or upper Mississippi River proposition before that committee, no matter what its merits, you might expect some—at least one—distinguished member of the committee to thrust his strong arm out in strenuous opposition. I have always regretted this phase of this subject, because of its apparent sectional character.

Mr. President, I was about to say I discovered long ago that when the Senator from Ohio [Mr. BURTON] or some other Senator found that he was being hard pressed on a measure before the Commerce Committee he would propose a "survey" as a side-tracking process. A survey is like sprinkling salt on a bird's tail to make him tame and gentle. That is an old scheme of postponement; it means defeat by procrastination and delay. That is the "dope" now presented to our lips—a survey. We do not need a survey. What we want is action. It is not even necessary to confer jurisdiction on this river commission to work for us, for it already has that jurisdiction; but we want to give that commission to understand by this legislation that it must look after the upper Mississippi as well as the lower Mississippi.

Mr. President, I must quit; my throat is hurting me. I can say only a few words in addition. Senators of the South, this is as much our commission as it is yours; those of us in the upper part of the river have as much claim to it as have you, and we contribute as much to its maintenance and to the great work it does as do you, and we appeal to you to be fair with us.

It costs less—far less—to construct levees in the upper Mississippi than it does to construct levees in the lower Mississippi; they do not have to be made so high or so broad, and when once constructed they possess a permanency unknown to the levees of the South, and that because of the absence of the rapid erosion that eats into your banks. As a general rule—having occasional exceptions, of course; but as a general—up in Illinois, in northern Missouri, and in Iowa, when a levee is built it will not be washed into the river by the falling in of a bank. Now, why do you men of the South wish us to go on alone paying millions for the construction of our levees and to go on draining our lands at enormous cost, bearing the whole burden ourselves, without sharing in the assistance you are getting from the Government? My brethren of the South, do not stand against us in this matter.

Mr. WORKS. Mr. President, in the course of my remarks submitted a short time ago I questioned the correctness of the language used in this amendment. In response to something that I said, the Senator from Minnesota [Mr. NELSON] referred to an appropriation that was asked for by the people of the State of California for the improvement of the Sacramento River, and in terms indicated that he regarded it as a scheme to secure money out of the Treasury of the United States. In fact, he referred to it as a scheme to secure an appropriation of $20,000,000 from the National Government.

There was an appropriation asked for by the people of my State for the improvement of the Sacramento River. I am satisfied that the Senator from Minnesota, just-minded as I know him to be, did not intend to prejudge the question that has been presented to his committee as to the justice of the claim for that appropriation, and in view of what he has said I do not think I should allow the impression to remain upon the mind of any Senator here that the request for an appropriation was in any sense improper or unjust. So I feel it incumbent upon me to call the attention of the Senate to just what that appropriation is. I can not do it better than to refer to the bill itself, which is quite brief. It is as follows:

A bill for improvement of the Sacramento River and tributaries, Cal.

Be it enacted, etc., That there be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, $100,000, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers, for improving Sacramento River and tributaries, Cal., and for the control of débris and floods, in accordance with the report printed in House Document No. 81, Sixty-second Congress, first session, with a view to the completion of such improvement within a period of 11 years; and the Secretary of War is hereby authorized to enter into a contract or contracts for such materials and work as may be necessary for the completion of this improvement, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $10,900,000, exclusive of the amounts herein and heretofore appropriated: *Provided*, That $22,000,000, being twice the amounts herein appropriated and authorized to be appropriated, shall be furnished for the work by the State of California; and no part of the appropriation herein made shall be available for expenditure except for necessary preliminary work, such as preparation of plans, etc., and no contract shall be entered into under the foregoing authorization until the Secretary of War shall be satisfied that the State of California has made provision for furnishing the said sum of $22,000,000 and has deposited in the Treasury of the United States $1,000,000 and satisfied the Secretary of War that the remaining $21,000,000 of said sum will be deposited in like manner from time to time as appropriations for the work may be made by Congress, and in amounts equal to twice those so appropriated: *Provided further*, That the Treasurer of the United States is hereby authorized to receive from the State of California any and all sums of money that have been or may hereafter be appropriated by said State for the purpose herein set forth, and when so received the said sums are hereby appropriated for said purpose, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers.

It will be seen that the total appropriation provided for was $33,000,000, and of that sum the State of California obligated itself to pay $22,000,000, or two-thirds of the amount. There was no call, Mr. President, for anything on the part of the Government but the improvement of the navigation of the Sacramento River, one of the chief navigable streams of the State. As a result of the work to be done by the National Government, however, there would be a large body of land which would be benefited by simply keeping the river within its banks. In view of that benefit which resulted to the State, in addition to the benefits which resulted from the increase of navigation, the State is ready to pledge itself to pay two-thirds of the amount necessary to be expended for that purpose. This was brought about by a statute enacted by Congress providing for the formation of a débris commission, as it was called, that was to make a complete investigation and survey of the Sacramento River for the purpose of determining the best and most feasible plan for improving navigation. The act provided that one-half of the expense of the investigation should be paid by the State, and that was done; the necessity for it resulted from an act of negligence on the part of the National Government. It had permitted hydraulic mining to be carried on extensively in the upper part of the Sacramento River, or near by, by which the débris was carried into the stream and navigation practically destroyed for a large part of its distance. The purpose of this appropriation mainly was to dredge out the débris that had accumulated in the stream as the result of the mining that was permitted by the National Government to be carried on.

There never has been in the matter of making appropriations by the Government for the improvement or the protection of the navigable streams of this country a more just demand made by any State in the Union than this one; and there is no reason why it should have been characterized by the Senator from Minnesota as a scheme to secure money from the Public Treasury. The statute that I have referred to was passed away back in 1893. Under that statute investigations and surveys were made by the commission that was provided for, consisting of engineers of the Army, acting entirely under the direction of the War Department. The result of this application for an appropriation by the Government was brought about by the report that was made by that commission. The attempt was simply to secure sufficient money to improve the navigable character of the stream as reported and estimated for by the commission.

So far as the pending question is concerned, my own judgment about it is, and always has been—and I think that conforms to the judgment of other Senators here—that the right and power of the Government is confined to the protection and promotion of the navigability of the stream; but to this end I think it is the duty of the National Government to confine its navigable streams within their banks. In doing that, necessarily the Government is protecting the lands that may be flooded or submerged by failure to do just that thing, and I think the people who are owning land along the line of the streams are entitled to that protection in that way as a part of the protection that is due from the Government of the navigable stream itself.

Those are my views, in brief, with respect to it. Therefore I am in entire sympathy with the efforts that are being made by the people of the States bordering upon the Mississippi River to have their lands protected by taking care of the stream by the necessary levees, no matter whether it is on the lower or the upper Mississippi. Just exactly the same condition of things exists in California on the Sacramento River, and there is no reason why our people should not be protected just as the people in Mississippi and in the other States along the Mississippi River are to be protected. Therefore I am sorry that the Senator from Minnesota should apparently have passed upon this question that is now before his committee. It is a matter that has been partially heard. Some of our people from California have been here for the purpose of submitting to the committee their reasons why this improvement should be made. The engineers of the Army have been there, and explained minutely what work has been done by them and the plan that has been devised for the improvement of the river. That is a matter that we hope will be left open until it can be carefully investigated by the committee and the rights of our State determined.

I should not have taken up the time of the Senate in discussing that appropriation but for the remarks that were made by the Senator from Minnesota, which seemed to call for a few words on my part.

Mr. WILLIAMS. Mr. President, I do not think that any amount of intellectual ingenuity or any amount of sophistry can dress up the nakedness of this proposition so that it will be really disguised. The proposition presented from the upper Mississippi is not at all the same proposition that is presented from the lower Mississippi. A levee even on the upper Mississippi is a matter of 3 or 4 or 5 or 6 feet, and the areas to be protected are inconsiderable; the areas do not run back from the river very far. The use of the levee in order to promote navigation is not to be witnessed there. The only Army engineer whose opinion has been asked said before the Commerce Committee that building levees in this stretch would not improve navigation at all. When the lower Mississippi gets out of its banks, it makes an inland sea 60 miles wide, stretching from the Ozark hills, in Arkansas, to the Yazoo hills, in Mississippi—a turbulent, muddy stream.

Some time ago I presented a proposition somewhat like this that faces Senators now. It was for a stretch of country from Vicksburg, on the east side, down to Bayou Sara, La., on the east side. The Mississippi River Commission had refused to levee there, for the reason, first, they said, that it would not improve navigation—the engineer took that position—and that the areas were too inconsiderable. The question was presented to the Commerce Committee, and the Commerce Committee demanded, and very naturally, that if there was merit in the scheme it ought to be shown by an estimate after inspection, examination, and report. They, therefore, adopted a provision authorizing and directing the Mississippi River Commission to make an examination and survey in almost precisely the same language which is adopted in this bill. The Mississippi River Commission did make the survey and has made a recommendation, upon which I shall base the demand for legislation in the future with confidence that the demand will be met; but it was, in my opinion, unreasonable of me that I should ask of the Commerce Committee that it should appropriate the public moneys until I had first satisfied them in the proper and accustomed and usual way that the scheme was worthy of recognition.

Mr. President, for years and years the conduct of this Government toward the great Mississippi River would have been laughable if it had not been so tragic and pathetic. We have spent $400,000,000 and more for the Panama Canal, and we will never get in any one year of our existence one-tenth of the revenue in the shape of public taxes paid to State, county, and Federal Governments and commerce promoted that we would get through the Mississippi River in any one year; but instead of taking up the great Mississippi River problem as a separate problem, which the engineers, after surveys and after reports, show will need $58,000,000, I believe, for levees alone, besides the work of revetment, canalization, and dredging, running it up to something like $100,000,000, Congress doles out driblets of from four to five or six million dollars and sometimes as little as $3,000,000 a year; and about as fast as we get the work upon its feet, the great river again bursts its shackles and sweeps away what was done. Then, when after long struggle and after the great overflow of last year, in which people lost not only their property and their houses, the shelter over their heads, but their cattle, their horses, and everything of that sort, and in which many of them lost their lives; and after the overflow of this year, which upon a more localized area has brought almost equal suffering, we come here and are given the pitiable sum of $6,000,000—such part of it as the Mississippi River Commission may choose to be allotted for levees south of Cape Girardeau. When we come to the Congress in that condition, after having spent $54,000,000 of our own money, counting only the amounts expended since the Government first came to our help, during which time, if you consider that the levees are erected two-thirds for protection and one-third for navigation, we have contributed more than $2 to every dollar appropriated by the Government, and counting the sums which we spent prior to the time the Government began to give any assistance at all, at least 10 times as much as we have spent since—after we have done all that, here comes in a backdoor scheme to have a part of the little driblet that has been given to us to do this work diverted and put somewhere else in the country upon the theory that it is fair.

The Senator from Missouri [Mr. STONE] stands here and appeals to us to be fair. I appeal to him to be fair; and if there is merit in his scheme, let it stand upon its own bottom. That is not all. Let him name the amount of money he wants while he is describing the work to be done, and let Congress, with its eyes wide open, appropriate the amount of money that is necessary for the project which he desires carried forward.

The Senator asks us to be generous. In my country when a man is furnished his rations as a part of his wages he gets 4 pounds of meat a week. If he had a wife and two children, and had been only paid 3 pounds, if somebody came along and suggested to him to be generous by giving him a pound of it, I imagine the reply would be "Go out and work for your own meat." We have worked for it; we have suffered for it; we have paid our money for it; we have died for it; and we have not yet got one-tenth of what we ought to be getting. Even upon the theory that two-thirds of the work is for protection and the other one-third alone is for the improvement of navigation we have paid our two-thirds and more.

When it comes to the question of navigation, every authority from Robert E. Lee, long before the war, down to now has said that levee work was absolutely indispensable for the improvement and maintenance of navigation of the lower Mississippi, a silt-bearing stream that fills up its bed when it stretches out into an inland sea and becomes stagnant water; and the only way of getting the channel open is to keep the flood waters confined and let them sweep along and carry in solution the silt and the mud. The upper Mississippi has not the same problem at all; it is a clear-water stream, and its areas are so insufficient that the river can not spread out into great inland seas, stagnating, depositing, and filling up.

The proposition there, if it is one that stands upon the same footing as ours does, will be reported fairly by the engineers to be such; and, if it is, then Senators can get their appropriation upon the merits of their own project without taking it from us.

One of two things is going to happen: Either the Senator from Minnesota [Mr. NELSON] is right, and the Mississippi River Commission will not allot a dollar to the upper Mississippi, not even for a survey, or else they will take a part of the money that has been allotted and appropriated to our purposes upon estimates which called for more and will divert it to that portion of the river. In either event there is no argument for the position taken by the Senator from Missouri.

The Senator from Missouri says that we have hitherto received these appropriations because we people down in Louisiana, Arkansas, and Mississippi were smarter than the people in Missouri and Illinois and Iowa. If that be true, it is news to us and will be equally news to them.

Why is a river and harbor bill generally called a "pork-barrel bill"? Why is it that it is not so generally called a "pork-barrel bill" now as it was 20 years ago, when I first came to Congress? It is because so many ill-considered schemes get a place upon it. What is the only way to prevent ill-considered schemes from getting a place upon it? It is to adopt some rule for the guidance of committees and for the two Houses. What

is the best rule? To say that no appropriation shall be made of public moneys out of the Treasury for river and harbor work until the matter has been properly examined by proper officials and recommended, or until such data have been furnished the two Houses as that they can, from their own knowledge, conclude that it was rightful to be done, and overrule the opinion of the engineers. It is not without reason that this rule has been made, and I for one would hate to see it set aside, because, if you once begin at the last moment to bring in schemes before the two Houses without any hearing, without any engineers' report, without any estimates, or anything of that sort, you are out on a sea of chaos; you do not know what you are doing.

So far as I am concerned, I feel this way about this proposition: I think that if the Senators who brought this proposition in had coupled with it a proposition to add $500,000 or $1,000,000 to the $3,000,000 appropriated, I might have voted for it; but even then I have my doubts as to whether I could consistently do so without a report from some competent expert authority giving the reason for the project itself.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Missouri?

Mr. WILLIAMS. Certainly.

Mr. STONE. I seriously doubt whether there have been any of what my friend calls estimates, scientifically and accurately prepared, as to the expense of levees, generally speaking. But, after all, is it not true that the expenditures made on levees are the result of immediate conditions, somewhat suddenly arising? The Senator talks about estimates. We have estimates as to the cost of levees. The Senator does not imagine that fifteen or eighteen million dollars have been spent in levee districts without estimates, made by very competent engineers, does he?

Mr. WILLIAMS. Where are they?

Mr. STONE. Where are what?

Mr. WILLIAMS. Where are these estimates of which the Senator speaks?

Mr. STONE. They are filed with the officers of these levee boards. Where are the estimates of which the Senator from Mississippi speaks?

Mr. WILLIAMS. Right in the War Department, and in these two committees—the Committee on River and Harbors of the House, and the Committee on Commerce of the Senate.

Mr. STONE. What are those estimates?

Mr. WILLIAMS. They are estimates in detail——

Mr. STONE. I should like to see them. I have served on that committee a good while, and I should like to see the estimates—these fine-spun, elaborate estimates of the cost of things. I should like to see them. It is very easy to stand here and talk about estimates, but I want to see them.

Mr. WILLIAMS. The Senator can go and see them whenever he wishes. He can go and look at the reports of the engineers at the War Department.

The Senator speaks about the estimates that some levee board or district committee has, somewhere down in Illinois or elsewhere, that is not here to guide the committee, and not here to guide the Senate. He has thus far produced an ex parte statement from the Representative in one district in which one levee exists. The Senator certainly will not tell me, he certainly will not tell the Senate, that he has given the Senate any data upon which the Senate could go, any basis upon which they could form a conclusion.

Mr. STONE. But I should think the river commission could easily ascertain every fact necessary.

Mr. WILLIAMS. Then, if the River and Harbor Committee could have ascertained it, and if the evidence could have been presented to that committee, why was it not presented?

Mr. STONE. I did not say the River and Harbor Committee; I said the Mississippi River Commission.

Mr. WILLIAMS. Oh, the river commission! The river commission has rules by means of which it proceeds to collect its data, and upon that data it bases its conclusions. It sends out its expert engineers to make the surveys and report. They report as to the probable commerce, they report as to the area, they report as to the navigability of the river, they report as to the effect of the work upon the navigability of the river, and then they report incidentally anything else that may occur from which they hope a profit may result to the Government in the way of partial reimbursement.

The Senator tells us that all he wants is to be put on a par. All I ask of him is that he shall consent to be put on a par.

Mr. STONE. I do consent.

Mr. WILLIAMS. I beg pardon; the Senator does not. On the contrary, the Senator wants to break into the back door without coming into the front door, without announcing his presence by knocking at the Engineer Department, without announcing his presence by knocking at the anteroom of the two committees. He wants to come in with an ex parte statement of some sort, and come in at our back door and take a part of our poor little 3 pounds of meat, when our necessities are 6 pounds.

Senators say they have just as much right to share this money on the upper Mississippi as we have on the lower Mississippi. Perhaps they have. I do not deny it. I do not know whether they have or not. All I am doing is standing up here like a Missourian and demanding to be shown. I am perfectly willing that they should share it upon precisely the same terms and under the same conditions, after passing through the same avenues and according to the same formalities.

The Senator says the fight for this project will be won. I do not know; I hope so. I can say this much: Whenever the proper reports are made, and it is shown that this is a meritorious cause, if it needs $500,000 or $1,000,000 or $2,000,000 I shall vote for it. But I do not want to vote to share money that has been estimated, and the full estimates not granted, for levees upon the lower Mississippi, and have it diverted to a purpose which is not even known to be meritorious thus far, however meritorious it may be or however meritorious it may be shown to be at some future day.

Of course I would not charge any attempt here to avoid examination, survey, and report. I understand how these things occur. I introduced a bill last year myself to make an appropriation for a purpose very much like this. That lower country is very much like this upper country. The hills come in toward the river, now jagging into it, now out, now 5 miles, now 14, sometimes 20 miles back. The committee took the position that I ought to pursue the accustomed course and get a survey, and have the engineer report, first, as to how many of the areas could be properly leveed with benefit to our navigation and with incidental benefit to the lands behind; secondly, if lands were totally lost by being thrown out in the stream, how much of them ought to be regarded as having been condemned by the Government for public purposes and therefore purchased by the Government. I waited patiently for that report, and the report came in too late for use this year.

Mr. CUMMINS. Mr. President——

Mr. WILLIAMS. One more word, Mr. President, and then I will yield to the Senator. When you reduce this to its nakedness, without fallacy, without intellectual ingenuity, without sophistry, without unnecessary verbiage of any sort, it amounts simply to this: After the Engineer Corps and the Mississsippi River Commission have estimated that a certain amount of money is absolutely necessary for levee construction upon the lower Mississippi, a part of it shall be taken away and deflected for other purposes elsewhere.

If Senators contend that that is not what they mean to do they can cure it very easily. They can couple their proposition here and now with a proposition to increase the appropriation and provide that the amount of the increase, a quarter of a million or half a million, or what not, shall be appropriated to levee building on the upper river, provided, of course, the Mississippi River Commission thinks it improves the navigability of the stream.

Mr. CUMMINS. Will the Senator now yield to me?

Mr. WILLIAMS. Yes; I yield to the Senator.

Mr. CUMMINS. The Senator from Mississippi, I take it, is willing that we shall be put in the same position that the State of Mississippi was with regard to the appropriation which he has just mentioned; that is, where he is now seeking further information from survey and examination. The Senator is willing for that to be done?

Mr. WILLIAMS. Yes; that is just what the Commerce Committee wants to see that you get.

Mr. CUMMINS. As far as I am concerned, I accept that and leave it to the Senate to determine whether or not we are in the same position. Every moment for years it has been in the power of the Mississippi River Commission to build levees along the river at the point to which the Senator has referred. The commission could have taken every dollar of the appropriation for years and, if it had considered it wise, it could have built levees at that point. All I ask is that we shall be put in the same position. If we can not show that these levees ought to be built, then of course not a penny will be expended for them. But does not the Senator from Mississippi see that we are not in the same position?

Mr. WILLIAMS. No; I do not.

Mr. CUMMINS. Is it not true that for years the stretch of the river to which the Senator has referred has been under the jurisdiction of the Mississippi River Commission?

Mr. WILLIAMS. The whole river has been under the jurisdiction of the commission.

Mr. CUMMINS. And is it not true that the commission has had the power to take the appropriation and build levees along that stretch?

Mr. WILLIAMS. The whole river, as the Senator from Missouri very clearly showed, has been under the power of the commission.

Mr. CUMMINS. It has been under the jurisdiction, but not under the appropriation. The stretch of the river to which the Senator from Mississippi has referred, however, has been under the appropriation as well as under the jurisdiction.

Mr. WILLIAMS. Ah, yes.

Mr. CUMMINS. Therefore he is not willing that we shall be put in the same position. That stretch of the river was put under the power without any examination or preliminary survey whatever.

Mr. WILLIAMS. The Senator from Iowa is talking about verbal differences, not actual differences. If the Senator from Iowa says that the Mississippi River Commission at any time could have leveed the stretch from Vicksburg to Bayou Sara under the appropriation as it was made, and could not have leveed the stretch from Cape Girardeau to Rock Island under the appropriation as it was made, of course he is absolutely right.

Mr. CUMMINS. That is all.

Mr. WILLIAMS. But that is a mere difference in form and verbiage; nothing else. As a matter of fact, the Mississippi River Commission took the position that as to this stretch of country down there, the amount which it would cost to build levees would be so out of proportion with the areas protected by it, and so out of proportion with the amount of improvement to the navigability of the river, that they would not spend the money; so, when it came to the point we were upon exactly the same footing.

Mr. CUMMINS. They took that position with us.

Mr. WILLIAMS. They were treating both areas exactly alike. With a very much stronger case than yours—I was within the territorial limits of the appropriation, at any rate—the Commerce Committee, holding to a salutary rule, sent me to the engineers and to the river commission, with a provision making it mandatory upon the part of the river commission to make a survey and report; and now, notwithstanding the fact that you are not within the territorial area of the appropriation, they give you precisely the same relief. In other words, they make it mandatory upon the Mississippi River Commission, and provide that they shall make a survey and report, so that proper data and information may be before the proper committees of Congress, and may be brought by them before the Congress of the United States.

Mr. CUMMINS. Precisely.

Mr. WILLIAMS. However anybody might have wanted to hide it, or however anybody might imagine that somebody did want to hide it, what you are trying to do is to slip into the back door.

Mr. CUMMINS. No, Mr. President. I was simply rising to call to the attention of the Senate the difference between the Senator's situation there and ours.

Mr. WILLIAMS. I have taken no advantage of my situation that the Senator has not taken of his.

Mr. CUMMINS. If the Mississippi River Commission does not want to levee our part of the country, it does not have to do so. It may turn us over to the same examination that the Senator from Mississippi says it turned him over to.

Mr. WILLIAMS. Here is what the Government did with those people, and they did not do it with yours: They leveed the river above them and below them on the same side. They leveed the river upon the other bank, and they virtually made their lands a part of the channel of the Mississippi River. The commission adopted the line of hills back from the river as a levee, and virtually condemned for public purposes, without compensation, some of the fairest plantations that ever existed in that part of the country. When I came with that absolute hurt and damage, which was recognized by the commission itself in a pathetic expression of it, describing the condition of things there, the committee still sent me over the route that they now propose to send you, and the Government have not condemned your property to the bed of the river, as they did ours.

A few more words, Mr. President, and I am through. I hope the public sense of the American people and the sense of the American Congress may be stirred to the point where the Mississippi River may be treated as it ought to be treated, as a great independent proposition, as the Panama Canal was. I hope the machinery of the Panama Canal may be brought up here as soon as the canal is finished and put to work dredging out every bump, beginning at the Passes and coming up, until what is now a 9-foot channel from St. Louis down to New Orleans will become, by dredging half a dozen bumps or so, a 14-foot channel all the way. I hope that they will conjoin levee building, revetting, and canalizing at a few places where the bend is simply too great and where, owing to the extremity of the bend, the river is being diverted to the opposite side and digging out the sand and sloughing off the banks all the time, until the bend becomes so extreme that it cuts across again on the short way. I hope they will stop all that.

The Mississippi River will never be dealt with satisfactorily upon this driblet plan, because about the time you get a little meritorious work done the great river takes it in its mighty arms and scatters it among the woods, along the banks, and in the bed of the river all around. It is cruel when it starts out, and little pigmy works can not stand before it. It is not a question of engineering at all; it is merely a question of money. There is no substantial disagreement in the minds of engineers as to what must be done and could be done and how the Mississippi can be controlled and made navigable all the time. The only trouble in the world is the matter of money.

If you can afford to pour out money like water for digging a ditch across the Isthmus of Panama to benefit an almost negligible and insignificant foreign commerce, you can certainly afford to spend one-fourth of the amount in benefiting the most gigantic domestic commerce that any country on the face of the earth ever bore upon its bosom, or any country, perhaps, ever will bear, promoting it and encouraging it and making it grow, not in arithmetical but in geometrical ratio year by year.

No people were ever so blessed as this country was with this great artery of commerce, right down the middle of the great cotton-bearing and sugar-bearing and grain-bearing area of the country. All that is necessary is to go at it with patriotism and in a proper way and do the work, and do it with a view to the navigability of the stream. When you once have made it navigable with a 14-foot channel, you will never have any more trouble about overflows. You can not get enough fall in it, if it is canalized at the proper places, straightened at some places, given an increased velocity of current and therefore increased force and volume in bearing off the silt, and is properly revetted at the places where there is danger of the sand being scooped out and the banks falling. It will not be once in 50 years that there will be enough water to threaten the people with destruction. It is not, as some Senator has said, a question of navigability alone; it is a question of interstate commerce just as much as a question of navigability.

Mr. MYERS. Mr. President, I have listened with much interest to this discussion since a little after noon to-day, and as a consequence I have something of a headache. I suppose Senators will think I want to give a part of my headache to them if I rise to address a few remarks to them. I assure them that I am not selfish with my headache, and I am quite willing to share it with them.

Mr. President, I believe in reunions of the Blue and the Gray. I am always glad to see the North and the South shake hands over the bloody chasm if other people are not crushed and trampled underfoot and their rights denied by the operation. I am charmed with the delightful exhibition of a reunion of the Blue and the Gray that we have seen on this floor to-day, emanating from the venerable senior Senator from Minnesota, who, I believe, was a gallant soldier in the Union Army in the late War between the States, and participated in on the other hand by the distinguished junior Senator from Mississippi, whose father, I believe, was a gallant soldier in the armies of the Confederacy. I am delighted at all such exhibitions of good will. I am glad to see the far North and the far South come together with the glad hand of fellowship. But what about the State of Missouri that is put in between the two extremes, that is neither North nor South, and that has some rights, I believe, as a member of the Union?

I am glad to see these fraternal exhibitions of the North helping out the South, but I believe there are others concerned who have rights, and I do not like to see such a fraternal exhibition denying rights to other people who are innocent intervenors occupying the middle ground.

It is very seldom that I vote or take a stand in this body different from my associates from the far South. It is very seldom that I differ from them in opinion about matters which come before this body. But I believe there are others that have rights; there are others to be considered; and in this particular instance it appears plain to me that the right of the matter is not with them in their contention. It seems plain to me that there is a disposition here to deny equal rights to the people of the States of the upper Mississippi Valley, particularly to the people of the States of Missouri, Illinois, and Iowa.

Far be it from me to have any feeling against the people of the lower Mississippi Valley, from Cairo south, or to infringe upon their rights in any way whatever. I love that country and its people. By birth, raising, association, ancestry, heritage, feeling, and principle I am one of them, and I always will be one of them, even if I should move to Alaska or to the North Pole to live. But as a Member of this body I realize that there are other sections of the country that have rights and that should be considered in a matter of this kind.

I speak for a section of the country that belongs neither to the upper nor to the lower Mississippi Valley, that will not be directly benefited by any legislation along this line in behalf of either the upper or the lower Mississippi Valley. But the people of my section of the country and of my State help to raise the money that will be donated by this legislation to whatever section of the Mississippi River Valley may receive it. The people of the entire country are interested in a fair and a just and a proper expenditure of the money which they all contribute to raise.

We pay our share of this money by paying a tariff tax on everything we eat or wear or consume, by paying our share of the internal-revenue taxes of the country, and by every other form and mode of taxation to which the people of the different States are subjected for the purpose of raising Federal revenue. I believe the people of the entire country should have something to say, and not alone the people of either the upper or the lower Mississippi Valley, about what is right and just in this matter.

I know, as has been eloquently depicted here, that the people of the lower Mississippi Valley are a long-suffering people, and that the hand of calamity has been heavily laid upon them. For four dark and bloody years the cruel hand of war and devastation was laid upon that people, and several times since then the gaunt specter of pestilence—yellow fever—has cast its deadly shadow across their threshold, and the turbid waters of the Mississippi have worked the destruction of their lives and their property. I sympathize with them in all those things. But I do not believe that sympathy should go to the extent of denying rights that belong to other people and to other States in the Union that are on an equal footing with the States of the lower Mississippi Valley.

The State of Missouri is no less a sovereign State of the Union than the State of Mississippi; neither is the State of Illinois or the State of Iowa. They are all members of the Union, on an equal footing, and the people of those States are entitled to the same consideration in legislation of this kind as the people of the lower Mississippi Valley.

The matter seems to me to resolve itself to this: The Senator from Minnesota [Mr. NELSON], in response to a question by me, stated that even if the House provision should be stricken out and the Senate committee amendment adopted in lieu thereof the people of the upper Mississippi Valley could get no more than a survey out of this proposition in the next year or two. If that is going to be the case, who is hurt by it? How are the people of the lower Mississippi Valley States hurt in any wise if that is true? As the Senator from Minnesota is chairman of the Commerce Committee, which has studied this proposition and has brought in this amendment, I take it he ought to know something of what the probable consequences would be if the House provision should be stricken out and the Senate committee substitute put in; or, contra, if it is not done, it seems to me he ought to be versed in what the probable consequences would be. He says that if the contention of the Senator from Missouri prevails here the upper States will get only a survey anyway, and I conceive that nobody is hurt by it. On the other hand, the junior Senator from Mississippi [Mr. WILLIAMS], in his remarks upon the question, said that he was quite sure of the States of the upper Mississippi Valley getting the benefit of some of this appropriation for levee work. If it can so result, then they would get it according to law. It would not be contrary to law or else they could not get it. If they can get according to law such part of it as the Mississippi River Commission may think proper, why should they not have it? If they can get it according to law, and the Mississippi River Commission, with its knowledge of the situation and the facts, sees fit to grant to them some small proportion of this appropriation—such as in its judgment under all the circumstances and the necessities of the case those States ought to have in just proportion to their needs, their necessities, their condition, their damage, and their circumstances in the premises—then what will be wrong about it? I can not see where any wrong would result in either one of those events to the people of the lower Mississippi Valley States.

If the upper States get nothing but a survey out of this, then the people of the lower States give up no part of the appropriation. If, on the other hand, the people of the upper States get a small percentage of this appropriation, in a manner allowed by law, such as in the judgment and discretion of the Mississippi River Commission they should get, who has any right to complain?

It does seem to me, Senators, that the people of the upper and the lower Mississippi Valley ought to be placed on an exact footing in this matter without any discrimination. Why should not all be treated alike? I am opposed upon principle to taking money away from the whole people by process of legislation and putting into the pockets of a part of the people. That is contrary to my Democracy, my principle, my conscience, and my belief. But if it must some time from necessity be done, and may constitutionally be done, then I believe it ought to be applied alike to all the people in the same class. I do not believe that it ought to be applied to a part of the people in one class and denied to a part of the people in the same class.

While I am generally, upon principle, opposed to all such legislation, I recognize that there are necessities which arise when it ought to be done and may properly be done under the Constitution and the necessities of the case. When we get to that extremity why give a part of the people who need it the benefit of it and deny it to the other part of the people who need it and are equally entitled to the benefit of it? Why give the people of the lower Mississippi Valley the benefit of this necessity and emergency and deny it to the people of the upper Mississippi Valley? I believe they are all in the same class. I believe it is a principle of law that if legislation applies equally to all the people in a certain class, and there is good ground for it, it is not class legislation; but if it applies to only a part of the people in a certain class and not to others, then it is subject to the objection of being class legislation, which is obnoxious to the spirit of our laws and our Constitution and Government.

Are not all the people of the Mississippi Valley in the same class in regard to this matter? It is true, I admit, that the people of the lower Mississippi Valley States suffer more from devastation and destruction by the flood waters of the Mississippi River than do the people of the upper Mississippi Valley States. But that is only a difference in degree. It is not a distinction upon principle; it is only a matter of degree and amount.

We all know, I believe, as a matter of general information, at least I know, that the waters of the upper Mississippi Valley every few years overflow the banks and submerge thousands of acres of valuable land in Missouri and Illinois. Every few years the rich bottom lands in Illinois opposite Hannibal, Mo., are flooded, buildings, stock, and fences are swept away, and lives are lost. I read that in the newspapers. It is a matter of common knowledge and information. It is not to the extent, of course, to which the same kind of destruction prevails in the lower Mississippi Valley States, but it is of the same kind and nature. There are rich Mississippi River bottom lands in the State of Missouri above Hannibal, extending from Hannibal to Keokuk, Iowa, that are every few years submerged and overflowed by the flood waters of the Mississippi River. I can not see why anyone should contend that the people of the upper Mississippi River Valley are not entitled to the same consideration in principle and spirit and degree in legislation of this kind as the people of the lower Mississippi Valley.

It seems to be the consensus of opinion here, in which I concur, that Congress may only appropriate money for the purposes of building and maintaining levees where it will improve the navigation of a river. If that be the case, the building and maintaining of levees in the upper Mississippi River Valley will certainly be as helpful to navigation as in the lower Mississippi Valley. If the building and maintenance of those levees incidentally protect life and property in the lower Mississippi Valley, they protect life and property in the upper Mississippi Valley. Why are not the life and property of the people of the upper Mississippi Valley as dear to them as to the people of the lower Mississippi Valley to them? If one should be the object of legislation by Congress, incidental it may be true, should not the other equally be the object of legislation?

It seems to be contended here with much force and vigor that the people of the upper Mississippi Valley are not entitled to consideration in this matter because there have been no estimates and specifications as to the need and cost of this work. I never dreamed that it was necessary to have the report of an engineer to establish the fact that the building and maintaining of levees where rivers are accustomed to overflow their banks would be helpful to navigation. Common knowledge teaches us that without the report of any engineer.

We all know that when the river overflows its banks, whether it be in the North or in the South, it washes sand and débris into the bed of the river and creates sand bars; that it washes away the land in the low-lying bottoms adjoining the river and

changes the current of the river and destroys a permanent and a steady current. It seems to me that it takes no report of an Army engineer to tell the Members of this body that those things are detrimental to the navigation of the river and that if the building and maintenance of levees obviate that condition, then the building and maintenance of those levees would be helpful to the cause of navigation. I fail to see any difference in principle in the application of this legislation between the upper and the lower Mississippi Valley.

If this body, in its wisdom, would see fit to confer upon the Mississippi River Commission the same right that has been exercised by the Senate Committee on Commerce, to send the people of the upper Mississippi Valley to the War Department to make a showing of their necessities and to get a report of Army engineers before their necessities will be recognized by the Mississippi River Commission, then I do not see why the Mississippi River Commission is not as competent and as capable of doing that as is the Senate Committee on Commerce.

It appears that the Senate Committee on Commerce has adopted a rule of its own—I know nothing of its being a rule of this body—by which it refuses to bring in a bill to appropriate money for a purpose of this kind until such time as the applicants for it and the sufferers in need of it have gone to the War Department and made known their needs and obtained the report of an Army engineer. But if the Senate Committee on Commerce can exercise that discretion and that power and jurisdiction, and this body sees fit to confer the same power, the same jurisdiction, and the same discretion on the Mississippi River Commission, what is there in right or justice to keep this body from substituting the Mississippi River Commisson and its judgment in a matter of that kind in lieu of the Senate Committee on Commerce and its judgment?

I seek not to criticize the Senate Committee on Commerce for taking this stand. It may be a wise and judicious stand. There may be need of it. But if this body, in its wisdom, has sufficient confidence in the Mississippi River Commission, which certainly is equally well versed in the topography and condition of the Mississippi River, and if this body sees fit to confer upon the Mississippi River Commission the same power and jurisdiction to be exercised in its judgment as is now exercised by the Senate Committee on Commerce, I can not see where any harm will result.

If that be followed, as it seems to be the opinion of the Senator from Minnesota and other Senators will be followed, then there can be no danger of the people of the upper Mississippi River Valley getting any part of this money before they have shown their needs therefor and the justice of giving it to them.

It seems to be the idea of some of my associates from the lower Mississippi Valley States that this is an attempt on the part of the Senator from Missouri and other Senators from the upper Mississippi Valley to take away from them something that belongs of right to them; that the Senator from Missouri and his associates who stand with him are trying to rob them of something that belongs to them. Mr. President, I do not believe that the Federal Government owes money to any State or the citizens of any State. I do not believe that any State in the Union has a right to claim that the Federal Government owes it money for purposes of this kind. I do not believe that the Federal Government owes any of us anything except the right guaranteed in the Bill of Rights of the Federal Constitution. But if the Federal Government, in its wisdom and under the Constitution, in proper and legitimate cases, where necessity requires it, sees fit in the exercise of a constitutional function to appropriate money to a part of the people of the country for the improvement of navigation along rivers and the incidental benefit of lands adjoining those rivers, I say Congress has a right to say where that money shall go. There is no State nor section nor spot of this Union that has exclusive right to that help from the Federal Government. If this body, in its wisdom, sees fit to say that provided the necessity may be shown to the Mississippi River Commission a part of this money shall go to the upper Mississippi River in the States of Missouri, Illinois, and Iowa, I do not believe that anybody has been robbed of his constitutional rights.

I do not believe this is an attempt by the people of the upper Mississippi River Valley to get money in through the back door, as has been charged here. When the House of Representatives sends a bill here, which comes in at the front door of this Chamber as an act of the House of Representatives of Congress, and it comes before this body in the regular and legitimate way, I have never heard it was trying to put something through the back door.

It seems to me that if there might be room for anybody to charge that something was coming through the back door it might be charged that the committee amendment was coming through the back door. But I make no such charge. Both views of this matter are fairly and squarely before this body, and I believe it is for this body, in its wisdom and judgment, to say where this money may be permitted to go and whether or not it shall apply alike to all sections of the Mississippi Valley that are in the same class and suffering under the same conditions. It is for this body to say whether all shall be put upon the same footing and treated alike.

It appearing to me that the amendment of the Senator from Missouri is designed to have that effect, I am heartily in favor of it, and in right and conscience I can stand for it, and I am in favor of voting down the amendment reported by the Senate Committee on Commerce.

Mr. BURTON. Mr. President, I desire to address the Senate for only a very few minutes.

There are two conclusive objections to the amendment of the Senator from Missouri [Mr. STONE], which also lie to the House provision. The first is that it is an invariable requirement, before Congress enters upon a public work in rivers and harbors, that there should be an examination and an estimate of the cost.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Missouri?

Mr. BURTON. I should like to proceed for just a little time.

Mr. STONE. The Senator spoke of my amendment. I have offered no amendment.

Mr. BURTON. It has been referred to as your amendment.

Mr. STONE. What?

Mr. BURTON. Reinstating the provision proposed to be stricken out of the House bill. At any rate, the Senate understands precisely what I mean. I am opposed to the House provision and in favor of the amendment reported by the Committee on Commerce. Most of the mistakes and extravagances and unsatisfactory results which have arisen in our river and harbor policy have been due to the prosecution of improvements where either there was no examination or an insufficient examination. We are behind many other nations in this regard. In France there is a much more elaborate investigation before work is commenced.

It would be unfair to make this provision included in the House bill without such an examination. We require, Mr. President, when a proposition for an improvement costing only $5,000 is brought here from any part of the country that nothing shall be done upon it until after the most careful examination and report recommending it has been made by the Board of Engineers. It has to run the gantlet. It must be examined not only by the local engineer but in most cases by a division engineer, and then pass under the examination of a board of review. Still further, it must be approved by the Chief of Engineers, and formally, at least, by the Secretary of War. What is proposed to be done by this provision? It is to place in this bill, made up of appropriations for the continuance of public works, examined and recommended, this, which has had no examination whatever.

Mr. President, the second objection is the difference in the conditions between the upper and the lower Mississippi River. I desire to point to the map hanging on the wall of the Chamber, which, if carefully examined, will tell the whole story. From about Cape Girardeau down on the major part of the Mississippi River there are low alluvial lands. The jurisdiction of the Mississippi River Commission for a long time extended only to Cairo. By statute in 1906 it was extended to Cape Girardeau, because conditions from Cairo up to Cape Girardeau were similar to those below. What is the condition below Cape Girardeau which requires the construction of levees? The land bordering on the river is low and flat, and behind the banks, if there are banks, there are wide stretches of lowland. If the bank is not protected by levees, the river is likely to leave its accustomed channel and spread over the adjoining country.

I wish to again call attention, Mr. President, to the exceedingly crooked quality of the river below Cairo. It is probably the most crooked stream, at least of any considerable size, in the world. You could very appropriately use as to it the poetical quotation:

> Nowhere such a crooked stream
> Save in fancy or in dream.

At each one of those bends in that alluvial country there is danger that the river in time of flood may leave its banks and take an entirely different course, the result of which would be that the navigable quality of the river would be very seri-

ously injured, if not destroyed. Above the section referred to is the one for which the House provision is inserted. There is no such condition there. For the most part there are high banks, there are stretches here and there of lowland which are liable to overflow, but there is no necessity for levees for maintaining the navigable capacity of the stream. The construction of levees would protect the adjacent property, but it would not be required to keep the river within its accustomed channels.

This subject was taken up by the Mississippi River Commission after the formation of that body in 1879. The act of 1882 made appropriations to be expended by that commission to the amount of $4,123,000. It was provided that of that amount $600,000 might be expended between Cairo and the mouth of the Illinois River, including $35,000 for the harbor at Alton. Two hundred thousand dollars was appropriated for improvement between the Illinois River and the Des Moines Rapids, near the city of Keokuk.

In the bill of 1884 reference is made to the part above the Ohio merely in recognition of the appropriations already made for that stretch. But, beginning with 1886, and from that day to this, there has been no jurisdiction given to the Mississippi River Commission, nor any authority for the construction of levees, except below Cairo, with the exception that since 1906 their jurisdiction has extended to Cape Girardeau.

It is asked, Why has not a survey been made? Why, Mr. President, during all these years they were making surveys. And what was the conclusion that they reached? That the construction of levees for the sake of navigation was not necessary except below Cairo. Even if they made no formal report in the way of a survey they at least came to a determination, which was based upon their study of the river, which was to the effect that no levees should be provided in the upper sections. That shows the difference between the two portions of the river.

I think I can speak without any bias between the two sections when I say to the Senate that it would be unfair to divert a part of this $6,000,000 from the southerly portion and expend it in the northerly. In the first place, one of the most destructive floods ever known on this globe occurred in that lower region last year. Cities were inundated; great expanses of agricultural territory were overflowed for weeks; there was loss of property and of life and widespread destruction. The first thing to do is to repair the damage done by that great flood. They have had no such calamity in the northerly section.

For 20 years there has been barely a whisper from anyone in that locality for appropriations for levees, but here, after this frightful calamity, after the apportionment of an amount which is confessedly insufficient to make the needed repairs and improvements in the southerly section, this request is brought in to apportion a part above Cape Girardeau. I can not quite agree with the Senator from Minnesota [Mr. NELSON] that no part of this $6,000,000 would be expended above Cape Girardeau. Perhaps it would not be expended actually during this year, but action would be taken. The commission would understand that Congress meant something in adding this provision:

> Any funds which have been, or may hereafter be, appropriated by Congress for improving the Mississippi River between the Head of Passes and the mouth of the Ohio River, and which may be allotted to levees, may be expended, under the direction of the Secretary of War, in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for levees upon any part of said river between the Head of Passes and Rock Island, Ill.

Each year when the appropriation is made the members of the commission meet; they make an apportionment of the funds. While they might not actually expend any part of the $6,000,000 during that year, they would, at least, divert a part of it for this new stretch of the river.

Mr. JONES. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Washington?

Mr. BURTON. I do.

Mr. JONES. Would the commission be likely to make any apportionment before they had made a survey to determine what should be done?

Mr. BURTON. They very likely would make a survey, but whether they made a survey or not, that upper portion is provided for. Again, there are certain levees in the upper portion that have been under construction by municipalities and private parties.

Mr. JONES. I want to say that I am heartily in favor of the practice of making a survey and having it approved, and so on, before the appropriation is made; but, as I understand it, under the provision in the House bill, as the House had it, no expenditure can be made until a survey has been made by the commission.

Mr. BURTON. It does not so provide in the section.

Mr. JONES. It says:

> In accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers.

Of course, there would be nothing for him to approve until the survey was made and the plans and specifications were decided upon.

Mr. BURTON. Let me just explain what would be the natural course there. The Mississippi River Commission go over the river twice a year—once in November and again in April or May, once in the period of high water and the other time in the period of low water. They direct their engineers to go over the whole river and point out what work is needed. Now, if this provision should be adopted, there is a new section of the river, and it would be necessary not only to go over that part from Cape Girardeau down, but from Cape Girardeau up to Rock Island. There are localities there where levees should be constructed, and that portion of the river would have just the same kind of a claim on the commission as the portion below.

Mr. JONES. But, nevertheless, they would not make any expenditure until after they had made their plans and specifications, which would require a survey; and that would have to be approved by the Chief of Engineers.

Mr. BURTON. But they would have a year and two months—indeed, if this bill passes before the 4th of March, and I take it that it will, a year and four months—in which to make an apportionment of the appropriation.

Mr. JONES. It seemed to me that about the only difference between the two provisions was that in the first one the commission are not absolutely required to make a survey, while in the amendment proposed by the committee they are actually required to make a survey, and the amendment makes an appropriation for that purpose.

Mr. BURTON. There is a much broader and greater difference than that.

Mr. JONES. I should like to hear the Senator point it out.

Mr. PERCY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Mississippi?

Mr. BURTON. Certainly.

Mr. PERCY. Is it not true that this is exactly a reversal of the policy heretofore pursued in river and harbor appropriations where the money is turned over to the commission?

Mr. BURTON. Decidedly.

Mr. PERCY. Under the policy outlined here, the money is first put into the hands of the commission, and the commission is authorized to make the expenditure if the survey proves the expenditure to be desirable, whereas in every other appropriation ever made to the commission the commission first makes the survey and the estimate and submits that to the committee, and through the committee to Congress, and Congress then determines whether an appropriation shall be made to cover that estimate on the work which the commission has outlined.

Mr. BURTON. But there is more than that in this provision. There is a direction that the commission shall exercise jurisdiction over this portion of the river, and they may expend, under the direction of the Secretary of War, money already appropriated.

Mr. JONES. Well, Mr. President, that brings out one point that I wanted to get clear. Should I understand that the appropriations recommended by the committee for this commission are based upon surveys and estimates already submitted by the commission?

Mr. BURTON. Those surveys and estimates give a general direction to the committee in recommending appropriations. The commission, however, have a wide discretion in the matter of the places they shall select and the amounts they shall expend.

Mr. JONES. And the commission, after the appropriations are made, can make further surveys and apply the money to points different from those before the committee when they recommended the appropriation?

Mr. BURTON. Certainly. Indeed, they do not in their estimates specify all the places. The reports, in a general way, show the most urgent points, but they do not in detail specify the points where the money is to be expended on which their estimates are based.

Mr. JONES. Then in making the appropriations for the commission the usual rule of first requiring the surveys to be made before the appropriations are made is not followed?

Mr. BURTON. Well, I think it is hardly correct to say that the usual rule is not followed. This is a continuing project

from year to year, and this is part of a great plan of improvement——

Mr. JONES. Yes; I understand that.

Mr. BURTON. While in the case of a harbor it would be a specific amount at one point and for one general purpose.

Mr. JONES. Yes; but the appropriation would be based upon a specific estimate by the commission, although it may actually be applied to other parts of the project that have never been estimated for.

Mr. BURTON. Certainly. It would be applied to the whole great project—levees, dredging, revetments, and improving of harbors all along the river. The Senator from Washington will realize—I have no doubt he does now understand—that, in the case of a great river like the Mississippi, it is impossible to tell in advance just where the most pressing need for the money will occur. Now, I want to give just one——

Mr. JONES. Before the Senator proceeds, then, the only effect really of this provision of the House bill is to extend the scope of that commission to a further stretch of the river, is it not?

Mr. BURTON. Yes.

Mr. STONE. And to that, of course, the Senator from Ohio is firmly, continuously, and forever opposed——

Mr. BURTON. I do not know, Mr. President——

Mr. STONE. Under any and all circumstances.

Mr. BURTON. The Senator from Missouri spoke of his having favored appropriations for the Great Lakes and the Ohio River, and regretted that I did not favor the Missouri. Well, Mr. President, there are rivers and rivers. The Ohio River has a traffic of 12,000,000 tons a year, while the Missouri River, taking out sand and gravel, which is conveyed a mile, much of it even less, has a traffic, varying from year to year, of perhaps thirty to forty thousand tons, and a good share of that is near the mouth of the river; in other words, as I once showed by figures, the Ohio has 300 times as much traffic as has the Missouri. It is not with me local partiality; it is that ratio of 1 to 300.

Three or four harbors on the Great Lakes, lying within a few miles of where I live, handle more tonnage in a year than was ever handled on the Missouri River since the Louisiana purchase. I think that is a sufficient answer to the Senator from Missouri as to any possible intimation of partiality.

Now, I want to say something about this estimate. We ought to know where we will land, Mr. President.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Missouri?

Mr. BURTON. Certainly.

Mr. STONE. I wish to say, if the Senator will permit me, since he has introduced the Missouri River, that, although the Missouri River is not the subject of discussion at this time, I am not willing to accept the statement of the Senator from Ohio with respect to the Missouri River as a correct statement. I have heard that statement of his more than once, but I think there is an entirely different side to it. However, this is hardly the occasion to discuss the Missouri River.

Mr. BURTON. I would say, in regard to the upper Mississippi, that the bill as reported by the Committee on Commerce appropriates $1,000,000 for the 180 miles from Cairo to the mouth of the Missouri. It appropriates $1,500,000 for that part between the mouth of the Missouri and St. Paul. Those portions are certainly quite as generously cared for as the lower Mississippi, where the distance is longer, the urgency greater, and the public work in progress is far more expensive.

To resume what I was saying about the estimates, let us see where we would land. One gentleman appeared before one of the committees of Congress and said that the total cost of these levees in the upper portion of the Mississippi—that is, up to Rock Island—would be $4,000,000. Another person who came here advocating the improvement said that in a levee district including the city of East St. Louis, only a small part of this stretch, the cost would be $10,000,000. There you have them side by side. One man says that for the whole river, from Cape Girardeau up to Rock Island, it will cost $4,000,000 to do the work that is contemplated. Another says that a short stretch on one side of the river would cost $10,000,000. What would we be doing, here in the Senate, if we committed ourselves to a project where there was such uncertainty as that ahead of us?

Mr. President, I sincerely hope the Senate provision will prevail. I want to say that this amendment providing for a survey is one of the most generous I ever saw inserted in a river and harbor bill. It requires that the Mississippi River Commission shall make the examination. It requires that they shall report to us. It does not seem to include, as ordinary surveys do, a provision that they shall report on the advisability of the project. Such a provision ought to be in it, and ought to be in all such legislation. I think I may say to the friends of this improvement that if there is a favorable report they will be on much more stable and reliable ground after this examination is made than they are now.

Mr. NELSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. Certainly.

Mr. NELSON. If the Senator will allow me, if this were a matter that concerned my own State and I wanted an appropriation to secure the making of the improvement, I should certainly favor this amendment for a survey instead of the other, because if a survey should be made it would lay the foundation for an appropriation at the next session of Congress. If you do not provide for a survey, you will be in the same position in respect to this improvement next year that you are now.

Mr. BURTON. Yes; the same uncertainty and lack of reliable information would exist as now.

I want to say one thing further, Mr. President. We have heard a great deal about precedents here lately. The portion below Cape Girardeau is under the Mississippi River Commission. The portion above is under the Corps of Engineers of the United States Army. It is considered that those two portions of the channel of the Mississippi are widely distinct. If you adopt this amendment and apportion money for levees, I do not see where you are going to stop. Confessedly the building of levees above Cape Girardeau in the nonalluvial portion of the river is not for navigation. It is for the protection of property. There may be a very remote influence on navigation, but that is all. If you do that for the upper portion of the Mississippi, from Cape Girardeau to Rock Island, why must you not do it on that portion of the Mississippi from Rock Island to St. Paul? Why must you not do it on the Ohio River from Cairo to Pittsburgh, where the destruction by flood is tenfold greater than it is on this section of the Mississippi? Why must you not do it on the Kentucky River and on the Green River? Passing over to Virginia, why must you not do it on the James River?

Some day, Mr. President, we shall have to enter upon a great plan for protection against floods, but we are not ready for it now. We are not ready for it without a more careful consideration of plans and a more thorough understanding of the subject.

Mr. NELSON. Mr. President, it is now nearly 6 o'clock. There are many Senators who desire to speak on this matter. In view of that fact, I move that the Senate adjourn.

Mr. BURTON. Will the Senator withhold that motion for a minute?

Mr. NELSON. Very well; I yield to the Senator from Ohio.

Mr. BURTON. I give notice that when the committee amendments are finished I shall offer as an amendment the bill which relates to the Connecticut River Co. I submit the amendment and ask that it may be printed and lie on the table.

The PRESIDENT pro tempore. That order will be made.

Mr. CUMMINS. Will the Senator from Minnesota yield to me?

Mr. NELSON. Certainly.

Mr. CUMMINS. I desire to suggest to the Senator from Minnesota that to-morrow will be fully occupied with the memorial exercises, save an hour or two, and I ask him whether he desires to bring this bill up for consideration to-morrow?

Mr. NELSON. I do. I shall ask the Senate to take it up immediately after the disposal of morning business.

Mr. SMOOT. Immediately after the reading of Washington's Farewell Address; and then we can proceed with it until 2 o'clock.

Mr. NELSON. Yes; until 2 o'clock. I do this because other appropriation bills are waiting for the disposal of this one. There are two or three other appropriation bills on the calendar. They are all waiting for this bill to be disposed of, and unless they are soon reached it will be difficult to give them proper consideration. Therefore, I am anxious to dispose of this matter.

Mr. CUMMINS. I have no objection, Mr. President; but I doubt whether it will advance the bill very much if we spend only an hour on it to-morrow.

Mr. NELSON. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 46 minutes p. m.) the Senate adjourned until to-morrow, Saturday, February 22, 1913, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

FRIDAY, *February 21, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Speak to us, O God our Father, source of all wisdom, power, and purity, that we may be inspired and guided in the resolves of the hour, that they may be well pleasing in Thy sight and redound to the good of those here represented. If God is with us, who can be against us? If God is in us, who can thwart His purposes? If God is round about us, He shall deliver us from evil. So we believe, so we trust, so we pray. In the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 4681. An act to authorize and require an extension of the street railway lines of the Washington Railway & Electric Co., and for other purposes.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bill:

H. R. 18787. Relating to the limitation of the hours of daily service of laborers and mechanics employed upon a public work of the United States and of the District of Columbia and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28775, the sundry civil appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28775, the sundry civil appropriation bill, with Mr. HAY in the chair.

The CHAIRMAN. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

IMMIGRATION SERVICE.

Expenses of regulating immigration: For all expenses of the enforcement of the laws regulating the immigration of aliens into the United States, including the contract-labor laws; for the costs of the reports of decisions of the Federal courts, and digests thereof, for the use of the Commissioner General of Immigration; for salaries and expenses of all officers, clerks, and employees appointed to enforce said laws; for the enforcement of the provisions of the act of February 20, 1907, entitled "An act to regulate the immigration of aliens into the United States" and acts amendatory thereof; for expenses of necessary supplies, including exchange of typewriting machines, alterations, and repairs, and for all other expenses authorized by said act; also for preventing the unlawful entry of Chinese into the United States, by the appointment of suitable officers to enforce the laws in relation thereto, and the expenses of returning to China all Chinese persons found to be unlawfully in the United States, including the cost of imprisonment and actual expense of conveyance of Chinese persons to the frontier or seaboard for deportation, and for the refunding of head tax upon presentation of evidence showing conclusively that collection was made through error of Government officers; all to be expended under the direction of the Secretary of Commerce and Labor, $2,550,000: *Provided*, That from and after July 1, 1913, all Chinese persons ordered deported under judicial writs shall be delivered by the marshal of the district or his deputy into the custody of any officer designated for that purpose by the Secretary of Commerce and Labor, for conveyance to the frontier or seaboard for deportation in the same manner as aliens deported under the immigration laws.

Mr. MANN. Mr. Chairman, I reserve a point of order. What change from the existing law does this make in reference to the deportation of Chinese?

Mr. FITZGERALD. Under existing law, when a Chinaman is ordered deported he is turned over to a marshal and conducted by the marshal or one of his deputies to the border or to the ship on which he is to be deported. All other aliens who are deported are in the custody and under the control of the Department of Commerce and Labor, and the officials of that department state that if the Chinamen who are to be deported are also placed under their control they frequently will be able to send them in custody of the same marshal who is taking other persons and would have control over the expense of the administration.

Mr. MANN. Well, do the courts order the Chinese deported?

Mr. FITZGERALD. Well, there must be a proceeding to deport a Chinaman.

Mr. MANN. Well, I was under the impression the only thing the courts had to determine was the question of habeas corpus as to their right to remain in the country.

Mr. FITZGERALD. No; I understand after they apprehend a Chinaman that then there is a proceeding that is necessary to obtain an order of deportation, but I am not familiar with it at the moment.

Mr. MANN. That would be a very strange thing if it were true. I may be wrong, but I was under the impression that when we apprehended a Chinaman for the purpose of deportation sometimes he sues out a writ of habeas corpus on the ground that he has a right to be here.

Mr. FITZGERALD. No; when a Chinaman is apprehended, in order to prove that he is not legally in this country it has to be established in a legal proceeding. I am not quite familiar with it now; I was some time in the past. Here is the statement——

Mr. MANN. In the absence of those gentlemen who are special guardians of the deportation of Chinamen I will not insist upon the point or order, and I withdraw it.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. ALLEN having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17260) to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910.

The message also announced that the Senate had agreed to the reports of the committees of conference on the disagreeing votes of the House of Representatives to bills of the following titles:

S. 5674. An act for the relief of Indians occupying railroad lands; and

S. 3947. An act to provide for a bridge across Snake River, in Jackson Hole, Wyo.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 3957. An act for the relief of Isaac Thompson;

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River in the State of West Virginia; and

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes.

The message also announced that the Senate had passed with amendments bills and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 28607. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914;

H. R. 22526. An act to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes, approved June 30, 1906; and

H. J. Res. 365. Joint resolution to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador;

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 7802. An act to amend section 103 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

S. 8233. An act authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912;

S. 8429. An act to create a board of local inspectors, Steamboat-Inspection Service, for the port of Los Angeles, Cal.; and

S. J. Res. 162. Joint resolution to exempt the National Academy of Sciences from the payment of duty on medals imported for presentation by it in recognition of research work.

SUNDRY CIVIL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

To pay to Barbara Kauffels for information that led to the collection of $3,000 in penalties from the Bloomsburg Silk Mills, of Lock Haven, Pa., for importing aliens under contract, in violation of the immigration laws, $1,000.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. FITZGERALD. Mr. Chairman, I desire to state that this woman furnished information against the company mentioned in this provision, the Bloomsburg Silk Mills, of Lock Haven, Pa., and certain actions were instituted as a result of which they finally compromised by the payment, if I recall it correctly, of some $3,000. It is customary in those cases to pay a reward not exceeding a certain amount—I forget the exact limit. This was the wife of one of the employees. Representatives of the department said the methods resorted to by this company were the most ingenious that had been devised for the purpose of violating the alien contract-labor law, and if it had not been for the information furnished by this woman they could not have succeeded.

Mr. MANN. Well, I think it properly belongs to the Committee on Claims, does it not?

Mr. FITZGERALD. These items are always carried in the sundry civil bill.

Mr. MANN. Not always, but occasionally.

Mr. FITZGERALD. There were some last year.

Mr. MANN. I remember. I doubt whether it is a very good policy to carry this item in the sundry civil bill.

Mr. FITZGERALD. This estimate is submitted under the act of October 11, 1888, which allows payment to the informer of not exceeding 50 per cent of the amount recovered.

Mr. MANN. Who has that authority?

Mr. FITZGERALD. The Department of Commerce and Labor.

Mr. MANN. And they have no funds out of which to make the payment; is that the point?

Mr. FITZGERALD. No; as each case arises they submit an estimate for the amount they believe should be paid within the provision of law by appropriation by Congress. There is no fund provided in advance.

Mr. MANN. Well, I will withdraw the point of order.

The Clerk read as follows:

DEPARTMENT OF STATE.

For expenses of the Fourth International Congress on School Hygiene to be held in Buffalo, N. Y., August 25–30, 1913, $30,000.

Mr. MANN. Mr. Chairman, I reserve a point of order on that. I dislike to embarrass the distinguished gentleman from New York [Mr. FITZGERALD]. On August 19 there was approved a joint resolution providing:

That the President of the United States is hereby requested to direct the Secretary of State to issue invitations to foreign Governments to participate in the Fourth International Congress on School Hygiene to be held in Buffalo, N. Y., on August 25–30, 1913: *Provided*, That no appropriation shall be granted at any time hereafter in connection with said congress.

This item was for the purpose of granting an appropriation of $30,000 in connection with that congress. When that joint resolution came up before the House last August it came up on the Unanimous Consent Calendar. My colleague from Illinois [Mr. FOSTER] and myself each reserved the right to object, and in the course of the consideration of the bill, pending the right to object, this debate took place:

Mr. DANIEL A. DRISCOLL. I would like to state the citizens of Buffalo, by public subscription, will care for the people invited to this congress.

The gentleman from New York [Mr. DANIEL A. DRISCOLL] had charge of the resolution. I made this remark:

Well, I should doubt that. I do not doubt the gentleman believes it and the citizens state it, but I have heard that statement a great many times.

And some more remarks along the same line. Whereupon the gentleman from New York stated:

I would like to ask the gentleman from Illinois, providing this amendment was passed, would he object, provided that no appropriation shall be granted at any time hereafter in connection with said congress?

Mr. MANN. Well, I will say to the gentleman frankly, I am not in favor of inviting foreign Governments to an international exposition or meeting of any kind without our Government can be represented.

Mr. DANIEL A. DRISCOLL. Would the gentleman be opposed to a proposition to care for our representatives?

Mr. MANN. Well, probably not; but I do not desire to put myself on record on that.

And so forth.

Mr. MANN. I will have to object, unless the gentleman asks that it go over, so as to permit them to properly prepare the resolution.

The matter passed over temporarily and in a few minutes thereafter was called up again by the gentleman from New York [Mr. DANIEL A. DRISCOLL], and he offered an amendment:

Provided, That no appropriation shall be granted at any time hereafter in connection with said congress.

The resolution was not objected to, but was agreed to and became a law.

Now, can we have no faith in statements made by gentlemen on the floor? There are two gentlemen from New York from the city of Buffalo; one of them presents a resolution concerning this hygiene congress, who states that no appropriation shall be asked for hereafter and that the citizens will pay the expenses, and that goes into the law. I assume now that the other gentleman from Buffalo [Mr. SMITH] will state that he is not bound by that; that hence the appropriation ought to be granted. I think when a gentleman comes on the floor of the House with a resolution and states that no appropriation will be asked for and, to show his good faith, offers an amendment, which is incorporated into the law, providing that no appropriation will be asked for, that good faith demands that other gentlemen interested in the proposition shall speak then or forever thereafter hold their peace.

Mr. RODDENBERY. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. RODDENBERY. Has the gentleman from Illinois [Mr. MANN] reserved a point of order on this paragraph?

Mr. MANN. I have.

Mr. RODDENBERY. That is the item of $30,000?

Mr. MANN. It is.

Mr. RODDENBERY. May I inquire of the gentleman, not having heard him fully, is it not his position that the item is not authorized by law?

Mr. MANN. It is not only not authorized by law, but it is forbidden by law.

Mr. RODDENBERY. That is my understanding of it.

Mr. FITZGERALD. Mr. Chairman, whatever assurance or statements may have been made by the gentlemen in the House, however binding they may have been upon themselves, they could not bind persons outside of the House. So on the 22d of January of this year the President of the United States sent to the Congress this message:

To the Senate and House of Representatives:

On the 19th of August last Congress passed the following resolution: *"Resolved, etc.*, That the President of the United States is hereby requested to direct the Secretary of State to issue invitations to foreign governments to participate in the Fourth International Congress on School Hygiene, to be held in Buffalo, N. Y., August 25 to 30, 1913: *Provided*, That no appropriation shall be granted at any time hereafter in connction with said congress."

At the time the resolution was passed there were three gentlemen in Buffalo whose means and whose interest in the congress were such that the people of Buffalo had every reason to believe that the expense of the congress would be contributed by these, their citizens. Since that time the three citizens have died, and there is no written obligation on the part of their estates to meet the necessary expenses.

I recommend the appropriation of $30,000 (to which the citizens of Buffalo will have to add a substantial sum) as a contribution of the Government to the fund necessary to make the reception of the congress accord with what we regard as American hospitality.

Personally, I am very much opposed to any invitation of this sort at the instance of the Government in which the Government does not assume all the expenses of entertainment. Other countries much less able than the United States never extend an invitation of this sort without having proper preparation for the reception of the guests of the nation.

In the peculiar circumstances of the present resolution, I urgently recommend the appropriation of the sum mentioned to enable the obligation of the invitation to be properly met. The proviso in the resolution was an unfortunate one, in my judgment, but whether it was so or not, under the circumstances it offers no reason for Congress not to take the proper course.

WM. H. TAFT.

THE WHITE HOUSE, *January 22, 1913.*

It is quite apparent that the gentleman who made these assurances could not control or prevent the three distinguished residents of Buffalo from coming to an untimely end before they had an opportunity to contribute the $50,000, which assurances had been made they would contribute; and in view of this appeal of the President for an appropriation to meet a portion of the expense, so that the representatives of foreign nations would not be neglected, the committee believed it to be but proper to submit the matter to the House, so that it could take such action as, under all the circumstances, would be proper.

I recall the incident connected with the passage of the resolution. At that time I was not aware that three citizens of Buffalo had agreed to contribute the necessary funds to meet these expenses. Perhaps it would have been more thoughtful and safer to have secured some written obligation——

Mr. MANN. How could a written obligation be any stronger than an act of Congress?

Mr. FITZGERALD. I mean a written obligation from the gentlemen who offered to contribute the $50,000. In the ab-

sence of anything but their statement that they would contribute the money, they having passed away and no volunteers having come forward, the matter is placed in an embarrassing situation.

Mr. HAMILTON of Michigan. Mr. Chairman, may I ask the gentleman what the population of the city of Buffalo is?

Mr. FITZGERALD. It is about 440,000.

Mr. HAMILTON of Michigan. Does it not impress the gentleman with a sense of profound regret that there are no survivors of those three public-spirited men who are willing to contribute to this Hygienic Congress?

Mr. FITZGERALD. The President stated that it will be necessary for them to contribute a very large sum.

Mr. MANN. Mr. Chairman, when this resolution was reported to this House, after being introduced by the gentleman from New York [Mr. DANIEL A. DRISCOLL] and going to the Committee on Foreign Affairs, presided over by another distinguished citizen of New York, now the chief magistrate of that State, the report was made without any information in it at all. The only thing in the report submitted by the Committee on Foreign Affairs to the House was the statement that the committee reported the passage of the joint resolution. When the resolution was before the House this statement was made by the now governor of New York, then the chairman of the Committee on Foreign Affairs:

> Mr. Chairman, this bill was introduced by the gentleman from New York [Mr. DANIEL A. DRISCOLL] and reported without addition from the Committee on Foreign Affairs. It carries no appropriation. Mr. DRISCOLL informed the committee that no appropriation would be necessary, and that no appropriation will be asked for, either now or in the future; and on that representation the committee reported the bill.

Now the excuse is given——

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield?

Mr. MANN (continuing). That three gentlemen died in Buffalo within the last year.

Mr. MADDEN. Only three? [Laughter.]

Mr. MANN. I apprehend that there is no city in the United States of 440,000 inhabitants where it will not be opportune to say at the end of six months, "Three of our citizens have died." [Laughter.] Does it happen that the only three citizens of public spirit which Buffalo had last August have passed away, and that their mantle has fallen upon no one else in the town? If that is the case, the joint resolution had better be repealed and the invitation withdrawn.

Mr. SISSON. Mr. Chairman, I recollect distinctly when this matter was up on the resolution to authorize the invitation that there were a number of objections to it, and the gentleman from New York [Mr. DANIEL A. DRISCOLL] came to a number of us who were objecting to it and arranged this clause in his resolution, providing that no appropriation would be asked for at any time. There was some little difference of opinion even then as to whether it ought to be permitted to go through by unanimous consent, but with the repeated assurances of the two gentlemen from New York, Mr. Sulzer and Mr. DANIEL A. DRISCOLL, not only that no appropriation would ever be asked and that the money was in hand, but also that the people of Buffalo were simply asking the invitation to be given in order that they might have this meeting in their city, the objections were not pressed.

Now, the trouble with all these matters is that after they get through, and after the invitation is extended, they always come back to Congress and ask Congress to take care of them.

Now an effort may be made to have this matter put on in the Senate, in spite of the law which specifically provides that no money shall be paid out of the Treasury for the purpose of paying the expenses of this conference.

Mr. KENDALL. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Certainly.

Mr. KENDALL. I call the attention of the gentleman to the fact that his committee has recommended this appropriation.

Mr. SISSON. Yes; but I happen to be one member who was opposed to it, and I served notice in the committee that this could not go through with my permission.

Mr. KENDALL. I simply do not want the gentleman to inculpate the Senate, when his own committee is equally guilty.

Mr. SISSON. I am not endeavoring to inculpate the Senate, except that I say without hesitation that if this bill comes back from the Senate with this item in it I trust that the House will see to it that the bill does not pass with the item in it.

Mr. BARTLETT. The gentleman says he was one of the committee who was opposed to this item. The gentleman knows that there were others upon the committee who were opposed to it.

Mr. SISSON. And among them was the gentleman from Georgia [Mr. BARTLETT] and the gentleman from Tennessee [Mr. BYRNS]. I do not recall who the others were.

Mr. CANNON. Mr. Chairman, I was one of the subcommittee that helped to prepare this bill, and I favored the insertion of this item of appropriation. I supposed when I came into the Chamber that this item was being discussed on its merits. I now understand that my colleague, the gentleman from Illinois [Mr. MANN], reserved a point of order. Upon the point of order I desire to say that legislation has been had that authorized the President to issue invitations, which have been accepted, and people are coming from foreign countries. I am inclined to think, upon the merits, that this is a good convention and is justified from the standpoint of medical science and the public health.

I say I voted to report this item. I never have placed any faith in pledges made touching expositions or the holding of meetings like unto this, where Congress authorizes the President to invite and where foreign representatives accept. On the merits I believe it is a worthy object. Now, on the alleged death of three men there has been failure. This meeting is to be held; the people are to come, and I think it is the duty of this great body never to invite the world to come as our guests for any object unless we understand that Uncle Sam is to pay a proper bill.

Take the case of the Buffalo Exposition. The assassination of President McKinley resulted in a decreased attendance and they ran up against failing propositions. All kinds of pledges had been made that Congress would not be called upon to appropriate anything; yet we paid private contractors; and I am not sure but we ought to have done so, because they made their contracts in good faith, and were to lose, in round numbers, $400,000, as I recollect it. They were scattered over the country—some in Chicago, some in St. Louis, and so on.

Years and years ago the New Orleans Exposition was a complete failure; yet it was a very considerable exposition, and we hardly ever got through paying those bills. And so it runs.

Mr. MADDEN. What about Jamestown?

Mr. CANNON. So far as my vote is concerned, if I get the opportunity, I am going to vote for this $30,000 item, with the hope that in the future this great body will not authorize anything that covers an invitation to the world to come here unless it understands that we are in honor bound, for the public welfare and the public honor, to make a proper appropriation.

Mr. HUMPHREYS of Mississippi. What is this $30,000 to be expended for?

Mr. CANNON. For the expenses of this meeting and, I take it, as incidental thereto, to do as the United States always has done and as foreign countries always have done, provide a place, with all the miscellaneous expenses that are necessary. They can not be very large, because they are inside of $30,000.

Mr. SMITH of New York. Mr. Chairman, this is to be the fourth session of the International Congress of School Hygiene. Three other sessions have been held. One of these was conducted in London, one in Paris, and another in Berlin. In each case the Government of the country in which the congress convened paid the expenses of the convention. When we come here asking for an appropriation for the congress in Buffalo we are doing precisely what was done in the countries of Europe, which, as the President aptly says, are far less able to bear this character of expense than we are. [Applause.] The gentleman from Illinois [Mr. MANN] has referred to the fact that Buffalo is not taking care of this situation. Buffalo has already raised approximately $40,000 by public subscription to assist in defraying the expenses of this convention. It has also arranged to bond itself for $30,000 to assist in paying the cost of receiving distinguished visitors from other nations. In addition to all this, I wish to call the attention of Members to the fact that this is not a local matter, it is an international congress.

Mr. GARNER. Will the gentleman yield?

Mr. SMITH of New York. I yield.

Mr. GARNER. This being an international congress in its nature, why is it that the Committee on Foreign Affairs did not have jurisdiction of this rather than the Committee on Appropriations?

Mr. SMITH of New York. The original bill was sent to the Committee on Foreign Affairs.

Mr. KENDALL. Did not the original resolution, as considered by the Committee on Foreign Affairs, provide that the Government was not to be obligated for any expense?

Mr. SMITH of New York. The Committee on Foreign Affairs did not put that provision in the resolution.

Mr. KENDALL. Was not that resolution reported favorably on the assurance of the gentleman from New York [Mr. DANIEL A. DRISCOLL] that no expenditure would be requested of the Government?

Mr. SMITH of New York. Mr. Chairman, I would like to continue my statement. When the resolution came into the House

my colleague from Buffalo [Mr. DANIEL A. DRISCOLL] agreed in good faith to put in the provision suggested by the gentleman from Illinois [Mr. MANN]. At that time Mr. Adam, a former mayor of Buffalo, a man worth millions of dollars, a man who has done much for the city and whose reputation for philanthropy will never die, agreed to pay the expenses of conducting this congress in the public interest. We could not tell at that time that Mr. Adam was soon to die, but he did die suddenly. Mr. T. Guilford Smith, regent of the University of the State of New York, agreed with Mr. Adam to assist in paying the expenses of this congress. But he also died, and Mr. Pardee, the third member of the committee, was also called by death.

We are raising in the city $70,000 for this Congress, which is national and international in character. We feel that the Government of the United States, which is spending millions of dollars in every direction for the protection and preservation of the public health, can well afford to spend this insignificant sum of $30,000 in order to get the benefit of the experiments and research in school hygiene from the leading scientists of the civilized world.

Mr. FITZGERALD. Mr. Chairman, I ask for the regular order. Does the gentleman from Illinois intend to make his point of order?

Mr. MANN. The gentleman from New York demands the regular order, without any further effort to change my mind, and I will therefore make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. RODDENBERY. Mr. Chairman, I offer the following amendment as a new paragraph.

The Clerk read as follows:

After line 14, page 159, insert:

"Department of State: For expenses of the Fourth International Congress on School Hygiene to be held in Buffalo, N. Y., August 25–30, 1913, $30,000. Provided it is expressly understood that this shall not be construed as pork, but pot liquor."

Mr. MANN. I make a point of order to that.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

PUBLIC PRINTING AND BINDING.

Office of the Public Printer: Public Printer, $5,500; purchasing agent, $3,600; chief clerk, $2,500; accountant, $2,500; assistant purchasing agent, $2,500; cashier and paymaster, $2,500; clerk in charge of the CONGRESSIONAL RECORD at the Capitol, $2,500; assistant accountant, $2,250; chief timekeeper, $2,000; paying teller, $2,000; telegrapher and clerk, $1,800; clerks—2, at $2,000 each; 9 of class 4, 11 of class 3, 6 of class 2, 6 of class 1; 9, at $1,000 each; 5, at $900 each; 16, at $840 each; paymaster's guard, $1,000; chief doorkeeper, $1,200; doorkeeper, $1,200; 6 assistant doorkeepers, at $1,000 each; messengers, 2, at $840 each; chief delivery man, $1,200; 5 delivery men, at $950 each; telephone switchboard operator, $720; 3 assistant telephone switchboard operators, at $600 each; 6 messenger boys, at $420 each; in all, $132,060.

Mr. WILLIS. Mr. Chairman, I offer the following amendment.

Mr. FOWLER. Mr. Chairman, I make a point of order against the paragraph. By the act of January 12, 1895, the office of Public Printer was created, with a fixed salary at $4,500. This bill carries an appropriation for the salary of Public Printer at $5,500. I make the point of order against "Public Printer, $5,500."

The CHAIRMAN. The point of order is sustained.

Mr. FITZGERALD. Mr. Chairman, I move to insert, in place of the language stricken out, "Public Printer, $4,500."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Ohio.

The Clerk read as follows:

Page 161, line 23, after the word "two," strike out the word "six" and insert the word "eight."

Mr. WILLIS. Mr. Chairman, this amendment proposes to change the number of clerks provided for in line 23, in class 1, from six to eight. I call attention to the fact that this is in accordance with the estimates and also in accordance with the recommendation of the Public Printer as set forth in the hearings, page 1073. In the Book of Estimates on this item the following statement is made in a note:

Increase of two clerks submitted. An increase of two clerks of class 2 is recommended. The allowance of the proposed number of clerks of class 3, with this increase of clerks of class 1, will provide for the promotion of four clerks at $1,000 per annum to $1,200 per annum. Two of these clerks are expert stenographers and perform work of a very high class. The other two are performing work of a high grade that is intricate and difficult and requires the special training acquired during service in the Government Printing Office.

The same statements, in effect, are made by the Public Printer in his statement before the committee, to which I have already referred, and which will be found in the hearings at page 1073. The substance of it is simply this: Here is a class of clerks doing a high grade of service. Some of them, as I know personally, have done this work for 10 or 12 years without the slightest increase in salary. The Public Printer is of opinion that it is not a matter that simply concerns these clerks, but it is a matter that concerns the benefit of the public service, that these men who have been doing this high grade of work in the most efficient manner possible should be given a reasonable and slight increase in salary, and therefore he recommends in the hearings the exact increase that I am suggesting in this amendment. I hope, Mr. Chairman, that the amendment will be accepted by the committee and agreed to, because it is fair and just, in the interest of efficiency and real economy in the public service, and meets with the approval of those who are charged with the management of this great Government bureau.

Mr. FITZGERALD. Mr. Chairman, two or three years ago the force in the Printing Office was rearranged and readjusted, and compensation fixed. From time to time applications have been made for the increase of compensation of certain employees there. The committee looks into the circumstances in the various cases, and does the best it can. This proposition is merely to increase the salaries of two persons. If the committee were to increase the compensation of every individual in the Government service in whom the various Members of Congress happen to be interested, there would be quite a large list of increases, and these increases, instead of being made upon some orderly basis, would be quite haphazard. I hope the application of the gentleman to have the salaries of these two particular persons increased will not be granted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio.

The question was taken, and the amendment was rejected.

Mr. RODDENBERY. Mr. Chairman, I move to strike out the last word. I desire to ask the gentleman from New York a question. On page 161, line 22, we find provision for two clerks at $2,000 each. What did the bill of last year carry; that is, the current law?

Mr. FITZGERALD. The current law carries one at $2,000.

Mr. RODDENBERY. Why is the increase made to two at this time?

Mr. FITZGERALD. Because it was believed that it was a particularly meritorious case.

Mr. RODDENBERY. How meritorious? Was it that some particular man was to have the job?

Mr. FITZGERALD. Length of service of a particular individual, and the character of service performed by him. The man has been 18 years in the service.

Mr. RODDENBERY. Where does he appear in the bill for the current year?

Mr. FITZGERALD. He was a clerk of class 4, and received a salary of $1,800 a year.

Mr. RODDENBERY. And now he is transferred to one of two, at $2,000 each?

Mr. FITZGERALD. One of these men at present is a clerk in class 4. Clerks of class 4 under the law receive compensation of $1,800 a year.

Mr. RODDENBERY. Mr. Chairman, it occurs to me that it may be necessary from time to time to make proper increases for the efficiency of the service, but I doubt—and I merely desire to make the observation—the propriety of fixing a rule that is evidenced frequently here, that these increases are made and new classifications created just to fit particular individuals who either themselves or in conjunction with their immediate Congressmen become active to get a raise of salary.

Mr. FITZGERALD. Mr. Chairman, I can furnish the gentleman with the information, if he wishes. This bill, if the increase had not been made, would have read in this way in line 22: Instead of 2 clerks, at $2,000 each, and 9 of class 4, it would have read 1 at $2,000 and 10 of class 4.

Mr. RODDENBERY. So, in effect, it is a transfer.

Mr. FITZGERALD. It is a transfer of a clerk from class 4, which is an $1,800 position, to a position at $2,000.

Mr. RODDENBERY. And this is simply a $200 increase?

Mr. FITZGERALD. Yes.

Mr. RODDENBERY. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

Office of the Deputy Public Printer: Deputy Public Printer, $4,500; clerks—two of class 1, one $900; chemist, $1,600; messenger, $840; in all, $10,240.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph. The paragraph provides for a Deputy Public Printer at a salary of $4,500. Section 44 of the printing act of January 12, 1895, provides for a chief clerk with a salary of $2,400 per annum. Section 36 of the same act provides that in the case of the death, resignation, absence, or sickness of the Public Printer the Chief Clerk of the Government Printing Office

shall perform his duties until the disability is removed. The first authority for the position of Deputy Public Printer was contained in the legislative, executive, and judicial appropriation act, approved February 26, 1907, Thirty-fourth Statutes at Large, page 943, where the following item appears:

Deputy Public Printer, $3,600.

After the paragraph containing this item there followed a provision that the office of Deputy Public Printer should be filled by the selection and appointment by the Public Printer of a suitable person, who should perform the duties theretofore required of the chief clerk, have supervision of the buildings occupied by the Government Printing Office, and perform such other duties as might be required of him by the Public Printer.

Prior to the passage of this act the chief clerk of the Government Printing Office received a salary of $2,750, and the estimate on which the appropriation for Deputy Public Printer, at $3,600 per annum, was based contained a statement that the $850 increase was for supervision of buildings, and so forth.

Mr. Chairman, it has been repeatedly held that where a statutory position has been created, with a salary fixed, it is improper to carry an appropriation in an appropriation bill for another officer or create another position for the purpose of discharging the same duties as the office created by the statute. This law having established the office of chief clerk, and fixed the salary thereof, it is not in order under an appropriation to provide for an unauthorized office and fix a salary in lieu thereof. Mr. Chairman, this same question came up in the House upon the sundry civil bill in a former Congress, and is recorded in volume 4 of Hinds' Precedents, section 3680, in which it was then decided:

The law having established an office and fixed the salary, it is not in order on an appropriation bill to provide for an unauthorized office and salary in lieu of it.

If the chief clerk of the Government Printing Office can legally perform any one of the statutory duties provided in the organic printing act for that office, he must, under the law, perform all the duties attaching to that office; and if the revival of the title of chief clerk as provided for in the sundry civil bill approved March 4, 1911, does not revive the statutory office of chief clerk, then a point of order will lie against that position.

I will be very glad, Mr. Chairman, to furnish the Chair with my brief of authorities upon this question, and I ask permission to insert the same in the RECORD.

The CHAIRMAN (Mr. FOSTER). Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none, and it is so ordered.

Mr. FOWLER. Mr. Chairman, I submit the following brief of authorities in support of my contention:

"On lines 8 and 9, page 162, of the sundry civil bill a point of order will lie against the provision for Deputy Public Printer, since the position is not statutory but is only authorized by the current appropriation bill.

"Section 44 of the printing act of January 12, 1895, provides for a chief clerk, with a salary of $2,400 per annum. Section 36 of the same act provides that in the case of the death, resignation, absence, or sickness of the Public Printer the chief clerk of the Government Printing Office shall perform his duties until the disability is removed.

"The first authority for the position of Deputy Public Printer was contained in the legislative, executive, and judicial appropriation act approved February 26, 1907 (34 Stats. L., 943), where the following item appeared: 'Deputy Public Printer, $3,600.' After the paragraph containing this item there followed a provision that the office of Deputy Public Printer should be filled by the selection and appointment by the Public Printer of a suitable person, who should perform the duties theretofore required of the chief clerk, have supervision of the buildings occupied by the Government Printing Office and perform such other duties as might be required of him by the Public Printer. Prior to the passage of this act the chief clerk of the Government Printing Office received a salary of $2,750, and the estimates on which the appropriation for Deputy Public Printer, at $3,600 per annum was based contained a statement that the $850 increase was for supervision of buildings.

"The act making appropriation for the legislative, executive, and judicial expenses of the Government for the year ended June 30, 1909, carried an appropriation of $3,600 for the Deputy Public Printer and repeated the provision with respect to the appointment, qualifications, and duties of the Deputy Public Printer. Up to this time a number of the positions in the Government Printing Office, the salaries of which were specifically appropriated for, were carried in the legislative bill, but the sundry civil bill for the fiscal year ended June 30, 1910, approved March 4, 1909, carries all appropriations for the Government Printing Office, and in this bill the salary of the Deputy Public Printer was increased to $4,500. In the hearings before the House Subcommittee on Appropriations for the last two years there appears the statement by the Public Printer that the secretary was performing the duties of the chief clerk, and the sundry civil bill approved March 4, 1911, provides for a chief clerk for the Government Printing Office; and in discussing the provision for a chief clerk on the floor of the House, the chairman of the committee, Mr. Tawney, in explaining why the title of private secretary was to be changed to chief clerk, said:

"We intend to give him something to do by making him chief clerk, instead of private secretary to the head of the organization. * * * The committee thought and the Public Printer recommended that it had better be changed, so that he might be assigned to duty as chief clerk instead of serving as secretary. (Cong. Rec., Feb. 25, 1911, p. 3594.)

"It follows, therefore, that the person holding the position of chief clerk of the Government Printing Office, which is statutory, should perform the duties of that office, but no change was made in the compensation of the Deputy Public Printer because of the taking from his office of all duties formerly performed by the chief clerk; and as the supervision of the Government Printing Office buildings is now exercised by a competent superintendent of buildings, it follows, as a logical conclusion, that the excuse for the continuance of the office of Deputy Public Printer no longer exists, as there are no duties for him to perform, and the position should therefore be abolished and the appropriation for public printing and binding relieved of $4,500 of the much-talked-of overhead charge. The provision for Deputy Public Printer clearly violates paragraph 2 of House Rule XXI and paragraph 3 of Senate Rule XVI. There are numerous precedents for sustaining a point of order against such a provision as this.

"The mere appropriation for a salary does not thereby create an office so as to justify appropriations in succeeding years. (Secs. 3590 and 3670, vol. 4, Hinds' Precedents.)

"Those upholding an item in an appropriation bill should have the burden of showing the law authorizing it. (Sec. 3697, vol. 4, Hinds' Precedents.)

"On January 19, 1905, the Army appropriation bill was under discussion in the Committee of the Whole House. When the provision that 'no steamship in the transport service of the United States shall be sold or disposed of without the consent of Congress having been first had and obtained' was reached, a point of order was made that the provision involved legislation. Mr. Hull, of Iowa, stated that the provision had been carried in the Army bill for three years, but that he would not claim that it was statute law in the sense that it would continue in force if dropped from the present bill, as the word 'hereafter' was not in the phraseology. The point of order was sustained, and, when the decision of the Chair was appealed from, the House sustained the Chair. (Vol. 4, sec. 3822, Hinds' Precedents.)

"On March 23, 1904, while the Post Office appropriation bill was under consideration in the Committee of the Whole House, a point of order was made against the proposed amendment limiting the compensation to be paid per mile for carrying the mail. The Chair said:

"The Chair thinks that the proviso applies only to this bill, and if this same language was in the last bill it applied only to that bill. If the word 'hereafter' had been used, the Chair would be inclined to think that that language, being included in the last bill, would make it statute law, but the present proviso applies only to this bill. (Vol. 4, sec. 3829, Hinds' Precedents.)

"Neither the word 'hereafter' nor any other phraseology indicating the intent of Congress that the provision for Deputy Public Printer should be permanent appeared in the bills appropriating for that office, or anywhere else. During the three years when no appropriation was made for the position of chief clerk that office was not abolished but merely in suspense. A mere omission on the part of Congress to appropriate money does not necessarily repeal distinct law authorizing a certain thing to be done, especially in the absence of a repealing provision. (Vol. 4, sec. 3595, Hinds' Precedents.) The omission to appropriate during a series of years for an object authorized by law does not repeal that law, and, consequently, an appropriation when proposed is not subject to a point of order. (Vol. 4, sec. 3595, Hinds' Precedents.) It can not be taken as the intent of Congress in providing temporarily for a Deputy Public Printer that the statutory office of chief clerk should thereby be abolished.

"The law having established an office and fixed the salary, it is not in order on an appropriation bill to provide for an unauthorized office and salary in lieu of it. (Vol. 4, sec. 3680, Hinds' Precedents.) If the chief clerk of the Government Printing Office can legally perform any one of the statutory duties provided in the organic printing act for that office, he must, under the law, perform all the duties attaching to that office;

and if the revival of the title of chief clerk, as provided for in the sundry civil bill approved March 4, 1911, does not revive the statutory office of chief clerk, then a point of order will lie against that position."

Mr. FITZGERALD. What is the gentleman's contention?

Mr. FOWLER. Mr. Chairman, my contention is that there is no authority for the office of Deputy Public Printer; that when he was first provided for in the appropriation bill it conferred upon the Public Printer the authority to select such a man and that he should discharge the duties of chief clerk theretofore provided for by the Revised Statutes, and my contention is, Mr. Chairman, that the Appropriation Committee can not attach on an appropriation bill a provision creating a new office with a new salary to take the place of a statutory office, and that is what this bill seeks to do.

Mr. FITZGERALD. Mr. Chairman, the act of February 26, 1907, which was the legislative appropriation act, provides as follows:

The office of Deputy Public Printer shall be filled by the selection and appointment by the Public Printer of a person skilled as a practical printer and versed in the art of bookbinding, and who shall perform the duties heretofore required of the chief clerk, have supervision of the buildings occupied by the Government Printing Office, and perform such other duties as may be required of him by the Public Printer.

That provision unquestionably provides for the appointment of a Deputy Public Printer. The amount of his compensation is not fixed in that act or in any other act, and under the decisions where a compensation is not fixed the amount provided in the current law is the sum to be considered in disposing of points of order. The compensation here is the same as in the current law, and I submit the gentleman's point of order is not well taken.

Mr. FOWLER. I desire, Mr. Chairman, to ask the gentleman if it is not a fact that this act of 1907 was nothing more or less than a current act?

Mr. FITZGERALD. Oh, it was only an ordinary statute enacted by Congress to provide the means of carrying on the Government. The gentleman may not think that is a law, but it is and just as effective as if it were enacting legislation without appropriations in it.

Mr. FOWLER. And I further desire to inquire if it is not a fact that it provided that the Deputy Public Printer should perform the duties of chief clerk?

Mr. FITZGERALD. Yes; but since that time the work of the Government Printing Office has been so great that a chief clerk is provided under the office of Public Printer at $2,500 a year by law.

The CHAIRMAN. May the Chair inquire of the gentleman from New York [Mr. FITZGERALD] if it is his contention that it was the legislative bill of 1907 which created the office of Deputy Public Printer?

Mr. FITZGERALD. Unquestionably.

The CHAIRMAN. Will the gentleman from New York kindly send that to the Chair?

Mr. FITZGERALD. I will.

The CHAIRMAN. The Chair is of the opinion that this provision in the act of 1907 conveys the intention of Congress to create the office of Deputy Public Printer, and in this provision there is no salary fixed for the office. In the judgment of the Chair it is within the province of the Appropriations Committee to appropriate what in its judgment is necessary, and for it to become a law by the approval of Congress.

Therefore, the Chair overrules the point of order.

Mr. FOWLER. Mr. Chairman, may I suggest to the Chair that it has been repeatedly held that where an office has been created by permanent law and the salary fixed therefor, that an appropriation committee can not create another office to perform the duties of that office in derogation of the law?

The CHAIRMAN. The Appropriations Committee at the time might have exceeded its authority in doing that, but nobody having raised the point of order, and it having been done, the Chair is of the opinion that Congress did that and had a perfect right to do it.

Mr. FOWLER. It has been held repeatedly, Mr. Chairman, by this House, that where an appropriation for a position not authorized by permanent law has been carried in a bill successively that an appropriation for that office does not necessarily create an office, and a point of order at some subsequent time may be made against it, and may be, and ought to be, sustained.

The CHAIRMAN. The Chair is of the opinion that it was the intention of Congress at this time to create the office of Deputy Public Printer. It did not fix the salary, and the Appropriations Committee is acting within its power when it fixes the salary of that office. And then it is for Congress to determine whether that salary shall be allowed or not. So the Chair thinks this is entirely within the rules and is not subject to the point of order.

The Clerk read as follows:

For printing and binding for Congress, including the proceedings and debates, $1,750,000. And printing and binding for Congress chargeable to this appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress, within the fiscal year for which this appropriation is made.

Mr. FOWLER. Mr. Chairman, I move to strike out the paragraph. Mr. Chairman, I desire to ask the chairman of the committee how much of this sum—$1,750,000—is devoted to the binding of various books and pamphlets in cloth, morocco, and half morocco, and any other binding Members of Congress may see fit to select? Mr. Chairman, I understand that this provision is intended to give an opportunity to Members of Congress to take any public document, whatever it may be, to the Public Printer and have it bound in whatever character of binding he may elect.

Mr. FITZGERALD. The law provides that each Member of Congress may have bound one copy of any document issued during the session of Congress.

Mr. FOWLER. I understand, Mr. Chairman, that that is true; that there is a law making such provision. I desire, further, to ask the gentleman if that law was not passed only a few years ago in order to correct, or in an attempt to correct, the abuse of the privilege given Members of Congress?

Mr. FITZGERALD. It was passed in 1895. That was 18 years ago. It was passed before I came to Congress, because it has been the law ever since I have been here.

Mr. FOWLER. Now, Mr. Chairman, I am not disposed to be against an appropriation for any matter that is necessary, but I verily believe that there are many books and documents of various kinds which have been bound at an exceedingly great expense, when, in fact, it did not inure to the benefit of anybody. And I believe that Congress ought to take this question up and regulate the character of binding in which these documents are to be bound. The resolution brought in by the gentleman from South Carolina [Mr. FINLEY], chairman of the Committee on Printing, designating the character of binding in which certain documents were to be printed, to wit, buckram, in my opinion, was a step in the right direction. But to leave to the caprice of Members of Congress the choice of having any kind of a document bound in morocco is too expensive to the people of this country, and it ought not to be. If there is a statute, Mr. Chairman, granting this authority, it ought to be either modified or repealed. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois [Mr. FOWLER] has expired.

Mr FITZGERALD. This authority is contained in the so-called "Richardson binding act" of 1895, which codified the previous laws. If the gentleman thinks there is an abuse and the statute should be repealed or modified, as he is a very industrious and ingenious and able Member of this House, he should take it up, prepare a bill, send it to the Committee on Printing, and have it reported to the House. In this bill we appropriate for a service authorized by law.

Mr. MANN. What became of the amendment? I understood my colleague offered an amendment to strike out the paragraph.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent to withdraw my motion. As the paragraph is authorized by law, I am aware of the fact that the motion could not prevail in this House.

The CHAIRMAN. The Chair understood the gentleman from Illinois [Mr. FOWLER] to move to strike out the last word. Without objection, the amendment will be withdrawn.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the Treasury Department, $340,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] moves to strike out the last word.

Mr. MANN. Does the printing for the Public Health Service bulletins come under this item?

Mr. FITZGERALD. It comes under the Treasury Department.

Mr. MANN. I supposed so. I notice there is no increase in the appropriation over the current law. I think it is very important to increase the size of the editions of the popular bulletins that are gotten out by the Public Health Service. You carry in this bill an item for $200,000 for conducting additional research work, and so forth, in the Public Health Service.

They have issued a number of bulletins of great value which ought to be widely distributed.

It is true that I had intended to do myself the honor to appear before the Committee on Appropriations, when it made up this bill, and urge that there be some increase for the publishing of the Public Health Service bulletins.

Mr. FITZGERALD. There has been no complaint about the appropriation in the Treasury Department. They have always had a surplus.

Mr. MANN. They may always have had a surplus, but they are not given money enough or else are not permitted—I do not know which—to publish a sufficient number of some of these bulletins. It is true that the House recently agreed to a concurrent resolution to print a larger number of one or two of the bulletins, but they are issuing some bulletins of popular value, in language which the ordinary person can understand, bulletins of great service, which ought to be rather widely distributed for the purpose of preventing disease and telling people how to maintain better sanitary conditions.

Mr. PAGE. Mr. Chairman, will the gentleman permit an interruption?

Mr. MANN. Yes.

Mr. PAGE. If this amount of the appropriation for the Treasury Department were increased without some particular direction as to the printing of these bulletins, has the gentleman any assurance that a greater number of them would be printed?

Mr. MANN. No. I am not making a complaint against the committee. I am calling the matter to the attention of the House. I think we ought to carry, if it is possible to do so, a specific appropriation for printing for the Public Health Service or else get authority to increase the number of bulletins printed. In the Public Health Service law passed at the last session of Congress increasing the authority of that service there was included the right to print the bulletins, and if we had that carried into effect by the printing of the popular bulletins we would do the country a great service—greater than we can do in any other direction along these lines, in my judgment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the War Department, $190,000: *Provided*, That the sum of $3,000, or so much thereof as may be necessary, may be used for the publication, from time to time, of bulletins prepared under the direction of the Surgeon General of the Army, for the instruction of medical officers, when approved by the Secretary of War.

Mr. HELM. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Kentucky [Mr. HELM] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, by inserting after the word "that," on page 164, line 23, the following: "No part of this sum of money shall be expended for the printing of any matter not authorized by law, except," so that the paragraph as amended will read as follows:

"For the War Department, $190,000: *Provided*, That no part of this sum of money shall be expended for the printing of any matter not authorized by law, except the sum of $3,000, or so much thereof as may be necessary, may be used for the publication, from time to time, of bulletins prepared under the direction of the Surgeon General of the Army, for the instruction of medical officers, when approved by the Secretary of War."

Mr. HELM. Mr. Chairman, if I understand the statute under which this appropriation is carried, and I think I am advised as to it, the matter rests solely within the discretion of the War Department, or rather the discretion of the officials connected with the War Department, for what purpose this sum of money, $190,000, can be expended.

I have a suspicion that well-nigh amounts to a conviction that this sum of money can be used by way of employing a press bureau or a press agency to promulgate or scatter abroad the views of the officers of the Army on any particular legislation affecting the War Department. The bill that passed Congress at this session making an appropriation for the maintenance of the Army, under the subdivision of the Army War College, carried a total appropriation of $9,000. Among the items included in that appropriation are printing and binding. Also an appropriation of $7,660,153 under the subdivision of regular supplies, in which the printing of department orders and reports are included. Also under the Medical Department, which carries a total appropriation of $775,000, there is included printing matter and advertising matter. Under the Ordnance Department, with a total appropriation of $330,000, is included an item for advertising.

I hold in my hand a pamphlet that was published and paid for out of this appropriation of $190,000 carried in the bill before the committee. This pamphlet is entitled, "Three years' enlistment for the Army. Views of the President, the Secretary of War, the Chief of Staff, the General Staff Corps, and of the officers of the Army War College, the Army School of the Line, the Mounted Service School, the Coast Artillery School, and the United States Military Academy."

The purpose of this publication, which was scattered broadcast over the United States, is to create a sentiment in line with the views of the officers of the War Department. This is not a document the printing of which is authorized by law. My amendment is to limit these offices to the publication of such matter as is authorized by law—no more and no less.

It strikes me as wholly and entirely inappropriate for Congress to place at the command of the War Department the sum of $190,000 or any other considerable sum of money which it can use for the purposes for which a portion of it was used in the manner that I have pointed out.

Mr. MANN. Will the gentleman yield for a question?

Mr. HELM. With pleasure.

Mr. MANN. The gentleman says "authorized by law." Does he mean authorized specifically by law? Take, for instance, the Army cookbook. Is there any specific authority for the publication of the cookbook for the Army?

Mr. HELM. I can not advise the gentleman whether there is any specific authorization for such a document or not.

Mr. MANN. Would the gentleman's provision, if enacted into law, prohibit the publication of the Army cookbook if it is not specifically authorized by law? That is what I want to know.

Mr. HELM. Whether the Army cookbook is or is not authorized by law, I think this sum of money can be so misapplied and misused that some safeguard ought to be put upon it before Congress authorizes or votes that sum of money.

If there are such publications as the cookbook or other matters that are essential for the good service or efficiency of the Army, I have naught to say against them. But I do protest most vehemently and in the strongest terms at my command against Congress putting at the command of the War Department, the Navy Department, or any other department, but more especially the Army and the Navy, a sum of money which can be used for electioneering purposes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HELM. I ask unanimous consent for five minutes longer.

The CHAIRMAN. The gentleman asks unanimous consent that he may proceed for five minutes. Is there objection?

There was no objection.

Mr. HELM. As suggested by my friend, this document that I hold in my hand can be very properly characterized as a lobbying document. It is to create throughout the land a sentiment in favor of such matters as the War Department wants to impress upon the minds of the people. If the War Department favors an Army of 600,000 men it can utilize this $190,000 for the purpose of advertising and promoting that scheme. If the Navy Department wants to create a sentiment throughout the country for big navies or large expenditures in the Navy Department, it can do the same thing. The next item in this bill is $153,000, placed at the command of the Navy Department for precisely the same purposes; and I submit to you men if it is not true that when these Army and Navy appropriations are being prepared for passage by Congress the press gets extremely lively? Is it not a fact that the magazines and periodicals about that season of the year carry publications favoring big navies and big armies? As I said, I have a suspicion that amounts to a conviction that these enormous sums of money for printing and publications that are placed at the disposition of the Army and Navy are sometimes used for the purpose of creating press views and press agencies. I do not know whether it can be construed as authorizing the purchasing of space in periodicals and newspapers to create sentiment in favor of big navies and big armies, but it is significant that more is seen in print about the time an Army or Navy appropriation is under consideration.

Now, this amendment that I offer restricts the use of this sum of money to such matters as are authorized by the Congress of the United States. I discovered on reading the hearings that even the publications of the engineers are paid for out of the appropriation carried for rivers and harbors. But if you examine the bill making appropriations for the support of the Army and the different appropriations contained therein—we all well understand that while these appropriations carry other items and are not used altogether for printing—I do not say that $7,000,000 will be used for printing, but I do tell you that, under the law, the $7,000,000 could be used for printing.

Mr. HOBSON. Will the gentleman yield?

Mr. HELM. I will.

Mr. HOBSON. Can the gentleman point out any part of this pamphlet to which he has called attention which would not be frankable and is not frankable?

Mr. HELM. I do not understand that the opinion of officers of the Army is frankable. If the officers express an opinion that we ought to have an Army of 600,000 men, I do not understand that that is a frankable document that can be sent out broadcast over the United States without the payment of postage. This document is the opinion of different heads of divisions or heads of departments in the Army as to what they think about the term of enlistment. Members will recollect that when the last Army bill was before the House a term of five years was authorized in the bill. The War Department went up in the air. It rebelled against such a proposition, and hence this document was published and sent broadcast. Every Member of Congress received it, and Heaven knows where else it went. No man can tell what other documents similar to this were sent out by the War Department to create similar sentiment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOBSON. Mr. Chairman, I ask that the gentleman have three minutes in addition.

Mr. FITZGERALD. I want to oppose the amendment offered by the gentleman from Kentucky.

The CHAIRMAN. The gentleman from Alabama asks that the time of the gentleman from Kentucky be extended three minutes. Is there objection?

There was no objection.

Mr. HOBSON. I do this merely to point out, as I read along in this pamphlet—I have not looked it clear through, but I find the President quoted, and it states that the President, in a special message to Congress under date of December 21, 1911, said—of course that is frankable. I find next the Secretary of War, in a letter to the chairman of the Committee on Military Affairs, says—and so on.

Mr. HELM. Is a letter from the Secretary of War written to you frankable by you?

Mr. HOBSON. Not written to me.

Mr. HELM. Written to anybody?

Mr. HOBSON. I think an official letter from the Secretary of War to the chairman of the Naval Committee or the chairman of the Committee on Military Affairs would be frankable. I believe we are constantly printing at the Government's expense letters from the chiefs of bureaus to the officials and chairmen of committees.

Mr. MANN. Will the gentleman yield?

Mr. HOBSON. Certainly.

Mr. MANN. If a letter from the Secretary of War is not frankable, is a letter to a private individual frankable by a Member elect of Congress? We all know that that is now being done.

Mr. HOBSON. The opinion of various officers is quoted in this pamphlet. I have not looked it through in detail. For instance, Gen. Carter is quoted in a hearing had before the Committee on Military Affairs.

Mr. HELM. Does not the gentleman know that this document is an opinion of the officers of the Army on the three-year enlistment plan, printed after the last Army bill was introduced?

Mr. HOBSON. I am sure that it does contain the opinion of experts on the subject, but the point I am making is that I do not believe that the department has ever been violating the franking privilege and that this document contains frankable material. I can not see where the gentleman's strictures lie. I agree with him in principle that funds should not be available to send out matter that is not frankable.

Mr. HELM. Does the gentleman think it ought to be left entirely to the officers of the War Department and the officers of the Navy Department to say what they think ought to be published and scattered abroad pertaining to the different departments?

Mr. HOBSON. I think the compilation of expert opinions on technical matters would be of great value, and that the simple limitation of its frankability ought to apply and no further.

Mr. HELM. The gentleman thinks it ought to be left to the discretion of the War Department to establish a press agency and bureau for the purpose of disseminating their opinions about matters of legislation?

Mr. HOBSON. I do not; but I think the Department of the Navy, the Department of the Army, or the Department of Commerce and Labor ought to have it within their power to compile into documentary form materal that is proper, particularly frankable material, and that any Member should be able to send that out under his frank. He probably could not be supplied with quantities of it. He would probably have to pay for it if he ordered it printed, just as he would for a speech of his own.

Mr. HELM. If their letters and opinions are frankable, why place $190,000 at their disposal for the purpose of having this printing done?

Mr. HOBSON. I do not believe they use that $190,000 for any such purpose.

Mr. HELM. Will the gentleman take this assurance from me, that when my attention was directed to this publication I called up the Public Printer or the person in charge, and he told me that the cost of printing of this was paid out of this fund that is carried in the sundry civil appropriation bill under the general printing law, section 93.

Mr. HOBSON. May I ask the gentleman how much was printed and how much the bill was?

Mr. HELM. It was small, but if they can print this kind of a document it occurred to me what other kind of a document may they print and in how large quantities have they been printing them?

Mr. HOBSON. Take the Army and Navy regulations and various other documents of a similar nature that are essential to the efficiency of the Army and the Navy. They are printed, as they should be, and if there should appear any abuse in this printing privilege, I think that abuse should be brought to the attention of Congress, so that it may be corrected.

Mr. HELM. I think this is one of those abuses.

Mr. HOBSON. I want to ask the gentleman if he could tell us how much of the public treasure was spent in paying for the printing of that document. We might then be able to tell if it is an abuse.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. FITZGERALD. Mr. Chairman, whatever may be the situation relative to abuse by the War Department of its authority to print, the amendment proposed by the gentleman from Kentucky [Mr. HELM] in my opinion will not cure it. The department can not use this appropriation or any other appropriation for any purpose unless it be authorized by law. If printing be authorized by law, this appropriation is available to pay for it. If it be not authorized by law, the comptroller will not pass the accounts.

Mr. HELM. Mr. Chairman, will the gentleman yield?

Mr. FITZGERALD. Certainly.

Mr. HELM. I suppose the gentleman is familiar with section 3 of the general printing act, which reads as follows:

> When any department, the Supreme Court, the Court of Claims, or the Library of Congress shall require printing or binding to be done, it shall be done on the certificate that such work be necessary for the public service.

The point I make is this, that under that there is the broadest possible discretion. Anything that any particular officer in the War Department may think is good for the public service may be printed.

Mr. FITZGERALD. But that broad discretion will not be cured by the insertion of a provision that the money shall not be expended except for printing authorized by law. That is all it can be expended for now, and if there be an abuse in printing in the War Department, the change must be made in the law. I have some sympathy with the purpose of the gentleman from Kentucky.

Mr. HELM. If this amendment be adopted limiting the use of this fund to such matters as are authorized by law, does the gentleman say then that anything that appeals to an officer of the Army as being good for the public service can be printed, or would it be such matter as has received the sanction of Congress in the way of a public document or an authorized publication of some kind?

Mr. FITZGERALD. But, Mr. Chairman, if the purpose of the gentleman is to prohibit any printing whatever, unless some statute authorizes it——

Mr. HELM. It is not that.

Mr. FITZGERALD. One moment, let me finish—then I am decidedly opposed to this amendment.

Mr. HELM. That is not the purpose of it.

Mr. FITZGERALD. This printing appropriation is for all sorts of blanks, for reports, for orders, and various matters that are essential in the conduct of the War Department. If any correction is to be made, it must be by an amendment of that printing act, and the amendment proposed by the gentleman from Kentucky will not prevent the printing of anything about which he complains.

Mr. HELM. Will it not put a limitation upon the discretion?

Mr. FITZGERALD. Well, you can not put a limitation upon the discretion of the department in this bill, because it is subject to a point of order—it is legislation.

Mr. HELM. It certainly does occur to me you can say for what purpose the appropriation can be expended.

Mr. FITZGERALD. But the appropriation can only be expended for printing authorized by law. I hope the amendment will not be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kentucky.

The question was taken, and the Chairman announced the noes seemed to have it.

Upon a division (demanded by Mr. HELM) there were—ayes 20, noes 40.

So the amendment was rejected.

The Clerk read as follows:

Section 13 of the river and harbor appropriation act approved July 25, 1912, is repealed.

Mr. EDWARDS. Mr. Chairman, I move to strike out the last word for the purpose of asking the gentleman a question.

Mr. MANN. I reserve a point of order on the paragraph.

Mr. RODDENBERY. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. FITZGERALD. I think it is too late.

Mr. MANN. I reserved a point of order on the paragraph.

Mr. RODDENBERY. I thought the gentleman from Georgia reserved a point of order.

Mr. SHERLEY. The gentleman from Georgia offered an amendment.

Mr. FITZGERALD. If the Chair thinks the point of order has been made in time; but I understand the gentleman from Georgia made his motion and addressed the Chair, and started to interrogate me before anybody reserved the point of order.

The CHAIRMAN. The Chair is informed the gentleman from Illinois [Mr. MANN] was on his feet and reserved the point of order.

Mr. EDWARDS. I desire to ask the chairman of the committee what this section proposes to do?

Mr. FITZGERALD. Section 13 of the river and harbor act of the current year is as follows:

The printing of matter relating to river and harbor work, including the reports, compilations, regulations, etc., whose preparation is allowable under War Department regulations may, upon recommendation of the Chief of Engineers and the approval of the Secretary of War, be made from river and harbor appropriations.

That makes a permanent, indefinite appropriation for printing for river and harbor work. All of the appropriations for printing for all of the various services of the Government are carried in this bill. It is now possible to ascertain how much each service expends for printing and to exercise that proper control that is essential to the administration of the public service. Under the provision here referred to, it is possible to expend money out of appropriations made for work to improve rivers and harbors for what no one ever knows or ever will know or can keep track of what is expended for printing.

Now, the department has always been given all of the money essential to print what is necessary, and it is to correct the insertion of this matter, which I think would never have been done by the committee and which was most surely an inadvertence.

Mr. SPARKMAN. I would like to ask the gentleman if he knows to what extent the War Department or the Chief of Engineers has expended money under that provision up to this time?

Mr. FITZGERALD. No; I have not that information.

Mr. SPARKMAN. I would like further to ask——

Mr. FITZGERALD. I know he can expend all the money appropriated for river and harbor work for printing if he sees fit under this provision.

Mr. SPARKMAN. No——

Mr. FITZGERALD. But he can.

Mr. SPARKMAN. I do not think the gentleman intends to say that.

Mr. FITZGERALD. The law gives the authority, whatever may be done.

Mr. SPARKMAN. Evidently the gentleman does not mean that.

Mr. FITZGERALD. I do mean that he has that authority, and the only limit is the amount appropriated for river and harbor work.

Mr. SPARKMAN. That is an exception, and limited to the necessity, of course. There is a necessity, however, for the expenditure of some more money than they have been getting, I can say to the gentleman.

Mr. FITZGERALD. The War Department two years ago had an unexpended balance of about $55,000 for printing, and there could not have been any necessity for funds for printing, because they could not expend 20 per cent of the appropriation that was available.

Mr. SPARKMAN. I do know, Mr. Chairman, I will say to the gentleman, that complaints have come to our committee when we would call for certain papers that ought to have been printed—letters, documents, maps, and so forth—that they did not have sufficient money to do the necessary printing to give the River and Harbor Committee and to give this House the information which it should have in order to enable it to pass intelligently upon propositions that came before it. Now, it is a very common thing, if the gentleman will read the report on the various projects, to see a note at the foot of the page that certain documents were not printed because——

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. Mr. Chairman, I ask that my time be extended.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SPARKMAN. If the amount of money at their command is to be limited, they can not print those things.

Mr. FITZGERALD. I repeat that for the year 1912 the unexpended balance for printing in the War Department was in the neighborhood of $55,000. They have always had a surplus in their printing appropriation. The last time a request was made for a deficiency was in the year 1903—10 years ago. So they have never suffered from a shortage of funds for printing in that department. Now, to make available appropriations for every project for printing, upon the written request of the Chief of Engineers, with the approval of the Secretary of War, is absolutely destructive of proper administration.

Mr. SPARKMAN. Occasionally we have to send down there to the War Department and get the files in order to inform ourselves.

Mr. FITZGERALD. They had the money.

Mr. SPARKMAN. I only know that they tell me they did not have a sufficiency for that purpose.

Mr. FITZGERALD. Is the gentleman going to make the point of order?

The CHAIRMAN. Does the gentleman from Illinois [Mr. MANN] reserve the point of order?

Mr. MANN. Section 13 of the river and harbor act, passed last July, was itself subject to a point of order when it went through the House.

Mr. FITZGERALD. It was put in as a Senate amendment. The gentleman is mistaken.

Mr. MANN. It would have been subject to a point of order if it had been put in in the House. It went through the House in the conference report, and was agreed to last July. It seems to me a sort of silent play to enact legislation one year, and then before there is any test of it have another committee the next year propose to repeal it.

Mr. SHERLEY. The trouble is that we had not a chance. It slips in in the Senate and comes here in conference.

Mr. MANN. They have a chance. Every Senate amendment that comes here is subject to a separate vote in the House.

Mr. SHERLEY. Oh, well, that may be theoretically true, but, practically, the gentleman is too old a legislator to believe it is always so. The trouble is that the Engineer Corps, which is one of the most efficient corps in the Army, have a notion that any sort of restriction on their discretion is a mistake, and when any corps has that notion it is time to change it.

Mr. MANN. I am not sure whether that trouble exists more in the Army than in the Committee on Appropriations.

Mr. SHERLEY. That is a case of the gentleman's lack of knowledge.

Mr. MANN. It frequently happens that I have great lack of knowledge, and am quite willing to admit it, and if some members of the Committee on Appropriations would make the admission sometimes it would not be so necessary to prove it. However, I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

For the Navy Department, $153,000, including not exceeding $33,000 for the Hydrographic Office, of which latter sum not exceeding $8,000 is for the use exclusively in printing and binding a revised edition of 2,500 copies of the American Practical Navigator, Bowditch.

Mr. BURNETT. Reserving the right to make a point of order against the paragraph, I would like the gentleman to explain that provision as to printing and binding a revised edition of 2,500 copies of the American Practical Navigator, Bowditch.

Mr. FITZGERALD. That is designed to help to keep naval vessels off the rocks. The American Practical Navigator, Bowditch, is a publication essential to the navigation of ships. The last edition was printed in 1903. Certain changes have been made, and this is to enable an edition to be printed with those changes. It is a highly technical work and a valuable one to navigators, and it is for use in the Navy.

Mr. BURNETT. I make a point of order against it.

Mr. FITZGERALD. I submit it is not subject to a point of order. It is a limitation upon the amount that may be expended for printing which is authorized.

Mr. MANN. Is not this book sold?

Mr. FITZGERALD. I do not recall.

Mr. MANN. I think it is sold. I think it all comes back.

Mr. FITZGERALD. If it is sold, it is sold by the superintendent of documents.

Mr. MANN. The Hydrographic Office sells it, as they sell other publications. It is absolutely essential, like publishing hydrographic maps, which navigators buy at the Hydrographic Office.

Mr. BURNETT. Can it be bought in the markets of the country?

Mr. FITZGERALD. The Hydrographic Office prepare all the data and have all the information.

Mr. BURNETT. Are they allowed to sell it?

Mr. MANN. I think they sell all their publications, including hydrographic maps. That is what the Hydrographic Office is for.

Mr. FITZGERALD. But, Mr. Chairman, I desire to call the attention of the Chair to the fact that this is a limitation upon the amount that may be expended in the publication of this document. Under the printing act any printing certified by the head of a department——

The CHAIRMAN. Does not the gentleman from New York propose to take $8,000 from the $33,000 and devote it to the publication of this particular book?

Mr. FITZGERALD. What is being done is limiting the amount of the $33,000 that may be expended.

The CHAIRMAN. The gentleman can not by that sort of a limitation legislate on the bill.

Mr. FITZGERALD. This is not legislation. If the Chair will look at the printing act he will find that this is certified.

The CHAIRMAN. If there is no authority for the printing of the document——

Mr. FITZGERALD. There is no authority for the printing of any document.

Mr. BURNETT. You might as well say, Mr. Chairman, that there could be a limitation on the $33,000 to be devoted to the printing of an edition of the works of Macaulay or an edition of Burns's poems.

Mr. FITZGERALD. I will ask that the item be passed over temporarily until I can consult the authorities.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] asks unanimous consent to pass over the item temporarily. Without objection, that will be done.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For the Interior Department, including not exceeding $45,000 for the Civil Service Commission and not exceeding $25,000 for the publication of the Annual Report of the Commissioner of Education, $295,000.

Mr. RODDENBERY. Mr. Chairman, I desire to offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Georgia offers an amendment, which the Clerk will report.

Mr. RODDENBERY. It is this: On page 165, in line 13, after the word "commission," insert the words "*Provided*, That no part of this appropriation shall be paid to any person who is drawing a pension on the ground of permanent total disability."

Mr. FITZGERALD. Mr. Chairman, I reserve a point of order on that.

The CHAIRMAN. If the gentleman from Georgia reduces his amendment to writing, so that the Chair can have it before him, the Chair will pass upon it.

Mr. MANN. Mr. Chairman, I make the point of order that the amendment is not germane.

Mr. FITZGERALD. I reserved the point of order.

Mr. MANN. As soon as the Chair can see the amendment the Chair can pass upon it. Well, the Chair heard the amendment.

The CHAIRMAN. The Chair desires to see the amendment.

Mr. MANN. If the amendment is not in writing, I make a point of order against it.

Mr. CULLOP. Mr. Chairman, I make the point of order that the amendment is not germane.

Mr. MANN. If the gentleman from New York [Mr. FITZGERALD] can explain that this money is not paid to anyone as salary, it seems to me that that would dispose of the proposition.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Georgia [Mr. RODDENBERY].

The Clerk read as follows:

On page 165, line 13, after the word "Commission," insert the following:

"*Provided*, That no part of this appropriation shall be paid to any officer who is drawing a pension for total disability."

Mr. FITZGERALD. Mr. Chairman, I make the point of order that it is not germane. This appropriation is made to pay for printing, not to pay the compensation of officers. I call the attention of the gentleman from Georgia [Mr. RODDENBERY] to the fact that this money is not used to pay the compensation of anybody in the Civil Service Commission. This is the amount of printing that can be obtained from the Government Printing Office upon requisition from the Civil Service Commission.

Mr. RODDENBERY. Of course, Mr. Chairman, I take it that the gentleman's statement is correct; and if it be so, I will not insist upon my amendment, and I will concede that it is subject to a point of order.

Mr. FITZGERALD. This limits the amount of work that can be done at the Government Printing Office for the Civil Service Commission.

Mr. RODDENBERY. I doubt seriously the capacity of anybody permanently and totally disabled for the performance of labor to spend this money. I withdraw the amendment.

The CHAIRMAN. The gentleman from Georgia withdraws his amendment. The Clerk will read.

The Clerk read as follows:

For the Department of Agriculture, including not to exceed $47,000 for the Weather Bureau, and including the Annual Report of the Secretary of Agriculture, as required by the act approved January 12, 1895, and in pursuance of the provisions of public resolution No. 13 of the first session Fifty-ninth Congress, and also including not to exceed $137,500 for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by Senators, Representatives, and Delegates in Congress, as they shall direct, $490,000.

Mr. RODDENBERY. Mr. Chairman, I move to strike out the last word of the paragraph just read.

I wish to make an inquiry of the chairman of the committee as to the language of that paragraph, first, "For the Department of Agriculture, including not to exceed $47,000 for the Weather Bureau," and so forth, and also the language on line 7, "including not to exceed $137,500 for farmers' bulletins," and so forth. Does that cover the farmers' bulletins generally, or are they the bulletins known as the farmers' bulletins exclusively published in the Weather Bureau of the Department of Agriculture?

Mr. FITZGERALD. That does not include the Weather Bureau farmers' bulletins distributed by Members of Congress.

Mr. RODDENBERY. It is just the general bulletin?

Mr. FITZGERALD. Yes.

Mr. RODDENBERY. Now, would there be any objection on the part of the committee to accepting an amendment here providing, on line 11, that these bulletins are to be sent out under the addressed franks furnished by Senators, Representatives, and Delegates in Congress through the Division of Publications in the Department of Agriculture?

Mr. FITZGERALD. Oh, yes; there would be very great objections. We cured that abuse last year, and we do not want it to recur again.

Mr. RODDENBERY. In other words, it is the opinion of the Committee on Appropriations that the change we made last year, to have them sent direct from the Government Printing Office, is preferable to sending them through the Division of Publications?

Mr. FITZGERALD. Yes. Just as soon as those two divisions work in cooperation and the Division of Publications stops its efforts to get the work back and tries to cooperate properly with the Printing Office the complaints that have been made will cease. Let me say to the gentleman that now when the bulletins are ordered from the Department of Agriculture the requisition is sent to the superintendent of documents. The documents are wrapped, franks placed on them, and they are routed for delivery, so that when the mail bag leaves the Printing Office it leaves for its destination and all of the handling and classifying in the post office is eliminated.

Mr. RODDENBERY. I wanted to bring to the attention of the gentleman a concrete case. I received a notification from a demonstration agent of the Agricultural Department that there would be a general farmers' meeting at a certain town at a certain time, and he sent me a list of a large number of practical agricultural bulletins that he desired to have delivered there at that time. I forthwith ordered them from the Division of Publications, and I presume, of course, that the Division of Publications transmitted those orders wherever they should go; but the bulletins arrived two or three days after the

meeting. It occurred to me that the method of ordering them through this division and then relaying them through the other department did not get very prompt facility, and it occurred to me that if it is proper to send them out direct from the Government Printing Office we might expedite the proper use of those facilities by providing some machinery whereby the orders of Representatives and Senators would go direct to the person who is to transmit the documents. I prefer the system of sending them direct from the Division of Publications.

Mr. FITZGERALD. That is not necessary, and I doubt if it is desirable. The accounts of the Members should be kept in the Agricultural Department. When this transfer was made there was some friction between the two staffs, and this year the committee had the Public Printer and a representative of the Department of Agriculture before them; I believe we finally got those gentlemen to an understanding of just what particular accounts should be kept. The Department of Agriculture wanted the Printing Office to keep practically the same account that it was keeping, and the cost of doing so would have been greater than the cost of the bulletins themselves.

Mr. RODDENBERY. I agree that the duplication of accounts should be avoided.

Mr. FITZGERALD. Now what happens sometimes is that, through this dispute as to where these accounts should be kept, certain numbers are exhausted which, if they had been better accounted for, probably would have been kept in stock. The bulletins are printed, assorted, and when the order comes, are wrapped, and the franks attached to them in the same building, and when the bag leaves the Printing Office it goes to the mail train for the destination for which the bulletins are intended.

Mr. RODDENBERY. And the same rule would apply to one item ordered?

Mr. FITZGERALD. Yes; to one order.

Mr. RODDENBERY. I withdraw the amendment.

Mr. BURNETT. Mr. Chairman, I move to strike out the last word in order to ask the gentleman a question. Does not the Printing Office keep an account against the Member also?

Mr. FITZGERALD. No; it does not.

Mr. RODDENBERY. It just keeps an account against the Agricultural Department of the number of bulletins sent.

Mr. FITZGERALD. That is all.

Mr. BURNETT. So that it does not require two sets of bookkeeping?

Mr. FITZGERALD. No; the Public Printer declined to keep an account against the Members.

Mr. BURNETT. Is not the expense entailed in this way: When the order is made to Mr. Arnold, the chief of the division, he then sends it over to the Public Printer. That requires some extra work, does it not?

Mr. FITZGERALD. Yes; but not nearly equivalent to the cost of wrapping the bulletins several times, transferring them from the Printing Office to the Department of Agriculture, taking off the outer wrapper, restoring them, and then rehandling them again when they are ordered, shipping them back to the Post Office, and then having the Post Office Department classify and route them. They go from the press to the storeroom in the one building now. When they leave that building they go in a mail sack, which is destined for the post office from which they are to be distributed.

Mr. BURNETT. It seems from what the gentleman from Georgia has said, and I have had a similar experience, that there is a delay somewhere.

Mr. FITZGERALD. There was some friction, and I think perhaps it was natural that the Department of Agriculture should prefer to retain all of the powers and duties which it has. There is no doubt but that this is the most desirable system that could be devised, and it has been advocated for 30 years.

Mr. BURNETT. In regard to the amount allowed, is the same amount allowed this year as was last?

Mr. FITZGERALD. We gave the amount requested by the department for farmers' bulletins. This year it is $12,500 in excess of the current year, on account of the new Members.

Mr. RODDENBERY. It has been stated here that the Public Printer did not keep any account with the Members. With whom does he keep an account?

Mr. FITZGERALD. With the Department of Agriculture.

Mr. SHERLEY. The Public Printer keeps his account with the Department of Agriculture.

Mr. RODDENBERY. I want to suggest that as a business proposition a system that permits the Public Printer to keep both accounts is not a good one. When a Member orders out a public document through the Department of Agriculture the Member gets no notice back except from the Division of Publications, saying, "Your request is complied with." Neither the Member or Division of Publications knows positively whether the order is actually filled. There is not that working connection, that system, that is necessary to exist in a well-regulated business. The Public Printer, whose duty it is to send out and disburse these bulletins on the order of Congressmen is not answerable except in a general way and has nothing to do with the indivduals who prefer the orders transferred to him. No business man would tolerate that system in his business.

Mr. FITZGERALD. Well, this system has had the approval of every well-equipped expert that has investigated it.

Mr. RODDENBERY. I do not controvert the general scheme; but there is no reason, after a system is inaugurated, why any defect that may be found or pointed out in it should not be perfected.

Mr. FITZGERALD. The Public Printer should not be obliged to keep an account with the Members.

Mr. RODDENBERY. I do not insist upon that.

Mr. BURNETT. The gentleman refers to the ordering in block by the Agricultural Department. That is not the way it occurs. For instance, I get almost every day a request for a bulletin from an individual. I send the numbers to Mr. Arnold and ask him to send them. He has to transmit them to the Public Printer, and he takes it up; and if there is one or two or half a dozen, does the Public Printer charge that number against the Agricultural Department?

Mr. SHERLEY. If the gentleman from New York will permit, the department makes the request on the Public Printer under this allowance for printing for a certain number of farmers' bulletins, just such numbers as he thinks will be needed. When the individual Member sends to the Department of Agriculture for a bulletin, they send the request over to the Public Printer, and the Public Printer does not undertake to keep a separate account with each Member, but he has charged the department with the cost of printing, we will say, 10,000 bulletins, crediting it with that number, and when he sends out a certain number he credits himself with the number, so that his accounts with the Department of Agriculture may finally balance. The Department of Agriculture, on the other hand, keeps an individual account with each Member of Congress.

Mr. BURNETT. If I send for one bulletin to-day and another to-morrow, it goes first to the Agricultural Department and then to the Printing Office, and is each one of these charged on the books to the credit of the Agricultural Department? That is, is each particular number charged against the department in each individual case?

Mr. SHERLEY. No; they have a system by which, when the bulletins are taken out of the bin in which they are kept, they can be simply charged against the Agricultural Department.

Mr. BURNETT. It takes more bookkeeping.

Mr. SHERLEY. I think it takes very much less.

The Clerk read as follows:

Fifth. For the purchase and delivery of material, supplies, and equipment, including cost of inspecting material and of paying traveling expenses incident thereto, whether on the Isthmus or elsewhere, and such other expenses not in the United States as the commission deems necessary to best promote the construction of the Panama Canal, including the purchase, or construction in Government yards, in accordance with plans and specifications to be prepared by the Navy Department, and to have a cargo capacity of 12,000 tons of coal and a speed of at least 14 knots per hour, two colliers to cost not exceeding $1,000,000 each, and including the payment of damages caused to the owners of private lands, or private property of any kind, by reason of the grants contained in the treaty between the United States and the Republic of Panama proclaimed February 26, 1904, or by reason of the operations of the United States, its agents or employees, or by reason of the construction, maintenance, operation, sanitation, and protection of the said canal or of the works of sanitation and protection therein provided for, whether compromised by agreement between the claimant and the chairman of the commission or allowed by a joint commission, and the payment for land and land under water as authorized in section 3 of the Panama Canal act, for the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts, $5,000,000.

Mr. CULLOP. Mr. Chairman, I make the point of order against the provision commencing on line 24, page 172, with the word "including" and ending with the word "each," in line 4, page 173. There is no law authorizing any such appropriation.

Mr. FITZGERALD. Mr. Chairman, the provision is authorized in section 6 of the so-called Panama Canal act, approved August 24, 1912, under the following provision:

The President is also authorized to establish, maintain, and operate through the Panama Railroad Co., or otherwise, dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies for vessels of the Government of the United States, etc.

Since the authority is given to provide all other necessary "facilities," including those enumerated, necessary to provide

coal for facilities of the United States, and as coal must be transported to the Isthmus, the committee submits that the facilities for the transportation of coal must be authorized.

Mr. RODDENBERY. Mr. Chairman, the gentleman from New York, in order to hold this item in the bill, specifically relies upon that part of section 6 of the Panama act of 1912 which he has just read.

Mr. FITZGERALD. That is the only authority. If it is not authorized by that, it is not authorized at all.

Mr. RODDENBERY. If it is not authorized by that, the gentleman concedes that it is not authorized at all. By the terms of section 6 the President is authorized to—

establish, maintain, and operate, through the Panama Railroad Co., or otherwise, dry docks—

I shall endeavor not to be tedious, and it is unnecessary for me to read to the Chair the numerous decisions touching the extent to which an Appropriation Committee can provide for dry docks. If this were an express statute in no way connected with the President to be carried out by Executive order, but under general law, it would not authorize the construction of a dry dock except in accordance with the rules and decisions with which the Chair is already entirely familiar. Nor would it authorize a collier. Then take the next:

wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal—

The Chair will remember the legislation already had touching the establishment of coaling stations and coal storage on the Isthmus. The Chair will also recognize in what manner the coaling station is now operated. Then—

and, incidentally, for supplying such at reasonable prices to passing vessels, in accordance with appropriations hereby authorized to be made from time to time by Congress as a part of the maintenance and operation of the said canal.

Mr. Chairman, just here I desire to direct the attention of the Chair especially to page 171 of the bill, which is in this language:

To continue the construction of the Panama Canal, to be expended under the direction of the President, in accordance with an act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific Oceans."

Mr. Chairman, the act described in that paragraph is the act of 1902, and not the act of 1912, and that paragraph is the basis upon which the succeeding paragraphs, numbered first, second, third, fourth, fifth, and so forth, depend, and this point of order is made against the fifth paragraph. Will the Chair indulge me to call attention to the current appropriation law? The current law is in language identical with paragraph 5 down to and including the words "Panama Canal," on line 24, and then for the first time the following language appears:

Including the purchase or construction in Government yards, in accordance with plans and specifications to be prepared by the Navy Department, and to have a cargo capacity of 12,000 tons of coal—

And there is no such vessel afloat—

and a speed of at least 14 knots per hour, two colliers, to cost not exceeding $1,000,000 each.

Mr. Chairman, there is nothing in the act of 1912 that the gentleman reads that authorizes the Appropriations Committee to provide for a collier, which, by the dictionary and in naval terms, is a convoy vessel, for war, and has never been defined to be anything else.

There is now no such vessel with a speed of 14 knots and a capacity of 12,000 coal tons, and there is no Government navy yard in the United States that has the facilities for constructing such a vessel except the Government navy yard at Brooklyn, which is in the district of the distinguished chairman of the Committee on Appropriations, the gentleman from New York [Mr. FITZGERALD]. [Applause and laughter.]

Mr. CURLEY. Mr. Chairman, will the gentleman yield?

Mr. RODDENBERY. I can not yield. The gentleman would better go to the telephone now and find out about the Philadelphia and Norfolk yards before he contradicts the statement that there is no Government navy yard that can construct such a vessel except the Brooklyn Navy Yard.

Mr. KNOWLAND. Mr. Chairman, will the gentleman yield?

Mr. RODDENBERY. I can not yield.

Mr. FITZGERALD. Mr. Chairman, will the gentleman yield?

Mr. RODDENBERY. I yield to the gentleman. I want to disclaim any suggestion that the gentleman is getting any "pork." It is just chitlings—chitlings—chitlings. [Laughter.]

Mr. FITZGERALD. Mr. Chairman, I merely want to call the attention of the gentleman to a fact with which he is not familiar or that he has overlooked, and that is, that the navy yard at Mare Island, Cal., on the Pacific coast, is building such colliers at the present time.

Mr. RODDENBERY. And I now challenge the gentleman from New York to consent to an amendment to this paragraph providing that if these colliers are constructed they shall be constructed in the California navy yard.

Mr. FITZGERALD. Well, we will discuss that when we come to it.

Mr. RODDENBERY. I guess so.

Mr. FITZGERALD. I will ask the gentleman to confine himself to the facts; he was not stating accurately the facts.

Mr. RODDENBERY. Then, Mr. Chairman, I will not tediously tax the Chair with decisions, but if the Chair will take section 3727 of Hinds' Precedents, volume 4, it says:

The construction of a new vessel for the Coast Survey was held not to be the continuation of a public work or object.

And the gentleman from New York does not insist upon this as being in continuation of a public work, but he says it rests absolutely on the statute, section 6, which gives the President of the United States, Mr. Chairman, the right by Executive orders over the administration of the Panama Canal as specifically provided therein. I now call the Chair's attention to section 3736 of the Precedents, in which this is stated:

On the other hand, it is settled by the precedents that appropriations for a new naval station, for a new navy yard, for the selection of a site for a naval station, for the establishment of an armor-plate factory, for the erection of buildings for a naval hospital with authority to acquire a new site, for the construction of stationary dry docks are not in order in general Navy appropriation bills unless previously authorized by law.

I read further:

Including, among other things, naval stations, navy yards, hospitals, magazines, and stationary dry docks, do not ipso facto constitute a public work or object in progress, and appropriations therefor must be previously authorized by law.

Now, what does the Chair find in section 12 authorizing the construction of two great naval vessels, or an appropriation clause in which is the unusual language, "including the purchase"? If they are to be purchased, where is authority of law for it and who will do the purchasing?

Or construction in Government yards, in accordance with plans and specifications to be prepared by the Navy Department.

The language just read definies tonnage capacity and speed limit and is on its face a specific provision for the construction of two vessels whose primary qualities and equipments constitute colliers fit only as a part of a general naval system. It has never been held, and the Chair will see that it would be the ultimate result if this provision be now ruled in order, that the section authorizes the sundry civil appropriation bill to carry provision for the construction of warships to convoy coal. If the point of order were reserved and not made I should like to develop this question so the Chair could perceive how that under section 6 it is absolutely preposterous to undertake in this bill to provide for the construction of these vessels on the theory that the President, vested with Executive power, derives any such practical authority incident to performing his duties touching the Panama Canal. If the construction insisted on by the committee is to be given to this section, that section then empowers the Government through this committee to provide a fleet of 10 vessels without further authorization to support the fortifications of the Government there.

Mr. HOBSON. Will the gentleman permit a question?

Mr. RODDENBERY. I yield to the gentleman.

Mr. HOBSON. I assume the gentleman agrees to the proposition that we should have colliers for the canal. I want to ask him, as he is a practical man, whether he does not think that their construction under plans of the Navy Department so that they would be of actual service in time of war would be advisible from every standpoint of the public service?

Mr. RODDENBERY. I quite agree with the gentleman, but it must be authorized by law and originate with the committee having jurisdiction of it, to wit, the Committee on Naval Affairs.

Mr. ADAMSON. May I interrupt the gentleman?

Mr. RODDENBERY. I yield to the gentleman from Georgia.

Mr. ADAMSON. I hope the gentleman does not concede the proposition propounded by the gentleman from Alabama, and that his answer does not concede that we ought to construct colliers for the Navy, because when the Secretary of the Navy came before us with this original proposition and asked us to charge to the canal fund the construction of these colliers that the Navy might use, we refused to do so, and our committee had jurisdiction of the matter.

Mr. RODDENBERY. No; the gentleman misunderstands what I conceded in response to the question of the gentleman from Alabama, and that was that it might be well to construct, under the supervision of the Navy Department, colliers to be used in case of war in connection with our present naval establishment. And that is the bane of this provision in the law. There never was devised—and I have made a careful study of it, Mr. Chairman—a more ingenious provision in any statute ever brought in, except the provision on a Senate bill several

years ago of a similar provision for the purchase of the *Anton* and another vessel——

Mr. ADAMSON. The *Christobal*.

Mr. RODDENBERY. The *Christobal*. After that provision was put in it was found out that that legislation had provided for the purchase of two certain described vessels when there were but two such vessels in the world, and they were owned by a corporation worth millions of dollars.

The CHAIRMAN. The Chair will ask the gentleman to confine himself to the point of order.

Mr. RODDENBERY. I will invite the Chairman's attention to the fact that he can not find a more ingeniously contrived appropriation scheme than contained in this paragraph. Mark you, paragraph 5 is based on this language:

To continue the construction of the Panama Canal, to be expended under the direction of the President in accordance with the act of 1902.

Section 5, down to the provision for colliers, follows the current law, which rested on the act of 1902 and which was passed before there was an act of 1912. And now they ingraft in here the naval-vessel phraseology and seek to hold it in upon a statute that they do not cite and upon a statute upon which by the express language of the bill they do not rely. Section 12, by its plainest terms, if it gives the right to construct two colliers, fixes no limit to the authority under it to appropriate for warships. I know the Chair is so thoroughly familiar with the rule respecting the need of authorization by law before this great expenditure can be made that I shall dismiss this phase of the subject. I respectfully submit to the Chair, with indebtedness to him for his patient attention to the argument, that there is no authority upon which this provision can rest, except the authority of the committee which reported it, and that has not reached the place yet in the House where it is law.

Mr. CULLOP. Mr. Chairman——

The CHAIRMAN. The Chair is ready to rule. The Chair understands the gentleman from New York [Mr. FITZGERALD] bases his contention upon the statute which provides:

The President is also authorized to establish, maintain, and operate, through the Panama Railroad Co. or otherwise, dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies for vessels of the Government of the United States.

The Chair does not think that that language would authorize the building of these colliers provided for in this bill and therefore sustains the point of order.

The Clerk read as follow:

Twelfth. For materials, supplies, equipment, construction and repairs of buildings, medical aid and support of the insane, and of indigent persons permanently disabled, while in the line of duty and in the employ of the Isthmian Canal Commission, from earning a livelihood, and contingent expenses of the department of sanitation on the Isthmus, including not exceeding $100,000 for the construction of a quarantine station, $300,000.

Mr. FOSTER. Mr. Chairman, I move to strike out the last word. I notice in this item there is a provision for a quarantine station. The station, as I understand, is located over there on one of the little islands at the Pacific end of the canal.

Mr. FITZGERALD. It is necessary to provide an ample quarantine station. It was the opinion of some of the officials on the Isthmus that there should be two. From the information the committee has obtained, it is quite apparent that one station will be sufficient, with a detention station at the other end.

Mr. FOSTER. Is this station to be located on the Atlantic side of the canal?

Mr. FITZGERALD. That is to be left to the authorities.

Mr. FOSTER. The reason I ask it is that there is one over there now at Colon, as I understand.

Mr. FITZGERALD. That is in the city. I am inclined to believe the station will be on the Pacific side, and it will be on a new location.

Mr. FOSTER. And then abandon the one on the other side?

Mr. FITZGERALD. Yes. That will probably be utilized by the military forces, and made untenable in time of war by the use of the guns. It is on Culebra Island.

Mr. FOSTER. It is located over there now?

Mr. FITZGERALD. It is on Culebra Island now; yes. The fire of the guns in the defenses will sweep over that, and in target practice it is claimed the guns will interfere very seriously with it.

Mr. FOSTER. I withdraw the pro forma amendment.

The CHAIRMAN. The gentleman from Illinois withdraws his pro forma amendment, and the Clerk will read.

The Clerk read as follows:

The foregoing sums, so far as necessary, shall be available for the operation of the canal, for the permanent organization authorized to be established under the Panama Canal act, for dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies, for office buildings, quarters, and other necessary buildings, for the payment of claims arising out of injuries or deaths of employees, and for the consolidation and preservation of the files of papers and other records which have accumulated or may accumulate during the construction of the canal and needed or useful or having a permanent value or historical interest.

Mr. CULLOP. Mr. Chairman, I desire to make a point of order against the provision, commencing on line 9, page 176, with the word "and" and ending with the word "interest," in line 13. It reads as follows:

And for the consolidation and preservation of the files of papers and other records which have accumulated or may accumulate during the construction of the canal and needed or useful or having a permanent value or historical interest.

There is no authority of law for any such provision as that.

Mr. FITZGERALD. The gentleman is mistaken. It was authorized in the last session of Congress, and I refer the Chair to the provision.

Mr. MANN. I think it was in the bill at that time.

Mr. FITZGERALD. It was in this bill last year. It is the law now.

Mr. CULLOP. That does not make it law, Mr. Chairman.

Mr. FITZGERALD. I will find the provision and read it.

Mr. ADAMSON. Mr. Chairman, the provision of law was put in in the Senate last year after we knocked it out on a point of order. If that division has been established, I will concede that it is the law; but if the division has not been established, it is not.

Mr. FITZGERALD. Section 5 of the sundry civil act passed last year provides that—

The chairman of the Isthmian Canal Commission is authorized to establish a division of records and, as the requirements of the service permit, to consolidate in the custody thereof the files of papers and other records which have accumulated or which may accumulate during the period of the construction of the Isthmian Canal; and he is directed to carefully preserve, properly index, and arrange for use all papers needed or useful in the transaction of current business or having a permanent value or historical interest; and he is authorized to destroy or otherwise dispose of duplications in the files and other papers which are not needed or useful in the transaction of current business and have no permanent value or historical interest and which have been recommended to him for destruction or other disposition by a committee of three competent persons who have personally examined the papers, and in connection with their recommendation have submitted a concise statement of the condition and character thereof.

This provision makes the appropriation available to do the work authorized in that act.

Mr. CULLOP. Now I would like to ask the gentleman from New York another question on that subject. Has that division been established by order of Col. Goethals, the officer in charge or at the head of the government there?

Mr. FITZGERALD. It is immaterial whether it was established or not. Authority is given, and this makes the appropriation available to do the work. I do not recall whether it has been established or not.

Mr. CULLOP. What I desire to say in that connection is that the Committee on Interstate and Foreign Commerce, which has charge of the canal business, or jurisdiction of it, has had no notification or knowledge of the establishment of the division or a station as required by that act, and until that is done there is no authority for any appropriation and no necessity for any. What we contend is that no such order has ever been made, up to this time, and therefore there is no authority for the appropriation on that subject.

Mr. FITZGERALD. The gentleman is mistaken.

Mr. MANN. Mr. Chairman, the gentleman from Indiana [Mr. CULLOP] confuses, I think, between authority and necessity in arguing the point of order. He says there is no authority or necessity. Whether there is necessity may depend upon a fact. Whether there is authority depends upon the law.

Now, the law authorizes this consolidation and this preservation of documents. Under the theory of the gentleman from Indiana, when we pass a law authorizing something to be started we can not make an appropriation until it is started, and it can not be started until after an appropriation is made. In that way you could never get anything done, because the gentleman's theory is that you can not appropriate for this until after this organization has been perfected, and, of course, the organization could not be perfected until after an appropriation is made.

Mr. CULLOP. Mr. Chairman, will the gentleman yield there?

Mr. MANN. Certainly.

Mr. CULLOP. The appropriation was made last year, and this would be merely a double appropriation for the same purpose and with the same object in view.

Mr. MANN. I say that the gentleman does not distinguish between authority and necessity. If the item was in order last year, it is in order this year. The gentleman is discussing the necessity and the authority.

Mr. ADAMSON. The item was put in in the Senate after it had been ruled out of order in this House.

Mr. MANN. Oh, I beg the gentleman's pardon. The gentleman from Georgia [Mr. ADAMSON] made a point of order on one item in this bill. The gentleman from Georgia is not omnipresent, and is not present all the time, and even while he was present in the Hall last year the gentleman from New York [Mr. FITZGERALD] offered an amendment covering this matter, and it was agreed to by the House. It was subsequently changed in the Senate, but the item was offered in the House, and no objection was made by any gentleman of the Committee on Interstate and Foreign Commerce, although it was subject to a point of order at the time and could only go through by unanimous consent.

Mr. ADAMSON. If that is true, Mr. Chairman, if the gentleman from Illinois will permit, I am sorry to hear the statement made that way. I made a point of order, and I called the attention of the committee and of the Chairman of the committee to it, and it was sustained. Then I was called away providentially, and it is hard for me to believe that my colleagues would have put it through again under the circumstances in this House.

Mr. MANN. My recollection is, being in favor of the proposition myself, I did not care to make a point of order on it, and when the gentleman from New York [Mr. FITZGERALD] offered an amendment after awhile which covered this item in a different form from what it was in the bill originally, I turned around and looked at the gentleman from Georgia [Mr. ADAMSON], supposing he would make a point of order; and as the gentleman did not, I assumed that it met his approval.

Mr. ADAMSON. Mr. Chairman, I compliment the gentleman on his recollection. He is distinguished for recalling a great many things that happened, but I suppose his imagination, coming to the aid of his recollection, will help him to recollect a lot of things that did not happen. [Laughter.]

Mr. MANN. Not this time.

The CHAIRMAN. The Chair is ready to rule. This identical language is carried in the bill of last year, the current law, and, moreover, it is authorized, it seems to the Chair, by section 5, which was referred to by the gentleman from New York. The Chair therefore overrules the point of order.

The Clerk read as follows:

In all, $16,265,393, the same to be immediately available and to continue available until expended: *Provided*, That all expenditures from the appropriations heretofore, herein, and hereafter made for the construction of the Panama Canal, including any portion of such appropriations which may be used for the construction of dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies for the construction of office buildings and quarters, and other necessary buildings, exclusive of fortifications and colliers, and exclusive of the amount used for operating the canal and for the permanent organization after the canal is opened for use and operation, shall be paid from or reimbursed to the Treasury of the United States out of the proceeds of the sale of bonds authorized in section 8 of the said act approved June 28, 1902, and section 39 of the tariff act approved August 5, 1909.

Mr. STEVENS of Minnesota. Mr. Chairman, I move to strike out the words "and colliers," in line 24, page 176.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 176, line 24, strike out the words "and colliers."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. STEVENS].

The question was taken; and on a division (demanded by Mr. ADAMSON) there were—ayes 12, noes 7.

Accordingly the amendment was agreed to.

Mr. FITZGERALD. Mr. Chairman, I ask now to return to the item of printing for the Navy Department, page 165, to which the gentleman from Alabama [Mr. BURNETT] reserved a point of order. The act of June 21, 1866, provides:

That there shall be a hydrographic office attached to the Bureau of Navigation in the Navy Department, for the improvement of the means for navigating safely the vessels of the Navy and of the mercantile marine, by providing, under the authority of the Secretary of the Navy, accurate and cheap nautical charts, sailing directions, navigators, and manuals of instructions, for the use of all vessels of the United States and for the benefit and use of navigators generally.

SEC. 2. *And be it further enacted*, That the Secretary of the Navy be, and he is hereby, authorized to cause to be prepared, at the Hydrographic Office attached to the Bureau of Navigation in the Navy Department, maps, charts, and nautical books relating to and required in navigation, and to publish and furnish them to navigators at the cost of printing and paper, and to purchase the plates and copyrights of such existing maps, charts, navigators, sailing directions and instructions as he may consider necessary and when he may deem it expedient to do so, and under such rules, regulations, and instructions as he may prescribe.

The American Practical Navigator, by Bowditch, is the particular publication purchased under this statute.

The sundry civil act of 1886 requires that all printing and engraving for the Geological Survey, the Coast and Geodetic Survey, the Hydrographic Office of the Navy Department, and the Signal Service shall hereafter be estimated for separately and in detail and appropriated for separately for each of said bureaus.

The Secretary of the Navy is authorized to publish these books for the use of navigators, and the estimate comes specifically in detail because of the requirement of the act of 1886.

The CHAIRMAN. Does the gentleman from Alabama care to be heard on the point of order?

Mr. BURNETT. I think, Mr. Chairman, that a careful reading of that statute, as I caught it, does not authorize the payment for a revised edition of a particular work of some particular author. The gentleman's first argument was that it was a limitation, and you could just as well make a limitation upon the publication of anything else, it seems to me, as to include the work of this particular author.

Mr. FITZGERALD. This particular book belongs to the Government. The copyright was purchased; also the plates; and it has been revised by the Hydrographic Office.

The CHAIRMAN. The Chair calls the attention of the gentleman from Alabama to the language establishing the Hydrographic Office, which authorizes the Secretary of the Navy to cause to be prepared in the Hydrographic Office maps, charts, and nautical books. It seems to the Chair that this is ample authority for this appropriation. The Chair therefore overrules the point of order. The Clerk will read.

The Clerk read as follows:

FORTIFICATIONS, PANAMA CANAL.

For the following for fortifications and armament thereof for the Panama Canal, to be immediately available and to continue available until expended, namely:

Surveys: For detailed surveys of the areas on the Canal Zone required for military purposes, including the cost of marking permanently the boundaries of such areas, $12,000.

Mr. MONDELL. Mr. Chairman, the item just read and the items that follow on the next page and part of page 180 all provide for fortifications for the Panama Canal. The appropriation here carried amounts to $4,870,000. In addition the bill carries an authorization of a million and a half, making the total carried by the bill and authorized $6,376,000. The total estimates were $6,769,522, so that the committee granted the sum of the estimates less $393,522.

In these items of appropriation, however, the committee does not include the item of $1,594,520 estimated for barracks and quarters, the increase of the appropriation as to the other items over the original estimate being due to the fact that supplemental estimates increased the original estimate by a million and a half of dollars.

We have heretofore appropriated for the fortification of the Panama Canal about $3,000,000. The amount heretofore appropriated and now proposed to be authorized and appropriated therefor will amount to more than $9,000,000.

This is only the beginning of appropriations the end of which no man can tell, the estimate for which has never been made by anyone.

Mr. Chairman, I am one of those who believe it is a wicked waste of the people's money to attempt to fortify the Panama Canal, but I realize that having started upon these fortifications the probability is that Congress is not at this time in the frame of mind to agree with my views. This being true, I would not feel like taking up the time of the House at this late hour of the session in discussing the matter for a single moment if I were not impelled by a strong sense of duty so to do.

I believe the time is bound to come in the no distant future when we shall rise to a realization of the fact that we have not only violated treaty obligations, but we have started on an enormous expenditure to no purpose whatever, except to our very great discredit as a treaty-keeping people and to our very great loss as a nation.

Even those who have most urged fortifications at Panama admit that if we shall lose command of the sea, in spite of all the fortifications we may build and all the guns we may plant and all the men we may maintain there, we shall under the attack of a power of the first class ultimately lose the canal.

I said in discussing these matters a year ago that I hardly felt it worth while to suggest that in fortifying we are violating our treaty obligations, because it seems as though we had come upon a time when suggestions of that kind, instead of inclining men to inquire whether it be true and if so insist our obligations be adhered to, inclines them to insist that we must do what we want to do without regard to what we may have promised to do or not to do.

In order that it may be clear that we have no authority to do this and no justification for it, I shall read just one paragraph of article 3 of the Hay-Pauncefote treaty. This is the solemn obligation binding our people:

The canal shall never be blockaded, nor shall any right of war be exercised or act of hostility committed within it. The United States shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

As the item now before us is an item for surveys only, and therefore necessary for that police protection the treaty contemplates, I have not offered a motion to strike it out and will withdraw my pro forma amendment.

The Clerk read as follows:

Purchase of land: For the purchase of land on the Canal Zone required for military purposes, $50,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I said a moment ago that this expense upon which we have started will finally aggregate a sum that no man can estimate, that no man has tried to estimate. It is true there was an estimate at one time of $25,000,000, which so frightened certain gentlemen that it was scaled down to about $15,000,000. Neither the original $25,000,000 nor the $15,000,000 embraced one-half of the cost of either the emplacements or of the guns, barracks, and quarters for the number of troops which Col. Goethals believes will be necessary. That work at the most conservative estimate will cost $50,000,000. And then our chief military advisers and the men who have been responsible for this proposition of fortification say that it will take at least 25,000 men to hold the canal against an expeditionary force.

In answer to an inquiry by the gentleman from Kentucky as to whether we should keep that number on the Canal Zone or not, Col. Goethals said, "I am a military man. If I were going into the defense of that canal, I should keep those men there all the time." Asked how long we could hold the canal against an expeditionary force, which force could only be landed if we lost the control of the sea, he said, "As long as the Russians held Port Arthur." Twenty-five thousand men on the Canal Zone would mean an expenditure, at the least possible estimate, of $30,000,000 every year so long as time shall run. Thirty million dollars laid upon and added to the military burdens of a people proclaiming themselves peace-loving, believed to stand for the reduction of armaments, and anxious to use their powerful influence in the promotion of peace!

Fifty million dollars in the first instance, fifty millions for a great naval station at one or both ends of the canal; for if we fortify the canal, there is no excuse for denying it. Fifty million dollars for the barracks and quarters, guns and emplacements, and fifty millions more for the naval stations, and $30,000,000 per annum for men, and you have the awful burden that this appropriation contemplates placing upon the American people. Gentlemen have risen to protest against the reduction of items necessary for the peace and comfort of our people in the development of our Nation. The committee has pared here and there and lopped off everywhere, in order that we may throw away five millions of the people's money to no good purpose in the violation of treaty obligations, and to learn after it is all done that it is utterly wasted.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. CANNON. Mr. Chairman, I desire just two minutes of the five that are at my disposal to say that I always listen with interest to the gentleman from Wyoming [Mr. MONDELL]. What he says is very interesting, but if carried legitimately and logically to its ultimate conclusion, we would pull down the fortifications at every harbor, on every coast, disband the Army and abandon the Navy, and let the peace that passeth all understanding control the situation. I do not know whether or not it is wise to fortify the canal. From the best advice that we could get, this Congress concluded to do it. That is behind us. If I held the same view that the gentleman does, if it is dangerous and is going to cost all of the men and all of the money that he says it will cost, then I should be in favor of filling up the canal. I say this much just for self-protection.

Mr. SLAYDEN. Mr. Chairman, when the proposition to construct the canal across the Isthmus of Nicaragua was being discussed I was one of the most ardent and perhaps ill-informed advocates of the project to be found in this entire country. I believed that it would contribute quickly and greatly to the prosperity of this country to have a transisthmian canal. When it was proposed to shift the site of the canal from Nicaragua to Panama I was so impressed with the importance of the canal that I was persuaded to abandon my first love, Nicaragua, and to consent to the shifting upon the theory that a sea-level canal would be constructed. When that was abandoned I began to lose faith in the project. I looked further and further into it, and long ago reached the conclusion that in a commercial way the canal would not, certainly in my time nor perhaps in that of the next two or three generations, be a good investment. It has cost such huge sums of money and will cost so much annually to maintain it that it will be quite impossible in the lifetime of any man in this House, no matter how rapidly commerce may grow, for us ever to get a reasonable interest upon the investment.

Another argument that influenced and largely controlled my votes in the legislation that preceded the construction of the canal was the argument so repeatedly made on the floor of this House and in the Senate that if we would only dig the canal it would lessen our naval expenses, because it would double the effectiveness of the Navy which we had for the reason that we could then quickly transport our Pacific Coast Navy to the Atlantic coast to meet these imaginary foes in these imaginary wars that in the minds of some gentlemen in this House are always threatening us. Also, on the other hand, when a nation of 45,000,000 people, at this moment torn by internal political dissension, without the highest credit in the financial markets of the world, threatened us we could carry the fleet from the Atlantic to the Pacific coast. The whole theory about it has now changed.

It not only has not doubled the effectiveness of our Navy, it not only has had no tendency to lessen the annual appropriations to support the Navy, but we are seriously told that we must double our Navy now because we have to defend the canal. We are compelled to have as much navy at each end of the canal as previously we had on both oceans. We were led to believe it would not be necessary for us to maintain such huge naval forces when we got the canal and the means of communication.

Mr. Chairman, I hope the purchase of land will not be authorized in this appropriation bill. I believe that military policies have been adopted that will cost untold sums of money and that are altogether unnecessary. [Applause.]

Mr. MANN. Mr. Chairman, I have noticed a disposition of late on the part of many gentlemen in and out of Congress to roast the Government for its attitude concerning the Panama Canal. I think no one in this House, when we passed the original canal act, believed that it would be a financial benefit to the Government. It was not constructed for the purpose of getting a return upon the money, but every time anything has been done concerning the canal, after the attitude of the Government has been settled, various gentlemen in and out of Congress proceed to give comfort to people abroad by denouncing the policy of the Government. After a policy has been settled I would much prefer to hear some of these gentlemen defend that policy. Almost every speech that is made on the subject is made by those ardent gentlemen who never know when they are whipped, and after they have been beaten time and time again they continue to disturb the air by continuous and constant criticism. If I had had the same favors from the Army Establishment as have been showered upon the States of Wyoming and Texas, I would be ashamed to criticize the policy of the Government concerning the Army at the Panama Canal. [Applause.]

The Clerk read as follows:

Seacoast batteries: For the construction of seacoast batteries on the Canal Zone, $2,365,000.

Mr. MONDELL. Mr. Chairman, the gentleman from Illinois [Mr. MANN], instead of discussing the matter under consideration, has indulged himself, as he occasionally does, in scolding Members. He talks about our opposing the policy of the Government.

What is the Government? Why, the Government is the people. We represent the people. The gentleman talked about settled policies. No policy is ever settled until it is settled right. The gentleman suggests we are criticizing some one. I am criticizing no one, unless the argument I attempt to make may be a criticism of those of my colleagues who did vote to fortify the canal. I believe in the canal, and I am not disturbed that it will not prove a paying proposition from a financial standpoint; but I protest, in the name of the people, who do not understand what we are doing, against the burdens we are laying upon them. Mr. Chairman, I dream no dreams of universal peace. I realize that Governments are founded on force and that in the last analysis men may break treaties if their lives and that of their nation depends upon it, but here is a proposition in regard to which the interests of all the world is on the side of peace. Here is a great work that all the world wishes well; all that the world desires in regard to it is that it shall be kept open and the use of it allowed upon equal

terms, to which we are pledged. And from the first day our people began to talk of piercing the Isthmus every American President and every great statesman that studied the question and wrote and spoke of it, down to and including the predecessor of the present occupant of the White House, declared in terms unmistakable that it was our duty and intent, and the only wise policy in building this great waterway and opening it to the commerce of all the world, to keep it free from frowning guns and control it in the interest of commerce; and only about three years ago did we finally depart from that view and attitude which our people had taken and assumed——

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. MONDELL. In a moment. And assuming an attitude of frenzied jingoism and bullying might, proceeded to plan fortifications. It is proposed to spend millions enough every 15 years as long as this old earth shall swing to build the canal, pouring out enough of the people's money in that time to build the canal in a senseless plan of fortifying it on the foolish theory we can in that way defend it. [Applause.] Who wants to take it? We could not give it to any nation on earth to-day and lay upon them the burden of maintaining it, but all the world applauds the progressiveness and wisdom of our people, who have spent their money in building it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SLAYDEN. Mr. Chairman, if I had been disposed to criticize the attitude of the Government in connection with the canal, I could have found abundant text in almost every act connected with it since we began the work, of which I am not particularly proud, by taking the zone from a country which held our solemn guarantee that we would protect its integrity and its sovereignty, and including, in my judgment, the deliberate violation of a solemn treaty that ships passing through the canal should be treated on terms of equality. But I was not criticizing that. I was directing my criticism to the fact that there was provision here for the undertaking of enormous, unnecessary, inexcusable military plans which are not needed for the defense of the canal.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. SLAYDEN. In one moment—and incidentally I desire to call attention to the fact that when we were ready to make the original appropriations for canal construction our military advisers told us that it would double the effectiveness of our Navy, that we would have to build fewer battleships, that we would have to spend fewer hundreds of millions of dollars for the Navy, because we could shift fleets from one ocean to the other. The fact that such arguments were made can not, I suppose, be successfully challenged. Now I yield to the gentleman.

Mr. MOORE of Pennsylvania. Does the gentleman know of any efforts that are being made now by governmental agencies for the development of American commerce through the canal?

Mr. SLAYDEN. I did not quite catch the gentleman's question.

Mr. MOORE of Pennsylvania. The gentleman has spoken of the canal as a military enterprise and objects to the expenditure for fortifications, and so forth. Does the gentleman know whether the Government is putting forth, or whether Congress has authorized the Government to put forth, any efforts to develop American commerce through the canal?

Mr. SLAYDEN. I know it is true that the Government is putting forth efforts to develop our commerce with Central and South America because I have recently had a talk with some of the officials of the State Department, and, although I may sometimes doubt the wisdom of some of their methods, I concede them perfect sincerity in their position.

Mr. MOORE of Pennsylvania. The State Department, of course, is dealing with the subject generally; but does the gentleman think the United States commercial organizations are being considered in the matter of South American trade, as are the organizations of Germany and Great Britain who are competing in that market?

Mr. SLAYDEN. Are they being considered by our administration?

Mr. MOORE of Pennsylvania. Is there any governmental move to promote commerce?

Mr. SLAYDEN. I think there is; yes.

Mr. MOORE of Pennsylvania. I know of none.

Mr. SLAYDEN. My information comes from some of the officials of the State Department, and I assume that they are loyal to American commerce and anxious to see it developed.

Mr. MOORE of Pennsylvania. The incorporation of a chamber of commerce that might have considered the proposition was attempted recently, but it was not recognized by Congress. I think the gentleman will find that throughout the proceedings of Congress the whole enterprise has been treated as a military enterprise rather than a commercial enterprise, which the country originally intended it to be.

Mr. SLAYDEN. I think the military feature of the canal has been overemphasized. I have believed for some time that the canal would not give us commercial benefits commensurate with the cost. I have changed my views in that respect completely, I will say to the gentleman from Pennsylvania. I believe, as the gentleman from Pennsylvania evidently does, that more attention to trade and less to soldiering would increase our commerce and not imperil our country.

Mr. CULLOP. Mr. Chairman, the gentleman from Texas [Mr. SLAYDEN] is correct when he says that the Panama Canal will not be a self-sustaining institution, or, rather, will be an expensive institution for this country for a number of years. The best authority that we have upon that subject shows that it is true that it will not be self-sustaining, in all probability, for 25 years, and appropriations constantly will have to be made in order to sustain the operations of the canal. This fact no one can successfully deny. But that does not necessarily show that it will not be a benefit to the United States. The results to the people of this country from the building of the Panama Canal will be accomplished under the building up of the trade of the country, its commerce, and its manufacturing, and its other interests. In these lines of industry great results must necessarily follow and redound to our great benefit. It is proposed and very safely predicted, I undertake to say, that very large advantages will flow to this country from the building of the Panama Canal. And doubtless the Government has never entered upon an enterprise in all its history that in the end will prove so advantageous to it as will the construction of this waterway. It will make new markets for our products, and furnish new and cheaper opportunities to purchase what we are compelled to buy from other countries. It will extend our markets for productions and extend our industrial operations, furnish sale for goods, and employ additional labor, building up new enterprises, and expanding the prosperity of our people. In this respect no one can approximate the value of this project to our people.

We should not underestimate its great benefit, not only to our country but to the world. Every country will enjoy its benefit; every people will profit by reason of its construction. It may not earn money for the Public Treasury, but it will swell the prosperity of the whole people and promote the welfare of the entire Nation, and thereby remunerate this Government for the great outlay of treasure expended in its construction.

Now, Mr. Chairman, the question of the fortification of the Panama Canal is one, doubtless, upon which we can expend large sums of money uselessly, and it has been forcefully contended from very able sources, well posted upon this proposition, that we were without authority to fortify the Panama Canal. But that question has been settled by Congress, and from the policy adopted we can not depart. It is now the settled policy. At least, the policy of so doing is one that may have been doubted. It is now and ever has been to the interest of every nation on the face of the earth to keep the Panama Canal open. The dangers that have been apprehended by some on the floor of this House as to the closing of the canal by some hostile nation are without foundation. It is to the great interest of every nation on earth to see that the Panama Canal is kept open, and the large expenditures made for fortifications are made doubtless without any necessity whatever, and more for the sustaining of a jingo policy than one of necessity for the protection of that great institution.

It is, however, necessary to guard well the expenditures made in connection with the proposition of erecting the fortifications. Grave abuses must be prevented, if possible, in connection with the operation of the Panama Canal, and Congress should guard with especial interest this matter every time the question is presented to it.

What nation would dare attack the Panama Canal? What nation would attempt to close it? What nation would oppose the free and unrestricted use of the same? If any nation so attempted, every other country on earth would immediately become its foe, every nation on earth would immediately become arrayed against the nation that would attempt such an act. It would menace the commerce of every country on earth and therefore no nation on earth would undertake such a responsibility or invoke such a displeasure.

The CHAIRMAN. The time of the gentleman has expired.

The Clerk read as follows:

Electric light and power plants: For the purchase and installation of electric light and power plants for the seacoast fortifications on the Canal Zone, $173,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Wyoming moves to strike out the paragraph.

Mr. MONDELL. Let us have the amendment reported so that we will know what it is.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wyoming.

The Clerk read as follows:

Strike out, page 179, line 5:
"Electric light and power plants: For the purchase and installation of electric light and power plants for the seacoast fortifications on the Canal Zone, $173,000."

Mr. MONDELL. Mr. Chairman, I referred a moment ago to the fact that up until within a very brief period no one at home or abroad had ever dreamed of the fortification of this canal when built.

Its fortification is squarely in the teeth of our treaty obligations. Of course Great Britain does not object, for by so doing we relieve her from responsibility.

What will happen if we fortify? The canal becomes at once the vulnerable point of attack for any enemy that we might have—a veritable heel of Achilles, the point where we may be attacked most readily and where the injury, compared with the risk to the enemy, will be greater than at any other point. The moment the canal is attacked, it is closed, not only to our commerce and ships of war, but also to the commerce of all the world.

A single hostile battleship in the Caribbean and off the Bay of Limon, and the canal is sealed. The chip is on our shoulder. We invite our enemy to strike—not for the purpose of securing the canal; no one wants to own it; but for the purpose of damaging us, for the purpose of closing it, for the purpose of taking it and, in the end, if given back, to exact from us an indemnity equal to its cost.

Col. Goethals told the committee the other day, what other men have said from time to time, that no attack would be made upon the canal until we lost command of the sea, and therefore all these expenditures for fortifications and for soldiers are only in the event that we are beaten in the Caribbean and on the Pacific. And if we are beaten, any power of the first class, having more transports than we, being as near the canal—at least the eastern powers—as we are, having secured control of the sea, can land any number of men on the Canal Zone. These men can be landed far from the fire of any gun we can plant. Upon both sides are harbors readily available; and once landed, there is no difficulty of approaching the canal with an expeditionary force. Col. Goethals says the best he promises is that, with 25,000 men, we might hold the canal as long as the Russians held Port Arthur—no longer, for the enemy in command of the sea can reenforce himself, while we, being deprived of that command, can not land a man or a pound of provisions or ammunition.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I rise to oppose the motion of the gentleman from Wyoming [Mr. MONDELL] to strike out the paragraph.

The gentleman from Wyoming a few moments ago said that I scolded Members of the House in the remarks that I made. That may be true; I do not know. It is very difficult to tell how it strikes other people, but I am very certain that I did not scold as many Members of the House as has the gentleman from Wyoming. He then proceeded to deliver a veritable diatribe against the House itself and its action and its attitude and its policy; not only the House, but the House and the Senate; and not only the House and the Senate, but the House, the Senate, and the President—the whole policy of the President.

Being new to the study of the subject of the canal, the gentleman from Wyoming has two or three times reiterated and again stated that no one dreamed of fortifying the canal until three years ago. That is because that is the first time the gentleman from Wyoming had had his attention attracted to the canal at all.

The fact is that the first bill that was introduced into the Congress on the subject of the Government constructing the canal, introduced by Col. Hepburn, chairman of the Committee on Interstate and Foreign Commerce, providing for a canal to be constructed by the Government at Nicaragua, provided in the first bill, almost in the first line, that it should be constructed, fortified, and defended by the United States. But the gentleman from Wyoming had not waked up at that time and did not know that a canal was under consideration, and it was not until the gentleman from Ohio, Gen. Keifer, made his celebrated speech of a few hours long, a few years ago, on the subject of fortifications that the gentleman from Wyoming learned that there was a canal to be constructed or fortified. [Laughter.]

The CHAIRMAN. The question is on agreeing to the amendment proposed by the gentleman from Wyoming [Mr. MONDELL].

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Searchlights: For the purchase and installation of searchlights for the seacoast fortifications on the Canal Zone, $285,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 179, by striking out lines 8, 9, and 10.

Mr. MONDELL. Mr. Chairman, I fear that in five minutes I shall not be able to answer fully the very logical and convincing argument of the gentleman from Illinois [Mr. MANN] against the propositions for which I am contending, which amount, as I recall them, to the statement that some one several years ago introduced a bill proposing fortifications for the canal. What I said was, and I repeat it, that every President, every statesman, who considered the subject, down until a very few years ago, discussed the matter from the standpoint of neutralization, and never until the matter was taken up three or four years ago, or a short time before that, did anyone seriously consider fortifications. I recall how that bill that the gentleman refers to was received, and that part of it was not seriously considered by anyone with whom I talked.

Mr. MANN. It passed the House, anyhow.

Mr. MONDELL. I want to say to the gentleman that I did study the canal proposition before the time to which he refers.

Mr. MADDEN. Will the gentleman yield?

Mr. MONDELL. I have only five minutes, and I want to continue the discussion.

The CHAIRMAN. The gentleman declines to yield.

Mr. MONDELL. In the last five minutes which I used I referred to the fact that Col. Goethals had said that, do what we might, spend what we may, we can not hold the canal against a strong foreign force, sufficiently strong to take the sea and land forces from transports.

Now, what will happen if we do not fortify? We are pledged not to fortify. It seems to me no honest man can read that treaty without being convinced that it was not intended that we should fortify the canal, and that we relinquished all thought of it, if we ever had any thought of it, when we signed and ratified that treaty.

What if these items are now stricken from the bill and no further steps taken toward fortifying the canal? What would be the condition? We would be under the Hay-Pauncefote treaty, under which Great Britain stands pledged to use all of her forces for the purpose of preventing any act of war within the Canal Zone.

Mr. MANN. No; she does not.

Mr. MONDELL. For the purpose of preventing bombardment, for the purpose of keeping it neutral, free, and open to the ships of all the world; so that as our treaty obligations now stand, the two greatest nations in the world are pledged to the defense of the canal and pledged to keep it open to commerce at all times. All the balance of the world is ready to join us in pledging the dedication of the canal to peace and commerce under our management.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. TOWNER. Mr. Chairman, it occurs to me that it must be evident to any gentleman who will think about the proposition that generalizations are not what this House would like to consider now. It is easy to say that we built the canal exclusively for commercial purposes, but gentlemen should remember that if it had not been for the *Oregon* being on the Pacific coast and that the protection of our eastern seacoast was deemed to be vital to the safety of our country, and if it had not been that the *Oregon* made that memorable 10,000-mile voyage, we would not yet have acquired the Canal Zone and built the Panama Canal.

In the minds of all the people who have thought about it, the protection of the country and the commercial interests of the country have been blended, and I think that is true with regard to the consideration of the question whether the canal should be fortified or not.

It is easy to say, as the gentleman from Wyoming has said in his speech, that no one conceived that this canal should be fortified when its construction was begun. Yet I have no doubt that if, out among the citizenship of the land, you had gone to anyone and said to him, "Why, if we build a canal we will have to fortify it," he would have said, "Yes." It is not the fact

of protection and fortification that now stands in our eyes as an impediment. It is the enormity of it.

I think there can be no possible question that having invested $400,000,000 in that which is now the property of the United States that it is as well entitled to protection as any other part of our coast line or any other property of the United States.

Gentlemen say that we should not go so far; but how far ought we to go? We ought not to leave it entirely unprotected. We must do something in that regard, and how are we going to do otherwise than to take the opinions of men who carefully considered it and do that which is just and best for us in the premises?

Gentlemen might make the same speech and the same objections against fortifications on other of our shores to the east and to the west. Our present land fortifications are manifestly inadequate and will always be inadequate. There will never be a time when an army can not be landed and our possession of the coast lost if our Navy be swept from the sea. The same objections might be made against the fortification of any part of our coast that is made against the fortification of the Canal Zone. Let us view this not only seriously, but also patriotically. Let us act for the real interest and dignity of the Nation, and if it shall cost millions of dollars to protect the canal, we will have to pay millions of dollars. [Applause.]

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. SHERLEY. Mr. Chairman, I move to close debate and amendments thereto.

The CHAIRMAN. The gentleman from Kentucky moves to close debate on the paragraph and amendments thereto.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wyoming to strike out the paragraph.

The question was taken, and the amendment was lost.

The Clerk read as follows:

Sanitary clearing: For sanitary clearing, filling, and drainage in vicinity of camps, posts, and defensive works on the Canal Zone, as follows:

Margarita Island——

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. The gentleman from Wyoming stated in the course of his remarks that until three years ago no one had ever heard of the question of fortifying the canal. I want to state for the information of the gentleman from Wyoming that the party of which he is an honored member declared in favor of the fortification of this canal in a national convention held in Philadelphia in 1900. On the subcommittee on resolutions, of which the chairman was Charles W. Fairbanks, there were Senator Davis, of Minnesota, and Senator Carter and your humble servant and others. The work of writing the plank on the construction of the canal was put in my hands. I wrote this plank, which was debated. The plank is as follows:

We favor the construction, maintenance, operation, fortification, and protection of an Isthmian canal by the Government of the United States.

[Applause.]

The Republican Party went to the people of the United States on that platform, and it was indorsed, and Mr. McKinley was elected the President of the United States for a second term, and legislation has been enacted in conformity with the pledge of the Republican Party and is now being carried forward to a successful conclusion.

It would be folly to leave the canal without protection. We are beginning to build a canal 5 miles out into each of the oceans, and we are digging a channel beginning 5 miles from the shore 500 feet wide and 42 feet deep, and no ships can enter the canal without first entering this channel. Unless we have the channel protected by guns built on the heights overlooking the channel, any ship of any foreign nation unfriendly to the United States could enter the canal without interruption.

But as it is to-day, with the fortifications we are now constructing, and which will be built in good time, no ship can enter this channel without coming under the guns of these fortifications. It is the right and the duty of the American people to insist upon every precaution being taken that can be given by the construction of fortifications. [Applause.]

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. MOORE of Pennsylvania. Was the thought underlying the plank in the platform of 1900 favorable to military or commercial development?

Mr. MADDEN. The thought was that when the canal was constructed it would develop the commerce of the United States and the world. The secondary thought was that when we had expended the money of the American people in the construction of that waterway, when we should have uninterrupted access to the two oceans by the Navy of the United States, we could protect the property interests of the Pacific coast as well as the Atlantic coast.

Mr. MOORE of Pennsylvania. But the development of commerce was the actuating first cause?

Mr. MADDEN. The development of commerce was the first consideration, and the only way in which it was believed commerce could be protected in its development was to protect the waterway connecting these two great oceans. [Applause.]

Mr. FITZGERALD. Mr. Chairman, I move to close debate on the paragraph and all amendments thereto.

The motion was agreed to.

The Clerk read as follows:

For filling swamp in rear defensive works, $180,000.

Mr. BARTHOLDT. Mr. Chairman, I move to strike out the last word. I merely wish to call the attention of the House to an international agreement which seems to have been entirely forgotten, but when reminded of that agreement, the Members will better know what they are doing when they are voting millions and millions of dollars for the fortification of the Panama Canal. At the second Hague conference, in 1907, an agreement was entered into by all of the signatory powers—it was a unanimous agreement—that all cities, towns, and unfortified places should be immune from bombardment. In other words, the guns of the enemy should never be directed at a city, village, town, or an unfortified place, and this agreement was signed and sanctioned by all of the nations who were represented at The Hague. If we now proceed to fortify the Panama Canal we are actually inviting the attack of the enemy. If it was unfortified the enemy would respectfully halt in front of that great international agreement, providing they wanted to respect it, and so far there are very few instances in history, in spite of the assertions of some of our war friends to the contrary, where such agreements have not been honorably respected. In other words, we say to the world we will put this canal in such a position that it can not be protected hereafter by the international agreement, and we invite the attack of the world by fortifying it. I wonder whether this House and the Senate of the United States have taken into consideration the existence of that international agreement, and if they have, whether these appropriations are made in defiance of that agreement or whether it is the intention of the American Congress to go on record as willingly violating a solemn compact to which the United States is a party.

Mr. FITZGERALD. Mr. Chairman, I move that all debate on the paragraph and all amendments thereto be now closed.

The motion was agreed to.

The Clerk read as follows:

For clearing and improving permanent post site and drill ground at Miraflores, $30,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I desire to carry a little further an idea suggested by the gentleman from Missouri [Mr. BARTHOLDT]. He called attention to the fact that the canal, if neutralized, would halt at its gate any hostile fleet. Aye, more than that. If any hostile fleet was so forgetful of the international obligations of its Government as to flaunt all the world in the face and attempt to take an unfortified canal, we would retake it unless we were beaten to a condition where we could neither hold nor take. And when we did retake it, under all of the laws of war and with the sanction of all the world, we would visit a judgment upon those who so violated international laws that all the world would ne'er forget. Unfortified, it is not a prize of war if taken. On the contrary, it would place an awful obligation on those who attempt to take it. Fortified, it is a prize of war, only to be returned under the laws of war at the cessation of hostilities on the payment of all that it cost and more. The gentleman from Iowa [Mr. TOWNER] says that we would never have constructed the canal but for the historic voyage of the *Oregon* around the Horn, and we are going to fortify it so that if we ever do have a war we will again have to send our battleships around the Horn. [Applause.] There is no naval or military man on earth whose judgment any man will stand for who will not tell you that the canal is sealed the moment a declaration is made by any great power, and no great power is going to make a war declaration without at least one battleship at one portal of that waterway. Talk about defending it! You are sealing it. You are depriving yourselves and all the world of the use of it, and you are spending the money of the American people like water down there amid the swamps and hills of the Tropics. If the American people could understand what this means, how utterly without sense or judgment it is, how impotent it all comes to be, none of us would vote for a dollar there. We would do the thing our treaty obligates us

to do, namely, plant a few quick-firing guns around the locks, keep a few marines there, and police it against any ordinary marauding force, and, through international agreement or without it—for we have enough treaties—dedicate it forever to the peaceful commerce of all the world.

Mr. SHERLEY. Mr. Chairman, I move to close debate on the paragraph and all amendments thereto.

The motion was agreed to.

The Clerk read as follows:

Armament of fortifications: For the purchase, manufacture, and test of seacoast cannon for coast defense, including their carriages, sights, implements, equipments, and the machinery necessary for their manufacture at the arsenals, to cost ultimately not to exceed $2,506,000, $1,000,000: *Provided*, That the Chief of Ordnance is authorized to transfer to and use in the fortifications of the Panama Canal one 16-inch gun and carriage, procured, or to be procured, out of appropriations heretofore made under armament of fortifications for continental United States.

Mr. MONDELL. Mr. Chairman, this item is not for fortifications, but for guns.

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. MONDELL. I move to strike out the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, pages 179 and 180, by striking out lines 18 to 25, inclusive, on page 179, and lines 1 and 2 on page 180.

Mr. MONDELL. Mr. Chairman, this paragraph carries an appropriation of $1,000,000 and authorizes the expenditure of $2,506,000 for guns, not for fortifications. Even though gentlemen are not willing to vote to dispense with the building of fortifications, there certainly is not any such rush about the building of guns for those fortifications that we need to make this appropriation at this time. Gentlemen may wonder why I am so insistent upon taking the time of the House, which does not seem to agree with me in this matter. It is because I have studied it, have read about everything that has been said on the subject by those who favor and those who oppose fortifications, and taking that all together these facts are to me so patent that he who runs may read: That the canal is safe from all assaults with a small police force and without the expenditure of a single dollar for fortifications or soldiers other than those necessary for such a force; that if fortified it is open to assault and will be assaulted if we have a war, and if assaulted by a great nation that controls the sea will be taken in spite of our fortifications; that neutralization costs not a cent; that fortifications will cost every 15 years, if we carry out the present program, enough to build another canal. We could afford to lose the canal, which we would not if the canal is not fortified, at the end of 50 or 100 years and take it back again, which we could do after preparation against any nation on earth rather than spend so much for fortifications. If we become so weak and pusillanimous that we could not take the canal if anyone should dare attack it, we will never be able to hold it, fortifications or no fortifications. I ask Members who do not believe in rushing headlong into expenditures without at least some thought of what it leads to, to vote to strike out this item.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOBSON. Will the gentleman yield for a question before he sits down?

Mr. MONDELL. I have not the time.

Mr. SHERLEY. Mr. Chairman, I move that all debate on this paragraph and amendments thereto be now closed.

The CHAIRMAN. The gentleman from Kentucky moves that all debate on the paragraph and all amendments thereto be now closed.

The question was taken, and the motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wyoming.

The question was taken; and on a division (demanded by Mr. MONDELL) there were—ayes 22, noes 72.

So the amendment was rejected.

The Clerk read as follows:

For the purchase, manufacture, and test of ammunition for seacoast cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenals, $575,000.

Mr. McCALL. Mr. Chairman, I move to strike out the last word. The gentleman from Iowa [Mr. TOWNER] has referred to the great cost of this work and the necessity for defending it. That suggests to my mind the cost of fortifications. I understand that the testimony taken before the Committee on Appropriations showed that the War Department estimated that the force to be employed in time of peace for the defense of the canal was 8,300 men. The cost of the employment of this force will amount to about $10,000,000 a year, which would be the interest charge on about $500,000,000 of Government bonds. That is, the annual cost of maintaining that force, which would more than equal, or would about equal, the interest charge on the cost of originally building the canal. But I understand further that Col. Goethals testified that there should be from 20,000 to 25,000 men there, and that as a military proposition he would have those men there all the time, because of the difficulty of getting reenforcements there at the beginning of a war.

Mr. SHERLEY. I have so much respect for the gentleman from Massachusetts that I do not want his statement to be inaccurate touching Col. Goethal's testimony. I do not think a reading of that testimony warrants the statement that he thinks we ought to keep 25,000 men there.

Mr. McCALL. I would ask the gentleman if Col. Goethals did not expressly state that to the committee and if it is not in the printed testimony?

Mr. SHERLEY. I do not think so; and in order that I might not be mistaken I have twice this morning reread his testimony. He stated in his judgment we should have men there necessary for the holding of the canal for any period against a force that had been landed there when we had lost control of the canal.

But in response to a direct question of mine, narrowing it right to the proposition of whether he advocated the keeping of that number of men there, he answered, "No."

Mr. McCALL. Mr. Chairman, I am entirely willing to let the matter rest on the reading of his testimony. The explanation of Col. Goethals, in reply to the gentleman from Kentucky [Mr. SHERLEY], did not clear up his previous statement in any way whatever. He distinctly stated he thought there should be from 20,000 to 25,000 men there, and, in view of the difficulty in getting reenforcements at the beginning of war, when, of course, an enemy would be on hand to attack, he thought they should be kept there. That is the way I read his original statement, and I do not think that original statement was cleared away by his answer to the gentleman from Kentucky [Mr. SHERLEY].

Now, if it should be necessary to keep that number of men there all the time, you can see the annual cost of maintaining the canal would be two or three times over the interest charge on the Government's investment in it. If we fortify the canal, and it is taken away from us in time of war, then it forms an admirable fortified base for our enemy to use and from which to attack us upon either of the two great oceans. And if it is taken away from us in time of war——

Mr. HOBSON. Will the gentleman yield?

Mr. McCALL. I will in a moment.

And if it is taken away from us in time of war, and it has been well fortified by us, then it will be a matter of great difficulty for us to get it back again.

Mr. HOBSON. My question is, simply, that all of this is on the assumption that we lose control of the sea; but if we have control of the sea is it not clear that the canal will be available to us and not available to the enemy and therefore of great advantage?

Mr. McCALL. Of course, if we have control of the sea, then we could defend the canal in precisely the same way as England defends the Suez Canal. She has control of the sea, and she does not defend the Suez Canal with a single gun in any fort.

This canal is being built primarily for commerce, and we are changing it into primarily a war proposition. I believe that, if the canal is neutralized by the governments of all the great nations, in view of the sacrifice of this Nation in making the gift to civilization of this great canal, the nations of the world will make it a highly penal act for any nation to violate its neutrality. The canal will be protected by the agreement of the great nations and by the sense of justice of the world, and it will be far safer than if we make it the spoils of war by converting it into a military proposition by diverting it from the purpose for which it should have been created as a highway for the commerce of all nations, and by lining it with cannon from one end to the other. [Applause.]

Mr. FITZGERALD. Mr. Chairman, I was one of those who opposed the fortification of the Panama Canal. The matter was thrashed out in Congress and settled. The country has proceeded to erect the necessary defensive works in accordance with the determination of Congress. This bill carries the appropriation necessary to continue the work under way. It is futile to waste time now on these items, discussing whether the country has the power to fortify, or whether it was advisable to fortify, or whether an international arrangement could or could not have been made. If the United States is to abandon the policy of fortifying the canal, it must be done differently than it seems to be thought of here. I hope gentlemen will not take further time unnecessarily in academic debate on these items, but will permit those of us who have stayed here late at night

to have this bill finished so that we may turn to other work that is waiting.

I move to close debate on the paragraph and all amendments thereto.

The CHAIRMAN. The gentleman from New York [Mr. FITZGERALD] moves to close debate on the paragraph and all amendments thereto.

The motion was agreed to.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

Fire control: For the construction of fire-control stations and the purchase and installation of accessories therefor, $200,000.

Mr. NORRIS. Mr. Chairman, I move to strike out the last word.

I was one of the Members of this House, at the time the question was before it of fortifying the canal, who was opposed to the fortification. I think we made one of the greatest mistakes of the present age when we decided to fortify it. But, Mr. Chairman, that question was thrashed out then, and after a long debate and after full consideration, both in the House and in the Senate, it was decided that we should enter upon the fortification of the canal and of the Panama Zone. Money has already been spent and some fortifications erected. It would be absolutely foolish, it seems to me, and even unpatriotic, though we thought we had made a mistake when a majority had decided it should be fortified, that we should try to prevent the proper and adequate carrying out of that policy now.

I am in favor, Mr. Chairman, of properly fortifying it, of going to almost any limit to properly fortify it, although I would be glad to vote to-day for a reopening of the consideration of the question, to change our policy, and to abandon entirely the fortification of the Panama Zone. After all, I do not know but that in the end it will work out all right, because it is developing now, as those of us who were opposed to the fortification said it would, that it is costing dollars where those who favored it said it would cost cents, and this question of armament, this question of building up great navies for the purpose of destroying property and taking lives, will in the end be settled, I believe, by the commercial interests of the world, realizing that as a matter of taxation alone such a policy will break down the taxpayers and make paupers of all the civilized nations of the world, and eventually they will wake to the fact that even though they may not be moved by considerations of humanity, they will be moved by considerations of dollars and cents to refuse to follow this foolish, this unnecessary expenditure of public money all over the world for the purpose of fortifying, for the purpose of building up useless navies for the destruction of property and the taking of human life.

But as long as we have decided to fortify, as long as we have decided to take any particular port and fortify it, we ought not to do it in any slipshod or half-way manner. The minute we begin to fortify the Panama Canal we invite the attack of any nation that is at war with us, and it would be silly, it seems to me, to build any fortification that is not ample, that is not absolutely the best that modern ingenuity can devise. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SHERLEY. Mr. Chairman, I move to close all debate on the paragraph and all amendments thereto.

The CHAIRMAN. The gentleman from Kentucky [Mr. SHERLEY] moves to close all debate on the paragraph and all amendments thereto. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

In all, specifically for fortifications and armament thereof for the Panama Canal, $4,870,000.

Mr. MONDELL rose.

Mr. SHERLEY. Mr. Chairman, all of these items are in accordance with the estimates that have been submitted, and they have been carefully considered.

Mr. Chairman, I now move to close debate on the paragraph and all amendments thereto.

Mr. MONDELL. Mr. Chairman, I hope the gentleman will amend that motion. I think we can get along just as well if we consider these matters.

The CHAIRMAN. The gentleman from Kentucky [Mr. SHERLEY] moves to close debate on the paragraph and all amendments thereto.

Mr. MONDELL. Mr. Chairman, I move to amend that and close debate in 10 minutes.

The CHAIRMAN. The gentleman from Wyoming [Mr. MONDELL] moves to amend the motion by providing that debate on the paragraph and all amendments thereto close in 10 minutes.

Mr. BUCHANAN. Mr. Chairman, there is an amendment of great importance to the labor people of this country that is desired to be offered at this time, and I hope the gentleman from Kentucky will withdraw his motion.

The CHAIRMAN. The gentleman from Illinois [Mr. BUCHANAN] will have an opportunity to offer his amendment.

Mr. SHERLEY. Mr. Chairman, I do not desire to prevent the offering of an amendment or a reasonable amount of debate on it, but I think the committee has been unusually indulgent in permitting a lot of academic talk to be had here in the consideration of this bill.

Mr. BUCHANAN. Mr. Chairman, I want to offer an amendment in which the labor people of this country are very much interested.

Mr. SHERLEY. Mr. Chairman, in order that the gentleman from Illinois [Mr. BUCHANAN] may offer his amendment and in order that there shall be debate on it, I move that all debate on the paragraph and all amendments thereto be closed in 15 minutes.

The CHAIRMAN. The gentleman from Kentucky [Mr. SHERLEY] moves that all debate on the paragraph and all amendments thereto close in 15 minutes.

Mr. MONDELL. Mr. Chairman——

Mr. SHERLEY. That motion is not debatable. Let us have the regular order, Mr. Chairman.

The CHAIRMAN. The question is on the motion of the gentleman from Kentucky [Mr. SHERLEY], that all debate on the paragraph and all amendments thereto be closed in 15 minutes.

The motion was agreed to.

Mr. PEPPER. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Iowa [Mr. PEPPER].

The Clerk read as follows:

Amend, at the end of line 11, page 180, by adding the following: "*Provided*, That no part of the appropriations herein made shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States Government who shall make or cause to be made with a stop watch or other time-keeping device a time study of the movements between the starting and completion of any job of any such employee; nor shall any part of the appropriations herein made be available to pay any premium or bonus or cash reward to any such employee in addition to his regular wages, except for suggestions resulting in improvement or economy in the operation of any Government plan."

Mr. FITZGERALD. I reserve a point of order on that amendment.

Mr. PEPPER. Mr. Chairman, this amendment is offered as a result of the work of the Committee on Labor, following an investigation that took place in the first part of the present Congress of the so-called Taylor system of shop management.

There is now on the Calendar of the House a bill which I introduced, reported favorably by the Committee on Labor, which contains provisions similar to those of the amendment just offered.

Mr. FITZGERALD. I withdraw the point of order.

Mr. PEPPER. The question of the merits of this amendment has been thrashed out for nearly a year. The laboring men of this country are interested in the proposition. The Government has undertaken to establish in its manufacturing establishments the so-called scientific shop management. The committee which investigated the subject found that the chief objection to this system consisted in the items referred to in this amendment. We are asking here that the appropriations which are available in the manufacture of guns and various kinds of armament, largely made in the Watertown Arsenal, which has already inaugurated this Taylor system, shall come under the provisions of this bill.

We believe it is nothing more than right that the conditions under which the American laboring man shall work in Government manufacturing establishments shall be conditions that conduce to the best and highest results for American labor, and these provisions of this so-called scientific management—which is, by the way, a misnomer, and scientific only in name—are un-American and tend to humiliate the individual. This system is a stimulating device which seeks to establish a high speed and which is unjust to the American workman from every standpoint. I believe that the amendment is one which should receive the vote of every member of this committee.

Mr. BERGER. I want to suggest to the gentleman from Iowa that the amendment would be better inserted on page 184, after line 20, because if he inserts it now it will only apply to work in Panama, and he wants it to apply to all Government work.

Mr. PEPPER. The reason why it is offered at this time is because in the opinion of gentlemen interested it should prop-

erly apply as a limitation upon a specific appropriation, and this particular appropriation is to be expended largely in the Watertown Arsenal, where that system is now inaugurated. I might say to the gentleman that under the terms of the amendment it applies to the appropriations herein made, which will include all appropriations in the bill.

Mr. BERGER. I suggest to the gentleman that it would be much plainer and less apt to be misconstrued if he would insert his amendment on page 184, after line 20.

Mr. PEPPER. We discussed the matter of offering it at that point, and it was the opinion of those interested that it had better be offered here.

Mr. BERGER. Very well.

Mr. BUCHANAN. Mr. Chairman, I feel certain that no Member of this House will object to this amendment if he understands the results of the so-called Taylor system. In the few minutes that I will have in which to address the House, I desire to call attention to some statements made in a printed pamphlet by Rear Admiral Edwards, United States Navy, who for several years was head of the steam engineering department of the Navy, for three years inspector of machinery at William Cramp & Sons' shipyard and engine-building company, and for the past two years has been general inspector of machinery for naval vessels building on the Atlantic coast. This was inserted in the RECORD by myself under leave on August 5, 1912. I point to it specially for the reason that he gives in it the opinions of the most efficient engineers and manufacturers in the country, pointing out the fetishism of this Taylor system. He quotes here from Mr. Bradlee of the Stone & Webster Co.:

That is the well-known firm of Stone & Webster, of Boston, expert authorities on the engineers and industrial matters.

The form of organization adopted naturally has the same end in view. The number of overseers, supervisors, experts, and specialists in proportion to the number of workmen is materially increased.

Special accounting systems are adopted to show at a glance what proportion of the cost of a piece of work is necessary and what proportion is caused by waste of energy. The information so obtained is used as a guide to prevent waste in the future.

The workman is encouraged to cooperate through the use of a bonus system which aims to give the highest pay to the most efficient worker.

These methods applied to certain cases have produced some very surprising and satisfactory results, but it is by no means a necessary conclusion that they can be universally applied with equal success.

As I have already indicated we are all of us familiar with the general principles underlying the methods of the efficiency engineer; many of us make frequent use of these principles in the conduct of our business.

In other words, he points out as all other engineers do in this matter that it has failed to produce anything new.

Mr. Edwards goes on to state, and I certainly agree with him, that one of the most important things about a manufactory or industrial work is the management of it. Oftentimes the workmen are held responsible for wrong management, and therefore I want to quote what Mr. Edwards says:

An important element of industrial success is efficient, systematic, and complete supervision by the administrative and technical officials of the plant. Where intelligent, considerate, and capable supervision exists the best energies of the employees are aroused. Scientific management tends rather to minimize supervision by substituting a very comprehensive system of planning and routing the work. Experience shows that the most efficient method of keeping track of the work is by personal supervision, and not through a system of cards and records.

VITALITY OF AMERICAN ARTISAN ALREADY STRAINED.

In a pamphlet issued by the London Board of Trade regarding the industrial conditions of the States of New York, New Jersey, and Connecticut for 1910, there is contained the following extract from a report submitted by the British consul general of the port of New York:

"Every worker in America puts more energy in his work than does the European in his own country. Speeding is partly responsible for this, but the reserve of energy is no greater in American than in European stock. American energy is consequently exhausted more rapidly. Between the ages of 40 and 50, when the European workman is at his best, the American frequently breaks down. Physical exhaustion, dyspepsia, or nervous prostration follows, and the man's life as a worker is done. His place is taken by a younger man.

"So long as there is an abundant supply of labor through foreign immigration the vacant places can easily be filled. If the stream stops there will not be so much heard of the superiority of the American workingman, for America would then have to depend upon her own children, whose stock of vitality is not greater than that of their parents, whether American or foreign."

Brighter and more energizing conditions of work are required. The daily-task idea is simply another step to enervating work and exhausted vitality, and it is not surprising that welfare experts believe that a halt should be called in the attempt to increase the work pace.

The minute subdivision of operations and the speeding up of machines constitute two of the basic principles of scientific management. Such practice does not make for the training of high-grade artisans, although it may result in financial benefit to highly skilled or experienced individual employees.

It is not difficult to train common labor and boys to operate some special machines with rapidity and skill. Such training, however, is neither of permanent benefit to the Nation nor the individual, for after the laborer is detailed to such work it will be the exception when he will cheerfully go back to manual labor. Time-study methods may increase for a time the output of the machine, but only at the expense of the development of the man.

The most serious evil connected with automatic work is due to the fact that it makes for mental retrogression of the employee. It is likewise responsible in considerable part for the general socializing process that is going on even in the better class of shops of the country.

In relation to this special feature Dean Herman Schneider, of the University of Cincinnati, gave an address on "An analysis of work" before the Chicago Commercial Club on November 11, 1911. This address contained the results of his investigations of the psychological effect of various kinds of work upon the operator. It was his opinion that when the work became more and more automatic the minds of the artisans became more and more lethargic.

The best kind of citizenship can not be built on 54 hours per week of automatic work, compensated for on a differential basis. The repeated spontaneous and unaccountable strikes of automatic workers bears testimony to the fact that these employees undoubtedly labor under intense strain, and the whole plan of scientific management, at least as regards shop management, is in the direction of increasing both the toil and the strain.

THE RESENTMENT OF SKILLED LABOR TO THE PRINCIPLES OF THE SYSTEM.

In general, organized labor opposes the introduction of the principles of scientific management. In analyzing the cause of this resentment it appears as if the opposition of skilled labor is based upon the following distinct objections:

First. According to Mr. Taylor's own statement, it does not increase wages in proportion to the increased output produced by the employee.

Second. The employees bitterly resent the implication that they do not render either efficient or conscientious service and that "soldiering" is the rule and not the exception when daywork is carried on.

Third. The labor leaders regard the movement as a step to general piecework payment—a system which the average artisan believes to be of some benefit to the highly skilled workman when first introduced, but of eventual detriment to the average mechanic. It appears to be their belief that the compensation for piecework is generally reduced just as soon as the employer finds out the maximum output which can be secured from the high-grade man. It has been asserted by a welfare labor organizer that "the bait of higher earnings for the energetic has too often proven a delusion and snare. Pacemaking, speeding up, and rate cutting are processes with which labor has been long familiar. And, taught by past experience, labor is not unnaturally suspicious now lest scientific management may turn out to be a new method of scientific skinning."

Fourth. The system has a tendency to entail such an intense and close application to work as to be injurious to the permanent health of the employee.

Rightfully, labor thus considers that scientific management is but an attempt to hold it permanently responsible for our business ills and for the general results of inefficient management. The inference may not be founded upon facts, but such appears to be the belief of a very large contingent of both skilled and unskilled labor.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. POWERS. Mr. Chairman, I ask to have the amendment again reported.

The Clerk again reported the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

Mr. FITZGERALD. Mr. Chairman, I am not familiar with the conditions which have prompted the offering of the amendment. An investigation was conducted some time ago by a committee of this House, but I do not know whether a bill has ever been reported upon the subject or not. In some instances the desire is frequently exhibited to work men in excess of the speed that should be required of them. But I am unwilling to vote for this amendment without fuller opportunity to obtain information about the conditions.

Mr. MURRAY. Will the gentleman yield?

Mr. FITZGERALD. I have only a few moments.

Mr. MURRAY. I wanted to ask the gentleman whether or not a bill substantially like this amendment has not been reported by a special committee to which he refers, and by the Labor Committee?

Mr. FITZGERALD. I have already stated that I did not know. I can not keep track of all the bills that are reported to the House.

Mr. WILSON of Pennsylvania. I think I can answer the question.

Mr. FITZGERALD. I have only a minute and I decline to yield. This bill carries appropriations under which are manufactured all the guns, the armament, carriages for the seacoast artillery, the operation of the various manufacturing establishments of the Government in the nature of arsenals, and my recollection is that the so-called Taylor system is not in effect at either establishment.

There may be abuses in connection with their operation, but if so, they should have been called to the attention of the House by the parties interested in the matter so that we could have had some opportunity to familiarize ourselves with the conditions. The bill carries a very large appropriation, essential to the conduct and maintenance of the various establishments, and I hope, as this is not a matter that Members are thoroughly conversant with, that the proposed amendment will not be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The question was taken; and on a division (demanded by Mr. FITZGERALD) there were—ayes 43, noes 42.

Mr. FITZGERALD. I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. PEPPER and Mr. FITZGERALD.

The committee again divided; and the tellers reported that there were 51 ayes and 58 noes.

So the amendment was lost.

The Clerk read as follows:

SEC. 2. That all funds collected by the government of the Canal Zone from rentals of public lands and buildings in the Canal Zone and the cities of Panama and Colon, and from the zone postal service, and from court fees and fines, and collected or raised by taxation in whatever form under the laws of the government of the Canal Zone, are hereby appropriated until and including June 30, 1914, as follows: The revenues derived from the postal service to the maintenance of that service; the remaining revenues, including any balances unexpended in prior years, after setting aside a miscellaneous and contingent fund of not exceeding $10,000, to the maintenance of the public-school system in the zone; to the construction and maintenance of public improvements within the zone; to the maintenance of the administrative districts; and for the expenses of the subdivisions of the Canal Zone after they are established under section 7 of the Panama Canal act; to the maintenance of Canal Zone charity patients in the hospitals of the Isthmian Canal Commission, and to the maintenance of administrative district prisoners. A detailed and classified statement of all receipts and expenditures without the duplication of items under this paragraph shall be submitted to Congress after the close of the fiscal year 1914.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I do not want to unduly lengthen the debate in regard to the matters I have been discussing. Just one or two more observations and I am through. The gentleman from New York [Mr. FITZGERALD] suggests that it is foolish to discuss this question at this time, because we have settled it. If it was settled at all, it was settled by this House on this very same bill, and here is the place to unsettle it. The gentleman from Nebraska [Mr. NORRIS], generally or frequently logical, has become so illogical that because the House on one occasion declared for fortifications against his better judgment, then and now, he says it would be unpatriotic not to carry on this wasteful expenditure which he has never justified. This is the place to modify this policy. This is the time to do it and we ought to do it.

The gentleman from Kentucky [Mr. SHERLEY], judging by what he said a few moments ago, does not clearly recall what Col. Goethals said. Col. Goethals, in answer to a question by the gentleman from Kentucky [Mr. SHERLEY] as to whether it would be necessary to keep on the Canal Zone at all times the 20,000 or 25,000 men he considers necessary, said:

I am a military man, Mr. SHERLEY. I know the difficulty of reenforcing at the outbreak of war. If I were going into the defense of that canal, I would keep all these men there all the time.

That is what we are looking forward to. Gentlemen have complained because items they are interested in are not in this bill or are greatly reduced, and yet they are contemplating voting to throw away $5,000,000, the presence of which in this bill has rendered it impossible to adequately provide for works needed for the development of our country—to be thrown away in the Isthmus, the beginning of expenditures the end of which no man can see, but which, when all expended, will be utterly valueless when the day of test comes.

Neutralize the canal and all the world freely joins in its protection. Fortify it and any nation at war with you is pledged to take and destroy it. At the proper time I shall offer the motion, if I have the opportunity, to recommit the bill, striking all these items from it.

Mr. SHERLEY. Mr. Chairman, I move to close all debate on the paragraph and all amendments thereto.

The motion was agreed to.

Mr. BUCHANAN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

The Clerk read as follows:

SEC. 3. That during the fiscal year 1914 all moneys received by the Isthmian Canal Commission or the governor of the Panama Canal from any services rendered or materials and supplies furnished employees, the Panama Railroad Co., the Canal Zone government, the Panama Government, and other departments of the United States Government, from hotel and hospital supplies and services; from rentals, wharfage, etc.; from labor, materials, and supplies and other services furnished vessels and to those unable to obtain similar labor, materials, supplies, and services elsewhere, shall be credited to the appropriation from which payments for the materials, supplies, labor, or other services were originally made; except that moneys received from the sale of material and equipment purchased and used for construction purposes, and as a reimbursement for the expenditures incurred in constructing waterworks, sewers, and pavements in the cities of Panama and Colon, including interest on such expenditures, excluding payments on account of the expenses for maintenance of such waterworks, sewers, and pavements incurred under agreement with the Panama Government, and otherwise herein disposed of, shall be covered into the Treasury as miscellaneous receipts; and except that after the canal is opened for use and operation the net profits accruing from the operations herein authorized shall annually be covered into the Treasury of the United States, as provided for the profits accruing from the business authorized in section 6 of the Panama Canal act.

Mr. CULLOP. Mr. Chairman, I make the point of order against the paragraph because it is new legislation.

The CHAIRMAN. In what respect?

Mr. CULLOP. The entire paragraph changes the course of administration in regard to the receipts and disbursements of the Panama Canal government.

Mr. FITZGERALD. I think not.

Mr. CULLOP. It is in violation of the present canal act.

Mr. FITZGERALD. I think the gentleman is mistaken. It consolidates the paragraphs and makes provisions in accordance with the terms of the Panama Canal act reported from the gentleman's committee.

Mr. STEVENS of Minnesota. Mr. Chairman, the paragraph certainly makes a change in the credits of the revenues from the Panama Canal. I think they are credited now to the repair and construction fund. This makes an entirely different course of credit, and I think is not within the jurisdiction of this committee.

The CHAIRMAN. Will the gentleman from Minnesota point out the difference between this law and the law to which he refers?

Mr. STEVENS of Minnesota. The note in the Book of Estimates shows the purpose of the paragraph.

Mr. CULLOP. I will read that to the Chair:

NOTE.—The Panama Canal act authorizes the establishment of numerous business enterprises and provides that the moneys expended in the conduct of such enterprises may be reinvested without being covered into the Treasury, and that the net profits only of the business shall be covered into the Treasury annually. Business enterprises other than those specifically mentioned in the Panama Canal act will also have to be carried on by the canal-operating organization. The hotels will continue to be operated, hospital services will have to be rendered, and hospital supplies will necessarily be furnished to some extent. Employees will necessarily obtain a great many supplies and some services from the canal organization; materials and services will also be furnished the Panama Railroad Co., the Canal Zone government (and thus paid for out of local revenues), the Panama Government and other departments of the United States Government.

It is essential that all the various authorized activities should be managed and the receipts disposed of under the same general provisions of law and that the moneys received should be available for continued use without being covered into the Treasury. Moreover, the net profits on the operations of the canal should be covered into the Treasury without exception.

At the present time all funds realized by the commission, except moneys received from employees, which are, by section 8 of the sundry civil appropriation act of March 4, 1907, credited to appropriations, are deposited as "Miscellaneous receipts" and reappropriated for use under classified appropriations for the department of construction and engineering only. Certain items are thus credited to construction appropriations which properly should not be so treated under the general provisions of law providing for the construction of the canal and the estimates of the final cost of the canal. The two important items of this kind are the amounts received from the sale of scrap and equipment used in construction work after it is no longer needed and the amount paid by the Panama Government as a reimbursement for the cost of constructing waterworks, sewers, and pavements in the cities of Panama and Colon. There is a third item which can not be considered as a proper credit to construction appropriations, and that is the net profit received from services rendered and sales made at the present time. However, this item is comparatively small and unimportant and should not cause any change in procedure until the canal is opened for use and operation, as the cost of determining the amount of the profits would probably exceed the profits received.

The specific exclusion of the payments made on account of maintaining the waterworks, sewers, and pavements in the cities of Panama and Colon, which is by agreement imposed upon the commission, from the general provision requiring the covering into the Treasury of the moneys received as a reimbursement for the expenditures incurred in constructing waterworks, sewers, and pavements in those cities is for the purpose of enabling the commission to carry out its agreement without at the same time making the cost of such work a charge against the total cost of canal construction as estimated for and as limited by the authorized bond issue. Under items 7, 8, and 9 specific provisions are submitted authorizing the use of the sums paid by the Government of Panama, either directly or through water rentals, for the maintenance of waterworks, sewers, and pavements in the cities of Panama and Colon for those purposes. Under previous legislation these amounts, as well as the amounts paid for reimbursing the commission for constructing the waterworks, sewers, and pavements, have been made available for use under any appropriation for the department of construction and engineering. It is proposed now that the sums paid for the maintenance charges only shall be used for repairing and maintaining those works in Panama and Colon and that the payments made to reimburse the United States for the cost of construction shall be covered into the Treasury.

There is no logical reason for covering the amounts received from the Panama Railroad Co. or from the Canal Zone government into the Treasury as "Miscellaneous receipts," instead of crediting them to the proper appropriations, as the relations of the two interests are so closely identified with the commission. Moneys received from other departments of the United States Government for services rendered or materials furnished are covered back to the credit of the appropriation from which payments for such materials or services were originally made. The only reason given by the Comptroller of the Treasury for deciding that the moneys received from the Canal Zone government should be covered in as "Miscellaneous receipts" was the practice followed by the commission in its treatment of such funds, covering the early years of the work on the Isthmus.

This section is intended to unify all the provisions relating to the disposition of moneys received during the remainder of the period of construction and after the canal is opened for use and operation. It will place the operations of the canal upon a strictly business basis, in so far as the use of a capital is concerned, and will give the canal the benefit of all moneys appropriated for its use, whereas now moneys expended for supplies which are necessarily furnished the Panama Railroad Co. and the Canal Zone government, etc., though such expenditures are fully authorized, would be entirely lost to canal appropriations, except for the temporary provision contained in each appropria-

tion act. It also provides for the deposit in the Treasury as "Miscellaneous receipts" of all moneys received from all sources which can not be considered as a proper credit to canal construction or to canal operation. (Geo. W. Goethals, chairman.)

The CHAIRMAN. The Chair would like to see the legislation.

Mr. CULLOP. I will call the Chairman's attention to that. I have it here. It is section 6 of the Panama Canal act. This is in direct conflict with the provisions of that act, and is, therefore, new legislation. It changes existing law.

The CHAIRMAN. The Chair will hear from the gentleman from New York.

Mr. FITZGERALD. Mr. Chairman, I wish the gentleman would state in what respect this changes the law.

Mr. CULLOP. Mr. Chairman, the change of the law is that monthly or periodically they do not have to cover the receipts into the Government Treasury under the existing law, and by this law they do. It is an entire change of law. The jurisdiction of that subject, under the rules of this House, is with the Interstate and Foreign Commerce Committee and not with the Appropriation Committee.

Mr. STEVENS of Minnesota. Mr. Chairman, perhaps I can make it plain. The law as it stands, as I recollect, provides these revenues shall be credited to the fund of construction and repair. This amendment, down to line 15, on page 182, provides that that law shall be changed and that these receipts shall be covered into the Treasury as miscellaneous receipts. I think that is the purpose of the amendment down to that point as I read the provision.

Mr. SHERLEY. Mr. Chairman, I want to call attention to this fact: It appears from what gentlemen have said that they are confusing the provisions of the law with the provisions in bills heretofore carrying appropriations, and are holding that because this is not the same as those, that therefore this is contrary to law, which does not follow at all. The question before the Chair to determine is whether the provision here is contrary to existing law touching the government of the Canal Zone enacted at the instance of the committee of which these gentlemen are such zealous members.

The CHAIRMAN. The Chair understands the gentleman from Minnesota [Mr. STEVENS] to contend that the change in the law is as to these receipts being covered into the Treasury. He maintains that the canal act of August 24, 1912, provides that they shall not be covered into the Treasury. Is that the point?

Mr. STEVENS of Minnesota. Yes.

The CHAIRMAN. Well, it seems that the gentleman correctly states the law. The canal act provides that moneys received from the conduct of said businesses may be expended and reinvested for such purposes without being covered into the Treasury of the United States, and the paragraph here provides that they shall be covered into the Treasury of the United States as miscellaneous receipts.

Mr. STEVENS of Minnesota. That is it, Mr. Chairman.

The CHAIRMAN. Now, if the gentleman from Kentucky can explain the matter——

Mr. SHERLEY. Mr. Chairman, I was not prepared to say what the canal act stated. I am perfectly willing to accept the Chair's statement as to that, but I did not want the Chair to assume that because this bill differed from the bill of a year ago therefore it was subject to a point of order.

Mr. CULLOP. No; but that conflicts directly with the organic act for the operation of the Panama Canal.

The CHAIRMAN. The Chair will ask the gentleman from Minnesota to what part of the paragraph he directs his point of order?

Mr. STEVENS of Minnesota. I think, Mr. Chairman, the paragraph is divided into two parts: First, down as far as line 15 on page 182, which provides in substance that the revenues now going into the fund of construction and repair shall hereafter go into the Treasury as miscellaneous receipts; and, secondly, that after the canal is opened certain revenues that are not now provided for, that otherwise would go to the fund of construction and repair, by the provision below, line 15 to the end of the paragraph, shall hereafter come under the provision of section 6 of the canal act. Now, that did not come under the provisions of section 6 of the canal act, but came under the particular fund of construction and repair. It changes both of those provisions of the law.

The CHAIRMAN. Does the gentleman make the point of order against the whole paragraph?

Mr. STEVENS of Minnesota. Yes; I understand the gentleman from Indiana did.

Mr. CULLOP. Yes.

The CHAIRMAN. Very well. The Chair will hear the gentleman from New York.

Mr. FITZGERALD. Mr. Chairman, I am still unable to ascertain in what respect this provision is not in accordance with the law. It was prepared for the purpose of conforming with the Panama Canal act, making it possible to carry on its operations in accordance with the law.

The CHAIRMAN. The Chair has in his hand the Panama Canal act, and this seems to conform to that act.

Mr. FITZGERALD. It may be; but these gentlemen do not seem to take this fact into consideration. Congress has been making certain receipts available for use on the work of the canal, and to harmonize with what Congress has been doing and the legislation enacted by it this paragraph has been drafted. If they believe it is subject to the point of order and the Chair is convinced of it, it can be taken out. How the canal operations will be continued in the absence of it nobody will ever be able to tell, and I doubt if they can be.

The CHAIRMAN. From what knowledge the Chair has before him the Chair is compelled to sustain the point of order.

The Clerk read as follows:

That until the close of the fiscal year 1914, when any material, supplies, and equipment heretofore or hereafter purchased or acquired for the construction of the Panama Canal is no longer needed, or is no longer serviceable, it may be sold in such manner as the President may direct, and without advertising in such classes of cases as may be authorized by him.

Mr. CULLOP. Mr. Chairman, I make the point of order against that paragraph, because it is new legislation and in conflict with the legislation now existing under the act of 1912 for the operation of the Panama Canal.

Mr. FITZGERALD. The provision has heretofore been carried. The purpose is to enable the Government of the United States to realize from the sale of equipment no longer necessary in the operation of the canal the best prices possible. If gentlemen do not wish that to be done I can not help it.

Mr. CULLOP. This is new legislation.

Mr. FITZGERALD. Well, it is clearly in the interest of the Government.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

SEC. 4. That the consolidation of the functions of receiving, disbursing, and accounting for the funds of the Canal Zone Government and the Panama Railroad operations on the Isthmus with the funds appropriated for the Panama Canal is authorized in so far as may be practicable, provided that separate accounts shall be kept of the transactions under each fund.

Mr. CULLOP. Mr. Chairman, I make a point of order against the section just read, because it is new legislation and in conflict with the law now existing.

Mr. FITZGERALD. This is different, Mr. Chairman. This provides for the abolishment of certain offices and is in order under the Holman rule. Two separate accounting organizations exist. The object of this is to put them together and eliminate a large number of employees, who will then be unnecessary. The reading of the provision itself makes that clear.

Mr. ADAMSON. Mr. Chairman, there are two or three troubles in the way of the gentleman's defense by setting up the Holman rule, and one is that the Panama Railroad Co. is not under the jurisdiction of his committee, and never has been. It is a New York corporation, and has been under the jurisdiction of the Committee on Interstate and Foreign Commerce even before the Panama Canal was ever commenced or the zone acquired by the United States Government.

Mr. FITZGERALD. I think not. We acquired the railroad when we acquired the Canal Zone.

Mr. ADAMSON. We did not. The gentleman does not betray that degree of accurate information which he sometimes exhibits in talking about matters. Accuracy ought to be essential.

The CHAIRMAN. The Chair would like to ask the gentleman from New York whether this provision reduces the number of employees on the salary list?

Mr. FITZGERALD. Undoubtedly it will. If it goes into effect, it will eliminate a very large number of Government employees.

The CHAIRMAN. The Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

SEC. 5. That hereafter the head of each executive department and other Government establishment shall, on or before July 1 in every fiscal year, designate from among the officials employed therein one person whose duty it shall be to supervise the classification and compilation of all estimates of appropriations, including supplemental and deficiency estimates to be submitted by such department or establishment. In the performance of their duties persons so designated shall have due regard for the requirements of all laws respecting the preparation of estimates, including the manner and time of their submission through the Treasury Department to Congress; they shall also, as nearly as may be practicable, eliminate from all such estimates unnecessary words and make uniform the language commonly used in expressing purposes or conditions of appropriations.

Mr. LAFFERTY. Mr. Chairman, I move to strike out the last word.

The State of Oregon is as much interested as any State in the Union in the Panama Canal. The object of the building of that canal was to reduce freight rates in the United States. We are not yet certain whether coastwise trade will be permitted to go through the canal free or whether it will be charged toll; but if tolls are charged, they will be proportionate, I presume, to the cost of maintaining the canal.

Every citizen of the United States is interested in having the cost of maintaining the canal as cheap as possible. For that reason I favor the attempts that have been made here to-day to strike out the items for the purpose of fortifying it. It seems to me that a few years ago Congress, in a way, committed itself to a plan of fortification, but the Government can change its course of conduct at any time the same as an individual may change his course of conduct. But for the first time we appropriate to any considerable extent for the purpose of beginning these fortifications. By this bill it is proposed to appropriate $5,000,000 in round numbers for them. It has been stated that in every 15 years these appropriations will amount to as much as the original cost of the canal. It seems to me to be a matter of the highest importance to the people of this country that, unless fortification is absolutely necessary, it be dispensed with. And I hope that the motion to recommit will be seriously considered by the House, and also that the motion to strike out these items will prevail.

The Clerk read as follows:

SEC. 6. That all of the records relating to naturalization or declarations of intention to become citizens of the United States and all certificates of naturalization filed, recorded, or issued prior to an act to validate certain certificates of naturalization approved June 29, 1906, in or from the county court of Davidson County, Tenn., shall for all purposes be deemed to be and to have been made, filed, recorded, or issued by a court with jurisdiction to naturalize aliens, but shall not be by this act further validated or legalized.

Mr. MOORE of Pennsylvania. Mr. Chairman, I reserve a point of order on this paragraph. It is susceptible of explanation, I am sure.

Mr. BYRNS of Tennessee. Mr. Chairman——

Mr. MOORE of Pennsylvania. It is an item that seems properly to come before the Committee on Immigration and Naturalization, and I should like the gentleman to indicate why it is in this bill.

Mr. BYRNS of Tennessee. I want to state to the gentleman, Mr. Chairman, that there are some 500 citizens who were naturalized under proceedings which were instituted in the county court of Davidson County, Tenn. The gentleman will recall that under the act of 1906, the present law, certain prescribed forms are fixed, and the operation of the law is placed entirely under the control of the Federal officials, but prior to that time there were no fixed or prescribed forms, and any court of common law jurisdiction, with a clerk and seal of the court, was considered as having the necessary jurisdiction to issue naturalization papers.

Mr. MOORE of Pennsylvania. About how many certificates of naturalization are involved?

Mr. BYRNS of Tennessee. I think there are less than 500. I can not say accurately. I will say this to the gentleman, that the Bureau of Naturalization recently sent an inspector to Nashville, Tenn., for the purpose of looking into this very matter. Many years ago these citizens secured their naturalization papers in perfect good faith. The Davidson County court assumed jurisdiction, and they have been exercising the rights of citizenship ever since that time, until two or three years ago a case came up in the Federal court and Judge Sanford, the district judge, held that their naturalization papers were invalid, solely because the county court of Davidson County was not vested with proper jurisdiction; it was not a court of general jurisdiction, but a court having statutory jurisdiction of certain classes of cases.

Mr. MOORE of Pennsylvania. This question was raised last year in the matter of the court of Louisville, was it not?

Mr. BYRNS of Tennessee. Yes.

Mr. MOORE of Pennsylvania. You want the legislation as proposed at the present time to validate those certificates?

Mr. BYRNS of Tennessee. Yes; the Secretary of Commerce and Labor says in reply to a letter I wrote to the department that it should be done in order to do justice to these people who have heretofore been exercising the rights of citizenship.

Mr. AUSTIN. They want to get them ready to vote for the gentleman, to return him to Congress. [Laughter.]

Mr. MOORE of Pennsylvania. I have no objection to that.

Mr. BYRNS of Tennessee. Many of them do not now live in that district.

Mr. TILSON. Mr. Chairman, I would like to inquire of the gentleman why should not this come up on the Unanimous-Consent Calendar? No one would object to anything of that kind.

Mr. BYRNS of Tennessee. I will say to the gentleman that this course follows the precedent set last year with reference to the police court at Louisville.

Mr. TILSON. I think this should be done, but I was asking why it should not be done in the regular way.

Mr. MOORE of Pennsylvania. Mr. Chairman, I do not insist upon the point of order.

Mr. BYRNS of Tennessee. Mr. Chairman, I ask unanimous consent to file a letter that I have received from the department relative to this matter.

The CHAIRMAN. The gentleman from Tennessee [Mr. BYRNS] asks unanimous consent to print a letter in the RECORD. Is there objection?

There was no objection.

The following is the letter referred to:

DEPARTMENT OF COMMERCE AND LABOR,
Washington, January 29, 1913.

DEAR SIR: The department has to acknowledge receipt of your letter of the 27th instant, relative to naturalization papers procured through the county court of Davidson County, Tenn., prior to the passage of the naturalization act of June 29, 1906.

It would appear that the same situation exists with regard to the persons so naturalized as in the cases of those aliens who had been admitted to citizenship by the criminal court of Cook County, Ill., and by the Louisville city court, sometimes called the Louisville police court, Kentucky. In all of the three instances the persons naturalized have been the victims of an error upon the part of the said courts in assuming a jurisdiction which they were not by law authorized to exercise. Recognizing this situation, apparently, the act of June 29, 1906, entitled "An act to validate certain certificates of naturalization," was passed, which validated all certificates theretofore issued by the criminal court of Cook County, Ill., so far as lack of jurisdiction was concerned, but no further. Section 9 of the act of August 24, 1912, validated declarations of intention filed in, and certificates of naturalization issued by, the Louisville city court to the same extent and up to the said date.

The department can see no reason why similar action should not be taken on behalf of those persons who have been admitted to citizenship by the county court of Davidson County, Tenn. In fact, it sees no other means by which injustice to such of the persons so naturalized as were qualified to become citizens may be avoided.

Very truly, yours,

BENJ. S. CABLE,
Acting Secretary.

Hon. JOSEPH W. BYRNS,
Representative in Congress, Washington, D. C.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 7. That libraries heretofore designated by law as depositaries to receive books and other Government publications shall hereafter, during their existence, continue such receipt; and new designations may be made when libraries heretofore chosen shall cease to exist or other designations shall hereafter be authorized by law.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] reserves a point of order on the paragraph.

Mr. MANN. Mr. Chairman, does the gentleman from New York [Mr. FITZGERALD] consider it is absolutely essential to fix the present libraries and public depositories without any chance to change them? The method used to be that there was a depository for each congressional district, named by the Member of Congress from that district. I think probably the number of Members of Congress has increased, while the number of depositories has not decreased.

Mr. FITZGERALD. The statement is made that the only value in receiving these Government publications consists in the continuity of the reception of them. If the sets are broken and distributed partly at one time to one library and at another time to another library, it makes the publications of little value at either place.

Mr. MANN. My understanding is, on the contrary, that the majority of the libraries in the United States which are now designated as public depositories decline to receive all the public documents.

Mr. FITZGERALD. I have no information on that.

Mr. MANN. They desire to send them back. It takes only a few years for a library of ordinary capacity to fill up all of its shelves with public documents. Now, of course, in some of the large cities, where they have a great deal of shelf room in their libraries, they are able to take care of these, but the ordinary city library in the ordinary congressional district in the United States probably has not got the capacity in the way of shelf room to take care of the literature, or whatever you would call it, published by the Government for a long series of years.

Mr. KENDALL. Is not that difficulty relieved by the fact that the books on being read and reread are worn out? [Laughter.]

Mr. MANN. I know that the superintendent of documents has been urging this. If the gentleman thinks that it is necessary, I shall not insist upon the point of order. I will withdraw the point of order.

The CHAIRMAN. The gentleman from Illinois withdraws his point of order. The Clerk will read.

The Clerk read as follows:

SEC. 8. That all sums appropriated by this act for salaries of officers and employees of the Government shall be in full for such salaries for the fiscal year 1914, and all laws or parts of laws in conflict with the provisions of this act are repealed.

The CHAIRMAN. The Chair will call the attention of the gentleman from New York [Mr. FITZGERALD] to the fact that a paragraph was passed over last evening, to be returned to before the bill was finished.

Mr. FITZGERALD. Mr. Chairman, I ask that we return to the provision about the Alaska fisheries.

Mr. BURNETT. Mr. Chairman, I move to strike out the last word of the section just read.

The CHAIRMAN. The gentleman from Alabama [Mr. BURNETT] moves to strike out the last word of the paragraph just read.

Mr. RODDENBERY. Mr. Chairman, was a point of order reserved on the paragraph?

The CHAIRMAN. It was not.

Mr. BURNETT. Mr. Chairman, a few days ago the chairman of the Committee on Appropriations [Mr. FITZGERALD], in criticizing the Committee on Public Buildings and Grounds, said, referring to the gentleman from Georgia [Mr. RODDENBERY]:

> The gentleman stated that the committee did not put items in the public buildings bill unless requested so to do by the Member in whose district the building was to be located and upon a personal appearance and appeal for such an item. Yet the committee put an item in the bill affecting a building in my district without my appearance, without my request, and they took it out when I protested against the item.

Now, Mr. Chairman, I want to say that that bill was introduced by the gentleman from Brooklyn, Mr. CALDER. It was brought to the attention of the committee by him, and by several other gentlemen who had visited the location. The committee knew nothing about it not being in his district. When it was brought to the attention of the committee that perhaps it was not, and was not a proper item—that fact being called to our attention by the gentleman from Brooklyn, Mr. WILSON, who came before the committee—we asked the clerk of the committee to request the gentleman from New York [Mr. FITZGERALD] to come before the committee. He said he could not come before the committee, being busy, I suppose, with other matters, possibly with the million-dollar collier proposition that went out on a point of order a while ago, in which the Brooklyn Navy Yard was interested. The gentleman did not come, but he called me to the phone. Before he had done that, however, his colleague, Mr. WILSON of New York, had come before the committee and had brought to the attention of the committee the fact that it was not in Mr. CALDER's district, and the committee had decided to strike it out.

The gentleman from New York [Mr. FITZGERALD] called me to the phone as acting chairman of the committee and stated that he had had no claim that business was congested there, or that they needed the building, and he said that, so far as he was concerned, he did not desire it or ask for it; but, so far as making any protest against it, he stated that if the committee wanted to make the district a present, or words to that effect, they would have to do so. I think the statement of Mr. FITZGERALD put the gentleman from New York [Mr. WILSON] in an unjust attitude, because he was the man who came before us, and I understood from the gentleman from New York [Mr. FITZGERALD] that the latter had had a conversation with Mr. CALDER and knew that the bill was in; but in spite of all that he did not call attention of any member of the committee, so far as I know, to that fact until we had called him up in order to make the inquiry.

Yesterday I called the gentleman's attention to the fact that it was sought to put it into the bill over in the Senate, and I asked him to see the Senators over there and see that it be taken out or kept out if it was so desired. I notice that it is in the bill that has been reported by the Senate committee. I notice that the gentleman's colleague, Senator O'GORMAN, has introduced a proposition for about $3,000,000. Now, I hope the gentleman's insistency will follow all along the line with regard to these particular items. I simply wanted to state this, because I was not here at the time, and I did not want it to go out that the gentleman had been making these protestations to the committee all along in regard to this item.

Mr. FITZGERALD. Mr. Chairman, when the public-building bill was discussed I stated the facts. The clerk of the gentleman's committee called me on the telephone—I did not call the gentleman—and he stated that the item for the post office in Brooklyn was in the bill, and he wanted to know my attitude about it. I arranged to have Mr. BURNETT called to the telephone, and I stated that I knew such a bill had been introduced; that it affected a building located in my district; that there had never been any intimation to me that any such addition was necessary; that I did not know the value of the property; that I did not favor the item; and that I believed it should not go in the bill.

The gentleman stated that he would repeat that statement to the members of his committee, and would request them to take the item out.

I do not claim that I am entitled to all the credit for taking the item out, because I know that three of my colleagues in Brooklyn were opposed to the item.

So far as restoring the item to the bill in the Senate is concerned, I said to the gentleman from Alabama that I had reason to believe that it would be reinserted, and I hoped that he would not agree to it in conference. He said that he hoped I would use my influence to keep it out, because he did not want to jeopardize the bill by insisting that it should go out; that if necessary he would agree to the item in order to obtain the other items in which he was so much interested.

For the other $20,000,000, in addition to that put into the bill by the Senate, I am not responsible; and I now publicly request, in the interest of the public service, that the gentleman and those associated with him as managers on the part of the House do not consent to the item for the additional land for the Brooklyn post office.

If additional room be needed, the very room that they now speak about desiring to acquire by purchase can be had by renting, and when the time comes, if it does come, to provide additional and necessary facilities, it can be done after the matter is thoroughly considered by the eight Representatives from Brooklyn, and after some discussion with the representatives of various commercial and civic bodies who have the interest of the public at heart. Brooklyn has a population of 1,700,000 people. Its postal receipts aggregate $3,000,000 annually, and with three or four of the Representatives from that community objecting to an item to acquire additional land for the purpose of enlarging the present post office, I believe that the chairman of the committee ought not to be so anxious to compel the purchase of this property until some independent investigation can be made by those representing the community as to whether the amount requested is a reasonable sum to be paid for the property to be purchased; and I believe, if the facts are properly canvassed, there will not be any such public sentiment in Brooklyn as will justify anybody in requesting an extension of the present post-office building there, as contemplated by the item of which mention has been made. Now, Mr. Chairman, I ask to return to page 152, where an amendment was offered.

Mr. RODDENBERY. Mr. Chairman, I offer the following amendment to the paragraph, page 184.

The CHAIRMAN. The gentleman from Georgia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Line 20, strike out all after the word "fourteen."

Mr. RODDENBERY. I want to ask the gentleman from New York if there are any provisions in the bill that need an expressed repealing clause in this act?

Mr. FITZGERALD. I can not recollect, but that is the customary provision in all appropriation bills. Congress frequently appropriates for a less compensation to officers than the statutory compensation, and in order to prevent a claim being presented as a result of the appropriation being to some extent authorized, the provision has been carried in the bill.

Mr. RODDENBERY. What would be the effect if in the provisions of the bill we had permitted the increase of salaries above the amount authorized by statute?

Mr. FITZGERALD. It would have no effect on them.

Mr. RODDENBERY. Are there any such items in the bill?

Mr. FITZGERALD. I think there are, unless the gentleman from Illinois has taken them out.

Mr. RODDENBERY. Why does not this language, "shall be in full for such salaries for the fiscal year 1914," have the effect of preventing any claims? It seems to me the last line has the effect of making the increases in this bill not subject to a point of order subsequently because we have a statutory authorization.

Mr. FITZGERALD. Oh, the gentleman is mistaken. That language is in the current law, but it did not prevent points of order being sustained in this bill.

Mr. RODDENBERY. My question was more in the line of inquiry than fixed conviction.

Mr. FITZGERALD. It is a customary provision in appropriation bills, and a very salutary one to the Treasury.

Mr. RODDENBERY. Mr. Chairman, I withdraw the amendment.

The CHAIRMAN. The gentleman from New York asks to return to page 152, line 16, where the gentleman from Illinois [Mr. MADDEN] has an amendment pending and the gentleman from New York reserved a point of order. The Clerk will report the amendment.

The Clerk read as follows:

On page 152, in line 16, strike out the words "two agents and caretakers, at $2,000 each," and insert in lieu thereof "agent, fur-seal fisheries, $3,650; assistant agent, fur-seal fisheries, $2,920; two assistant agents, at $2,190 each; naturalist, fur-seal service, $3,000"; in line 18 of the same page strike out the word "two" and insert in lieu thereof the word "three"; in line 24 of the same page strike out "$1,200" and insert in lieu thereof "$1,500"; in line 1 of page 153 strike out "$900" and insert in lieu thereof "$1,200."

Mr. MADDEN. Mr. Chairman, from 1870 to 1910 the right of taking seals on the seal islands was leased. In addition to taking seals, the lessees conducted a store on each island for the purpose of supplying the native population with clothing and provisions.

In 1910 the agents for the seal fisheries—act of April 21, 1910—took over all the duties and responsibilities formerly exercised by the company officers in San Francisco and the company employees stationed on the seal islands. This, of course, was in addition to their regular duties of administering justice, governing the natives, and protecting the islands.

The company's office force in San Francisco purchased and shipped the supplies necessary for the conduct of the business and the subsistence of the natives and others domiciled on the islands. The duties of the company's representatives on the islands were to take sealskins and prepare the same for market—a highly technical work in itself—to purchase and care for fox skins taken by the natives, to make requisition for supplies and equipment, to conduct a store, and keep up the station in an efficient manner for carrying on the business of the islands.

For this work the company force numbered seven and sometimes eight regular employees.

The seal agents number four. To further reduce this number is to invite disaster to the business. These four agents have, since July 1, 1910, performed all the duties formerly exercised by the company agents and themselves. Since that date the Treasury receipts from the sales of seal and fox skins taken and cured by these agents show a net profit of $531,993.71. Under the contract system, as it existed from 1890 to 1910, the Government's profit would have been less than $200,000.

The seal agents are bonded officers, and the only persons on the islands charged with the custody of $150,000 worth of property and $3,000 to $5,000 in cash.

The argument that the services of the agents can be dispensed with because commercial killing has been discontinued is without weight. Food killing is still to go on, and the skins so procured must receive the same attention as those taken for commercial purposes. Besides sealing, the agents perform a multitude of duties essential to the peace and good government of the island communities, in addition to caring for numerous Government interests, which must suffer or fail in case of the removal of half of the present small force.

The native population comprises 300 souls, living on two islands 40 miles apart.

It seems to me that if the proposal of the Committee on Appropriations to reduce this force is enacted into law, the interests of the Government of the United States on the seal islands will be very much retarded and unprotected. There never was a more important duty performed by servants of the Government than the duties devolving upon these men, and to say that we can reduce the force and maintain the efficiency as well as protect the interests of the Government it seems to me has no weight whatever. If there ever was a time when we should continue the entire force, this is the time, for the Government itself is in control of the work of killing the seals. We no longer allow pelagic sealing. We no longer allow outsiders to do the work of seal killing. All the seals killed under the present law are killed by direction of the Secretary of Commerce and Labor, and the men are more needed on the seal islands now than they ever were before, and by their continuance in the service we not only protect the rights of the people who live on the islands, but we protect the seal herd as well, and we increase the revenues of the Government Treasury.

Mr. FITZGERALD. Mr. Chairman, under the treaty which was negotiated all killing of seals is prohibited for five years, except those necessary to furnish fresh meat to the natives on the Pribilof Islands. When the killing was conducted for the purpose of supplying the market with sealskins, a force of four agents was provided. Two of them spent their time in Washington and the other two on the Pribilof Islands, and they alternated every other year. This matter was very thoroughly investigated by a committee of the House, of which the gentleman from Pennsylvania [Mr. ROTHERMEL], now a member of the Committee on Appropriations, was chairman; upon their investigation and upon their recommendation the agents heretofore provided were dropped out, and two agents and caretakers, one for each island, were provided. That is all that is necessary, unless it is desired to keep these men unnecessarily upon the pay rolls of the Government. I hope the amendment will not be agreed to.

Mr. FRENCH. Mr. Chairman, I want to say just a few words on the amendment offered by the gentleman from Illinois [Mr. MADDEN], and I trust his amendment may prevail. The action taken a year ago by Congress in extending the time for several years within which pelagic sealing shall not be continued, was that the herds of seals may be enlarged. The herds must be properly cared for, and in my judgment this can only be done best by having two caretakers upon each of the two islands where the rookeries are located, which are the breeding places of the seals. One of the important duties of these caretakers is to protect the seals from those who would, without authority, people of our and of other countries, go to the islands and by unlawful practices poach upon the herds that are there, make raids upon the rookeries, and take away the seals or skins for the money that they can get for them. The last time that raids were made they were so timed that they were made upon two rookeries upon the island at the same time. I say that it is in the very interest of the law that we enacted a year ago to have at least two agents upon each island, in order that they may properly care for the herds that are there. More than that, we should maintain two agents or caretakers, for at times it is necessary that one be spared for purposes in the interest of the work itself, to go to the United States for provisions or for other reasons, returning then to the islands. We should not make it necessary to leave the islands without a caretaker and with constant danger to the herds.

One of the features of the amendment of the gentleman from Illinois has to do with the number of teachers that shall be on the islands. We have three teachers to-day. Two of them are employed by specific act. The other is employed by the Department of Commerce and Labor under the general authority that that department has. There are two islands. On one of the islands there are something like 50 school children of all grades, and the department feels that two teachers should be there. We have a man and his wife there to-day on the island of St. Paul in the school work. The wife is employed under the general power of the department, because the conditions warrant it, and I submit we ought to provide for the additional teacher in the bill that we are considering at this time.

Mr. FITZGERALD. Mr. Chairman, I move that all debate on this paragraph and all amendments thereto be closed in five minutes.

The motion was agreed to.

Mr. McGUIRE of Oklahoma. Mr. Chairman, with respect to this amendment I desire to submit a few observations. A great deal of testimony has been submitted before the Committee on Expenditures in the Department of Commerce and Labor within the last two years with respect to this force now employed on these islands, and if this amendment does not prevail and if the law is changed it will probably be done by the committee for the reason that we have ceased killing seals. I would have the Members keep in mind that these employees who are there at this time were not put there because of the killing of seals. That was not the purpose; they are not the parties who were employed for that purpose. They were put there for the protection of the natives, of the animals upon the islands, and for the purpose of protecting the seals, and it is a false assumption to assume that the force ought to be reduced simply because we have discontinued the killing of seals upon the islands. For instance, there is probably not a native upon those islands who is not addicted to the habit of drink. We have found it necessary to protect them from that habit. Some of you gentlemen, perhaps, will remember a great number of years ago—I think in 1879—the natives of an island in Bering Sea were absolutely annihilated by reason of rum being left there by whaling vessels.

Mr. FITZGERALD. If these agents are necessary on the Pribilof Islands, what are they doing here in Washington every winter?

Mr. McGUIRE of Oklahoma. There is only one of them——

Mr. FITZGERALD. There are two of them.

Mr. McGUIRE of Oklahoma. There is only one of them who is in the habit of coming to Washington at certain seasons of the year.

Mr. FITZGERALD. Two of them are here.

Mr. McGUIRE of Oklahoma. I will answer the gentleman's question. Two sometimes come for the purpose of purchasing supplies, and when here are at work in the department, and they are not cut out.

Mr. FITZGERALD. The gentleman is mistaken; we cut them all out and put in the men who are necessary.

Mr. McGUIRE of Oklahoma. These men are employed when here and must be brought in the interest of the service.

Mr. FITZGERALD. They should be up there all the time.

Mr. McGUIRE of Oklahoma. There never has been to exceed two men from the islands in the department; but the point I am trying to emphasize is that these people have been sent there not for the purpose of killing but for the purpose of protecting the people, the seals, and the animals upon the islands.

Mr. KENDALL. How many native people are there on the islands?

Mr. McGUIRE of Oklahoma. About 380 native; and the seals will increase and there should be somebody there to prohibit their killing and their ultimate destruction.

Mr. FITZGERALD. We make provision in this bill for those people.

Mr. KENDALL. They are provided for.

Mr. McGUIRE of Oklahoma. There is not ample provision unless you leave the same number of people there who are there now. The department advises that these people are necessary, and the department is fully advised in respect to that matter and I hope that this amendment will prevail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. MADDEN) there were—ayes 61, noes 83.

So the amendment was rejected.

Mr. FITZGERALD. Mr. Chairman, I move that the committee do now rise and report the bill with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. STEPHENS of Texas. Mr. Chairman, I desire to return to page 116 of the bill for the purpose of correcting an item relating to the Platt National Park, and I will send the request to the desk.

Mr. FITZGERALD. I can not consent to returning to that.

The CHAIRMAN. The gentleman from New York objects.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28775, the sundry civil appropriation bill, and had directed him to report the bill with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. FITZGERALD. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The motion was agreed to.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that the Clerk may correct totals and renumber the sections where it is necessary by reason of eliminations.

The SPEAKER. The gentleman from New York asks unanimous consent that the Clerk be authorized to correct totals and change the numbers of the sections where the same may be necessary. Is there objection? [After a pause.] The Chair hears none. Is there a separate vote demanded on any amendment?

Mr. MANN. Mr. Speaker, I ask for a separate vote on the amendment or amendments, I think, coming in on page 124 at the end of line 15, the Hamill and Roddenbery amendments, if they are separate or if they are together, whichever it is. I do not know whether they are reported as two amendments or not.

The SPEAKER. Does anybody else demand a separate vote on any other amendment? If not, the Chair will put the other amendments en gross.

Mr. RODDENBERY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RODDENBERY. On what amendment does the gentleman from Illinois [Mr. MANN] demand a separate vote?

Mr. MANN. On the Hamill and Roddenbery amendments.

Mr. MOSS of Indiana. I ask that those two be separated and a vote first be taken on the Roddenbery amendment and then on the Hamill amendment.

Mr. KENDALL. Mr. Speaker, I rise to suggest that the Roddenbery amendment was really an amendment to the amendment proposed by the gentleman from New Jersey [Mr. HAMILL], and they ought to be considered as one.

Mr. HAMILL rose.

The SPEAKER. For what purpose does the gentleman from New Jersey rise?

Mr. HAMILL. To make a suggestion that my amendment was not incorporated with the amendment of the gentleman from Georgia and that it is an independent one.

A MEMBER. Let us dispose of the other amendments first, Mr. Speaker.

Mr. KENDALL. I wish to make a suggestion in order to clarify the situation. I think the Roddenbery amendment will be found to relate to the amendment offered by the gentleman from New Jersey [Mr. HAMILL].

Mr. FITZGERALD. I ask for the regular order.

The SPEAKER. The regular order is, Does any Member desire a separate vote on any other amendment?

Mr. MOSS of Indiana. Mr. Speaker, I would like to ask after my rights. I ask about the Roddenbery amendment.

The SPEAKER. We have not come to that yet.

Mr. MOSS of Indiana. I ask whether they were one amendment or separate?

The SPEAKER. The Chair will have to examine them and see.

Mr. MOSS of Indiana. I ask for a separate vote on the amendment of the gentleman from Georgia [Mr. RODDENBERY].

The SPEAKER. The Chair wants to put the other amendments en gross first, if no separate vote is demanded on other amendments than the ones mentioned. The question is on agreeing to the other amendments.

The question was taken, and the amendments were agreed to.

The SPEAKER. Now, the Clerk will report the Hamill amendment first and then report the Roddenbery amendment.

The Clerk read the amendment of the gentleman from New Jersey [Mr. HAMILL], as follows:

After line 15, on page 124, insert the following:

"*Provided, however,* That no part of this money shall be expended in the prosecution of any organization or individual for entering into any combination or agreement having in view the increase of wages, the shortening of hours, or bettering the condition of labor, or for any act done in furtherance thereof not in itself unlawful."

Mr. MANN. Now, a parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. MANN. The Hamill amendment, which has just been reported, was inserted at the end of a line in the bill. After that amendment was agreed to, it being a limitation upon an appropriation item, the gentleman from Georgia [Mr. RODDENBERY] offered his amendment to come in, I take it, at the end of the Hamill amendment, both being limitations upon the same item in the appropriation bill. Are they to be treated as one amendment in the House or as two amendments?

The SPEAKER. The Chair thinks that they should be treated as two amendments. Here is what happened.

Mr. MANN. Everybody here knows what happened. I wanted to get it before the House.

The SPEAKER. They will be treated as two amendments. What inquiry does the gentleman from Indiana [Mr. Moss] wish to make?

Mr. MOSS of Indiana. I was asking to have them separated.

The SPEAKER. They will be separated, and the vote on the amendment of the gentleman from New Jersey [Mr. HAMILL] will be taken first.

Mr. CANNON. I hope that it will be again reported.

The SPEAKER. Without objection, the Clerk will again report the amendment.

The amendment was again read.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. MANN. I ask for a division.

Mr. HAMILL. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from New Jersey [Mr. HAMILL] demands the yeas and nays. Those in favor will rise and stand until they are counted. [After counting.] Thirty gentlemen have risen in the affirmative. Those opposed will rise and stand until they are counted. [After counting.] One hundred and thirty-four gentlemen have risen in the negative, and 30 is not a sufficient number.

Mr. HAMILL. Mr. Speaker, I ask for tellers on that vote.

The SPEAKER. The gentleman from New Jersey demands tellers.

Mr. FITZGERALD. Tellers on what?

The SPEAKER. Tellers on the yeas and nays on this amendment.

Mr. FITZGERALD. Then I make the point of order, Mr. Speaker, that the gentleman is not entitled to tellers under the demand for the yeas and nays. It is discretionary with the Chair, and it is never granted unless the vote is so close that the Chair, for his own guidance, may grant it.

The SPEAKER. The Chair thinks the gentleman's point of order is well taken.

Mr. MURRAY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MURRAY. Has the Chair declared the vote on the Hamill amendment?

The SPEAKER. Not yet; but he will declare it.

Mr. MANN. Mr. Speaker, I ask for a division on the Hamill amendment.

The House divided; and there were—ayes 107, noes 67.

So the amendment was agreed to.

The SPEAKER. The Clerk will report the Roddenbery amendment.

The Clerk read as follows:

Add, at the end of the Hamill amendment the following:

"*Provided further*, That no part of this appropriation shall be expended for the prosecution of producers of farm products or associations of farmers who cooperate or organize in an effort to obtain and maintain a fair and reasonable price for their products."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the "ayes" seemed to have it.

Mr. MANN. Mr. Speaker, I ask for a division.

The House divided; and there were—ayes 109, noes 73.

So the amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. RODDENBERY. Mr. Speaker, I offer a motion to recommit with instructions.

The SPEAKER. The gentleman from Georgia [Mr. RODDENBERY] offers a motion to recommit with instructions.

Mr. MONDELL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. The Chair will endeavor to find out which gentleman is entitled to make the motion. Is the gentleman from Georgia [Mr. RODDENBERY] opposed to this bill?

Mr. RODDENBERY. I am opposed to the bill.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Is not the gentleman from Wyoming [Mr. MONDELL], a member of the Committee on Appropriations, entitled to prior recognition under a former ruling made by the Speaker?

The SPEAKER. The Chair thinks he will stand by the rulings he makes himself. [Laughter.] Is the gentleman from Wyoming [Mr. MONDELL] opposed to this bill?

Mr. MONDELL. I am opposed to the portion of the bill that I propose to have stricken out.

The SPEAKER. That will not do. Is the gentleman from Georgia opposed to the bill?

Mr. RODDENBERY. I am opposed to the bill, and I move the previous question on the motion to recommit.

Mr. FITZGERALD. Let the gentleman's motion be reported.

The SPEAKER. The Clerk will report the motion.

Mr. RODDENBERY. And I move the previous question.

Mr. FITZGERALD. The gentleman is not recognized for that purpose.

The Clerk read as follows:

Mr. RODDENBERY moves to recommit the bill H. R. 28775 to the Committee on Appropriations with instructions to report the same back forthwith amended as follows:

"Strike out each and every sum of money therein appropriated, including totals, and substitute therefor 90 per cent of each and every such sum of money therein appropriated, including totals, so that each and every such sum and all totals in the bill as reported from the committee shall be reduced 10 per cent."

Mr. MANN. Mr. Speaker, I make the point of order that that is not in order.

The SPEAKER. The Chair overrules the point of order.

Mr. MANN. Well, Mr. Speaker——

Mr. RODDENBERY. Mr. Speaker, I move the previous question.

Mr. MANN. The gentleman offers as an amendment a motion which as a fact is not possible of execution. It is impossible for the Committee on Appropriations to report that bill back at once, reducing each item 10 per cent, and if the gentleman had offered the amendment on the floor of the House to reduce each item to 90 per cent it would not have been in order.

The SPEAKER. The Chair will inquire of the gentleman why it would not be in order?

Mr. MANN. Because the gentleman must reduce his amendment to writing, showing what it really is.

Mr. UNDERWOOD. Mr. Speaker, I rise to oppose the proposition made by the gentleman from Illinois [Mr. MANN]. I think clearly the motion of the gentleman from Georgia [Mr. RODDENBERY] to recommit is in order with instructions, because the instructions are entirely intelligible to the committee. But it seems to me, Mr. Speaker, what the gentleman from Illinois complains of is the unintelligent way in which it is proposed to reduce the appropriations, and not the question of the point of order.

Mr. RODDENBERY. Will the gentleman from Alabama yield to me——

The SPEAKER. The Chair does not care to hear the gentleman from Georgia——

Mr. FITZGERALD. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. FITZGERALD. If this motion is carried, will it reduce by 10 per cent the appropriation for public buildings contained in this bill?

The SPEAKER. Of course it would reduce everything. The Chair would like to answer the gentleman from Illinois [Mr. MANN].

Mr. BURNETT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BURNETT. Would it reduce the appropriation for battleships?

The SPEAKER. It would reduce everything in the bill and nothing that is not in it. It is purely a question of arithmetic; and as far as the committee not being able to report it forthwith, that is to be construed by the ordinary rules of common sense.

Mr. FITZGERALD. Mr. Speaker, under the rule "to report forthwith" means at once, and it is a physical impossibility for anyone to obey the direction contained in that motion.

Mr. RODDENBERY. Mr. Speaker, I have here the bill——

The SPEAKER. The gentleman from Georgia has moved the previous question on his motion. The question is on ordering the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to this motion to recommit.

The question being taken, the Speaker announced that the "noes" appeared to have it.

Mr. SHERLEY. I should like a division.

The House divided; and there were—ayes 10, noes 153.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. MANN. On that I ask for a division.

Mr. GARDNER of Massachusetts. Mr. Speaker, I ask for a division.

The House divided; and there were—ayes 171, noes 7.

Mr. RODDENBERY. Mr. Speaker, I make the point of order that no quorum is present.

Mr. GARDNER of Massachusetts. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARDNER of Massachusetts. The gentleman from Georgia stated that he was opposed to this bill when the gentleman from Wyoming [Mr. MONDELL] demanded recognition. Has the gentleman from Wyoming [Mr. MONDELL] no rights, in view of the fact that on the test vote the gentleman from Georgia did not vote against the bill?

Mr. RODDENBERY. The gentleman from Georgia voted against the bill and now makes the point of no quorum present.

The SPEAKER. The gentleman is out of order. The Chair takes the gentleman's word on that.

Mr. RODDENBERY. And it is good, Mr. Speaker. [Laughter.]

The SPEAKER. The gentleman from Georgia makes the point of order that no quorum is present. The Chair will count.

Pending the count,

Mr. RODDENBERY. Mr. Speaker, I withdraw the point of no quorum.

The SPEAKER. The gentleman withdraws the point, and the bill is passed.

On motion of Mr. FITZGERALD, a motion to reconsider the last vote was laid on the table.

ADULTERATED FOOD, ETC.

The SPEAKER laid before the House the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, with a Senate amendment.

The Senate amendment was read.

Mr. ADAMSON. Mr. Speaker, I move to disagree to the Senate amendment and ask for a conference.

The motion was agreed to; and the Speaker appointed as conferees on the part of the House Mr. ADAMSON, Mr. COVINGTON, and Mr. STEVENS of Minnesota.

WILLIAM C. GORGAS AND OTHERS.

The SPEAKER laid before the House the joint resolution (H. J. Res. 365) to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the

Engineer Corps of the Army to accept service under the Republic of Ecuador, with a Senate amendment thereto.

The Senate amendment was read.

Mr. HAY. Mr. Speaker, I move to disagree to the Senate amendment and ask for a conference.

The motion was agreed to; and the Speaker appointed as conferees on the part of the House Mr. SLAYDEN, Mr. DENT, and Mr. PRINCE.

NOBLES OF THE MYSTIC SHRINE.

The SPEAKER laid before the House the joint resolution (S. J. Res. 143) authorizing the Secretary of War to loan certain tents for use at the meeting of the Imperial Council of the Ancient Arabic Order of the Nobles of the Mystic Shrine, to be held at Dallas, Tex., in May, 1913, with a House amendment thereto disagreed to by the Senate.

Mr. HAY. I move to insist on the disagreement of the House to the Senate amendment, and ask for a conference.

The motion was agreed to; and the Speaker appointed as conferees on the part of the House Mr. SLAYDEN, Mr. WATKINS, and Mr. KAHN.

PENSIONS.

The SPEAKER laid before the House the bill (S. 8314) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, with a House amendment.

Mr. RUSSELL. Mr. Speaker, I move to insist on the House amendment and agree to a conference.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. RUSSELL, Mr. ADAIR, and Mr. FULLER.

The SPEAKER also laid before the House the bill (S. 8274) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, with a House amendment.

Mr. RUSSELL. Mr. Speaker, I move that the House insist on its amendment and agree to the conference asked for.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. RUSSELL, Mr. ADAIR, and Mr. FULLER.

The SPEAKER also laid before the House the bill (S. 8178) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, with a House amendment.

Mr. RUSSELL. Mr. Speaker, I move that the House insist on its amendment and agree to a conference.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. RUSSELL, Mr. ADAIR, and Mr. FULLER.

PROOF OF SIGNATURES AND HANDWRITING.

Mr. CLAYTON. Mr. Speaker, I ask to take from the Speaker's table for present consideration the bill H. R. 20102, and move to concur in the Senate amendments.

The SPEAKER laid before the House the bill (H. R. 20102) relating to proof of signatures in handwriting, with Senate amendments.

The Senate amendments were read.

Mr. CLAYTON. Mr. Speaker, I move to concur in the Senate amendments.

The motion was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Curtiss, one of its clerks, announced that the Senate had passed without amendment bills of the following titles:

H. R. 26279. An act granting the Fifth-Third National Bank, of Cincinnati, Ohio, the right to use original charter No. 20; and

H. R. 26648. An act for the relief of David Crowther.

R. W. POWER.

Mr. PROUTY. Mr. Speaker, I rise to make a privileged report from the subcommittee appointed under House resolution 756, for the investigation of the affairs of the Commercial Fire Insurance Co., the First National Fire Insurance Co., et al., said resolution having been passed by this House on the 16th day of December, 1912. (H. Rept. 1561.)

This report shows that R. W. Power was called as a witness, duly sworn, and refused to testify to matters that the committee deems pertinent to the inquiry. A full and complete copy of the record is set out in this report. I therefore move that the Speaker of the House be instructed to certify this matter to the district attorney for the District of Columbia, pursuant to sections 102, 103, and 104 of the Revised Statutes of the United States, for action thereon by the district attorney as by statute provided, and I ask that this report and the indorsement of the Speaker be printed.

Mr. CLAYTON. I notice that the gentleman from Iowa designates the officer as the attorney for the District of Columbia. I think he is designated "United States district attorney for the District of Columbia." I would ask the gentleman to look into it, if he is not sure, and ascertain the proper designation of the officer.

Mr. MANN. The appropriation for the office is carried as "United States district attorney."

Mr. CLAYTON. I think he is only known to the law as United States district attorney for the District of Columbia and not as attorney for the District of Columbia.

Mr. MANN. His designation is "United States district attorney for District of Columbia."

The SPEAKER. What is the suggestion of the gentleman from Alabama?

Mr. CLAYTON. That the language of the report should confirm the official designation of this officer.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the motion made by the gentleman from Iowa be amended so as to change the designation of the prosecuting officer of the District of Columbia to conform with the law. Is there objection?

There was no objection.

The motion of Mr. PROUTY was agreed to.

CONSOLIDATION OF CUSTOMHOUSES.

Mr. GARDNER of Massachusetts. Mr. Speaker, I move to discharge the Committee on Ways and Means from further consideration of House resolution 837, and to pass the same.

The SPEAKER. The gentleman from Massachusetts moves to discharge the Committee on Ways and Means from further consideration of House resolution 837 and pass the same. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 837.

Resolved, That the Secretary of the Treasury is directed to inform the House of Representatives whether a plan has been prepared for consolidating the customhouses of the United States, and if so, what ports are affected, and whether a plan has been prepared to discontinue needless offices and employments as may be necessary to make such organizations effective and within the limit of cost of $10,150,000 as authorized in the act making appropriations for sundry civil expenses for the fiscal year ending June 30, 1913.

Mr. UNDERWOOD. Mr. Speaker, I reserve the point of order for a moment. I think this resolution calls for an opinion and not for a statement of facts, and therefore is not in order as a privileged resolution, but I am willing that the House shall vote upon it.

Mr. FITZGERALD. Mr. Speaker, if it is not privileged I shall make the point of order, because the law did not place this duty upon the Secretary of the Treasury, but upon the President of the United States, and it would be somewhat incompatible for the House to ask the Secretary of the Treasury whether a plan has been prepared which under the law must be put into force by the President.

Mr. GARDNER of Massachusetts. Mr. Speaker, no point of order, in my opinion, lies against the privilege of this resolution. The rules clearly make it privileged seven days after its introduction. It is nothing more than a resolution of inquiry addressed to the head of a department. As a matter of fact, the first part asks whether a plan has been prepared for the consolidation of customhouses, and the second part asks whether a plan has been prepared to carry out the provisions of the last sundry civil bill relative to certain proposed economies. The first part of the resolution can be answered by saying "Yes; such and such ports are affected," and the second part can be answered by the word "yes" or the word "no." There is no request in the resolution for the opinion of anyone.

Mr. OLMSTED. How about the third part of the resolution?

Mr. FITZGERALD. I would suggest, Mr. Speaker, that the House has already that information.

Mr. GARDNER of Massachusetts. Mr. Speaker, is the gentleman discussing the point of order?

Mr. FITZGERALD. Mr. Speaker, I am not discussing the point of order, but I am stating as a fact that the Assistant Secretary of the Treasury testified before one of the committees of this House that such a plan had been prepared and was under consideration, and it seems futile to pass this resolution.

Mr. GARDNER of Massachusetts. If the gentleman is going to discuss the merits of the proposition I submit that I also ought to have an opportunity to discuss its merits.

The SPEAKER. Neither gentlemen will discuss it until the point of order is decided.

Mr. OLMSTED. Mr. Speaker, as I heard the resolution read I thought there was in it a provision asking the Secretary of the Treasury whether the plan as proposed would bring it within the expense of $10,150,000, the amount appropriated in the bill we have just passed. That would call for an opinion.

Mr. GARDNER of Massachusetts. Mr. Speaker, the sundry civil appropriation bill last year directed that a plan be prepared to discontinue needless offices and bring the limit of cost under $10,150,000. This resolution asks whether such a plan has been prepared in accordance with the statute.

Mr. GARRETT. Mr. Speaker, will the gentleman yield?

Mr. GARDNER of Massachusetts. Yes.

Mr. GARRETT. Does not the use of the word "needless" necessarily involve an opinion?

Mr. OLMSTED. I was about to suggest that.

The SPEAKER. The Chair will read the resolution so that everyone may understand what it is:

Resolved, That the Secretary of the Treasury is directed—

To do what?—

to inform the House of Representatives whether a plan has been prepared for consolidating the customhouses of the United States.

That is proposition No. 1, and it can be answered yes or no. Second:

And if so, what ports are affected—

That can be answered specifically—

and whether a plan has been prepared to discontinue needless offices and employments as may be necessary to make such organization effective and within the limit of cost of $10,150,000, as authorized in the act making appropriations for sundry civil expenses for the fiscal year ending June 30, 1913.

Mr. GARRETT. Mr. Speaker, the use of the word "needless" there would seem to me to call for an opinion, would it not?

The SPEAKER. The Chair thinks that the Secretary would have to give an opinion as to whether this brings it within that limit of $10,150,000, and that makes it obnoxious to the rule.

Mr. GARDNER of Massachusetts. Then, Mr. Speaker, I call up House resolution 829, which I offered two days before.

Mr. FITZGERALD. Mr. Speaker, has the Chair sustained the point of order?

The SPEAKER. The Chair has sustained the point of order.

Mr. FITZGERALD. Then I demand the regular order.

Mr. GARDNER of Massachusetts. This is the presentation of a privileged resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 829.

Resolved, That the Secretary of the Treasury is directed to inform the House of Representatives whether a plan has been prepared for consolidating the customhouses of the United States; and if so, what ports are affected.

Mr. FITZGERALD. Mr. Speaker, I make the point of order the gentleman can only introduce that through the basket.

Mr. GARDNER of Massachusetts. It has been introduced more than seven days and the committee never reported it.

Mr. MANN. The gentleman moves to discharge the Committee on Ways and Means.

Mr. GARDNER of Massachusetts. Of course.

Mr. FITZGERALD. What is the gentleman's motion?

The SPEAKER. The motion of the gentleman is to discharge the Committee on Ways and Means from the further consideration of the resolution just read, and to pass it.

Mr. GARDNER of Massachusetts. And that the same be now considered.

The question was taken, and the Speaker announced the ayes seemed to have it.

On a division (demanded by Mr. UNDERWOOD) there were—ayes 79, noes 87.

Mr. GARDNER of Massachusetts. Mr. Speaker, I ask for the yeas and nays, and pending that I ask that these proceedings be rescinded, and the gentleman from Alabama [Mr. UNDERWOOD] have 10 minutes to debate this question—the question of discharging the committee—and that I have 10 minutes, which was the understanding that I thought I had with the gentleman from Alabama.

The SPEAKER. The gentleman from Massachusetts demands the yeas and nays, and pending that——

Mr. UNDERWOOD. Mr. Speaker, I will state to the House that I stated to the gentleman from Massachusetts that if he asked for 10 minutes' debate on this question I would not object, but the gentleman failed to ask for 10 minutes.

Mr. GARDNER of Massachusetts. I did not understand; we were discussing the point of order.

The SPEAKER. The gentleman is asking it now.

Mr. UNDERWOOD. If the gentleman will abide by the decision of a rising vote, I would rather yield the 10 minutes to that side for debate than to have a roll call; if we can have an understanding, we will settle the question without a roll call.

Mr. GARDNER of Massachusetts. That is satisfactory to me.

Mr. MANN. Mr. Speaker, I move to reconsider the vote by which——

The SPEAKER. Without objection—it will save time—the whole proceedings be vacated, and the gentleman from Massachusetts asks that he shall have 10 minutes and the gentleman from Alabama 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. UNDERWOOD. It is understood the gentleman will not ask for a roll call.

Mr. GARDNER of Massachusetts. I shall not request any or vote for any.

Mr. UNDERWOOD. Very well.

Mr. GARDNER of Massachusetts. Mr. Speaker, this is part of an old, old question, the old, old attempt to legislate historic customhouses out of existence. In one form or another this proposition has come up in this House again and again. Usually the attempt has been frustrated by points of order. Twice it has been beaten on a square vote. The older Members on both sides of the House will remember that the last time the proposition came to a square vote was when the motion was made by the gentleman from New York [Mr. PAYNE] to go into the Committee of the Whole House on the state of the Union to consider the bill for customhouse consolidation. That motion was handsomely voted down, and a long wrangle ensued. Now, Mr. Speaker, here is what was done last year: In the sundry civil bill a provision was inserted directing the President to prepare a plan which would necessitate the abolition of many an historic customhouse on the Atlantic coast and elsewhere. Was any attention paid to the resolution in the House? Mr. Speaker, I do not want to do the chairman of the Committee on Appropriations [Mr. FITZGERALD] any injustice, but I have looked through his remarks on the sundry civil bill last year and I can not find that he said a word about this provision which was included in it.

I have looked at his report on the sundry civil bill last year and I can not find that he said a word about this consolidation of the customhouses which we empowered the President to make. I have been through the debate, hurriedly, I admit, but accurately, I believe, and I find only one little allusion to the matter, one single statement from the gentleman from Illinois [Mr. CANNON] to the effect that a provision is coming in the next paragraph of the bill looking to retrenchment in the matter of customhouses. That provision of which I speak went through Congress and nobody knew anything about it except the people who devised it. Mr. Speaker, every time hitherto that the attention of the House has been called to this consolidation plan, it has been defeated. Now I am told that the Treasury Department has elaborated a plan to reorganize the customs service. If I am correctly informed, every customhouse in the State of Massachusetts is merged into the port of Boston. I have no doubt that the same fate hangs over the customhouses in many other States whose Representatives in Congress are entirely unconscious of the danger.

They have not heard of this proposal. There has been, in my opinion, a deliberate policy to keep in ignorance those Members of Congress who might make trouble. Not one of you, outside the members of the two Finance Committees, knows the plan of the Treasury, for hitherto that department has refused to make it public. Men have endeavored to see that plan but have not been permitted to do so.

Members of Congress know nothing about it. Gentlemen from North Carolina know nothing of it. Yet their customhouses are affected. Gentlemen from South Carolina know nothing of it; yet they too are affected. In fact many a Member of this House from the Atlantic coast, from the Pacific coast, and from the Canadian border has been kept in blissful ignorance of the plan to abolish the customhouse in his district.

The SPEAKER. The gentleman from Alabama [Mr. UNDERWOOD] is recognized for 10 minutes, and the gentleman from Massachusetts [Mr. GARDNER] reserves the balance of his time.

Mr. UNDERWOOD. Mr. Speaker, for nearly 10 years the Treasury Department has recommended the abolishment of certain ports and subports in the United States where one or two or three or four or five dollars of revenue was collected and where the expenses of maintaining those ports ran up to $1,000 or $2,000 a year. In other words, they were a special privilege for somebody in that district, and the Government of the United States got nothing out of them. They have also recommended the abolishment of certain useless offices. Everybody knows that it costs the Government of the United States more to collect its revenue at the customhouses than any other government in the world, by reason of these facts. Now, the Appropriations Committee carried in the sundry civil bill last year a provision authorizing the President of the United States to thoroughly investigate this question and then, by a proper measure, to abolish useless customhouses where the amount of the receipts did not anywhere near equal the amount of disbursements, and to abolish customhouses that were doing nothing and were a charge on the country.

Mr. PAYNE. May I interrupt the gentleman by just a word?

Mr. UNDERWOOD. Yes.

Mr. PAYNE. Some of these customhouses cost $600 to $800 for services, and the amount collected is only a dollar or two of revenue.

Mr. UNDERWOOD. Now, Mr. Speaker, this question was considered by the House. Some may not have known it became a law, but it was because they were not on the floor when the bill was passed. It is absolutely in the interest of economy. I do not know what ports the President is going to abolish or what offices he is going to abolish, but he has got to abolish them in the interest of economy and of the public service; and if you are not satisfied after he has abolished them you can introduce a bill to reinstate them.

But if you were to pass this resolution it would not do any good. You can not stop the President. Within two weeks he is going out of office, and before that time he is going to issue this proclamation. I say it is simply absurd for this House to pass a resolution to ask the Secretary of the Treasury to tell you what the President of the United States is going to do about this matter.

Now I yield two minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, the gentleman from Massachusetts [Mr. GARDNER] spoke of having looked through the remarks of various Members of the House and found nothing about the item in the sundry civil appropriation bill. In the report made to the House on the 3d of June and accompanying the bill every item of a legislative character was set forth. On page 9 of that report is the following:

LIMITATIONS.

Limitations with respect to expenditures or legislative provisions within clause 2 of Rule XXI of the House, not heretofore enacted, are recommended as follows.

That calls attention to the fact that these provisions came under the rule of the House prohibiting legislation on appropriation bills. On page 11 the report states:

On page 44—

And then, set forth in italics, is the provision which was incorporated in the bill and under which the President is authorized to act. It has been the unvarying rule of the Committee on Appropriations, in its reports accompanying the appropriation bills, to set forth in italics the legislative provisions contained in the bill. They occupy only five or six pages of the report, and it is done so that every Member of the House may easily ascertain what, if any, legislation is proposed, so that they may inform themselves without the difficulty of going through the entire bill.

Mr. GARDNER of Massachusetts. Will the gentleman yield?

Mr. FITZGERALD. I yield to the gentleman.

Mr. GARDNER of Massachusetts. In all these pages of italics I can not find where the matter is referred to.

Mr. FITZGERALD. I will read:

On page 44:

"Section 3687 of the Revised Statutes of the United States is repealed, to take effect from and after June 30, 1913.

"The President is authorized to reorganize the customs service and cause estimates to be submitted therefor on account of the fiscal year 1914 bringing the total cost of said service for said fiscal year within a sum not exceeding $10,150,000 instead of $10,500,000, the amount authorized to be expended therefor on account of the current fiscal year 1913; in making such reorganization and reduction in expenses he is authorized to abolish or consolidate collection districts, ports, and subports of entry and delivery, to discontinue needless offices and employments, to reduce excessive rates of compensation below amounts fixed by law or Executive order, and to do all such other and further things that in his judgment may be necessary to make such organization effective and within the limit of cost herein fixed; such reorganization shall be communicated to Congress at its next regular session and shall constitute for the fiscal year 1914 and until otherwise provided by Congress the permanent organization of the customs service."

Mr. GARDNER of Massachusetts. It is the text of the bill you were reading—six or seven pages of it.

Mr. FITZGERALD. All that the committee can reasonably be expected to do is to set out legislative provisions in its report and call attention to them. It should not be necessary to send special messengers, with these provisions marked, to Members whose time is otherwise so much occupied that they can not see them.

Mr. GARDNER of Massachusetts. Mr. Speaker, does the gentleman yield for a question?

Mr. FITZGERALD. Just one moment. This bill was reported on the 3d day of June, and it passed the House on the 21st day of June. It was stated in the report exactly what was proposed. It is too late now for the gentleman to claim, or try to intimate, that information was withheld from the Members or that anything was done in a manner that did not permit them to obtain, or that prohibited them from obtaining, the information that should be available.

That is all I desire to say. I was somewhat surprised at the time because the matter was not discussed, but there was no obligation on my part to invite opposition or provoke discussion.

Mr. GARDNER of Massachusetts. Did the gentleman call attention to it on the floor of the House? Did he call attention to this change in his speech?

Mr. FITZGERALD. I do not recall. I think the gentleman from Illinois, in his opening remarks on the bill, called attention to it.

Mr. GARDNER of Massachusetts. He did not make any remarks.

Mr. FITZGERALD. But it was useless so far as the gentleman from Massachusetts was concerned, because he was not present, and even if I had called attention to it it would not have been of any benefit to him.

Mr. GARDNER of Massachusetts. The RECORD shows that I was present on that day.

Mr. FITZGERALD. Then the gentleman was not as alert and as attentive as he usually is. [Cries of "Vote!" "Vote!"]

Mr. HILL. Mr. Speaker, in the absence of the gentleman from Indiana [Mr. COX], chairman of the Committee on Expenditures in the Treasury Department, I want to say to the Members of the House that this whole subject was thoroughly gone into in 1911 by that committee and a unanimous report was made, and concurred in by both Republicans and Democrats, in favor of a change from present methods. That report was published, and the hearings were published and sent out, if I am not mistaken, to all the Members of Congress, and the matter was pending for several months before action was taken by the Committee on Appropriations.

In my judgment their action ought to be ratified now. I know of no more extravagant proposition in the United States than paying a man hundreds of dollars for collecting $1. There are many other cases of a similar kind, although not as extreme as that. The committee, after full consideration, after taking full testimony, were unanimous in their report that the reform—for it is a reform—should be made.

Nobody will be injured by it. Take my own State for example. The gentleman from Massachusetts [Mr. GARDNER] says he can not find out about this. I wanted to find out, and I went to the Treasury Department and found that five collectorships in the State of Connecticut were to be consolidated into one, as they ought to be, and a deputy put in place of the collector at each of the four other ports. No one will be harmed by it, I repeat. Anybody who wants to take out papers for a sailboat or transact any customhouse business can do it just as readily through a deputy as he could with the collector who receives two to five thousand dollars salary. This reform ought to be effected in the interest of good management and under the plain dictates of prudence and wise economy.

Mr. GARDNER of Massachusetts. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has five minutes.

Mr. GARDNER of Massachusetts. Mr. Speaker, all this discussion is beside the question. The question is whether we shall have knowledge beforehand as to what is proposed. All I am asking is a chance to examine this carefully guarded plan.

I know that there are a great many customhouses where the receipts do not equal the expenditures, but many of them must be maintained in order to prevent smuggling. I know that there are many customhouses that probably ought in some way to be reorganized; but I believe that we have a right to know what sort of reorganization is contemplated.

The sole reason given by the gentleman from Alabama [Mr. UNDERWOOD] to explain why the House should deny itself this information rests on the supposition that the President has already decided to adopt this Treasury plan. Now, if that supposition is correct, of which I have some doubt, Mr. Speaker—if it is true that the President has made up his mind to act without giving Members of Congress a chance to know what is going on—then, in my opinion, he is following a mistaken course.

Mr. SHERLEY. Does not the gentleman know that the law requires him to do it during this session of Congress?

Mr. GARDNER of Massachusetts. If he is going to do it at all, the law requires him to do it during this session of Congress. Members are beginning to find out that their customhouses are being abolished, and they are going to the President about it. I myself have written a letter to him to-day, protesting against the abolition of the port of Gloucester. I know that New Bedford, in my State, has sent a deputation to the President. The only reason why more deputations are not visiting the President every day to present the side of the case opposed to centralization is because nobody knows about the matter. I do not believe that until this afternoon a quarter of the Members of this House knew that this change was in contemplation.

Mr. MANN. Will the gentleman yield for a question? If one is in favor of the reorganization, how ought he to vote on the gentleman's motion?

Mr. GARDNER of Massachusetts. He ought to vote to give the House a chance to learn what is proposed and a chance to

protest. That is all I am asking for, that the Members of the House shall have a chance to protest.

Mr. MANN. Is the purpose of getting this information to get people to protest?

Mr. GARDNER of Massachusetts. Yes; that is it precisely. That is the purpose of this debate, whether the resolution is adopted or not.

Mr. MANN. Then I am not in favor of the gentleman's proposition.

Mr. MOORE of Pennsylvania. Has it not been a matter of common knowledge, particularly since the Maine delegation waited upon the President about three weeks ago, that this plan has been prepared?

Mr. GARDNER of Massachusetts. I venture to say that half the Members did not know that the Maine delegation has been protesting.

Mr. SHERLEY. How long has the gentleman from Massachusetts known about the reorganization going on?

Mr. GARDNER of Massachusetts. I have known of it quite a little while, but I expected to get exact information long ago. It was only recently that I found that definite information was being purposely withheld.

The SPEAKER. The question is on agreeing to the resolution.

Mr. MANN. Was the committee discharged?

The SPEAKER. No; it was not. The question is on discharging the committee.

The question being taken, the motion was rejected.

IMMIGRATION BILL—QUESTION OF PARLIAMENTARY PROCEDURE.

The SPEAKER. The Chair desires to make a statement to the House about a ruling he made the other day. When the question was on passing the immigration bill over the President's veto the Chair ordered the Clerk to read the bill. The gentleman from Wisconsin [Mr. LENROOT] raised the point of order that it was not necessary to read the bill. The Chair overruled the point of order and had the bill read.

On mature reflection the Chair has concluded that his ruling was wrong, and he makes this statement now so that that ruling will not be taken as a precedent, either by the present occupant of the chair or by any of his successors in office. The Chair thinks the matter ought to be straightened out while it is fresh in the memory of the House. [Applause.]

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the naval appropriation bill, H. R. 28812, and pending that motion I ask unanimous consent that the time for general debate may be equally divided between those in favor of the bill and those opposed, one half of the time to be controlled by the gentleman from Texas [Mr. GREGG] and the other half by myself, with the further understanding that the general debate may be continued during the session this afternoon and to-night, and that upon adjournment to-night general debate may be closed. I wish to say that, speaking for myself, I will ask that the House remain in session, if necessary, until 11 o'clock to hear general debate, no other business to be transacted.

Mr. FOSS. I understand it is also a part of the arrangement that the gentleman from Tennessee [Mr. PADGETT], chairman of the Committee on Naval affairs, will yield to me one-half of his time.

Mr. PADGETT. That is correct.

Mr. FOSS. Mr. Speaker, I have no objection.

Mr. CULLOP. Mr. Speaker, I desire to inquire of the chairman of the Committee on Naval Affairs if it is proposed that the general debate shall be closed with to-days' session?

Mr. PADGETT. To-night; yes.

Mr. CULLOP. How long do you propose to run?

Mr. PADGETT. Until 11 o'clock to-night.

Mr. CULLOP. Mr. Speaker, I object.

The SPEAKER. The gentleman from Indiana objects.

Mr. PADGETT. Mr. Speaker, I want to serve notice that on the assembling of the House to-morrow I shall move to close general debate.

The SPEAKER. The question is on the motion of the gentleman from Tennessee that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the naval appropriation bill.

The question was taken; and on a division (demanded by Mr. CULLOP) there were—ayes 121, noes 18.

Mr. CULLOP. No quorum, Mr. Speaker.

The SPEAKER. The gentleman from Indiana makes the point of no quorum. The Chair will count. [After counting.] One hundred and sixty-nine Members present, not a quorum.

Mr. CULLOP. Mr. Speaker, I move that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. CULLOP) there were—ayes 28, noes 116.

Mr. CULLOP. I move a call of the House.

Mr. MANN. A call is not necessary; it is automatic. The new leader over there fell down this time.

The SPEAKER. There is an automatic call, and the Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll. The question is on the motion of the gentleman from Tennessee to go into Committee of the Whole House on the state of the Union for the consideration of the naval appropriation bill. Those in favor of the motion will say "aye" and those opposed will say "no."

The question was taken; and there were—yeas 179, nays 34, answered "present" 4, not voting 164, as follows:

So the motion was agreed to.

The following pairs were announced:

For the session:

Mr. TALBOTT of Maryland with Mr. PARRAN.

Mr. RIORDAN with Mr. ANDRUS.

Mr. ADAMSON with Mr. STEVENS of Minnesota.

Mr. FORNES with Mr. BRADLEY.

Mr. LITTLETON with Mr. DWIGHT.

Until further notice:

Mr. PUJO with Mr. McMORRAN.

Mr. JOHNSON of South Carolina with Mr. GILLETT.

Mr. ANSBERRY with Mr. BARCHFELD.

Mr. AYRES with Mr. BARTHOLDT.

Mr. BARTLETT with Mr. ANTHONY.

Mr. BRANTLEY with Mr. AMES.

Mr. BROUSSARD with Mr. BURKE of Pennsylvania.

Mr. CARLIN with Mr. CALDER.

Mr. BROWN with Mr. CAMPBELL.

Mr. CARTER with Mr. COPLEY.

Mr. CONRY with Mr. CRUMPACKER.

Mr. COVINGTON with Mr. DALZELL.

Mr. DAVENPORT with Mr. CURRIER.

Mr. DENVER with Mr. DANFORTH.

Mr. DIFENDERFER with Mr. FOCHT.

Mr. DONOHOE with Mr. FAIRCHILD.

Mr. DOREMUS with Mr. FULLER.

Mr. ESTOPINAL with Mr. DRAPER.

Mr. EVANS with Mr. GARDNER of New Jersey.

Mr. FERGUSSON with Mr. GOOD.

Mr. FERRIS with Mr. HARRIS.

Mr. GEORGE with Mr. HARTMAN.

Mr. GLASS with Mr. SLEMP.

Mr. GODWIN of North Carolina with Mr. HAUGEN.

Mr. GOEKE with Mr. HEALD.

Mr. GOLDFOGLE with Mr. HELGESEN.

Mr. HAMMOND with Mr. HENRY of Connecticut.

Mr. HARRISON of New York with Mr. HUGHES of West Virginia.

Mr. HART with Mr. LAFFERTY.

Mr. HEFLIN with Mr. HUMPHREY of Washington.

Mr. HOUSTON with Mr. MOON of Pennsylvania.

Mr. HUGHES of Georgia with Mr. JACKSON.

Mr. JAMES with Mr. WEEKS.

Mr. KONIG with Mr. McCREARY.

Mr. KORBLY with Mr. McGUIRE of Oklahoma.

Mr. LEVY with Mr. McKINNEY.

Mr. LEWIS with Mr. McKINLEY.

Mr. MAHER with Mr. MATTHEWS.

Mr. MARTIN of Colorado with Mr. MILLER.

Mr. MORGAN of Louisiana with Mr. MONDELL.

Mr. PATTEN of New York with Mr. MERRITT.

Mr. PALMER with Mr. LONGWORTH.

Mr. PETERS with Mr. NYE.

Mr. POST with Mr. PICKETT.

Mr. RANDELL of Texas with Mr. PORTER.

Mr. RANSDELL of Louisiana with Mr. PRINCE.

Mr. RAUCH with Mr. PROUTY.

Mr. RICHARDSON with Mr. ROBERTS of Nevada.

Mr. ROTHERMEL with Mr. SELLS.

Mr. RUCKER of Missouri with Mr. J. M. C. SMITH.

Mr. RUCKER of Colorado with Mr. SPEER.

Mr. SABATH with Mr. RODENBERG.

Mr. SAUNDERS with Mr. TAYLOR of Ohio.

Mr. SHARP with Mr. STEENERSON.

Mr. SIMS with Mr. TOWNER.

Mr. SLAYDEN with Mr. VARE.

Mr. SMITH of New York with Mr. POWERS.

Mr. SMALL with Mr. VREELAND.

Mr. STEPHENS of Nebraska with Mr. WOOD of New Jersey.

Mr. STANLEY with Mr. WILSON of Illinois.

Mr. WHITE with Mr. YOUNG of Kansas.

Mr. PEPPER with Mr. YOUNG of Michigan.

Mr. LINDSAY with Mr. NELSON.

Ending February 25, 1913:

Mr. McDERMOTT with Mr. HAWLEY.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Curtiss, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 8389. An act to provide for an enlarged homestead.

SENATE BILLS AND RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate bills and joint resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 8233. An act authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912; to the Committee on Military Affairs.

S. 7802. An act to amend section 103 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

S. J. Res. 162. Joint resolution to exempt the National Academy of Sciences from the payment of duty on medals imported for presentation by it in recognition of research work; to the Committee on Ways and Means.

S. 8389. An act to provide for an enlarged homestead; to the Committee on the Public Lands.

ENROLLED BILLS SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 26812. An act to provide for selection by the State of Idaho of phosphate and oil lands;

H. R. 23293. An act for the protection of the water supply of the city of Colorado Springs and of the town of Manitou, Colo.;

H. R. 21220. An act to extend the power of the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor;

H. R. 17260. An act to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910;

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River, in the State of West Virginia;

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes;

H. R. 26648. An act for the relief of David Crowther; and

H. R. 3957. An act for the relief of Isaac Thompson.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 11478. To quiet title and possession with respect to a certain unconfirmed and located private land claim in Baldwin County, Ala., in so far as the records of the General Land Office show said claim to be free from conflict; and

H. R. 2839. For the relief of William Hommelsberg.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD of Virginia. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 28607, a bill making appropriations for the Diplomatic and Consular Service, to nonconcur in the Senate amendments and request a conference.

The question was taken, and the motion was agreed to.

The SPEAKER. The Chair announces the following conferees.

The Clerk read as follows:

Mr. FLOOD of Virginia, Mr. GARNER, and Mr. McKINLEY.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, pending the announcement, I wish to renew the request which I submitted that general debate may proceed to-night until 11 o'clock, if there be so many as desire to speak, and that the time may be divided as I indicated in my first request.

The SPEAKER. Is there objection?

Mr. CULLOP. Mr. Speaker, I object to the unanimous-consent request.

The SPEAKER. The gentleman from Indiana [Mr. CULLOP] objects.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 28812, the naval appropriation bill, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 28812, the naval appropriation bill, and the Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to dispense with the first reading of the bill.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to dispense with the first reading of the bill. Is there objection?

Mr. CARY. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. PADGETT. Let the Clerk read.

The Clerk proceeded to read the bill.

Mr. BOOHER. Mr. Chairman, this is a very important matter, the reading of this bill, and I notice that very few Members are present. They all ought to be here, and I make the point of order there is no quorum present.

Mr. CARY. Mr. Chairman, I move a call of the House——

Mr. HARDWICK. That is not in order, Mr. Chairman, under the rule. You can have a call of the committee.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union reported that that committee had had under consideration the bill H. R. 28812, the naval appropriation bill, and had come to no resolution thereon.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 33 minutes p. m.) the House adjourned to meet at 10.30 a. m. to-morrow, Saturday, February 22, 1913.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of Commerce and Labor, transmitting a detailed statement of the number of documents received and the number distributed by this department during the calendar year 1912 (H. Doc. No. 1411); to the Committee on Expenditures in the Department of Commerce and Labor and ordered to be printed.

2. A letter from the president of the board of directors of Columbia Hospital and the Superintendent of the United States Capitol Building and Grounds, submitting plans and specifications of a new building for Columbia Hospital for Women and Lying-in Asylum (H. Doc. No. 1412); to the Committee on Appropriations and ordered to be printed with illustrations.

3. A letter from the Secretary of the Treasury, transmitting a copy of a communication of the Acting Secretary of the Navy reporting adjustment and determination of amount due owner of the wharf at the foot of Commerce Street, Norfolk, Va., for damages for which vessels of the Navy were found to be responsible (H. Doc. No. 1413); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Secretary of the Treasury, transmitting a communication from the Secretary of Agriculture submitting additional estimates of appropriation for inclusion in the general deficiency bill made necessary on account of the recent fires in the Bureau of Plant Industry (H. Doc. No. 1414); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolution were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HOUSTON, from the Committee on the Census, to which was referred the bill (H. R. 28820) providing for the publication of the Official Register of the United States, reported the same with amendment, accompanied by a report (No. 1559), which said bill and report were referred to the House Calendar.

Mr. COLLIER, from the Committee on Industrial Arts and Expositions, to which was referred the bill (H. R. 19224) to provide for a permanent exhibit of the resources of the States of the Union in or near Washington, D. C., reported the same with amendment, accompanied by a report (No. 1558), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (S. 1068) authorizing the extension of First Street east, and for other purposes, reported the same without amendment, accompanied by a report (No. 1562), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LAFFERTY: A bill (H. R. 28821) for additional protection of the Bull Run Forest Reserve and the sources of the water supply of the city of Portland, in the State of Oregon; to the Committee on the Public Lands.

By Mr. PARRAN: A bill (H. R. 28822) to provide for the construction of a military post road from the city of Washington, D. C., through the counties of Prince Georges and Anne Arundel, in the State of Maryland, to Annapolis, Md.; to the Committee on Agriculture.

By Mr. CLAYTON: A bill (H. R. 28823) to provide for a struck jury in all civil actions triable by jury; to the Committee on the Judiciary.

By Mr. STEENERSON: A bill (H. R. 28824) providing for compensation to postal employees injured while in the performance of official duties; to the Committee on the Post Office and Post Roads.

By Mr. RAKER: A bill (H. R. 28825) restoring to the public domain certain lands heretofore reserved for reservoir purposes in Big Valley, in Lassen and Modoc Counties, and in Round and Pitt River Valleys, in Modoc County, Cal.; to the Committee on Irrigation of Arid Lands.

By Mr. HAYDEN (by request): A bill (H. R. 28831) directing the Secretary of the Interior to enter into contracts with water users' associations for the purpose of collecting the cost of construction of reclamation works, and for other purposes; to the Committee on Irrigation of Arid Lands.

Also (by request), a bill (H. R. 28832) to provide for the disposition of money received from the sale of power developed on reclamation projects, and for other purposes; to the Committee on Irrigation of Arid Lands.

Also (by request), a bill (H. R. 28833) creating the office of director of the Reclamation Service, and for other purposes; to the Committee on Irrigation of Arid Lands.

Also (by request), a bill (H. R. 28834) to extend the time for the repayment of the cost of reclamation projects; to the Committee on Irrigation of Arid Lands.

Also (by request), a bill (H. R. 28835) establishing the farm unit on reclamation projects, and for other purposes; to the Committee on Irrigation of Arid Lands.

Also (by request), a bill (H. R. 28836) authorizing homestead entrymen who are officers of water users' associations to reside off their entries during their terms as such officers; to the Committee on Irrigation of Arid Lands.

By Mr. WILSON of Pennsylvania: A bill (H. R. 28837) to regulate the hours of labor in continuous working plants of the United States; to the Committee on Labor.

By Mr. AKIN of New York: Resolution (H. Res. 858) calling upon employees of the Weather Bureau to give evidence as to certain alleged irregular conditions existing therein, etc.; to the Committee on Agriculture.

By Mr. DUPRÉ: Resolution (H. Res. 859) for a reprint of the Soil Survey of the New Orleans Area, La.; to the Committee on Printing.

By Mr. MURRAY: Memorial from the Legislature of the State of Massachusetts, relative to an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor; to the Committee on the Judiciary.

By Mr. WEEKS: Memorial from the Legislature of the State of Massachusetts, relative to an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor; to the Committee on the Judiciary.

By Mr. WARBURTON: Senate joint memorial of Washington State Legislature, urging legislation by Congress to restrict immigration of undesirable foreigners; to the Committee on Immigration and Naturalization.

Also, senate joint memorial of the Washington State Legislature, asking Government survey of Palouse irrigation project, Franklin County, Wash.; to the Committee on Irrigation of Arid Lands.

Also, senate joint memorial of Washington State Legislature, urging passage of House bill 5966, providing monument to mark the Oregon Trail; to the Committee on Agriculture.

By Mr. RAKER: Resolutions passed by the State Senate of the Legislature of California, urging the passage of House bill 13500; to the Committee on Immigration and Naturalization.

By Mr. HUMPHREY of Washington: Senate joint memorial of the Washington State Legislature, asking Government survey of the Palouse irrigation project, Franklin County, Wash.; to the Committee on Irrigation of Arid Lands.

Also, senate joint memorial of the Washington State Legislature, asking Congress to pass restrictive legislation to stop undesirable immigration into the United States; to the Committee on Immigration and Naturalization.

Also, senate joint memorial of the State Legislature of Washington, urging the passage of House bill 5966 providing for the location, marking, and monumenting of the Oregon trail from the Missouri River to Puget Sound; to the Committee on Agriculture.

By Mr. LAFFERTY: Senate joint memorial of the Legislature of Oregon, favoring passage of House bill 2981 to create Saddle Mountain National Park; to the Committee on the Public Lands.

Also, memorial of the Legislature of the State of Oregon, urging the necessary proceedings to secure the north half of the northeast quarter of section 9, township 34 south, range 7 east, of Willamette meridian, in the Klamath Reservation, Oreg., for a fish hatchery; to the Committee on the Merchant Marine and Fisheries.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUSTIN: A bill (H. R. 28826) granting an increase of pension to John Bullock; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 28827) granting an increase of pension to Daniel L. Witt; to the Committee on Invalid Pensions.

By Mr. HAMMOND: A bill (H. R. 28828) granting an increase of pension to Elizabeth McClarg; to the Committee on Invalid Pensions.

By Mr. HULL: A bill (H. R. 28829) for the relief of the legal representatives of Wilson Bloodworth; to the Committee on War Claims.

By Mr. POST: A bill (H. R. 28830) granting an increase of pension to Francis M. Tillinghast; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANDERSON: Petition of business men of Lanesboro, Minn., favoring the passage of legislation to compel concerns selling direct to the consumer entirely by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. ASHBROOK: Petition of the Dayton (Ohio) Chamber of Commerce, favoring the passage of the Page bill granting Federal aid for vocational education; to the Committee on Agriculture.

Also, petition of Mrs. A. E. Rolls and 21 other citizens of Coshocton County, Ohio, protesting against the passage of the Johnston Sunday bill for the proper observance of Sunday as a day of rest in the District of Columbia; to the Committee on the District of Columbia.

By Mr. BURNETT: Petition of citizens of Madison County, Ala., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. BYRNS of Tennessee: Petition of sundry ladies of Nashville, Tenn., favoring the passage of legislation for the preservation of the Old Colonial Exchange, Charleston, S. C.; to the Committee on the Library.

By Mr. CARY: Petition of the Wisconsin Machinery & Manufacturing Co., Milwaukee, Wis., protesting against the passage of House bill 28570, for providing uniform regulations for boats engaged in towing service; to the Committee on the Merchant Marine and Fisheries.

Also, petition of George P. Barth, of Milwaukee, Wis., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

Also, petition of A. C. Burill, of Madison, Wis., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

Also, petition of the Cook County Truck Gardeners and Farmers' Association, Riverdale, Ill., protesting against the passage of legislation reducing the present tariff on sugar; to the Committee on Ways and Means.

Also, petition of the governor and others of the State of New York, protesting against the passage of the legislation for the control and regulation of the Niagara River; to the Committee on Foreign Affairs.

By Mr. CRAGO: Petition of residents of Point Marion, Pa., favoring the passage of legislation for investigation of the persecution of the editors of the Appeal to Reason by the Department of Justice; to the Committee on Expenditures in the Post Office Department.

By Mr. CURRIER: Petition of sundry school children of Bradford, N. H., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. FITZGERALD: Petition of the American Protective Tariff League, New York, N. Y., favoring the passage of legislation to repeal section 2 of the reciprocity act, to protect the paper and pulp industry; to the Committee on Ways and Means.

By Mr. FULLER: Petition of I. P. Brest, Moravia, Pa., favoring the passage of House bill 1339, for increasing the pensions of veterans of the Civil War who lost an arm or leg; to the Committee on Invalid Pensions.

By Mr. GARNER: Petition of the Cosmos Club, Corpus Christi, Tex., protesting against the passage of legislation tending to change the present national system of forest conservation; to the Committee on Agriculture.

By Mr. HAYES: Petition of the Cook County Truck Gardeners and Farmers' Association, of Riverdale, Ill., protesting against the passage of legislation to reduce the present tariff on sugar; to the Committee on Ways and Means.

Also, petition of the Dunham, Carrigan & Hayden Co., favoring the passage of the Weeks bill (H. R. 27567) for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

Also, petition of the Humboldt County Dairy Association, California, favoring the passage of the Haugen bill to prevent the manufacture and sale of butter substitutes colored in imitation of butter; to the Committee on Agriculture.

By Mr. KINDRED: Petition of the Central Federated Union of New York and vicinity, protesting against the passage of House bill 8141, for placing the State militia on the national pay roll; to the Committee on Military Affairs.

By Mr. LINDSAY: Petition of J. P. Brest, New Castle, Pa., favoring the passage of House bill 1339, granting an increase of pension to veterans of the Civil War who lost an arm or leg; to the Committee on Invalid Pensions.

By Mr. McCALL: Petition of the General Court of the Commonwealth of Massachusetts, favoring the passage of an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor; to the Committee on the Judiciary.

By Mr. PAYNE: Petition of the Consumers' League of Auburn, N. Y., favoring the passage of House bill 27281, for limiting the hours of work for the women of the District of Columbia; to the Committee on Labor.

Also, petition of the New York State Conference on Taxation, Binghamton, N. Y., favoring the passage of legislation for enlarging the work of the Census Department; to the Committee on the Census.

By Mr. RAKER: Petition of Gadaden Council, No. 14, Junior Order United American Mechanics, favoring the passage of House bill 13500, amending an act to regulate the immigration of aliens into the United States; to the Committee on Immigration and Naturalization.

Also, petition of the Dunham, Carrigan & Hayden Co., San Francisco, Cal., favoring the passage of House bill 27567, for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. STEPHENS of California: Petition of the Friday Morning Club, Los Angeles, Cal., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. TALCOTT of New York: Petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, to prevent discriminations in the Panama tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of citizens of New York, favoring the passage of the Kenyon "red-light" injunction bill for the cleaning up of

Washington for the inauguration; to the Committee on the District of Columbia.

Also, petition of the United Hatters of North America, Brooklyn, N. Y., protesting against the passage of legislation for the reduction of tariff on hats; to the Committee on Ways and Means.

Also, petition of the Waterville (N. Y.) school, favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

By Mr. UNDERHILL: Petition of citizens of New York, favoring the passage of the McLean bill for granting Federal aid to all migratory birds; to the Committee on Agriculture.

SENATE.

SATURDAY, *February 22, 1913.*

The Senate met at 11 o'clock a. m.

The Chaplain, Rev. Ulysses G. B. Pierce, D. D., offered the following prayer:

Almighty God, our heavenly Father, we thank Thee for the Providence which brings us to this day of holy and patriotic memory. In the light of the great example of him whom Thou wast pleased to make the father or our country, we here, with grateful and adoring hearts, consecrate ourselves anew to the service of this Thy people. Receive our offering, we pray Thee, and grant that by Thy grace this may be that happy Nation whose God is the Lord.

O God, who dost commit unto us the swift and solemn charge of life, we thank Thee for the life, the character, and the public service of him whom our lips shall this day name. We can not forget him who labored by our side, who shared our counsels, and who brake with us the bread of life. We honor ourselves, our Father, in honoring him who honored Thee. Despite our loneliness, we are the richer because such have lived. Though his body is buried in peace, his name liveth, and his memory is henceforth safely enshrined in our hearts.

We pray Thee, our heavenly Father, to comfort those to whom this sorrow is most bitter and to whom this loss is most sore. Grant, we humbly pray Thee, that their hearts may evermore be in unbroken communion with his emancipated spirit. Quiet their restless and yearning hearts, until the day of the fuller life shall break and the shadows of our earthly sorrows shall flee away.

In the name of Him who abolished death and brought life and immortality to light, hear Thou our prayer. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

READING OF WASHINGTON'S FAREWELL ADDRESS.

The PRESIDENT pro tempore (Mr. GALLINGER). Pursuant to the order heretofore made by the Senate that upon this day Washington's Farewell Address shall be read to the Senate, and in accordance with the designation made by the President pro tempore of the Senate, the Senator from Connecticut, Mr. BRANDEGEE, will now execute the order.

Mr. BRANDEGEE read the address, as follows:

To the people of the United States.

FRIENDS AND FELLOW CITIZENS: The period for a new election of a citizen to administer the executive government of the United States being not far distant, and the time actually arrived when your thoughts must be employed in designating the person who is to be clothed with that important trust, it appears to me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured that this resolution has not been taken without a strict regard to all the considerations appertaining to the relation which binds a dutiful citizen to his country, and that in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest, no deficiency of grateful respect for your past kindness, but am supported by a full conviction that the step is compatible with both.

The acceptance of and continuance hitherto in the office to which your suffrages have twice called me, have been a uniform sacrifice of inclination to the opinion of duty and to a deference for what appeared to be your desire. I constantly hoped that it would have been much earlier in my power, consistently with motives which I was not at liberty to disregard, to return to that retirement from which I had been reluctantly drawn. The strength of my inclination to do this previous to the last election had even led to the preparation of an address to declare it to you, but mature reflection on the then perplexed and critical posture of our affairs with foreign nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.

I rejoice that the state of your concerns, external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty or propriety, and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country you will not disapprove my determination to retire.

The impressions with which I first undertook the arduous trust were explained on the proper occasion. In the discharge of this trust I will only say that I have, with good intentions, contributed toward the organization and administration of the Government the best exertions of which a very fallible judgment was capable. Not unconscious in the outset of the inferiority of my qualifications, experience, in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself, and every day the increasing weight of years admonishes me more and more that the shade of retirement is as necessary to me as it will be welcome. Satisfied that if any circumstances have given peculiar value to my services they were temporary, I have the consolation to believe that while choice and prudence invite me to quit the political scene patriotism does not forbid it.

In looking forward to the moment which is to terminate the career of my political life, my feelings do not permit me to suspend the deep acknowledgment of that debt of gratitude which I owe to my beloved country for the many honors it has conferred upon me, still more for the steadfast confidence with which it has supported me, and for the opportunities I have thence enjoyed of manifesting my inviolable attachment by services faithful and persevering, though in usefulness unequal to my zeal. If benefits have resulted to our country from these services, let it always be remembered to your praise, and as an instructive example in our annals, that under circumstances in which the passions, agitated in every direction, were liable to mislead amidst appearances sometimes dubious, vicissitudes of fortune often discouraging—in situations in which, not unfrequently, want of success has countenanced the spirit of criticism—the constancy of your support was the essential prop of the efforts and a guaranty of the plans by which they were effected. Profoundly penetrated with this idea, I shall carry it with me to my grave as a strong incitement to unceasing vows that Heaven may continue to you the choicest tokens of its beneficence; that your union and brotherly affection may be perpetual; that the free Constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue; that, in fine, the happiness of the people of these States, under the auspices of liberty, may be made complete by so careful a preservation and so prudent a use of this blessing as will acquire to them the glory of recommending it to the applause, the affection, and adoption of every nation which is yet a stranger to it.

Here, perhaps, I ought to stop. But a solicitude for your welfare, which can not end but with my life, and the apprehension of danger natural to that solicitude urge me, on an occasion like the present, to offer to your solemn contemplation and to recommend to your frequent review some sentiments which are the result of much reflection, of no inconsiderable observation, and which appear to me all important to the permanency of your felicity as a people. These will be offered to you with the more freedom as you can only see in them the disinterested warnings of a parting friend who can possibly have no personal motive to bias his counsel. Nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

The unity of government which constitutes you one people is also now dear to you. It is justly so, for it is a main pillar in the edifice of your real independence, the support of your tranquillity at home, your peace abroad, of your safety, of your prosperity, of that very liberty which you so highly prize. But as it is easy to foresee that from different causes and from different quarters much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth, as this is the point in your political fortress against which the batteries of internal and external enemies wil be most constantly

and actively, though often covertly and insidiously, directed, it is of infinite moment that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual, and immovable attachment to it, accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity, watching for its preservation with jealous anxiety, discountenancing whatever may suggest even a suspicion that it can in any event be abandoned, and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth or choice of a common country, that country has a right to concentrate your affections. The name of American, which belongs to you in your national capacity, must always exalt the just pride of patriotism more than any appellation derived from local discriminations. With slight shades of difference you have the same religion, manners, habits, and political principles. You have in a common cause fought and triumphed together; the independence and liberty you possess are the work of joint counsels and joint efforts, of common dangers, sufferings, and successes.

But these considerations, however powerfully they address themselves to your sensibility, are greatly outweighed by those which apply more immediately to your interest. Here every portion of our country finds the most commanding motives for carefully guarding and preserving the union of the whole.

The North in an unrestrained intercourse with the South, protected by the equal laws of a common government, finds in the productions of the latter great additional resources of maritime and commercial enterprise and precious materials of manufacturing industry. The South in the same intercourse, benefiting by the same agency of the North, sees its agriculture grow and its commerce expand. Turning partly into its own channels the seamen of the North it finds its particular navigation invigorated, and while it contributes in different ways to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength to which itself is unequally adapted. The East in a like intercourse with the West already finds, and in the progressive improvement of interior communications by land and water will more and more find, a valuable vent for the commodities which it brings from abroad or manufactures at home. The West derives from the East supplies requisite to its growth and comfort, and, what is perhaps of still greater consequence, it must of necessity owe the secure enjoyment of indispensable outlets for its own productions to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest as one nation. Any other tenure by which the West can hold this essential advantage, whether derived from its own separate strength or from an apostate and unnatural connection with any foreign power, must be intrinsically precarious.

While, then, every part of our country thus feels an immediate and particular interest in union, all the parts combined can not fail to find in the united mass of means and efforts greater strength, greater resource, proportionably greater security from external danger, a less frequent interruption of their peace by foreign nations, and, what is of inestimable value, they must derive from union an exemption from those broils and wars between themselves which so frequently afflict neighboring countries not tied together by the same government, which their own rivalship alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues would stimulate and embitter. Hence likewise they will avoid the necessity of those overgrown military establishments, which under any form of government are inauspicious to liberty and which are to be regarded as particularly hostile to republican liberty. In this sense it is that your union ought to be considered as a main prop of your liberty, and that the love of the one ought to endear to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind, and exhibit the continuance of the Union as a primary object of patriotic desire. Is there a doubt whether a common government can embrace so large a sphere? Let experience solve it. To listen to mere speculation in such a case were criminal. We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment. It is well worth a fair and full experiment. With such powerful and obvious motives to union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who in any quarter may endeavor to weaken its hands.

In contemplating the causes which may disturb our Union, it occurs as matter of serious concern that any ground should have been furnished for characterizing parties by geographical discriminations—northern and southern, Atlantic and western—whence designing men may endeavor to excite a belief that there is a real difference of local interests and views. One of the expedients of party to acquire influence within particular districts is to misrepresent the opinions and aims of other districts. You can not shield yourselves too much against the jealousies and heartburnings which spring from these misrepresentations; they tend to render alien to each other those who ought to be bound together by fraternal affection. The inhabitants of our western country have lately had a useful lesson on this head; they have seen, in the negotiation by the Executive and in the unanimous ratification by the Senate of the treaty with Spain, and in the universal satisfaction at the event throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the General Government and in the Atlantic States unfriendly to their interests in regard to the Mississippi. They have been witnesses to the formation of two treaties—that with Great Britain and that with Spain—which secure to them everything they could desire, in respect to our foreign relations, toward confirming their prosperity. Will it not be their wisdom to rely for the preservation of these advantages on the union by which they were procured? Will they not henceforth be deaf to those advisers, if such they are, who would sever them from their brethren and connect them with aliens?

To the efficacy and permanency of your Union a government for the whole is indispensable. No alliances, however strict, between the parts can be an adequate substitute; they must inevitably experience the infractions and interruptions which all alliances in all times have experienced. Sensible of this momentous truth, you have improved upon your first essay by the adoption of a constitution of government, better calculated than your former, for an intimate union and for the efficacious management of your common concerns. This Government, the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribution of its powers, uniting security with energy, and containing within itself a provision for its own amendment, has a just claim to your confidence and your support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. The basis of our political systems is the right of the people to make and to alter their constitutions of government; but the constitution which at any time exists, until changed by an explicit and authentic act of the whole people, is sacredly obligatory upon all. The very idea of the power and the right of the people to establish government presuppose the duty of every individual to obey the established Government.

All obstructions to the execution of the laws, all combinations and associations, under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberations and action of the constituted authorities, are destructive of this fundamental principle and of fatal tendency. They serve to organize faction, to give it an artificial and extraordinary force, to put in the place of the delegated will of the Nation the will of party, often a small but artful and enterprising minority of the community; and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill-concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.

However combinations or associations of the above description may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men, will be enabled to subvert the power of the people, and to usurp for themselves the reins of government; destroying afterwards the very engines which have lifted them to unjust dominion.

Toward the preservation of your Government and the permanency of your present happy state, it is requisite, not only that you steadily discountenance irregular opposition to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the Constitution, alterations which will impair the energy of the system; and thus to undermine what can not be directly overthrown. In all the changes to which you may be invited,

remember that time and habit are at least as necessary to fix the true character of governments, as of other human institutions; that experience is the surest standard by which to test the real tendency of the existing constitution of a country; that facility in changes, upon the credit of mere hypothesis and opinion, exposes to perpetual change from the endless variety of hypothesis and opinion; and remember, especially, that for the efficient management of your common interests in a country so extensive as ours, a government of as much vigor as is consistent with the perfect security of liberty is indispensable. Liberty itself will find in such a government, with powers properly distributed and adjusted, its surest guardian. It is, indeed, little else than a name, where the government is too feeble to withstand the enterprises of faction, to confine each member of the society within the limits prescribed by the laws, and to maintain all in the secure and tranquil enjoyment of the rights of person and property.

I have already intimated to you the danger of parties in the State, with particular references to the founding them on geographical discrimination. Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the spirit of party generally.

This spirit, unfortunately, is inseparable from our nature, having its root in the strongest passions of the human mind. It exists under different shapes in all governments, more or less stifled, controlled, or repressed; but in those of the popular form it is seen in its greatest rankness, and is truly their worst enemy.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism. But this leads at length to a more formal and permanent despotism. The disorders and miseries which result gradually incline the minds of men to seek security and repose in the absolute power of an individual; and, sooner or later, the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purpose of his own elevation on the ruins of public liberty.

Without looking forward to an extremity of this kind (which nevertheless ought not to be entirely out of sight), the common and continual mischiefs of the spirit of party are sufficient to make it the interest and duty of a wise people to discourage and restrain it.

It serves always to distract the public councils and enfeeble the public administration. It agitates the community with ill-founded jealousies and false alarms; kindles the animosity of one part against another; foments occasional riot and insurrection. It opens the door to foreign influence and corruption, which finds a facilitated access to the Government itself through the channels of party passions. Thus the policy and the will of one country are subjected to the policy and will of another.

There is an opinion that parties in free countries are useful checks upon the administration of the government, and serve to keep alive the spirit of liberty. This, within certain limits, is probably true; and in governments of a monarchial cast patriotism may look with indulgence, if not with favor, upon the spirit of party. But in those of the popular character, in governments purely elective, it is a spirit not to be encouraged. From their natural tendency it is certain there will always be enough of that spirit for every salutary purpose. And there being constant danger of excess, the effort ought to be, by force of public opinion, to mitigate and assuage it. A fire not to be quenched, it demands a uniform vigilance to prevent it bursting into a flame, lest, instead of warming, it should consume.

It is important likewise that the habits of thinking in a free country should inspire caution in those intrusted with its administration to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories and constituting each the guardian of the public weal against invasions of the others, has been evinced by experiments, ancient and modern; some of them in our country and under our own eyes. To preserve them must be as necessary as to institute them. If in the opinion of the people the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the Constitution designates. But let there be no change by usurpation, for, though this in one instance may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield.

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, Where is the security for property, for reputation, for life, if the sense of religious obligation desert the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect that national morality can prevail in exclusion of religious principle.

It is substantially true that virtue or morality is a necessary spring of popular government. The rule, indeed, extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion it should be enlightened.

As a very important source of strength and security cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering also that timely disbursements to prepare for danger frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions in time of peace to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear. The execution of these maxims belongs to your representatives, but it is necessary that public opinion should cooperate. To facilitate to them the performance of their duty it is essential that you should practically bear in mind that toward the payment of debts there must be revenue; that to have revenue there must be taxes; that no taxes can be devised which are not more or less inconvenient and unpleasant; that the intrinsic embarrassment inseparable from the selection of the proper object, which is always a choice of difficulties, ought to be a decisive motive for a candid construction of the conduct of the government in making it, and for a spirit of acquiescence in the measures for obtaining revenue, which the public exigencies may at any time dictate.

Observe good faith and justice toward all nations, cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and at no distant period a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt but, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas, is it rendered impossible by its vices?

In the execution of such a plan nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others should be excluded; and that, in place of them, just and amicable feelings toward all should be cultivated. The nation which indulges toward another an habitual hatred or an habitual fondness is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity and adopts through passion what reason would reject; at other times it makes the animosity of the nation subservient to projects of hostility, instigated by

pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim.

So, likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications. It leads also to concessions to the favorite nation of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted, or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.

As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils. Such an attachment of a small or weak toward a great and powerful nation, dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence—I conjure you to believe me fellow citizens—the jealousy of a free people ought to be constantly awake, since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike for another cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people to surrender their interests.

The great rule of conduct for us in regard to foreign nations is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop.

Europe has a set of primary interests which to us have none or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence therefore it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us will not lightly hazard the giving us provocation, when we may choose peace or war as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor, or caprice?

It is our true policy to steer clear of permanent alliance with any portion of the foreign world—so far, I mean, as we are now at liberty to do it—for let me not be understood as capable of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than private affairs that honesty is always the best policy. I repeat it, therefore, let those engagements be observed in their genuine sense. But, in my opinion, it is unnecessary and would be unwise to extend them.

Taking care always to keep ourselves, by suitable establishments, on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

Harmony and a liberal intercourse with all nations are recommended by policy, humanity, and interest. But even our commercial policy should hold an equal and impartial hand; neither seeking nor granting exclusive favors or preferences, consulting the natural course of things, diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the Government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance it may place itself in the condition of having given equivalents for nominal favors and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect or calculate upon real favors from nation to nation. It is an illusion which experience must cure, which a just pride ought to discard.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish—that they will control the usual current of the passions or prevent our Nation from running the course which has hitherto marked the destiny of nations—but if I may even flatter myself that they may be productive of some partial benefit, some occasional good, that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism, this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

How far, in the discharge of my official duties, I have been guided by the principles which have been delineated, the public records and other evidences of my conduct must witness to you and to the world. To myself the assurance of my own conscience is that I have, at least, believed myself to be guided by them.

In relation to the still subsisting war in Europe, my proclamation of the 22d of April, 1793, is the index to my plan. Sanctioned by your approving voice and by that of your Representatives in both Houses of Congress, the spirit of that measure has continually governed me, uninfluenced by any attempts to deter or divert me from it.

After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take and was bound in duty and interest to take a neutral position. Having taken it, I determined, as far as should depend upon me, to maintain it with moderation, perseverance, and firmness.

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

The duty of holding a neutral conduct may be inferred, without anything more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity toward other nations.

The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me a predominant motive has been to endeavor to gain time to our country to settle and mature its yet recent institutions and to progress, without interruption, to that degree of strength and consistency which is necessary to give it, humanly speaking, the command of its own fortunes.

Though in reviewing the incidents of my administration I am unconscious of intentional error, I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors. Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend. I shall also carry with me the hope that my country will never cease to view them with indulgence, and that, after 45 years of my life dedicated to its service with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest.

Relying on its kindness in this as in other things and actuated by that fervent love toward it, which is so natural to a man who views in it the native soil of himself and his progenitors for several generations, I anticipate with pleasing expectation that retreat in which I promise myself to realize,

without alloy, the sweet enjoyment of partaking in the midst of my fellow citizens the benign influence of good laws under a free government—the ever favorite object of my heart and the happy reward, as I trust, of our mutual cares, labors, and dangers.

GEO. WASHINGTON.

UNITED STATES, *17th September, 1796.*

ESTIMATES OF APPROPRIATIONS (S. DOC. NO. 1101).

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of War, submitting supplemental estimates of appropriations required by the War Department, for the fiscal year 1914, for barracks and quarters, roads, walks, wharves, and drainage, water and sewers at military posts, $780,428, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

DEPOSIT OF PUBLIC MONEYS IN NATIONAL BANKS (S. DOC. NO. 1103).

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 11th instant, information relative to the order directing certain changes in the method of handling receipts and disbursements of the Government. The communication and accompanying papers will be printed and referred to the Committee on Appropriations, and the communication will be ordered printed in the RECORD.

The communication is as follows:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, February 21, 1913.

The PRESIDENT OF THE SENATE.

SIR: By direction of the President, I have the honor to make reply to the inquiry contained in the resolution of the Senate agreed to February 11, 1913, concerning the order which went into effect on February 1, directing certain changes in the methods of handling the receipts and disbursements of the Government.

Before the establishment of the national banking system in 1863, the Government's fiscal machinery consisted principally of the Treasury and the Subtreasuries. A predominating feature of this system, still in part prevailing, is that it requires the use of money as distinguished from checks in the daily fiscal operations of the Government; that is to say, an Assistant Treasurer can only issue certificates of deposit to collection officers upon the receipt of currency—can only accept their collections in actual money; and checks drawn on the Subtreasuries are paid in actual money.

The national bank act (sec. 5153, Rev. Stat.) provided that all national banks, when designated as depositaries by the Secretary of the Treasury, shall be the financial agents of the Government; and in them may be deposited the revenues "except receipts from customs." So that since 1863 all revenues except from customs could be and mainly have been deposited in banks like the funds of private persons, and those of State, municipal, and other governments. Congress removed the restriction as to customs by an act approved March 4, 1907, entitled "An act to amend the national bank act and for other purposes" and thus abolished an exception that had ceased to have any use and had become a mere survival. Under the above provision of the national bank act it has been the practice for many years to have the banks receive internal-revenue taxes and transmit them to the subtreasuries. In the year 1870—in order to meet the public convenience and to conform to general business customs—collectors of internal revenue began to take checks in payment of internal revenue; but did so at their personal risk. When, at the request of the Treasury Department, this form of payment was made legal by the act of March 2, 1911, the practice had already become universal as to internal revenue. Up to that time, however, customs payments were still made in currency—though some practical mitigations of this cumbersome practice had in the course of the years been introduced. Since the passage of the act of 1911, both customs and internal revenue are paid by check. But, as stated, notwithstanding the present legal practice of receiving checks in payment of customs and internal revenue, these checks must be cashed before the proceeds can be deposited in the Subtreasuries. In all Subtreasury cities except Cincinnati and Philadelphia this is done through the agency of the clearing house.

As the daily payments of the Government are practically equal to its daily income, the desirability of a method whereby the receipts and payments shall clear each other is apparent; and the method to be complete should bring about this clearing before the point is reached of converting the checks into currency in the Subtreasuries. The new plan, regarding which the Senate has made inquiry, is designed to accomplish this result, and will accomplish it as a matter of course.

Its operation can not result in an automatic accumulation of Government funds in national-bank depositories, for there are the restrictive regulations which are applied under section 5153 of the Revised Statutes to national banks holding Government funds. Under these restrictions every national-bank depositary is required to have on deposit with the Treasurer of the United States security in the form of bonds to the full amount of the authorized balance the Government has with the bank. I say authorized balance, because the limit of the deposits in each bank is fixed by the Treasury Department and usually continues at one amount for a considerable time; and under the new plan these strictly limited amounts, secured by bonds, will be dependent upon the amount of the daily business done by the bank for the Government. With special exceptions these bonds have been either Government bonds or bonds for which the Government is financially responsible. The bank is permitted to hold the amount of its authorized deposit with which to transact the Government's business, but must transfer immediately all amounts in excess of this authorized balance from whatever source received. The department directs these transfers under standing instructions to the points where funds are needed for payments. Under this system the depositary banks have for years handled the entire income from internal revenue without any accumulation of funds in the banks in excess of their authorized balances. Last year internal-revenue receipts exceeded the income from customs, amounting to $321,612,199.

Under the new plan customs receipts are to be handled in the same manner as the internal revenues—under the excellent and progressive law of March 4, 1907; and, of course, with the restrictions and limitations on the banks unchanged.

Moreover, in times like the present, when the Government's income and outgo practically offset each other, it is hardly necessary to take seriously the fear that the deposits in New York banks will be increased by hundreds of millions. Before you can deposits hundreds of millions you must have the money.

Why this law of 1907 was not availed of at once I do not know. I authorized the preparation of plans to put it into effect as soon as I heard of it, which was about September 1 of last year.

Instead of the authorized balances held by banks being more or less inactive as they have been in the past, a feature of the new plan provides that the banks shall pay the checks of disbursing officers which are now drawn on the Treasurer of the United States instead of on the banks or Subtreasuries and charge the same to the account of the Treasurer, in whose name the funds in the bank are deposited. Section 3593 of the Revised Statutes provides that "All public moneys paid into any depositary shall be subject to the draft of the Treasurer of the United States, drawn agreeably to appropriations made by law." Section 3620 of the Revised Statutes authorizes disbursing officers to keep their accounts with the Treasurer of the United States and with Assistant Treasurers. The accounts or credits of all disbursing officers have accordingly now been placed with the Treasurer of the United States, as authorized. No balances are held in any banks to the credit of disbursing officers; but all Government moneys in the banks are to the credit of the Treasurer of the United States. This feature of the new plan makes it possible for the first time for the Treasury to have a far more exact daily knowledge of the financial accounts of the Government; for against the credit given each disbursing officer with the Treasurer of the United States is charged the checks drawn by the disbursing officer and paid by the depositary banks and Subtreasuries and sent daily to the Treasury. The banks making these payments for the Government out of their authorized balance are furnished daily with Government deposits sufficient to restore the balance to its fixed amount. In this way, as previously stated, the daily income will in the banks meet and clear the daily expenses of the Government, and only the excess of income over disbursements will be deposited in currency with the Subtreasuries.

Another advantage of the new plan which is of peculiar importance is the added convenience to the creditors of the Government. Checks drawn on the Treasurer of the United States are now good at par wherever they may be presented, since any depositary will pay them. Particularly will this benefit pensioners. Heretofore in a great many cases exchange has been charged pensioners by banks in cashing their checks because they were payable only at Subtreasuries or the Treasury. The new plan for pension payments, approved by Congress August 17, 1912, became effective February 1, and was the controlling reason for fixing that date for making the entire change.

The purpose, therefore, of the new system is to so handle the Government's income as to meet its payments with the same convenience to its creditors and with the same par values that are customary in the best regulated private business, and so that only the excess of Government receipts shall find its way into the Treasury or Subtreasuries.

One of the necessary requirements of the plan is the distribution of the revenues to the banks in just the proper amounts to keep their authorized balances filled. Another requirement of the plan is to make those authorized balances suited to the amount and character of the business done; that is to say, to give them funds just in proportion to the payments they make for the Government. Up to the present time, under the new system, the bank balances have still been replenished by transfers direct from the Subtreasuries. The feature of depositing customs receipts direct with the banks—which has not yet been begun in the Subtreasury cities, and is therefore not yet in full operation—will obviate much of the necessity for these transfers. These deposits, however, will not exceed the payments made by the banks.

It may be stated that in the brief trial the new plan has had it is working satisfactorily. The department has found itself able to handle the accounts and take care of all of the disbursements throughout the country without serious hitch. Of course, in making such a comprehensive change, it must be expected that there will be details to adjust, all of which require a little time. Meanwhile the banks throughout the country have cooperated cordially.

The necessity under the new plan of having additional depositary banks in the subtreasury cities made necessary an adjustment of the bank accounts in general. This resulted in net increased deposits being made amounting to a total of $363,000. While no depositaries were discontinued, there has been ordered withdrawn from existing depositaries a total of $6,090,000; there has been added in new depositaries $6,453,000, making, as stated, a total increase in banks of $363,000. Of this sum $4,963,000 has been placed in the nine Subtreasury cities. The total amount in banks is approximately $50,000,000; but as the reductions ordered are to take place on March 1 this amount will be cut down to approximately $46,000,000 at that time. Security has been required to the full amount of the deposits, consisting of United States bonds, District of Columbia, Porto Rico, Hawaiian, Philippine, Philippine Railway, and Manila Railway bonds. No interest is or ever has been charged on these deposits, as they constitute the active accounts of the Government upon which no interest charge is contemplated by law.

In making new depositaries it has been specified to each that the balances would be adjusted from time to time to meet the Government needs.

The total payments made by the Subtreasuries during the last fiscal year, which indicates also the amount of disbursing officers' accounts during that time, is as follows:

Baltimore	$14,781,760.03
Boston	32,636,655.40
Chicago	49,946,150.02
Cincinnati	18,923,771.38
New Orleans	16,841,291.95
New York	276,038,159.92
Philadelphia	34,702,796.95
San Francisco	43,436,595.97
St. Louis	33,890,565.62
Washington	81,854,121.97
Total	603,051,869.21

There is transmitted a list of the depositary banks with their balances on December 31; a list of the depositaries added on account of the new system, and the amount of their balances; and a list of the banks holding inactive accounts upon which interest is paid to the Government. The postal savings funds are handled by the Post Office Department, and that feature of the resolution has been referred to the Postmaster General.

Respectfully,

FRANKLIN MACVEAGH,
Secretary.

MRS. MARY MACARTHUR.

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the secretary of state of the State of Wisconsin, transmitting a certified copy of a resolution adopted by the legislature of that State memorializing Congress to grant a life pension to the widow of the late Lieut. Gen. Arthur MacArthur.

Mr. LA FOLLETTE. I ask that the communication and the resolution of the legislature may be read.

The PRESIDENT pro tempore. They will be read.

The Secretary read as follows:

DEPARTMENT OF STATE,
Madison, Wis., February 20, 1913.

PRESIDENT OF THE SENATE,
Washington, D. C.

DEAR SIR: In compliance with the provisions of joint resolution No. 21, senate, I am transmitting herewith a copy of same.

Very truly, yours,

J. S. DONALD, *Secretary of State,*
Per COBBAN.

Senate joint resolution 21.

Resolved by the senate (the assembly concurring), That the Congress of the United States be memorialized to testify its appreciation of the great and distinguished services of the late Lieut. Gen. Arthur MacArthur throughout his life by voting to his widow a pension of $2,500 per year, as has been done in the cases of other officers of his rank.

Resolved further, That a copy of this resolution be transmitted by the secretary of state to the Senate of the United States and to the House of Representatives of the United States, and to each of the Senators and Representatives from this State.

HOWARD TEASDALE,
President of the Senate.
MERLIN HULL,
Speaker of the Assembly.
F. M. WYLIE,
Chief Clerk of the Senate.
C. E. SHAFFER,
Chief Clerk of the Assembly.

The PRESIDENT pro tempore. The communication and the resolution of the Legislature of Wisconsin will be referred to the Committee on Pensions.

EIGHT-HOUR LAW.

The PRESIDENT pro tempore laid before the Senate a communication from the secretary of the Commonwealth of Massachusetts, transmitting a certified copy of resolutions adopted by the General Court of that Commonwealth, petitioning for the submission of an amendment to the Constitution giving Congress power to regulate the hours of labor in the United States, which were referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

THE COMMONWEALTH OF MASSACHUSETTS, 1913.

Resolutions relative to an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor.

Resolved, That the General Court of the Commonwealth of Massachusetts, believing that there is injustice both to industries and labor by reason of the lack of uniformity in the laws of the several States respecting hours of labor, respectfully petitions the Congress of the United States that Congress propose an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor and to make the same uniform throughout the United States.

Resolved, That certified copies of these resolutions be sent by the secretary of the Commonwealth to the presiding officers of both branches of Congress, and to each of the Senators and Representatives from Massachusetts.

In house of representatives, adopted, January 30, 1913.
In senate, adopted, in concurrence, February 4, 1913.
A true copy. Attest:

FRANK J. DONOHUE,
Secretary of the Commonwealth.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had agreed to the amendment of the Senate to the bill (H. R. 20102) relating to proof of signatures and handwritings.

The message also announced that the House had agreed to the report of the second committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes.

The message further announced that the House had passed the bill (H. R. 28775) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, in which it requested the concurrence of the Senate.

The message also announced that the House insists upon its amendment to the joint resolution (S. J. Res. 143) authorizing the Secretary of War to loan certain tents for use at the meeting of the Imperial Council of the Ancient Arabic Order of the Nobles of the Mystic Shrine to be held at Dallas, Tex., in May, 1913, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SLAYDEN, Mr. WATKINS, and Mr. KAHN managers at the conference on the part of the House.

The message further announced that the House insists upon its amendments to the bill (S. 8178) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RUSSELL, Mr. ADAIR, and Mr. FULLER managers at the conference on the part of the House.

The message also announced that the House insists upon its amendments to the bill (S. 8274) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RUSSELL, Mr. ADAIR, and Mr. FULLER managers at the conference on the part of the House.

The message further announced that the House insists upon its amendments to the bill (S. 8275) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RICHARDSON, Mr. DICKSON of Mississippi, and Mr. WOOD of New Jersey managers at the conference on the part of the House.

The message also announced that the House insists upon its amendments to the bill (S. 8314) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two House thereon, and had appointed Mr. RUSSELL, Mr. ADAIR, and Mr. FULLER managers at the conference on the part of the House.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. ADAMSON, Mr. COVINGTON, and Mr. STEVENS of Minnesota managers at the conference on the part of the House.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. FLOOD of Virginia, Mr. GARNER, and Mr. MCKINLEY managers at the conference on the part of the House.

The message further announced that the House had disagreed to the amendment of the Senate to the joint resolution (H. J. Res. 365) to permit Col. William C. Gorgas and certain other officers of the Medical Corps and certain officers of the Engineer Corps of the Army to accept service under the Republic of Ecuador, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. SLAYDEN, Mr. DENT, and Mr. PRINCE managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

H. R. 3957. An act for the relief of Isaac Thompson;

H. R. 17260. An act to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910;

H. R. 21220. An act to extend the power of the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor;

H. R. 23293. An act for the protection of the water supply of the city of Colorado Springs and of the town of Manitou, Colo.;

H. R. 26048. An act for the relief of David Crowther;

H. R. 26812. An act to provide for selection by the State of Idaho of phosphate and oil lands;

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River in the State of West Virginia; and

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha River, and for other purposes.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented resolutions adopted by the board of aldermen of New York City, N. Y., favoring the construction of battleships at the New York Navy Yard, which were referred to the Committee on Naval Affairs.

He also presented a memorial of sundry citizens of Martinsburg, W. Va., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. BRISTOW presented memorials of sundry citizens of Herndon and Nekoma, in the State of Kansas, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

He also presented a petition of sundry citizens of Wakeeney, Kans., praying for the enactment of legislation authorizing the Government to loan money to farmers at a certain per cent, which was ordered to lie on the table.

Mr. GRONNA presented a memorial of sundry citizens of Stutsman County, N. Dak., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. LODGE. I present resolutions adopted by the General Court of the Commonwealth of Massachusetts, favoring the submission of an amendment to the Constitution giving to Congress the power to regulate the hours of labor in the United States, which I ask be referred to the Committee on the Judiciary.

These resolutions have been already presented by the Chair and they were ordered printed in the RECORD.

Mr. WARREN. I present a joint memorial of the Legislature of the State of Wyoming indorsing and recommending the passage of House bill 27012, which I ask may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the memorial was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA,
State of Wyoming, ss:

I, Frank L. Houx, secretary of state of the State of Wyoming, do hereby certify that the following and hereto attached copy of enrolled joint memorial No. 4, House of Representatives State of Wyoming, has been carefully compared with the original, filed in this office on the 18th day of February, A. D. 1913, and is a full, true, and correct copy of the same and of the whole thereof.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Wyoming.

Done at Cheyenne, the capital, this 18th day of February, A. D. 1913.

[SEAL.] FRANK L. HOUX,
Secretary of State,
By F. H. WESCOTT,
Deputy.

Original house joint memorial No. 5, Twelfth Legislature of the State of Wyoming.

Enrolled joint memorial 4, House of Representatives State of Wyoming.

Memorial to the Senate and House of Representatives of the United States relative to the expenditure of 25 per cent of the receipts from the national forests for the construction and maintenance of roads and trails within the national forests from the States in which such proceeds are derived.

Be it resolved by the House of Representatives of the State of Wyoming (the Senate concurring), That the Congress of the United States be memorialized as follows:

Whereas there was introduced in the House of Representatives of the Congress of the United States in the third session of the Sixty-second Congress, being House roll 27012, a bill providing for the expenditure of 25 per cent of the receipts from the national forests for road and trail construction; and

Whereas said bill provides for the expenditure of 25 per cent of all moneys received from the national forests for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived; and

Whereas we believe that a portion of such proceeds should be expended upon the development and advancement of the States within the boundaries of which are the resources which produced the revenue: Now therefore be it

Resolved, That we indorse and recommend passage of said bill.

MARTIN L. PRATT,
Speaker of the House.
BIRNEY H. SAGE,
President of the Senate.

Approved February 17, 1913, at 4.45 p. m.

JOSEPH M. CAREY, *Governor.*

Mr. PAGE presented memorials of the congregation of the Seventh-day Adventist Church of Enosburg, and of sundry citizens of Woodstock, Hartland, and Taftsville, all in the State of Vermont, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. STONE presented petitions of Hamilton Fish, Junior, Camp, No. 1, and Nelson Cole Camp, No. 2, of St. Louis, and of James Rush Lincoln Camp, No. 12, of Hannibal, United Spanish War Veterans, Department of Illinois, and of sundry citizens of St. Louis, all in the State of Missouri, praying for the enactment of legislation granting pensions to widows and minor children of soldiers who served in the Spanish-American War, which were ordered to lie on the table.

He also presented a petition of the Trades and Labor Assembly of Springfield, Mo., and a petition of the Federation of Labor of Sedalia, Mo., praying that an investigation be made into the methods of enforcing the Federal laws relating to the inspection of locomotives and railway safety appliances, which were referred to the Committee on Interstate Commerce.

He also presented a memorial of members of the Home Culture Club, of Bonne Terre, Mo., remonstrating against the transfer of the control of the national forests to the several States, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a memorial of sundry citizens of Ozark, Mo., remonstrating against the enactment of legislation permitting the coloring of oleomargarine in imitation of butter, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of the Trades and Labor Assembly of Hannibal, Mo., praying for the enactment of legislation providing for the construction of the proposed new battleships in Government navy yards of the country, which was referred to the Committee on Naval Affairs.

He also presented a memorial of Local Division No. 141, Order of Railway Conductors, of St. Joseph, Mo., remonstrating against the passage of the so-called workmen's compensation bill, which was ordered to lie on the table.

He also presented a memorial of members of the Stationers' Club of St. Louis, Mo., remonstrating against the enactment of legislation to codify, revise, and amend the laws relating to patents, which was referred to the Committee on Patents.

He also presented a petition of the Trades and Labor Assembly of Springfield, Mo., praying for the enactment of legislation regulating injunctions and the punishment for contempt of court, which was referred to the Committee on the Judiciary.

He also presented petitions of the Board of Trade of Kansas City, the Commercial Club of Kansas City, and of the State Association of Master Plumbers, all in the State of Missouri, praying for the adoption of a 1-cent postage on all first-class mail matter, which were referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Kansas City, Clinton, Chitwood, Nevada, and Carthage, all in the State of Missouri, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

FIFTH-THIRD NATIONAL BANK OF CINCINNATI, OHIO.

Mr. KERN. From the Committee on Finance I report back favorably without amendment the bill (H. R. 26279) granting the Fifth-Third National Bank of Cincinnati, Ohio, the right to use original charter No. 20, and I submit a report (No. 1284) thereon. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes the Comptroller of the Currency to issue to the Fifth-Third National Bank of Cincinnati, Ohio, charter No. 20 in lieu of their present charter, No. 2798, said charter No. 20 being the original charter number of the Third National Bank of Cincinnati, Ohio, which bank was merged and consolidated with the Fifth National Bank of Cincinnati,

Ohio, in the year 1908, under the name of the Fifth-Third National Bank of Cincinnati, Ohio, said consolidated bank having succeeded to all the assets, good will, rights, privileges, and emoluments of the Third National Bank of Cincinnati, Ohio.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, as follows:

By Mr. CURTIS:

A bill (S. 8573) granting an increase of pension to George M. Trickey; to the Committee on Pensions.

By Mr. GUGGENHEIM:

A bill (S. 8574) providing for the erection of a monument to commemorate the site of old Fort Morgan, Colo. (with accompanying papers); to the Committee on the Library.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. LODGE submitted an amendment proposing to appropriate $250 to pay Edward T. Clark for extra services in connection with the preparation of the immigration bill, intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment providing that the time within which claims may be presented for refunding of sums illegally withheld from owners of private dies under section 3425 of the Revised Statutes be extended to December 31, 1913, intended to be proposed by him to the general deficiency appropriation bill, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment fixing the limit of cost of the appraisers' stores building at Boston, Mass., to $1,250,000, intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. NELSON submitted an amendment providing that in all cases hereafter certified the accounting officers shall in stating balances follow the decisions of the United States Supreme Court or of the Court of Claims of the United States after the time for appeal has expired, etc., intended to be proposed by him to the sundry civil appropriation bill, which was ordered to be printed, and, with the accompanying paper, referred to the Committee on Appropriations.

Mr. CHAMBERLAIN submitted an amendment proposing to appropriate $150,000 for a United States post-office building at Roseburg, Oreg., intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. MYERS submitted an amendment authorizing the Secretary of the Interior to determine and provide for payment out of the reclamation fund on account of any damage to property not liquidated in advance that has heretofore or may hereafter arise under an implied contract for reimbursement and which may be due to the operation and management of work constructed under the reclamation act of June 17, 1902, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CURTIS submitted an amendment proposing to appropriate $150,000 for the construction and enlargement of military posts, of which amount $10,000 shall be available for the construction of a building for instruction purposes at Fort Leavenworth, Kans., etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate $100,000 for an international joint commission, United States and Great Britain, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. ROOT submitted an amendment authorizing the President to appoint a commission of seven members, to be known as the Peace Centennial Commission, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. LEA submitted an amendment proposing to appropriate $10,000 for the construction and maintenance of a lodge at the entrance of the national park for the keeper of said park at Lookout Mountain, Tenn., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BANKHEAD submitted an amendment proposing to amend the act approved February 4, 1913, by inserting, after the words "loan associations," in the title of the act and also in section 10 thereof, the word "pawnbrokers," intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. STONE submitted an amendment proposing to appropriate $47,550 for one additional mail lift and one combination freight and passenger elevator and for additions to mail apparatus and other improvements, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. WETMORE submitted an amendment authorizing the Secretary of the Navy to cause the necessary repairs and preservation of the U. S. S. *Constellation*, *Portsmouth*, and *Olympia*, intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

DEPARTMENT OF LABOR.

Mr. BORAH. Mr. President, I wish to ask unanimous consent that on Tuesday next the Senate will take up Order of Business No. 856, House bill 22913, for consideration immediately after the routine morning business, and that we shall vote upon the bill, together with the amendments, not later than 3 o'clock on that day. It is what is known as the Department of Labor bill.

Mr. SMOOT. Mr. President, I shall have to object to that unless the agreement provides that it shall not interfere with appropriation bills or conference reports.

Mr. BORAH. Of course, the Senator can exercise his privilege to object. I will only say that it is not my purpose to interfere with those bills, but I prefer not to insert that in the unanimous-consent agreement. We can take care of that matter when it comes up. If we make that exception, it may be utilized for the purpose of interfering with this bill.

Mr. SMOOT. I have no desire at all to prevent a vote upon the bill, but at this stage of the session I do not believe a unanimous-consent agreement ought to be made unless it provides that it shall not interfere with appropriation bills and conference reports.

Mr. BORAH. I will insert that exception, then, Mr. President.

The PRESIDENT pro tempore. The unanimous-consent agreement asked for will be stated by the Secretary.

The SECRETARY. It is agreed, by unanimous consent, that on Tuesday, February 25, 1913, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (H. R. 22913) to create a Department of Labor, and that at not later than 3 o'clock p. m. on that day the Senate will proceed——

Mr. BORAH. Permit me to state there that I will insert the calendar day instead of an hour.

The SECRETARY. And that on that day the Senate will proceed, without further debate, to vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill—through the regular parliamentary stages—to its final disposition; such consideration, however, not to interfere with the consideration of appropriation bills or conference reports.

Mr. SMOOT. Does not the Senator think the legislative day would be better than the calendar day at this time of the session?

Mr. LODGE. Oh, no. I should have to object to any legislative-day agreement, Mr. President.

Mr. BORAH. I think the calendar day would be better.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Idaho? The Chair hears none, and it is so ordered.

HOUSE BILL REFERRED.

H. R. 28775. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

SAMUEL H. FISHER.

Mr. BRANDEGEE. I ask unanimous consent that as in executive session the nomination of Samuel H. Fisher, of Connecticut, to be United States district judge for the district of Connecticut, which has been lying on the table for several days, may be referred to the Committee on the Judiciary. There is a vacancy in the office. The committee meets on Monday, and I should like to get the nomination there, so that it may be considered by the committee.

Mr. CLARKE of Arkansas. I object.

The PRESIDENT pro tempore. The Senator from Connecticut asks unanimous consent that as in executive session the

nomination of the district judge named may be referred to the Committee on the Judiciary.

Mr. CLARKE of Arkansas. I withdraw the objection.

Mr. BRANDEGEE. It is merely a reference to the committee.

Mr. CLARKE of Arkansas. I have no objection to that.

The PRESIDENT pro tempore. Without objection, the nomination will be referred to the Committee on the Judiciary.

RIVER AND HARBOR BILL.

Mr. NELSON. Mr. President, I move that the Senate proceed to the consideration of House bill 28180, the river and harbor bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SIMMONS. Mr. President, I wish to offer an amendment, on page 19 of the bill, at the end of line 2, to strike out the period and insert a colon and the following:

Provided, That not exceeding $2,000 thereof may be used for providing a channel to and from quarantine station, with a depth of water equal to project and depth of main river channel.

The PRESIDENT pro tempore. The Chair will suggest to the Senator that that amendment is not now in order. The committee amendments must first be disposed of. There is an amendment pending.

Mr. SIMMONS. I should like, out of order, to ask unanimous consent that it may be offered at this time. It is a very small matter, and does not ask for any additional appropriation. It simply takes $2,000 of the appropriation to make a channel for the quarantine station in the river.

The PRESIDENT pro tempore. The Senator from North Carolina asks unanimous consent that his amendment may be offered at this time. Is there objection? The Chair hears none, and the amendment will be stated by the Secretary.

The SECRETARY. On page 19, at the end of line 2, it is proposed to strike out the period and insert a colon and the following:

Provided, That not exceeding $2,000 thereof may be used for providing a channel to and from quarantine station with a depth of water equal to project and depth of main river channel.

The amendment was agreed to.

The PRESIDENT pro tempore. The pending amendment is on page 52 of the bill, commencing at line 14.

Mr. NELSON. Mr. President, for the sake of securing harmony—and I understand this will be satisfactory to all interests—I offer the following amendment to the amendment of the committee:

To strike out all after the word "examination," in line 22, page 52, and insert in place thereof the following:

"And for the building of such levees between said points upon the river in aid of navigation, as may be found necessary or desirable by the commission and approved by the Chief of Engineers, the sum of $200,000 is hereby appropriated."

That is to be a substitute for all in the committee amendment after the word "examination," in line 22.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. In the words proposed to be inserted by the committee, on page 52, line 22, after the word "examination," strike out the words "the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated," and in lieu insert:

And for the building of such levees between said points upon the river in aid of navigation, as may be found necessary or desirable by the commission and approved by the Chief of Engineers, the sum of $200,000 is hereby appropriated.

Mr. CLARKE of Arkansas. Mr. President, I hope that amendment will be adopted, because by its adoption and the acceptance of the amendment as amended it will fix a policy against which the Senators and Representatives from the lower Mississippi district can have no possible objection. It has never been their purpose to interfere with national aid to a river in any section of the country. We have not denied that appropriations could be properly made and that they were desirable in the upper Mississippi. Our contention has never gone to the extent of having it understood or committing ourselves otherwise to any policy that pretended that the lower Mississippi Valley was the only part of the United States where appropriations could be made in aid of the construction of levees for the various purposes for which levees are deemed desirable.

The principle of this amendment is that Congress in the exercise of its judgment has determined that the time has arrived when the levee interests of the upper Mississippi were to be looked to as an independent proposition and distinct from the lower Mississippi. The lower Mississippi has problems of its own, and they are not like the situation which exists anywhere else in this country. Their treatment has been a matter of growth. A great many experimental efforts have been made; a great many dollars have been invested from which no good results have followed. Finally a comprehensive and connected system has been evolved from past experience and past failures until we have entered upon a policy which will ultimately redeem that great valley from overflow.

So far from exhibiting a desire to oppose any amendment to provide for any other section similarly afflicted, each has imposed upon us a burden that can only be discharged by cooperating in every legitimate way with the representatives of other sections of the country, and we do so cheerfully.

Now that the objectionable principle involved in the provision incorporated by the House has been eliminated in a way that respects the rights of the upper Mississippi Valley without prejudice to the rights of the lower valley, we are not only willing to vote for it, but do so with some cheerfulness.

Mr. NELSON. I desire to have a vote upon this amendment to the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question now is upon the amendment as amended.

Mr. NELSON. That is to strike out and insert the amendment as amended.

Mr. KENYON. I should like to make an inquiry. A certain number of reaches are proposed to be stricken out. Is that the amendment we are now voting on?

The PRESIDENT pro tempore. The question is on striking out and inserting the amendment as amended.

Mr. CULLOM. I should like the whole amendment to be inserted read, so that we may see what it is.

The PRESIDENT pro tempore. The amendment as amended will now be read, at the request of the Senator from Illinois.

The SECRETARY. On page 52, beginning with line 5, strike out to line 13, inclusive, and in lieu insert:

The Mississippi River Commission shall make an examination of the Mississippi River from Cape Girardeau, Mo., to Rock Island, Ill., with a view to such improvements as will at the same time promote navigation, develop water power, and protect property adjacent to said river from damage by floods; and in making such examination consideration shall be given and recommendations made as to plans for cooperation by the localities affected; and for the purpose of such examination and for the building of such levees between said points upon the river in aid of navigation as may be found necessary or desirable by the commission and approved by the Chief of Engineers the sum of $200,000 is hereby appropriated.

Mr. CUMMINS. I desire to say that so far as I am concerned the committee amendment as amended is satisfactory.

Mr. CULLOM. It is satisfactory to me.

Mr. STONE. Mr. President, after consulting different Senators respecting the differences that have arisen between us and having in view the main object of those cooperating with me, I am willing to say to the Senate that while not entirely satisfactory it is acceptable, and I shall vote for the amendment as amended.

The PRESIDENT pro tempore. The question is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

The PRESIDENT pro tempore. The next reserved amendment will be stated.

Mr. STONE. Before——

Mr. NELSON. The next amendment is on page 55, striking out certain words. I wish to say to the Senator from Missouri about that matter that the committee had no information as to what was needed in regard to it in the way of bank revetments. We struck it out for the purpose of getting it into conference, and if it appears in conference that a bank revetment is needed we shall certainly agree to it. I wish the Senator would leave that paragraph of the bill stand as proposed by the committee.

Mr. STONE. Before we take that up I should like to ask the Senator from Minnesota a question, and that means that we shall go back to the Mississippi River item.

Mr. NELSON. No; the Mississippi River item has been disposed of.

Mr. STONE. Yes; we have agreed to that amendment. I wish to ask the Senator whether he would object to an amendment to the Mississippi River Commission item increasing the salaries of the commissioners from $3,000 to $6,000.

Mr. NELSON. That ought not to be in this bill. The matter of increasing salaries ought to be in another bill. I do not think it is proper to put that into this bill, and I have no au-

thority on behalf of the committee to agree to it. I trust the Senator will not complicate the matter.

Mr. STONE. I am not going to do it without the consent of the Senator from Minnesota. I suppose a point of order would lie against it.

Mr. NELSON. It certainly would, and I should feel it to be my duty to make the point of order.

Mr. STONE. I am not going to put the Senator to the necessity of making a point of order, but I do desire to say at this juncture that I am clear in the opinion that the members of the Mississippi River Commission, who are now receiving $3,000, are not adequately compensated. The members of other commissions performing like service and requiring no more of their time and attention are receiving $6,000 per annum. Of course I shall not press the matter beyond making this statement, but in the next bill which comes before Congress I hope that this manifest injustice will be rectified.

The PRESIDENT pro tempore. The paragraph of the bill on page 55, commencing in line 9, has not been dealt with.

Mr. STONE. Now, as to the Missouri River item, I am always disposed to follow——

Mr. NELSON. If the Senator will allow me, I stated a moment ago—I do not know whether the Senator heard me or not—that the committee had no information as to whether any revetment work there was needed, so we struck it out for the purpose of having it put into conference. If the House conferees show that it is a case as meritorious as the one below, we would certainly agree to it. I wish the Senator would let it go as it is to conference.

Mr. STONE. Mr. President, the House of Representatives put in the item proposed to be stricken out by the Committee on Commerce. The item is in this language. After appropriating $150,000 for the improvement of the Missouri River from Kansas City to Sioux City, this item follows:

Of which amount at least $75,000 may be expended for such bank revetment as, in the judgment of the Chief of Engineers, may be in the interests of navigation.

Why the committee struck it out is, in a measure, conjectural.

Mr. NELSON. I was trying to explain that to the Senator. I am afraid he did not understand me.

Mr. STONE. I understood what the Senator from Minnesota said.

Mr. NELSON. I said the committee had no information as to whether anything was needed for revetment there. Objection was made to it, and the committee agreed to strike it out for the purpose of putting it in conference. After we get the matter into conference, if there is necessity for the appropriation, we will restore it. The Senator can rely upon it that the committee will do what is just and fair in the premises.

Mr. STONE. Yes; I suppose I ought to have faith; indeed, there is no reason, I presume, from my experience here, why I should not have utmost faith in what the committee of conference will do.

But, Mr. President, there have been two surveys made of the river between Kansas City and Sioux City, made in pursuance of provisions inserted in river and harbor bills at the instance of the Committee on Commerce. There was great danger of the river breaking in at one point south of St. Joseph through what is known as Lake Contrary. The river banks have eroded until the river is within a short distance of this lake, and if the river should flow into that lake and pour on down through a long chain of lakes it would change the bed of the river; at least it would divide the waters of the river and result in very great injury to the people living there.

Now, that is one item. Then there is an island above St. Joseph, some distance just north of the island—I can not at the moment call the name of the island—on the Kansas side, where a like difficulty and danger appear.

When I was upon the Committee on Commerce I asked that some part of the money appropriated for the improvement of the river north of Kansas City might be set apart for revetting and protecting the banks on the Missouri side and on the Kansas side. I was then told that under the rules of the Commerce Committee, which had been a long time before adopted and rigidly adhered to, when appropriations were made for these rivers, a particular sum would not be set apart for expenditure at a given point. Now, that rule has been departed from. It has been departed from on the Mississippi River. My distinguished friend from Arkansas, the senior Senator [Mr. CLARKE], has wisely used his great influence upon the Committee on Commerce to induce that committee to set apart $100,000 of the appropriations made for the Mississippi River for expenditure at or near Helena, Ark.

Mr. CLARKE of Arkansas rose.

Mr. STONE. The Senator need not get up, because I entirely approve of what he did and I congratulate him and his constituents.

Mr. CLARKE of Arkansas. Approval and congratulation will not supply the fact. I have not been a member of the Committee on Commerce for some years. The only thing that commended that amendment to the favor of the committee and the Senate was its merits. The appropriation was not diverted from any purpose designed by Congress in making the appropriation; it was simply provided that in the choice of projects which would come under the jurisdiction of the Mississippi River Commission, they should give it preference because of the urgent character of the improvement.

Mr. STONE. The Senator knows that was a departure from the long-established practice of the committee.

Mr. CLARKE of Arkansas. I think not. It was in entire accordance with the practice of directing how an appropriation should be actually expended as between a number of projects for all of which it was intended. It was no departure from the procedure of the committee and no straining whatever of any rule that governed that committee in its deliberations.

Mr. STONE. We have agreed to that item setting apart $100,000 for expenditure at and near Helena. But the President pro tempore, long a member of the Committee on Commerce, knows, and every member of that committee knows——

[Mr. NELSON held a whispered conversation with Mr. STONE.]

Mr. TOWNSEND. Mr. President, I am unable to understand the debate that is going on at this time. May we not have order, so that we can hear the conversation between the Senators.

Mr. STONE. Mr. President, I yield.

[Laughter on the floor and in the galleries.]

The PRESIDENT pro tempore. The Senate will be in order, and the occupants of the galleries will likewise be in order. The next amendment passed over will be read.

The SECRETARY. On page 55, line 10, after "$150,000," strike out the words:

Of which amount at least $75,000 may be expended for such bank revetment as in the judgment of the Chief of Engineers may be in the interests of navigation.

Improving Missouri River: For improvement and maintenance from Kansas City to Sioux City, $150,000.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 55, line 16, after the word "session," to strike out "$150,000; in all, $300,000," and insert "$175,000, of which amount, because of present emergency, an amount not exceeding $75,000 may be expended for such bank revetment above Elk Point as in the judgment of the Chief of Engineers may be necessary to extend and protect existing revetments and regulate channel flow in the interest of navigation; in all, $325,000."

The amendment was agreed to.

Mr. NELSON. That disposes of the committee amendments. I understand that the Senator from Tennessee [Mr. WEBB] has an amendment to offer, and also the Senator from Nevada [Mr. NEWLANDS].

Mr. WEBB. I desire to offer an amendment to the pending bill. I send it to the desk, and ask that it may be read.

The PRESIDENT pro tempore. The Senator from Tennessee offers an amendment, which will be read.

The SECRETARY. On page 52, after line 23, insert:

That the sum of $200,000 is hereby appropriated, to be expended by the Mississippi River Commission, for revetting, leveeing, and otherwise improving the left bank of the Mississippi River at and near Memphis, Tenn., in cooperation with the municipal authorities at Memphis, for the purpose of preventing damage by floods and promoting the interests of navigation.

Mr. CLARKE of Arkansas. Mr. President, I feel compelled to renew the point of order against that amendment, which was made to a similar one on a former occasion and for the same reason. It proposes to add a new item to the appropriation bill without having been referred to the committee or having been included in any estimate.

Mr. LEA. If the Senator from Arkansas will yield for a moment. I hope he will not make that point of order. The entire trouble at Memphis is caused by the appropriations which have been made for doing work on the lower and upper Mississippi River. If it were not for those very generous appropriations, to which we have not objected and with which we have cooperated, there would be no trouble at Memphis. Every dollar that is expended on the lower Mississippi is causing a condition at Memphis that necessitates revetting and levee work, which would result in great damage to the city of Mem-

phis if it were not done, and it is not fair to ask the city of Memphis alone, the only point on the Mississippi River affected, to pay the damages that are caused by protecting other sections. I hope, therefore, the Senator from Arkansas will not insist on the point of order.

Mr. CLARKE of Arkansas. Mr. President, I made the point of order with the perfect understanding of what it meant. I am not averse to contributions by the Government to better conditions at Memphis, whether they arise from the construction of levees elsewhere or not. In the first place, I do not agree with the Senator that the construction of levees anywhere has had anything to do with conditions at Memphis. I am entirely friendly to the interests of Memphis, and would be glad to help them at any time when it could be done without seriously complicating greater interests elsewhere.

This matter has been considered elsewhere and has not met with favor. It can only have the effect of loading this bill with unpopular provisions at this time. When we have a better opportunity to give it the consideration that it deserves and to work out all the equities that inhere in it, I shall not only not object to it, but I shall be very glad to cooperate with the representatives from the State of Tennessee. At this time, however, I think it inopportune, in view of the history of the provision and the necessity for keeping this bill as free as possible from provisions that not only may delay its passage but may ultimately defeat it. I therefore renew the point of order.

Mr. WEBB rose.

The PRESIDENT pro tempore. Does the Senator from Tennessee desire to be heard on the point of order?

Mr. WEBB. Mr. President, I wish to say that the construction of levees to protect the lowland of Arkansas reduced the channel of the river to less than one-fifth of its original width at flood tide. That brought a flood upon the city of Memphis that put out the lights, cut off the water, choked the sewers, and produced typhoid fever. This is an additional appropriation, and I hope the Senator from Arkansas will withdraw his point of order against it.

Mr. NEWLANDS. Mr. President, I should very much question whether this item is subject to a point of order. Here we have an existing appropriation providing for the narrowing of the flood area of the Mississippi River opposite Memphis through the construction of levees upon the Arkansas side, which are designed partly to promote navigation and partly to protect large cultivable areas. The city of Memphis is situated on the bluff side, and the Arkansas side is the swamp side of the river. The result of the contraction of the river by those levees has been to force the flood of the river against the bluff side at Memphis in such a way as to seriously injure the public works there and to seriously imperil the health of the people. The work that has been inaugurated, recollect, is the work of narrowing the river, and this amendment is simply intended to carry out the existing work in such a way as to make it innocuous to the city and to its inhabitants.

It seems to me that the amendment is entirely in order, it being to provide for a part of an existing work; and it seems to me that it would be a very wise exercise of the judgment of Congress in providing now for the cooperation of the Mississippi River Commission with the municipal authorities of Memphis, through teamwork that will result in continuing the operation of narrowing the river without injury to the adjoining country.

Mr. LEA. Mr. President, as this point of order is different from the point of order which was ruled on by the Chair the other day, I ask that it be submitted to the Senate.

The PRESIDENT pro tempore. The rule is very explicit in this matter. First, as the Chair understands, the proposed appropriation has not been estimated for, and, next, the rule states that amendments proposing new items of appropriation to a river and harbor bill shall, before being considered, be referred to the Committee on Commerce, which in this instance has not been done. Therefore, the Chair reluctantly sustains the point of order.

Mr. CLARKE of Arkansas. I very reluctantly made the point of order.

Mr. NEWLANDS. Mr. President, I offer the amendment which I send to the desk, and ask that it be read.

The PRESIDENT pro tempore. The Senator from Nevada offers an amendment, which will be read.

The Secretary proceeded to read the amendment, which was, on page 65, after line 10, to insert a new section.

Mr. SIMMONS. Mr. President, I desire to ask the Senator from Nevada, as we are a little pressed for time, if he would consent to dispense with the reading and explain in a few words his amendment? I think the amendment can probably be better understood by Senators by an explanation than by a reading of it.

Mr. NEWLANDS. Mr. President, pursuant to the suggestion of the Senator from North Carolina, I ask that the amendment which I have offered be inserted in the RECORD without reading.

The PRESIDENT pro tempore. Is there objection to the request that the further reading of the amendment be dispensed with, and that it be inserted in full in the RECORD? The Chair hears none, and it will be so ordered.

The proposed amendment is to insert as a new section the following:

SEC. 3. That for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end for the storage of flood waters in the watershed of such navigable rivers, including the beneficial use and control of such flood waters, in the maintenance so far as practicable of a standard flow for navigation, the reclamation of arid and swamp lands, and the development of water power; and for the protection of watersheds from denudation, erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies in plans and works having in view such river regulation and control, the sum of $5,000,000 annually for each of the years following the 1st day of July, 1913, and up to the date of the completion and opening to commerce of the Panama Canal, and thereafter the sum of $50,000,000 annually for each of the 10 years following the completion of the Panama Canal, is hereby reserved, set aside, and appropriated and made available until expended, out of any moneys not otherwise appropriated, as a special fund in the Treasury to be known as the river-regulation fund.

That of the said river-regulation fund, until otherwise directed by law, one-tenth thereof shall be apportioned to the rivers on the Atlantic coast, one-tenth thereof to the rivers on the Gulf coast outside of the Mississippi River, one-fifth thereof to the Mississippi River from St. Louis to the Gulf, one-tenth thereof to the Missouri River and its tributaries, one-tenth thereof to the Ohio River and its tributaries, one-tenth thereof to the upper Mississippi River above St. Louis and its tributaries, one-tenth thereof to the Sacramento and San Joaquin Rivers and their tributaries in California, one-tenth thereof to the Columbia and Snake Rivers and their tributaries in Oregon, Washington, and Idaho, and one-tenth thereof in the connection of the Great Lakes with the Ohio and Mississippi Rivers.

That a board is hereby created, to be known as the Board of River Regulation, consisting of the Chief of Engineers of the United States Army, the chairman of the Panama Commission, the chairman of the Board of Review of the Engineer Corps of the Army, the chairman of the Mississippi River Commission, the Director of the United States Geological Survey, the Chief of the Weather Bureau, the Forester of the Department of Agriculture, the Director of the Reclamation Service, the Chief of the Drainage Division of the Department of Agriculture, the Secretary of the Smithsonian Institution, one hydraulic engineer, one sanitary engineer, and one electrical engineer; the last three to be appointed by the President and to hold office at his pleasure, and each to receive an annual compensation of $7,500, payable out of the river-regulation fund.

The Chief of Engineers shall be the chairman of such board, and the secretary shall be annually elected by the board from its members.

That the functions of said board shall be to investigate and obtain full information concerning all matters involved in or specifically related to the objects set forth in this section, and for such purpose is authorized to expend a suitable and necessary proportion of the moneys therein appropriated; but said board shall not expend or incur liability for the expenditure of any money for the construction or execution of plans or projects without the specific approval of Congress, as hereinafter set forth; that said board is hereby authorized and directed to enlist through the President the services of any Federal department or bureau the statutory authority of which may involve investigations or constructive work that is necessary or desirable in the comprehensive performance of the objects set forth in this section, and to bring into cooperation and to harmonize and unify the work of said departments or bureaus as may be necessary to provide against duplication or unwarranted or incomplete work with respect to the objects herein provided; and that said board is authorized to defray the expenses of such investigations or assistance to the extent of the ultimate cost thereof to said departments or bureaus through a transfer of equivalent proportions of the appropriation herein provided.

That the board shall develop, formulate, and prepare plans for the accomplishment of the purposes herein provided, and shall report the same to Congress annually and at such other times as may be required; and whenever the recommendations or any parts thereof in said report shall receive the approval of Congress the said board shall proceed to construct and execute the same in accordance with the plans so approved: *Provided*, That the provisions of this section shall be so administered as in no way to supersede or conflict with any specific provisions which Congress shall from time to time make by way of appropriations other than such as are made by this act for work and improvements to be performed or maintained by the Corps of Engineers, United States Army, but that all work prescribed under this section shall be supplemental to and coordinated with the work as specifically prescribed by Congress in other acts.

That the board shall in all cases where possible and practicable encourage, promote, and endeavor to secure the cooperation of State and local government bodies, public and quasi public corporations, private associations, and persons in carrying out the purposes and objects of this act, including the securing of the financial cooperation of said parties; that it shall negotiate and arrange plans for the apportionment of work, costs, and benefits, and to secure the agreement and consent of said parties, contingent upon the final approval of same by Congress as herein provided, which approval and consent may include the acceptance and use of any funds or property donated or subscribed or in any way provided for cooperative work; but no moneys shall be expended under any arrangement for cooperation approved by Congress until the funds to be provided by the parties to such arrangement shall have been made available for disbursement.

Mr. NEWLANDS. Mr. President, the amendment which I have offered is a condensation of a bill which I have presented in different phases during the last six or seven years for the

regulation of rivers by the creation of a board of river regulation, which shall bring into coordination the various scientific services of the Government whose duties in any way relate to the conservation or the use of water, such as the Reclamation Service, the Forestry Service, the Geological Survey, the Engineer Corps of the Army, the drainage service, and other scientific services of that kind. It provides for a river regulation fund, to which is appropriated until the completion of the Panama Canal only $5,000,000 annually, and after that time the sum of $50,000,000 annually for a period of 10 years, thus providing a sum of a little over $500,000,000, which will be expended in the regulation of our rivers during the next 10 or 12 years and which will insure continuous work upon all the watersheds of the country, that work embracing not only the cooperation of the services that relate to water, but the cooperation of the Nation with the States, so that the plans can be mutually prepared by the river regulation board and organizations effected by the States in such a way that the works contemplated by the respective sovereignties will dovetail into each other without conflict of jurisdiction and without the intrusion of any sovereign upon the jurisdiction of the other. It will insure teamwork that will secure the complete regulation of rivers, not only for the purposes of navigation, but for the purpose of storage for irrigation, storage for water-power development, control for swamp-land regulation, and all other uses to which the waters of rivers can be put, the idea being that every river is to be regarded as a unit composed of the main river, its lateral tributaries and source streams, and that the river should be developed by the exercise of all the powers and functions of the sovereigns and parties interested in the river in such a way as to secure its highest and best use for every purpose, the works to be constructed in such a way as to apportion the costs and the benefits to the relative jurisdictions.

The history of this proposed policy is as follows: In 1907 President Roosevelt appointed an Inland Waterways Commission, composed of two Senators, two Representatives, and five chiefs of the various services of the Government interested in water development—the Chief of Engineers of the Army, the Chief of the Forestry Service, the Chief of the Reclamation Service, the Chief of the Bureau of Corporations, and a representative of the Bureau of Soils. The duty assigned to that board by the executive department was to make an investigation as to the best method of regulating our rivers in such a way as to secure their highest use. That commission traveled all over the country. They made a report, in which they recommended practically everything contained in this amendment, with the exception that there was a difference of opinion as to whether a large fund should be created or whether the reports of the river board should come to Congress and appropriations be made based upon their reports, as now is the custom with reference to the river and harbor bill. To that report, in which I concurred as a member, I added an addendum, which is brief and the wisdom of which I think has been demonstrated by subsequent history. My statement was as follows:

I concur in the report of the commission, but desire to emphasize my belief that it is of the highest importance that in dealing with subjects relating to the respective powers, rights, and interests of the Nation, States, municipalities, corporations, and individuals, large powers and a comparatively free hand should be given to an administrative body of experts in the full development of projects, lest the complexity of the transactions, the time necessary to secure congressional approval, and difference of view as to purpose or method, may result in indecision and delay, the worst enemies of effective development.

An ample fund should be provided, to be reenforced from time to time either by legislative appropriation or by bond issue, and the administrative board, or commission, should be given the power not only to investigate projects, but also, when determined to be feasible, to enter, with the approval of the President, upon their immediate execution; but the power should be limited so as to prevent such administrative body from entering into any contract unless there are sufficient unappropriated moneys in the fund to meet the cost thereof.

Unless some method of construction and development insuring prompt decision and execution and continuous and consecutive work by a body of experts is adopted, I fear that the best of projects may be wrecked in the shoals and quicksands of legislation.

Mr. President, prior to the report of the Inland Waterways Commission I had introduced a bill covering this subject. That bill went to the Committee on Commerce, and was referred by the committee to the Inland Waterways Commission and to the Secretary of War for their opinion as to its merits. I wish to quote briefly from the report of the Inland Waterways Commission:

1. Several of the leading provisions of the bill are in accord with the recommendations of the commission in a report submitted on February 3 last and transmitted to the Congress by the President on February 26. Among these are (a) the provision for coordination of navigation with related uses of the waters; (b) the provision for cooperation between the Federal Government, States, municipalities, communities, corporations, and individuals; (c) the provision for correlating existing agencies in the Departments of War, Interior, Agriculture, and Commerce and Labor in such manner as to secure effective administration; and (d) the provisions looking toward the control of running waters in such manner as to protect and promote navigation. In so far as these provisions are concerned, the bill has the unqualified approbation of the commission.

* * * * * * *

3. The general purpose of the bill is in harmony with the comprehensive plan for improving and developing the waterways of the country framed by the commission and approved by the President in his message of February 26 last.

The Secretary of War, Mr. Taft, also made a report upon this bill, quotations from which I shall ask to have inserted in the RECORD. In that report the Secretary of War approved the bill. I shall not delay the Senate in the consideration of this bill by quoting freely from the report, but shall content myself with placing the extracts in the RECORD. I will simply say that he most emphatically indorsed the principle of coordinating the various Federal agencies and scientific bureaus in this work, and that he approved the method provided by the bill for bringing the Nation and the States into cooperation.

Shortly after that a conference of the governors was held at the White House, May 13, 1908. I shall ask to insert in the RECORD a statement from their resolutions, in which they unanimously indorsed the principle of cooperation in this work between the scientific services of the Government, cooperation of the Nation with the States, and the study and development of all our rivers in such a way as to promote every civilized use.

The PRESIDENT pro tempore. Without objection, leave will be granted as requested by the Senator.

The matter referred to is as follows:

[Extracts from the letter of Secretary of War William H. Taft to the Senate Committee on Commerce, dated Apr. 17, 1908, on the same subject.]

"(c) The bill provides for correlating the existing agencies in the Departments of War, Interior, Agriculture, and Commerce and Labor through certain powers vested in the President. The need for some such plan is sufficiently shown by the fact that while this country is better endowed with waterways than any other our streams are less used for navigation and other public purposes than those of other countries. Since this provision touches duties placed on the War Department by law, it has received careful consideration. It does not appear that the measure would interfere with the functions of the War Department, or with the continuation and extension of the engineering work now performed there, but it is believed that the provision for administration would tend to promote the general welfare. Accordingly this feature meets the approbation of the War Department.

* * * * * * *

"(e) The bill provides also for the initiation of projects by a board of experts. These provisions affect the work of the War Department and have had careful consideration. Suitable provisions for expert initiation and prompt execution are essential to the proper development of any system of river improvement. The chief defect in the methods hitherto pursued lies in the absence of executive authority for originating comprehensive plans covering the country or natural divisions thereof. The creation of an inland waterways commission for the purpose of initiating plans for the improvement of waterways seems to me a more effective way of a general plan for the improvement of all the waterways in the country than under the present provisions of law. This would not dispense with the admirable machinery furnished by the War Department for the improvement of waterways when the plan has been determined upon and is to be executed. But it supplies what does not exist in the law now—a tribunal other than Congress charged with the duty of originating and developing a satisfactory plan."

Secretary Taft adds:

"3. In its present form the bill might be construed to curtail indirectly certain functions of the War Department, which is now charged with large discretion in waterway affairs. Possible ambiguity on this point should be removed."

Mr. Taft goes on and gives the history of the Engineer Corps of the Army and shows how it drifted into the control of our waterways.

"Under the same long-standing arrangement"—

Mr. Taft says—

"it is the policy of the War Department to maintain a trained body of military engineers with a view to the national defense, and to keep these engineers in training in time of peace by detail to civil duty allied to their professional duty in time of war or military preparation; and it was in carrying out this policy that the functions of the War Department pertaining to waterways have been more and more largely intrusted to the Engineers of the Army during the 110 years since the Army and Navy were separated in distinct departments. This policy has long been sustained by the Congress, although the military engineers have been prohibited from initiating projects or originating plans for meeting the growing needs of commerce. It is desirable to continue the policy of keeping the military engineers in training and at the same time rendering their skilled service available in work on waterways, although it is not necessary to vest them with the power of initiative, which they have not exercised in the past and which is, perhaps, inconsistent with their primary duty in connection with the military establishment of which they form a part. A provision that the Chief of Engineers of the Army shall be a member of the commission proposed to be created, and a further provision specifically covering the detail of military engineers to the service of the commission whenever such detail shall be consistent with their military duties, would remove any possible ambiguity and would be in accord with the custom and policy of the War Department."

[Extracts from the conference of governors, held at the White House, May 13–15, 1908.]

We declare our firm conviction that this conservation of our natural resources is a subject of transcendent importance, which should engage unremittingly the attention of the Nation, the States, and the people in earnest cooperation. These natural resources include the land on

which we live and which yields our food; the living waters which fertilize the soil, supply power, and form great avenues of commerce; the forests which yield the materials for our homes, prevent erosion of the soil, and conserve the navigation and other uses of the streams; and the minerals which form the basis of our industrial life, and supply us with heat, light, and power.

We agree that the land should be so used that erosion and soil wash shall cease; and that there should be reclamation of arid and semiarid regions by means of irrigation, and of swamp and overflowed regions by means of drainage; that the waters should be so conserved and used as to promote navigation, to enable the arid regions to be reclaimed by irrigation, and to develop power in the interests of the people; that the forests which regulate our rivers, support our industries, and promote the fertility and productiveness of the soil should be preserved and perpetuated; that the minerals found so abundantly beneath the surface should be so used as to prolong their utility; that the beauty, healthfulness, and habitability of our country should be preserved and increased; that the sources of national wealth exist for the benefit of the people, and that monopoly thereof should not be tolerated.

We commend the wise forethought of the President in sounding the note of warning as to the waste and exhaustion of the natural resources of the country, and signify our high appreciation of his action in calling this conference to consider the same and to seek remedies therefor through cooperation of the Nation and the States.

We agree that this cooperation should find expression in suitable action by the Congress within the limits of and coextensive with the national jurisdiction of the subject, and, complementary thereto, by the legislatures of the several States within the limits of and coextensive with their jurisdiction.

We declare the conviction that in the use of the national resources our independent States are interdependent and bound together by ties of mutual benefits, responsibilities, and duties.

* * * * * * *

We recognize in our waters a most valuable asset of the people of the United States, and we recommend the enactment of laws looking to the conservation of water resources for irrigation, water supply, power, and navigation, to the end that navigable and source streams may be brought under complete control and fully utilized for every purpose. We especially urge on the Federal Congress the immediate adoption of a wise, active, and thorough waterway policy, providing for the prompt improvement of our streams and the conservation of their watersheds required for the uses of commerce and the protection of the interests of our people.

Mr. NEWLANDS. I will quote just one sentence:

We recognize in our waters a most valuable asset of the people of the United States, and we recommend the enactment of laws looking to the conservation of water resources for irrigation, water supply, power, and navigation, to the end that navigable and source streams may be brought under complete control and fully utilized for every purpose. We especially urge on the Federal Congress the immediate adoption of a wise, active, and thorough waterway policy, providing for the prompt improvement of our streams and the conservation of their watersheds required for the uses of commerce and the protection of the interests of our people.

Later on the political parties, in 1908, took action upon this subject. With the permission of the Senate, I will insert in the RECORD quotations from the platforms of 1908 and 1912, from which it will be seen that all of these parties recognized and indorsed the policy embraced in the river regulation bill which I have offered, and in this amendment, which is a condensation of that bill.

The PRESIDENT pro tempore. Without objection, leave will be granted.

The matter referred to is as follows:

[Declarations of the platforms of the Democratic and Republican Parties in 1908 relative to the improvement of the waterways.]

DEMOCRATIC PLATFORM 1908—WATERWAYS.

Water furnishes the cheaper means of transportations, and the National Government, having the control of navigable waters, should improve them to their fullest capacity. We earnestly favor the immediate adoption of a liberal and comprehensive plan for improving every water course in the Union which is justified by the needs of commerce; and, to secure that end, we favor, when practicable, the connection of the Great Lakes with the navigable rivers and with the Gulf through the Mississippi River, and the navigable rivers with each other, by artificial canals, with a view of perfecting a system of inland waterways to be navigated by vessels of standard draft.

We favor the coordination of the various services of the Government connected with waterways in one service, for the purpose of aiding in the completion of such a system of inland waterways; and we favor the creation of a fund ample for continuous work, which shall be conducted under the direction of a commission of experts to be authorized by law.

—

REPUBLICAN PLATFORM 1908—CONSERVATION.

We indorse the movement inaugurated by the administration for the conservation of the natural resources. * * * in the line of this splendid undertaking is the future day, equally, imperative, to enter upon a systematic improvement upon a large and comprehensive plan, just to all persons of the country, of the waterways, harbors, and Great Lakes, whose natural adaptability to the increasing traffic of the land is one of the greatest gifts of benign Providence.

NATURAL RESOURCES.

We repeat the demand for internal development and for the conservation of our natural resources contained in previous platforms, the enforcement of which Mr. Roosevelt has vainly sought from a reluctant party; and to that end we insist upon the preservation, protection, and replacement of needed forests, the preservation of the public domain of home seekers, the protection of the national resources in timber, coal, iron, and oil against monopolistic control, the development of our waterways for navigation and every other useful purpose, including the irrigation of arid lands, the reclamation of swamp lands, the clarification of streams, the development of water power, and the preservation of electric power generated by this natural force, from the control of monopoly; and to such end we urge the exercise of all powers, National, State, and municipal, both separately and in cooperation.

—

[Declarations of the platforms of the Democratic, Republican, and Progressive Parties in 1912 relative to the improvement of the waterways.]

DEMOCRATIC PLATFORM.

We renew the declaration of our last platform relating to the conservation of our national resources and the development of our waterways. The present devastation of the lower Mississippi Valley accentuates the movement for the regulation of river flow by additional levee and bank protection below, and the diversion, storage, and control of the flood waters above, and their utilization for beneficial purposes in the reclamation of arid and swamp lands and the development of water power, instead of permitting the floods to continue, as heretofore, agents of destruction. We hold that the control of the Mississippi River is a national problem. The preservation of the depth of its water for the purpose of navigation, the building of levees to maintain the integrity of its channel and the prevention of the overflow of the land, and its consequent devastation, resulting in the interruption of interstate commerce, the disorganization of the mail service, and the enormous loss of life and property, impose an obligation which alone can be discharged by the General Government.

To maintain an adequate depth of water the entire year and thereby encourage water transportation is a consummation worthy of legislative attention and presents an issue national in its character. It calls for prompt action on the part of Congress, and the Democratic Party pledges itself to the enactment of legislation leading to that end.

We favor the cooperation of the United States and the respective States in plans for the comprehensive treatment of all waterways with a view of coordinating plans for channel improvement with plans for drainage of swamp and overflowed lands, and to this end we favor the appropriation by the Federal Government of sufficient funds to make surveys of such lands, to develop plans for draining the same, and to supervise the work of construction.

We favor the adoption of a liberal and comprehensive plan for the development and improvement of our inland waterways with economy and efficiency, so as to permit their navigation by vessels of standard draft.

REPUBLICAN PLATFORM.

The Mississippi River is the Nation's drainage ditch. Its flood waters, gathered from 31 States and the Dominion of Canada, constitute an overpowering force which breaks the levees and pours its torrents over many million acres of the richest land in the Union, stopping mails, impeding commerce, and causing great loss of life and property. These floods are national in scope, and the disasters they produce seriously affect the general welfare. The States unaided can not cope with this giant problem; hence we believe the Federal Government should assume a fair proportion of the burden of its control, so as to prevent the disasters from recurring floods.

* * * * * * *

We favor a liberal and systematic policy for the improvement of our rivers and harbors. Such improvement has been made upon expert information and after a careful comparison of cost and prospective benefits.

PROGRESSIVE PARTY PLATFORM.

The rivers of the United States are the natural arteries of this continent. We demand that they shall be opened to traffic as indispensable parts of a great nation-wide system of transportation in which the Panama Canal will be the central link, thus enabling the whole interior of the United States to share with the Atlantic and Pacific seaboards in the benefit derived from the canals. It is a national obligation to develop our rivers, and especially the Mississippi and its tributaries, without delay under a comprehensive general plan covering each river system from its source to its mouth, designed to secure its highest usefulness for navigation, irrigation, domestic supply, water power, and the prevention of floods. We pledge our party to the immediate preparation of such a plan, which should be made and carried out in close and friendly cooperation between the Nation, the States, and the cities affected. Under such a plan the destructive floods of the Mississippi and other streams which represent a vast and needless loss to the Nation would be controlled by forest conservation and water storage at the headwaters and by levees below, land sufficient to support millions of people will be reclaimed from the deserts and the swamps, water power enough to transform the industrial standings of whole States would be developed, adequate water terminals would be provided, transportation by river would revive, and the railroads would be compelled to cooperate as freely with the boat lines as with each other. The equipment, organization, and experience acquired in constructing the Panama Canal soon will be available for the Lakes-to-the-Gulf deep waterways and other portions of this great work, and should be utilized by the Nation in cooperation with the various States at the lowest net cost to the people.

Mr. NEWLANDS. I shall not weary the Senate with the reading of these various platforms. It is sufficient to say that in 1908 the Republican Party indorsed this policy in general terms, and the Democratic Party indorsed it in express terms, specifically demanding what the pending amendment provides, namely, coordination of the services, cooperation with the States, an ample fund for continuous work, the dovetailing of plans so as to insure the construction and completion of works that would serve all the uses to which a river can be put, whether those uses are under national or under State jurisdiction, but providing for this teamwork and cooperative work in such a way as to preserve the integrity of the jurisdiction of each sovereign. The Democratic platform of 1912 indorsed and repeated its insistence upon the declaration of 1908, and added to it a declaration that the recent flood on the Mississippi River accentuated the demand for the development of this policy. The new party, the Progressive Party, added its demands to those of the Republican and Democratic Parties in favor of broad and com-

prehensive plans, ample funds, continuous work, and teamwork between the Nation and the States.

Mr. President, my impression is that at different sessions of Congress I have introduced three bills upon this subject, each of which I regard as an improvement upon the other. The first bill, which I introduced in 1907, was a bill entitled, if I recollect rightly, "A bill for the creation of an inland waterway commission." The pending bill provides for the creation of a river regulation board. It contains everything that is contained in the other bill and contains elaborations which I think will add to its efficiency.

The first bill, it will be recalled, was referred to the Secretary of War, Mr. Taft, and received his approval. The last bill was referred to the Secretary of Agriculture, the Secretary of the Interior, the War Department, and the Secretary of the Smithsonian Institution, the latter being for many years, as will be remembered, the Director of the Geological Survey—an experienced official and most capable administrator—who has been familiar with every phase of waterway development in this country for many years. I will ask that the communication from the Secretary of Agriculture may be read. It is addressed to the Committee on Commerce.

The PRESIDENT pro tempore. Without objection, the letter will be read, as requested.

The Secretary read as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, April 4, 1912.

Hon. KNUTE NELSON,
Chairman Committee on Commerce,
United States Senate.

MY DEAR SENATOR: I have received, by reference from the clerk to your committee, Senate bill 122, introduced by Mr. NEWLANDS, "to create a board of river regulation," etc. It is a comprehensive measure with regard to the control and utilization of flood waters. I have referred the bill for comment to three of the chiefs of bureaus in this department, and inclose herewith copies of their reports, in which they discuss the matter, I think, very intelligently.

I have been for some time impressed with the fact that sooner or later the Congress of the United States, probably in cooperation with the States, will be compelled to inquire carefully into the waters of the country that are now going to waste, with a view to their utilization in the production of maximum crops. Where we depend entirely upon rainfall we do not always get maximum crops, because there are long periods of drought that prevent. We had such droughts last year. I believe it will be necessary, eventually, for the Federal Government, or the Federal Government and the States, or in some cases each State individually, to work out a comprehensive system of saving flood waters—the surplus waters that run away in spring and winter and during flood times in summer. This can be done, as it has been done in other countries, by arranging for a system of reservoirs beginning near the head of streams and continuing the reservoirs down the streams until all the advantage is secured that can be had from confining the waters for use on the land in dry times. I think the entry upon the subject is timely and wise, and any cooperation this department can extend will be cheerfully given.

There is a line of work in this connection that must be done by the Weather Bureau in ascertaining the precipitation found on each of the streams, and this feature I think it would be well for the committee to look into, if it has not already been considered.

Very truly, yours,

JAMES WILSON, *Secretary.*

Mr. NEWLANDS. Mr. President, as the time is short I shall not have the other reports read, but shall ask that they be inserted in the RECORD.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

THE SECRETARY OF THE INTERIOR,
Washington, January 29, 1913.

The COMMITTEE ON COMMERCE,
United States Senate.

GENTLEMEN: I am in receipt of your request for such suggestions as I may deem proper touching the merits of Senate bill 122, "To create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies."

This bill is based upon two principles which have not been hitherto generally recognized in the construction of public works for river improvement. These principles are, first, that a river from its source to mouth, with all of its tributaries, is a unit in all its most important physical and functional characteristics. It should therefore be dealt with as a whole and not piecemeal, and in dealing with it for any single use, such as navigation, we should not lose sight of the other uses to which it can be put, such as water supply, irrigation, power, drainage, etc. River improvement should harmonize these uses, treating the river system as a unit for this purpose, and should provide for the cooperation of the Nation, States, and individuals to that end. The same principle applies, only in less degree, to the unification of all river systems into one comprehensive whole.

The second principle is that this work of waterway improvement in its details should be guided and determined as an administrative and not as a legislative matter, and therefore that a large fund should be provided and replenished from time to time as may be necessary, this fund to be expended at the discretion of a competent administrative commission of experts without specific appropriations or limitations, except of a broad general character, by Congress. The proposed commission is to consist of the chiefs of the Federal bureaus whose duties are now concerned with specific phases of the problem, together with specially qualified experts to be appointed by the President.

I am heartily in accord with these principles and believe that legislation embodying them should be enacted. I have not attempted, however, to criticize the bill in detail.

Very respectfully,

WALTER L. FISHER, *Secretary.*

WAR DEPARTMENT,
Washington, January 27, 1913.

MY DEAR SENATOR NEWLANDS: I have at last had an opportunity to read and consider the bill introduced by you in the first session of the present Congress (S. 122) to create a board of river regulation, and to provide a fund for the regulation and control of the flow of navigable rivers, etc. The bill relates to many bureaus and departments of the Government not within my jurisdiction, and it contains many administrative features, which will doubtless be the occasion of much discussion and probable difference of opinion. As to the details of these features, I can not, especially in the limited time which I have, express any opinion. But so far as my observation extends, the bill is the first attempt to treat in a comprehensive and constructive manner the national problem afforded by our rivers and waterways. It is only of late years that we are beginning to obtain an adequate idea of the extent of this problem. It is only of late that the effect of forestration upon stream flow and erosion has been studied and appreciated, and that it has been learned how the navigable character of our long rivers may in part depend upon conditions at their headwaters. It is only of late years that the science of engineering has suggested conserving and standardizing the flow of our navigable rivers by systems of reservoirs at their heads. It is only within comparatively recent years that our engineers have developed the method of making navigable our long and shallow streams by canalization or the slack-water method. And it is even later yet that our people have begun to realize the necessity of saving and utilizing in this development, for the purpose of reducing its expenses, the valuable incidental water powers which may be created in the development itself.

Our conception, therefore, of what constitutes a navigable river and our appreciation of the various elements which enter into its development have been greatly widening. We see now that the problem of developing and preserving its navigability is no longer necessarily confined to removing obstructions in that part of the river in which navigation exists, but may extend to countless remote branches and sources of supply. We also see how the improvement of the river may be intimately connected with and dependent upon another development—that of water power—which formerly we may have regarded as a thing quite separate and apart.

This growth of knowledge in respect to the problem necessarily postulates a similar broadening in our treatment of it. To the Federal Government has been confided the care of our navigable streams. The Federal Government is also the proprietor of vast tracts of public and forest land, upon the protection of which the stream flow ultimately depends. It is also the proprietor of other semiarid lands, whose future use depends upon irrigation taken from navigable waters or their sources of supply. One of its departments has also direct relations with the development of our farming lands and the preservation of our forests. All of these activities of the Government impinge upon each other, and they also at the same time impinge at many points upon the jurisdiction, the property, and the powers of the several States.

Under these circumstances it is manifest that the problem of our navigable rivers can no longer be treated as a mere problem of dredging and deepening, of removing snags and obstructions, of confining our work to those stretches of river where commerce is actually plying, but must extend to those vital sources of supply upon which the very existence of the river depends. And it is equally manifest that in exercising this widening responsibility the Government must avail itself of all proper and possible means to economize the inevitable expense. If the general taxpayers of the country are to be called upon, for example, to protect the dwellers along the lower Mississippi Valley against the floods of that river, by taking over the expense of caring for its levee system, they must be permitted to reduce this enormous burden by availing themselves of all the by-products of water power which can be developed in the improvement not only of that river, but of all our other navigable streams.

Under our present system there is no such coordination of effort. Government action which may affect a single river is distributed among different bureaus and different departments, which have at present no necessity and practically no opportunity even for common discussion. This leads not only to lack of cooperation and action, but it often perpetuates conflicting scientific theories under circumstances where the conflict might be removed by mutual discussion and comparison of work. Instances have come under my personal observation, for example, where the views held by members of the Corps of Engineers as to the effect of forestration upon stream flow were radically different from those held by the Geological Survey and by the Forest Service.

It is manifest that such conditions work against effectiveness and in the direction of waste and expense. Such lack of cooperation would not be permitted in any private organization possessing the functions of our Federal Government. The various agents entrusted with responsibility over the various parts of the problem would be brought into mutual relations where they would be obliged to discuss and coordinate the mutually interdependent features, and a system would be arranged by which a consistent view of the whole problem could be obtained and by which it could be attacked intelligently in all its parts.

I understand that this is the purpose of your bill, and such a purpose must appeal to any one who has considered the problem. As I said in the beginning, I can not undertake to discuss the administrative methods by which you undertake to solve the problem. I may say, however, that my own inclination would be to lay primary emphasis upon the creation of a board whose duty it would be to discuss and harmonize and recommend rather than to actually appropriate funds. The latter function may meet objection, which would not exist in the case of the former. And it seems to me that the former functions are the most pressing and important in our present situation.

I may also observe that my experience indicates that our executive and bureau officers are already weighed down with about as much labor and as many functions as can be wisely performed. There is not a little danger of loading down our administrative machinery to inefficiency. In conferring such extensive powers as your bill contemplates upon a board largely composed of existing officials, we should be on our

guard lest we impair the existing enforcement of the law by entrusting it entirely to men who are already overworked. Such details, however, are doubtless under observation by yourself, and the suggested criticism, if held well founded, could be met by amendment.

Very respectfully,

HENRY L. STIMSON,
Secretary of War.

Hon. FRANCIS G. NEWLANDS,
United States Senate.

[United States National Museum; International Exchanges; Bureau of American Ethnology; National Zoological Park; Astrophysical Observatory; International Catalogue of Scientific Literature.]

SMITHSONIAN INSTITUTION,
Washington, U. S. A., February 7, 1912.

To Hon. KNUTE NELSON,
Chairman Committee on Commerce,
United States Senate, Washington, D. C.

SIR: In reply to your request of January 5, 1912, that the Committee on Commerce be furnished with suggestions touching upon the merits of Senate bill No. 122 and the propriety of its passage, I beg to state that the bill has been duly examined.

GENERAL FEATURES OF BILL.

I am in full accord with the general features of the bill, and think that if they are carried into effect it would be of great advantage and value not only to the citizens of the United States but as an example to the various civilized nations of the world. The comprehensive scheme outlined calls for a coordination of many effective forces now at the service of the Government that can not fail to give practical results of a constructive nature and great value and to stimulate the action of individual States and municipalities.

The problems involved are of such a character and concern such vast interests that it is only by taking them up in the broadest possible manner that successful and permanent results can be obtained. This will involve the expenditure of a large amount of money, energy, and time, but with wise planning and effective administration the results can not fail to be of the greatest value and service as long as the civilized people exist on the North American Continent.

The administration and execution of a work of such magnitude might properly hereafter involve a redistribution of some of the bureaus concerned so as to bring a majority of them into one of the existing departments that might become equivalent to a department of public works and conservation.

WORK OF THE SMITHSONIAN INSTITUTION.

The bill provides in section 11:

"That it shall be the duty of the Secretary of the Smithsonian Institution to give especially attention to the acquisition from foreign countries and from all sources of all obtainable knowledge concerning the problems involved in the work of the board and to diffuse and disseminate the same, and to establish and maintain a museum of conservation in which such knowledge shall be placed before the people, with object lessons illustrating the disastrous consequences that have resulted from the failure of such conservation and particularly the failure to conserve the forest and water resources in other countries of the world, and to utilize the resources of the institution under his charge, which may be available for that purpose, to aid in the education of the public in the elements of knowledge which lead to the successful regulation of water and of the flow of rivers and the use of water in connection with agriculture and the intensive cultivation of land and in connection with other industries."

It is my belief that a museum of conservation, such as is contemplated in this bill, can be satisfactorily established and maintained in connection with the National Museum system if adequate means are supplied for the purpose. Such a museum, which would consist largely of models, charts, maps, diagrams, and photographs, would ultimately require a considerable amount of space for its installation. In the beginning provision might be made for its accommodation in the buildings now under the control of the institution, but additional room would be called for in the near future if its rate of growth were commensurate with the scope and importance of the subject.

The preparation of the models and other exhibits, which must be accurate in detail, would require time and necessitate the employment of skilled modelers and other workmen. In the beginning it would be necessary to secure measurements, charts, photographs, etc., of typical areas in various parts of the world showing the methods and effects of conservation and reclamation and of others showing the results of neglect of such activities; also of the forms of engineering works best adapted to the purposes of conservation and of other objects and scenes illustrating the subject under consideration. In this manner an adequate basis could be obtained for accurate educational models suitable for the museum.

As regards the acquisition and dissemination of knowledge relative to the conservation of natural resources and allied topics, the Smithsonian Institution could doubtless accomplish much of what is desired through an extension of its exchange service and its system of correspondence. It would, however, in my judgment, be necessary in this connection also to send experts and agents to obtain information at first hand. It is taken for granted that much new information would be desired regarding conservation operations, etc., which could only be obtained by studies made in the places in which these operations are carried on. It would be important also in connection with the subject of forestry, mentioned in this bill, to have studies made of forests which are still in an undisturbed natural condition, especially the forests of Central and South America, which are extensive and diversified and have been but little affected by human activities. The natural relations existing between forests, water supply, and soils could be studied there to better advantage perhaps than in any other part of the world.

I would call your attention to a certain inconsistency in the bill as regards the dissemination of information procured under the direction of the board. In section 11 it is made the duty of the Smithsonian Institution to disseminate this knowledge, and in section 6 the board is directed to "print, publish, and disseminate" the "information, data, and facts collected and obtained by the various bureaus or offices of the Government."

Having had a somewhat varied experience in connection with the administration of the Geological Survey, which included hydrographic work and the Reclamation Service, the early development of the Forest Service and policy, and the past five years as Secretary of the Smithsonian Institution, I am submitting as appendices some general statements combining my own and experts' views on the following different points:

1. Conservation of water resources.
2. Conservation of water resources in respect to irrigation.
3. Conservation of forest resources.

Very respectfully, yours,

CHARLES D. WALCOTT, *Secretary.*

Mr. NEWLANDS. I will read a sentence or two from each of them to indicate how thoroughly they approve the principle of this bill.

Secretary Fisher says:

This bill is based upon two principles which have not been hitherto generally recognized in the construction of public works for river improvement. These principles are: First, that a river from its source to its mouth with all of its tributaries is a unit in all its most important physical and functional characteristics. It should, therefore, be dealt with as a whole and not piecemeal, and in dealing with it for any single use, such as navigation, we should not lose sight of the other uses to which it can be put, such as water supply, irrigation, power, drainage, etc.

He then declares the second principle to be that this work of waterway improvements, in its details, should be guided and determined as an administrative and not a legislative matter, and therefore that a large fund should be provided, and so forth.

The Secretary of War, Mr. Stimson, by mistake addressed his letter to me personally instead of to the chairman of the Committee on Commerce; but it is a report upon the pending bill. It is a report prepared with great care, and contains a most valuable vindication of the policy to which I have referred. He emphatically approves the system proposed, of coordination of bureaus and services, cooperation with States, an ample fund, continuous work, and the contemporaneous development of every use to which a river can be put by the exercise of the joint powers and functions of the Nation and the States.

The letter from the Secretary of the Smithsonian Institution, Mr. Walcott, formerly the Director of the Geological Survey, also indorses every essential principle of this bill, as a result of the long experience of that gentleman in the scientific work of the Geological Survey, which first undertook a general study of the waters of the United States, and under whose jurisdiction the Reclamation Service was developed most efficiently.

Mr. President, I have here also numerous resolutions and comments of a public character upon this bill, which I should like to have inserted in the RECORD without reading. They include the indorsement of this bill by the Legislatures of California, Louisiana, and South Dakota, the indorsements of numerous waterway associations, chambers of commerce, and boards of trade.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

Joint resolution concurred in by Senate and House, Louisiana Legislature, June 6, 1912, at the request of the Louisiana Reclamation Club.

Whereas the great flood of 1912 has demonstrated that the National Government only can obviate a recurrence of such overflow disasters in the future by a national policy under which an adequate levee system will be built and maintained as national fortifications against invasion and destruction by the forces of nature; and

Whereas the steadily increasing volume of the floods in the lower Mississippi Valley has been largely caused by the changed condition of the watershed in the States comprising the drainage basin of the Ohio, upper Mississippi, and Missouri Rivers; and

Whereas these causes and conditions are beyond the control of the States bordering the Mississippi from Cairo to the Gulf, and can only be controlled by the National Government. Now therefore be it

Resolved by the House of Representatives of the State of Louisiana (the Senate concurring therein), That the National Government should immediately extend such temporary relief as may be necessary to repair the broken levees and to maintain them in future, and to control the river in its channel by revetments and bank protective works which will safeguard against the destruction of levees by caving banks and shifting channels.

Resolved further, That in working out plans for flood prevention and the protection of the lowlands of the Mississippi Valley from overflow, the Mississippi River and all its tributaries and source streams should be treated as a unit, and a comprehensive and adequate levee system, to be permanently maintained by the National Government, should be supplemented by a system of reservoirs on the headwaters of the Ohio and its tributaries, and also on the upper Mississippi, and by a system of flood-water canals and storage reservoirs in the Missouri River Valley by means of which the flood plane at Cairo would at all times be so reduced that no combination of high water in the three upper rivers would ever create a great flood in the lower Mississippi Valley, and at the same time prevent overflow and damage by floods in the valleys of the Ohio, the upper Mississippi, and Missouri Rivers.

Resolved further, That the Nation can not longer afford to permit its resources of soil, of power, of water, and of navigation to be carried as a wasteful and destructive flood to the sea, and that since the States themselves can not, in the general interest, prevent this waste, the Federal Government should conserve such floods at their sources and subject the now wasted waters to beneficial use.

Resolution of the Assembly of the State of California.

The following resolution was offered by Mr. Guiberson:

"Whereas a bill has been introduced in the Senate of the United States by Hon. FRANCIS G. NEWLANDS, of Nevada, which, according to its title, proposes 'to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection, and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies'; and

"Whereas it has been proposed by the leading supporters of said bill that it be amended so as to provide for an appropriation of $5,000,000 annually for 10 years for the control of the Sacramento and San Joaquin Rivers and their tributaries, and for a like appropriation for the control of the Colorado River; and

"Whereas this legislature is in hearty accord with the principles embodied in said bill, and believes that the money proposed to be expended under it and the cooperation provided for in it will promote the general welfare; and

"Whereas the vastness and variety of the interests that will be benefited by the expenditures contemplated in the proposed amendments fully justify such participation by the National Government in the work of making the navigable streams of California as useful as possible to the public. Therefore be it

"Resolved by the Assembly of the State of California, That the Congress of the United States be, and both branches of said body hereby are, requested to pass said bill, with the amendments aforesaid, and that the Representatives of California in the Senate and the House of Representatives be requested to use their best efforts to that end. And be it further

"Resolved, That the chief clerk of the assembly be, and he hereby is, directed to send a copy of this resolution to each Senator and Representative in Congress from this State, to Hon. FRANCIS G. NEWLANDS, to the Vice President of the United States, and to the Speaker of the House of Representatives."

Adopted this 4th day of February, 1913.

L. B. MALLORY,
Chief Clerk.

Joint resolution of the Legislature of South Dakota.

A joint resolution and memorial requesting the Congress of the United States to pass the Newlands bill, relating to river regulation.

Be it enacted by the Senate of the State of South Dakota (the House of Representatives concurring):

SECTION 1. That the Congress of the United States is hereby memorialized to enact during the present session the Newlands bill, providing for the creation of a board of river regulation and for the control and beneficial use of flood waters, and we urge our Senators and Representatives in Congress to employ their best efforts to accomplish this end.

STATE OF SOUTH DAKOTA,
DEPARTMENT OF STATE.

UNITED STATES OF AMERICA, *State of South Dakota, ss.:*

I, Frank Glasner, secretary of state of the State of South Dakota, do hereby certify that the annexed bill, to wit, senate joint resolution No. 14, was duly passed by the 1913 session of the Legislature of the State of South Dakota and is now in full force and effect.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of South Dakota this 4th day of February, A. D. 1913.

FRANK GLASNER,
Secretary of State.
By J. T. NELSON,
Assistant Secretary of State.

Mr. NEWLANDS. The President elect, Mr. Wilson, has also declared himself on this subject in a telegram addressed to me, as president of the recent irrigation congress, as follows:

SEA GIRT, N. J., *September 30, 1912.*

Hon. FRANCIS G. NEWLANDS,
President National Irrigation Congress, Salt Lake, Utah:

Please express to the National Irrigation Congress my hearty approval of the policy it is met to promote, and especially of the policy of supplementing bank and levee protection by storage of flood waters above for irrigation and water power, turning floods from a menace into a blessing and at the same time abundantly feeding navigable waters.

WOODROW WILSON.

(C. A. Woolsey Paint & Color Co., manufacturers and importers of paints and varnishes.)

JERSEY CITY, N. J., *December 26, 1912.*

Hon. FRANK O. BRIGGS,
Washington, D. C.

SIR: Communications have been received by us from a number of our customers located in the South, who have been affected by the overflowing of the Mississippi River in the recent and past floods which have occurred in that section, and earnestly request our cooperation for the immediate enactment of the Newlands river regulation bill, S. 10900, Sixty-first Congress, third session, introduced in the Senate by Senator NEWLANDS on March 1, 1911, entitled:

"A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end, and to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage and for the protection of watersheds from denudation and erosion and from forest fires and for the cooperation of Government services and bureaus with each other and with States, municipalities, and local agencies."

For the further purpose of uniting forces for an organized demand on the Congress at Washington our friends of the South have issued a call requesting friends of the movement to attend the National River Regulation and Flood Prevention Congress to be held in New Orleans, January 6 and 7, 1913.

We are naturally interested in the growth, progress, and upbuilding of the South, both from a business standpoint and a feeling that the lives and property of those living in such places should be looked after to a certain extent by our Government, and we therefore respectfully refer the matter to you for your consideration, hoping that you may see your way clear to support the proposed legislation, as we believe that they are justified in looking to the country at large to help them in this matter.

Very truly, yours,

C. A. WOOLSEY PAINT & COLOR CO.
F. WOOLSEY, *President.*

LIST OF SOME OF THE ORGANIZATIONS WHICH HAVE INDORSED THE NEWLANDS RIVER REGULATION BILL, SPECIFICALLY OR IN PRINCIPLE, WITH COPIES OF SOME OF THEIR RESOLUTIONS.

The bill has been indorsed, among others, by the Pittsburgh Chamber of Commerce, the Nineteenth National Irrigation Congress, the National Rivers and Harbors Congress (in principle), the National Drainage Congress, the New Orleans Progressive Union, the Louisiana Reclamation Club, the Louisiana Bankers' Association, the Illinois Association of Drainage and Levee Districts, St. Louis Merchants' Exchange, City Club of Memphis, and by the following organizations in California: California section of the National Irrigation Association; boards of supervisors of the counties of Madera, Merced, and San Joaquin; the chambers of commerce of the cities of San Francisco, Madera, Merced, Ceres, Modesto, Lodi, and Fresno, and of Stanislaus County; the La Grande Board of Trade; the Los Angeles Clearing House Association; the cities of Madera, Turlock, and Modesto; the Women's Improvement Clubs of Madera, Merced, Modesto, Livingston, Escalon, Salida, and Raymond; and the River Regulation Commission of Stockton.

LOS ANGELES CLEARING HOUSE ASSOCIATION.

Resolutions indorsing and advocating the enactment by the Congress of the Newlands river regulation bill (Senate bill 122, introduced Apr. 6, 1911, by Senator FRANCIS G. NEWLANDS), entitled "A bill to create a board of river regulation, and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection, and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other, and with States, municipalities, and other local agencies":

"Whereas reports made by Maj. J. W. Powell, first Director of the United States Geological Survey; Gen. Hiram M. Chittenden, of the Engineer Corps of the United States War Department; United States Engineer Ullert, and others; also through surveys and investigations made by the Pittsburgh Flood Commission, have shown the practicability of the storage of the flood waters of the rivers of the whole country to the end that destructive floods may be controlled and the waters heretofore wasted may be conserved for the use of navigation and irrigation where required; also the necessity of the drainage of the swamp and overflowed lands; and

"Whereas a condition which now causes wide devastation it is shown may be controlled and transformed into a great natural resource, reclaiming millions of acres of land now uncultivable, thus benefiting and enriching every section of the country from the Atlantic to the Pacific; and

"Whereas the Newlands river regulation bill embodies the provisions requisite for the carrying into effective operation of the beneficial objects desired to be accomplished: Now, therefore, be it

"Resolved, That the Los Angeles Clearing House Association hereby indorses said Newlands river regulation bill and requests the Senators and Congressmen from this State to urge its passage by the Congress."

I certify that the foregoing is a true and correct copy of a resolution passed at a special meeting of the Los Angeles Clearing House Association held yesterday afternoon.

JAMES B. GIST, *Secretary.*

CHAMBER OF COMMERCE OF PITTSBURGH.

Resolution adopted April 13, 1911.

Whereas a bill was introduced in the Senate of the United States by Senator NEWLANDS on March 1, 1911, entitled "A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies"; and

Whereas the primary purpose of said bill is to bring into conference and cooperation the National Government with the States, municipalities, counties, and local districts for the construction of the works necessary for the regulation of the flow of rivers and for flood prevention and protection, and provides a fund of $50,000,000 annually for 10 years for said purpose; and

Whereas the passage of said bill by Congress would result in the relief not only of Pittsburgh but of all cities and communities on the Ohio, Missouri, and Mississippi Rivers from destructive floods and increase the flow of the rivers in the low-water season for navigation: Now therefore be it

Resolved, That the Chamber of Commerce of Pittsburgh hereby indorses said Newlands river-regulation bill and requests the Senators and Congressmen from this State to urge its passage by Congress; and

Resolved further, That the secretary be instructed to send a copy of this resolution to all boards of trade and chambers of commerce in cities on the Ohio, Missouri, and Mississippi Rivers, and urge their active support for this measure.

The Nineteenth National Irrigation Congress on December 9, 1911, at Chicago, adopted the following as one of its resolutions:

"We indorse and recommend the Newlands bill (S. 122) to create a board of river regulation, and urge every delegate to this congress to cooperate in all possible ways to aid in securing its enactment by the Federal Congress during the present session."

The National Rivers and Harbors Congress at Washington, D. C., on December 8, 1911, adopted the following as its first declaration:

"We urge the adoption by the Government of a broad, liberal, comprehensive, systematic, and continuous policy of waterway development, a policy which has heretofore been unanimously pledged by the great political parties of the country in convention assembled, which pledges have not as yet been redeemed."

National Drainage Congress, Chicago, Ill., December 9, 1911:

"*Resolved*, That * * * we do especially recommend the creation of a national commission to make the necessary surveys and estimates of cost and to work out a comprehensive plan of national reclamation in connection with the several States, designed to coordinate the mutual interests of the various States in a practical State and Federal system of consistent and progressive drainage, reclamation, and development; and that sufficient funds be appropriated by the National Government to carry on the work of the commission."

SAN FRANCISCO CHAMBER OF COMMERCE.

Resolution adopted at meeting of board of directors, January 5, 1912.

Whereas a bill was introduced in the Senate of the United States by Senator NEWLANDS on March 1, 1911, entitled "A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and, as a means to that end, to provide for flood prevention and protection, and for the beneficial use of flood waters, and for water storage, and for the protection of watersheds from denudation and erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies"; and

Whereas the primary purpose of said bill is to bring into conference and cooperation the National Government with the States, municipalities, counties, and local districts for the construction of the works necessary for the regulation of the flow of rivers and for flood prevention and protection, and provides a fund of $50,000,000 annually for 10 years for said purposes; and

Whereas the passage of said bill by Congress would result in the relief, not only of Pittsburgh, but of all cities and communities on the Ohio, Missouri, and Mississippi Rivers from destructive floods, and increase the flow of the rivers in the low-water season for navigation: Now therefore be it

Resolved, That the San Francisco Chamber of Commerce hereby indorses said Newlands river-regulation bill and requests the Senators and Congressmen from this State to urge its passage by Congress.

SAN FRANCISCO CHAMBER OF COMMERCE,
M. H. ROBBINS, Jr., *President*.
A. B. C. DOHRMANN, *Secretary*.

WASHINGTON, D. C., *January 15, 1912*.

Hon. JOSEPH E. RANSDELL,
President National Rivers and Harbors Congress,
Colorado Building, Washington, D. C.

DEAR SIR: At a meeting of the directors of the National Rivers and Harbors Congress immediately following the last annual meeting of the congress it was suggested that this organization should advocate a policy not only having for its purpose the improvement of waterways for navigation but for all the beneficial uses to which the water could be put. The suggestion was advanced:

First. Because the proponents believed that in no other way could an orderly and continuous development of waterway improvements be possible.

Second. Improvement and development of other beneficial uses would be in aid of and not in conflict with improvement for navigation.

Third. An enormous saving in public funds and direct and lasting benefits to the public would ensue.

Fourth. It would unite in a common cause a large number of people and organizations interested in various phases of water use and control who are now advocating and exploiting the particular use only in which they are more directly concerned.

Fifth. The result would be that an irresistible public sentiment would be created to which Congress would be compelled to respond and which would be in harmony with the declarations of the platforms of the great political parties demanding the carrying out of a policy having for its purpose the conservation and utilization of the waterway for all beneficial purposes from its source to its mouth.

No direct action was taken, but a committee was appointed charged with the duty of reporting to the directors upon the question, with the object of giving full opportunity and time for its consideration before the next annual meeting of the organization. The undersigned were appointed as such committee and beg leave to report as follows:

I. There are a number of governmental scientific agencies having in charge and under their control various national public resources. Generally speaking, these agencies are fairly equipped to carry on their work and are in charge of competent men. The Engineer Corps of the Army, the Reclamation Service, the Geological Survey, the Forest Service, and other branches of the Agricultural and Interior Departments are illustrative. These agencies in the public interest should be in the closest cooperation and coordination, but such is not the case.

II. The various departments are frequently dealing with the same agency or public resource in its application to some particular service, giving but little, if any, consideration to coordination with other available services or uses to which such agency or public resource might be put. This is not the fault of the departments, but the failure of Congress to make provisions therefor. It is the opinion of the committee that the best results can only be secured and the public interest promoted through cooperation and unity of purpose and action.

III. There is scarcely a river worthy of improvement for navigation but what has other beneficial uses to which it could be put and other conditions which require treatment and consideration, all of which bear directly upon the navigability of such river or add to the productiveness of adjacent territory or further development of such territory. We refer to forest protection, prevention of damage from flood, soil erosion, drainage, irrigation, and water-power development. It would therefore seem in the public interest that the improvement of a waterway for navigation could well contemplate the conservation and utilization of such manifestly beneficial uses at the same time.

IV. It is generally conceded that the improvement of rivers for navigation is a necessity and that this improvement should be based on a comprehensive scheme under some general plan of related projects, the work to be carried on continuously until completed.

V. At the present time there are a large number of organizations and vast numbers of people interested in various phases of water use and development which, it would seem, could be united in common purpose for a common use. Transportation is a tax that touches all, and producer and consumer alike are interested in securing cheap and efficient means of transportation. Therefore those who create tonnage are directly interested in its reaching the markets at the lowest possible cost, and those who propose to engage in water transportation are certainly interested in the development of tonnage tributary to the waterways.

The foregoing facts are well known. The committee do not feel it incumbent upon them to enter into an extended argument to show that coordination of service and cooperation of effort between the various governmental agencies and the sovereignties, national and State, are not only desirable, but necessary, if real efficiency and the best results are to be secured. On the contrary, we feel that those who oppose such a seemingly natural, logical, and businesslike policy should show wherein the cause of the improvement of rivers for navigation would be detrimentally affected by its adoption.

In time both organizations and individuals are likely to become too conservative. In other words, the tendency is to follow rather than to lead, and we believe this organization should lead public opinion, not follow it.

We would hesitate to suggest for adoption anything of a novel character, but we are convinced that this organization must take advanced ground upon all questions respecting the improvement of our waterways and should cooperate with every individual and organization willing to work to this end.

We therefore recommend that this organization should advocate a comprehensive scheme of waterway development of related projects:

That this scheme should involve and consider all the beneficial uses which the waterway may serve or to which it may be put;

That the work of the various scientific services of the Government should be coordinated;

That the several States and the Nation should cooperate and act in harmony in all matters of common interest; and

That funds should be provided so that work on all approved projects can be carried continuously to completion.

The committee submits the foregoing suggestions for your consideration.

JOSEPH N. TEAL,
JAMES E. SMITH,
FRANCIS G. NEWLANDS.
Committee.

River regulation, in the words of George H. Maxwell, must become the campaign cry of the people of the Mississippi Valley, no matter what their party politics, if their fertile fields are to be made safe from overflow and their country is to be freed from the adverse opinion of the remainder of the world.

"The flood waters of the Mississippi River and its tributaries can be regulated, and such regulation, in conjunction with a good levee system, will forever safeguard the valleys from overflows," said Mr. Maxwell, who is an ardent supporter of the Newlands river-regulation bill, to-day. "The entire country will back up the demand of the people of the Mississippi, the Ohio, and the Missouri Valleys for constructive legislation of this character."

In proof of his assertion he exhibited the following telegram from the far West:

STOCKTON, CAL., *April 8-9, 1912*.

Mr. GEORGE H. MAXWELL,
Executive Chairman Board of Control.
National Drainage Congress, St. Charles Hotel, New Orleans.

DEAR SIR: We extend our heartful sympathy to the sufferers from the present floods in the East and the South. Our sympathy is tinctured with shame, as we know that the appalling loss of life and property could and ought to have been prevented. As a people we have the intelligence and the money to do the required work that will control forever the flood area of our country, whether in the East, the South, or the West. We know how to change the awful destructive flood forces into constructive and beneficial powers. With these forces we can improve and make permanently navigable our inland waterways, generate enormous quantities of electric power, make safe the investments and increase the improvements in our great valleys, and while doing so shall remove the danger of drought or fear of it. The time is opportune for an immediate start on this great work. The Panama Canal is now nearly finished. Even now the services of a part of the splendid working army is being dispensed with and part of the equipment is being sold. These trained men should be kept together, and the equipment that can be used in the South and East or in the West should be at once put in order for the work that must be done to save the lives and property of our people by properly conserving the natural forces and resources of our country. There can be no excuse for another hour's delay. The sinking of the *Maine* with so large a part of her gallant crew in Habana aroused our people to war. What can we say to a watching world if we refuse to act as promptly and as energetically when the lives of our people are being taken by floods that we can control or droughts that we can prevent? To the loss of life we must add the destruction of property so vast that its value, if wisely used, would prevent forever such losses. Under such conditions can we still say that we have a government of the people, by the people, and for the people, to enable us, a people, to claim without shame that we so govern ourselves? We pray that you will take such action at New Orleans and immediately thereafter at Washington that the Newlands bill may be enacted into law and the good work of conservation and control be started without further delay.

Yours, truly,
THE RIVER REGULATION COMMISSION OF STOCKTON, CAL.,
By J. L. CRAIG, *Chairman*.

Resolutions of Southern Commercial Congress.

NASHVILLE, TENN., *April 9, 1912*.

We urge the immediate adoption by Congress of a broader, more aggressive, comprehensive, systematic, and continuous policy of waterway improvement, thereby carrying out the wish of people of the country as expressed in the platforms of both the great political parties in the national conventions of 1908, to the fulfillment of which both parties pledged themselves, but which pledges have not been redeemed.

We favor the adoption of a law by Congress granting the use of the Panama Canal to American ships engaged in coasting commerce free of tolls, and the prevention of the use of the canal by any steamship line owned or controlled by a railroad or any monopolistic interest.

We favor such legislation as is necessary to induce the construction of a merchant marine for the United States and the carrying of American commerce in American ships made under the American flag.

EXTENSION OF POWERS.

We recommend that the powers of the Interstate Commerce Commission be extended over shipment by water, so as to oblige proper division of rates by railroads and connections, and fix minimum as well as maximum rates for water-borne traffic.

Properly equipped terminals being as essential as channels to the successful use of waterways, we urge that such terminals be provided

under public ownership or control, so that they may be open to all comers on equal and reasonable terms.

We favor liberal annual appropriations for the improvement of rivers and harbors, and disapprove the policy of delay and interruption in work begun and of practicing economy at the expense of the construction work of the Government.

We urge upon Congress the adoption of such laws as will compel co-ordination and cooperation between railways and waterways in the interchange of traffic, and that will remove destructive competition of railways against waterways.

—

CHAMBER OF COMMERCE OF PITTSBURGH,
OFFICE OF THE SECRETARY.

Resolution adopted April 13, 1911.

Whereas a bill was introduced in the Senate of the United States by Senator NEWLANDS, on March 1, 1911, entitled "A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce," and as a means to that end to provide for flood prevention and protection, and for the beneficial use of flood waters, and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies; and

Whereas the primary purpose of said bill is to bring into conference and cooperation the National Government with the States, municipalities, counties, and local districts for the construction of the works necessary for the regulation of the flow of rivers and for flood prevention and protection, and provides a fund of $50,000,000 annually for 10 years for said purposes; and

Whereas the passage of said bill by Congress would result in the relief not only of Pittsburgh, but of all cities and communities on the Ohio, Missouri, and Mississippi Rivers, from destructive floods and increase the flow of the rivers in the low-water season for navigation: Now therefore be it

Resolved, That the Chamber of Commerce of Pittsburgh hereby indorses said Newlands river regulation bill and requests the Senators and Congressmen from this State to urge its passage by Congress; and

Resolved further, That the secretary be instructed to send a copy of this resolution to all boards of trade and chambers of commerce in cities on the Ohio, Missouri, and Mississippi Rivers and urge their active support for this measure.

—

[From the Fresno Republican, Apr. 10, 1912.]

CHAMBER INDORSES NEWLANDS BILL FOR RIVERS.

The board of directors of the Fresno Chamber of Commerce yesterday passed a resolution, presented by John Fairweather, vice president of the National Irrigation Congress, in which it indorsed the Newlands river regulation bill, now before Congress. Copies of the resolution will be forwarded to the California Representatives at Washington. The resolution is as follows:

"Whereas a bill was introduced in the Senate of the United States by Senator NEWLANDS on March 1, 1911, entitled 'A bill to create a board of river regulation and to provide a fund for regulation and control of the flow of navigable rivers, in aid of interstate commerce," and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters, protection of watersheds from denudation and erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies; and

"Whereas the primary purpose of said bill is to bring into conference and cooperation the National Government with the States, municipalities, counties, and local districts for the construction of the works necessary for the regulation of the flow of rivers and for flood prevention and protection, and provides a fund of $50,000,000 annually for 10 years for said purposes; and

"Whereas the passage of said bill by Congress would result in the relief not only of Pittsburgh, but of all cities and communities on the Ohio, Missouri, Mississippi, Sacramento, San Joaquin, and Kings Rivers, from destructive floods and increase the flow of the rivers in the low-water season for navigation and irrigation: Therefore be it

"*Resolved*, That the Fresno County Chamber of Commerce hereby indorses said Newlands river regulation bill and requests the Senators and Congressmen from this State to urge its passage by Congress."

The supervisors followed yesterday the example of the directors of the chamber of commerce, and on the showing made by John Fairweather, vice president of the National Irrigation Congress, indorsed the Newlands river regulation bill in Congress as a measure of relief against destructive floods, while also one for increasing the flow of rivers in low-water season for navigation and irrigation.

—

[From the Madera (Cal.) Tribune, Apr. 15, 1912.]

RESOLUTIONS FAVORING FLOOD-WATER CANAL.

The following resolutions were adopted at the District Federation of Women's Clubs in Fresno at their recent session:

Resolutions indorsing the Newlands bill and the resolutions of the California Legislature requesting the Federal Government to construct a flood-water canal and reservoir from the San Joaquin River, near Pollasky.

Be it resolved, That the California Federation of Women's Clubs for the San Joaquin district, in convention assembled in the city of Fresno, indorse the Newlands bill in Congress (S. 122) and the resolutions of the California Legislature requesting the Federal Government to construct a flood-water canal and reservoir from the San Joaquin River; and be it further

Resolved, That our Senators, Hon. GEORGE C. PERKINS and Hon. JOHN D. WORKS, and our Representatives, Hon. J. C. NEEDHAM, Hon. JOHN E. RAKER, Hon. WILLIAM D. STEPHENS, Hon. S. C. SMITH, Hon. E. A. HAYES, Hon. JULIUS KAHN, Hon. JOSEPH R. KNOWLAND, and Hon. WILLIAM KENT, be, and they are, requested to use all honorable means at the present session of Congress to secure the legislation requested in said resolutions; and be it further

Resolved, That the secretary of this convention be, and she is hereby, directed to mail forthwith to each of our said Senators and Representatives a copy of these resolutions.

LOUISIANA BANKERS' ASSOCIATION.

Resolution adopted at annual meeting, Covington, La., April 27, 1912.

Whereas a bill was introduced in the Senate of the United States by Senator NEWLANDS on March 1, 1911, entitled "A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies"; and

Whereas the primary purpose of said bill is to bring into conference and cooperation the National Government with the States, municipalities, counties, and local districts for the construction of the works necessary for the regulation of the flow of rivers and for flood prevention and protection, and provide a fund of $50,000,000 annually for 10 years for said purposes; and

Whereas the passage of said bill by Congress would result in the relief not only of Pittsburgh but of all cities and communities on the Ohio, Missouri, and Mississippi Rivers from destructive floods and increase the flow of the rivers in the low-water season for navigation: Now therefore be it

Resolved, That the Louisiana Bankers' Association hereby indorses said Newlands river-regulation bill and requests the Senators and Congressmen from this State to urge its passage by Congress.

LOUISIANA BANKERS' ASSOCIATION.

—

STOCKTON, CAL., *April —, 1912.*

Mr. GEO. H. MAXWELL,
Executive Chairman Board of Control,
National Drainage Congress,
St. Charles Hotel, New Orleans, La.

DEAR SIR: We extend our heartfelt sympathy to the sufferers from the present floods in the East and the South. Our sympathy is tinctured with shame, as we know that the appalling loss of life and property could and ought to have been prevented. As a people we have the intelligence and the money to do the required work that will control forever the flood area of our country, whether in the East, the South, or the West. We know how to change the awful destructive flood forces into constructive and beneficial powers. With these forces we can improve and make permanently navigable our inland waterways, generate enormous quantities of electric power, make safe the investments, and increase the improvements in our great valleys, and while doing so we shall remove the danger of drought, or fear of it. The time is opportune for an immediate start on this great work. The Panama Canal is nearly finished. Even now the services of a part of the splendid working army is being dispensed with and part of the equipment is being sold. These trained men should be kept together, and the equipment that can be used in the South and East or in the West should be at once put in order for the work that must be done to save the lives and property of our people by properly conserving the natural forces and resources of our country. There can be no excuse for another hour's delay. The sinking of the *Maine* with so large a part of her gallant crew in Habana aroused our people to war. What can we say to a watching world if we refuse to act as promptly and as energetically when the lives of our people are being taken by floods that we can control or droughts that we can prevent? To the loss of life we must add the destruction of property so vast that its value if wisely used would prevent forever such losses. Under such conditions can we still say that we have a government of the people, by the people, and for the people? To enable us, a people, to claim without shame that we so govern ourselves we pray that you will take such action at New Orleans and immediately thereafter at Washington that the Newlands bill may be enacted into law and the good work of conservation and control be started without further delay.

Yours, truly,
THE RIVER REGULATION COMMISSION OF STOCKTON, CAL.,
By J. L. CRAIG.

—

NEW ORLEANS PROGRESSIVE UNION.

Resolution adopted at meeting of board of directors May 2, 1912.

Whereas a bill was introduced in the Senate of the United States by Senator NEWLANDS on March 1, 1911, entitled "A bill to create a board of river regulations and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies"; and

Whereas the primary purpose of said bill is to bring into conference and cooperation the National Government with the States, municipalities, counties, and local districts for the construction of the works necessary for the regulation of the flow of rivers and for flood prevention and protection, and provides a fund of $50,000,000 annually for 10 years for said purposes; and

Whereas the passage of said bill by Congress would result in the relief not only of Pittsburgh, but of all cities and communities on the Ohio, Missouri, and Mississippi Rivers, from destructive floods and increase the flow of the rivers in the low-water season for navigation: Now therefore be it

Resolved, That the New Orleans Progressive Union hereby indorses said Newlands river-regulation bill and requests the Senators and Congressmen from this State to urge its passage by Congress.

NEW ORLEANS PROGRESSIVE UNION,
JAMES W. PORCH, *President.*
M. B. TREZEVANT,
Secretary-Manager.

—

LOUISIANA RECLAMATION CLUB.

Resolution adopted at meeting held Tuesday, May 14, 1912.

Whereas throughout a wide extent of country that is comprised within the trade territory of New Orleans the great flood of 1912 in the Mississippi Valley has made thousands homeless, ruined crops, drowned live stock, destroyed buildings and improvements, and will seriously retard the advancement and development of that territory; and

Whereas every business man and property owner in New Orleans will feel the loss from this great disaster in a decreased volume of business, deferred collections, reduced property values, stagnation of trade, and lessened demand for real estate; and

Whereas the danger of a recurrence of such disasters is a menace to the prosperity, growth, and development of New Orleans, and such danger can only be permanently removed through the adoption by the Congress of the United States of a broad national policy under which the Federal Government will in future guarantee protection against overflow by taking over and maintaining the levee systems as national fortifications against invasion by the destroying forces of nature, just as it now maintains military and naval forces and builds fortifications as defenses against foreign invasion; and

Whereas the construction of the great engineering works and reservoirs that would store the floods of the Ohio River and thereby aid in affording protection from overflow in the lower Mississippi Valley is warranted by the benefits therefrom to the Ohio Valley alone in flood prevention, incidental power development, and navigation, and a similar policy is likewise justified in the Missouri Valley for the same reasons, and also because the water there may be used for the irrigation of millions of acres of arid lands; and

Whereas in no possible way can the construction of such works for headwater control of the floods in the territory of their origin do otherwise than benefit the lower Mississippi Valley by regulating the flow of the river, and thereby improving it for navigation and giving additional security and protection against floods; and

Whereas the steadily increasing volume and rising flood plane of the flood in the lower Mississippi Valley have been largely caused by the changed conditions of the watershed in the States comprising the drainage basin of the Ohio, upper Mississippi, and Missouri Rivers, and those conditions and causes are beyond the control of the States bordering the Mississippi River from Cairo to the Gulf, and can only be controlled by the Federal Government: Now therefore be it

Resolved, That the Federal Government should immediately extend such temporary relief as may be necessary to repair the broken levees and to maintain them in future, and to control the river in its channel by revetments and bank protective works which will safeguard against the destruction of levees by caving banks and shifting channels; and

Resolved further, That in working out plans for flood prevention and the protection of the lowlands of the Mississippi Valley from overflow the Mississippi River and all its tributaries and source streams should be treated as a unit, and a comprehensive and adequate levee system to be permanently maintained by the National Government should be supplemented by a system of reservoirs on the headwaters of the Ohio and its tributaries, and also on the upper Mississippi, and by a system of flood-water canals and storage reservoirs in the Missouri River Valley, by means of which the flood plane at Cairo would be at all times so reduced that no combination of high water in the three upper rivers would ever create a great flood in the lower Mississippi Valley, and at the same time prevent overflow and damage by floods in the valleys of the Ohio, the upper Mississippi, and the Missouri Rivers; and

Resolved further, That the Nation can not longer afford to permit its resources of soil, of power, of water, and of navigation to be carried as a wasteful and destructive flood to the sea, and that since the States themselves can not, in the general interest, prevent this waste, the Federal Government should conserve such floods at their sources and subject the now wasted waters to beneficial use; and

Resolved further, That the Louisiana Reclamation Club hereby indorses and approves the resolution of the Pittsburgh Chamber of Commerce adopted on April 13, 1911, indorsing the Newlands river-regulation bill, and urging its passage by Congress; and

Resolved further, That the business men and property owners of New Orleans be, and they are hereby, urged to extend their hearty personal cooperation and financial support to the Louisiana Reclamation Club in its work for the organization of a national campaign, through the National Reclamation Association, to accomplish the early passage of the Newlands river-regulation bill by Congress.

—

[Night letter.]

WESTERN UNION TELEGRAPH CO.,
Stockton, Cal., May 23, 1912.

Mr. GEORGE H. MAXWELL,
New Orleans, La.:

We on the coast believe this is the opportune moment to force passage of the NEWLANDS bill. The present disaster in the Mississippi Valley should of itself be sufficient reason to prompt its passage. If existing conditions in Mississippi Valley do not change the inertia of Congress, we can not conceive what would be impressive enough to cause them to perform their duty. Keep us informed on any important movement at any point.

THE RIVER REGULATION COMMISSION OF STOCKTON, CAL.,
J. L. CRAIG, *President.*

—

LOS ANGELES CHAMBER OF COMMERCE,
Los Angeles, Cal., June 13, 1912.

Resolution indorsing and advocating the enactment by the Congress of the Newlands river regulation bill (S. 122), introduced April 6, 1911, by Senator FRANCIS G. NEWLANDS, entitled: "A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies." * * *

Whereas reports made by Maj. J. W. Powell, first Director of the United States Geological Survey, and later surveys, investigations, and reports of the Geological Survey; also reports by Gen. Hiram M. Chittenden, of the Engineer Corps of the United States War Department, Engineer Charles Ellet, jr., and others; also surveys and investigations made by the Pittsburgh flood commission have shown the practicability of the storage of the flood waters of the rivers of the whole country to the end that destructive floods may be controlled and the waters heretofore wasted may be conserved for the use of navigation and irrigation where required; also the necessity of the drainage of the swamp and overflowed lands;

Whereas a condition which now causes wide devastation it is shown may be controlled and transformed into a great natural resource, reclaiming millions of acres of land now uncultivatable, thus benefiting and enriching every section of the country from the Atlantic to the Pacific; and

Whereas the Newlands river regulation bill embodies the provisions requisite for the carrying into effective operation of the beneficial objects desired to be accomplished: Now therefore be it

Resolved, That the Los Angeles Chamber of Commerce hereby indorses the said Newlands river regulation bill and requests the Senators and Congressmen from this State to urge its passage by the Congress, and approves the resolution of the Pittsburgh Chamber of Commerce indorsing said bill, adopted by that body on April 13, 1912; and be it further

Resolved, That the National Irrigation Association and National Reclamation Association be, and are hereby, urged to at once put forth all their efforts toward inaugurating and carrying on a campaign directed toward the furtherance of the purpose of the foregoing resolution.

I hereby certify that the above is a true and correct copy of the resolution adopted by the board of directors of the Los Angeles Chamber of Commerce at their regular meeting held June 12, 1912.

H. Z. OSBORNE, *President.*

Attest:

H. B. GURLEY, *Assistant Secretary.*

—

Resolution of the Twentieth Irrigation Congress, at Salt Lake City, October 3, 1912.

We renew our indorsement of the Newlands river-regulation bill and urge its enactment by the Federal Congress during the coming session. The bill provides for the complete control of the flood waters of our rivers in such a way as to promote irrigation and drainage, the development of power, the extension of navigation, and the protection of the lowlands from destructive floods.

—

PHILADELPHIA BOARD OF TRADE,
Philadelphia.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

This memorial of the Philadelphia Board of Trade respectfully represents:

That, through its committee on inland transportation, it has examined the provisions of Senate bill No. 122, introduced by Senator NEWLANDS, having for its purpose the creation of a board of river regulation with the view of securing the maintenance by the Federal Government of an adequate levee and bank revetment system in the low States bordering the Ohio and Mississippi Rivers and for the ultimate adoption of a policy of stream control which shall check and minimize the formation of floods, which have proved so disastrous in the loss of life and property.

That the yearly damage caused by preventable floods in the drainage basin of the Ohio River, and the damage caused by the great flood of 1912 in the Mississippi Valley, certainly justify the most liberal appropriations and the most careful study for their causes, with the view of securing remedial measures for their prevention.

That Philadelphia, while far removed from the territory affected by these floods, sympathizes with the sufferers therefrom and believes that in the last analysis the great losses affect unfavorably every business interest and the General Government is called upon to aid by legislation in securing for the afflicted sections of the country immunity from the recurrence of these devastating floods: Therefore

Your memorialist, the Philadelphia Board of Trade, petitions your honorable bodies to favorably consider and pass Senate bill No. 122, known as the "Newlands river-regulation bill."

And your memorialist will ever pray.

[SEAL.]

WM. M. COATES,
President Philadelphia Board of Trade.

Attest:

W. R. TUCKER, *Secretary.*

—

Resolutions of the National Flood Prevention and River Regulation Conference at New Orleans. Unanimously adopted January 7, 1913.

Whereas the great flood of 1912 in the lower Mississippi Valley demonstrated the necessity for the complete national regulation of our rivers from source to mouth, including their tributaries, in such a way as to restrain the floods, not only by levee construction, revetments, and bank protection in the lower river valleys, but also by source-stream control of the flood waters, so far as possible, in the territory of their origin, by all adequate and practicable means of water conservation, including flood-water canals and reservoirs, in aid of navigation, reclamation, and power development, thus transforming the floods from agencies of destruction into agencies of production and saving for beneficial use the enormous national wealth that now goes to waste in floods and maintaining a sustained and well-regulated flow for navigation; and

Whereas the policy approved and urged by President Elect Woodrow Wilson, in his telegram to Hon. FRANCIS G. NEWLANDS, of September 29, 1912, which has been read to this conference, of supplementing bank and levee protection by the storage of flood waters above for irrigation and water power, thereby turning floods from a menace into a blessing and at the same time abundantly feeding navigable waters, can be best carried into practical effect and operation by concentrating constructive effort upon the greater river systems of the country and treating each of such systems as a unit from source to mouth and completing, with all possible expedition, adequate levees and bank-protective works in the lower valleys as national defenses against the destroying forces of nature, supplementing such works of defense by the simultaneous construction of all effective and practicable works for source-stream control; and

Whereas in order that this may be done it is necessary that an appropriation should be made sufficient for the entire work of construction, without interruption or delay, in the same continuous way in which the work on the Panama Canal has been so rapidly pushed forward to completion: Now therefore be it

Resolved, That as rapidly as the works on the Isthmus are completed so as to dispense with them there that the trained force of engineers and skilled workmen and such machinery as may be available for and adapted to this new work shall be forthwith transferred to the Missis-

sippi Valley and there set to work under the same competent leadership which has directed their work on the Panama Canal, to the end not only that all destructive floods in the "Sugar Bowl of the Continent" in the valley of the Mississippi River, as well as its tributaries, shall be forever safeguarded against and the shadow of their menace lifted forever from the pathway of its future progress and development, but also that the great Isthmian waterway now approaching completion shall be supplemented by the most complete system of inland waterways existing in any nation of the world; and be it further

Resolved, That the Newlands-Bartholdt river-regulation bill, in order that it may more fully and completely accomplish the great objects above set forth, shall specifically appropriate not less than $10,000,000 annually, $100,000,000 in all, for work on the Mississippi River and its tributaries, other than the Ohio, from St. Louis to the Gulf; and $10,000,000 annually for 10 years, $100,000,000 in all, for work in the drainage basin of the Missouri River; and $10,000,000 annually for 10 years, $100,000,000 in all, for work in the Ohio River drainage basin; and $5,000,000 annually for 10 years, $50,000,000 in all, for work in the drainage basin of the Colorado River; and $5,000,000 annually for 10 years, $50,000,000 in all, for work in the drainage basin of the rivers of the Sacramento and San Joaquin Valleys in California; and be it further

Resolved, That the annual appropriation for 10 years to the Corps of Engineers of the United States Army shall be increased in said bill from $24,000,000 to $29,000,000, $290,000,000 in all, to be expended for levees, revetments, and other works for river regulation and control, as now specified in said bill, and also for building bank-protective works to prevent erosion and cutting of the banks and consequent caving and destruction of the levees and to control the river and hold it in a permanently fixed and established channel; and be it further

Resolved, That the said bill be further amended so as to specify more particularly in its title and in the first section of the bill its purpose and object of preventing silt and sedimentary material from being carried into and deposited in navigable rivers, channels, and harbors, and for the conservation of the water resources of the United States, and that in subsequent sections of the bill its purpose of promoting river regulation by land reclamation should be, wherever provided for, made to include drainage to an equal extent with irrigation in order that the flow of rivers shall be regulated and controlled in aid of navigation, not only by the use of flood waters for irrigation on the upper tributaries but also by controlling them in fixed and established channels in the lower valleys, thereby aiding navigation and at the same time promoting land reclamation by both irrigation and drainage; and be it further

Resolved, That the specific appropriation in said bill for the Bureau of Plant Industry of the Department of Agriculture shall be reduced from two to one million dollars annually for 10 years, and that the appropriation for the Forestry Service for the acquisition of lands under the Appalachian Act shall be reduced from five to one million dollars annually for 10 years, the total amount of said reductions to be added to the appropriation for the Corps of Engineers of the United States Army for work under said bill as hereinbefore provided; and be it further

Resolved, That on international rivers or streams the board of river regulation may cooperate with other nations and the representatives thereof in the same manner and to the same extent that they are now directed by said bill to cooperate with the States of the United States; and be it further

Resolved, That the President of the Mississippi River Commission shall be a member of the board of river regulation created by said bill; and be it further

Resolved, That, in the judgment of this conference, the passage by Congress of the Newlands-Bartholdt river-regulation bill can be accomplished by a great educational campaign similar to that which resulted in the passage of the national irrigation act and the Appalachian Act, and that to facilitate and expedite the conduct of such a campaign the National Irrigation Association and the National Reclamation Association should be merged into one great national organization under the broader name of the National Reclamation Association, more particularly as the national irrigation act is officially known as the United States reclamation act and the Government service created by that act and through which it is administered is known as the United States Reclamation Service.

NEWSPAPER COMMENTS AND EDITORIALS FAVORABLE TO THE NEWLANDS RIVER REGULATION BILL.

[From the Philadelphia Evening Item.]

RIVER NAVIGATION AND FLOODS.

PHILADELPHIA, PA., *March 13, 1911.*

Senator FRANCIS G. NEWLANDS, of Nevada, is one of the best-informed men on the subject of river navigation in the United States. In his recent speech in the Senate on this subject he gave the Nation an amount of practical information, which, so far as we know, is unmatched in the same space to be found anywhere. We can touch on a few points only here.

He said we must realize that the country needs and demands legislation from Congress that will include regulation, improvement, and development of all the waterways of the United States under broad and comprehensive plans.

Regarding irrigation works, with only eight years' work we have to-day 23 projects, some completed, and all well along toward completion.

So far these newly irrigated lands have become the most valuable, or as valuable, per acre of any producing lands in the United States, lands which a decade ago could not even be given away, so worthless in their desert aspects did they appear to the farmer.

Methods can and will be devised for the Nation to cooperate with the States to provide a proper apportionment of costs and benefits, so instead of wasting time on question of jurisdiction we could unite all powers and create a common benefit for all the people.

The development of our waterways as efficient machines for transportation requires primarily the regulation of river flow. For if the flow of the rivers be regulated in such a way as to avoid the extreme of floods and the opposite extreme of low water, we will always have in the rivers a navigable stage of water to transport boats for passengers and freight.

We must first prevent floods. We can make use of the natural reservoirs which nature has provided for the absorption of the rains, and we can create artificial reservoirs for the storage of flood waters, as we are now doing on the Panama Canal.

The natural reservoirs are the forests and the agricultural lands, which absorb the rainfall and the melting snows. Our aim should be to everywhere increase the porosity and absorbent properties of the soil and thus prevent the run-offs which swell our streams into great floods, which now aggregate a damage upon property of the stupendous sum of nearly two hundred millions a year in the United States.

Aside from the question of whether or not the denudation of our forests will diminish rainfall, there can be no doubt whatever that the destruction of forest growth will diminish the absorption of falling waters on the soil.

The reports of the Geological Survey show clearly that wherever there has been a destruction of forest growth there follows immediately a hardening of the surface, the erosion of the soil, and the rapid run-off which carries the soil and silt and the material from the mountains and hillsides down into the channels of the rivers, choking navigation. Therefore the preservation of the forests upon these great watersheds, which are the sources of water supply, is an essential element in the control of floods which affect the channels of navigable rivers.

The next thing to consider is the increase of the absorbent properties of the soil itself wherever it is farmed or cultivated. Plowing and cultivation, and of terraced and irrigated fields systematically practiced, facilitate the absorption of moisture. By such and like scientific means the soil is prevented from being washed into the creeks and streams and finally into the navigable rivers; they arrest this constant flow of vast areas of alluvial soil down into the Ohio, the Missouri, and the Mississippi Rivers, and also from the Appalachian Mountains, and the White Mountains, and the Allegheny Mountains down the rivers that flow into all the channels emptying into the bays and sounds on the Atlantic seaboard.

In that manner, adds Mr. NEWLANDS, we will not only perform the work of facilitating the storage of water in the soil by intelligent methods of cultivation and thereby aid in regulating the river flow, but we will also prevent the enormous waste of soil of the country, which is robbing the cultivated areas of vast amounts of fertile, cultivable soil and depositing it in rivers, bays, sounds, and gulfs, where it is not wanted.

The next thing to be considered is artificial reservoirs. The people of Pittsburgh have recently caused to be made a survey of the watersheds of the Allegheny and Monongahela Rivers, and they have found there many large sites that can be utilized for storage purposes. They are seriously studying the question of constructing these reservoirs with a view to avoiding the destructive floods which at present inflict an annual injury upon Pittsburgh, and the year of the great flood of 1907 caused damage in that city alone amounting to from $5,000,000 to $10,000,000.

So it is everywhere. Localities are considering the question of flood destruction and are working at the problem, not only in its local aspects but in its national aspects. The States at the lower ends of rivers are calling upon the Nation to see to it that they are not damaged by the run-offs from States above them.

[From the Pittsburgh (Pa.) Post, Mar. 16, 1911.]

FOR FLOOD PROTECTION.

The declaration by George H. Maxwell that the enactment of the Newlands bill by Congress will add fifty to a hundred millions to the value of property in the Pittsburgh industrial district has aroused an increased interest on the subject of flood protection. The Newlands bill was introduced in the United States Senate by Senator NEWLANDS, of Nevada, and it provides for an annual appropriation of $50,000,000 for 10 years to regulate and control the flow of navigable rivers in aid of interstate commerce and as a means to provide for flood protection.

This act, Mr. Maxwell declares, will afford Pittsburgh the protection desired, and by proving a guaranty of safety would result in a tremendous enhancement of values. Mr. Maxwell, as the executive director of the flood commission, has made a thorough study of conditions, and his statement must be accepted as wholly devoid of extravagance. It serves to show what the flood menace inflicts in the way of business losses and depreciation in the value of affected real estate.

The flood commission has made commendable progress in the preparation of plans, but it is stated both State and national aid will be required. The Newlands bill, owing to the broadness of its scope, is recognized as the best legislation that has been advanced. It covers every State in the Union. A bill is also pending in the legislature which authorizes county commissioners to expend moneys for flood protection.

Naturally, the citizens of Pittsburgh will await with keen interest for the development of this all-important matter. I means much to them both as to business and comfort. With the positive claims that the danger can be overcome there will be an increased demand for a condition that would be of such incalculable benefit to the city and all its business interests.

[From the Lockport (N. Y.) Sun, Dec. 12, 1911.]

ONE MILLION ACRES IN NEW YORK.

The immediate drainage of the 80,000,000 acres of swamp and overflow land in the United States, the immediate regulation and control of the flood waters of every river in the country, the immediate development of a national policy for the control of the entire drainage-water question as a unit, are the aims of the National Drainage Reclamation Association, just formed in Chicago of men from the South, Southeast, East, Southwest, Middle West, and far West.

To this end the new association will get behind the bill introduced in the Senate by Senator NEWLANDS providing for the regulation and control of all rivers and streams, storing their flood waters, and distributing them in times of low water.

James R. Garfield, former Secretary of the Interior, and Gifford Pinchot, former Chief Forester and at present the president of the National Conservation Association, were present at the organization meeting. Each spoke at length upon the magnitude of the work the association was about to undertake, and each spoke of the necessity for a strong organization built upon the policy of national patriotism.

As the name of the association indicates, its primary work will be to compel the Federal Government to take immediate steps to reclaim the 80,000,000 acres of swamp and overflow lands that are scattered all over the country. At the same time it will give its aid and support to every other conservative movement—to forestry, irrigation, river regulation. The word "reclamation" in the name indicates the comprehensiveness of the aims of the association.

"We want to reclaim these 80,000,000 acres of swamp lands," said Edmund T. Perkins, of Chicago, who called the meeting. "We want to add to the permanent wealth of the country five or eight billion dollars

worth of land and hundreds of millions of dollars to the value of the annual crops from our lands. We want Uncle Sam to do this for the sake of all this people—to provide more homes for his nephews and nieces, to increase the prosperity of the land, to decrease the high cost of living.

"Because every section of the land has swamp acres this is not and can not be a sectional movement. There are nearly 14,000,000 swamp acres in the States immediately surrounding Chicago—in Illinois, Iowa, Minnesota, Wisconsin, and Michigan. There are more than a million such acres in New York and New Jersey; there are nearly 3,000,000 such acres in California and Oregon; there are 25,000,000, approximately, along the Atlantic coast; and there are more than 30,000,000 in the Mississippi and Ohio and Missouri Valleys."

—

[From the Lincoln (Nebr.) Journal, Jan. 19, 1912.]

The Newlands reclamation bill is one of the most comprehensive conservation measures ever placed before Congress. It contemplates devoting $50,000,000 a year for a period of 10 years to the general subject of water control in the United States. It is proposed to unite all of the hydrographic activities of the Government into one harmonious plan. The idea is to impound and store the flood waters of the upper reaches of the rivers for irrigation; to provide channels as the rivers near the sea large enough to carry away floods without damage, and at the same time serve as waterways for commerce. With the plan goes the reclamation of the swamps and the reforestation of the mountains to prevent erosion and check sudden freshets. It is easy to figure a return on this investment running up into the billions of dollars. In general, the plan is workable. Of the financial benefits to be derived from it there can be but little question. The main point to guard against is the enhancement of the value of private lands at the expense of all the people. The national irrigation act provided for the return of all the money expended to the Treasury as a result of the enhancement in the value of the lands served by the Government ditches. It would be only just to arrange for the same policy with reference to vast areas of property directly benefited by the Newlands program.

—

[From the Pueblo (Colo.) Journal, Jan. 19, 1911.]

WATERWAY IMPROVEMENT.

The proposal of Senator NEWLANDS to make a thorough investigation of the inland waterways of the country has merit which ought to insure its passage by Congress. Under his plan every use to which water can be put will be considered; the rivers will be examined as to their possibilities for freight carrying and power purposes; practical plans will be formed for improvements and estimates of the cost made. It is a big undertaking, which will require the expenditure of considerable money for the preliminary work, but the expense will be small in comparison to the good to be accomplished. Accurate facts will be secured and the Government enabled to go about the work of waterway improvement in a systematic manner, and not in the haphazard way which is of so frequent occurrence. Under the "pork-barrel" methods which have existed immense sums have been voted in the past for "improvements" which were of no account, the only good thing about them being that employment was furnished.

A feature about the Newlands measure which can be objected to is that for the appointment of a special board to consider the matter of improvements. A salary is provided for the members, and as their task will take a number of years, the expenditure on this item alone would be considerable. There must be some supervising board to direct the work, but one could be secured without any additional salary expense. The Government has plenty of engineers and experts in its employ, and these could be detailed to make the investigation. The Army engineers and the experts connected with the Interior Department are well fitted for the task, and with substituting a board composed of such the Newlands bill would be the ideal method for getting at a businesslike handling of the waterway problem.

—

[From the Woman's National Daily, St. Louis, Mo., Jan. 27, 1911.]

ESCHEWING PORK.

Senator NEWLANDS has offered an amendment to the river and harbor bill providing for the appointment of a board to consider all questions of inland waterways, irrigation, swamp-land drainage, and forest preservation in its relation to the streams. This is not a general conservation commission, but one charged with the consideration of all the phases of inland navigation. It would be the province of this board to study all the projects, harmonize and coordinate them, and make recommendations to Congress for specific action. This is something the friends of waterways have long demanded. It is the proper way to cut the "pork barrel" from appropriation bills, and therefore should receive the approval of the President. It is the way to harmonize the various projects and get all their friends to pulling together for such of them as the board considers desirable and practicable.

Having expended half a billion on the Panama Canal, as we shall have done by the time it is put into operation, particularly if we erect elaborate fortifications, and then add largely to the Navy to protect the fortifications, as we should be compelled to do, we could well afford to expend a like sum upon a properly devised system of waterways for the development of internal transportation. We have expended hundreds of millions in the past with comparatively little to show for it. We shall continue to waste money in the same way, pork or no pork, unless we systematize the work as Senator NEWLANDS provides for in this bill, or in some other way involving the same general principle. This amendment will probably not carry in the brief time Congress has yet to consider it. Indeed, it may be the means, by delay caused by its discussion, of preventing the bill itself from passing, and thus adding one more to the calls for a special session. But, soon or later, it will be passed, because it appeals to the business sense of the people.

—

[From the Gulf States Farmer, New Orleans, March, 1912.]

COOPERATION IS THE WATCHWORD OF THE NATIONAL DRAINAGE CONGRESS.

The object of the Second National Drainage Congress, to be held in New Orleans on April 10–13, 1912, will be to work out a national policy for river regulation and control, for protection from overflow, for flood prevention, and for land reclamation by the irrigation of arid lands and the drainage of swamp and overflow lands, that will harmonize and unite every section of the United States in a great campaign for its adoption by the National Government.

This national policy must be one that will bring into complete cooperation and harmony the National Government, the States, and all local districts and municipalities in actual constructive work.

It must be a policy that will clearly recognize the constitutional limitations of the National Government, and require of the National Government that it shall do only such things as are clearly within those constitutional limitations and for which precedents already exist in legislation heretofore enacted.

It must be a policy which will unite in its support the Ohio River Valley, which requires flood prevention, as well as navigation; the upper Mississippi River Valley, which requires a sufficient enlargement of the reservoir system on the headwaters of the Mississippi River to regulate the river flow for navigation and for water-power development; and the Missouri River Valley, which requires storage reservoirs and flood-water canals for irrigation, navigation, protection from overflow, flood prevention, and water-power development.

The precedents already exist for the doing of all these things by the National Government, but its work through the different bureaus, services, and departments lacks cooperation, and is for that reason inadequate and wasteful.

In the lower Mississippi Valley, if the National Government will protect the banks, prevent caving and the destruction in that way of existing levees, preserve and maintain the navigable channels, construct adequate outlets and controlling works, and build the large canals necessary for navigation and as part of a comprehensive drainage system, the rest of the work of the reclamation of the swamp and overflow lands will be accomplished through State, district, and local action.

In the State of Louisiana the recent decision of the State supreme court sustaining the constitutionality and validity of drainage bonds issued under State statutes provides the way for securing the capital necessary for the local drainage work, and it is neither desirable nor necessary that this work should be undertaken by the National Government, even though it were within its constitutional power.

It will thus be seen that the object of the National Drainage Congress will not be to strike out any new and radical national policy, but its slogan will be "Cooperation and harmony." It will aim to bring into cooperation, coordination, and harmonious and united constructive work all the agencies which are now at work in an inadequate and disconnected way.

It is in this work of bringing order out of chaos, eliminating controversy, and perfecting a broad working plan which will unite territorially the entire Mississippi Valley from Canada to the Gulf of Mexico, with the Ohio River Valley on the east and the Missouri River Valley on the west—a vast region embracing more than one-third of the entire area of the United States—that the National Drainage Congress so much needs the cooperation by attendance as a delegate at its meeting in New Orleans on April 10–13 of every one who would be benefited by the development of the Mississippi Valley.

Those who contribute to the success of this great movement for uniting so many heretofore divergent ideas and plans in one great workable whole that will solve the problem of navigation, drainage, protection from overflow, and flood prevention in the lower Mississippi Valley, and at the same time apply to similar conditions anywhere in the United States, will help to do the country a service as great as any which can be rendered to it in any way in this generation. The problem is so vast and far-reaching in its importance and magnitude that it overshadows every other public question. It dwarfs into comparative unimportance even the Panama Canal.

In the State of Louisiana alone there are 10,000,000 acres of land that can be reclaimed for agriculture by drainage, protection from overflow, and flood prevention. Louisiana is larger by 10,000 square miles than the combined area of Belgium, Holland, and Denmark, has greater latent agricultural resources, and will sustain a larger population than those countries. Their combined population is now 16,000,000, while that of Louisiana is only 1,600,000. The annual agricultural production of Louisiana to-day is $85,000,000. If its 10,000,000 acres of reclaimable land were drained and cultivated, it would increase the agricultural production of the State over a billion dollars—more than twice the entire gold production of the world. And these stupendous figures show the possibility of development by river regulation and land reclamation in only one State.

If the western boundary line of Mississippi were extended south to the Gulf of Mexico, that part of Louisiana lying to the east of that line would embrace an area as large as Belgium. If the unreclaimed lands in that territory which are now an uninhabited waste, were drained and intensively cultivated, as are the lands of Belgium, by a densely settled rural people, there would be within a radius of 100 miles of New Orleans a population as large as that of Belgium. The population of Belgium is 7,200,000. What would that mean to New Orleans? It would mean that it would rival Antwerp, the third great seaport of the world, in its commercial prestige and world trade; while Baton Rouge would grow to be as great and beautiful a city as Brussels.

Every smaller city, town, village, and hamlet in the whole Mississippi Valley and Gulf States would grow and develop proportionately in population. Every merchant, wholesale or retail—every manufacturer—every professional man, engineer, lawyer, doctor, or dentist—every real estate owner—every planter, farmer, fruit grower, or truck gardener, would be correspondingly benefited. All would share in the enormous prosperity that would be created by this stupendous development of wealth from natural resources.

—

[From the Gulf States Farmer, April, 1912.]

THE NATION-WIDE NEWLANDS PLAN—SENATOR NEWLANDS'S BILL BEFORE CONGRESS TO AID DRAINAGE—ITS WIDE SCOPE.

[From our Washington correspondent.]

Four billion dollars more in farm products each year; this sum added annually to the wealth in the United States for the prosperity of its farmers, merchants, manufacturers, railroads, and bankers and their employees; this is the result of a national business investment under consideration in this Congress. It is proposed in the bill for river regulation drawn by Senator NEWLANDS and known as the Newlands bill.

Four billion dollars per annum in perpetuity from the investment by Uncle Sam of $50,000,000 a year for 10 years—$500,000,000.

The Newlands bill has a scope big enough to perform as a harmonious whole the big tasks to which the Government has set its hand.

The bill is considered one of the broadest and most comprehensive conservation measures ever drafted. By coupling all the work proposed by it with the idea of promoting interstate commerce by means of navigable rivers it brings within the constitutional limitations of the Federal Government such tasks as the drainage and reclamation of swamp lands, the irrigation of arid and semiarid lands, the protection of forests, the elimination of dangers from floods, etc.

The Newlands bill has received the enthusiastic indorsement of many public men and associations. It was indorsed unqualifiedly at the

nineteenth meeting of the National Irrigation Congress held recently in Chicago. It is being earnestly supported by the Pittsburgh flood commission. It has just been indorsed by Edmund Perkins, president, and Isham Randolph, vice president, of the American Reclamation Federation, at the annual meeting in Chicago. It has the support of most of the members of the National Drainage Congress, organized in Chicago last month, and probably will be officially indorsed by that organization at its second meeting, in New Orleans, April 10 to 13.

* * * * * * *

DECLARED CONSTITUTIONAL.

Many expert constitutional lawyers have pronounced the bill constitutional. They say this is about the only way in which the National Government can undertake such work as drainage and reclamation of swamp lands, irrigation works, forest preservation.

* * * * * * *

Edmund T. Perkins, of Chicago, vice president and acting president of the National Drainage Congress, who was the engineer of the Reclamation Service for several years, is an ardent supporter of the Newlands bill. "It is such a splendid constructive measure, and with such far-reaching beneficial effects to the entire country, that it ought to be passed immediately," he said. "It is all that the irrigation advocates could want, all that the drainage enthusiasts could wish for, all that the forest men could desire; it provides for the conservation of the water, forest, and soil resources of the whole country."

George H. Maxwell, director of the Pittsburgh flood commission, is more enthusiastic even than Mr. Perkins. Mr. Maxwell is a member of the executive committee from Pennsylvania of the National Drainage Congress. "The Newlands bill," says Mr. Maxwell, "unites every aspect of conservation in a comprehensive plan that can be carried out by the Federal Government for the benefit of the whole Nation; and does it in what I consider the only constitutional way such a work can be done—under the policy of aiding interstate navigation and controlling, regulating, and standardizing the flow of navigable rivers."

* * * * * * *

—

[From the Spectator, Pittsburgh, Friday, Apr. 7, 1911.]

FLOOD COMMISSION'S GREAT WORK.

Mr. George H. Maxwell, executive director of the flood commission of Pittsburgh, writes as follows to the Spectator:

"Is not $100,000,000 added to the value of property in the Pittsburgh industrial dristrict a proposition large enough to merit the active and vigorous cooperation of every business man in the district? The figure I give is the conservative estimate of the benefits that would immediately result if the Pittsburgh industrial district were safeguarded against floods. That would be done, beyond all question or peradventure of doubt, if the Newlands river-regulation bill were enacted into a law by Congress."

The bill which Senator NEWLANDS has before the Senate at Washington has attracted a great deal of favorable attention and provides for the construction by the Federal Government of storage reservoirs and irrigation works wherever necessary to furnish water not only for irrigation purposes but for the prevention of devastating floods.

It is this latter purpose that is specially applicable to the Pittsburgh district, for with the Newlands bill made a law the work of constructing great reservoirs at the headwaters of the Allegheny and Monongahela Rivers could be carried on, with the splendid and profitable result of ending the costly ravages to Pittsburgh and suburbs by great floods.

Such a proposition should receive the prompt, hearty, and generous support of business men and all other citizens of Pittsburgh. Certainly the adding of $100,000,000 to the value of property in our industrial district is a grand thing, and yet to attain it nothing is really needed but the support of the people.

In this great work the Pittsburgh Chamber of Commerce is taking an active, aggressive, and splendidly efficient part. Let its work be backed up by the influence and the financial support of business men and all people of the Pittsburgh district. The chamber of commerce flood commission was originally organized with 34 business and professional men, and is now being enlarged to include representation of the various industrial, commercial, and manufacturing interests.

—

[From the Fresno Morning Republican, Sunday, Apr. 7, 1912.]

CONTROL OF FLOOD WATERS.

EDITOR REPUBLICAN: We have noticed very recently accounts of the old and often-repeated story that Pittsburgh is flooded again; and this week the old, old story comes again that the Missouri, La Platte, and the Mississippi Rivers are raging torrents and doing millions of dollars of damage to the people in their vicinity. We may not this year have such reports of the Kings, San Joaquin, and Sacramento Rivers, but under usual conditions we shall hear of such things in future years; we had it last year and will again. Because of these ever-recurring floods Pittsburgh some time ago raised $100,000 to make surveys and estimates to store the flood waters that do so much damage (we might say annually to their city), and out of a large number of sites for reservoirs we understand they have selected 17 of the most favored ones, and that if these are built the flooding of Pittsburgh will be a thing of the past, and the flood waters that do so much damage will be made a useful servant of the people. And Pittsburgh is preparing, if in the event they can not get the Government to aid them in this work, to go on and do it alone. As Pittsburgh in the past has been one of the most favored cities in the country to receive benefits through the Government's protective policy, they have good grounds to continue to plead for aid from their point of view on this matter. One of their Congressmen has a bill now before Congress for a large appropriation to help in this work. Of course, if it became a law it would be a local matter, yet of great benefit to a large section of country. But if Congress would pass Senator NEWLAND'S river-regulation bill, known as S. 122, which appropriates $50,000,000 a year for 10 years, it would become a national affair, and as this bill provides for cooperation with States, counties, and even small districts, for the benefit of the people all over, wherever they take enough interest in such work to do something to help themselves. This great constructive measure should become a law at the earliest possible moment.

Some people say it is all well enough to appropriate the money, but where is it to come from without more taxation of the people? We answer, let the Government stop building battleships costing about $15,000,000 each before they are ready to leave our shores on a peaceful mission, for we have no wars on our lands and not the slightest prospect of one; yet some of the "chair warmers" at Washington want to-day to spend $20,000,000 on a single battleship, and they want one or two of this kind every year. These "chair warmers" are men on duty keeping their seats warm and imagining all kinds of disasters are going to come upon us as a nation if we do not keep building these engines of destruction. Congress now being in session, we hear from these infant industrial "chair warmers" that we are in danger again of the Japanese invading us, which is all "bosh and rot" to many of our great and notable men. It is time the people waked up to the enormous expenditure that our Government is spending every year preparing to kill people and only giving a paltry few dollars in helping the "mainstay" of the Government, to wit, agriculture. It is well to remember that 70 cents out of every dollar collected by the Government every year is spent in paying for past wars and preparing for future ones that will never come. This leaves 30 cents for all the rest of the work. We constantly hear of the high cost of living, and if the same policy is carried on as in the past we will hear more of it.

We need more land under cultivation, and we have it here at home if the Government only turns its attention to it. We have 80,000,000 acres of swamp and overflow land made so by these ever-recurring floods, and nearly every acre of these lands could be made a garden spot for our people to live on in peace and plenty. It must be reclaimed, and it will be as soon as our people wake up to its advantages and its great possibilities.

The great national drainage congress that will be held in New Orleans the coming week will be one of the largest congresses ever held in this country, and we have no doubt it will speak in no uncertain words a demand that our Government does take notice that in this great work a substantial start shall be made and that at once in the work to reclaim these vast areas of the richest lands on the face of the globe. In a short space of time our Government will have an abundance of material and machinery on hand when the Panama Canal is completed, and this could be brought home and put to good use in this reclamation work in preparing these lands for homes, and it must be done.

We are glad that Mr. Frank Short is going to that drainage congress, sent by the Panama fair commission; by this we know that our State will be heard from. The writer of this communication holds credentials from the head officers of the drainage congress, but it takes more than credentials to go so far to attend, no matter what the great object of the gathering may be. We are positive, knowing some of the leading men of this congress, that Senator NEWLAND'S bill, S. 122, will be strongly indorsed by that congress, and this we know every county board of supervisors and every chamber of commerce, board of trade—in fact, every organization of every description in this State and other States—should pass strong resolutions indorsing the Newlands river-regulation bill, and every resolution should be sent to every Congressman and every Senator at Washington and a private note that this measure must be passed and become a law this session of the Congress. If this were done we could be in line for assistance, not only of drainage but of irrigation—what our west side so much needs.

JOHN FAIRWEATHER.

—

[From the Courier Journal, Louisville, Ky., Apr. 7, 1912.]

CONTROL OF FLOODS.

It is evident that the levee system along the Mississippi River, while a great protection in the case of ordinary high water, is a source of no small danger in times of extraordinary floods.

Many years ago, when an engineer of some note suggested a system of storage reservoirs for controlling floods and also for increasing river stages at seasons of low water, he was almost laughed out of court. His plan was regarded as visionary and impractical, and nobody gave it very serious attention. The engineer long ago passed to his last account, but the idea has survived, and there is pending in the United States Senate a bill, offered by Senator NEWLANDS, which bears the following title:

"A bill to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection and for the beneficial use of flood waters and for water storage, and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies."

A few years ago the Chamber of Commerce of Pittsburgh organized a flood commission to investigate the question of flood control and make a report thereon. The commission delved deeply into the subject, and finally recommended storage reservoirs as a means of flood prevention. As reasons for indorsing the reservoir plan it cited the following:

"The flood relief would be extended over hundreds of miles of tributaries and of the main rivers, including the Ohio, for many miles below Pittsburgh.

"The impounded flood water, with proper manipulation of the reservoir system, would considerably increase the low-water flow of the tributaries and of the main rivers.

"This increased low-water flow would greatly aid navigation and interstate commerce.

"The increased low-water flow would notably improve the quality of the water for domestic and industrial purposes.

"The sewerage problem of Pittsburgh and of many other communities along the rivers would be simplified.

"The public health would be protected against the dangers arising from the insanitary conditions caused by overflow and by extreme low water.

"A considerable amount of water power would be incidentally developed."

The commission found that there were many available sites for reservoirs in the vicinity of Pittsburgh. In fact, it selected 43 such sites, and had most of them surveyed. The opinion was expressed that adequate flood reduction at Pittsburgh could be obtained with 17 reservoirs, and the estimate was made that these reservoirs could be constructed at a cost of $20,000,000. In 10 years the flood damage at Pittsburgh has aggregated more than half this amount. The area affected by floods in the city includes real estate of the assessed valuation of $160,000,000. If relieved from the flood menace, it is believed this property would be increased in value at least $50,000,000, or more than twice the cost of a system of reservoirs. The commission believes it would be the part of wisdom for the city to build the reservoirs.

The National Drainage Congress is to meet in New Orleans April 10 to 13. Considering present conditions along the Mississippi River, the congress is likely to devote considerable attention to the question of flood prevention. A discussion of the reservoir plan which seems to be so strongly favored by Senator NEWLANDS and the Pittsburgh flood commission would add much to the interest of the convention.

[From the Chronicle Telegraph, Pittsburgh, Pa., Apr. 8, 1912.]

FLOOD PREVENTION.

Senator NEWLANDS, of Nevada, in taking up the cudgels in behalf of the Pittsburgh flood commission's plan of flood prevention, directs attention to the inadequacy of unrelated improvement projects, such as channel dredging and levee protection. If we are to prevent disastrous floods and make the rivers serve their proper function of waterway navigation, he contends each river must be treated as a unit from source to mouth and treated in a scientific and orderly manner. This is the view enunciated by President Taft in his speeches and recommendations relative to river improvement, and it is in accordance with this view that the President has advised the taking up of the improvement of the Ohio as a starter and the prosecution of this work in a logical way until the problem of securing all-the-year-round navigation has been solved. To the idea so advanced in its general aspect no serious objection is raised in any quarter. The vital difficulty is to interest Congress in operations requiring so large an expenditure as the proposed improvement entails. While the present economy spasm lasts the prospects are not encouraging. Sooner or later, however, Congress must concede the public necessity that exists and provide the means of meeting it, in so far as Federal obligation goes.

[From the Terre Haute (Ind.) Tribune, Apr. 8, 1912.]

ANNUAL WASTE.

Annual and semiannual repetitions of floods such as are devastating the Mississippi, Ohio, and Missouri Valleys, causing the loss of many lives and damage to property that will probably total more than $50,000,000, would be prevented by the passage of Senator NEWLANDS's "river-regulation" bill now pending in Congress. This is the statement of Frank B. Knight, member for Illinois of the executive committee of the National Drainage Congress.

The Newlands bill would place the task of regulating the navigable waters—treating them all as parts of a unified, comprehensive system—in the hands of a commission. It provides for the storage of the flood waters in natural and artificial reservoirs, to hold them back until times of drought, when they can be let loose and maintain the navigable rivers at a proper depth. The reforestation of the watersheds is only one of the methods contemplated by the bill for checking the floods. Others are the construction of artificial reservoirs where these are possible and practicable, and the full utilization of natural reservoirs. It provides for carrying the surplus waters out over the arid and semiarid districts, in irrigating operations, to let it seep back gradually through the soil. It provides for the digging of drainage channels to carry off the surplus waters from the lower reaches of the river, to help keep the navigable channels at a standard depth and prevent them from being shifting; also to utilize these drainage channels as additional waterways.

It provides also for the construction of dikes and levees. The levee system is a good thing and has accomplished a great deal to protect people and property and to reclaim overflowed lands. But this work has been done by piecemeal; the various sections are unrelated. In times of unusual conditions, as at present, the entire levee system is endangered because the work of controlling the rivers has not been started at the headwaters and among the tributaries.

[From the Pittsburgh (Pa.) Post, Apr. 9, 1912.]

THE MISSISSIPPI FLOOD.

The flood in the Mississippi River must be regarded as a national calamity. More than 30,000 persons have been driven from their homes, a number not yet fully calculated drowned, while the monetary loss will exceed $10,000,000. Inasmuch as the end is not yet, these figures will probably be greatly exceeded, as many communities heretofore prosperous are in danger of being wiped out of existence.

These floods, with their attendant disasters, will continue just as long as scientific means are not adopted for keeping them under control. The present disaster proves the inadequacy of the levee system.

Senator NEWLANDS, who is to address the Pittsburgh flood commission next week, favors a system of river government that will not be piecemeal. He believes that each river must be treated as a unit from source to mouth in order to guarantee the perfection of the precautions taken for the safety of the people. It is evident, however, that if the Mississippi Valley is to be spared repetitions of these disasters a form of levee must be developed that will not break. This would involve a tremendous cost, but it would be warranted when we take into consideration the millions that are swept away by the floods, the loss to business, and the suffering imposed on the people. It is a problem that calls for the most careful scientific research.

[From the Nashville (Tenn.) Banner, Apr. 9, 1912.]

DEEP WATERWAYS.

Senator NEWLANDS, one of the distinguished men the Commercial Congress has brought to Nashville, is interested in the improvement of waterways and points out that the present floods emphasize the necessity for that great work. He was quoted in the Banner's news columns yesterday as saying:

"In order to accomplish anything in this direction, we must undertake the work in a big way—just as we did the Panama Canal and the irrigation works. We must appropriate at least $50,000,000 annually for 10 years and tell our engineers and constructors to 'plan big.'"

Senator NEWLANDS, though now representing one of the States in the far West, is a native of Mississippi. He therefore knows something of the great river, whose unruly waters are now devastating the adjacent lands, and of the possibilities that would come of its control.

Senator NEWLANDS is right in placing waterway improvement on a parity of importance with such great public works undertaken by the Government as the Panama Canal and the irrigation of arid lands. The work should be undertaken on a big scale with a view to great accomplishment.

The improvement of the Mississippi River and its tributaries will be made the more pressing by the completion of the Panama Canal. All the vast valley will need the deep waterway to send its exports to the nearest port of shipment.

Deep waterway is a matter in which the South—that portion west of the Blue Ridge Mountains at least—has a vital interest. Senator NEWLANDS should have the strong support of this region in what he proposes. And it is not a matter for the South alone, but for the whole Mississippi Valley, and that is a very considerable portion of the country.

[From the Lynchburg (Va.) News, Apr. 10, 1912.]

THE RIVER PROBLEM.

The great flood in the Mississippi and its affluents is attracting public attention to one of the greatest problems confronting the American people. The Mississippi drains the central part of the United States, a region of wonderful fertility, already densely inhabited and destined to support a much larger population in the near future. The recurring floods bring danger to life and destruction to property throughout the great Mississippi Valley. It is estimated that the present overflow has cost the lives of 30 persons and destroyed property to the value of $10,000,000. How can such disasters be averted? How can the mighty river be controlled? That is the problem that the people of this country must endeavor to solve. It is a problem of greater magnitude than the construction of the Panama Canal, and its solution may involve a greater outlay. The people of Holland have protected their country against the North Sea by the construction of dikes. The original cost was enormous, and many thousands of dollars are expended every year in protecting and repairing the dikes on which the salvation of the country depends. The floods of the Mississippi are even more unmanageable than the waves of the North Sea. The best engineering skill of the age will be taxed to the utmost to devise means for restraining the angry waters. The sediment brought down by the floods has already raised the bed of the river above the level of the adjacent land. Whenever a break occurs in the levee the waters rush through and cover an immense area of fertile land. The Egyptians thousands of years ago attempted to control the Nile by constructing great reservoirs or lakes to hold back a part of the flood. The British are doing something of the same kind now by building the Aswan Dam. These examples may give a hint to our engineers. This subject came under discussion on Monday in the Southern Commercial Congress. Senator NEWLANDS made some very wise suggestions, which were published in this paper on yesterday, but their importance justifies their reproduction here.

Senator NEWLANDS advocated the appropriation of at least $50,000,000 a year for 10 years by the General Government to dam the great rivers and store their flood waters in such a manner as to prevent freshets and afford a constant flow of water throughout the year.

"The Mississippi flood," he said, "accentuates the agitation for big action regarding our waterways. The full regulation of our rivers can never be secured by mere channel dredging and levee protection. The whole river must be treated from source to mouth, including all its tributaries, by preventing swift run-off of the storm waters through storage and diversion of flood waters, both natural and artificial.

"We must undertake the work in a big way—just as we did the Panama Canal and the irrigation works."

Senator NEWLANDS is on the right road. Of course, his plan means the outlay of an enormous amount of money, but the object to be attained justifies the outlay. No nation was ever before called on to undertake a work of such magnitude. But this Republic is to-day the richest country in the world and it can afford the outlay. Then, too, it must be remembered that the benefits of the work, if properly done, will not be confined to the present generation, but will continue to bless those who come after us indefinitely, and it must not be forgotten that the saving of the loss of $10,000,000 a year, to say nothing of the loss of life as a human sacrifice, will furnish a motive for Government liberality in this matter which must command the general approval of the American people.

[From the Evening Star, Newark, N. J., Apr. 11, 1912.]

A NATIONAL PLAN OF FLOOD PREVENTION.

There is an object lesson for the National Drainage Congress at New Orleans on the need of an intelligent national waterways policy in this week's tremendous flood in the Mississippi Valley. Local devices to confine the mighty torrents have proven their feebleness. Senator NEWLANDS, of Nevada, shows that each river, with its sources and tributaries, must be treated as a unit, so that the surplus water can be held back in storage and used to irrigate arid lands and furnish power. Thus we shall harness one of the mighty forces of nature and make it man's profitable servant instead of his destructive foe. Senator NEWLANDS goes so far as to place this problem above the construction of the Panama Canal, and he argues that if it costs the Nation $50,000,000 a year for the next decade the money will be wisely and profitably spent. He urges that the scientific skill of the Nation and the States be enlisted in comprehensive plans of storage, irrigation, drainage, and flood prevention, embracing the 15 arid and the 15 swamp-land States.

[From the Trenton (N. J.) True American, Apr. 11, 1912.]

TO PREVENT FLOODS.

Flood devastation along the Mississippi, Missouri, and Ohio Valleys has been greater in some localities than ever before, but when it is known that the damage annually from floods throughout the country totals $100,000,000 the news of the present rampages will not create surprise. While Senator NEWLANDS's river-regulation bill, now pending in Congress, aims to prevent this great damage annually, the cost of the reform would reach sums that would appear almost prohibitive. Senator NEWLANDS would put a commission in charge of the rivers, construct reservoirs for the storing of the water, establish a system of reforestation, build levees, dig drainage canals, and in other ways endeavor to prevent the great overflows that bring distress and death. Expense should not be a deterrent when it provides a remedy for an evil as great as this. Taking into consideration the loss of life, the damage to property, the deprivations of those who inhabit the valleys, and the soil erosion, the proposition of Senator NEWLANDS might in the end prove an economy.

[From the Columbus (Ohio) Dispatch, Apr. 11, 1912.]

TO CONTROL THE FLOODS.

Senator NEWLANDS believes in checking the floods of spring, and, besides having a practical plan, has the courage to advocate for this purpose the expenditure of $500,000,000—$50,000,000 bonds a year for a decade. It has been amply demonstrated, he declares, that channel improvement alone is a failure, that dikes can not be built high enough or strong enough to confine the waters to their natural channel. It is time to turn to something else, and that is, he believes, the construction of reservoirs into which the surplus water may be turned and from which it may be taken for the purpose of irrigating the dry lands and for making power, a universal need in the industry of the country.

Anticipating the objection that there is not money for this enterprise, the Senator holds up to ridicule the nation that has not money enough for its necessary constructive work, and suggests the taxation

of wealth by inheritance, corporation, employment, and other similar taxes. Whatever the result of this propaganda, it is timely, for there is even now before the country the spectacle of the destruction of property and life by the floods in the great rivers. That it is not only a tremendous loss of property and business activity, but also an enormous waste of energy, needs no demonstration. The only possible argument is as to the course to be adopted to prevent the loss and to conserve and employ the energy. The Senator's estimate that the control of the floods overshadows in importance the construction of the Panama Canal invites credence.

—

[From the Nashville (Tenn.) Banner, Apr. 12, 1912.]

RIVER IMPROVEMENT.

Senator NEWLANDS's idea that appropriations for river improvement should be a lump sum and the work directed in systematic manner in lieu of the present "pork-barrel" process, with local specifications, is one that deserves attention.

A great deal of money has been spent in river improvements that is of only partial benefit, because other parts of the river are left unimproved. According to the Newlands idea the Government should complete the improvement of all rivers throughout their navigable length. That is a commendable idea and suggests a plan that would be a great improvement on the piecemeal, patchwork plan of river improvement that has been so long ineffectively pursued.

The waterways of the country are of great value to internal commerce, and ought to be improved to the highest possible point, making unobstructed navigation possible. Under the present system of river improvement everything is left to the enterprise of interested localities in securing special appropriations. The work is done in spots and without any connected system. Years are spent before anything substantial is accomplished, and then the lack of continuous improvement throughout the whole length of the stream renders local improvements of little avail. Some sort of reform in the method of river improvement is sorely needed, and the Newlands idea seems to be a good one.

—

[From the Shreveport (La.) Times, Apr. 12, 1912.]

PLEDGES NOT FULFILLED.

Senator NEWLANDS hails from the arid West and therefore is not immediately concerned about the floods in the Mississippi Valley or about waterways and how they should be treated in order to make them serve the country's welfare. Nevertheless Senator NEWLANDS has ideas on the subject, and he has not been slow to express them. He makes the charge that both political parties have failed to keep their pledges with respect to waterway improvement.

Senator NEWLANDS left Washington last Sunday on a speech-making trip to agitate the adoption of a constructive policy for the development of waterways. He spoke before the Southern Commercial Congress at Nashville Monday and was scheduled to address the National Drainage Congress yesterday in New Orleans. From New Orleans he will go to Pittsburgh to speak at a dinner given by the Pittsburgh Flood Commission.

"The present floods demonstrate forcibly the substantial foundation for the agitation for large action as to our waterways," said Senator NEWLANDS before leaving Washington. "Our rivers can never be regulated properly by unrelated projects for their improvement, such as by channel dredging and levee protection. If we are ever to prevent these disastrous floods and make the rivers serve their proper function of waterway navigation, each river must be treated as a unit from source to mouth and developed in a scientific manner. I shall urge the different associations which I address to appear immediately at Washington and demand from both political parties the performance of their platform pledges with respect to waterways. These platforms called for the cooperation of the scientific services of the Government, for cooperation between the Nation and the States, and for big continuing appropriations for the development of our waterways under comprehensive plans."

This idea has been indorsed in its essential principles by President Taft, when Secretary of War, and it is under legislation of this character that the Panama Canal and the national irrigation works have been so successfully prosecuted.

—

[From the Goldfield (Nev.) Tribune, Apr. 12, 1912.]

NEWLANDS'S PLAN APPROVED.

Out in this arid country reports from the flooded districts of the South have scarcely more than passing interest. Nevertheless a Nevada man is at the head of the waterways commission which has had under advisement for years plans for ameliorating conditions along the Mississippi, Missouri, and Ohio Rivers and their tributaries during the annually recurring floods.

Senator FRANCIS NEWLANDS has a bill pending in Congress which has been approved by the National Drainage Congress now in session at New Orleans. It is estimated that the damage from these floods during normal seasons amounts to at least $100,000,000 annually. This year the loss will be infinitely greater and the destruction of life and property will mark an epoch in national history. The Newlands proposed legislation bill provides for an outlay of $50,000,000 a year for a period of 10 years. This would be employed in the construction of levees, retaining walls, and reservoirs to impound surplus flood waters for use later in the year when the waterways are almost useless for want of a supply to keep their sluggish channels clear of obstructions. The Chicago Post, in treating the subject, outlines the plan as follows: It is proposed to treat the navigable streams as units from their sources to their mouths. Under the constitutional clause giving the United States Government exclusive jurisdiction over navigable waters Congress has the right to control, regulate, and standardize the streams. Under the public-health clause the Government is compelled to protect its citizens from floods and disease resulting from floods. The Newlands bill provides for carrying the surplus waters out over the arid and semiarid districts, in irrigation projects, to let it seep back gradually through the soil. It provides also for a uniform system of levees which has heretofore been done piecemeal without any correlation of effort or design. At present the entire levee system is endangered, because the work of controlling the rivers has not been started at the headwaters and among the tributaries. The Newlands bill has been indorsed all over the country, including the Irrigation Congress, the Pittsburgh Flood Commission, and numerous boards of trade and chambers of commerce.

—

[From the Providence Tribune, Apr. 13, 1912.]

THE RIVER FLOOD PROBLEM.

At the meeting of the National Drainage Congress in New Orleans the other day Senator NEWLANDS very truly said that the most vital function of that body is to bring order out of chaos, reconcile differences, eliminate controversies, and perfect a working plan broad enough to unite the entire Mississippi Valley. It has been demonstrated that the attempt to regulate rivers by channel improvement alone is a mistake; the proper way is to decrease the flood and raise the ebb and thus secure a stable flow of water. To do this it is necessary to treat each river as a unit, including its source and tributaries, with a view to storing and holding back the floods and utilizing the flood waters in the irrigation of arid lands and the development of water power, coupled with the construction of canals for drainage.

This work is not incomparable in importance with the construction of the Panama Canal. It would be tremendously expensive, but if it were done under comprehensive plans and with cooperation between the Federal and the State Governments the development of each use for the surface water would lessen the cost of maintaining a channel for navigation and would help to make practicable improvements the cost of which would otherwise be prohibitory. In the State of Louisiana alone it is said that there are 10,000,000 acres of rich agricultural land that can be reclaimed by drainage, protection from overflow, and flood prevention.

Every section of the Mississippi Valley is interested in some feature of the problem, and the object desired is to combine all elements into harmonious, concerted effort for the common good. To that end the skill of the various scientific services of the Nation and States should be united. Comprehensive plans should be prepared under their direction, embracing the 13 arid States and the 15 swamp-land States. The work might be organized under the supervision of the Engineer Corps of the Army in much the same way as the Panama Canal service.

"Let us candidly admit," said Senator NEWLANDS, "that during the next 10 years the work will cost $500,000,000, and provide a continuous appropriation of $50,000,000 annually in the firm faith that the money will be well invested. Once we unite in the support of such a policy the Ohio River Valley, with its need of flood protection; the upper Mississippi Valley, which requires the construction of reservoirs for the storage of water for navigation and for the control of floods; the Missouri River Valley, with similar needs; and the lower Mississippi Valley, with its need of drainage and flood protection; then it will be found that the National Congress will respond to the demand as it never has and never will respond to the demand for fitful and ineffective work by projects."

The pledges of both parties in 1908 as to waterway development have not been fulfilled, and the disastrous occurrences of the last two weeks should induce the people to express to Congress their emphatic opinion that it is time for both parties to redeem these pledges, instead of merely renewing them two months hence for campaign purposes. The excuse that the revenues do not warrant the expenditure can no longer be accepted. If the Government has not enough money to provide for this great constructive work, then there must be created more revenue by additional taxes levied on the wealth of the country in the form of inheritance taxes, corporation taxes, or occupation taxes, based on income. It would be an outrage, of course, to increase the taxes on consumption, from which nearly the entire revenue of the Federal Government is now derived; but there is no reason why the wealth of the country should not respond in some form to the obligations of the Government to exercise fully the power conferred upon it in the interest of the whole people.

—

[From the Reno (Nev.) Journal, Apr. 15, 1912.]

PROGRESSING.

It is one of the inexplicable things of nature that while one section of the country is flooded and damaged in the millions by too much water another is suffering to the same extent for lack of water. Possibly it is not entirely a natural phenomenon so far as floods are concerned, for these seem to have a pretty close relation to the cutting off of the timber resources of this country; but whether it is natural or artificial it is apparent that the conditions may be greatly mitigated and ameliorated by both public and private action.

Senator NEWLANDS's address in Nashville is peculiarly timely in the present flood emergency. His remarks appear to have a value and application not before so clearly seen. His theories are not mere academic ones, but have a practical import that can be readily brought down to that great measure of dollars and cents.

The Nevada Senator has persisted in the ideas of irrigation and reclamation for many years. He has had little encouragement from parties engaged in the perpetual bickering and puttering of partisan politics, but it is some comfort to know that the time is approaching when the country may expect to realize the practical results of his work.

—

[From the Santa Ana (Cal.) Blade, Apr. 16, 1912.]

TO PREVENT FLOODS.

Annual and semiannual repetitions of floods such as are devastating the Mississippi, Ohio, and Missouri Valleys, causing the loss of many lives and damage to property that will probably total more than $50,000,000, would be prevented by the passage of Senator FRANCIS NEWLANDS's river regulation bill, now pending in Congress. This is the statement of Frank B. Knight, consulting engineer, of Chicago, member for Illinois of the executive committee of the National Drainage Congress. Before leaving for New Orleans to attend the second meeting of that organization, April 10 to 13, Mr. Knight declared that the United States Government will be in the position of neglecting a plain duty until it protects its citizens from such destructive internal foes as floods and the disease that results from them.

"The damage to property from floods amounts to at least $100,000,000 a year," he said. "The Newlands river regulation bill provides a method of preventing floods at a cost of but $50,000,000 a year for 10 years. An editorial in the Chicago Post on the present situation says: 'Aside from the old question of saving the trees on the watershed so that the spring floods will be slower in running off, the only thing to be done is to keep on in the present course. More levees and higher levees will have to be built until the Mississippi is thoroughly harnessed.'

"The Newlands bill provides for an additional method. It proposes to treat the navigable streams of the country as units from their sources to their mouths. Under the constitutional clause giving the United States Government exclusive jurisdiction over navigable waters, Congress has the right to control, regulate, and standardize the streams. Under the public-health clause of the Constitution it is the duty of the Government to protect its citizens from these internal foes, floods, and diseases resulting from floods.

"The Newlands bill would place the task of regulating the navigable waters—treating them all as parts of a unified, comprehensive system—in the hands of a commission. It provides for the storage of the flood

waters in natural and artificial reservoirs, to hold them back until times of drought, when they can be let loose and maintain the navigable rivers at a proper depth. The reforestation of the watersheds is only one of the methods contemplated by the bill for checking the floods. Others are the construction of artificial reservoirs where these are possible and practicable, and the full utilization of natural reservoirs. It provides for carrying the surplus waters out over the arid and semi-arid districts, in irrigation operation, to let it seep back gradually through the soil. It provides for the digging of drainage channels to carry off the surplus waters from the lower reaches of the river, to help keep the navigable channels at a standard depth and prevent them from being shifting, also to utilize these drainage channels as additional waterways.

"It provides, also, for the construction of dikes and levees. The levee system is a good thing and has accomplished a great deal to protect people and property and to reclaim overflowed lands. But this work has been done by piecemeal; the various sections are unrelated. In time of unusual conditions, as at present, the entire levee system is endangered, because the work of controlling the rivers has not been started at the headwaters and among the tributaries.

"These floods occur and recur year after year. We can expect them to continue. We have the means, the ability, and the power to stop them. And it would be economy to do so. It would be economy even without considering the enormous waste of soil fertility caused by each flood.

"The people of Illinois, as well as those of the other Central States, are awake to the necessity of controlling the rivers. The existence of some 600 drainage and levee districts in Illinois shows that. But all flood prevention and drainage work needs to be brought under one comprehensive system."

The Newlands bill has been indorsed by a number of organizations all over the country, including the National Irrigation Congress, the Illinois Association of Drainage and Levee Districts, the Pittsburgh Flood Commission, and many boards of trade and chambers of commerce.

It will probably be indorsed by the National Drainage Congress at New Orleans.

—

[From the Ithaca (N. Y.) Journal, Apr. 16, 1912.]

CHECK THE FLOODS.

Day after day the public has been reading of the destructive floods in the Mississippi Valley until to nearly everyone has occurred the question whether something could not be done to prevent their recurrence year after year as has been the experience in the past.

Reforestation, of course, is the first suggestion for checking the enormous damage that is done by the high water. There is no denying that planting trees in the headwaters of the Mississippi would do a great deal to hold back the water.

Deepening the channel of the river is another suggestion that would help some, but the relief that it affords is only temporary as the stream gradually carries back as much as is taken out. Dredging if kept up, of course, will materially help to improve the situation. But neither of these methods would be sufficient.

What is needed is a series of dams in connection with an improved system of levees together with the two foregoing suggestions. That would solve the problem and put an end to the frightful annual loss of life and property.

Storage dams would not only hold back the water in times of flood, but they could be used in connection with a system of irrigation that would make them a profitable investment. In the rivers that flow into the Mississippi no doubt they could be made to develop light and power.

Senator NEWLANDS, in an address before the National Drainage Congress at New Orleans last week, declared that the problem of preventing the floods in the Mississippi Valley overshadowed in importance the construction of the Panama Canal; and so it does.

It would be tremendously expensive, yet if there were cooperation between the Federal Government and the various States affected the work could be carried to a successful completion. In the State of Louisiana alone there are 10,000,000 acres of rich agricultural land that could be reclaimed in connection with a proper system of handling the Mississippi's waters.

—

[From the Pittsburgh (Pa.) Chronicle Telegraph, Apr. 17, 1912.]

WATERWAY LEGISLATION.

Speaking at the banquet of the chamber of commerce and the flood commission last night Senator NEWLANDS, of Nevada, extended assurances of ultimate cooperation by Congress in the work of flood prevention which are full of encouragement. Mr. NEWLANDS admits that as it is Congress lags behind in this respect, public opinion in regard to the need of a logical system of flood prevention and river improvement being far in advance of congressional action. He holds, however, that it rests only with the public bodies interested in the solution of the problems in question to inspire adequate action at Washington. This, in his judgment, may be brought about by uniting upon some cooperative measure, full and comprehensive in its nature, as a substitute for the piecemeal system at present prevailing. Should a measure of this character be prepared and urged with due earnestness, Congress would be certain to respond. There is sound sense in the counsel thus given, and it is to be commended accordingly to the notice of the various river and harbor associations, waterway associations, and flood-prevention associations that are working, each on its own lines, in the various regions affected.

—

[From the Christian Science Monitor, Boston, Mass., Thursday, Apr. 18, 1912.]

LEVEES AND THE FLOODS.

As one of the Representatives in Congress of the State of Louisiana, JOSEPH E. RANSDELL has for years been among the foremost and ablest advocates of waterway improvements in the Mississippi Valley. As United States Senator elect from the same State it may reasonably be expected that after March 4 next his devotion to the cause for which he has so long and so faithfully contended will be continued and his usefulness to it increased. The other day in the National Drainage Congress at New Orleans he made an eloquent plea in behalf of the levee system of the lower Mississippi. According to one of the local newspapers, he directed attention to the vast benefit the levee system had been to the protection of fertile lands from overflow, and urged that the congress should insist upon stronger and higher levees and the greatest possible energy in improving and protecting those embankments.

Nobody even in the most superficial way acquainted with conditions along the lower Mississippi and its immediate tributaries will undertake to controvert Mr. RANSDELL'S testimonial to the service rendered by the levees in the past, but in the light of conditions that are even now present throughout a large section of the low country and in the Delta, is it not opportune to question the value of these barriers? Have they not failed repeatedly in times of emergency? Are they not failing now as safeguards of the plantation and reclaimed areas?

Owing to the topography of the country through which they flow, the lower Mississippi and its immediate tributaries must always be held within levees or artificial banks. This goes without saying. But would it not be a much wiser plan for the States subject to river floods and inundations to give hereafter less attention to effect and more to cause?

The levees would not need to be so strong or so high; they would not need to be constructed with regard to so much power of resistance if the strain upon them was diminished. Under ordinary pressure the levees should and would stand for years with little repair. Subject, as they are now, to the full force of the flood tide, crevasses are common, and the losses resulting from levee destruction alone, to say nothing of consequential damages, are enormous.

It is to be sincerely hoped that Senator Elect RANSDELL and his southern colleagues will unite with the middle western and northwestern delegations in Congress in a comprehensive movement for the storage of flood waters and the prevention of floods. Floods can be prevented at the headwaters and along the courses of the Mississippi and its tributaries by diversion of the surplus flow of the spring freshets into reservoirs much more effectually than by attempting to confine the vast cumulative volume after it has entered the main artery. How futile are the levee embankments has been all too apparent during the last two weeks. Has not the time come when men like Senator Elect RANSDELL should look to remedying the trouble at the root rather than in the branch?

—

[From the Courier Journal, Louisville, Ky., Apr. 19, 1912.]

THE FLOW OF THE OHIO.

Senator NEWLANDS'S bill to create a board of river regulation, with a view to flood prevention, has as one of its objects the building of storage reservoirs. The Newlands bill is a measure which provides for the cooperation of the National Government with States, municipalities, counties, and districts in flood protection, drainage, reclamation, forest preservation, and a multitude of other things. It would appropriate $50,000,000 a year for 10 years for these purposes. As it is receiving some indorsements from influential sources, the opinion of the Geological Survey as to the feasibility of reservoirs along the Ohio is worthy of note.

—

[From the Ogden (Utah) Examiner, Apr. 19, 1912.]

PEACE AND THE TREASURY.

In a recent address delivered by Senator NEWLANDS before the National Drainage Congress at New Orleans the frank statement was made that the one solution of the problem of big rivers was to appropriate $500,000,000 at once, and then a continuing provision of fifty millions a year indefinitely.

It looks like a tremendous amount of money. Possibly the Nation would gasp at such a mighty appropriation.

But the United States is less startled at a like expenditure for war. Of course, it is wise to be prepared against the possible attack of a foreign power. But out of the resources provided by the people there certainly should be an expenditure sufficient to prevent a recurrence of such flood horrors as this year has known.

The Treasury ought to be regarded as available for the uses of peace quite as much as for the demands of war. It is a bad commentary on the wisdom of the lawmakers if a preventable flood can waste millions of dollars in property and scores of lives. It is an equally bad commentary when the desert waits to bloom because there is no money left after providing for the Army and Navy—and that for a cultivated nation and in a time of peace.

—

[From the Salt Lake City (Utah) Tribune, Apr. 22, 1912.]

TO CURB THE FLOODS.

In view of the destructive floods in the Mississippi River and its great tributaries, the present is considered by Senator NEWLANDS, of Nevada, as an opportune time to inquire into the feasibility of controlling the surplus waters of the Mississippi Valley by way of storing them at their height and releasing them later on when the water is low, in order to help navigation. Accordingly he has introduced a bill to provide a board and a fund "for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection, and for the beneficial use of flood waters, and for water storage and for the protection of watersheds from denudation and erosion and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies."

He has also introduced another bill making an appropriation of $8,000,000 for the relief of the present sufferers by the floods along the Mississippi and its tributaries.

Referring to the matter of controlling the flood waters of the Mississippi Valley, the task is generally referred to in the eastern papers as one not impossible, but impracticable by reason of its assumed great cost. And yet the losses every year by the floods amount to millions of dollars. How many years would it take to have these losses aggregate as much as the cost of the work of flood prevention? We do not believe that it would be necessary to take very many years in order to make the accounts balance.

Taking the Ohio River to begin with, the floods are heavy and destructive every year. Occasionally the destruction amounts to very large figures, and the computation of those who have studied this question is that the losses of one generation would fully provide means for protecting all coming generations from destruction by floods in that river. The valleys of the tributary streams of the Ohio are long, usually quite narrow, but in all of them are good sites for dams and space for large reservoirs. It would cost a good deal of money to do the work, nor should the task of controlling all of the river floods of the Mississippi Valley be begun at once, for so little would be done in any one place that it would hardly count for anything. But if the work should be begun on the headwaters of the Ohio River, and extended to the main tributaries of that river, there can be little done but that the whole flood situation there could be controlled at an expense that would not be extraordinary when compared with the annual losses that the floods inflict. Senator NEWLANDS'S bill to set on foot the preliminaries by way of inquiring into the feasibility of such control is a good one, and now is a good time to pass it.

[From the Cincinnati (Ohio) Enquirer, Apr. 26, 1912.]

CONSTRUCTIVE LEGISLATION.

When a broad, well-considered, far-reaching, constructive measure is brought forward it is entitled to careful notice and consideration. It is well known that the methods of dealing with the great Mississippi floods have been spasmodic without sufficient general plan of continuity and wholly inadequate to control the constantly recurring disasters which they cause.

In order to meet the problem and at the same time to provide economically and scientifically for universal control and utilization of flood waters, Senator NEWLANDS introduced a bill for river regulation which has as yet received no consideration, but the principles of which have been approved in the platforms of both parties. Speaking to an amendment to the river and harbor bill, Senator NEWLANDS said:

"This question has been taken up in great detail by the Irrigation Congress, whose problems relate to the mountain regions above, tributary to the Mississippi River, and by the Drainage Congress, whose problems relate to the reclamation of swamp lands in the Mississippi Valley below; and they, in connection with the other waterway associations of the country interested in waterway development as a matter of navigation, have substantially agreed that the best way, the full and comprehensive way, of taking hold of the question of river development for purposes of navigation, to which the Federal jurisdiction attaches, is by regarding the river with all its tributaries as a unit; regarding the Mississippi River, with its tributaries of the Ohio, the Tennessee, and the Cumberland on the east, and with its tributaries of the Missouri, the Platte, and the Arkansas on the west, as a unit; requiring cooperative treatment upon the part of both the Nation and the State, the Nation being interested in developing these rivers for transportation, the States and the Nation both being interested in the development of the waste land of the country, whether it be the arid land above or the swamp land below, and also in the development of that great natural resource, the water power of the country, for the purpose of hydroelectric expansion.

"Suggestion is made that through a system of cooperation of the great scientific services of the country full and comprehensive plans can be made covering all these various forms of development, and also covering such an apportionment of costs and of benefits as will assign to the different sovereignties certain proportions of the cost, just as they receive certain proportions of the benefit."

That would be genuinely constructive legislation, with no politics in it, and of very great benefit to the whole country, and Congress, even though it be a campaign year, ought to spare the time to take it up and pass it. The country would appreciate attention to the real wants and interests of the people along such lines.

[From the Salt Lake City Tribune, May 3, 1912.]

Senator NEWLANDS, of Nevada, has taken a comprehensive view of the destructive floods in the Mississippi River which have impelled the Government to send large measures of relief and to spend great sums of money in feeding the homeless and distressed. He has brought forward in the Senate a proposition to provide what is called "a river regulation fund" of $50,000,000 annually for a period of 10 years after the completion of the Panama Canal, and an annual expenditure of $5,000,000 in the intermediate years. This he proposes as an amendment to the river and harbor bill offered by himself. The plan contemplates the control at the headwaters as well as at the lower branches of the troubled rivers of the Mississippi Valley system. The Senator claims that his measure not only would prevent destructive floods in all of the great watersheds of the country, but would provide for the use of flood waters on arid lands, for swamp-land reclamation, and for the development of water power. One-fifth of the money appropriated is to be spent on the lower Mississippi and one-tenth each on Atlantic coast rivers, Gulf rivers, exclusive of the Mississippi, the upper Mississippi, the Ohio, the Missouri, the Sacramento and San Joaquin, and the Columbia and Snake Rivers, and the remaining tenth in connecting the Great Lakes with the Ohio and Mississippi. The cooperation of the great hydraulic engineers of the country with the Engineer Corps of the Army is invoked, they to work under the supervision of the river regulation board, which is provided by the measure, and the cooperation of this board with States and municipalities is provided for.

The scheme is as broad as the country, and its great merit is that it will bring to bear upon the mighty question of handling the surplus waters of the United States the best scientific and practical knowledge in the country, as well as the unlimited resources of the National Treasury in the solution of the question. It is a vast proposition, comprehensive as to all the river systems, and as beneficial as it is inclusive.

There is no question about the practicability of the operations proposed by Senator NEWLANDS. The great deterrent is the vastness of the labor required; but since the engineering skill of the country is equal to the task, and since the resources of the National Treasury, applied as they would be generally throughout the country, are sufficient to meet the cost of solving the problem, there seems to be no reason to doubt the practicability of the Newlands program. The idea has been suggested by many heretofore, but there has been no concrete proposal in Congress to move for the solution of the great question in a practical way until now. Mr. NEWLANDS now comes forward with this practical proposition, involving a cost altogether of $500,000,000. We believe that this cost would go very far to settling the whole question; perhaps it would be ample for all the work.

The problem is to control the flood waters, store them at favorable locations in the valleys of the tributaries of the great streams, and release these stored waters later on when they would be beneficial to navigation. On the lower Mississippi River the great problem is to strengthen the banks and to prevent their being washed away. This can be done by proper piling and riprapping work, which the hydraulic engineers fully understand, and work which they have already said will be ample for the purpose.

The proposition of Senator NEWLANDS is both statesmanlike and eminently practical. It is, perhaps, too much to expect that the average Member of Congress will rise to the full comprehension and necessity of meeting the difficulties as Senator NEWLANDS proposes to meet them, but we can not doubt that eventually this matter will be taken up substantially on the lines marked out by him, and that the country will show that it is able to handle its river systems as well as the ancients in Egypt, Chaldea, and Assyria were able to handle the great rivers of their countries. To allow such vast destruction by floods and such impediments to navigation as annually intervene is a reproach to the skill and practical ability of the American people, and it can not be supposed that this reproach will be allowed to lie upon us forever.

[From the New Orleans (La.) Item, May 3, 1912.]

SOUTHERN VOTES WILL DO IT.

The Newlands bill provides the only radical and permanent remedy for such floods as now threaten so great an area of the Mississippi Valley and its tributaries or have already wreaked loss upon thousands of helpless people.

We are told, upon what we believe to be reliable authority, that the success of the Newlands bill in Congress now depends upon the southern vote. The West will support it. The Pittsburgh flood commission, representing important and influential interests near the headwaters of the Ohio, has indorsed it, and has already outlined for its own section a comprehensive plan for checking flood at its source. The southern vote is needed, and the southern vote, so we are told, will put this great measure through Congress.

New Orleans approves the Newlands bill. The Progressive Union indorsed it on Thursday. It is of vital importance, not only to Louisiana, not only to the Mississippi Valley, but to every State whose rivers flow into the Mississippi and to every State which has any large area in need of drainage or any large area in need of irrigation; for the bill provides for a general plan of Federal river protection, conservation, drainage, and irrigation, which should serve to check floods at their source, to hold the surplus water in great reservoirs to relieve the rivers and always offer a supply of water for dry lands, to deepen rivers for navigation, and to drain millions of acres of wet lands.

The present flood has demonstrated two things conclusively: First, that the river problem is a national problem; second, that the building of levees alone is not enough for real protection.

The Mississippi Valley is the drain vent of half the United States, and lower Louisiana is the outlet for the rest of the Mississippi Valley as well.

Other parts of the country, however, also suffer from flood, and the selfish interest of other States dictates a policy of cooperation with us in preventing floods.

But a higher duty calls them. They owe to us, who bear the brunt of the burden, their vigorous help in our demand that the Federal Government tackle the problem at its source, stop the deforestation which yearly permits greater floods to gather in mass, and hold back the swollen spring freshets until the lower rivers have worked off their own surplus and offer a safe channel to the sea.

To a great extent, however, our relief from the danger which annually threatens us lies in our own hands.

The Newlands bill offers the best plan thus far suggested, and southern votes can pass it.

Now is the time for the South to unite in solid support of it. The whole country is awake to the importance of the work, and the sympathy of all the people is with us.

Now is the time to mold a new national policy of river protection while public sentiment is softened to receive the impression.

[From Times-Democrat, May 5, 1912.]

FEDERAL CONTROL OF LEVEES.

The suggestion that the United States Government take charge of the levees of the Mississippi River, now being discussed in the press and by public men in Congress and elsewhere, is by no means a new proposition, says Mr. W. O. Hart, of the Louisiana Historical Society, for 30 years ago President Chester A. Arthur sent a message to Congress, giving it as his opinion that the action of the Federal Government in taking charge of the levees should no longer be delayed, no matter how much it would cost. Unfortunately, the country at that time was in the grasp of partisan politics, and the matter was not followed up, though the press at the time considered the matter of great benefit and importance to the people.

MESSAGE OF PRESIDENT ARTHUR.

The message of President Arthur is well worth reading at this time, and is as follows:

EXECUTIVE MANSION, *April 17, 1882.*

To the Senate and House of Representatives:

I transmit herewith a letter dated the 29th ultimo, from the Secretary of War, inclosing a communication from the Mississippi River Commission, in which the commission recommends that an appropriation may be made of $1,010,000 for "closing existing gaps in levees," in addition to the like sum for which an estimate has already been submitted.

The subject is one of such importance that I deem it proper to recommend early and favorable consideration of the recommendations of the commission. Having possession of and jurisdiction over the river, Congress, with a view of improving its navigation and protecting the people of the valley from floods, has for years caused surveys of the river to be made for the purpose of acquiring knowledge of the laws that control it and of its phenomena. By act approved June 28, 1879, the Mississippi River Commission was created, composed of able engineers. Section 4 of the act provides that—

"It shall be the duty of said commission to take into consideration and mature such plan or plans and estimates as will correct, permanently locate, and deepen the channel and protect the banks of the Mississippi River; improve and give safety and ease to the navigation thereof; prevent destructive floods; promote and facilitate commerce, trade, and the postal service."

The constitutionality of a law making appropriations in aid of these objects can not be questioned. While the report of the commission submitted and the plans proposed for the river's improvement seem justified as well on scientific principles as by experience and the approval of the people most interested, I desire to leave it to the judgment of Congress to decide upon the best plan for the permanent and complete improvement of the navigation of the river and for the protection of the valley.

SHOULD PROTECT MISSISSIPPI VALLEY.

The immense losses and widespread suffering of the people dwelling near the river induce me to urge upon Congress the propriety of not only making an appropriation to close the gaps of the levees occasioned by the recent floods, as recommended by the commission, but that Congress should inaugurate measures for the permanent improvement of the navigation of the river and security of the valley. It may be that such a system of improvement would as it progressed require the appropriation of twenty or thirty millions of dollars. Even such an expenditure, extending, as it must, over several years, can not be regarded as extravagant in view of the immense interest involved. The safe and convenient navigation of the Mississippi is a matter of concern to all sections of the country, but to the Northwest, with its immense harvests, needing cheap transportation to the sea, and to

the inhabitants of the river valley, whose lives and property depend upon the proper construction of the safeguards which protect them from the floods, it is of vital importance that a well-matured and comprehensive plan for improvement should be put into operation with as little delay as possible. The cotton product of the region subject to the devastating floods is a source of wealth to the Nation and of great importance in keeping the balances of the trade in our favor.

It may not be inopportune to mention that this Government has imposed and collected some $70,000,000 by a tax on cotton, in the production of which the population of the lower Mississippi is largely engaged, and it does not seem inequitable to return a portion of this tax to those who contributed it, particularly as such an action will also result in an important gain to the country at large, and especially so to the great and rich States of the Northwest and the Mississippi Valley.

CHESTER A. ARTHUR.

[From the Taunton (Mass.) News and Bay City (Mich.) Tribune, May 8, 1912.]

REGULATION OF THE BIG RIVER.

The needs of 200,000 persons, made homeless and destitute by floods, will be urged as ample reason for the preventive measure of Senator NEWLANDS in his recent amendment to the rivers and harbors bill, appropriating $5,000,000 a year for the control and regulation of the Mississippi River and its tributaries, and $50,000,000 a year after the completion of the Panama Canal. It is the contention of the advocates of this measure that if it is passed and put into effect the Mississippi and tributaries can be controlled, and the Government may not again be called upon to feed and care for thousands of victims of the action of the rivers as in the present case. This amendment is substantially the resolution adopted by the National Drainage Congress at New Orleans April 12. First Vice President Edmund T. Perkins, of Chicago, is cooperating with President David R. Francis, of St. Louis, of the congress; Vice President E. J. Watson, of Columbia, S. C.; Vice President Barnard Baker, of Maryland; and Vice President Edward Wisner, of New Orleans, in the work of getting a large and strong delegation from all parts of the country to urge the passage of this or similar legislation in the interests of humanity and to prevent the repetition of the appalling flood destruction of life and property of the last two months.

[From the New York Press, May 12, 1912.]

URGES RIVER REGULATION—LOUISIANA MAN SAYS FLOOD WATERS FROM OTHER STATES CAUSE TROUBLE.

That it is "the duty of the National Government, by a broad and sane system of conservation at the headwaters, such as is contemplated in the Newlands river-regulation bill," to protect Louisiana from the flood waters of 30 other States is contended in a telegram sent yesterday to the New York Chamber of Commerce by M. B. Trezevant, secretary of the New Orleans flood relief committee and the New Orleans Progressive Union.

The message points out that the floods at present sweeping parts of Louisiana come from almost two-thirds of the States of the Union, and asks why Louisiana should spend millions of dollars annually to guard herself from such trouble. Speaking for the citizens of New Orleans, the message says:

"We earnestly urge the citizens of the United States, and particularly the newspapers, to give us the only outside aid we ask—that is, discredence of false and alarming stories and support of the Newlands river-regulation bill, which will harness the floods and force them to serve instead of to destroy."

Louisiana, Trezevant says, has spent $50,000,000 out of the public treasury, and private individuals and railroads millions more, for levee protection since the Civil War. The city of New Orleans has been unaffected by the Mississippi Valley floods, and resentment is shown by the residents at reports that the city has been in danger. No levees in 100 miles of the city have broken, and engineers of the city, State and national, agree New Orleans is not menaced by the torrents.

[From the New York Sun, May 12, 1912.]

NO FEAR FOR NEW ORLEANS—BUT THE CITY WOULD LIKE AID IN PASSING THE NEWLANDS BILL.

The following dispatch from M. B. Trezevant, secretary of the New Orleans flood-relief committee and the New Orleans Progressive Union, was received yesterday by the chamber of commerce:

"The city of New Orleans is absolutely unaffected by the floods in the Mississippi Valley, though a number of parishes of the State of Louisiana have been inundated and the floods have therefore wrought great damage outside of the city. New Orleans is herself alleviating distress with contributions of money, clothing, and bedding, and the Government with rations, and the State militia aiding in rescue work. No levees within a hundred miles of New Orleans have been broken, and all stories that the city is under water are the wildest sort of irresponsible canards.

"The United States, the State, and city engineers agree that New Orleans will safely pass through the crisis and that the worst is now over. The greatest damage is the farmers' loss of opportunity to make crops, and we are now working out a plan to begin the reconstruction of our agricultural districts affected as soon as the waters recede.

"New Orleans, because of its peculiar defensive strength, is the safest city in the Mississippi, Ohio, or Missouri Valleys, despite the fact that Louisiana must protect herself from the flood waters of some 30 other States. This should be the duty of the National Government by a broad and sane system of conservation at the headwaters, such as is contemplated in the Newlands river-regulation bill.

"Why should Louisiana spend millions of dollars annually to protect herself from the waters which come from nearly two-thirds of the Union? Louisiana has spent $50,000,000 out of the public treasury and private individuals and railroads millions more for levee protection since the Civil War. We earnestly urge the citizens of the United States, and particularly the newspapers, to give us the only outside aid we ask; that is, discredence of false and alarmist stories and support of the Newlands river-regulation bill, which will harness the floods and force them to serve instead of to destroy."

[From the New Orleans (La.) Picayune, May 17, 1912.]

CYPRESS MEN FAVOR GOVERNMENT LEVEE BUILDING, INDORSING NEWLANDS BILL.

The Southern Cypress Manufacturers' Association adopted the following resolutions:

"*Resolved*, That the Federal Government should immediately extend such temporary relief as may be necessary to repair the broken levees; and, further, should absolutely take over the work of constructing future levees, including revetments, and otherwise protecting the lower Mississippi Valley from overflow.

"*Resolved further*, That the Southern Cypress Manufacturers' Association hereby indorses and approves the resolution of the Pittsburgh Chamber of Commerce, adopted April 13, 1911, indorsing Senator NEWLAND'S river-regulation bill, and urges its passage by Congress."

[From the News-Scimitar, Memphis, May 18, 1912.]

URGES SUPPORT OF NEWLANDS BILL.

George H. Maxwell, leading national authority on drainage and regulation work, addressed the City Club Saturday. He urged the club to support the Newlands bill, now pending in Congress, providing for a board of river regulation to control the flow of navigable rivers and to provide flood prevention and protection. Mr. Maxwell declared that he had no fight to make on the levee system, but insisted that the levees must be supplemented by headwater control of the Ohio, Missouri, and Mississippi Rivers by storage reservoir. He said no amount of levee building in itself will afford a guaranty against floods should the waters of the three great streams descend at once from Cairo to the Gulf.

The club, by resolution, went on record as favoring the Newlands bill, and a committee of five will be named to give publicity to the measure.

[From the Racine (Wis.) Times, May 18, 1912.]

MAKING WATERWAYS VALUABLE.

Senator FRANCIS G. NEWLANDS is earnestly advocating the organization of a national board of river regulation, in which shall be coordinated the Engineer Corps, Reclamation Service, Weather Bureau, and Forestry Service, for the purpose of formulating a sensible policy in regard to domestic commerce and the conservation of the national water supply.

The recent Mississippi floods have demonstrated the idiocy of permitting billions of gallons of water to run riot over the fertile lands of the Central West, ruining property and taking lives, and then dumping into the ocean. Three months later these same lands will need water to save the crops, and river steamboats will be lying on sand bars because of the shallowness of the channels.

If the Army engineers could take hold of this problem as they have taken hold of the Panama Canal construction, it would not take them long to evolve a plan for utilizing the tremendous water supply which goes to waste every spring in the United States. The river problem would seem to be open to solution. The rainfall for the year, if distributed fairly, would result in a standard flow of the river and its tributaries which would be safe for navigation and attended with no destructive results. But the melting of snows in the Rocky, Allegheny, and Appalachian Mountain systems, together with spring rains, all coming about the same time, create an enormous run-off from an area comprising nearly two-thirds of the United States, and this run-off is emptied into the Gulf through a very narrow space.

The Government must not only increase the annual appropriations for bank revetment and levee projection below, but must arrest the run-off by storage for irrigation and water power.

[From the Houston Chronicle, May 19, 1912.]

A SANE RIVER PLAN AT LAST.

Elsewhere in this day's Chronicle we publish portions of a debate that took place in the United States Senate on May 9, the subject being the need for a larger, more comprehensive, and more intelligent treatment of river control in this country.

Senator NEWLANDS, of Nevada, outlined the problem and urged action on his bill to create a river-control board, enlisting the cooperative efforts of all the national services which are directly or indirectly engaged in this or collateral work, but are not working together and to a common end, as they should be.

It is proposed in Senator NEWLANDS'S bill to appropriate $500,000,000, to be expended at the rate of $50,000,000 a year for 10 years, in building a system of reservoirs, dams, power plants, channel improvements, etc., which will put an end forever to this country's $250,000,000 annual loss by flood and will transform the cause of this vast loss into a permanent source of great profit.

His bill embodies a plan which has received the indorsement of the National Waterways Congress and of both the Republican and Democratic Parties in national convention. It is a sane plan. It is the first plan ever offered big enough to cover the needs of the situation.

As Senator WILLIAMS declared, the doing of this work at a cost of $500,000,000 would be worth ten times as much to the people of the United States as the construction of the Panama Canal at a cost of $400,000,000 will ever be.

All that stands in the way of the adoption of this plan by Congress, as Senator NEWLANDS stated very plainly, is the secret and subtle opposition of the railroads, which dread the competition of an effective system of navigable inland waterways, and the disposition of Members of Congress to scramble for the largest obtainable shares of the "pork" provided by the annual rivers and harbors bill.

The spoils system and the opposition of the private owners of the steam railroads of the country prevent action by Congress on sane lines and condemn the country to the continuance of a policy which wastes millions every year by spending relatively small sums piecemeal, instead of doing the whole job and doing it right in the shortest time required for the completion of the work.

The Chronicle assures the Texas Members of Congress that the people of this State will support them loyally, enthusiastically, in every bit of support that they may give to this great plan. Our sister States, Louisiana and Mississippi, are the chief losers through inaction. It is the Nation's problem and the South's sorrow. Surely it is the duty of every southern Representative in either branch of Congress to line up in support of this measure.

[Night letters.]

THE WESTERN UNION TELEGRAPH CO.,
New York, April 11, 1912.

GEORGE H. MAXWELL,
National Drainage Congress, New Orleans, La.

A large portion of machinery necessary for Government to purchase for construction of Panama Canal, which is now rapidly becoming idle, is especially adapted for dredging and constructing levees, the character of work the Mississippi Valley needs, and which is now so

strongly impressed upon the minds of the public through great losses of property and life incurred through recent floods. This machinery, if sold secondhand, would not bring more than junk prices, but the machinery and organization which the Government now has would be of great benefit to all if utilized in protecting, through drainage and levees, the overflowed lands of Mississippi Valley. Through your knowledge of this subject, to which you have given particular attention, you know better than others that opening streams and removing obstructions so as to permit free flow of great volume of water greatly relieves the levees. With such machinery and forces now at command of Government ample dredging and adequate levee work can be done cheaper than ever before, and now is an opportune time to undertake it. Am very sorry, indeed, I could not attend this session of Drainage Congress, but it was absolutely impossible for me to get away.

B. F. YOAKUM.

ST. LOUIS, MO., *April 11, 1912.*

GEORGE H. MAXWELL,
St. Charles Hotel, New Orleans, La.

People of the upper valley who are prevented by floods from attending Drainage Congress, urge you, before adjournment, ask National Congress to transfer fast as possible all available engineers and machinery from Panama Canal to Mississippi River. Situation serious, and must be handled at once by men competent to deal with a big problem.

O. M. KILLOUGH,
President St. Francis Levee Board, Mississippi Valley Drainage Association.

[Republished from Gulf States Farmer, June, 1912.]

FLOOD PREVENTION IN THE LOWER MISSISSIPPI VALLEY—THE LEVEE SYSTEM MUST BE SUPPLEMENTED BY SOURCE STREAM AND HEAD WATER CONTROL, AS PROVIDED FOR IN THE NEWLANDS RIVER REGULATION BILL.

The most important problem before the people of the United States to-day is that of protecting the lower Mississippi River Valley from overflow.

The question is not whether it shall be done; it must be done. The only question is "How shall it be done?"

Two plans are proposed, and the issue before the country is "Which plan shall be adopted?"

The first plan is the "levees only" policy, which proposes a system of stronger and higher levees from St. Louis or Cairo to the Gulf, with revetments and bank protection, but takes no account of the causes for the steadily rising flood plane, which goes higher and higher with each successive great flood, and takes no account of any policy of controlling any part of the floods in the territory of their origin.

The other plan is that embodied in the Newlands river regulation bill, which proposes a system of levees from St. Louis to the Gulf as high and strong as the advocates of the "levees only" policy contemplate, with every possible protection by revetments and bank protective works. But the advocates of the Newlands bill stand squarely upon the fact that no levee system can be built that will permanently protect the lower valley from overflow unless it be supplemented by an additional policy of harnessing and holding back as large a portion of the flood water as possible in the drainage basins of the streams where it originates.

There can be no doubt of the fact that the flood plane at Cairo can be lowered 10 feet on the Ohio River, and as much or more of a reduction made in the level of the floods of the upper Mississippi River and the Missouri River where they join to form the lower Mississippi.

If this had been done before the great flood of 1912, a volume of water equal to that which poured through the crevasses and made reservoirs for itself by overflowing millions of acres of fertile farm lands, would have been held back in the watershed of the tributaries of the Ohio, the upper Mississippi and the Missouri, and would never have reached the Mississippi River at all.

The result of this would have been such a lowering of the flood plane that the levees would have carried the entire volume of water that reached the Mississippi, the Reelfoot levee would not have been topped, no crevasses would have occurred, no damage would have been done, no lives would have been lost.

That is what would have happened if the Newlands river regulation bill had been passed 10 years ago. It would have prevented losses and damage caused by this great 1912 flood that are estimated to have amounted to over $100,000,000, and some estimates run as high as $250,000,000—one-half of the total amount appropriated by the Newlands bill.

Of course estimates of damage at this time are mere surmise, but there is no possible doubt whatever that the expenditure of the $50,000,000 a year for 10 years appropriated by the Newlands bill would save an annual property loss of more than that from floods alone without figuring on the benefits from regulating the flow of the rivers for the use of the water for navigation and for all industrial and beneficial uses.

The Newlands river regulation bill contains the following appropriation:

"For the Corps of Engineers, United States Army, for building and maintaining revetments, dikes, walls, levees, embankments, gates, wasteways, by-passes, flood-water canals, restraining dams, impounding basins, and bank protective works for river regulation, and as a means to that end the building of works for reclamation, drainage and flood protection, and for building reservoirs and artificial lakes and basins for the storage of flood waters to prevent and protect against floods and overflows, erosion of river banks, and breaks in levees, and to regulate the flow of source streams and navigable rivers, and reenforce such flow during drought and low water periods, and for the operation and maintenance of the same, $24,000,000."

It is proposed to increase this amount to $30,000,000 and to apportion from the entire $50,000,000 annually appropriated by the bill the sum of $10,000,000 to the lower Mississippi River; $10,000,000 to the Missouri River drainage basin; $10,000,000 to the Ohio River drainage basin; $5,000,000 to the upper Mississippi River drainage basin; and $5,000,000 to the Sacramento and San Joaquin Rivers, as urged by the River Regulation Commission of Stockton, Cal.

The Newlands bill expressly provides that the appropriations made by it are to be supplemental to such appropriations as may be made by Congress through the river and harbor bills.

The advocates of the Newlands bill say: "Build levees, but do not stop there. Supplement that safeguard by protecting the watersheds from denudation and erosion; check the rapid run off and sudden floods caused thereby; harness the floods where they originate and make the levee system safe by reducing the flood volume to such an extent that the levees will always carry it without danger of crevasses or of the flood going over the levees. In other words, plan and build the reservoirs on the head waters instead of having the river break over the levees and make reservoirs for itself in the lower valley, as it has done.

[From the Agricultural Magazine, St. Anthonys Park, St. Paul, Minn.]

CONTROLLING THE GREAT RIVERS.

If organized effort, the union of heretofore conflicting interests, and an inspiring leadership can accomplish it, then the improvement of the great rivers of the Mississippi system along the lines of the broadest statesmanship, the greatest beneficence, and the truest economy seems now for the first time "within sight."

The organized effort is seen in the cooperative work now being done by commercial bodies in the great cities all the way up from New Orleans to Pittsburgh, Duluth, the Twin Cities, and Omaha. The union of diverse interests is illustrated in the fact that the irrigationists, the levee builders, and the men who are working mainly for the development of water transportation have now pooled their issues for a common object. The inspiring leadership is found in the person of George H. Maxwell, the author and chief promoter of the national irrigation act, the magnetic orator, and the apostle of the small farm as against the baronial estate. He kindles a flame of enthusiasm for the project wherever he speaks.

All the organizations, all the forces referred to, are to be represented in a grand "river regulation and flood prevention conference" to be held at New Orleans January 6 and 7, 1913, to voice what is fast becoming a "nation-wide" demand for the passage of the Newlands-Bartholdt river regulation bill.

This bill involves a frank recognition of the principle laid down many years ago by Gen. Haupt—one of the foremost of our Government engineering experts—that the place to begin the work of flood prevention and river improvement is at the headwaters, not on the lower stretches of the river. Hold back the floods by storing in great reservoirs along their higher reaches the extra feet of water constituting "the crest" of the floods, and not only will the rivers no longer overflow the country along the lower levels but the water thus held back will serve to maintain navigation in seasons of "low water." And not only this, but the stored-up water in the reservoirs can be made also to serve at innumerable points the purposes of irrigation and the creation of water powers. The cost of levee building will be much reduced. And thus the "water wealth" of our great valley becomes one of the grandest of our material assets, whereas now its waste makes it an annual liability.

Minnesota is one of the States which will share most largely in the benefits sure to flow from the passage of this bill, especially in the establishing of cheap water transportation for the products of the farm. It is an "American," not a partisan measure. It plans a vast expenditure—$50,000,000 a year or more. But in carrying forward the work it is proposed to employ the same engineers and the same "plant" now engaged on the Panama Canal. This is a guaranty of efficiency and economy; therefore it is to be hoped that the people of Minnesota will urge upon their Congressmen an energetic support of the bill.

[From San Francisco (Cal.) Call, June 24, 1912.]

TOUCHES CALIFORNIA IN THREE WAYS.

Among other declarations in the Republican platform, the one that most concerns California deals with provision for the prevention of floods. The plank is suggested by the recent devastation of the Mississippi region by overflow, but any plan for the protection of that territory will necessarily involve the provision of similar measures for the prevention of overflow by the rivers of California.

Senator NEWLANDS, of Nevada, has been the chief proponent of the general scheme of legislation for this purpose, and his plan includes provision for the California rivers in proportion to their needs.

This matter of flood prevention has assumed the importance of a great national question, as may be inferred from its inclusion in the Republican platform. Treatment of the whole subject on a comprehensive scale is being urged by organized effort, as may be gathered from the following statement issued on behalf of the Mississippi Valley bodies:

"Harness the source streams. Conserve the freshet waters for dry season navigation. Draw power from dams and reservoirs. Turn the floods of the upper Missouri out over the dry bench lands. Build strong levees from Cairo to the Gulf that will hold the partially controlled floods in the lower river. And what will be the result?

"The reservoirs will supplement the summer flow and thereby provide at all times an adequate supply of water for the system of locks and dams so that there will always be a navigable stage in the Ohio on which to float out to tidewater the coal, the iron, the steel, and the manufactured products of that portion of the country, while the power developed will go a long way toward increasing the economy of manufacture.

"In the upper Missouri River country hay will grow on millions of acres of land now devoted to grazing, and the production of cattle that will then thrive on that land will be increased tenfold. In addition, summer seepage will return enough water to the river to supply a navigable stage throughout the dry season."

The reasoning applies with equal force to the Sacramento and San Joaquin Valleys. It is not a question of flood prevention merely, but involves in an important way the promotion of irrigation and the conservation of navigation in the dry season.

In a word, the policy recommended in the platform touches California in three several important ways.

The Springfield (Ill.) News of July 4, 1912, says:
